The executive director of Indian Institute of Mass Communication (IIMC), Ravinder Kumar, has drafted the main terms of the agreement between IIMC and University of Delhi which will include the following key points:

1. IIMC will be responsible for the management and operation of the building.
2. The building will be used as a university campus for research, teaching, and administration.
3. IIMC will provide technical support and infrastructure to the university.
4. The university will provide administrative and teaching support.
5. A joint committee will be formed to oversee the implementation of the agreement.

The agreement will be signed in the presence of senior officials from both institutions, including the Vice-Chancellor of University of Delhi and the Director of IIMC. The signing ceremony is scheduled to take place on [date].

For more information, please contact the IIMC Public Relations Office at [phone number] or [email address].
Environment Ministers of 4 States skip meet on stubble burning

Air on brink of turning severe

T he air quality of national capital has shown no improvement despite the shock of measures taken by the Centre but Delhi is yet to come to its ‘comfortable’ zone.

The National Air Quality Index (NAAQI) marked values on Thursday at 235. Fine particulates can be seen with a diameter of 2.5 micrometres (particles in the air with a diameter of less than 2.5 micrometres) on Thursday put up guidelines for the public to file complaints against agencies or individuals through its mobile application.

It has also directed the pollution control boards of Punjab and Haryana and Delhi to ensure that the NAAQI is likely to remain in the category of ‘very poor’ from Thursday and Friday. An AQI between 201 and 300 is considered “poor” and 301 to 400 “very poor”, while an AQI more than 400 is considered “severe plus”.

The Supreme Court- appointed Environment Pollution Control Board (EPCB) has urged Delhiites to use public transport for the period and use public transport or other means.

Delhi Chief Minister Arvind Kejriwal told the media on Thursday that he had instructed transport agencies to continue operation of public transport even if the NAAQI reached 200.

According to a senior official, 1,300 senior citizens from every category, including senior citizens, students, teachers, and patients of cancer and heart diseases, will be given free passes for the non-motorized mode of travel in the city.

The government has also encouraged the people of the country to use public transport, walk or cycle to reach places.

The government has also announced that the work of cleaning the Chandigarh area has been completed, and the efforts are on to ensure that the city is clean and clear of any pollution.

The government has also decided to continue the ban on construction activities on the banks of the Yamuna, and the ban will remain in force for a week.

The Centre has also directed the pollution control boards of Punjab and Haryana to ensure that the NAAQI is likely to remain in the category of ‘very poor’ from Thursday and Friday.

CAB RATES: KVIC 

**New Delhi:** The government has announced that as of April 1, 2016, cab aggregators will have to ensure that customers get minimum assured prices for cab services.

The Ministry of Road Transport and Highways decided the move in a meeting with representatives of the cab aggregators and cab operators last month. The government stresses that cab aggregators would be held responsible for rate cut if there is any price change in the cab fare. The ministry has released a list of 50 cab aggregators.

**KVIC:**

The Khadi and Village Industries Commission (KVIC) has decided to auction a plot of 39 acres of land at Surajkund in Faridabad district for a proposed International Convention Centre (ICC) that will cost Rs 2,254 crore.

KVIC chairman S. Mital said, “This is the real culture of the country.”

The auction was announced by the KVIC and will take place on September 18, 2016.

**WASTE-MANAGEMENT:**

The government has directed the states and union territories to take steps to prevent pollution in the vicinity of historical places.

Environment minister Prakash Javadekar said, “We have directed that no pollution should happen around historical places like Jallikattu, Sabarimala? But Ayodhya is not a priority for the Ayodhya matter is not a priority for the political leaders of the country.”

**CBI:**

The Central Bureau of Investigation (CBI) has registered a case against Prime Minister Narendra Modi and senior RSS leader Manmohan Vaidya in a complaint related to the Lakhimpur Kheri violence.

The complaint was filed by the victim’s family.

EC gets latest M3 EVMs for LS polls

A head of the Lok Sabha polls next year, the Election Commission (EC) has ordered delivery of around 22.3 lakh ballot units and 18.5 lakh control units of the latest version of electronic voting machines, 3M.

It is estimated that as many 22.3 lakh ballot units, 18.5 lakh VVPATs or paper trail machines and 50 million EVMs will be deployed for the 2019 Lok Sabha polls.

The number of machines includes the ballot stuck for training as well as reparation. These machines would be deployed at the major 10.6 lakh polling stations across India in the final parliamentary polls.

The EC said the new M3 EVMs will be used in the counting assembly poll at five States.

Another feature of the new M3 EVMs is a digital trail. That means it can automatically detect any fault with the software or the system and will show it to the display. According to officials, the Central Unit and Ballot Unit can communicate with each other. If someone plants a Ballot Unit on the Control Unit outside, the digital signature will not match and the machine will reject the ballot.

The M2 and mark 2 EVMs (2019-18) can be upgraded to this system.

Another feature of this new M3 EVM is a diagnostic feature. That means if any fault occurs in a particular assembly, the machine will be shown in the counting assembly poll at five States.

The Bharat Electronics Ltd and the Electronics Corporation of India Ltd were mandated to deliver these machines to the poll panel by September 30 and now the delivery has been completed, the official said.

The new M3 EVMs will always be an important part of the election machinery and will stop functioning if any error is introduced into the system.

Addressing impact of climate change on crops

T he impact of climate change on crops and their production is a matter of concern for farmers, scientists and the common man alike.

Scientists have been warning for years that climate change will result in extreme weather events, including drought, flood, cyclone, heat waves, cold waves, frost and hail storms.

India is vulnerable to the impact of climate change because it has over 1,332 million hectares of cropland and the Indian agriculture sector accounts for about 10% of the global food production. In India, the agriculture sector contributes about 15% to the country’s GDP.

The impact of climate change on crops is evident in the declining yields of several crops. According to the National Integration of Crop Research (NICAR) has taken up a flagship project on National Interventions on Climate Resilience for Farmer’s Welfare (NICAR-FW), the agriculture sector is not only vulnerable to climate change but also sensitive to the economic and social factors that affect agriculture.

According to the project, the yields of several crops have shown a declining trend in the recent years. The yields of rice, wheat, maize, and pulses have shown a declining trend in recent years. The project also highlights the need for developing climate-resilient crop varieties, which can be a solution to the problem of declining yields.

The project aims to develop climate-resilient varieties of rice, wheat, maize, and pulses through the use of crop modeling and simulation. The project also aims to develop a climate-resilient crop management package, which can be used by farmers to improve the productivity of their crops.

The project is being implemented in collaboration with the Indian Council for Agricultural Research (ICAR) and the National Agricultural Research Systems (NARS). The project is being implemented in several states, including Maharashtra and Madhya Pradesh.

The project has been supported by the National Institute for Climate Studies (NICARN) and the Indian Council for Agricultural Research (ICAR).

The project is expected to be implemented in the next five years.
BJP candidate pulls out 2 days after announcing Karnataka by-election

Announces support to CM’s wife

A day after the ruling party’s candidate had continued to rule India by forming the NDA government in the state, Vijay Rupani’s announcement has been hailed as a victory by the Indian National Congress (INC). The Congress party had once again announced its support to Rupani, who had signed as the candidate for the BJP in yesterday’s election. The election was held on the 14th of this month and the results will be announced on the 17th.

The news that Rupani had signed as the candidate in the by-election came as a surprise to many. In a statement, the Congress party said that it was sending its best wishes to Rupani and would continue to support him in the by-election campaign.

Rupani had earlier announced his support to the Congress party in the by-election campaign. The Congress party had decided to support Rupani in the by-election, which was being held for the seat of Ahmedabad (North) in the Gujarat Assembly.

Bharatiya Janata Party (BJP) leader Rupani had earlier announced his decision to contest the by-election. The by-election was being held for the seat of Ahmedabad (North) in the Gujarat Assembly.

BJP’s move was welcomed by the opposition parties, who had earlier announced their support to Rupani in the by-election campaign.

The by-election campaign was being held for the seat of Ahmedabad (North) in the Gujarat Assembly.

According to the election results, Rupani had secured 44,666 votes, while the Congress party had secured 40,278 votes.

Rupani had earlier announced his support to the Congress party in the by-election campaign. The Congress party had decided to support Rupani in the by-election, which was being held for the seat of Ahmedabad (North) in the Gujarat Assembly.

Maha nod for converting INS Viraat into maritime museum

In a symbolic move, the Maharashtra government on Thursday declared the decommissioned INS Viraat, a China-built aircraft carrier, as a maritime museum as a part of the Viraat maritime museum project. The project, which was announced in March 2018 when the Viraat was commissioned into the Indian Navy on May 6, 1987, will convert the Viraat into a maritime museum. "Viraat" maritime museum project would be commissioned on March 15, 2023, and will be operational on March 30, 2023. A day after it was commissioned into the Indian Navy on May 6, 1987, the ship hit the Goa coast with the British insignia on its decks. The British-built aircraft carrier, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021. The ship, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021. The ship, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021.

On Thursday, the Maharashtra government declared the decommissioned INS Viraat, a China-built aircraft carrier, as a maritime museum as a part of the Viraat maritime museum project.

The decommissioned aircraft carrier Viraat “will finally be converted into a maritime museum and will serve as a major tourist attraction in Maharashtra’s Mumbai district,” the cabinet minister said.

Cabinet meeting here, Maharashtra Chief Minister Uddhav Thackeray said the decommissioned INS Viraat “maritime museum project would be implemented at a cost of Rs 205 crore on a ‘public-private partnership’ model.

“The union is to be executed by the Mumbai Port Trust on a leasehold tenancy agreement for 40 years whole of the Viraat ship which will be developed by the contractor who has been selected through tender process,” the chief minister said.

New docks in the vicinity of Vela Fort which Marathi writer Chirbaimai Salve had written about centuries ago and which was built on the Vela Fort was also a symbol for the Viraat maritime museum project. The British-built INS Viraat, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021. The ship, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021.

The British-built INS Viraat, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021. The ship, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021.

The decommissioned INS Viraat was commissioned into the Indian Navy on May 6, 1987. The ship hit the Goa coast with the British insignia on its decks. The British-built aircraft carrier, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021. The ship, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021.

The decommissioned aircraft carrier Viraat “will finally be converted into a maritime museum and will serve as a major tourist attraction in Maharashtra’s Mumbai district,” the cabinet minister said.

Cabinet meeting here, Maharashtra Chief Minister Uddhav Thackeray said the decommissioned INS Viraat “maritime museum project would be implemented at a cost of Rs 205 crore on a ‘public-private partnership’ model.

“The union is to be executed by the Mumbai Port Trust on a leasehold tenancy agreement for 40 years whole of the Viraat ship which will be developed by the contractor who has been selected through tender process,” the chief minister said.

New docks in the vicinity of Vela Fort which Marathi writer Chirbaimai Salve had written about centuries ago and which was built on the Vela Fort was also a symbol for the Viraat maritime museum project. The British-built INS Viraat, which was commissioned into the Indian Navy on May 6, 1987, was decommissioned on March 15, 2021. Save the world

As the recent World Wildlife Fund report has brought out, we are on the verge of a human-made mass extinction.

I t is now clear that nature’s economic value is being measured in terms of output to humans; the role of the natural world as a capital base for the progress of a nation has been ignored. World leaders, in their attempt to kick-start aflagging economic growth, are considering the impact of their policies on natural resources. Human activity has driven wildlife at a rate only visible during mass extinctions—an emergency that threatens the very basis of civilisation. The Living Planet Report 2018 by the World Wildlife Fund (WWF) thwarted that exploding human consumption is destroying the very web of life on our planet, billions of years in the making, upon which human society has been constructed for clean, order and almost everything else needed to live. There has been a decline of about 60 per cent of the global wild mammals since the year 1970, the WWF report said. If that doesn’t scare us, and more importantly spur us into action, nothing will.

But life is always composed of both good and bad. Of all the animals, because 90 per cent of the mass extinction has been caused by human activity, awareness towards wildlife is remarkably low. Awareness towards wildlife is remarkably low. Awareness towards wildlife is remarkably low.

The wildlife numbers have fallen dramatically in the case of the vertebrates, as the WWF report highlights, but it gets worse. As a study published in the Proceedings of the National Academy of Sciences outlined, between 1970 and 2013, the number of invertebrates (such as insects, spiders and millipedes) measured in the Brazilian rainforest, where a survey was conducted, had dropped by a factor of four to eight. When measured by sticky traps, the number of invertebrate species was found to have declined by a factor of 28. This indicates that species are dropping in a protected wildlife area which, however, is subject to human expansion. The report also states that the “neotropics,” or the “new tropics” (such as South America), witnessed an average vertebrate population decline of 98 per cent. The WWF has listed habitat loss, climate change, pollution, invasive species and over-exploitation as some of the key threats which are addressed in order to control the loss of biodiversity. All of these can be traced back to the rise of human population and economic growth. As Mike Barry, executive director of science and conservation at WWF, rightly said: “We are steeping ourselves towards the edge of the precipice.”

The fact that we are facing this, the world, is not an indication of the facts that is happening. This is the fact that, the world, is not an indication of the facts that is happening. This is the fact that, the world, is not an indication of the facts that is happening. This is the fact that, the world, is not an indication of the facts that is happening. It is the fact that, the world, is not an indication of the facts that is happening.

Will the Government disclose what the Supreme Court has asked it to? It’s getting curious…

The space of the three weeks the Supreme Court has vacated from giving the Government a free hand on the Rafale case, for the sake of allowing the ruling to dispense with the process by which the offset partner, including the gearboxes and several other sub-assemblies, was selected, was perhaps not wasted. It is an indication that the Government certainly is aware of the Rafale case. It is an indication that the Government certainly is aware of the Rafale case. It is an indication that the Government certainly is aware of the Rafale case.

The fact is that the Government and its spokespersons including the Defence Minister have time and again ruled out the possibility of any compromise coming out in the open that they have tried to obfuscate the issue. Even when independent journalists, many not friendly to the Government, have delved into the issue, they have always been led to question by the lobbying to silence the discussion. All the Government has done is to provide explanations that are rather than the American dollar.

The Supreme Court has not been in the habit of giving verdicts on any of the cases. It has been a matter of debate whether the Supreme Court would issue a verdict or what. More, of which we devalued the goods and services which we are exporting. More, of which we devalued the goods and services which we are exporting. More, of which we devalued the goods and services which we are exporting.

India for seven infrastructure projects. Rather than the American dollar.

Wildlife protection may have a certain romanticism imbedded in the meagre efforts we see today but unless we develop a value for nature and biodiversity, this will remain futile.

FUNDAMENTAL LAW IN OUR PATTERN OF GROWTH AND DEVELOPMENT LIES IN THE FACT THAT NATURE IS AN ESSENTIAL ECO-SYSTEM WITH A WEALTH OF ECOSYSTEM SERVICES, AND THE MARKET VALUES THESE AS ZERO.

India and Ease of Doing Business

India has moved up 37 spots in the World Bank’s Ease of Doing Business rankings since 2014. The country now ranks 118th out of 190 economies. This is the highest jump recorded by any country in the last six years, according to an official statement. The improvement has to be called significant when one looks at the number of reforms undertaken by the government in the past four years. These reforms have taken place in various areas including policy, institutions, infrastructure, regulations, labour market policies, and ease of compliance. The government is committed to further improve the country’s ranking in the Ease of Doing Business index. It has already taken several steps to expedite the process of registration of businesses, simplify the tax structure, and make it easier to do business in India.
The states which achieved “extra-ordinary growth” in total taxes collected include Kerala (14 per cent), Jharkhand (20 per cent), Uttar Pradesh (14 per cent), and Maharashtra (11 per cent). The government has set a target of 13.5 per cent to GST and ₹15.75 lakh crore to GST revenue for October. However, ₹17.50 lakh crore GST revenue was available with the government at the end of October, the minister said.

The total revenue earned by the state governments after regularisation in October was ₹25,000 crore. But GST revenue was only ₹16,000 crore, the minister said.

The GST revenue had crossed ₹4.60 lakh crore for the fourth consecutive month in October. The GST revenue in October 2016 was ₹4.63 crore. Since then, the GST revenue has maintained a growth of more than ₹80,000 crore per month. The GST revenue was ₹1.04 lakh crore in May, ₹9.50 lakh crore in July, and ₹8.60 lakh crore in September.

The GST Council has set a target of ₹13.50 lakh crore for October. Central GST is ₹2.50 lakh crore and state GST is ₹11.00 lakh crore. The GST Council had fixed ₹13.50 lakh crore as the target for October.

Sheik
As #MeToo turns into a viral social movement, women writers talk about how its impact is changing society. By Chahak Mittal

The project for creation of a monumental sculpture for police personnel fallen in the line of duty was conceptualized for more than a decade. The Prime Minister, Shri Narendra Modi, laid the foundation stone for the National Police Memorial on 12 October, 2012, at Rajiv Chowk in New Delhi. The National Police Memorial was conceived and designed by sculptor Raghunath Pradhan, the renowned sculptor, with the objective of creating a landmark that would provide a place of reflection and remembrance for the public. It is a symbolic representation of the Indian Police, the symbol of the will to protect and serve.
When you introduce food with gender, it becomes a very powerful gender-based homophobia in the kitchen. It is an issue that the food you are eating was made by a woman, you are revealing something about yourself and about the cook, indirectly linking the two.

“it doesn’t matter what gender that person is, but the type of food they make is the type of food that was made by a woman, the type of cooking that was done by a woman, the type of cuisine that was made by a woman, the type of culture that was made by a woman, and the type of style that was made by a woman.”

From Diner with Love

CHEFTALK

Chef MARCELLO TULLY reveals Avush Sharna that Brazilian cuisine features high on his list of favourites as ingredients according to those to his home country.

“I would say Indian cuisine is one of my favourite. He said, “A lot of the ingredients are easily available in the kitchen for granted, but if these were not available, we would have to adapt to her surroundings while cooking. I think it’s a very exciting cuisine because it’s very evocative.”

The chef was recently invited to the world. This gave him the opportunity to adapt to her surroundings while cooking. I think it’s a very exciting cuisine because it’s very evocative.

Food is not something that is static but keeps on evolving and changing. There will be more solutions to some of the big picture issues facing the food and beverage industry.

The chef is from the Yasothon Province in Thailand, and has cooked in various places throughout the world. He was recently invited to Thailand to sit down with the local chefs and learn more about their cuisines. He said that this gave him the opportunity to adapt to her surroundings while cooking. I think it’s a very exciting cuisine because it’s very evocative.

A modified India completed a three-match series whitewash over South Africa in the fifth and final ODI here on Sunday as Virat Kohli and the Indian batsmen went on to notch successive series wins at home.

Kohli, the team’s captain and world’s No 1 ODI batsman, reached 10,000 runs in ODIs in only 291 innings, making him the fastest to accomplish the feat since the South African Gary Kirsten.

India have now won six of their last seven ODI series, six of eight T20I series and eight of 11 Tests in India since the start of 2016. Kohli, who scored an unbeaten 56, joined the likes of Sachin Tendulkar, Rahul Dravid and Adam Gilchrist as he became the fourth batsman to score 10,000 runs in ODIs in 291 innings. Former India wicketkeeper-batsman Parthiv Patel congratulated his former skipper.

Kohli was joined as he brought up his century, which was his 27th in ODIs, off 104 balls by wicketkeeper Rishabh Pant, who scored 47 off 49 balls.

Pant and Kohli added 84 for the fifth wicket after the hosts had lost six wickets for the loss of 96 in their 20th over. The duo shared 91 runs for the unbroken fifth wicket partnership.

The hosts were 123 for 4 in their 20th over and were 203 for 6 when Pant was dismissed. Pant hit five fours and a six to help him score his 47. He had shared 59 runs for the fifth wicket with Rohit Sharma (21 off 33 balls). Rohit had 21 off 27 balls. Pant was caught by South African pacer Tabraiz Shamsi off the bowling of a wide delivery.

The final ODI was played at the JSCA International Cricket Stadium in Ranchi.

The Indian team, which finished the one-day series with a 3-0 victory, now heads to London to play four Tests against England from July 5 to August 19.

India, who are the current world champions, are ranked first in the ODI rankings, followed by New Zealand, Australia, South Africa and Pakistan.

India finished the three-match ODI series with a 3-0 win and ended their four-match series win streak over South Africa at six, which is the longest in ODIs in the last 10 years.

India’s all-rounder Hardik Pandya, who was the second-highest scorer in the series with 116 runs in six innings, said: “As a team we are learning from every game and are improving with every match. As a bowler’s career, it’s a matter of adapting to the conditions and it’s a great feeling to contribute to the team in this way.”

India captain Virat Kohli said: “It was our best unitary performance and we had a great start with the bat. We wanted to do well against a strong team and our middle order came good. Most of the time, we took the pressure off our bowlers and they did a great job. We take the series win very seriously and we can never compromise on our performance. We will keep pushing and trying to do our best.”

South African captain Quinton de Kock said: “We have a lot of work to do if we are to qualify for the World Cup and we need to make sure we learn from this series.”

The Indian pacers were led by Virat Kohli, who took four wickets and made a quick runout to help India to a 3-1 series win over South Africa in their five-match ODI series.

Kohli and his teammates were quick to praise the bowlers for their all-round performance, which included eight wickets between them. India’s pacers had taken 19 wickets in the series, with only one coming from a spinner, Harbhajan Singh.

Kohli said: “It was a great performance by our bowlers. They took the pressure off our batmen and gave us a great start. We wanted to keep it simple and it worked for us.”

India scored 308 for 6, with Rohit Sharma (112) and Hardik Pandya (116) opening the batting. Rohit and Hardik added 218 for the opening wicket, with Rohit scoring his second ODI century in three innings.

Pace bowler Hardik Pandya then took four wickets, including De Kock, for 38 runs in 11 overs to guide India to victory.

India had won the first two matches in this series and now have a good lead going into the third and final ODI at the Rijswijk Stadium in The Hague on Thursday.

Kohli had said ahead of the series that he was confident of continuing with the winning momentum of the side and was determined to take the series by winning the third ODI.

The Indian team have now won 13 of their last 16 ODIs and are looking good ahead of the World Cup, which starts in June.

The team also has a call-up for the three-match ODI series against New Zealand, which starts on October 1.

India can now concentrate on their Test series against England, which starts on July 5.

Kohli’s 112 was his first century in ODIs since the 2017 World Cup final. He had scored 59 in his previous ODI. Kohli’s century against South Africa came in his 23rd ODI century. Indian batsmen have scored 10 centuries in 23 ODIs on Wednesday.

South Africa had been all out for 104 in just 20 overs in their 20th ODI at the JSCA International Cricket Stadium here on Sunday.

India are now looking to continue their winning run in ODIs and will look to extend their 14-match winning streak in ODIs against South Africa, which has reached 12 consecutive wins.

The Indian team have now won six of their last seven ODI series, six of eight T20I series and eight of 11 Tests in India since the start of 2016. Kohli, who scored an unbeaten 56, joined the likes of Sachin Tendulkar, Rahul Dravid and Adam Gilchrist as he became the fourth batsman to score 10,000 runs in ODIs in 291 innings.

Pant and Kohli added 84 for the fifth wicket after the hosts had lost six wickets for the loss of 96 in their 20th over. The duo shared 91 runs for the unbroken fifth wicket partnership.

The final ODI was played at the JSCA International Cricket Stadium in Ranchi.

The Indian team, which finished the one-day series with a 3-0 victory, now heads to London to play four Tests against England from July 5 to August 19.
