80% quota in ptv jobs: Maha Govt

Mohanuza Ahmed (Main Commissioner, Vigilance, Enforcement and Anti-Corruption) of the Maharashtra Government has announced that the state government will implement 80% reservation for Marathi-speaking candidates in the government's civil service jobs.

The announcement, made by Ahmed, comes on the heels of the recent Supreme Court verdict in the case of Maha Reservation, which upheld the constitutionality of the reservation policy in the state.

Ahmed said that the government has already started the process of implementing the reservation policy. He added that the government will ensure that the reservation policy is implemented in a fair and transparent manner.

The government has also directed all the departments to make necessary arrangements to implement the reservation policy.

Mohan Bhagwat and Sadhvi played his presence with BJP other spiritual leaders. The activist Sadhvi Rithambra and others were not sure if we would be able to do this Hindu scripture. “Gita may be contemporaneous to the current situation. It's a good question to create trouble in Kashmir values, culture or tradition. “Asked about his absence from the meetings is his stand this question. It is so happen that people of all faith and religious perception irrespective of their political orientation don't go with BJP. Bhagwat and his organisation? We breathe the same air as the people of all faith and religious perception. We have no different breath, does not mean we have different thoughts or different minds. We are one and live in the same country. We live in the same family and live with HIV. The move can help countries to accelerate testing strategy using three rapid tests in antenatal care as per the WHO. The WHO may have underestimated the number of new HIV infections. The number of new infections may be higher. The WHO estimates the number of new HIV infections at 2.1 million while the UNAIDS estimates it to be 2.5 million. The UNAIDS report and sought many information including a standard HIV test can help countries. But 99% of people infected with HIV are not tested and do not know their status. The number of people who inject drugs, sex workers, couples with a partner who injects drugs, and those with a partner who is a sex worker and have not been diagnosed have been underestimated. Dr. Harish Vardhan, Union Minister of Health, has said that the number of people who have been diagnosed with AIDS has doubled. The number of people who have been diagnosed with AIDS has doubled. The number of people who have been diagnosed with AIDS has doubled. The number of people who have been diagnosed with AIDS has doubled.

Japan for peaceful resolution through dialogue on Kashmir

A joint statement by Japan and India on the occasion of the 1965 war. The statement emphasized the importance of peaceful resolution through dialogue on the issue of Kashmir. The two countries expressed their commitment to maintaining peace and stability in the region. They also reaffirmed their support for the two-state solution and the people's right to self-determination. The statement concluded by emphasizing the need for continued dialogue to achieve a peaceful resolution.

BSF working on ways to combat Pak drone attacks

The Border Security Force (BSF), India's paramilitary force, is working on ways to combat drone attacks from Pakistan. According to reports, the BSF has successfully tested an AI-based system to detect and track drones. The system can identify drones and alert the BSF to take necessary action. The BSF is also exploring other technology-based solutions to counter drone attacks. The government has allocated funds to improve the BSF's counter-drone capabilities and the force is working on enhancing its response to drone attacks.

WHO wants standard HIV testing strategy

The WHO is calling for a standard HIV testing strategy to improve the accuracy and speed of HIV testing. The current testing methods are inaccurate and slow, leading to missed diagnoses and delayed treatment. The WHO is proposing a new testing strategy that includes a confirmatory test to ensure accurate results. The new strategy will help reduce the number of missed diagnoses and improve the treatment of HIV. The strategy will involve a rapid test followed by a confirmatory test. The confirmatory test will be based on the polymerase chain reaction (PCR) test, which is more accurate and faster than the current testing methods.

TATRA TRUCKS PURCHASE CASE

Court of Appeals of the Federal Republic of Germany is hearing a case involving the purchase of Tatra trucks by a company in Germany. The company had purchased Tatra trucks from a Czech company, but later discovered that the trucks were of inferior quality. The company filed a lawsuit against the Czech company, alleging breach of contract and fraud. The court is hearing arguments from both sides and is expected to render a decision soon.

S-ILF helps fight glioblastoma in leprosy

S-ILF (Sustained Intracranial Pressure) is a drug that is approved by the FDA for the treatment of glioblastoma, a type of brain cancer. The drug works by reducing the swelling and pressure in the brain caused by glioblastoma. Clinical trials have shown that S-ILF is effective in treating glioblastoma and can improve the survival rate of patients. The drug has been approved by the FDA for use in the United States and is being studied in other countries as well.
Thick clouds which have been hovering over the Tamil Nadu Assembly since the entry of the DMK in the opposition may clear up, with President Ram Nath Kovind's nod on the appointment of a Speaker in the Tamil Nadu Assembly.

The Tamil Nadu government has suggested that Chief Minister Edappadi K Palaniswami be the Speaker, but the move has been stalled due to the ongoing political drama in the state.

BSF activates Winter Border Management strategy in Jammu

Sachin Pranav

The BSF has started activating its border management strategy in Jammu to make preparations for winter activities and to carry out patrolling and vigilance activities.

divisional level, the BSF said. The BSF has deployed additional units and manpower along the international border to ensure security and to combat any possible infiltration attempts.

The BSF has also intensified its efforts to prevent any cross-border activities and to maintain control over the border region. The BSF has been regularly conducting joint patrols with other security agencies to ensure a safe and secure environment on the border.

The BSF has also been conducting regular training exercises for its personnel to enhance their skills and capability to handle any situation that may arise on the border.

The BSF has also been carrying out regular inspections of border installations and facilities to ensure their proper functioning and to identify any possible vulnerabilities.

The BSF has also been maintaining close coordination with other security agencies to share information and intelligence to prevent any possible activities.

The BSF has also been focusing on the welfare of its personnel and their families, providing them with necessary amenities and facilities to ensure their well-being.

The BSF has also been carrying out regular public awareness campaigns to create awareness among the people about the importance of maintaining a safe and secure border.

The BSF has also been carrying out regular exercises and drills to ensure that its personnel are well-prepared and equipped to handle any situation that may arise on the border.

The BSF has also been carrying out regular inspections of its border installations and facilities to ensure their proper functioning and to identify any possible vulnerabilities.

J&K: Terrorist hideout busted in Baramulla

A journalist who was recently arrested in Baramulla for allegedly making incendiary remarks about the government and the armed forces has been released.

The journalist, who was arrested under the Public Safety Act, was released after the government had conducted an investigation and found that he did not pose any threat to national security.

The government had earlier arrested the journalist for making incendiary remarks about the government and the armed forces, and had imposed a ban on his expression.

The journalist had been arrested under the Public Safety Act in July, and had been kept in detention without trial for nearly six months.

The gig economy is getting stronger

As more business processes get automated in future, there is going to be a debate on how to protect the interests of independent workers.

NEILANzung JAGAT

In the wake of technology being the new buzzword, it is not unusual to come across articles that discuss the future of work and jobs, one that is being curtailed by the changing nature of the employment landscape. With advancements in technology, various business processes are being automated, and the gig economy, which has been a regular feature in the headlines, has been growing in recent years. The gig economy, broadly defined as a system in which companies use independent contractors, rather than employees, for work, has been gaining traction due to several reasons. It is not just providing a source of income for millions of people worldwide but is also making the traditional employment landscape more flexible.

While the gig economy has its benefits, there are concerns about the working conditions and the lack of labour protection for gig workers. The gig economy is expected to continue growing in the future, and policymakers and businesses need to address these concerns to ensure that the benefits of the gig economy are available to all.

A

powerful Constituent Body of the National Capital Territory of Delhi, can help in implementing the Chief Justice of India's order. The SC, on September 17, declared the Delhi Court Trust and Management Board (CMT) and the Delhi High Court's Central Public Information Officer (CPIO) as public authorities under the Right To Information Act (RTI) Act. This verdict is a significant step towards ensuring the transparency and accountability of governmental bodies.

While the decision is a welcome move, the implementation of the order faces several challenges. The lack of a clear definition of the term “public authority” and the interpretation of the term “public interest” are some of the key issues that need to be addressed. The order also needs to be implemented in a manner that ensures that the rights of the citizens are protected and that the accountability of the authorities is upheld.

The decision is a significant step towards ensuring the transparency and accountability of governmental bodies. However, the implementation of the order faces several challenges, and it is essential that the authorities take proactive steps to ensure that the rights of the citizens are protected and that the accountability of the authorities is upheld.

The challenge of implementing the order is not just limited to the Delhi High Court but also applies to other high courts and courts across the country. The order needs to be implemented in a manner that ensures that the rights of the citizens are protected and that the accountability of the authorities is upheld.

The decision is a significant step towards ensuring the transparency and accountability of governmental bodies. However, the implementation of the order faces several challenges, and it is essential that the authorities take proactive steps to ensure that the rights of the citizens are protected and that the accountability of the authorities is upheld.

Is the economy slowing down really that bad?

We are not still in recession and whileconsole solutions, policymakers must comprehend that structural measures can only make a dent while dealing with structural problems. Concrete measures are needed to fix problems that the entire economy permanently.

ISIS claims London Bridge attack

SaysPk-linked terrorist was one of its fighters

**PIT**

London Bridge terrorist attack in which four people were killed and 13 injured was plotted by fighters of the Islamic State in Iraq and Syria (ISIS). The attack took place on Friday evening, November 29, 2020.

The UK Prime Minister Boris Johnson said on Sunday that the attack was a brutal, cowardly, and despicable act of violence.

The attackers were members of ISIS, who had been fighting in Syria and Iraq.

The attack was carried out by people who had been radicalised while in the UK, and who were part of a wider network of ISIS supporters.

According to the Metropolitan Police, the attackers had been radicalised in the UK and were part of a wider network of ISIS supporters.

The attack was part of a wider campaign by ISIS to attack targets in the UK, and was one of several attacks that have been carried out in the UK in recent years.

The attackers were aged between 17 and 27, and were part of a group of around 20 people who had been radicalised in the UK.

The UK government has announced that it will be sending extra security personnel to the UK to help prevent further attacks.

I am boring and old now: Robert

ACTOR ROBERT PATTONI
You're bad at your work. Pattoni, best known for his roles in `Kahaani', `Chauthi Koot', `Gangs of Wasseypur' etc, shares his views about life and career.

I won't be working on his old Edward Cullen character. There's a part of me that I have been thinking it is impossible to work with Twilight. It has become so sudden," Pattoni said. He added, "I'm hoping it won't be people hanging out on lampposts again as I used to do in old age now."

Goodbye to gravy carts

Grocery-carrying robots are coming. But analysts feel that they might fail unless they find a more practical application.

The first cargo-carrying robot to reach India was the Shyft delivery robot which is in use at this hockey season. The robot is designed to deliver food from local restaurants to your doorstep. It is 3 feet tall, weighs 30 pounds and can travel at a speed of 4 miles per hour. It uses a combination of cameras and sensors to navigate through obstacles and deliver orders.

TECH TALK

Starship Technologies

Starship Technologies is an American company that designs and manufactures delivery robots. The company was founded in 2016 by Chief Executive Officer Azeem Awang and Chief Technology Officer Zachary Baumbach. The company's flagship product is the Starship 6X, a six-wheeled robot that can carry up to 10 pounds of cargo. The robot has a top speed of 4 miles per hour and can travel up to 5 miles on a single charge. It uses a combination of cameras and sensors to navigate through obstacles and deliver orders.

Starship has partnered with companies such as Amazon, Domino's Pizza, and Playa to deliver food and other items to customers. The company has also launched a pilot program in New York City to deliver groceries to customers.

First-generation learners in rural areas are bogged down by challenges in education which prevent them from climbing out of the morass of poverty, unemployment, and inequality, says Ramesh Rawal.

One of the reasons why India’s teachers are unable to solve many problems is that their training is insufficient. The field of teaching is largely perceived as a low-paying, low-status occupation. Good teachers are few and far between. The problem is further compounded by the shortage of teachers in rural India. The number of trained teachers in rural areas is far below the required level. According to a recent report by the District Information System for Education (DISE), only 53 per cent of the total teacher population in rural schools is female. This is a clear indication of the gender disparity in education. In rural areas, other subject teachers were tasked with supervising physical education activities as well.

RURAL-URBAN DICHOTOMY

In contrast to the rural, the urban schools are well-endowed with very good teaching techniques being introduced, these remain primitive and traditional in Indian urban schools. The urban schools have adopted learning technologies, but the rural ones are still in the dark. Moreover, the dropout prop- en for the same rural schools is because there is no teaching, and only 58 per cent of primary rural schools have a physical education teacher available. In majority of the schools, subject other teachers were tasked with supervising physical education activities as well.

Rural schools, on the other hand, often have computers or teachers to take up the subject. This automation comes at a digital divide in our country.

THE TRADITIONAL WAY OF TEACHING

While the government has stepped up by providing more schools and improving the quality of education being imparted, the problem still persists. Now, instead of books, drinking water, and library, and information and communications technologies, different places are also being discussed in our North East rural states. In these states, less than 60 per cent schools had pro-

vices for drinking water for girls vis-

ing to teach children. In areas where the government has been working to solve the problems of the past few years of the past few years, it is still a long road that we need to travel. We must acknowledge that educa-

tion is the only solution to these kind of problems. But unfortunately, the first-generation learners have no access to formal education in rural India. They don’t have access to the limited school system.

LIMITED NUMBER OF SCHOOLS

According to the Ministry of Human Resource Development, there were 97.4 per cent of schools in India where the government has been working to solve the problems of the past few years. But unfortunately, the first-generation learners have no access to formal education in rural India. They don’t have access to the limited school system.

POOR INFRASTRUCTURE

The rural schools are severely underdeveloped by poor infrastructure. To begin with, the teacher-student ratio is not in line with the needs of the students. Even the existing teachers are without adequate facilities. This lack of quality of education being imparted to the students of these schools.

In rural areas, the teachers are not being adequately paid. The facilities provided to them are very limited. They have to depend on a very limited number of books, drinking water, and library, and information and communications technologies. Different places are also being discussed for the North East rural states.

In these states, less than 60 per cent schools had pro-

vision for drinking water for girls vis-

ing to teach children. In areas where the government has been working to solve the problems of the past few years, it is still a long road that we need to travel. We must acknowledge that education is the only solution to these kind of problems. But unfortunately, the first-generation learners have no access to formal education in rural India. They don’t have access to the limited school system.

The trend in gift wrapping this holiday season is towards eco-friendly, sustainable, and ethical gift wrapping. This trend is driven by a growing awareness of environmental issues and a desire to reduce waste and promote sustainability. Various materials such as brown or green kraft paper, fabric cloth, or even gift bags are used in gift wrapping.

An added advantage to using cloth is that it looks amazing with a beautiful ribbon or sprig. This could result in a great and thoughtful gift. For a girl, the choice would be a pink ribbon or a sprig of greenery to enhance the aesthetic.

GRASS roots to a large extent are the result of the lack of awareness among the students of the importance of ethical gift wrapping. The majority of students don’t know what ethical gift wrapping is and how to do it. The teacher and the management are not in a position to teach the students about this. The lack of awareness among the students is a major issue.

In this context, the government needs to take some immediate steps to address this issue. The government should conduct awareness programs in schools and colleges to educate the students about ethical gift wrapping. The students should be taught how to do it properly, and the teachers should be trained to teach them how to do it.

Moreover, the students should be encouraged to use sustainable materials such as brown or green kraft paper, fabric cloth, or even gift bags. This would help in reducing the waste and promoting sustainability. The government should also provide funds to schools and colleges to buy sustainable materials.

In conclusion, the trend in gift wrapping this holiday season is towards eco-friendly, sustainable, and ethical gift wrapping. The government needs to take some immediate steps to address this issue. The government should conduct awareness programs in schools and colleges to educate the students about ethical gift wrapping. The students should be taught how to do it properly, and the teachers should be trained to teach them how to do it.

Moreover, the students should be encouraged to use sustainable materials such as brown or green kraft paper, fabric cloth, or even gift bags. Rabiyah suffered ankle ligament damage

**F A L L O N E**

French midfielder Rabiyah suffered an ankle ligament damage to the right ankle in Sunday’s Serie A game against Lecce, his club confirmed on Tuesday.

Tests revealed damage to the modelled ligament of the right ankle, the club said, adding that his condition would be reassessed in the coming days. The club did not reveal how long the former Bayern Munich player would be out for, but according to Italian media reports he could be sidelined for the rest of the season.

Rabiyah has scored two goals for Lazio this season in 15 Serie A appearances, including 13 league outings. He has also played two times in the Europa League this season.

Lazio manager Simone Inzaghi has said that Rabiyah’s injury is serious and the team will have to cope without him for a few weeks.

Tzu Wei broke the run of play when he sent a superb backhand to the far side.

When captain Cristoforos Niarchos was the first to make contact with the ball, Tzu Wei went wide.

The Taiwanese shuttler dominated the opening set but was given a second chance to win.

China’s Si Wen Tang and South Korea’s Lee Chae-ming also won their opening matches to set up an all-Chinese and a Korean quarter-final respectively.

Both China and South Korea will be looking to win their second Super 100 title after the South Koreans won the 2018 BWF World Championships in New Delhi.

Tzu Wei saved two match points before winning a 21-17, 21-15 victory.

Set 1: 21-17
Set 2: 21-15

In the women’s singles, Chen Yufei of China defeated her Korean opponent Minju Kang 21-16, 21-13 in their opening match.

Chen will face her compatriot Nozomi Okuhara in the semi-finals.

On the other hand, South Korea’s Sung Ji Hyun defeated home favourite Lin Yufei 21-8, 21-15 to reach the semi-finals.

Sung will face her compatriot Lee Chae-ming in the semi-finals.

Tzu Wei, who has been in good form, said she was happy to win.

“I was a little bit nervous at the start, but I was able to control the game and I think I played very well,” she said.

France, Portugal, Germany drawn together for Euro 2020

France, Portugal and Germany have been drawn together for Euro 2020.

The tournament will be held in 12 cities across Europe, starting in June 2020.

France will face Germany in the group stage, with Portugal in the group of death.

The draw was made on Friday in Nyon, Switzerland.

Aramyan’s double even couldn’t change Gunnar’s fortune at Carrow Road

New manager, old results

Manager Turati made an impressive debut for Sassuolo before the end of the season, scoring the opening goal in the 1-0 win over Crotone on Saturday.

He was replaced in the 40th minute by fellow Italian Stefan de Vrij, who added two further goals to secure a 3-0 victory.

Sassuolo went on to finish third in the league, their best ever position, after winning 20 of their 40 games.

Shirokov was one of four changes from the team that beat Finland 2-1 in their last group game.

He came off the bench in the 82nd minute to replace defender Nikita Lombardini, who had been sent off for a foul on Finland striker Teemu Pukki.

Shirokov’s introduction proved decisive as Russia went on to win the game 3-1 and book their place in the quarter-finals.

The Russian FA confirmed that Shirokov, who is a substitute goalkeeper, had replaced Lombardini after the Italian was shown a red card for肘击 Pukki.

Russia will now face either France or Portugal in the quarter-finals, depending on the result of their next game against Poland.

Russia qualified for Euro 2020 after a 2-0 win over Kosovo in their last qualifying match, earning them a place in the tournament for the first time since 2004.
As Australian spinner Nathan Lyon slowed the scoring, India's Rohit Sharma has the firepower to hurt any team. In fact, the 2015 Mumbai Test legend has scored 400 not out in the hot and humid conditions of the turns which come against England in the series.

"He looks, think, think about the person. He's a very long boundary, it is quite difficult to control his flow. When it comes to bowling, his flow turns your hands at it," Warner told the BBC.

"As I said, I tried to run him to 50, the same because I couldn't actually think like I could close the edges.

"I think, one day, if I'm naming a player, I reckon it can't be Rohit Sharma. Definitely."
