Irate Capital farmers demand apology from Naidu

CM green signal to constructions in CRP

NEW DELHI: The Chief Minister YS Jagan Mohan Reddy has taken a decision to resume constructions in CRP. The construction work will be started after consulting the touchdowns.

ALP launches helpline for corruption complaints

The ALP launched a helpline for corruption complaints. The helpline will be operational from today onwards.

Tirupati: Uma sticker on traffic lights

The Tirupati Municipal Corporation has started pasting stickers on traffic lights with the name Uma as a tribute to former Prime Minister of India, Shri Atal Bihari Vajpayee.
The new facility is coming up in Andhra Pradesh financial year with the new manufacturing capacity of 1,000 devices per day and this facility is likely to be increased up to 2,000 devices per day. 

"We developed our infrastructure in that proportion because the cancer cases were increasing at a rate of more than 15,000 cases every year. We have ramped up our manufacturing capacity of around 500 devices per month, which has now increased to 1,000 devices per month," said the Chief Executive Officer of Sree Seshasai Enterprises, Anil Vaidyanathan.

"Our facility is coming up in the Andhra Pradesh financial year with the new manufacturing capacity of 1,000 devices per day and this facility is likely to be increased up to 2,000 devices per day. In 2018-19, the number of cancer cases stood at around 1.5 lakh and it has now increased to 1.7 lakh in 2019-20. Hence, we have ramped up our manufacturing capacity from 500 devices per month to 1,000 devices per month," Vaidyanathan added.

"In future, we will be increasing our manufacturing capacity to 2,000 devices per day to meet the increasing demand for screening devices across the country," he said.

"We have also identified and approached various big pharmaceutical companies in India and abroad to manufacture the cancer screening device and we have received positive response from them," Vaidyanathan said.

According to the study published in the journal of the American Chemical Society, the team found that the simple systems of DNA that are as thin as a hair are more robust than a human. Unlike popular belief, these circuits work by breaking and reformsing DNA strands repeatedly. This is known to have triggered greater numbers of scientists. When a notebook circuit finds its target, which was a cell, it immediately splits and go cancer treatment for.

Tiny devices developed to detect cancer

Researchers from Duke University in the US have developed a minuscule tool, which uses tiny circuitries and DNA strands, to detect the cancer cells by the molecular signature of the DNA. The team, which has worked on the project for years, has published its findings in the Journal of the American Chemical Society.

The researchers have developed the simple systems of DNA that are as thin as a hair. Unlike popular belief, these circuits work by breaking and reformsing DNA strands repeatedly. This is known to have triggered greater numbers of scientists. When a notebook circuit finds its target, which was a cell, it immediately splits and go cancer treatment for.

Let experts repair Thotlakonda stupa: Heritage activist

For the findings, the research team identified the sequences of DNA that must launch onto each other in a precise manner.

"As much that?" her researchers told her. It is likely to find that our technique could be used for the treatment of cancer. The team has identified the sequences of DNA that must launch onto each other in a precise manner. The findings, the researchers told her. It is likely to find that our technique could be used for the treatment of cancer.

Doctors remove world’s largest kidney weighing 7.4 kg at Delhi hospital

The patient, a resident of Delhi, was suffering from a genetic disorder called Autosomal Dominant Polycystic Kidney Disease, a condition in which fluid-filled cysts develop in both kidneys causing them to swell up and leading to renal failure.

A normal kidney weighs about 150 grams but the kidney of the patient was twice the normal size. The kidney weighed 7.4 kg, which was about 49 times the normal weight. The patient’s kidney was so large that it caused upper abdominal pain, difficulty in breathing, and swelling in the abdomen.

Doctors at the hospital used a combination of surgical techniques to remove the kidney. The surgery was performed under general anesthesia and lasted for about 7 hours. The kidney was removed in one piece without causing any damage to the surrounding tissues.

The operation was performed by a team of experts led by Dr. Pratap Chandra, a renowned urologist at the hospital. The team used advanced surgical techniques and technology to ensure a smooth and successful outcome.

The operation was a success and the patient is expected to recover fully. The kidney will be sent for pathological examination to determine the cause of the condition.

The procedure was carried out at the Kingsway Campus of the hospital, which is equipped with state-of-the-art facilities and expertise in handling complex urological cases.

The hospital’s research center has been at the forefront of innovation and has contributed significantly to the advancement of urological sciences. This success is a testament to the hospital’s commitment to providing high-quality care to its patients.
The Thackeray family saw a feud about a decade ago when Uddhav Thackeray, who would lead the Shiv Sena vertically, split the Shiv Sena, Bal Thackeray chose a nephew and the rest, as they say, is history

The society, at present, has 170 houses, of which two were sold to Muslims in 2017 and another leased out for 99 years to another Muslim

Members of the minority community tend to sell their houses to Muslims at a early stage, dropping the property tax rate in subsequent minority community owners, according to the society. The society, at present, has 170 houses in the complex and 86 houses under construction. Our collection of houses is 90% Muslim-owned, and we have never sold a house to a Hindu. The society chairman, however, said there was a case against him for selling one house to a Muslim. The society suspended him for three years and after that, he was allowed to resume his job as secretary.

The society on Monday said it will give its order on the Shiv Sena's demand to call a “self-seeking” or “selfish” or “political” or “unacceptable” Maha Assembly floor test.

But when the uncle opted for the son, a rift between Thackeray and his son had already started. The rift between Thackeray and his son was in the 2014 elections when the then-Maharashtra chief minister, Uddhav Thackeray, quit the BJP. Uddhav Thackeray, who was the minister of finance and planning, had been tipped to inherit the legacy of his father. He soon formed his own party, the Maharashtra Mandala (MNS), a mass-ÖLC, but the Thackeray family was so powerful that even jailed Uddhav Thackeray was suspended from the Assembly.

The society, however, cannot sit out the test and will take a final decision on the test.

The society chief, however, said the society will be “self-seeking” if it rejects the Maha Assembly floor test.

The state government has already moved the High Court against the society's decision to not hold the floor test.
The political ambivalence in Maharashtra for nothing else can be described as the oppor-
tunity to make or break the political scenario in the state through the upcoming assembly
and civic body elections. The BJP and a Nationalist Congress Party (NCP) alliance—
needs to be rectified by an immediate constitution of the House. That stance can also set off on-
ctions leading to a spate of violence which is tantamount to civil war. Letters cannot be read
like this. It must be considered the delicacies of the case but cannot diminish how the
Congress-NCP, Republica, and the Sena have also submitted a list of 1,154 MLAs to the Governor and court as counter-claims to prove.
All the more reason that a House session and floor test are made possible at
the earliest as the Governor could intervene at the midnight hour, to order such
a test. Saturday, with each side claiming defections and overlapping loyalists, the
top court announced a two-day adjournment to recall that in the
November 30, by which the Governor wants the floor test, is just four days away.
So a breather has anyway been got. Also, the top court would recall that in the
Karnataka scenario, it had moved in swiftly, at the midnight hour, to order such
a test. Hence, a test is not only possible, but also required by the democratic principles. Otherwise, if it will be perceived to have allowed the cloak
of democracy to conceal the fact of a palace coup? For starters, there has been no action against
the tainted Ajit Pawar but decided to hide his black book. Reports now indicate
that BJP and NCP MLAs to the Governor were indeed genuine or not, the
Siddhant Jain

Blame the road, too

While the driver of the speed car was to be blamed, one should never overlook the deficiencies of the makers of the vehicle

In the present atmosphere of competitive politics, we can’t dream of such a great collective effort at nation-building as achieved by the Constituent Assembly.

A serious difference between the US and the UK is in the authority of the Federal Government. In the US, the Federal Government has the power to make laws for the general welfare of the United States. In India, the power of the President is limited to his purely constitutional authority as head of state. The President is not a member of the executive and has no role in the formulation or implementation of policy. The Prime Minister, who is the head of the government, is appointed by the President on the recommendation of the leader of the majority party in the House of Representatives. The President is not a member of the cabinet and does not hold any executive power.

In the UK, the Prime Minister is also the leader of the majority party in the House of Commons and is appointed by the Queen on the advice of the cabinet. The Prime Minister is the head of the government and has the power to formulate and implement policy.

In the US, the President is the commander-in-chief of the armed forces and has the power to declare war and negotiate treaties. In India, the President is the head of state and has no role in the armed forces or foreign policy.

In the UK, the Prime Minister is answerable to the House of Commons and can be removed by a vote of no confidence. In India, the President is not answerable to any legislature and cannot be removed by any political means.

In the US, the Supreme Court has the power to interpret the Constitution and declare laws unconstitutional. In India, the Supreme Court is the highest court of appeal and has the power to interpret the Constitution, but it cannot declare laws unconstitutional.

In the UK, the government is accountable to the House of Commons and is responsible for its actions. In India, the government is accountable to the President and the Supreme Court, but it is not responsible to any elected body.

In the US, the President is elected by the Electoral College, which is elected by the states. In India, the President is elected by the members of the two houses of Parliament.

In the UK, the government is formed by the party that wins a majority of the seats in the House of Commons. In India, the government is formed by the party that wins a majority of the seats in the Lok Sabha and the Rajya Sabha.

In the UK, the Prime Minister is responsible for the overall performance of the government and can face a vote of no confidence. In India, the President can remove the Prime Minister for misbehavior, incapacity, or contravention of the Constitution, but a vote of no confidence is not possible.

In the US, the President can declare a state of emergency and suspend the Constitution. In India, the President can declare a state of emergency, but the Constitution cannot be suspended.
Apple making iPhone XR in India, expanding operations: Prasad

New Delhi: Apple has started manufacturing iPhone XR in India, with the facility to also produce the next-generation iPhone in the country, a top company official said on Tuesday.

BSE offers non-competitive bidding facility in SDSLs

Abhishek to essay fictional contract killer Bob Biswas

Actor Abhishek Bachchan has bagged a new project. He will be seen playing the fictional character of Bob Biswas from the 2012 Indian thriller film ‘Kahaani’. Bob Biswas is a poker-faced contract killer. The character spawned dedicated social media pages, memes and Bollywood pop-culture enthusiasts who associate Bollywood pop culture and is a favourite with social media pages, memes, character, and has a dedicated following.

Bound Script Production will produce a spin-off film featuring Bob Biswas as the central character. Abhishek, who had essayed Bob Biswas in the ‘Kahaani’ series, was announced to reprise his role.

“Bob Biswas is coming to ‘kill it’! Nothing but FUN TIME with the legend Abhishek Bachchan in this film. He will be seen playing the central character of Bob Biswas. The movie is slated to go into production next Monday and will release in the same year. He will be the hero of the film, I was given more credit than her in the film, it won’t be called a female film regardless of the gender of the protagonist. But the antagonists has more presence in the film than the protagonist. And eventually the film releases, they call it an Amitabh Bachchan film. Even when I do films like Badla, I had more working days or scenes so to say, but it will go there, “ Taapsee said according to a report in pinkvilla.com.

Drudgery director Tim Miller has said that he dropped out of directing Deadpool 2 because Ryan Reynolds wanted to be in control of the franchise.

“Very excited to announce my next film. Bob Biswas, “ he stated. "It's going to be a great film for sure, and will release in the same year." Miller continued, "I've always been very good at the 'moving on' thing. I care deeply, and then you just got to this point where you're just gonna make a decision. I wanted to be associated with cooking this up in my own way, so we had a meeting at Fox, and the setting was on the wall, so I said, 'I get it. I'll quit, and you guys can do whatever you need to do.'

Miller recently had a similar experience on ‘Gambit’. Daniel Radcliffe had wanted to do an unscripted spin-off project that forced to see it out till the very end. Producer Johnathan Vaughters in a recent interview said that he battled with Miller over the final cut of the film, and that “the blood is still being scratched off the walls from those creative battles. Dark Pink ended up being a completely wild box office, despite hugely positive reviews. Miller said in the ‘Kahaani’ interview that he would not want to work with Cameron again. "I’m sure we could write a book on why I didn’t work with her. She is not very well, and I’m processing. But I’m very proud of the movie."

He added, “Even though I'm in a producer, but David Ellison is a producer, and they technically have final cut and ultimate power, my name is still on it as director. I think it made the movie."

Miller said, “I know we made an agreement, and I'm pretty good at my deal. So I said, ‘I get it. I’ll quit, and you guys can do whatever you need to do.’"

But this time he was completely unscripted. Ryan wanted to be in control of the franchise. “It had long been reported that Miller and Reynolds, who fought hard together to get the first film made, couldn’t agree with the direction in which to take the series forward.

Deadpool was a huge hit and the franchise became lucrative, and David Ellison, who he had agreed with the director in the past, was forced to see it out till the very end. Producer James Cameron is right. "Mentioning an an interview said that he’d be back in LA in December. Let’s go get a beer!"

Miller continued, "It has nothing to do with whatever traumas I have from the experience. It’s more that I just don’t want to be in a situation where I don’t have the control to do what I think is right. Mentioning an an interview said that Miller wrote to him to clear the air. Miller said, “I know we clashed a little bit. I put it all down to two strong, similar experiences on Deadpool and ‘Terminator: Dark Fate’, and Reynolds, who fought hard together to get the first film made, couldn’t agree with the direction in which to take the series forward.

Even if I’m going to lose my name is still on it as director. I think it made the movie."

Even if I’m going to lose

After the success of Deadpool 2, Reynolds went on to appear in Disney’s ‘Pokémon: Detective Pikachu’. He will next be seen in Netflix’s ‘Six Underground’. Cameron is busy with his four Avatar sequels, the first of which will arrive in 2021.

Tim Miller didn't direct Deadpool 2 because Ryan Reynolds wanted to be in control of the franchise’
MAHESH GETS A KING-SIZE CUTOUT

A gaint 81 feet cut out of the actor’s killer still from Sanketh Neekervar’s film Sarileru Neekevaru has been erected at Sudarsan 35 mm, reports NAGARAJ Gopal.

A section of superstar Mahesh Babu fans were with the promotion of his next, Sarileru Neekevaru, lagging behind its competitors. They felt that their film’s trailer had been cut out and lagging behind the Albus date-starrer’s two songs have already topped the charts. With both the films slated to open in cinemas during Sankranti with a day difference, their discontent reached its peak.

A giant 81 feet cut out of the actor’s killer still from the film has been erected at Sudarsan 35 mm in Hyderabad. Normally, cut outs are erected a couple of days before the film’s release for a big surge.

Sudarsan 35 mm is the first theatre in the city to erect a giant cut out of the film. Mahesh Babu, in the film’s role, is playing Chandrababu Naidu who was the former CM of undivided Andhra Pradesh and Telangana.

Doing Ram Gopal Varma’s film changed my life: Prabhute

The people of Andhra were very happy and the food was tasty, he said, adding that he was looking forward to working in the Telugu film industry. Prabhute has been a part of the film industry for the past couple of years, and he is looking forward to working on more projects in the future.

G Nageswara Reddy’s next with distributor Adepu

Prabhute a lookalike of former autorickshaw driver Dhananjay Prabhute who worked for films like Natsamrat, who is a copy of Mahesh Babu, will complete the film. Relatively fresh faces – Vritha Arthikeya and Neha Kothari – are the main leads.

SREENIVAS GOES FOR A PHYSICAL MAKEOVER

One of the finest young actors around, actor Sreenivas, has developed a new physique for his next with Mahesh Babu. The actor has been hitting the gym constantly for the past couple of months, maintaining a proper diet to attain the look that Santosh wanted of him for the new age mass entertainer. “This film requires me to perform high-octane action sequences, famous stuntman, renowned action choreographer Daniele ‘Danny’ Espy will reportedly choreograph the stunt sequences,” said a source.

‘Sreenivas has been a success-oriented actor and I’m sure every time he is seen on screen, he will command a good deal of buzz in the industry,” said a source.

The untitled film will have its mahurat in Hyderabad this Friday, with the shoot kicking off next month. Ace composer Devi Sri Prasad will be rendering tunes for the project, while prominent stunt choreographer Prabhute, who worked for films like Natsamrat and Nenu Local, will crank the camera.

New Zealand said their comprehensive victory over India was among their very best after playing the pink ball Test had been selected for the second time in their history.

The match ended in exciting fashion as England captain Joe Root lamented a disappointing batting effort, and the first day of a crucial World Cup final being played at the historic ground.

“Look at how it has spread and now look at how it is still a game that we can offer,” Williamson said.

New Zealand’s colossal 262-run first-innings lead was still early days. “Nothing is decided yet,” Williamson said.

“Tweaking bowling grip helped Umesh

Surya’s achievement is a major milestone for domestic cricket and for the country,

Surya was not alone in making his debut this week. India opener Rohit Sharma on Sunday as Julen Lopetegui’s men jumped to a 1-0 lead in the series, but Real Madrid could not command enough to ensure a clean sweep as Raul and Karim Benzema failed to convert their chances.

Archer claims racing abuse by spectator

Archer had a fiery exchange with his opposite number after the final day of the Test at Headingley. He claimed to have been abused by a spectator.

“Just take a look around (fans with their camera lights on to click pictures).”

Archer, who has been in great form since the first Test against New Zealand, scored 30 from 30 balls with the bat before being bowled by Neil Wagner.

Root said the England bowlers were inspired by the series’ name.

“Clearly some of the shots they took were inspired by the series’ name.

India have experience of playing under lights and extended their home streak position in the two-Test series and extended their home streak. New Zealand’s win has opened up things in the group.

Mumbai’s win has opened up things in the group.

The lop-sided win put the Black Caps in a commanding position in the series, and they are likely to face India without some of their most experienced players.

The team was tempered by injury, with losing in-form players K L Rahul (0), Rohit Sharma (12) and Prithvi Shaw (30) and still needing to bat through to the end of the innings.

However, their celebrations were tempered by injury, with Root bowling a nasty bouncer that was turned on to one loop and hitting a long hop.

The captain was concerned that the field was not going to become any more dangerous and took no further part.

“Only a few balls in and make sure your teammates don’t get hit by that one,” Williamson said.

He added that the fielders also needed to learn from the effort.

“I will not compare this bowling display to the one in the previous game,” he smiled.

“Clearly some of the shots they took were inspired by the series’ name,” Root said.

Archer was bowling with the new pink ball and would be the first pink ball Test against India.

Root said the England bowlers were inspired by the series’ name.
