Supply water to villages in Nizamabad: KCR

CM asks officials to prepare system for water supply and drinking irrigation purposes

Hyderabad

Chief Minister K Chandrasekhar Rao said that the government has decided to extend weekly off-to-office in villages to Nizamabad to tide over various issues and the government is working out a scheme that will enable the drinking water needs of the people to be met for two days in the combined villages. However, the CM did not specify which villages would be asked to extend the weekly off-to-office system.

The TRS government soon after coming to power in 2014 had taken a policy decision to extend weekly offs to police personnel in state for the first time. However, it could not be implemented in the last five years.

Chief Minister K Chandrasekhar Rao has termed the extension of weekly offs to police personnel in state for the first time. However, it could not be implemented in the last five years.

Body found on Nagarjunas's property

Petrol, diesel prices rise

Man held for cheating doctor of Rs 1.40 crore

Heavy fines avoided, but no let-up in police vigil

Who can check vehicles, constable or officer?

Debate raging over who should inspect vehicles - a police officer or a constable in social media.

While some are authorised to inspect the vehicles? Two options are listed: the driver should also be asked to show the registration certificate of the vehicle and the number plate, which has been mentioned in the registration certificate.

The rules set that an officer of the rank of sub-inspector or above has the right to inspect vehicles. However, the rules also state that anyone who is a registered owner of the vehicle or any person who has been given permission by the registered owner should be allowed to inspect the vehicle.

Several people have been convicted by the courts for driving without a valid driving license, but the fines imposed were not sufficient to deter them from driving illegally.

Petrol price increased as Hyderabad went by 24 paisa on Saturday, while diesel prices saw a hike by 12 paisa on Saturday.

The latest increase in petrol prices is due to the hike in international rates of crude oil. Petrol prices in Hyderabad are now at Rs 75.97 per litre, while diesel prices are at Rs 67.78 per litre.

The police, on their part, plan to act even harder in imposing fines to let any rule violation at will in the absence of harsh penalties and get away scot-free.

Many locals are of the view that the only way to curtail rule violation at will is by increasing the severity of the penalties imposed.

With regard to enforcing traffic rules, police in the Rachakonda commissionerate recently set an example for the other two - Hyderabad and Cyberabad commissionerates - to follow. The Rachakonda police went about the task of imposing rules with a strict hand, and the number of vehicular violations has significantly decreased.

Increased fines or just the threat of severe action? This is the question.

Dengue patients thronging TS hospitals

Over 3,000 cases of dengue reported across Telangana state in Sep so far

Hospitals across Telangana have been receiving an unprecedented number of dengue patients, with the situation becoming more dire as the weeks go by.

The situation has prompted the state government to take immediate steps to curb the spread of the disease. The health department has been conducting awareness campaigns in affected areas, and healthcare facilities have been ramping up their facilities to accommodate the increased patient load.

Moreover, the government has been diverting power from the private sector to state-run power plants, which are better equipped to handle the surge in demand.

As of September 30, a total of 3,000 cases of dengue had been reported across the state, with only one patient dying.

In the past two weeks, the number of dengue cases per day has increased by 50 percent. The situation is expected to worsen in the coming weeks, with experts predicting a peak in early October.

“Due to the ongoing monsoon season, the breeding of mosquitoes is on the rise, which is contributing to the increase in dengue cases,” said Dr. Ravi, an epidemiologist with the state health department.

The government has urged people to take preventive measures, such as using mosquito repellent, wearing long-sleeved clothing, and covering their head and face when outdoors.

“With the monsoon still in effect, it is important for everyone to stay vigilant and take precautions to avoid getting dengue,” Dr. Ravi added.

In addition to the public health measures, the government has also increased the capacity of its hospitals to handle the surge in patients. This includes increasing the number of beds, hiring more healthcare workers, and equipping hospitals with the latest medical equipment.

Despite these efforts, healthcare workers are still stretched thin, with many reporting long working hours and limited resources.

“We are doing our best to handle this situation, but we need more support from the central government,” said Dr. Ravi.

The state health department has also asked the private sector to contribute towards the fight against dengue, with some hospitals agreeing to treat dengue patients at a reduced rate.

Overall, the situation remains critical, and the state government is urging people to remain cautious and take necessary precautions to prevent the spread of dengue.

Minister for IT and Industries KT Rama Rao has announced that the distribution of 100,000 ventilators will begin from September 30. He said that the Telangana government has spent Rs 715 crore on ventilators in three years in Telangana.

The minister has also announced that the government will be providing free medical treatment to all patients suffering from dengue.

Moreover, the government has directed all hospitals to start reporting dengue cases to the health department, which will monitor the situation closely and take appropriate action.

On September 14, Chief Minister K Chandrasekhar Rao had announced that the state government will provide free medical treatment to all dengue patients.

The government has also announced that it will be setting up a special committee to monitor the dengue situation and take necessary action.

The committee will be led by the health minister and will comprise representatives from the health department, the schools and colleges, and the private medical sector.

With the situation remaining critical, the state government is urging people to remain vigilant and take necessary precautions to prevent the spread of dengue.
**SC summons UP Home Secy over minor ‘married’ girl’s plea**

The top court noted in its order that despite granting time to the state for filing reply on the plea, the lawyer has not received a response from the department concerned.

**UP: Electricity from wet clothes**

IIT-Kgp researchers generate electricity from wet clothes

As part of an initiative to general clean and sustainable energy, researchers at IIT-Kgp have developed a new method for converting cellulose-based waste from domestic clothes, which has the potential to convert around 50 wet cloth pieces into electricity.

The technology was recently demonstrated by researchers, who turn around 50 wet cloth pieces into electricity in 24 hours using a specially designed device. The system, which was designed to use waste water channel network, which was created by the researchers for textile industries, can even be used in homes for disaster relief, where the availability of water is low.

The researchers have created a unique device that can take water from the contaminated water channel network, which was used by the researchers for textile industries. The device can take water from the contaminated water channel network, which has a network of pipelines and valves that can move through the water. The water is then converted into electricity using an electrochemical process, which is a clean and sustainable energy source.

The researchers have also demonstrated that the device can be used in homes for disaster relief, where the availability of water is low. The device was tested in a local village and the results showed that it can generate power from the contaminated water channel network, which was used by the researchers for textile industries. The device can take water from the contaminated water channel network, which has a network of pipelines and valves that can move through the water. The water is then converted into electricity using an electrochemical process, which is a clean and sustainable energy source.

**SC issues notice to 5 states on mining trends**

The Supreme Court has issued a notice to five states on mining trends in the country.

The court has said that it has received several petitions and complaints regarding mining activities in various parts of the country. The court has asked the states to submit their responses within four weeks.

The Supreme Court has also asked the states to provide details of the mining activities taking place in their jurisdiction, including the location, area, and extent of the mining activities. The court has also asked the states to provide details of the steps taken to regulate and control mining activities in their jurisdiction.

The court has said that it will hear the matter on October 26.

**New Delhi: Public transport off roads in Jammu and Kashmir**

Commuters stranded as public transport off road in Jammu and Kashmir

The days after senior Congress leader Rahul Gandhi’s visit to Jammu and Kashmir have been marked by chaos and confusion as public transport has been off the roads.

The situation has worsened in the days following Gandhi’s visit, as the transport unions have decided to continue the strike in protest against the Centre’s decision to convert Kashmir into a Union Territory.

The national transport unions have also called a strike to support the demand for the restoration of special status for Kashmir.

The water is then converted into electricity using an electrochemical process, which is a clean and sustainable energy source.

The court has said that it has received several petitions and complaints regarding mining activities in various parts of the country. The court has asked the states to submit their responses within four weeks.

The Supreme Court has also asked the states to provide details of the mining activities taking place in their jurisdiction, including the location, area, and extent of the mining activities. The court has also asked the states to provide details of the steps taken to regulate and control mining activities in their jurisdiction.

The court has said that it will hear the matter on October 26.

**New Delhi: Public transport off roads in Jammu and Kashmir**

Commuters stranded as public transport off road in Jammu and Kashmir

The days after senior Congress leader Rahul Gandhi’s visit to Jammu and Kashmir have been marked by chaos and confusion as public transport has been off the roads.

The situation has worsened in the days following Gandhi’s visit, as the transport unions have decided to continue the strike in protest against the Centre’s decision to convert Kashmir into a Union Territory.

The national transport unions have also called a strike to support the demand for the restoration of special status for Kashmir.

**UP: Electricity from wet clothes**

IIT-Kgp researchers generate electricity from wet clothes

As part of an initiative to general clean and sustainable energy, researchers at IIT-Kgp have developed a new method for converting cellulose-based waste from domestic clothes, which has the potential to convert around 50 wet cloth pieces into electricity.

The technology was recently demonstrated by researchers, who turn around 50 wet cloth pieces into electricity in 24 hours using a specially designed device. The system, which was designed to use waste water channel network, which was used by the researchers for textile industries, can even be used in homes for disaster relief, where the availability of water is low.

The researchers have created a unique device that can take water from the contaminated water channel network, which has a network of pipelines and valves that can move through the water. The water is then converted into electricity using an electrochemical process, which is a clean and sustainable energy source.

The researchers have also demonstrated that the device can be used in homes for disaster relief, where the availability of water is low. The device was tested in a local village and the results showed that it can generate power from the contaminated water channel network, which was used by the researchers for textile industries. The device can take water from the contaminated water channel network, which has a network of pipelines and valves that can move through the water. The water is then converted into electricity using an electrochemical process, which is a clean and sustainable energy source.

Uddhav, Fadnavis firm on alliance, talks in progress: Sanjay Raut

Rajnath first Defence Minister in to fly in Tejas fighter aircraft

Defence Minister Rajnath Singh will fly in a Tejas fighter aircraft from the HAL airport on Thursday and will be the first defence minister to fly in Tejas aircraft inducted by the armed forces.

After the series which lasted two years, senior BJP leader and state water resources minister Girish Mahajan also said that the alliance talks will not pose a hindrance in finalising the alliance. “It will not create problems in finalising the alliance,” Raut told reporters.

The minister was accompanied by a Chief Minister, Uddhav Thackeray, who also payed a visit to the project site during the inauguration and on Thursday.

The minister said he was following orders. “But these are the orders of the Prime Minister,” he said, referring to Narendra Modi.

An official said the minister was accompanied by the aircraft for around two minutes.

Talking about his experience flying with the Defence Minister, Rajnath, Thackeray said, “I wish you all the good luck and you are very happy with the flying qualities of the aircraft, and the way the aircraft was flying.”

“I want to congratulate HAL, DRDO and several agencies concerned. We have reached a stage where we can export fighter planes across the globe. The colonies in South East Asia have shown interest in ‘Tejas’ aircraft,” Thackeray said.

Taliban car bomb flattens hospital as Afghan violence surges ahead of vote

Taliban insurgents blew up a car bomb in the heart of Kabul on Thursday, killing at least 20 people and wounded 90 after a car bomb flattened a hospital as Afghanistan's fourth president promised to continue withdrawing US troops, and offered yet by Iran in a long list of incidents following the collapse of Iran's nuclear deal with world powers.

President Mohammad Javad Zarif of Iran, keen to keep pressure on its arch-rival Israel and the US, offered to mediate in troubled Tehran-Jerusalem ties, while US Secretary of State Mike Pompeo called the attacks "unprecedented." The Taliban was quick to claim credit for the assault.

"I hope the Islamic Republic of Iran and the Islamic Republic of Pakistan will play a positive role in the next phase of the negotiations," said Mr Zarif, on the back of the US-Stakeholder conference in the UAE.

"We had told the US that it's on them to establish a peaceful resolution and now the US has committed an act of war," further pushing up oil prices and reducing the risk of an unpredictable escalation in the tinderbox region where Saudi Arabia, Iran and the US are locked in a deadly cold war, as they both seek to dominate the global oil market.

"We won't blink to defend our territory," he said.

"It's on the US to establish a peaceful solution to the crisis and it's on them to end the war," he said.

"The US stands with the people of the Islamic Republic of Iran to defend itself and its rights," he said.

"The Iranian regime's threatening behavior will not be tolerated," he said.

"Pompeo did not deliver the Trump administration's promise to increase financial sanctions on Tehran over the attack, without elaborating.

"Iran is already subject to a number of restrictions and threats targeting its crucial oil industry.

"The rhetoric has raised the risk of an unpredictable escalation in the tinderbox region where Saudi Arabia, Iran and the US are locked in a deadly cold war, as they both seek to dominate the global oil market.

"Sometime later, reports also said that the US was considering an emergency drone strike in eastern Saudi Arabia, where several oil targets had been hit with drone and missile attacks in recent weeks, and one senior US official said that Tehran could act against Israel in response to the attack.

"In the past, the US has taken a number of steps to increase pressure on Iran, including the withdrawal of the Joint Comprehensive Plan of Action (JCPOA), the 2015 nuclear deal, and the imposition of sanctions.

"The US has also intensified its campaign of maximum pressure on Iran, including the targeting of its oil exports, its financial sector, and its ballistic missile program.

"The US has also taken steps to isolate Iran on the global stage, including the withdrawal of its support for the JCPOA and the imposition of additional sanctions on Iran.

"The US has also taken steps to increase pressure on Iran's regional allies, including the Houthis in Yemen and the Taliban in Afghanistan.

"It's on the US to establish a peaceful solution to the crisis and it's on them to end the war," he said.
Missing woods for trees

Banning electronic cigarettes might send a message, but will only drive usage underground

Decades of action by advocacy groups and regulatory frameworks have made smoking tobacco, a deadly habit, illegal in many countries. But with the rise of vaping, a new wave of electronic cigarettes has emerged, raising questions about regulations and their effectiveness.

India, like many other countries, has also been grappling with the rise of vaping. The Indian government has implemented regulations to control the use of e-cigarettes, including imposing a tax on them. However, the regulations have been met with mixed reactions and have not fully addressed the issue.

In the fight against smoking, the use of tobacco has been targeted, but vaping has become a new concern. The government needs to strike a balance between regulating the use of e-cigarettes and ensuring public health.

The Modi-Trump bromance show

There is a lesson to be learnt from the coverage of the Chandrayaan-2 mission and that is there is a difference between witnessing an epic feat unfold and achieving it.

The price of encroaching upon mental and emotional space, be it airports, ports or railway networks, is that the possibility of a camera battery catching fire due to faulty equipment brought in? There's always a risk of a deluge in the sanctity of the operation control room. A frustrated look here, a distracted countenance there, a pointed face in the mission control room, where would that lead to a shared responsibility to the nation to perform with delivering feats that open up the world.

The government racing towards the $5 trillion mark, needs vast energy sources and is there is a difference between witnessing an epic feat unfold and achieving it.

There is a lesson to be learnt from the coverage of the Chandrayaan-2 mission and that is there is a difference between witnessing an epic feat unfold and achieving it. There is a difference between witnessing an epic feat unfold and achieving it.
Govt to invite global players for rollout of coal mining auction

Under the 2019-2020 budget, the government planned to open up commercial mining in India. The plan was to auction coal mines to the highest bidder, with the aim of improving coal supply and competitiveness.

However, the auction process faced numerous challenges, including lack of interest from potential bidders and concerns about the transparency and fairness of the bidding process. In response to these challenges, the government has decided to invite global players to participate in the coal mining auctions.

The invite will cover a range of sectors, including mining, logistics, and infrastructure. The government aims to attract the best bids and ensure that the auctions are conducted in a transparent and competitive manner.

The auction process will involve the issuance of notices inviting bids from interested parties. Potential bidders will need to meet specific eligibility criteria, including financial requirements and experience in the relevant sector.

The government has also established a committee to oversee the auction process and ensure that it is conducted in a fair and transparent manner. The committee will provide guidance and support to potential bidders and will also oversee the evaluation of bids.

The government is committed to attracting the best bids and ensuring that the auctions are conducted in a transparent and competitive manner. By inviting global players to participate in the coal mining auctions, the government aims to improve coal supply and competitiveness in India.
Hindi has been around the world country for a long time. But other languages which have their own special place in the country. India, a diverse country with various languages, takes pride in its diversity. Hindi is one of the 22 scheduled languages of the Republic of India. According to the Constitution of India, Hindi is the official language of the Union for all official work. However, every state in the country, except one, is allowed to have its own scheduled language. Hindi is one of the only languages in India that is not the official language of the Union, according to the Constitution. But every language, other languages which have their own scheduled languages, takes pride in its diversity.

A common language not for all languages but any country is good for unity and progress. Unfortunately, (one language) cannot bring a common language in our country. So you cannot impose any language.

Through all these connecting arguments there is a common language not for India but any country is good for its unity and progress. Unfortunately, (one language) cannot bring a common language in our country. So you cannot impose any language.

Author and lawyer Gautam Bhatia shares his views about the Constitution in light of latest developments in Jammu and Kashmir, reports V SATEESHK REDDY

A NOVEL VISION OF THE CONSTITUTION

Author and lawyer Gautam Bhatia has been vocal about the Constitution. On the death anniversary of its formulator and President of the Constituent Assembly, Dr. Rajendra Prasad, Bhatia talks about his lat-ter’s transformative vision.

The Supreme Court of India has been practicing law for four years in New Delhi and was part of the legal teams involved in the Right to Privacy, judgement, the Constitution, challenge to the constitutional validity of the National Investigation Agency (NIA) Act, to Section 377 of the IPC, the trial application for members of the Kabir Kala Manch, among others.

Speaking about the latest developments in Jammu and Kashmir, Bhatia says, “In most of the countries around the world, whether in constitutional terms or to any law, the governments take engagements and commitments from people and people change accordingly. In India though, the law would be amended first before taking in people’s opinion. The goal of integrating Kashmir in India is important but it is all about the further steps that are necessary to make it happen.”

Parliament failed to repeal colonial-era laws that are inconsistent with the prin-ciples of the Constitution, Bhatia mentions the judgement given in the Reversions of Crown Royal by Babuk in 1986 which was changed while dealing with a similar problem in the Indian Sikhhood case in 1983.

The transformative Constitution draws on pre-independence legal and Political Democracy to argue for the unity of the country and not just to itself. “In countries which are diverse historically, the political status of the country is not just one, the structure and history and above all its overall commitment to political and social transformation. The lawyer also advances his opinion for the Constitution of India and constitutional interpretation which is faithful to its own text, structure and history and above all its overall commitment to political and social transformation.

TO SPEAK OR NOT TO SPEAK?

What if the rule of one language is imposed upon the country tomorrow? Will it really unite the country or build tension and conflicts, asks ANUSHKA PRADEEP

In countries with a small population like Denmark, measures may be taken in a country and diverse as ours trying to establish a single official language across nation might not only aggravate issues related to communal disharmony.

In countries with a small population like Denmark, measures may be taken in a country and diverse as ours trying to establish a single official language across nation might not only aggravate issues related to communal disharmony.

For a person like me who comes from a different state and works in several other parts of the country, who comes from a different state and works in several other parts of the country, who comes from a different state and works in several other parts of the country. There is a need for acceptance of the diversity of India, an inclusive India, an ordinary India. Accepting the diversity is not a matter of choice, it is a matter of need. The goal of integration is not to impose but to allow people to choose. It is the need for acceptance of the diversity of India, an ordinary India, an inclusive India. Accepting the diversity is not a matter of choice, it is a matter of need.

CHARAN wanted SYE RAA... to be his dad’s best film till date: SURENDER REDDY

Charan said his dad gave consent to the story a decade ago but they had to wait for the right time to take it forward, the filmmaker said while speaking at the trailer launch event, reports NARAJAG GOUD

SHARJANYA’S film with debutant Sowjanya to be shot across multiple locations

In the Pioneer office, a team of designers, including Vignesh Shivan, the film director, are seen preparing for the shoot of Sharjanya’s upcoming film, Sharjanyaa’s, the director’s first venture. The film is being produced under the banner PVR Pictures in association with Udayanidhi Stalin’s 7 Screen Studios.

Sharjanya, who has gained experience in filmmaking by assisting on the sets of films like Krishnam, Yen, Sivakumar and Shankar, is gearing up for her debut in the film industry. She is currently working on the script of her upcoming film, Sharjanya, which is being produced for the first time by Vignesh Shivan.

Speaking to this journalist, Sharjanya said that she is excited to be part of a film being produced by Vignesh Shivan and is looking forward to working with him and other experienced filmmakers on the project.

The film is expected to go on the floors in January next year, and is scheduled for a release in March 2020. The shooting will take place in various locations around the world, including India, France, and the United States.

Sharjanya, who is known for her work in short films, said that she is eager to learn from the experienced filmmakers she will be working with and to bring her own creative vision to the project.

In the meantime, Sharjanya is busy with her upcoming film, Sharjanyaa, and is looking forward to the start of shooting in January.
RAJKUMMAR RAO LOOKS FORWARD TO START SHOOTING WITH PRIYANKA CHOPRA

Actor Rajkummar Rao, who will be soon seen collaborating with Priyanka Chopra for the Netflix film "The White Tiger," recently said that he is looking forward to working with her. He also hoped that they will have good times while shooting for the film. Rajkummar was interacting with the media at the trailer launch of Made In China along with his co-actor Mouni Roy, film’s director Mikhil Musale and producer Dinesh Vijan in Mumbai.

WILL DO WHATEVER IT TAKES TO BRING CANCER AWARENESS: ARJUN

Actor Arjun Kapoor will be lighting up the Bandra Worli Sea Link in red as a gesture to show his support to cancer patients. Actors, Arjun will light up the famous Bandra Worli Sea Link in red as a special pantom for cancer patients.

The cause matters deeply to Arjun as he has been through a deep personal loss due to this illness. Arjun’s father Shashi Kapoor was a cancer sufferer and passed away due to this ailment.

He has collaborated with the Cancer Patients Aid Association for the event where he will distribute roses and gifts to the kids who will join him on the occasion. World Rose Day is observed every year in the memory of 12-year old Melinda Rose from Canada.

World Rose Day was celebrated earlier this year due to the threat of COVID-19, resulting in the Rose Day celebration being cancelled. Arjun has collaborated with the Cancer Patients Aid Association for the event where he will distribute roses and gifts to the kids who will join him on the occasion.

No bowlers find it tough to contain Tamim, hits but young India pace Deepak Chahar, who has an eye on the Twenty20 World Cup, confirmed he was ready to go ahead with the tour.

Sri Lanka cricket added in South Africa following her scandal in South Africa. The Pakistan Cricket Board (PCB) said it was not aware of any information relating to the safety of the Sri Lankan cricket team and had committed to providing security.

Deepak Chahar, left, looks at Satwiksairaj Rankireddy in action during a Twenty20 international match in India on Sunday.

Chahar said he focuses on out-thinking the batsman, “You can also be a bowler or batsman. You have to keep guessing the batsman.”

Earlier I used to bowl more in the death overs and find it easier because in Powerplay we have only two fielders outside the circle and after that you have the pressure of the remaining five fielders,” Chahar said.

Paine says he is ready to go

We have been outplayed but it’s not really entertained. It has been a while. It was a pleasing effort but did not do much to the cricket, it was good to be out there. The second Test, the first 10 overs we played really well. It’s very difficult to get really going after a good start and get the game going. It was an important match for us, Bavuma, who has played 36 Tests, added. It means a lot to him.

“After Stockholm, the next Test will be at Lord’s. When David came in the 13th over, we won a strong domino effect at the halfway stage. I think we can do well in the T20 World Cup in Australia. It’s not just me, it’s the whole team. Bavuma said.

The third Test will be at Lord’s. It will always be good for me. It will be an important and others as well. I thought we can do well in the T20 World Cup in Australia. Bavuma said.

“T20 World Cup is a great opportunity to build on the T20 World Cup in Australia. It’s not just me, it’s the whole team. Bavuma said.”

There will always be questions about my form. There will be an important match for us, Bavuma, who has played 36 Tests, added. It means a lot to him.

No questions of replacing Virat and captain: Hesson

Tendulkar praised Smith, the number one batsman in the world, for the way in which he handled himself in the final Test. “There is no one in the world who is better at the challenge of batting in the slips,” Tendulkar said.

They had lost to India.
