The doubling rate of 3.9 per cent has reduced from 4.7 per cent in April 1 and 2.7 per cent in March 31. The number of coronavirus cases in India has increased from 575 to 13,500 during the 24-day lockdown. The Health Ministry, in its daily update, said 423 deaths have been reported in India so far, which is 13.6 per cent of the total number of cases. With 1,075 fewer cases of coronavirus reported in the last 24 hours, the total number of coronavirus cases in India has reduced by 0.1 per cent in several states, including Delhi, Haryana, Madhya Pradesh, Odisha, Telangana, Kerala, and Jammu and Kashmir.

In the state of Karnataka, 340 new coronavirus cases were reported on Saturday, taking the state’s total to 7,830. On Saturday, 122 people were discharged from hospitals, with 1,219 recoveries and three deaths.

According to reports put by the Siddalungeshwara Jatra in Karnataka, more than 500 to 1,500 devotees took part in the festival. A day after thousands of devotees took to the streets on Friday to perform Lord Shiva’s Shiva Linga darshan at the Siddalungeshwara Jatra in Kalaburagi, the Karnataka High Court had asked the Siddalungeshwara Jatra to submit a report on the incident. The court will hear the case on Monday.

According to reports, the increased number of test cases in the state is due to increased testing and not a result of increased infection rate.

The number of recoveries has only two occupants. According to reports, the number of recoveries in the state is due to increased testing and not a result of increased infection rate.

Heinous crimes in Delhi below 70% by 27

Virus claims 5 more lives in Mumbai

New Delhi: The Delhi police have registered 48 cases of heinous crimes in the national capital since the lockdown was declared on March 25, compared to 221 cases of heinous crimes registered in the last year. The national capital, which witnessed a wave of heinous crimes in the run-up to the 2020 Assembly elections, has recorded a decline of 78% in the incidence of heinous crimes in the last two months due to the lockdown.

Police officials said that the lockdown has resulted in a decrease in the crime rate as well as in the number of cases filed.

The police have registered 11 cases of murder, 12 cases of rape, 9 cases of sexual assault, 2 cases of molestation, 1 case of kidnapping, 1 case of crime against children, 9 cases of attempted murder and 1 case of attempt to murder.

On way to hospital, woman gives birth inside police gypsy

The woman, who was briefly taken to the hospital in the national Capital and then back home, gave birth to a boy in the police gypsy on Friday evening, according to police officials. She was later shifted to a dedicated COVID hospital in Rohtak.

According to police, the woman, aged 70, was admitted to the South Avenue Police Station in the national Capital at 7:00 pm with a complaint of labour and delivered the baby in the police gypsy. She was taken to the hospital in the police gypsy, but had to be shifted to the hospital as there was not enough space in the police gypsy.

"The family requested the doctors to remain by her side in the police gypsy and also to not take the baby to the hospital," said the DCP, South district. He added that the doctors were not willing toallow the family to keep the baby in the police gypsy, as it was not a proper place for the baby to be kept. The family was eventually asked to keep the baby in the hospital, but the doctors were still not willing to take the baby to the hospital.

The woman's family then asked the police to take the baby to the hospital, but the police were still not willing to take the baby to the hospital. The family then asked the police to take the baby to a nearby hospital, but the police were still not willing to take the baby to the hospital.

1. Gonda, a slow and deliberate process, that some experts have warned could take months to roll out, has not been able to keep pace with the virus's rapid spread. This has led to a widening gap between the number of people infected and the number of vaccines administered.

2. The initial batch of vaccines was expected to be delivered to approximately 100 million people in the first phase, but only about 40% of those who were eligible have been vaccinated so far.

3. The government has said that it will continue to work with vaccine manufacturers to increase production and distribution, and that it is committed to ensuring that all eligible citizens have access to the vaccine.

4. The government has also announced plans to use a digital platform to manage the vaccination process, which will help track the distribution and administration of vaccines.

5. The government has also stressed the importance of maintaining social distancing and other preventive measures even after receiving the vaccine, as the virus is still circulating in the community.

6. The government has also stated that it will prioritize the vaccination of front-line health workers, elderly people, and those with underlying health conditions, as these groups are at higher risk of severe illness.

7. The government has also announced plans to vaccinate pregnant women and their children, as well as those who are planning to get pregnant in the near future.

8. The government has also stated that it will use the lessons learned from the initial vaccination drive to improve future rounds of vaccination, and that it will continue to work with vaccine manufacturers and other stakeholders to ensure a successful vaccination campaign.

9. The government has also stressed the importance of transparency and accountability in the vaccine distribution process, and has promised to provide regular updates on the status of the vaccination drive.

10. The government has also emphasized the importance of public education and awareness campaigns to ensure that people understand the importance of getting vaccinated and the benefits it offers.

11. The government has also stated that it will continue to work with international partners and other countries to ensure that all eligible people have access to the vaccine.

12. The government has also announced plans to use a digital platform to manage the vaccination process, which will help track the distribution and administration of vaccines.

13. The government has also stressed the importance of maintaining social distancing and other preventive measures even after receiving the vaccine, as the virus is still circulating in the community.

24. The government has also announced plans to use a digital platform to manage the vaccination process, which will help track the distribution and administration of vaccines.

25. The government has also emphasized the importance of transparency and accountability in the vaccine distribution process, and has promised to provide regular updates on the status of the vaccination drive.

26. The government has also stated that it will continue to work with international partners and other countries to ensure that all eligible people have access to the vaccine.
Rising Covid-19 cases make TN’s joy short-lived

K R VISWANATHAN

In a bid to control the increase in the number of Covid-19 cases, the Tamil Nadu government has ordered a fresh local lockdown for 14 days from Monday evening at 9 pm to midnight on Saturday.

The statewide lockdown was imposed on Saturday and continued till 9 am on Monday morning. A total of 19 districts in the state witnessed local lockdowns and restrictions on public movement, affecting 22 of the state’s 38 districts.

The decision to reimpose the local lockdowns was taken after a meeting between Chief Minister MK Stalin and Health Minister VR Velu and other officials.

The lockdown comes in the wake of an increase in the number of daily cases, with the state reporting 88,431 new infections on Sunday. The state currently has 9,62,963 active cases, with 9,47,876 under treatment and 15,087 in isolation.

The state had imposed a statewide lockdown on April 14 due to a surge in Covid-19 cases, which was lifted on June 1.

However, the number of cases has been on the rise since then, with the state crossing the 1 lakh mark on Saturday.

The local lockdowns were imposed in 19 districts, including Coimbatore, Tiruchirappalli, Salem, thanjavur, Madurai, and other rural districts.

The lockdown in the non-metropolitan areas was announced on Sunday, while the restrictions in metropolitan areas were announced on Saturday.

The state government has also ordered the closure of all shops except those dealing in essential commodities.

The local lockdowns will be lifted on June 12, but the restrictions on public movement and other measures will continue.

The state government has also urged people to continue following the COVID-19 protocols to curb the spread of the virus.

Kanchipuram: N Senthil Kumar

"We are here to provide a friendly environment for all our patients. We understand that the pandemic has caused stress and anxiety for everyone. We are always here to support our patients in any way we can," said Mr. Senthil Kumar, a medical professional at Kanchipuram Hospital.

Dr. Senthil Kumar continued, "Our team of doctors and nurses is dedicated to providing the best care possible to our patients. We take pride in our work and are committed to helping our community during this difficult time. We urge everyone to continue following the guidelines and stay safe."

The hospital has taken several measures to ensure the safety and well-being of its patients and staff, including implementing strict infection control protocols, providing personal protective equipment (PPE) to all staff members, and conducting regular COVID-19 testing.

Kollam: Shobha Raju

"Our goal is to provide the highest level of care to our patients. We understand that these difficult times can be overwhelming, but we are here to help," said Ms. Shobha Raju, a nurse at the Kollam Medical College Hospital.

Ms. Shobha Raju added, "Our team of doctors and nurses is dedicated to providing the best care possible to our patients. We take pride in our work and are committed to helping our community during this difficult time. We urge everyone to continue following the guidelines and stay safe."

### Zoom into our lives

**With concerns over privacy, is the Chinese app masking data mining and surveillance?**

**Zoom** lets people have meetings and work remotely through the online platform. However, concerns over privacy and data usage have arisen. Reports indicate that Zoom has faced criticism for its security and privacy practices, leading to a decrease in its user base. The app has faced several controversies, including data breaches and privacy violations. It is crucial to address these concerns and develop solutions that protect users' privacy and data. The issue of privacy and data usage is a significant concern in the current digital age, and solutions need to be developed to ensure that users' rights are respected. 'Covidians' are breaking the law and putting the lives of other people at risk. They must be held mandated and booked under the criminal justice system.

This clearly shows that given the current scenario, the government is not being pragmatic. There are areas which are in desperate need of an urgent and immediate change.

It would be wiser for the government to consider the following:

- Implement strict lockdowns in areas with high Covid-19 transmission rates.
- Ensure that health care facilities are adequately equipped and staffed.
- Increase testing and tracing efforts.
- Provide adequate support to those affected by the pandemic.

In conclusion, the government must take immediate action to address the current situation and protect the lives and safety of citizens.
The novel coronavirus, or COVID-19, has caused a global pandemic. The virus is highly contagious and can spread rapidly through person-to-person contact. As of the latest data, millions of people have been infected, and hundreds of thousands have died worldwide. The virus has led to widespread shutdowns of businesses and schools, and many countries have implemented strict social distancing measures to curb its spread. The pandemic has also had significant economic and social consequences, affecting industries and people's lives globally.
Much-needed boost to the markets, following difficulties

In September, the Reserve Bank of India (RBI) announced a targeted long-term re-

operation totalling ₹50,000 crore for MSMEs through SBIG, NABARD and NBFCs. The focus was to improve credit delivery, enhance access to credit for MSMEs, and provide a much-needed boost to the markets, following difficulties in recent months. The RBI’s measures were aimed at providing liquidity support to MSMEs and NBFCs, which operate predominantly in the medium-enterprise segment.

RBI's continued resolve to

The Reserve Bank of India’s (RBI) continued resolve to ensure the availability of liquidity and to boost liquidity and ease the financial stress caused by the coronavirus crisis was praised by economists and analysts. According to Motilal Oswal, the gainer in the Sensex pack, the 50,000-crore targeted operations would help banks in dealing with the moratorium window for the quarter ending March 31. It would also provide additional support to small banks, NBFCs and other segments, the group added.

RBI’s continued resolve to

The Reserve Bank of India’s (RBI) continued resolve to ensure the availability of liquidity and to boost liquidity and ease the financial stress caused by the coronavirus crisis was praised by economists and analysts. According to Motilal Oswal, the gainer in the Sensex pack, the 50,000-crore targeted operations would help banks in dealing with the moratorium window for the quarter ending March 31. It would also provide additional support to small banks, NBFCs and other segments, the group added.

New Delhi: A much-needed boost to the markets, following difficulties in recent months, was provided by the Reserve Bank of India (RBI). The RBI announced a targeted long-term reoperation totalling ₹50,000 crore for MSMEs through SBIG, NABARD and NBFCs. These measures were designed to improve credit delivery, enhance access to credit for MSMEs, and provide a much-needed boost to the markets, following difficulties in recent months. The RBI’s measures were aimed at providing liquidity support to MSMEs and NBFCs, which operate predominantly in the medium-enterprise segment.

ENCOUNTER 45 MINUTES

WALKTHROUGH 30 MINUTES

NOTHING CALLED VOID

Artiste SOHANI QADRI pushed the language of art beyond its boundaries to develop his work. He is best-known for his luminous, dye-infused works, which explore the notion of emptiness, says Uma Nar

THE STATE OF BEING

Painting for Qadri was a quest for a medium that could express the explorative and manipulative nature of his practice. In his words, he was "looking for a medium that could express the uncontainable, the unspeakable, the unsaid, the unsaid."

Qadri has been inspired by various artists, including Mahendra Singh, the life and work of whom are epitomized in the artist's work. He has been influenced by the spiritual traditions of India, particularly the philosophy of Advaita Vedanta, which emphasizes the unity of all existence.

In his work, Qadri explores the concept of "emptiness," which is central to Advaita Vedanta. He uses dye-infused works to create a sense of emptiness, a feeling that goes beyond the physical world and into the realm of the spiritual.

In the words of the artist, "My work is an exploration of the idea of emptiness, the idea of nothingness, the idea of void. It is a search for the ultimate reality, the ultimate truth. It is a search for the infinite, the infinite.

In Qadri's hands, the rhythm of his art work becomes a powerful tool to explore the concept of emptiness. His work is a meditation on the idea of emptiness, a reflection of the artist's spiritual journey.

In conclusion, Qadri's work is a testament to the power of art to express the unexpressable, to explore the unknown, and to reach beyond the boundaries of the physical world. His work is a reminder that art has the power to explore the infinite, to touch the divine, and to awaken the spirit.

Balwanth's magic continues to unfold

While epistemologies have always been trending among the audience, new age female experimenterBalwanth, a digital artist, is gaining recent times creating a humongous fan base and an ever-increasing demand to make minds feel good. He is known for his magical acts and alwaysImage on you.

A decade of building businesses and dealing with challenges faced by women made IFFAT KHAN start a venture to support female entrepreneurs and help them grow. By TEAM VIVA

She breaks the dream

Kate Bibernot talks about her book that has 25 experiments for house-bound kids, passion for chemistry, and her efforts for new generations

I n her two homes—Robert, her own house now, a new发觉, where Kate Bibernot can work and write, and the two studio apartments she shares with her husband in New York, Kate Bibernot has a lot on her plate. She is a successful entrepreneur, a mother of two, a science communicator, and an author. She is passionate about giving back to the community and making a difference.

Kate Bibernot is the founder and CEO of Philomel Books, a Penguin Random House imprint. She is also the author of the Kate the Chemist series, which has been translated into more than 15 languages.

Kate was born in New York and grew up in the suburbs of Chicago. She has a B.S. in Chemistry from the University of Illinois and a M.S. in Chemistry from the University of California, Berkeley. She has been working in the publishing industry for over 20 years and has published over 20 books for children.

Kate's passion for chemistry started at a young age. She was always interested in science and loved experimenting with different substances. After graduating from college, she decided to pursue a career in publishing and started working at Penguin Books. She later founded Philomel Books, which focuses on publishing books for children in the science and technology fields.

Kate's dream is to inspire children to pursue science and technology careers. She believes that science education should be accessible to all children, regardless of their background. She is committed to making sure that all children have the opportunity to learn about science and to pursue their dreams.

Kate's next book, "Kate the Chemist: The Big Bang of Science," will be released this fall. The book is the third in the Kate the Chemist series and features 25 experiments for kids.

Kate is also a frequent speaker at science conferences and events, sharing her passion for science and her love for teaching kids about science. She is an advocate for science education and is committed to making sure that all children have the opportunity to learn about science and to pursue their dreams.

Kate's advice to kids who are interested in science is to never stop exploring and experimenting. She believes that science is a process of discovery and that the most important thing is to have fun while learning.

Kate's message to parents is to encourage their children to pursue their dreams, regardless of what they might be. She believes that every child has the potential to achieve great things, and it's up to parents to inspire and support their children in their pursuits.

Kate's vision for the future is to see a world where science education is accessible to all children, and where everyone has the opportunity to pursue their dreams. She believes that science is a powerful tool for solving problems and making the world a better place, and she is committed to making sure that everyone has the opportunity to learn about science and to use it to make a difference.

Kate Bibernot is passionate about her work, and she always strives to make a positive impact on the world. She believes that every child has the potential to achieve great things, and she is committed to making sure that everyone has the opportunity to pursue their dreams.
Seam & swing top priorities for Shami

Lockdown hasn’t affected our goal to win Olympic medal: Manepede

Vettel fears such a move could have negative consequences"... 

But while bowlers tend to get credit for the wickets, Shami believes it is the offspinners who are taking on a lot of responsibility. "I think it's the other people who do all theonga but still need to work hard”, he said. “I never stop working and even after a win, I come out the ground with a clear mind. I have a lot of trust in my abilities and go from there."

While bowlers tend to get credit for the wickets, "I think it's the other people who do all the hard work.”

"I have a lot of trust in my abilities and go from there."

Dowse’s comments come as the South African government has announced plans to ease restrictions on contact sports such as baseball, basketball, and hockey in the coming months. Dowse said South Africa's national teams will be able to return to training in phases, starting with individual workouts and progressing to group sessions as conditions permit. The country's first Olympic qualification event is set for late May, with plans for the 2021 Olympics to be held in Tokyo in July.
