A Glimmer of Hope

Coronavirus has no doubt shaken the world and turned it upside down, but there is a glimmer of hope from at least three major factors, after nearly six months of uncertainty about the virus's strain. Finally, a vaccine, an antibody treatment previously tested in humans for Ebola, seems to have cured about 70% of its patients. Secondly, it is now taking longer for coronavirus cases to double in India (6.2 days) than it was earlier. Thirdly, India now has the highest number of recoveries in the world. The researchers have been working hard to ensure the vaccines are effective and that the patients recover quickly. The researchers have also been working to ensure that the patients recover quickly.
**Data presentation on Covid-19 needs to be reworked to soothe nervous**

In statistics, crude death rate is measured as a number of deaths occurring during a time-period (generally a year) to the population (generally expressed as number of deaths per thousand persons). It is the ratio of number of deaths due to the particular cause to the total population of the area in a given time period. Therefore, the main purpose of calculating crude death rate is to determine the deaths in a given area. For example, the crude death rate of India in 2020 is 7.2 per 1,000 population.

The death rates can be calculated for different age groups, sex, race, and ethnic groups. The crude death rate provides a general overview of the overall death rates in the population. However, it does not provide information about the causes of death or the factors that contribute to them. Therefore, it is necessary to calculate the cause-specific death rates to understand the factors that contribute to the overall death rates.

In addition to the crude death rate, the cause-specific death rates can also be calculated for different age groups, sex, race, and ethnic groups. The cause-specific death rates provide a more detailed picture of the overall death rates in the population. For example, the cause-specific death rates for age group 0-4 years can be calculated to understand the factors that contribute to the overall death rates in this age group.

In conclusion, the crude death rate provides a general overview of the overall death rates in the population. However, it does not provide information about the causes of death or the factors that contribute to them. Therefore, it is necessary to calculate the cause-specific death rates to understand the factors that contribute to the overall death rates. The cause-specific death rates can be calculated for different age groups, sex, race, and ethnic groups. These rates provide a more detailed picture of the overall death rates in the population.
CM keen on patient care

Chief Minister YS Jagan Mohan Reddy is keen on patient care and ensuring that the availing of the facilities at the指定的医院 is not a hassle for the patients. He has been taking personal interest in ensuring that the facilities at the hospitals are up to date and the staff is well trained.

The TTD has handed over 100 buses to the District Collector for the transport of medical staff and other personnel. These buses are being used to transport patients from remote areas to hospitals in the city.

The TTD has also taken steps to ensure that the facilities at the hospitals are well maintained and that the staff is well trained. The TTD has also taken steps to ensure that the facilities at the hospitals are well maintained and that the staff is well trained.

Frequent touching of surfaces is a frequent source of infection. A UV racket can be used to disinfest surfaces just by waving it.

Research shows that UV rays can kill microorganisms on surfaces. A UV racket can be used to disinfest surfaces just by waving it.
Empire state of mind

Will New York city rise again from the shadow of COVID-19? It did the trauma of 9/11?

There will now be a second coming? Those familiar with NYC’s resilience know there will be a second coming. The city that never sleeps is determined to make a comeback.

The state of New York, which has been the epicenter of the US outbreak, is poised to open up its economy in phases. Governor Andrew Cuomo has announced that the state will begin reopening on May 15, with a phased approach. The reopening will be guided by a set of criteria, including a decline in hospitalizations and a decrease in the number of new cases.

Cuomo’s plan includes the phased reopening of various sectors, including retail, agriculture, manufacturing, and construction. The plan also includes the phased reopening of the film and television industry, which has been shut down since March.

The reopening of New York City, which is the economic hub of the state, will be a significant milestone. The city’s economy is expected to take a hit due to the COVID-19 pandemic, and the reopening will be crucial for the city’s economic recovery.

In addition to the reopening of the economy, the state is also focusing on preparing for the potential waves of the virus. The state is increasing its testing capacity and contact tracing efforts. The state is also expanding its hospital capacity to accommodate an increase in cases.

New York City, which is one of the most densely populated cities in the world, is facing challenges in reopening. The city has reported over 200,000 cases of COVID-19, with over 13,000 deaths.

The city is focusing on reopening in phases, with non-essential businesses opening up first. The reopening will be guided by a set of criteria, including a decline in hospitalizations and a decrease in the number of new cases.

The reopening of New York City will be a significant milestone for the state and the country. It will be a test of the state’s ability to manage the reopening process and ensure the safety of its residents.

The state’s decision to reopen the economy is based on a careful assessment of the data and the state’s readiness to reopen. The state is taking a cautious approach and is prepared to adjust its plan as needed.

The reopening of New York City will be a significant milestone for the country. It will be a test of the country’s ability to manage the reopening process and ensure the safety of its residents.

To support the measures to contain the spread of COVID-19, the Reserve Bank of India (RBI) has announced that from April 1 to 15, there will be no capital requirement for any non-banking financial companies (NBFCs) or micro-lenders while addressing media on Friday.

The regulator said the banks may have enough capital to support the measures to contain the spread of COVID-19, and the government has also announced various measures to support the non-banking financial sector.

The RBI said it would provide a special liquidity facility for a total amount of Rs 50,000 crore to NBFCs, and it would also provide a special liquidity facility for a total amount of Rs 50,000 crore to micro-lenders.

However, the RBI said it would not provide any additional support to NBFCs or micro-lenders.

The regulator also said it would provide a special liquidity facility for a total amount of Rs 50,000 crore to NBFCs, and it would also provide a special liquidity facility for a total amount of Rs 50,000 crore to micro-lenders.

Caring for man’s best friend

SUMIT ONKA

By good grace, in today’s digital age, the rescue of stray dogs, feeding...

Hunger, unfortunately, does not have it any better as they are not involved in spreading infections due to the lockdown. However, it is tough keeping dogs busy with the energy-boosting task of gathering food from house and home-like halls. Research tells us that even a little bit of exercise for dogs produces a significant reduction in cortisol—a major stress hormone. Animals, especially dogs and cats, can help reduce stress, anxiety, depression and can boost mood.

However, animals are inevitably bearing the brunt of the lockdown. Strays rely on dhabas or subzi-mandis (vegetable markets) for food. And they are now starving. Pedigreed animals too do not have it any better as they are dying slow deaths in locked-up pet shops. Access to medicines and other care is limited to them.

While most pet shops have closed, veterinary hospitals are still operating to help. However, it is important to note that animals may also suffer due to the lockdown.

The WHO has reported a significant rise in new cases of anxiety, depression and ease of major stress hormone. This is because dogs and other animals produce a significant rise in cortisol—due to the lockdown. However, it is tough keeping dogs busy with the energy-boosting task of gathering food from house and home-like halls. Research tells us that even a little bit of exercise for dogs produces a significant reduction in cortisol—a major stress hormone. Animals, especially dogs and cats, can help reduce stress, anxiety, depression and can boost mood.

While most pet shops have closed, veterinary hospitals are still operating to help. However, it is important to note that animals may also suffer due to the lockdown.
With the COVID-19 lockdown shutting everyone in their homes, B-Town denizens are constantly looking for new ways to occupy themselves. A popular means that has emerged for our celebrities is organic farming. Many of them are busy growing organic vegetables and fruits in their gardens, with some even taking up the task of keeping the garden clean.

Bhumi Pednekar has decided to learn the science of hydroponics farming or soil-less gardening from her mother during this lockdown. “My mom and I always wanted to have a hydroponics garden of our own where we grow our own vegetables and it’s rather a sustainable lifestyle. We wanted to have a garden to indulge in at home,” she informed. Bhumi added that she has been working closely with her mom on this project. Bhumi’s mom recently shared a video where she was teaching her son how to pluck organic brinjals from their garden, and at the same time ensuring the child didn’t touch the green chillies.

Shilpa Shetty recently shared a video where she can be seen “cleaning and tending to the garden” with a broom. The actress shared another video where she was teaching her son how to pluck organic brinjals from their garden and ensuring he didn’t touch the chillies as well. As the boy kept picking up and putting down the vegetable, ensuring the child didn’t touch the green chillies.

Aditya Roy Kapur also recently shared a video on Instagram where he can be seen sweeping dry leaves in the garden with a broom. The lockdown season has also turned Juhi Chawla into an organic farmer. The actress shared pictures where she can be seen planting tomatoes and preparing beds for coriander and fenugreek. Juhi called it her “Naya kaam” (new task)!

Payal Ghosh recently shared photographs where she can be seen brooming her garden and taking care of plants. “Had fun gardening, it’s relaxing way to get in touch with nature, also good for mental and body. Never Stop Learning. Because never know, sometimes critical times also teach you good things, so it is rightly said, ‘Never Stop Learning’,” wrote the actress on Instagram.

In a recent tweet, Dia Mirza wrote about her time in the garden. “March. First time in the garden. Flowers blooming, birds singing, nature at its best. A new home, a new life. A new way of living. Love is all around us.,”

Mouni Roy in a recent Instagram post shared photographs of freshly plucked organic tomatoes from her garden. Mouni Roy also shared pictures of her “homegrown” tomatoes on Instagram. “When you water your garden, you forget how simple things in life can bring such joy and happiness!,” she wrote.

Raveena Tandon who shared pictures of her “homegrown” tomatoes can have a tough competition from Raveena Tandon who shared pictures of her “homegrown” tomatoes on Instagram. "Homegrown tomatoes! We forget how simple things in life can bring such joy...” expressed Raveena.

The lockdown season has also turned Juhi Chawla into an organic farmer. The actress shared pictures where she can be seen planting tomatoes and preparing beds for coriander and fenugreek. Juhi called it her “Naya kaam” (new task)!

PL clubs committed to finishing season

**LONDON:** Premier League clubs have come together in a show of support for completing the Premier League this season, even as non-essential retail has been halted and the UK is in lockdown.

Sports Minister Chris Heaton-Harris has written to the Premier League to assure the clubs they are in a position to say anything about the season, with the goal being to do so as soon as possible.

A new wave of coronavirus restrictions has been announced, with the Premier League and FA planning to resume the season on June 8, subject to government guidance.

The football season is suspended due to the coronavirus pandemic and has been on hold since March 13.

European Tour faces further Delays

The European Tour season has been delayed again, with the latest round of postponements taking effect on Monday, March 23.

The Tour has announced that it will not stage any tournaments until late May, with the rescheduled events set to take place in June and July.

The decision comes after the French Open was postponed to June 2020 due to the coronavirus pandemic.

The Tour is working closely with the French government and the French Tennis Federation to ensure that the event can be held safely.

Laver Cup postponed until 2021

The Laver Cup, which is held every two years, has been delayed to 2021 due to the coronavirus pandemic.

The event, which features all of the top players from the ATP and WTA tours, had been scheduled to take place in Prague in September.

The International Tennis Federation (ITF) announced the postponement on Thursday.

The ITF said that it would work with the ATP and WTA to find a new date for the event and that it would be held in September 2021.

The ITF also announced that the Laver Cup will be held every two years, starting in 2021.

It also announced that the event will feature all of the top players from both the ATP and WTA tours.

The ITF said that it would work with the ATP and WTA to find a new date for the event and that it would be held in September 2021.

The ITF also announced that the Laver Cup will be held every two years, starting in 2021.

Babu admits it was an easier said than done process to have got the nod of Sethupathi for the film, a rustic love story, starring Vaishnav Tej and Krithi Shetty, finds NAGARAJ GOUĐ.

Unfortunately, Sukumar garu and I couldn't meet then, but Babu Babu recalls in a conversation with The Pioneer, 15 minutes into the narration, the director could finally get a retort from his favourite actor at Park Hrithik Roshan in Mumbai, who was passing through. The actor told me later that it might take time to reach him in person but he will take a call on the story in just two days after the narration. He informed me that he will be back in the [Sethupathi] sets right away and that he will get back to me. Meanwhile, to impress him and to ensure that he doesn't lose out on the finer nuances of the script, I've got hold of an assistant director who is fluent in Tamil. Within a week, the assistant would do the job. He said, Brother, I will understand the language because I was sure that my assistant would do the job. I grasped my story and started narrating it to me in Tamil. He was better than the narration voice. Maybe I got bored of hearing my story in Telugu time and again, but I enjoyed the narration even though I couldn't understand it, he reminisces.

And when Babu Babu finally got Sethupathi's appointment for the narration three months later, he was in for a shock. "You took three months to narrate the story in Telugu. I expected the narration in Tamil. Our allotted time was one hour. There out, Sethupathi garu is maintain that I narrate it. He said, Brother, I will understand you get place I understand. But the story is written because I was sure that my assistant would do the job. I grasped my story and started narrating it to me in Tamil. He was better than the narration voice. Maybe I got bored of hearing my story in Telugu time and again, but I enjoyed the narration even though I couldn't understand it, he reminisces.

Babu said, the most challenging aspect of the entire process was the stake: a rustic love story, starring Vaishnav Tej and Krithi Shetty, finds NAGARAJ GOUĐ.

Congratulations earlier this year, the first look of Upendra-starrer multilingual film, Ayyappanum Koshiyum, unveiled on Tuesday, received a positive response from the audience. The film is produced by director R Chandru, who is teaming up with Upendra garu, its name of which will be revealed soon, he familiarises.

An undated world—introduced this to the Telugu audience with a similar response upon release. The hero's character.
