## Pilot back to recover lost ground

Cong may again entrust him with some key responsibility in State politics

PNS ■ NEW DELHI/JAIPUR

After calling off his rebellion against Rajasthan Chief Minister Ashok Gehlot, Congress leader Sachin Pilot returned to Jaipur on Tuesday amid indication that the party high command may again entrust him with some "significant" responsibility.

There were telltale indications of this proposition. To start with, the high command set up a three-member committee consisting of senior leaders to look into the issues raised by Pilot and some MLAs against Gehlot's style of functioning.

If Pilot was not going to be associated with the State Government or State Congress, there would have been no need to set up such a committee, which would primarily ensure better coordination between Pilot and Gehlot in the future.

Secondly, throughout the day in his different media interaction and interview, Pilot never said he was not looking

Congress leader Sachin Pilot being welcomed by his supporters on his arrival at his residence in Jaipur on Tuesday

to regain the post of Deputy Chief Minister or the State president. "I've left it to the high command," was his stock reply to pointed questions about his future, though he kept asserting he would continue to serve people of Rajasthan.

Thirdly, Pilot made it a point to emphasise he was nothing personal against

Gehlot, whom he addressed as an "elderly" and "experienced" leader.

Against this background it looks obvious that Pilot and his supporting MLAs could hope to get their pound of flesh, though it may take time.

On his arrival in Jaipur, he was greeted by hundreds of his supporters. Pilot said he was pained by the words used

against him, but he would like to forget and move on.

"I am sad, shocked, and hurt due to the kind of words used against me," Pilot said. He said there should not be any space for "personal ill-feelings" in politics and there should not be any vendetta politics.

"I have not demanded any post from the party but have said that MLAs have raised issues and there should be no vendetta politics against them," he told reporters at his residence.

He said differences can be ideological, on functioning or thoughts but in politics, there is no space for vendetta. "I had and have good relations with all leaders," he said.

"I am happy that the party leadership heard our issue to be it related to functioning, development, workers participation, self-respect, etc. The AICC has constituted a committee, which in a time-bound manner will address the issues," said Pilot.

Pilot was fired from his

post of Deputy CM as well as State Congress chief after he rebelled against the Ashok Gehlot Government last month.

"We never spoke or did anything against the party or party leadership. Several people spread many rumors and raised many questions but we remain on the stand that we took 30 days ago," Sachin Pilot said.

### 6 Manipur Cong MLAs resign from Assembly, also quit party

Imphal: Six Congress MLAs in Manipur have submitted their resignation from the Legislative Assembly and also quit the party on Tuesday. The six legislators who had handed over resignation letters to Speaker Yumnam Khemchand Singh the previous night, formally informed the Congress office here about leaving the party.

## SC: Daughters have equal rights to paternal property

PTI ■ NEW DELHI

Holding that daughters cannot be deprived of their right of equality, the Supreme Court on Tuesday ruled that they will have equal rights to inherit joint Hindu family property as sons, saying the amended Hindu Succession Act that came in force in 2005 will have retrospective effect.

"A daughter always remains a loving daughter. A son is a son until he gets a wife. A daughter is a daughter throughout her life," the top court observed in a significant judgment while upholding the rights of a daughter even if the father died before the enactment of the Hindu Succession (Amendment) Act, 2005.

A bench of Justices Arun Mishra, S Nazeer and MR Shah said the provisions contained in substituted Section 6 of the Hindu Succession Act, 1956, confer the status of coparcener on the daughter born before or after the amendment in the same manner as a son with the same rights and liabilities.

### Rights intact even if father died before enactment of the Hindu Succession (Amendment) Act, 2005

Coparcener is a term used for a person who assumes a legal right in parental property by birth only.

The verdict makes it clear that the amendment to the Hindu Succession Act, 1956, granting equal rights to daughters to inherit ancestral property would have retrospective effect.

The top court overruled its earlier 2015 decision in which it had originally held that the rights under the amendment are applicable to living daughters of living coparceners as on September 9, 2005, irrespective of when such daughters are born.

The judgment on a batch of appeals against the 2015 verdict came on the issue whether the amendment to the Hindu Succession Act, 1956, granting equal rights to daughters to inherit ancestral property would have retrospective effect. "The rights can be claimed

by the daughter born earlier with effect from September 9, 2005 with savings as provided in Section 6(1) as to the disposition or alienation, partition or testamentary disposition which had taken place before December 20, 2004. Since the right in coparcenary is by birth, it is not necessary that father coparcener should be living as on September 9, 2005" it said.

The SC, in its 121-page judgement, said the statutory fiction of partition created by proviso to Section 6 of the Hindu Succession Act, 1956 as originally enacted did not bring about the actual partition or disruption of coparcenary.

"The fiction was only for the purpose of ascertaining share of deceased coparcener when he was survived by a female heir, of Class-I as specified in the Schedule to the Act of 1956 or male relative of such female.

## Eminent poet Rahat Indori passes away

PNS ■ INDORE

Sabhi ka Khoon hai shamili smitti me shamili, Kisi ke baap ka Hindustan thodi hai"

Writer of these lines who was known as one of the most talked about contemporary Urdu poets, Rahat Indori, 70, died after contracting Covid-19 infection on Tuesday morning.

Indori who was a native of Indore in Madhya Pradesh had himself taken to social media to announce his infection on Tuesday morning and was shifted to Aurobindo hospital in the city. However, his condition deteriorated as the day progressed, said sources from the hospital.

He suffered from diabetes, heart ailments and kidney problems, said those close to Indori family. He suffered heart attack thrice and due to lungs infection, Indori could not survive, said the Aurobindo hospital.

## Pranab critical, on ventilator support

PNS ■ NEW DELHI

Former President Pranab Mukherjee continues to remain critical on ventilator support post-surgery for a brain clot, the Army's Research and Referral (R&R) Hospital said on Tuesday.

The Tuesday evening medical bulletin said the former President "has not shown any improvement and his status has worsened. He remains on ventilator support."

Mukherjee underwent emergency life-saving surgery for a brain clot on Monday. In a statement, the Army Hospital said, "Pranab Mukherjee's health condition continues to remain critical at Army Hospital (R&R) Delhi Cantonment. The former President, who underwent life-saving emergency surgery for brain clot on August 10, 2020, has not shown any improvement and his health status has worsened. He remains on ventilator support."

A multidisciplinary team of doctors is constantly monitoring Mukherjee's health.

The former President, 84, was admitted to the military hospital on Monday afternoon and was tested Covid-19 positive. "On a visit to the hospital for a separate procedure, I have tested positive for Covid-19 today. I request the people who came in contact with me in the last week, to please self isolate and get tested for Covid-19," Mukherjee tweeted on Monday afternoon.

Defence Minister Rajnath Singh visited the R&R Hospital on Monday and enquired about the former president's health. Singh was at the hospital for around 20 minutes.

## Russia 1st to develop corona vaccine amid safety concerns

PNS ■ NEW DELHI

Amid the race to develop a Covid-19 vaccine, Russia has become the first country in the world to register a vaccine against coronavirus disease. Russian President Vladimir Putin announced the approval of a coronavirus vaccine for use on Tuesday, claiming it as a "world first" and one of his daughters has already been inoculated amid continued concern and unanswered questions over its safety and effectiveness.

The vaccine has been given regulatory approval after less than two months of testing on humans. The vaccine was named 'Sputnik V' in reference to the 1957 launch of a Soviet satellite, which opened space to exploration by humans.

"This morning, for the first time in the world, a vaccine against the new coronavirus was registered in Russia," Putin

said during a televised video-conference call with Government Ministers. "One of my daughters had this vaccine. I think in this sense she took part in the experiment," Putin said.

He said that his daughter had a temperature of 38 degrees Celsius (100.4 Fahrenheit) on the day of the first vaccine injection, and then it dropped to just over 37 degrees (98.6 Fahrenheit) on the following day. After the second shot she

again had a slight increase in temperature, but then it was all over. "She's feeling well and has high number of antibodies," Putin added.

Meanwhile, Dr Randeep Guleria, Director of the New Delhi-based All India Institute of Medical Sciences (AIIMS), has said, "First, we need to be clear that the vaccine is safe. That is the first standard that the world will look at for mass production."

He also said that if the vaccine makes antibodies, how long would they last for, also needs to be answered.

The claim of victory by Putin in the global push to make an effective vaccine against Covid-19 comes amid suggestions that Russia has cut essential corners in its development. The vaccine has yet to go through crucial Phase 3 trials where it would be administered to thousands of people.

## Corona recovery rate rising in State, says CM Shivraj

At present, the recovery rate of the State has touched 75.1%

STAFF REPORTER ■ BHOPAL

Chief Minister Shivraj Singh Chouhan has said that the recovery rate of corona is continuously on rise in the State and patients in large number are going home after the recovery. This has resulted in decline in the numbers of active patients, which is a good sign.

At present, the recovery rate of the State has touched 75.1 per cent and the number of active patients has become 9105. New 843 patients have been admitted in the state and at the same time 922 went back home

after the recovery. In comparison to yesterday, the number of active patients has declined by 98. The fatality rate in the state is 2.54. Good arrangements have been made for free treatment of corona patients in Covid Hospitals of the State, he added. The Chief Minister was reviewing the situation of Covid-19 and arrangements in the state through video conference on Tuesday.

Minister for Home Narottam Mishra, Minister for Urban Development and Housing Bhupendra Singh, Chief Secretary Iqbal Singh Bains, Additional Chief Secretary Health Mohammad Suleman, DGP Vivek Johri, Principal Secretary Public Relations Sheo Shekhar Shukla and other Officers attended the video conference.

## Delhi records 8 deaths, lowest in 2 months

New Delhi: The national capital recorded 1,257 fresh coronavirus cases, and eight deaths, the lowest in over two months, in the last 24 hours, authorities said on Tuesday.

This is the first time in over two months that the daily

number of deaths has dropped below 10, said Delhi Government's health bulletin.

On August 5, Delhi recorded 11 Covid-19 deaths, indicating a significant improvement in the situation in the city. Chief Minister Arvind

Kejriwal said in a tweet, "Delhi recorded just 8 deaths on Tuesday. It is after many days that the number has gone below 10. We have taken several steps to reduce the number of fatalities due to the coronavirus."

While the late actor's father told the Supreme Court that the Mumbai Police was not probing his son's death "in the right direction" even as the Maharashtra Government contended that Bihar Police lacks jurisdiction in the actor's alleged suicide case.

## Sushant case: Bihar, Maha slug it out in SC

### Apex court seeks written submission by August 13

PNS ■ NEW DELHI

Bihar and Maharashtra Governments sparred in the Supreme Court on Tuesday over jurisdiction to probe film star Sushant Singh Rajput's death.

The Bihar Government further contended that even Rajput's post-mortem report was not given to Patna Police by Mumbai Police, and refuted the allegation of political pressure in the case.

Senior advocate Maninder Singh, representing Bihar Government, told the bench that no FIR has been lodged in Mumbai yet with regard to Rajput's death.

Reserving verdict on Chakraborty's plea, the SC asked all the related parties in the matter to file their written submissions, not more than two pages each, by August 13.

Senior advocate Abhishek Manu Singhvi, appearing for Maharashtra, told a bench of Justice Hrishikesh Roy that there was complete lack of jurisdiction of Bihar in the case.

During the nearly three-hour hearing, Singhvi further said that he has never seen such sensationalization being attached to a transfer petition.

Senior advocate Vikas Singh representing Rajput's father Krishna Kishore Singh said that his matter is only about a proper investigation of the case and according to him Mumbai Police were not investigating in the right direction.

Advocate Singh said the mark on Rajput's neck does not appear to be of hanging and it appears to be of a belt.

Singh said the family of the deceased has not seen the body hanging and what they had seen was his body lying on the bed.

### ED quizzes SSR's roommate, sister

PNS ■ NEW DELHI

A day after grilling actress Rhea Chakraborty and her family members, the Enforcement Directorate ED on Tuesday questioned late film star Sushant Singh Rajput's friend and roommate Siddharth Puthani and business manager Shruti Modi besides recording the statement of deceased actor's elder sister Meetu Singh in the ongoing money-laundering probe.

The ED has not traced anything to prove that Rhea fraudulently siphoned off ₹15 crore from Sushant's account, as alleged by his father.

Pithani and Modi arrived at the ED's Mumbai office at around 11 am in keeping with the summons but Meetu Singh reached a while after 1 pm. Modi is a named accused in both the abatement to suicide of Rajput and resultant money laundering case in the matter.

It's the first time a member of Rajput's family is appearing before the ED in the case.

### CAPSULE

**MY ACT WAS SEEN AS TREASON: SHAH FAESAL Srinagar/New Delhi:** Shah Faesal, the first resident of Jammu & Kashmir who topped the civil services exam in 2009, on Tuesday said his decision to join politics last year had done more harm than benefit as his "innocuous act" of dissent was seen as an "act of treason".

**SC STAYS NGT ORDER ON GODREJ APARTMENTS New Delhi:** The Supreme Court Tuesday set aside a National Green Tribunal order quashing the environmental clearance granted to a high-rise luxury project by Godrej Properties Limited and Wonder Projects Development Private Limited in Bengaluru.

**MUSEUMS FOR TRIBAL FREEDOM FIGHTERS New Delhi:** The Tribal Affairs Ministry on Tuesday said all nine museums dedicated to tribal freedom fighters will be completed by the end of 2022.

**191 JAIL INMATES TEST VIRUS POSITIVE IN BASTI Basti:** As many as 191 inmates of the district jail here were found Covid-19 positive, a senior official said on Tuesday.

According to M Ramesh Chandra, 374 inmates of the jail were tested through rapid antigen tests in a camp organised here on Monday, and of these 191 were found positive though they did not show any symptoms. The camp was organised on the directives of the district administration, Chandra said.

## Krishna Janmasthan temple out of bounds for devotees

Mathura: Janmashtami festival in Krishna Janmasthan will be observed on Wednesday with all the rituals, but the devotees will not be allowed entry to the temple due to the Covid-19 pandemic. However, arrangements have been made to live stream the 'puja' for devotees. The sanctum sanctorum of the Janmasthan will be given the shape of a 'Purnendu Kunj', sparkling with gems like pearls, diamonds and ruby.

## Railways suspends all passenger services

New Delhi: The Railways has stated that all regular passenger train services will remain suspended till further notice, but 230 special trains will continue to be in service. "This is to bring to the notice of all concerned that as decided and informed earlier as well, regular passenger and suburban train services will continue to remain suspended till further notice," a statement from the Railways said.

# State to develop integrated job portal: CM

STAFF REPORTER ■ BHOPAL

Chief Minister Shivraj Singh Chouhan has said that efforts should be made that every person seeking employment should get employment to the best of his ability and employment seekers should become so capable that one day they are in a position to give employment to others.

Chouhan said that an integrated job portal will be developed in Madhya Pradesh. Its benefits will be made available to the needy. This will make it easier for youth to get employment in various fields according to their skills.

Skill mapping during corona period through Rozgar Setu Portal helped identify more than seven lakh skillful persons in Madhya Pradesh. Work was done to provide employment to them. About 40 thousand people who returned from other states leaving their permanent jobs got immediate employment in the State. Taking this system forward, the idea of

developing a new portal has come up. From startups to MSME sector in Madhya Pradesh, talent will be given opportunities to move ahead. They will not be disappointed. Efforts will be made to make villages financially self-reliant.

Member of Parliament and former Union Minister Jayant Sinha said that organizing webinars is important for the creation of Atmanirbhar Madhya Pradesh. Self-reliance means creating one's own destiny. Madhya Pradesh has done good work in the field of agriculture and irrigation. States like Jharkhand can take inspiration from Madhya Pradesh. Sinha said that the new industrial policy of the country is in the making. In this, special attention will be paid to the development of food processing industry. Madhya Pradesh can bring good results in this sector.

Sinha said that the efforts of enabling various establishments in the economic sector, development of startup activities,

eco-friendly sustainable development are helpful for progress. The situation in Madhya Pradesh is quite favorable from the point of view of success in self-reliance. His experience is that the financial health of the State is also better than other States. Sinha said that concerted efforts have been made in the past by Chief Minister Shri Chouhan for the development of Madhya Pradesh. He said he is confident that Madhya Pradesh will play a very important role in the goal for Atmanirbhar Bharat. Chief Minister Chouhan was addressing the session on "Economy and Employment" in the Atmanirbhar Madhya Pradesh webinar.

Chouhan said that the suggestions given by former Union Minister Shri Sinha in the one-day session of Economy and Employment on the fourth and concluding day of the four-day webinar in which economic sector experts, senior officials, policy makers, prominent public representatives from across the country took

part to prepare a roadmap for Atmanirbhar Madhya Pradesh, will be implemented. Chief Minister Shri Chouhan said that the discussions being held today are of special importance so that the wheel of economy does not stop in the corona period, for this, solutions will come out through multidimensional brainstorming.

Inaugurating the discussion session of economy and employment in the webinar, Chouhan said that every person aspires for a happy life. Two things are very important for this. One how a person can remain happy, second that a person never dies. Chief Minister Chouhan said that the second thing is not possible, but for a happy life, food clothing, shelter and employment is required. The person wants happiness of mind, intellect and soul along with body.

The Chief Minister said that efforts should be made to lay a network of small and cottage industries in Madhya Pradesh. Successful efforts have

been made in the past to bring large industries also. Madhya Pradesh will work at a fast pace in the efforts being made by Prime Minister Modi for Atmanirbhar Madhya Pradesh. Chief Minister Shri Chouhan said that provision of loan guarantee and 15 percent subsidy was made for the youth setting up industries that under the Yuva Udyami Yojana launched during the last tenure. Efforts will be made to implement this scheme afresh. Prime Minister Modi has also raised concerns about the development of industries in the small, medium and micro industries sector. Efforts must be made to ensure maximum assistance to entrepreneurs setting up such industries so that they do not have to bother about the availability of capital and their work goes on smoothly. Arrangements for better industry operations were also made along with reforms in labour laws during the corona period in the State in the interest of labourers.

# P Raju elected president of Bhopal Tamil Sangam

STAFF REPORTER ■ BHOPAL

P Raju, the managing director of the western group, has been unanimously elected as the President of Bhopal Tamil Sangam here on Tuesday. Raju promised and pledged to work hard selflessly for the association and told that the Bhopal Tamil Sangam family has a very long way to go in the future.

The committee members will work and run the Bhopal Tamil Sangam towards social and cultural activity and take this association to the new heights.

V.Selvaraj – Vice President, A. Swamidurai – General Secretary, P. Annadurai – Joint Secretary, A. Sivakumar – Treasurer, K. Sudhakar Swamy – Joint Treasurer. Swamy Shivam, L. Shrinivasan, A. Ramesh Babu, M. Lavanya, R. Thirumalli, Vishalakshi were selected as the executive mem-

Members for the committee.

This association was formed to promote Tamil Culture, art and to support the Tamil people who all are living in Bhopal.

Bhopal Tamil Sangam is the Tamil association based in Bhopal which organizes various cultural programs and activities for the people of the

Tamil community. Not only this all the festivals and celebrations are conducted with the Tamil culture in the organizations. Many programs and get togethers are arranged for the people and that too for every age group. The basic aim is to promote awareness and Tamil culture to everyone especially younger generations.

# Online presentation of 68 probationary DSPs conducted from July 13 to Aug 10

STAFF REPORTER ■ BHOPAL

Presentation of 68 probationary Deputy Superintendents of Police of 39th and 40th sessions of the convocation ceremony was conducted through the webinar from July 13 to August 10 at Police Academy Bhoari.

Under the webinar it is an innovation in which along with the trainees, superintendents of police and senior officers of most of the districts of the State were also brought to a platform on online medium.

A total of four presentations were reviewed on the last day of

the presentation review of the trainees. In these reviews, DSP Ratlam, Sheela Surana, gave her presentation even after giving birth to a baby month ago and DSP Vidisha Anukreethi Sabanani, who battled the epidemic like Corona, discharged a day and presented her presentation.

Even after being in these adversity, he showed interest in training by his presentation which is quite commendable. After reviewing the Director General of Police Johri while addressing all the trainees said that the topics given to the trainees are so meaningful that

many branches of Police Headquarters have demanded them.

He has requested the training branch to compile these presentations subject wise and provide them to the concerned branch and directed the districts to make booklets of the problems of their district by these presentations so that they can come forward and officials could get help from this. The entire review of these presentations was conducted by Vineet Kapoor, Deputy Director of the institution. Special DG Training Aruna Mohan Rao and ADG Training Anuradha Shankar.

# 3-day online 'Lalit Parva' on folk music, Lord Krishna from today

STAFF REPORTER ■ BHOPAL

A three day presentation of 'Lalit Parva' focusing on regional folk music and lectures on Lord Krishna will be organised online.

Government of Madhya Pradesh, Department of Culture, Triveni Art Museum, Ujjain, is organizing a three-day 'Lalit Parva' focusing on regional folk music and lectures on Lord Krishna from August 12 to 14. It is to be noted that the three day event is being organised to observe Janmashtmi.

Due to Covid 19, social gatherings are prohibited across

the country. Hence, keeping this in view, the three day event if lectures and folk music will be held online. The entire event will be broadcasted on YouTube Channel of Department of Culture.

A lecture 'Life vision of Lord Krishna by Kalpana Dwivedi will be held on August 12. On August 13, 'lecture' based on human civilization and Lord Krishna by Bhagwat Sharan Shukla will be broadcasted. Varanasi and Lord Krishna's overall personality-based lecture will be held on August 14 by Kailash Chandra Pant, Bhopal. Along with this, a daily exhibition of 64 arts and

14 disciplines centered on Lord Krishna by Guru Sandipani will be put up for the art lovers of the State.

Besides, performances of traditional folk songs related to Lord Krishna sung in Malwa, Nimar, Bundelkhand, Baghelkhand and Chambal regions of the state will be held on YouTube Channel of Department of Culture.

Besides, it is to be noted that in view of the worldwide crisis of coronavirus, a creative initiative is taken by the Culture Department Madhya Pradesh Government by connecting the artists of the country and State.

# Children have immense potential, need to enhance it, says Guv

**While inaugurating 40 staff houses built for Raj Bhawan employees**

STAFF REPORTER ■ BHOPAL

Governor Anandiben Patel has said that children have unlimited potential. The need is to enhance their power and skills and give them opportunities. She said that arrangements will be made for computer education, library and creative activities for all the children of the Raj Bhawan family. Patel called upon the staff of Raj Bhawan to inculcate the habit of book reading among the children. Every child must read a book for an hour on Saturday and Sunday.

She said this after the inauguration of 40 staff houses built for the employees of Raj Bhawan at Sandipani Auditorium in Raj Bhawan. Minister of Public Works Department Shri Gopal Bhargava was also present on the occasion.

The Governor said that it is the responsibility of parents to develop good culture, values and ethics in children. She said that great personalities have built their lives by giving priority to education even in adverse circumstances in life. Education is necessary for nation building.

Patel further said that in order to make the society and nation the best, it is necessary for the people to think about the people belonging to lower level and make efforts for their welfare. She mentioned that the Raj Bhawan belongs to every-

one, that is the reason why Raj Bhawan has been opened for general public in Madhya Pradesh, Chhattisgarh and Uttar Pradesh. She told that two and a half lakh people had participated in 'Padhe Bhopal Abhiyan'. In this endeavor in Uttar Pradesh, more than one crore children have studied books so far.

Patel said that Raj Bhawan of Madhya Pradesh has presented a good example of comprehensive system. The remaining houses are also expected to be completed within the stipulated time frame. While congratulating all the employees, she instructed to write the name of housewives also on the name plates of the building. Patel said that the woman cleans the house. Other family members should take the responsibility of cleaning

the premises, plantation and their nurturing. She said that the Raj Bhawan is not only belongs to the Governor, but to them also. With the same spirit, shoulder the responsibility of water and environment conservation as well as sanitation. Good environment is the foundation of good health.

Minister for Public Works, Small and Cottage Industry Gopal Bhargava said that everyone lives their life for themselves in the world but those who help others by realizing their sufferings, they become great. After observing the dilapidated condition of the houses built in the years 1880 and 1905 and understanding the pain of those who served the Raj Bhawan, the construction of the houses is a reflection of the sensuous modesty of Governor Patel.

It is a matter of happiness that the houses have been inaugurated by the same person, who took the initiative for their construction. He said that the post of Governor is not just an ornamental; along with discharging constitutional responsibilities, Governor can also discharge executive responsibilities.

Patel has shown this by doing so. He assured the Governor that after the completion of the work of 40 houses of the first phase, the remaining work of the second and then third phase will be completed as soon as possible according to her instructions.

On the occasion of inauguration, expressing gratitude on behalf of the employees of Raj Bhawan, the house allottee Ashok Sharma said that of Governor is extremely sensitive

towards the employees of Raj Bhawan family as well as their families.

He told that for the first time in 30 years of his service period in Raj Bhawan, no other Governor has ever visited the houses of the employees. She understood their pain by looking at the dilapidated condition of the houses and fulfilled the wishes of the employees without complaining.

He thanked the Governor for making the arrangement of open gym, Panchatantra forest, Ayurvedic park as well as Ayurveda and Homeopathy treatment for the Raj Bhawan employees at Raj Bhawan.

After the inauguration, Governor Patel, Minister for Public Works Shri Gopal Bhargava and officers inspected house number 2/4 of Bundelkhand campus.

# STDC resumes operation of its hotels, restaurants

STAFF REPORTER ■ BHOPAL

The State Tourism Development Corporation has resumed operation of all its hotels and restaurants located in the State for food lovers. Managing Director of the Corporation, S Vishwanathan informed that all hotels and restaurants in Bhopal, Indore, Jabalpur, Gwalior, Khajuraho and Pachmarhi regions are being re-opened on the demand of tourists.

In the first phase of Unlock-1, the Corporation had opened 35 hotels and restaurants in the State. The Corporation has reopened Palash Residency, Wind and Waves and Picnic at Kerwa. Wind and Waves and Picnic @ Kerwa have been favorite destinations for tourists during the rainy season. At the same time, all hotels and restaurants of the Corporation including Hotel Kalchuri Residency in Jabalpur, Tansen Residency in Gwalior have been re-opened for tourists and food lovers.

Vishwanathan told that all hotels and restaurants are being operated in strict adherence to the guide line issued by the Union Ministry of Tourism and State Health Department and the standard operating

**All hotels and restaurants are being operated in strict adherence to the guide line issued by the Union Ministry of Tourism and State Health Department**

procedures issued for hotels and restaurants. The Tourism Development Corporation had stopped operations in these hotels and restaurants due to Covid-19.

It may be noted that the Food Home Delivery Service and Take Away Service launched through the MPT Fusion App run by the Tourism Development Corporation since May-June for food lovers remain unchanged.

The Corporation is offering safe home delivery service and take away facility of favourite dishes to food lovers from Rooftop Restaurant situated at Minto Hall in Bhopal, Tansen Residency of Gwalior and Kalchuri Residency of Jabalpur.

# Online programme 'Rang Ashok' concludes with theatrical narration

STAFF REPORTER ■ BHOPAL

The online event of theatre, poetry and music 'Rang Ashok' concludes with theatrical narration.

Rang Ashok 2020 was organized by Rangdoot, a theater organization in Sidhi district, on the second death anniversary of noted Ashwari Tiwari, a renowned artist of Vindhya region.

Around 25 artists from all over the country participated in this event. In the first 4 days, programs of theatre music, light music, folk music, story recitation, poetry recitation, theatre talk and memoir were performed by the artists.

The last day of Rang Ashok was all about theatrical narration. Prasanna Soni's famous drama Prem Politics was narrated by the actors. The play Prem Politics is designed to talk about today's world with the help of mythological background.

At the core of the play, the love story of Mahanad Son and Narmada River is mentioned. And as a symbol, Sonu and Reva's love story runs parallel.

The writer has woven a very dramatic warp linking the two stories in a beautiful and precise way.

In the drama, there are scenes of Son and Narmada in Devlok, while the story reaches the audience from the perspective of TV media in Prithvi Lok. The play also raises the subject of Honor Killing with seriousness, while at the same time also taking a sarcasm at the changing nature of the media.

The play describes a fine balance between love and violent love increasing day by day. A young boy fell in love and politics turns his feeling into violence. Politicians fear that if the youth will love, they will fill the world with love. Then this world will be worth living, and the politics of hate will not find a place to thrive. This drama touches many social aspects at once.

The actors read the drama online with great skill in keeping with the technicalities. Recording songs of the play were also played and pictures of play were presented adding zest in the narration.

Among the actors Roshan Awadhya, Anant Mishra, Shrotri Singh Parihar, Jagriti Gupta, Sunil Kumar Rawat and Prasanna Soni were the prominent ones. Dheeraj Soni played the moderator. In the end, Institution Director Bharti Sharma Soni thanked all the guests, colleagues and audience.

# Jewellery worth 70K stolen

STAFF REPORTER ■ BHOPAL

Gold and silver jewellery worth ₹70000 were burgled from Tribhuvan Vihar under Piplani police station area on Monday. Police said that the victim, Vinod Kumar, had gone to Bareilly on August 3 and when he returned on Monday, the valuables were found burgled.

A complaint was lodged with the police by the victim in which they left the house along with his

family to celebrate Rakshabandhan and when he returned the door of the house was open and on entering, the valuables were found burgled.

The victim claimed that gold and jewellery worth Rs 70,000 were burgled. Domestic help and security guards would be questioned in the further investigation. The victim runs a medical shop at Barkhedhi market. Meanwhile, electronic goods were burgled from Skills Development Office under

Govindpura police station area on Monday. According to the police, a complaint was lodged by Akshay Jain regarding burglary of goods from the office.

A complaint was made by the complainant with the Govindpura police and in the complaint it was claimed that the locks were broken and on entering the office valuables were found burgled. In the burglary the miscreants escaped with computer systems, CCTV, DVR and pen drive.

# Police nab man for smuggling sandalwood

STAFF REPORTER ■ BHOPAL

The Eintkhedi police nabbed a person involved in smuggling sandalwood near Acharpur trisection and recovered around 19 kg of Sandalwood and a motorbike worth Rs 68000 from their possession on Tuesday; two accused escaped from the spot and search has been started to nab the absconders.

Police nabbed the accused in the morning during vehicle checking when the accused were trying to cross the area in motorbike bearing registration MP04MH6127 and three miscreants. Police have started to

investigate accomplices and aides involved in the nexus. The police acted swiftly after receiving information of miscreants carrying Sandalwood and traced the persons and when they were checked, sandalwood was recovered from their possession. The arrested smuggler was identified as Feroz Khan (27) of Sehore. The absconding accused were identified as Nafees Beldar and Shakeel Beldar.

Later, the accused revealed that the sandalwood was stolen from Sironj from a farm. The two used a plastic bag to hide the pieces which were cut into small pieces. After the police stopped

the vehicle Nafees and Shakeel escaped the spot while Feroz was arrested by the police.

Arrested smugglers have revealed that Nafees Beldar and Shakeel Beldar were the two absconding accused. Based on the details of the nabbed smugglers, police started tracking the accused involved in disposing of the stolen sandalwood. Police teams would be sent to Sironj for further investigation.

The crime record of the accused would be investigated as in the preliminary investigation, their nexus with the sandalwood smugglers have been revealed.

# Indore IG orders to check illegal transport, liquor sale

PNS ■ INDORE

Indore range IG Vivek Sharma and DIG Indore Harinarayanchari Mishra has ordered all the police officers to check the illegal transport and sale of liquor in entire Indore district.

Indore west SP Mahesh Chandra Jain had formed different intelligence team to check this liquor smuggling. TI Depalpur Meena Karnawat received an information that a tractor attached water tanker coming from Sadalpur Dhar district and entering into Depalpur tehsil of Indore district is carrying liquor instead of water.

Immediately a police team deployed at main road village Khajraya near petrol pump noticed two people on two different bike escorting a without number plate ford tractor attached water tanker.

When the police team stopped the bikers, they left the bike and fled away and when

the police asked the tractor driver about the tanker, he told it is water in the tanker.

Police on checking the tanker found around 80 boxes of country made liquor value worth ₹314300. Police arrested the driver of the tractor Ramchandra who is a registered criminal of police station Sadalpur of Dhar district involved in 11 crimes includ-

ing rape, dacoity, extortion, illegal weapons and liquor smuggling.

The other two accused who escaped from site are Rahul Parmar and Harshwardhan Mishra of Sadalpur Dhar. The total property confiscated by police is worth value ₹879300 including the cost of tractor tanker and two bikes.

# Rahat Indori demise end of an era: Playwright Nazir

STAFF REPORTER ■ BHOPAL

The death of Rahat Indori, is an end of an era, expressed renowned playwright Nazir Qureshi.

Rahat Indori was an inspiration for every poet lover across the globe. His political satirical poems were loved and appreciated by the poem lovers. Rahat Indori died on Tuesday due to cardiac arrest.

Rahat Indori was an Indian Bollywood lyricist and Urdu language poet. He was also a former professor of Urdu language and a painter. Prior to this he was a pedagogist of Urdu literature at Devi Ahilya University, Indore.

After the news all the writers, poets and Indori's fans are shattered. The Facebook stories, Instagram Feeds and Whatsapp status were filled with remembrance of Rahat Indori.

While talking with The Pioneer, known playwright Nazir Qureshi said, "The way

Rahat Indori used to present his poetries filled with satire and intense reality was phenomenon. His love for his country was always visible in his writing. The youngsters have a lesson from Rahat Indori's life. They should learn that creativity and originality, talent and pure passion can lead you to success."

Meanwhile, Nusrat Mehdi Director Rajya Anand Santhan, expressed her grief through Facebook handle, while quoting one of his famous poems 'Bas Ki Ab Taab Nahin'. She wrote, "Rahat sahab always intimated about death through his poems. Even during his last days he taught everyone the way to live life and the way to say goodbye to the

## HIS POLITICAL SATIRICAL POEMS WERE LOVED AND APPRECIATED BY THE POEM LOVERS

world. He will always be remembered."

The former Secretary of Madhya Pradesh Urdu Academy, while talking about him said, "I have many memories with Rahat Indori Sahab. I remember him as a very doer to earth personality. Even after being a popular poet, he displayed the essence of culture and values everytime I met him. He was a poet of an era."

Another writer, Rafi Shabbir said, "I met him only once. But, I would say Rahat Indori was one of his own kinds of poet. He was a writer and was always a star in Poet's Meets'.

# Police nab 3 fraudsters for selling land with forged documents

STAFF REPORTER ■ BHOPAL

Awadhपुरी police nabbed three fraudsters for fraudulently selling a piece of land (plot), using forged document and duped ₹29.85 lakh; land was sold using forged documents of real owner. Police said that the victim Pramod Priyadarshani lodged a complaint against three accused who fraudulently sold him plot.

The victim met Mahendra Pal Singh who introduced himself as property dealer. The accused offered him plot near Rajara Farms in Khajuri Kalan. Accused told the accused that the plot is owned by Vinod Chug but he has power of attorney regarding the plot and the deal was stuck at Rs 12.85 lakh which the victim provided to the accused.

Later the victim found that the same plot was sold to Prabhakar Singh at Rs 17 lakh. The police registered a case

under sections 419, 420, 467, 468 and 471 of the IPC and nabbed Vinod Chug.

During the investigation Vinod failed to provide any detail regarding the deal and was annoyed over providing any documents to Mahendra Pal Singh as he was not aware of Mahendra.

It was found that some impostor met the victim posing as Vinod. Police searched for the accused based on the details and nabbed Mahendra, Imran Baig who met victim as Vinod Chug and Purushottam Sharma who helped in preparing forged documents by signing the documents. Based on the information three accused were nabbed by Awadhपुरी police.

# Over 1000 cases, 32 fatalities in Punjab

PNS ■ CHANDIGARH

Punjab on Tuesday reported a record 32 fatalities due to COVID-19, pushing the death toll to 636, while 1,002 fresh cases took the state's infection tally to 25,889. Among the fresh cases, 41 jail inmates and a dozen cops have been tested positive for the virus in the past 24 hours.

As many as 11 fatalities were reported in Ludhiana, followed by four in Sangrur, three each in Amritsar, Patiala, Jalandhar and Mohali, and one each in Gurdaspur, Bathinda, Kapurthala, Muktsar and Tarn Taran.

Ludhiana district continued to reported highest number of fresh cases at 252, fol-

lowed by 118 each in Patiala and Amritsar, 83 in Mohali, 77 in Hoshiarpur, 64 in Pathankot, 54 in Jalandhar, 38 in Bathinda, 36 in Kapurthala, 34 in Mansa, 20 in Ferozepur, 16 each in Nawanshahr and Moga, 15

each in Faridkot and Sangrur, 13 in Gurdaspur, nine in Fatehgarh Sahib and Barnala, five in Muktsar, four in Ropar, and three each in Tarn Taran and Fazilka.

As many as 41 jail inmates

— including 23 from Ludhiana and 18 from Bathinda, besides 12 police personnel — including seven from Ludhiana, two from Kapurthala, and one each from Pathankot, Bathinda, and Nawanshahr—have been test-

ed positive. Six healthcare workers from Ludhiana and a prisoner from Moga, are also among fresh cases reported on Tuesday.

No less than 18 cases — seven from Pathankot, three from Ludhiana, two each from Fatehgarh Sahib, Moga, and Pathankot, and one each from Mohali and Nawanshahr — have travel history to other state or countries.

A total of 1,055 coronavirus patients were discharged on Tuesday after recovering from the infection, taking the total recoveries to 16,790. The state still has 8,463 active COVID-19 cases in the state, of which 21 patients are critical and on the ventilator, while 139 are on oxygen support.

Security personnel pay tributes to the freedom fighter Anirudh Shastri during his last rites performed with full State honour in Bhopal on Tuesday

# No large gatherings during I-DAY celebrations in Haryana

PNS ■ CHANDIGARH

In the wake of the Covid-19 outbreak, Haryana government on Tuesday said large gatherings would not be allowed and advised against the participation of children below 10 years in the Independence day functions across the state, according to an official.

An official spokesperson said other preventive measures such as social distancing, wearing of masks and proper sanitisation will be followed. "It is imperative to follow certain preventive measures like avoiding large congregations during the Independence day celebrations," he said, adding that there will not be any PT show and people below 10 years of age should not participate in various activities and the march past.

The spokesperson said a

state-level flag hoisting programme will be held at the Haryana Raj Bhawan in Chandigarh. Governor Satyadeo Narain Arya will unfurl the national flag. However, in view of the COVID-19 pandemic, the "At Home" programme at the Raj Bhawan has been cancelled this time. Chief Minister Manohar Lal Khattar will hoist the national flag at Panchkula; Deputy Chief Minister Dushyant Chautala at Gurgaon while Vidhan Sabha Speaker Gian Chand Gupta will hoist the Tricolour at Ambala.

COVID-19 warriors like doctors, health and sanitation workers are also likely to be invited to the ceremonies as recognition of their service in the fight against COVID-19. Some persons cured from COVID-19 may also be invited, the spokesperson said.

# Punjab to hit Covid-19 peak in Sept, says CM Amarinder

## Demands fiscal package from Centre

PNS ■ CHANDIGARH

Underlining that Punjab is likely to hit peak in September, the Chief Minister Capt Amarinder Singh on Tuesday demanded liberal fiscal package from the Centre, flexibility in terms for State Disaster Relief Fund (SDRF) COVID-19 related expenses, and increased testing capacities in the Central Government labs, besides seeking a review of UGC's decision on mandatory exams for exit classes.

Capt Amarinder, during virtual meeting of the Prime Minister Narendra Modi with Chief Ministers of some states

to review the COVID situation, sought a liberal financial package for states to fill the collection gap caused by the pandemic while pointing at surge in COVID-19 cases and 50 per cent revenue decline for the first quarter of the current fiscal in Punjab.

He said that the current cap of 35 percent in State Disaster Relief Fund (SDRF) for COVID related expenditure, as per MHA guidelines, is not sufficient to meet the current requirements.

Citing the state's rising cases of COVID, the Chief Minister urged the Prime Minister to review the UGC decision on mandatory exams for exit classes to be held by September 30. "Punjab may not be in a position to conduct exams in September as it may be facing its peak at that time," he said, suggesting promoting these students promoted on

past performance and internal assessment, with option to take exams later for those wanting to improve their performance.

He also sought Central Government's assistance for online school education, especially for poor children of classes X and XII. More money was needed for creating the infrastructure needed to support online education, he added.

Though Punjab was conducting 23,000 tests per million for COVID (higher than the national average), and planned to increase RT-PCR tests from 12,000 to 20,000 in the next 15 days, it needed to scale up the testing capacity further, the Chief Minister stressed while requesting the Prime Minister to direct the Central Government institutions in Chandigarh and Punjab to increase testing capacity, as already written to him earlier.

Expressing concern over the state's mortality rate of 2.4 percent, Capt Amarinder said that though it was lower than the all India deaths per million and 91 percent of the fatality cases were with co-morbidity, it was still higher than neighbouring Haryana. Patients were coming to hospitals late and 86 percent deaths were occurring in tertiary hospitals, he added.

Capt Amarinder also requested immediate operationalisation of COVID testing

and treatment at AIIMS Bathinda, where OPDs are already functional, saying, "this will be useful for the people of southern Punjab".

Noting that PGIMER Chandigarh is a premier tertiary care facility for Punjab, he also sought increase in hospital's bed capacity and strengthening of the existing PGI Satellite Centre at Sangrur, especially for COVID treatment.

The Chief Minister further urged the Centre for immediate commencement of work on the newly sanctioned PGI Satellite Centre at Ferozepur.

"While of the three already sanctioned need medical colleges, Mohali Medical College will start classes this year, more such institutions were needed," said the Chief Minister, requesting for new colleges in the aspirational districts of Gurdaspur, Sangrur or

Malerkotla, as well as Moga. COVID has shown that we need to strengthen public facilities in health, he added.

Giving an update on the state's COVID situation, Capt Amarinder said that it had seen cases go up from 500 to 1000 in two weeks, with positivity rate of the last five days at 8.73 percent. "The majority of cases are coming from Ludhiana, Jalandhar, and Patiala cities, though cases are increasing in all districts," he added.

The number of micro-containment zones was being increased in high incidence districts like Ludhiana, Patiala and Jalandhar, he said.

To augment its fight against COVID, the state has opened two Plasma Banks (in Patiala and Amritsar), with another set to open soon at GMC Faridkot, the Chief Minister informed the meeting.

# 411 fresh cases of Covid reported in Uttrakhand

PNS ■ DEHRADUN

The number of novel Coronavirus (Covid-19) patients in Uttarakhand scaled to 10432 on Tuesday with the state health department reporting 411 fresh cases of the disease. Deaths of two patients were also reported on the day which increased the death toll to 136 in the state. The authorities discharged 169 patients from different hospitals after their recovery on Tuesday. The state now has a total of 6470 recovered patients which puts the recovery percentage at 62.02 percent. The doubling rate of the disease in Uttarakhand is at 23.82 days.

A 75 year old male expired at All India Institute of Medical Sciences (AIIMS) Rishikesh while a 33 year old male was reported dead at Sushila Tiwari Government Hospital Haldwani on the day.

The authorities reported 143 patients in Haridwar, 82 in Dehradun, 49 in Nainital, 39 in Tehri, 36 in Almora, 32 in Udham Singh Nagar, 10 in Uttarkashi, nine in Pauri, eight in Champawat and three in Rudrapur district on the

day. The administration discharged 53 patients in Haridwar, 26 in Nainital, 24 in Dehradun, 23 in Pithoragarh, 14 each in Bageshwar and Udham Singh Nagar, four each in Almora and Chamoli, three in Champawat and Uttarkashi districts.

The state now has 3787 active patients of the disease with Haridwar removing Udham Singh Nagar from the top position in the table of active cases with 1104 cases. Udham Singh Nagar is now at second place with 1054 active cases of the disease. Nainital is in third position with 595 active cases while Dehradun is in fourth position

with 411 active patients of Covid 19. Uttarkashi has 146, Tehri 114, Pithoragarh 89, Pauri 70, Almora 66, Champawat 65, Rudrapur 28 active cases of Covid-19. Bageshwar district with 18 active patients is at the bottom of the table.

The administration has set up 479 containment zones to prevent the spread of the disease. In Haridwar district alone 399 containment zones have been set up. Udham Singh Nagar district has 37, Nainital 27, Dehradun seven, Champawat four, Tehri and Uttarkashi two each and Bageshwar one containment zones.

# Covid-19 deaths cross 100 mark in Chhattisgarh

STAFF REPORTER ■ RAIPUR

The death toll in the Covid-19 pandemic in Chhattisgarh crossed the century mark on Tuesday as five patients died in different districts. The total now stands at 104.

Also, 313 fresh cases were detected and 222 patients were discharged from hospitals following their recovery on Tuesday, officials said.

A 52-year-old man from Nandi Chowk in Rajnandgaon was admitted in Dr BR Ambedkar Memorial hospital Raipur on August 9 with breathlessness and pneumonitis in both lungs. He suffered cardiopulmonary arrest on August 9 and died. He was later found Covid positive, the officials said.

A 59-year-old man from Sikola Basti in Durg had fever for the past one week and later had breathing trouble. He was brought to Ambedkar Hospital where he died on Monday night. The man was Covid positive.

# Eminent poet Rahat Indori passes... Corona...

From Page 1

Known for his unique delivery of Urdu poetry, Indori was also a maverick who used to wear his heart on his sleeves and never hesitated in expressing his views on socio-political situations in the country.

Born on Jan 1, 1950; the veteran poet 'Rahta Qureshi, the poet had studied Urdu at Barkatullah University Bhopal. Locals claimed that his family wasn't well off in his early childhood so he had to take up a job as sign painter when he was ten.

After completing his studies, Indori joined Islamia Karimia College as an Urdu teacher in Indore and due to his love for poetry started engaging in Mushairas from across the country in no time.

He recited his first Sher when he was 19 and also played football and hockey in school time. He did his schooling from Nutan School in Indore.

# From Page 1

He was engaged in Mushairas and kavi sammelans for well over four decades. He also penned songs for various superhit Hindi films including—Munnabhai MBBS, Mission Kashmir, Ishq, Ghatak among others.

He had penned seven books. To add, Indori was a big supporter of Hindu-Muslim unity and spoke candidly whenever communal tensions rippled the country.

Condolence s started pouring in from all quarters no sooner than news of his demise broke on social media and on news channels.

"Raah ke patthar se badhkar kuchh nahin hain manzilen, Raste awaaz dete hain safar jari rakho,

Ek hi nadi ke hain ye do kinare doston, Dostana zindagi se maut se yaari rakho.

Chief Minister Shivraj Singh Chouhan condoled the demise of the veteran poet by these lines and saying, "Rahat ji aap hamen is tarah chhor kar jayenge, socha na tha, aap jis duniya me bhi hon, mahfooz rahem safar jari rakhen."

For Urdu poetry he was conferred with various awards and citation in India and

# From Page 1

Chouhan has said that arrangement of treatment for patients with minor symptoms should be made at home, subject to availability of facility at home. Moreover, arrangement of regular monitoring of these patients should be done at home.

Minister for Home Narottam Mishra has informed that a complaint has been received in the Datia Medical College concerning not visiting of wards by the dean and civil surgeon from the last few days. Chouhan instructed to take immediate action in this matter.

The Chief Minister instructed that corona related health checkups should be conducted compulsorily in all jails of the state. The Home Minister informed that 30 patients of corona have been found in Gwalior jail. The Chief Minister Shri Chouhan instructed to make separate wards and arrangements for treatment in the jails.

It was informed during the review that highest 176 new patients of corona in the state have been found in Indore. New 100 patients in Bhopal, 89 in Gwalior, 54 in Jabalpur and 28 in Vidisha have been found. The Chief Minister Chouhan instructed to pay special attention to these districts.

Aggressive testing needed to contain Covid: Modi

PM interacts with CMs of 10 States

PNS ■ NEW DELHI

Prime Minister Narendra Modi on Tuesday pointed out that 10 States account for 80 per cent of the total Covid-19 cases and asked for aggressive testing and exchange of best practices to contain the pandemic.

ing that if we can identify and trace the infection in the first 72 hours, the disease treatment is easier," he said.

Citing the "Delhi model" to contain the pandemic, Modi said: "The template for this is the same for all, to separate containment zones, 100% screening, isolation, tracing and treatment."

Prime Minister said the number of testing has reached seven lakhs per day and is also increasing continuously.

He said if we try more in focussed way then we can achieve the target to bring down Case Fatality Rate to less than one percent.

"The average fatality rate is much lower than in the rest of the world. It is a matter of satisfaction. It is constantly decreasing. The percentage of active cases has decreased and the recovery rate has increased. So this means that our efforts are proving effective", Prime Minister said.

Modi said there was a phase when Covid19 had become a huge problem in some districts of Uttar Pradesh, Haryana and Delhi but "we held a review meeting and a committee was formed under the chairmanship of Union home minister Amit Shah and to a great extent, we achieved

desired results", Prime Minister said.

This is the seventh video conference of the Prime Minister with the states Chief Ministers since the outbreak of the pandemic and also the first meeting of Modi with chief ministers during Unlock 3.0 on the coronavirus pandemic.

Since March, Modi had interacted with the Chief Ministers and reviewed the coronavirus pandemic in India. During his interactions, he had called for strict adherence to Centre's guidelines and the social distancing norms to check the spread of Coronavirus.

India, the third country worst hit by the COVID-19 pandemic recorded a spike of 53,601 coronavirus cases on Tuesday, pushing the total tally to 22,68,675. The country tested a record over 871 deaths in a single day.

The number of recoveries mounted to almost 16 lakh, more than twice the active cases. Out of the total cases, over 6,39,929 are active cases while 15,83,489 have recovered from the disease and 45,456 people have lost their lives in the fight against the virus which has no proven cure or a vaccine yet.

Armed forces ready for deployment even during winter months in Ladakh, PAC told

PNS ■ NEW DELHI

As the stalemate continues at the Line of Actual Control (LAC) with China reluctant to pull back its troops, the Indian armed forces are ready for a long haul. Presenting this assessment to a parliamentary panel, the military also said the process of disengagement and de-escalation is likely to take more time.

Led by Chief of Defence Staff (CDS) General Bipin Rawat, the armed forces also informed the Public Accounts Committee (PAC) that the Services are geared for deployment even during the winter months in Ladakh in the present situation. This is significant as temperature drops to minus 20 degrees in the region and winter sets in by September end.

The parliamentary panel was apprised of the ground situation at the moment at the volatile border in Eastern Ladakh and informed that the process of disengagement and de-escalation may take longer, sources said here on Tuesday.

This comes in the backdrop of no substantial reduction of troops and withdrawal by the Chinese even after six rounds of military level talks besides scores of parleys at the diplomatic level.

Apprising the lawmakers of the current position, the military top brass, however, assured them that the armed forces are ready to face any challenge and are operationally ready. Moreover, adequate logistical arrangements are underway to enable the soldiers to perform their duties during the harsh winter months, the panel was informed.

As regards the time-consuming disengagement and de-escalation process, sources said it was a complex issue and

both the sides were dealing it with utmost caution. Also, India all along maintained that China has to restore status quo ante. It means the Chinese forces will have to go back to their positions as existing in April end.

The stand-offs started with the Chinese intruding into the Pangong Tso(lake) area on May 5 and obstructing an Indian army patrol. It led to a scuffle between soldiers of the two armies. At present, the "friction points" include Galwan valley, Hot Springs and Gogra besides Pangong Tso.

While the Chinese have withdrawn in considerable numbers from Gsalwan, Hot Springs and Gogra, they are not ready to retreat from the Pangong Tso. In fact, some more rounds of talks are likely in the coming days at the military and diplomatic levels to sort out this contentious issue, sources said.

Not willing to take any chances in the present scenarios, the Indian army has also ramped its troop strength besides bringing forward heavy guns and tanks. This move was undertaken after the Chinese buildup at all the "friction points" and the Depsang Valley. It has amassed more than 15,000 soldiers on its side of the LAC in the Depsang region leading to Major Generals of the two armies holding talks to defuse tension there last week.

On strengthening troop levels during winter months in Ladakh, sources said more than 20,000 troops are now ready to be deployed at a short notice in any operational areas on the LAC.

The troops are acclimatized for high altitude stints as most of the personnel have already served in the Siachen glacier and other tough terrain in the mountains.

Expert committee to identify effective Covid vaccine in fight against virus

PNS ■ NEW DELHI

The expert committee on vaccine administration, chaired by NITI Aayog's Dr VK Paul, will meet on Wednesday to consider "selection, logistics and ethical aspects" of procurement and administration of vaccines against the coronavirus disease that has claimed over 45,000 lives and infected over 22.70 lakhs people in the country.

"The panel will decide to identify the COVID-19 vaccine that are effective in fight against the virus. The committee will also chalk out a plan how the vaccines should be procured. Finally, the panel will prepare a strategy on inventory management, distribution, and administration," Union Health Secretary Rajesh Bhushan said at a press briefing here on Tuesday.

The high-level panel includes AIIMS director Dr Randeep Guleria, representatives of the ministries of external affairs, biotechnology, information technology, the Director General of Health

services, India's Aids Research Institute, the Indian Council of Medical Research, and also representatives from states.

The panel's terms of reference constitute all matters related to logistics of vaccines and ways to address issues of equity etc, said the official when asked if the Government plans to tie-up with Russia which has recently announced manufacture of a vaccine to curb the Covid-19.

The committee members will decide which vaccine or vaccines will be effective for Indian citizens. The task force will also chalk out a budget and discuss how capital can be raised for procurement, distribution of the vaccine. Moreover, the high-level panel will prepare a strategy on inventory management and administration.

According to the Indian Council of Medical Research (ICMR) scientist Balram

Bhargava, India has three vaccine candidates in different phases of the clinical study.

The first is inactivated virus vaccine which is being developed by Bharat Biotech in collaboration with the ICMR. The vaccine has completed its Phase-1 study on one site and has started Phase-2 clinical trial.

The second is the DNA vaccine being developed by Zydus Cadila. This vaccine has also begun its Phase-2 trial at 11 sites.

The third is the Oxford University-AstraZeneca vaccine that will be manufactured by the Serum Institute of India (SII). The Drug Controller General of India (DCGI) has given approval to SII to conduct Phase 2 and 3 clinical studies in the 17 sites in the country.

Once the vaccines are ready, the Government will work on priority and fair distribution of vaccine, to look out logistic and roll out in a cold chain, stockpiling, and training people who are being given this vaccine.

USA meets Lord Rama at Huston, via Kerala's Ramayana Month

KUMAR CHELLAPPAN ■ KOCHI

People in Huston, US, may not have heard of Kerala's Karkkadaka month (the Malayalam equivalent of Sraavan) but thanks to Ramayana, people in the far away continent are getting to know more about Indian heritage and Kerala.

While Hindu households observe Karkkadaka as Ramayana month in Kerala, Hindus who went to far away places in search of livelihood and education took with them a

portion of Karkkadaka. The net result? A Lord Krishna Temple at Huston, more famous as Sri Guruvayurappan Temple and recitation of Ramayana throughout Karkkadaka. Yes, more than a hundred households join the Ramayana recitation every evening at this temple for the entire month and they make the neighborhood reverberate with the lyrics known for its devotion, dedication and Bhakti towards the Maryada Purushotham. For nearly a decade Dr Rekha Nair, a paramedic scientist, has been

reciting Ramayana at this Huston Temple with silent prayers for people in Kerala as well as the rest of the world.

"The numbers have increased manifold over the years. This year due to Covid-19 norms, we use the social media to propagate the message of Lord Rama. Every evening one person comes to the temple and recite Ramayana which is aired through the social media page of the temple. Others join the session from their homes," said Dr Nair.

Desi def industry gets ₹8,722.38-cr booster

PNS ■ NEW DELHI

Giving details, defence ministry officials later said with the HAL having successfully developed Basic Trainer Aircraft (HTT-40) Prototypes and certification process underway, the DAC approved procurement of 106 Basic Trainer Aircraft from the HAL. It will address the basic training requirements of the IAF. Post certification 70 Basic Trainer Aircraft will be initially procured from the HAL and bal-

ance 36 after operationalisation of HTT-40 fleet in the IAF. The DAC is the apex body to approve acquisition plans of the armed forces.

To improve the fire power of Navy, the DAC approved procurement of an upgraded version of Super Rapid Gun Mount (SRGM), which is fitted as the main gun onboard Navy and Indian Coast Guard (ICG) warships, from Bharat Heavy Electricals Limited (BHEL). The upgraded version of SRGM has enhanced capability to perform against fast manoeuvring targets like missiles and Fast Attack Crafts. The guns have considerable engagement range.

In view of the availability of requisite capability for indigenous development, both in terms of 'Manufacturing' and 'Technology', the DAC approved procurement of 125 mm APFSDS (Armour Piercing Fin Stabilised Discarding Sabot) ammunition for the Army as a 'Design and Development Case'. The ammunition being procured will have a 70 per cent indigenous content. The DAC also gave approvals that are likely to speed up the procurement of AK-203 assault rifles and Unmanned Aerial Vehicle(UAV) upgrades.

EC explores 'blockchain technology' for remote voting

PNS ■ NEW DELHI

The Election Commission (EC) has explored the potential of using blockchain technology to enable remote voting. Speaking at a webinar organised by the EC and the Tamil Nadu e-Governance Agency (TNeGA), Election Commissioner Sushil Chandra emphasised that in designing a technology based solution, the primary consideration should be the ability to "inspire trust of all stakeholders, assure integrity of electoral process and secrecy and inviolability of ballot."

Blockchain is a system in which the database of recordings (a 'chain') appears on multiple computers at the same time even as it is updated with any new digital information (a block).

This distributed collection of the information has led some to claim that this system can overcome issues of over-centralisation.

Chandra expressed his concerns over geographical hurdles in voting.

Top educationist in TN questions logic behind opposition to Hindi

KUMAR CHELLAPPAN ■ KOCHI

Tamil Nadu's top educationist has come out in the open questioning the logic behind the State Government's decision not to allow the three-language policy prescribed in the New National Education Policy of the Union Government.

Prof E Balagurusamy, former vice-chancellor, Anna University and former member of the Union Public Service Commission, in a hard hitting letter to Chief Minister Edappadi Palanisami has expressed his anguish and disapproval over the State Government's stance that the three-language formula was "saddening and painful". The educationist, held in high esteem all over India described himself as a victim of the two-language formula implemented by the five-decade long Dravidian rule in Tamil Nadu.

Immediately after the announcement of the National Education Policy, Palanisami had said that his government would not allow in Tamil Nadu the three-

language formula envisaged in the policy.

"Ours is the only State in the country that has been denying its students an opportunity to learn any other Indian languages other than Tamil for more than five decades now. I am one of those who were badly affected by the two-language formula," Balagurusamy said in a letter to the Chief Minister, copies of which were

released to the media.

He said the decisions of the governments led by the Dravidian parties ruling the State since 1967 have deprived the poor and rural students studying in government schools of learning any additional language while the rich and urban joining the CBSE, central and private schools have the freedom to study any language they wish.

SEARCH FOR MISSING/KIDNAPPED

General Public is hereby informed that one boy **Namely: Rahul, S/o: Late Om Parkash, R/o: H.No. 183, D-5, Kunwar Singh Nagar, Nangloi, Delhi, Age: 16 Years, Height: 5', Complexion: Fair, Face: Long, Wearing: Red Colour Shirt-Blue Jeans Pant and Red Slipper in feet** has been missing/kidnapped since 26.06.2020 from the area of P.S. Nihal Vihar, Delhi. In this regard FIR No. 727/20, U/s 363 IPC, Dated 07.07.2020 has been lodged at P.S. Nihal Vihar, Delhi.

Sincere efforts have been made by local police to trace out the missing/kidnapped boy but no clue has come to light so far. If anyone have any information about this missing/kidnapped boy please inform the undersigned.

Guidelines for covid-survivors soon

PNS ■ NEW DELHI

Amid reports that Covid-19 survivors are facing health issues post recovery, the Union Health Ministry is preparing guidelines to help such patients manage any long-term complications.

"A group of experts in the Ministry is presently seized with this issue and working on a guidance note for recovered people and possible complications that may afflict them," said Rajesh Bhushan, Secretary, Health Ministry on reports of lung ailments in some of the patients who have recovered from COVID-19.

The ministry's technical wing, or Joint Monitoring Group (JMG) which is looking into the matter, includes several domain experts. Dr Rajiv Garg, the director-general health services, chairs the group. The group includes experts from AIIMS, Delhi, representatives from the ICMR and World Health Organisation's India office. "This group provides an expert

opinion on various topics from time to time... it has been responsible for providing technical inputs to draft guidelines on issues related to testing, isolation of patients, home isolation dos and don'ts, clinical management of Covid-19 cases in and outside hospitals..."

There have been global studies too wherein researchers have found that the infection free patients faced one or many health issues like fatigue, breathlessness, psychological distress - including problems with concentration and memory - and a general decline in quality of life.

For instance, a research team - involving multidisciplinary specialists from the University of Leeds, Leeds Teaching Hospitals NHS Trust, Leeds Community Healthcare NHS Trust and Leeds Beckett University - had followed 100 people recovering from Covid-19, four-to-eight weeks after being discharged from hospital in Leeds and found such health issues among the survivors. The findings - Post-discharge

symptoms and rehabilitation needs in survivors of COVID-19 infection: a cross-sectional evaluation - have been published in the Journal of Medical Virology.

The researchers identified a pattern of longer-term symptoms likely to be experienced by people who were hospitalised with the Covid-19 infection.

Some patients, particularly those who had been in intensive care, had symptoms associated with cases of PTSD (post-traumatic stress disorder). PTSD symptoms are a well-recognised component of post-intensive care unit syndrome caused by a variety of factors including fear of dying, invasive treatment, pain, delirium, inability to communicate, weakness, immobility, and sensory problems and sleep deprivation.

Meanwhile, the Union Health Ministry said that for the first time in the country, the COVID-19 fatality rate has fallen below 2 per cent and is currently at 1.99 per cent.

GOVERNMENT OF JAMMU & KASHMIR OFFICE OF THE EXECUTIVE ENGINEER PWD (R&B) DIVISION RAMBAN (Short Term) NOTICE INVITING TENDERS Fresh e-NIT No 17 of 2020-21 dated 10-08-2020 to e-NIT No 14 of 2020-21 dated 17-07-2020 (E-tendering). # Mamata again demands State dues from Modi

SAUGAR SENGUPTA ■ KOLKATA

Bengal Chief Minister Mamata Banerjee has once again asked the Central Government to clear the State's dues that had gone beyond ₹50,000 crore.

Raising the issue during the Chief Ministers' meeting with Prime Minister Narendra Modi Banerjee on Tuesday said that the Centre owed ₹52,000 crore to Bengal in terms of funds that were to be sent to the State on various accounts. The stated amount is exclusive of ₹4,153 crore that the State will get from the Centre towards the settle-

ment of GST, she added.

Bengal is "yet to receive ₹4135 crore towards GST compensation and overall outstanding dues of ₹53,000 crore from the Central Government," Banerjee said requesting in addition for more high flow nasal canulas and ventilators.

Reminding the Prime Minister that the "Centre has raised the FRBM limit from three per cent to five per cent but only 0.5 per cent out of the increased 2 per cent has been made unconditional," she requested the Centre to "make the remaining 1.5 per cent

unconditional too for one year."

Ruing the fact that the Centre had sent paltry amounts towards fighting the pandemic she said the Bengal Government had spent more than ₹2,500 crore whereas it had received from the Centre only ₹125 crore. Besides, Banerjee also raised the issue of corona vaccine asking the Centre to "immediately" issue guidelines.

"Regarding the vaccine, the central government should authorise which vaccine is to be procured and used. It must issue guidelines in this regard," sources quoting her said.

## Priyanka slams UP Govt on girl's death during chase

PRADEEP SAXENA ■ ALIGARH

**Lucknow:** Congress General Secretary Priyanka Gandhi Vadra has slammed the Yogi Adityanath government over the Bulandshahr accident in which a US student was killed.

The accident, which took place on Monday, was apparently caused when motorcycle-borne men chased the girl who was on a scooty with her uncle.

In a tweet, Priyanka said, "There is no fear of the law in UP and women are getting increasingly insecure. It appears that the state government does not take incidents of eve teasing seriously." IANS

## Teenager raped by neighbour in UP

PRADEEP SAXENA ■ ALIGARH

In a colony of Bannadevi area of the city, youth raped a teenager who went to a neighbour's house to take onions on Monday evening. The mob gathered at the screaming of the teenager and grabbed the accused and beat him fiercely. When the matter reached the BJP leaders, the fight broke out. All the leaders including the former mayor reached the police station in support of the teenager. Up late in the night, the police station created a ruckus for action. Police has also taken the accused into custody. Action is being taken by investigating the case on the basis of complaint.

Late in the evening, the victim went to her friend's residence in the neighborhood to ask for onions where her friend's maternal uncle was already present. He dragged her into the room and raped her. The local people gathered as the teenager screamed. They saw the teenager lying in blood. People took her to the hospital. At the same time, grabbed the accused from spot and beat him.

## Bonded labours still exist in UP

PRADEEP SAXENA ■ ALIGARH

Despite the Supreme Court's order to ban bonded labour, a large number of such labourers are working in different brick kilns of Aligarh and Hathras district.

Although the labour department of Uttar Pradesh has rescued 670 bonded labourers, including 20 from Aligarh and 21 from Bulandshahr, from clutches of brick kiln owners till now. Sources said most of rge kiln labourers belong to Atrauli tehsil. More than 30,000 labourers are hired to work at kilns situated in UP, Haryana, Punjab and Delhi. Some organised gangs are involved in arranging bonded labourers.

They lay advance money to the labourers and send them to different district. The agents charge a high commission from kiln owners for these labours.

Nearly 1,200 bonded labours have been rescued from different places. Of the 1,200, more than 220 belongs to Atrauli region in Aligarh district.

## 1,417 fresh cases in Kerala

KUMAR CHELLAPPAN ■ KOCHI

Kerala Police have started preparing a data bank of persons who do not wear face masks while they come out of their houses.

"Though the police officers would only warn the law breakers for the first time, the violators would be fined ₹2,000/- when they are caught the second time without masks," Pinarayi Vijayan, Chief Minister of Kerala, told reporters in his daily press briefing on Tuesday.

Vijayan said that 1,417 new persons were tested positive for Covid-19 on Tuesday while 1,426 patients were cured of the pandemic.

## Vaishno Devi Yatra to begin from August 16

MOHIT KANDHARI ■ JAMMU

The Jammu & Kashmir Government on Tuesday set a ceiling of permitting a maximum number of 5,000 pilgrims per day to visit Mata Vaishno Devi Shrine nestled in Trikuta hills from August 16.

The yatra was suspended to the cave shrine on March 18 ahead of the imposition of nationwide lockdown.

The Government had earlier decided to throw open the gates of all other major shrines and religious places like Charare-Sharif, Hazratbal, Nangali Sahib, Shahdara Sharief, Shiv Khori where devotees visit from

all parts of the union territory and the country from August 16.

According to the fresh guidelines issued by the administration, "a maximum number of 500 pilgrims per day will be permitted within this ceiling in a graded manner from outside Jammu and Kashmir."

Pilgrims coming from outside Jammu & Kashmir will undergo 100 percent antigen testing along with those visiting the shrine from red districts of Jammu & Kashmir. A detailed set of guidelines for worshippers and other stakeholders in and around these religious places were also issued.

## 256 die, 11,088 +ve in Maha

TN RAGHUNATHA ■ MUMBAI

In a noticeable drop in the Covid-19 triggered fatalities and an increase in the number of infections, Maharashtra on Tuesday witnessed 256 deaths and 11,088 infected cases in various parts of the state.

With the fresh fatalities and infections, the Covid-19 toll in the state mounted to 18306, while the total number of infected cases jumped to 5,35,601.

Of the total 256 deaths reported on Tuesday, Pune accounted for 53 deaths, followed by 48 deaths in Mumbai and 43 deaths Thane.

As the fatality figure dropped below 50 mark in Mumbai for the third consecutive day, the total Covid-19 toll Mumbai rose by 48 from 6,845 to 6893, while the infected cases increased by 917

## Capt Deepak Sathe cremated with full State honours

TN RAGHUNATHA ■ MUMBAI

Mumbaikars bade an emotional farewell to Wing Commander Deepak Sathe (ret'd) -- who was killed in the ill-fated Dubai-Kozhikode Air India Express flight crash on Friday last, as he was cremated here amid the State honours on Tuesday.

People from the north-eastern suburbs of Mumbai who had lined up on either side of the road and people from the balconies of the housing societies en route paid last respects to Wg Cdr Sathe, as his funeral procession of passed from Nahar Amrit Shakti complex at Chandrivli to Tagore Nagar electric crematorium at Vikhroli, where he was cremated in the presence of family members, defence officials and friends.

Chants of 'Capt. Deepak Sathe

## Capt Deepak Sathe cremated with full State honours

Amar Rahe' rent the air, as late Capt Sathe's funeral cavalcade, escorted by the Mumbai Police, proceeded from the Nahar Amrit Shakti complex where Sathe's live in Jalvayu Vihar building, on its final journey.

Capt Sathe's body had on Sunday afternoon been flown from Kochi and kept at an Air India facility near Terminal 2 of the Chhatrapati Shivaji international airport for some time

## HE WAS A LOVING HUSBAND, A CARING FATHER: FAMILY

**Mumbai:** After the funeral of late Wing Commander Deepak Sathe (ret'd), his family on Tuesday released a touching tribute in his memory, describing him as a "loving husband and caring father".

"Deepak Sathe was a loving husband and caring father and we are deeply

## before being taken to Bhabha Hospital at Bandra, from where the mortal remains were brought by his sons Shantanu and Dhananjay to the family home at Chandivli on Tuesday morning.

The pilot's father Col. Vasant Sathe (ret'd) (87) and mother Neela (83), who reside in Nagpur, had reached Mumbai on Monday to have a last glimpse of their son.

pained by his tragic demise. He was a family man and loved to spend time with family and friends whenever possible. He was a calm, composed, simple, and genuine person who persistently imbued happiness in people around him, his family members Sushma, Shantanu and Dhananjay said.

## Covid-19 patient dies awaiting treatment by Kolkata pvt hospital

Kolkata:

A 60-year-old female coronavirus patient died in an ambulance outside a private hospital in Kolkata while allegedly awaiting admission as her family failed to deposit in time Rs 3 lakh demanded by the staff.

The incident took place at Desun Hospital on the EM Bypass here on Monday night. The patient had been brought from East Midnapore's Tomluk. The deceased's husband had died of Covid-19 three days ago.

Her family said that when they took the patient to the hospital they were asked to deposit Rs 3 lakh. They said they immediately deposited Rs 80,000 and asked for an hour to arrange the remaining amount. But, they alleged, the

hospital authorities categorically told them that doctors would not be able to start treatment unless the full payment was made.

Later, they arranged Rs 2 lakh more and deposited the amount in a bank account, but the patient had died by then in the ambulance. Despite repeated attempts, hospital authorities refused to issue any media statement on the issue.

"Chief Minister Mamata Banerjee has clearly given instructions to all private medical facilities not to delay treatment in such emergencies. This is absolutely uncalled for," Indian Medical Association (IMA) President and Trinamool Congress Rajya Sabha MP Shantanu Sen said. Sen also urged the

bereaved family to approach the state medical regulatory commission with a formal complaint for necessary action against the hospital authorities.

In another incident of alleged medical negligence in adjoining Howrah district's Jaiswal hospital, coronavirus positive patient Moumita Ghosh was denied proper care. Ghosh was admitted to the hospital for the past seven day but suddenly developed respiratory problem and asked for oxygen support. She went live on the social media to seek help.

Later, West Bengal Minister Laxmi Ratan Shukla responded to her video appeal and made arrangements to ensure an oxygen cylinder for the patient. IANS

## Bengaluru Zoo to gift lions to safari

**Bengaluru:** The Bengaluru Zoo will gift three lions and a lioness. A pair to the Gadag zoo, and two lions to a Shimoga safari, both within the state limits under animal exchange programme earmarking the just celebrated World Lion Day, an official said on Tuesday.

"Bengaluru Bannerghatta Biological Park has decided to gift two male lions -- Dharm and Arjuna to lion and tiger safari Tyavarekoppa in Shimoga, which is 320 km northwest of Bengaluru," said Executive Director Vanashree Vipin Singh.

It will also gift a lion and a lioness -- Nakula and Nirupama to Gadag Zoo which is located 391 km northwest of the city.

According to Singh, the gifts were meant to celebrate the World Lion Day that was celebrated on Monday.

A proposal recommending the exchange is being submitted to the Central Zoo Authority (CZA) in New Delhi for approval.

The biological park has four units -- a zoo, safari, butterfly park and a rescue centre sprawling over 732 hectares of land and accommodates 2,279 animals. The zoo is nestled in the forests of Champakadhama Hills inside the Bannerughatta National Park. IANS

## Karnataka, Emory varsity to set up immunology centre in B'loru

IANS ■ BENGALURU

Recognising the importance of immunology at a time when the coronavirus pandemic is terrorizing the world, Karnataka government has announced that it will set up an immunology and vaccine research centre in the city in collaboration with renowned Emory University from the USA, said a minister on Tuesday.

"Keeping in mind the importance of immunology in the future, the state is very keen to establish an immunology and vaccine research centre in the city in collaboration with the Emory University," said Deputy Chief Minister C.N. Ashwath Narayan.

Narayan held a webinar with Rafi Ahmad, director of Emory Vaccine Center and discussed the importance of immunology, which is critical to address vaccines, infec-

tious diseases, cancer research and others.

"The results of researches done now in the field of immunology will be the solution to problems of coming days. Hence, investments done in this area are going to fetch fruitful results," told Ahmad to Narayan in the webinar.

The Emory professional explained that the entire world is pondering about immunology and effective vaccine at this juncture.

According to Narayan, the state government is very keen on finding novel coronavirus diagnostic tests and is looking at the larger benefits of setting the vaccine centre.

"The state has a very robust ecosystem suitable for research and innovation. It needs to be focused on research in the development of vaccines, clinical trials, and translation of research studies to the ben-

efit of the larger society," he said.

He highlighted that Bengaluru houses up to 20 institutes of national eminence which are being engaged in vaccine development activities.

"All these will be integrated and the government is ready to support through policy implementation. The rigid restrictions which were in place earlier with regard to clinical trials are now being relaxed," pointed out Narayan.

Ahmad said Emory Vaccine Center has developed highly specified and sensitive rapid test for Covid-19 which was adopted by hospitals in Atlanta, Georgia state, USA, where the university is located.

The Emory professional said the university is also engaged in plasma therapy, human molecular antibodies developments and other areas.

## Doctor-turned Mizo MLA saves woman's life, helps deliver baby

Aizawl:

Mizoram's legislator ZR Thiamsanga proved nothing short of an angel for a pregnant woman amid a medical emergency, as he conducted a caesarean operation on her and helped deliver a healthy baby boy.

Those who know the 62-year-old qualified doctor turned MLA would be hardly surprised, given the fact that he is known for his penchant for extending a helping hand to those in need in the past too.

The Mizo National Front's lawmaker told IANS on Tuesday that both the 39-year-old woman and her newborn were doing fine.

Thiamsanga said that during a visit to coronavirus-affected and quake-hit areas of remote Champhai district on Monday, he came to know that the pregnant woman was bleeding profusely and in a critical condition at the state's Champhai district hospital and rushed there.

"C Lalmhangaisangi, pregnant with her second child, was bleeding profusely

and her condition was critical. As there was no gynaecologist present at the hospital at that time, I performed an emergency caesarean operation and helped deliver a healthy baby boy," Thiamsanga told IANS over phone from Champhai, bordering Myanmar.

The woman hailing from the remote Ngur village could not be moved to Aizawl, about 200 km from Champhai, given her condition. "The lone gynaecologist posted at the Champhai hospital too was on leave," he explained.

"Today, I inquired and hospital nurses told me that both the mother and the newborn are healthy and normal," the lawmaker said.

Thiamsanga got his MBBS degree in 1985 and did his doctorate in Medicine in 1995 from the Regional Institute of Medical Science in Imphal in Manipur. He retired as head of department (Obstetrics and Gynaecology) at the Aizawl Civil Hospital in May 2018. Later, he was elected to the Assembly in November 2018 as MNF candidate.

## Kerala Police begins probe into cyber attacks on journalists

IANS ■ THIRUVANANTHAPURAM

The Kerala Police on Tuesday began a probe into the complaint given by the Kerala Union of Working Journalists after some mediapersons came under cyber attack for posing inconvenient questions to Chief Minister Pinarayi Vijayan.

State Police Chief Loknath Behra said in a statement that the Hi-tech Enquiry Cell and the Police Cyberdome have started the probe.

For the past few days a journalist couple working in a TV channel and another woman journalist with a different TV channel had come under unprecedented cyber attacks.

The major issue for the attackers seemed to be that these journalists were asking inconvenient questions to Vijayan in particular and the CPI-M in general.

This issue was first taken up by Leader of Opposition Ramesh Chennithala who slammed Vijayan's press secretary P.M. Manoj for taking on the journalists, when he is not supposed to indulge in such acts being a government servant.

When mediapersons raised the issue with Vijayan on Monday night he said he had no knowledge of what had happened and when specifically asked about Manoj, he pointed out that, "Manoj like many of you is also a journalist."

## As cases surge, so does loot by Agra's pvt hospitals

IANS ■ AGRA

level-3 nursing home charges around Rs 17,000 a day with ventilator and ICU support while the level-1 charge on an average around Rs 11,000 a day.

These rates are 10X to 12X the tariff fixed by the state government. The nursing home owners say the patients want 'A' class facilities and are willing to pay for it. A section of the society feels no cost is too high for a life saved, a private hospital manager said.

The general perception about government hospitals is negative. "You go with one problem and return with two," a patient who recovered at a private hospital said.

However, the doctors at the district hospital and the SN Medical College Covid hospi-

Vehicles stuck in mud after flash-floods triggered by a cloud burst on Dunadri-Bunjawah link road in Kishtwar district of Jammu & Kashmir on Tuesday PTI

## As cases surge, so does loot by Agra's pvt hospitals

tal vehemently deny the charge. "We are giving high quality services and the recovery rate reflects this. SN Medical College is fully equipped with latest gadgetry and facilities to take up any challenge. Don't forget a number of critical cases are referred to us here by the private nursing homes," a senior government doctor claimed.

The IMA meanwhile, has offered a Rs 600 daily package for those in home quarantine. The expenses on medicines and equipment are separate but consultations by the specialists and frequent monitoring is included in the fees, Dr Sanjay Chaturvedi, secretary IMA told IANS.

Meanwhile, 33 fresh cases

were reported in the past 24 hours taking the Agra tally to 2,136. The number of active cases has increased to 318, while the number of recovered stands at 1,717. So far, 68,149 samples have been tested.

In Mathura 33 new cases were reported, over a dozen from the ISKCON temple complex. Mainpuri reported 22, Etah 21, Firozabad 22 and Kasganj 13.

District authorities in Mathura clarified that outsiders would not be allowed to enter the Sri Krishna shrines in Braj Mandal. Rituals connected with the Sri Krishna Janamashtmi will be streamed live for the benefit of the devotees.

"Like Raksha Bandhan,

Janamashtmi festival will also be on a low key, the fervour is clearly missing," a Panda of the Vishram Ghat said.

"Vrindavan lanes are deserted, even the simians are distressed, the morale is low, may be Sri Krishna will dispel the clouds of gloom," hoped Jagan Nath Poddar, convener of Braj-Vrindavan Alliance.

So far the trend continues to remain alarming. For the local administration, the new worry is the spread of Dengue and Malaria. The health department of the municipal corporation has stepped up sanitisation and cleaning work. People have been told to ensure there was no stored water around, an official of the District Malaria office said.

# Nepal at it again

After Lord Ram, KP Oli wants to appropriate the legacy of Buddha in his continuing political tirade against India

That China has made inroads in our neighbourhood by debt-trapping our allies and is now muscling in politically to re-configure their equations with us isn't surprising. So far, Nepal, Bangladesh and Sri Lanka have worked out a "trade with China" and "historical ties with India" strategy to play the two Asian majors against each other and extract concessional gains in the process. But looks like Nepal wants to obliterate the civilisational ties and shared heritage it has had with India, overturn history and claim its independent standing, which is almost impossible given the origins of the sub-continent. In fact, Nepal

Prime Minister KP Sharma Oli is now appropriating shared cultural icons of Nepalese origin and claiming an intellectual property right over their legacy. First, he tried to own Lord Ram, saying he was born not at Ayodhya but in Nepal. Nobody took him seriously in the absence of any historical evidence. Now he is trying to reclaim Buddha as distinctly Nepalese. The controversy followed External Affairs Minister S Jaishankar's speech at CII where he referred to Mahatma Gandhi and Lord Buddha as two great Indians. Various Nepalese leaders, including Opposition leaders and former Prime Minister Madhav Kumar Nepal, reacted immediately, terming the reference "objectionable." The official statement laid stress on historical and archaeological evidence, which prove that Buddha was born in Lumbini, Nepal. India though was quick to put the lid on the row, saying that no one could doubt that Buddha was born in Lumbini but the emphasis was on the Buddhist heritage shared by the two countries. India has never attempted a cultural takeover of Buddha at any time, religiously attributing his birth to Nepal. Similarly, Nepal cannot deny the fact that he spent most of his life in India, attaining enlightenment at Bodhi Gaya, delivering key sermons at Sarnath and ultimately leaving the earthly world at Kushinagar. Besides, someone like Lord Ram and Buddha cannot be defined by their geography but by their philosophy that the whole world has adopted. In that sense, anybody, anywhere can quote them as inspiration. Though, Lord Buddha made India his *karmabhoomi*, travelling through its length and breadth and preaching the true *dharma*, his followers and practitioners keep him fervently alive in most countries in Southeast Asia compared to India. Does that mean we can claim to be the fountainhead of the bigness of his vision? By that logic, poet laureate Rabindranath Tagore is as much ours as he is of Bangladesh, whose national anthem he wrote and where he spent much time. Having been a Hindu kingdom and given its contiguity with India, Nepal has had the strongest bond with us in terms of shared history, culture and people-to-people contacts. This commonality has been one of the reasons for the open borders between both countries. So now that Oli is putting up cultural barriers, looks like he is determined to eliminate any interdependent associations with India and is decidedly hawkish about China, willing to be its vassal State. In fact, China has upped its cultural diplomacy, too, in Nepal, helping it rebuild old temple complexes and shrines that were damaged in the earthquake of 2015.

Oli's latest tirade against India follows the ongoing cartographic war, where he questioned Indian claims around the Lipulekh Pass based on varied interpretations of British era maps. This despite the fact that the pass is an accepted Indian gateway, according to a 1954 treaty signed between India and China. Although the new road near it, built by New Delhi to facilitate pilgrim traffic to Kailash Mansarovar, is now one of the quickest links between Delhi and the Tibetan plateau, China had not objected to it. In fact, it recognised India's sovereignty by agreeing to expand trade through the pass. But overriding such precedents, Nepal released a revised map showing Limpiyadhura, Lipulekh and Kalapani under its territory. No political party opposed the resolution for reclamation. Yet India has been in possession of this territory for at least 60 years. Even the new road to Lipulekh does not challenge that status quo. Nepal says that the basis for demarcation, the Kali river, originates from a stream at Limpiyadhura, north-west of Lipulekh. Thus Kalapani, Limpiyadhura and Lipulekh are actually on its eastern bank and qualify to be its land. New Delhi has countered this, saying that Kali originates in the springs well below the pass and that while the old map does not demarcate the area north of these springs, administrative and revenue records of the 19th century show that Kalapani was on the Indian side and should be a part of Uttarakhand. China, as in Doklam, has taken advantage of the trijunction area to complicate the territorial confusion and push India backward. But if Nepal has gone so maximalist and nationalist, despite sharing Hindu origins and, therefore, more naturally inclined to the Narendra Modi regime, it means that China has an iron grip on it. India's over-dependence on historical, spiritual and geographical connect as a leitmotif of diplomacy is being tested severely. And though we are investing in bilateral relations on more favourable terms and pushing COVID-19 aid, we can't beat the Chinese, who make up over 90 per cent of Nepal's FDI and are moulding it as their frontier proxy warrior.

# Muted festivities

The IPL might be taking place later this year but it is almost certain to be a less extravagant affair than before

No matter what your opinion about Lalit Modi, the fact of the matter is that with the Indian Premier League (IPL), he managed to create a globally competitive and recognised sports league. So much so that the IPL is the world's top franchise-based cricket league and one must keep in mind that China, for all its success in creating brands, has failed in creating a global sports league. That said, as sports have been ravaged, thanks to China's gift to the world, the Coronavirus, the IPL also fell a victim, missing its scheduled slot at the start of the Indian summer. But now sports — from Formula 1 to football — have

returned to television screens and spectator-less formats. Even cricket has restarted in England in the safety of a "bio bubble." So the IPL is looking at playing its season in the United Arab Emirates (UAE) this winter, or at least has plans of playing.

The UAE, thanks to its relatively compact size that eliminates the need for connecting flights, its close location to India — being away by just 90 minutes of flying time — and large availability of remote resorts, where teams can be sequestered between matches, as well as more than enough cricket stadia, should make the IPL pretty easy to manage. However, whether the IPL will be played with the audience in attendance remains to be seen. The UAE — despite its economy being ravaged by the pandemic and sending hundreds of thousands of expatriate workers from India home — still has a huge base of workers from the sub-continent. Tens of thousands of fans can easily be found to fill the stadia in the UAE replete with their IPL uniforms and tribal loyalties. But will the sponsors bite? The huge player salaries guaranteed by television revenues and on-field sponsors might make things difficult for the teams. Already, the principal sponsor of the IPL has withdrawn because of the ongoing anti-Chinese sentiment in India. While Baba Ramdev-promoted Patanjali wants to sponsor the IPL, will the brash cricket league want to associate with it? Teams will also find it difficult to find jersey sponsors and broadcasters might find it equally difficult to get sponsors on television broadcasts. Conversely, the IPL could be the firestarter the Indian market really needs. Maybe it will drive consumerism again and awaken our economy, which was waylaid by a poisonous scale of the Chinese dragon. The cricket bat can be more effective in beating back the dragon than a French fighter plane or five.

# The border challenge

The PLA has blemished the Modi Govt's muscular image created in the wake of Uri and Balakot responses against Pakistan, which won it an overwhelming political mandate

ASHOK K MEHTA

One's blood boils watching the way India and its Army are being pushed around by the Chinese People's Liberation Army (PLA) along the Line of Actual Control (LAC). Roughing up soldiers, intruding/transgressing on the Indian side of the LAC at will and violating border protocols have become second nature to the PLA. And yet, many citizens keep harping that when it comes to joining the battle, Indians are six feet tall. The PLA has no experience to fight in high-altitude terrain; whereas Indian soldiers have been deployed in Sikkim, Ladakh and Siachen for decades. China lacks the regimental system of the Indian infantry and is composed mostly of short-term conscripts compared to India's wholly volunteer Army. The PLA has not fought a war since 1979. Neither have the Indian troops since the skirmish they fought "on our side of the Line of Control (LoC)" against a mixed bag of Pakistani frontier militia and hardcore terrorists at Kargil.

Because the PLA has done a sort of Kargil in east Ladakh, loud thinking can be heard about launching a land-air offensive *a la* Kargil, confined to our side of the LAC to vacate aggression in Ladakh. This comparison has many holes: It likens LAC to LoC, which is delineated with the maps exchanged in 1972 between the two militaries. The LoC is violated regularly by infiltration, cross-border firing and is a hot border. Not a shot has been fired along the LAC since 1975 and a no-shooting protocol exists. The Indian Air Force (IAF) has not carried out any joint military exercises for air support of ground troops along the LAC. Border protocols debar the use of force in settling the boundary question, which includes the LAC.

And yet, rogue actions of the PLA have continued periodically like the intrusions at Sumdorongchu (1988), Depsang (2013), Chumar (2014), Doklam (2017) and now across east Ladakh, stretching over 250 km. They have all gone unpunished. Instead, PLA raw recruits managed to thrash outnumbered Indian soldiers near the Pangong lake on May 17/18 last year so badly that 72 soldiers had to be hospitalised. PLA helicopters chased away an Indian helicopter in the same area around the same time. In short, India has been at the receiving end of PLA depredations except possibly at Galwan. The mystery is, why have Indian troops never done a tit-for-tat

counter intrusion?

That the disengagement and de-escalation process has ended in utter failure was recognised by the Indian Ministry of Defence (MoD) on its website earlier this month but the admission was pulled down within 48 hours. Indian forces have been left with buffer zones at friction points where they have had to withdraw and dismantle their fortifications from the Indian side of the LAC. Worse, the PLA is not permitting these soldiers to exercise their patrolling rights upto established patrolling points, which when connected, roughly align with the Indian LAC.

Still worse is the stubborn refusal of the PLA and its commanders to even discuss the 18-km deep massive intrusion made in Depsang, a repeat of the intrusion in April 2013, from where the PLA withdrew after three months. Crowning the multiple intrusions is the PLA's construction of infrastructure on the Indian side of the LAC. Violative of border patrols, PLA activities are nothing short of acts of war.

Not only has China unilaterally changed the status quo but it has also shifted the LAC several kilometres westwards, attempting to conform to its 1960 claim line. It has also annexed several hundred kilo-

metres of Indian territory. Prime Minister Narendra Modi's in-denial statement of June 19 — "neither has anyone intruded across our border nor is anyone intruding" — has become the great enabler of PLA intrusions. Taking down the belated acceptance of intrusions on the MoD website is supportive of Beijing's actions.

China is rejoicing that Modi has kept the Wuhan spirit alive whereas it is an abysmal failure of summitry. By virtually condoning the Galwan clash, Modi seems to have done the reverse of Nehru's cavalier orders to throw out the Chinese from the Thagla ridge.

The joy and excitement exuded by Modi and Defence Minister Rajnath Singh over the arrival of five Rafales reflected the dire and optionless situation at the LAC. Given the phenomenal spike in the COVID-19 pandemic in India, a debilitating decline in the economy and the military overstretched on two fronts, a Kargil-like response to multiple intrusions will lead to a war that India cannot afford.

India's continental strategy (if there is one) for border management has come unstuck because the PLA has changed the rules of engagement, both on the ground and at the negotiating table. Five rounds of military commander talks, four

rounds of Working Mechanism for Consultation and Coordination (WMCC) dialogue and conversations between high ranking Special Representatives on border talks have hit a *cul-de-sac*.

With wholesale intrusions in early May, China delivered an initial *fait accompli*. This was followed by a Chinese-scripted DPP in July end that made cosmetic disengagement to ease tensions at friction points but was tantamount to quarantining Indian soldiers on their own territory. The PLA, on the other hand, dug down like it did at Doklam after disengagement and nobly proclaimed that disengagement is completed. This new *fait accompli* has imposed on India a new status quo without a hint of restoring the May 5 situation.

The Modi Government can pretend it is business as usual: Take down belated acceptance of intrusions from the MoD website, talk tough the virtues of Rafales and most of all, use diversionary strategies to focus on its spectacular political achievements like the grand ceremony at the Ram temple on the same day it erased Article 370 at Jammu & Kashmir a year ago.

In deference to Chinese sentiment, the new status of Ladakh has been played down. The setback at LAC has almost

disappeared from TV and media, reflecting India's acceptance of aggression by the PLA. The tragedy playing out along the LAC for 10 weeks, that was essentially concealed by the Government, is a reminder of India's colossal intelligence and operational failures.

It has blemished the Modi Government's tough muscular image created in the wake of Uri and Balakot responses against Pakistan, which won it an overwhelming political mandate. The Chinese PLA has changed that perception. That, too, 60 years after the 1962 war when China gave India a dressing down and withdrew unilaterally, vacating areas it now covets: Tawang and East Ladakh. India's failure to shape and maintain a deterrent has led to the loss of face.

Three days from now, on August 15, Independence Day, Modi will recount his Government's achievements, including the handling of the pandemic. How he will frame the situation along the LAC, where the Chinese PLA has altered status quo and annexed Indian territory, will be worth watching out for.

(The writer, a retired Major General, was Commander IPKF South, Sri Lanka and founder member of the Defence Planning Staff, currently the Integrated Defence Staff.)

## SOUNDBITE

I think there should be dialogue, decency and a *Lakshman Rekha* in public discourse and I haven't crossed that line in the 20 years of my political career.

Congress leader — Sachin Pilot

Theatres would always overlook small films. That problem is solved now. Everything is equal on the OTT platforms. Not getting a show was a big problem.

Actor — Radhika Madan

I'm much more inclined to do it (G-7 meeting) sometime after the election. ... We could do it through tele-conference or we could do it through a meeting.

US President — Donald Trump

I welcomed Sonia's appointment as interim president last year. But I do believe it is unfair to her to expect her to carry this burden indefinitely.

Congress leader — Shashi Tharoor

## LETTERS TO THE EDITOR

### Ill-conceived decision

Sir — This refers to the editorial, "*Atmanirbhar raksha*" (August 11). There is nothing wrong with the Government's call for "vocal for local" but actions such as those taken by Defence Minister Rajnath Singh to impose import embargo on 101 items are ill-conceived and may prove to be detrimental in the long run. Instead, the Government should have come out with a clear picture as to how various sectors could reduce dependence on imports so that we gradually start producing world-class products in the country. Such a hasty decision will send the wrong signal to both our domestic suppliers as well as hostile neighbours. Our defence preparedness, too, is not upto the mark.

Bal Govind Noida

### Big boost to agriculture

This refers to the establishment of a ₹1 lakh crore Agriculture Infrastructure Fund (AIF) by Prime Minister Narendra Modi to enhance post-harvest infrastructure in the country. The creation of a comprehensive post-harvest infrastructure can be a game-changer. As per Government data, 16 per cent of the fruits and vegetables and up to 10 per cent of cereals, oilseeds and pulses are wasted in the country due to inadequate storage and warehousing facilities. Most of the existing storage in the country is not owned by farmers. This also means that they are forced to sell their entire farm output at one go after the harvest is over and when the prices are low. Since the AIF is trying to rope in farmers' producers organisations (FPOs) to build such infrastructure, it will hopefully also address this asymmetry and allow growers to dispose of their produce in a phased manner and avail better returns. This will go a long way in increasing the bargaining power of Indian farmers.

However, the economic challenge of boosting growth and incomes cannot be missed. Even before the pandemic struck, the economy was in a bad shape. Disruption caused due to the pandemic made matters worse. If the situation does not revive, it is unlikely

that FPOs and other intended beneficiaries of AIF loans will be enthusiastic about committing to such investments. Economic experts say that the economy needs a massive fiscal push to boost economic sentiment as the consumer confidence has plummeted to an all-time low. The actual loan disbursement from AIF early this week was just ₹1,000 crore. This is yet another signal that the actual fiscal boost to the economy doesn't match the scale of the Government's big ticket announcement. This needs to change.

N Sadhasiva Reddy Bengaluru

### Breather for Congress

Sir — This refers to the editorial, "Needed, full-time chief" (August 11). In a belated yet pragmatic move, the Congress leadership has succeeded in averting a fall of its Government in Rajasthan. Concerted efforts by the Gandhi siblings have yielded results. This new scenario has paved the way for truce, howsoever fragile, between Chief Minister Ashok Gehlot and Sachin Pilot. Pilot is ready for an unconditional truce and Gehlot has agreed to follow the leadership line. Hopefully, the Rajasthan Assembly session scheduled for August 14 will pass without any hurdle. Grievances flagged by the Pilot camp should be addressed. Rahul Gandhi must now take charge and call for elections to the Congress Working Committee without any delay. Sans a permanent head, the grand old party looks like a rudderless boat.

Azhar A Khan Rampur

### Lessons from Beirut

Sir — The deadly explosion in Beirut is another instance of conscience-keepers of safety abdicating their responsibility.

Military ammunition depots, inflammable gas and fuel stations in the energy sector and nuclear facilities exclusively rely on meticulous standard operating procedure manuals.

The presence of 740 tonnes

of ammonium nitrate at Chennai port is now suddenly remembered even as some consignments are missing. Universally, we seem to be short of inspired administrators with a grip on their jobs. It is such

drift that causes mishaps. The accident in Beirut is a reminder that despite the strict regulation of hazardous substances internationally, the risks remain.

# Modi the messiah of Hindus?

The BJP and the RSS are now convinced that the dream of Ram Rajya is possible with majoritarian dominance

KALYANI SHANKAR

Just like August 15, i.e. Independence Day and August 9, which is Quit India Day, a third date, August 5, 2020, has become a historic date for the BJP. While launching the construction of the Ram temple at Ayodhya, Prime Minister Narendra Modi said, "history was written today in golden letters." It is indeed a twin triumph for Modi that the colourful *bhoomi puja* ceremony came on the first anniversary of the bifurcation of Jammu and Kashmir (J&K). The Ram temple at Ayodhya and the abrogation of Article 370 were two divisive issues for the country. But for Modi it was a matter of fulfilling the BJP's promises to its core Hindu voters. At the *bhoomi puja* Modi drew a parallel with the freedom movement and by this he has placed freedom from cultural subjugation on a par with the political freedom of India. "Just as August 15 symbolises untiring tenacity, millions of sacrifices and the fervent desire for freedom... similarly this day reminds (one) of the sacrifices made by several generations... for the Ram temple," Modi said and claimed that the "wait of centuries" for the Ram temple had ended. In fact, August 5 marks the demise of what the Congress and the other Opposition parties call "secularism."

The *bhoomi puja* ceremony for the Ram temple is the beginning of a new cultural nationalism and dominance that was the dream of the Rashtriya Swayamsevak Sangh (RSS) for decades. The BJP and the RSS have rejected the idea of composite nationalism and favoured cultural nationalism. The BJP has been agitating for its core agenda since its inception in 1980 though its critics call it a majoritarian agenda. The party is jubilant as in the first year of Modi's second term, he managed to deliver two of the items on the agenda. He was able to do so because of three reasons. The first is that the BJP got a big mandate in the 2014 and 2019 Lok Sabha polls. The second is the weak Opposition which has given a free hand to the saffron party. The third is that the BJP does not need to woo the Muslim votebank as the majority is with them.

Let us take Kashmir first. It was on August 5, 2019 that the State was bifurcated and Article 370, that gave special status to J&K, was abrogated. The decision attracted international attention and criticism and even after one year, things are yet to become normal. The entire political class has been under arrest at one time or the other in J&K and even one year down the line, some of the leaders, including former Chief Minister Mehbooba Mufti, remain incarcerated. There is a political vacuum on the one hand and an incapacitated political class on the other. As a result, there has been no political activity in J&K for more than a year. Many demand that the detained leaders should be freed and elections should be held. Since the PDP-BJP Government fell in 2018, J&K has been under continuous Governor's Rule. Former Minister Manoj Sinha took over as the Lieutenant-Governor last week, the second in a year. Militancy in J&K has reduced to an extent but not totally snuffed out. The people of Kashmir have been facing a double whammy, the Coronavirus-induced lockdown on one side and curfew on the other, for the past many months. The promised jobs are nowhere on the horizon and the industry, including shawl, carpet, dryfruit, fruit exports and so on have suffered. Tourism is dead. Communication has broken down and schools and colleges are closed.

In this regard Manoj Sinha's statement after the oath-taking ceremony is significant. "There should be peace and stability in Jammu and Kashmir. The situation of uncertainty should end, terrorism should end. Achieving all this along with accelerated development will be our aim, our mission." The challenges before him include delimitation, Assembly elections, resuming political dialogue and restoring full statehood. The trust deficit should also be bridged and there should be a reconnect with the people.

As for the Ram temple, the Supreme Court's verdict has strengthened the Government's hand. With the law on its side and the Muslims reconciled to the fact that they will have a mosque on the land given to them elsewhere, not much problems are expected. The temple trust would have the support of the State and the Central Government as both are ruled by the same party. Money would be no problem as donations are pouring in. The big temple would be ready by 2023, perhaps just before the 2024 elections. BJP leader Vinay Katiyar has already claimed that major temples at Kashi and Mathura are on the BJP's agenda. Now only the Uniform Civil Code remains on the BJP's core agenda. The Modi Government might think of bringing a law soon when the pandemic is behind us. Along with that, there could also be some measures for population regulation. The BJP and the RSS are now convinced that the dream of Ram Rajya is possible with majoritarian dominance. Modi is their chosen messiah now.

**POINT COUNTERPOINT**

**THE EIA 2020 DRAFT IS A DISASTER. IT WILL SILENCE THE VOICE OF COMMUNITIES WHO WILL BE IMPACTED BY THE ENVIRONMENTAL DEGRADATION IT UNLEASHES.**

—CONGRESS LEADER RAHUL GANDHI

**WE HAVE GOT THOUSANDS OF SUGGESTIONS WHICH WE WELCOME. WE WILL CONSIDER THEM. THEN TAKE A CALL AND COME OUT WITH A FINAL (EIA) DRAFT.**

—UNION ENVIRONMENT MINISTER PRAKASH JAVADEKAR

# Not a NEET situation

The International Youth Day is meant to reflect on one of the most serious issues concerning our young people and that is their growing number without employment, education and training

Each year, August 12 is celebrated as the International Youth Day (IYD) to raise awareness about the challenges and problems being faced by the young people of today. IYD, which was first observed in 2000, aims to endorse ways to engage the youth and help them participate in affirmative contributions to society. The theme of the IYD this year is 'Youth Engagement for Global Action.' It seeks to highlight the ways in which young people at the local, national and global level are enriching national and multilateral institutions and processes, as well as draw lessons on how to enhance their representation and engagement in formal institutional politics.

As per the United Nations (UN) population prospects, the youth segment (15-29 years) globally stands at 1.8 billion now. Out of the total number of young people in the world, every fifth person (20 per cent) resides in India (366 million) reflecting the importance of this segment in the country. The youth are faced with many challenges and one of the most serious issues concerning them is the growing number of idle youngsters or those who are not in employment, education and training (NEET in short).

NEET youth tend to experience a varying degree of social and economic marginalisation and are more likely to be left behind in mainstream development. The Sustainable Development Goals (SDGs), 2030, adopted by the UN in 2015, also set the agenda specifically for target 8.6, which calls for the proportion of youth with NEET status to be substantially reduced in the next 15 years.

The Global Employment Trends for Youth 2020 noted that there has been a continued decline in the participation of young people in the labour force across countries. The population of the youth has increased from one billion to 1.3 billion in the period between 1999 and 2019, but the number of young people engaged in the workforce (either employed or unemployed) has seen a decrease from 568 million to 497 million during the same period.

The most disturbing pattern globally is that one young person out of every five (20 per cent) and 30 per cent of the girls and 13 per cent of the boys among them— those aged between 15 and 24 (which is the international definition of the youth) — are currently classified as NEET. This means that a whopping 267 million out of 1.3 billion young people worldwide are neither gaining experience in the labour market, nor receiving income from work or enhancing their education and skills. This suggests that their labour remains under-utilised.

India, at present, is home to the largest population of youth in the world. The National Youth Policy of India, 2014 defines them as people belonging in the age group of 15-29 years. According to the census data for 2011, the youth constitute 28 per cent of the total population in the country and contribute to over 34 per cent of India's national income. The latest estimates show that they comprise around 27 per cent of the total Indian population of 1.3 billion.

However, a major positive development has been their growing enrolment in the secondary and tertiary-level of education, which has resulted in better-skilled employees and prolif-

“ WE ARE GOING TO HAVE A LARGER YOUTH POPULATION FOR THE NEXT TWO DECADES, WHICH POSES AN IMMINENT CHALLENGE AS WELL — OF LEVERAGING THE POTENTIAL OF THE ABUNDANT HUMAN RESOURCE. THE SPIRAL OF THE UNEMPLOYED IS POSING SOME SERIOUS QUESTIONS ON HIGHER EDUCATION, SKILL DEVELOPMENT, DEMOGRAPHIC DIVIDEND AND INDIA'S FUTURE. THERE ARE OTHER CONCERNS ABOUT QUALITY OF JOBS, DECENT WORKPLACES, UPWARD MOBILITY, WAGES, ASPIRATIONS, COMPETITION ACCRUED BY LIMITED SUPPLY OF NEW JOBS, CONTRACTUAL NATURE OF JOBS, MENTAL HEALTH, OPPORTUNITIES FOR ENTREPRENEURSHIP AND FOSTERING INNOVATIONS AMONG THE YOUNG MINDS ”

eration of decent employment in many countries around the world.

However, the Periodic Labour Force Survey (PLFS) for 2017-18 reported a significant increase in unemployment rates for the young segment of the population. A more serious concern is the increasing joblessness among educated youth (15-29 years), which went up nearly three times from 6.1 per cent in 2011-12 to 17.8 per cent in 2017-18. In particular, technical degree holders have been noted to fare the worst with their unemployment rate being pegged at 37.3 per cent, closely followed by those who are post-graduates and above (36.2 per cent), graduates (35.2 per cent), and youth with formal vocational training (33 per cent).

For young women, the unemployment situation is graver in terms of labour force participation as well as unemployment. Women are moving out of the workforce in greater numbers, but among those who remain, unemployment rates are higher than those among men. This holds true even for women who are educated or have received training, and this trend has worsened during the prevailing COVID-19 pandemic.

One would imagine that the young population with "industry-relevant" formal vocational training would have better job prospects in India. But only 1.8 per cent of the population reported receiving formal vocational/technical training in 2017-18. Young people comprised more than half of those who received formal vocational/technical training, which is in sharp contrast to the 50-80 per cent participation in developed nations.

Around 33 per cent of the formally-trained youngsters were unemployed

in 2017-18. Nearly a third of trained young men and more than a third of trained young women were unemployed. Among those who did not receive such training, 62.3 per cent were out of the workforce.

Further, the growing number of NEET is also posing a serious challenge, as it has increased from 70 million in 2004-05 to 116 million in 2017-18. The Government has increasingly been wary of this and has taken steps to deal with this growing challenge. In recent years, it has launched the "Skill India" campaign, which includes an array of initiatives under its purview to bridge the gap between lack of skill training and joblessness. A key initiative under the campaign is the Pradhan Mantri Kausal Vikas Yojana (PMKVY), the National Apprenticeship Promotion Scheme and so on.

The PMKVY was envisioned to impart employable skills and help the youth in securing better livelihoods. Although it intends to provide training free of cost, most of the youth who have received formal training have had to personally arrange the fees. The PLFS 2017-18 data shows that only 16 per cent of the youth who received formal training were funded by the Government. Around 73 per cent of the youth underwent full-time training. The coaching period for more than half of the youth exceeded a year and about 30 per cent of them underwent training for more than two years.

However, it was apparent as early as 2016 that there were several issues with the initiative, when a Government-appointed committee to rationalise Sector Skill Councils (SSCs) and improve Skill India, led by Sharda Prasad, found that the programme's targets were too ambitious. Additionally,

it was discovered that the spending of the funds allocated for the programme was not subject to adequate monitoring mechanisms. On the whole, most of the youth in the country still remain outside the ambit of formal training and many of those who are able to personally finance themselves in order to undergo months of vocational training, remain jobless. The subsequent decline in budgetary allocations for PMKVY is an indicator that the Government itself is not convinced about its working.

In sum, as argued by economists and researchers, if the youth are properly skilled and absorbed in the labour market, they can contribute to higher economic growth of the country. We are going to have a larger youth population for the next two decades, which poses an imminent challenge as well — of leveraging the potential of the abundant human resource. The spiral of the unemployed is posing some serious questions on higher education, skill development, demographic dividend and India's future. There are other concerns about quality of jobs, decent workplaces, upward mobility, wages, aspirations, competition accrued by limited supply of new jobs, contractual nature of jobs, mental health, opportunities for entrepreneurship and fostering innovations among the young minds. Amid the COVID-19 pandemic, as the country is moving towards the vision of a new India and an *Atmanirbhar Bharat* (self-reliant India), we need to prioritise the aspirations of the young population for inculcating and strengthening their *atma vishwas* (confidence).

# UP B.Ed 2020 JEE a benchmark in many ways

It is an example for others to emulate, right from the selection of centres to logistics. It shows how fair, safe examinations can be held even in these testing times

MONIKA S GARG

Uttar Pradesh (UP) organises a Joint Entrance Examination (JEE) for B.Ed. every year, where students compete for almost two lakh seats. Conducting it this year was a challenge in more ways than one. The State had received 4.31 lakh applications for the examination that was initially scheduled for April 8 but got postponed thrice in view of the COVID-19 pandemic and was finally held on August 9.

Last year, it was conducted in only 15 districts with 60 to 130 centres per district. This year there were the twin targets of least movement and ample social distancing. Hence it was decided to host the entrance test in all districts indicated by the

candidates. The number of districts was increased to 50 and later to 73. To reduce the number of students congregating in one place, the strength of candidates allotted to a centre was halved, as compared to earlier years. Thus, the number of centres also increased proportionately. Special care was taken to ensure that women and *divyang* candidates were allotted the district of their choice, while other candidates were accommodated at or near their first place of preference.

In the past, B.Ed entrance tests were conducted by the nominated university with the help of other State universities while the Department of Higher Education played a negligible role. This year, the nominated university, Lucknow University, had sought the department's help due to the special circumstances arising out of COVID-19. Ensuring compliance with the directive of the Chief Minister to ensure that there were no incidents of copying or other malpractices during the examination was the department's biggest challenge. This required a marked departure

from established practices and it was not easy to change the ways of the management accustomed to working in a particular fashion.

Formerly, 50-60 per cent of the centres were in private institutes and there was a suspicion of malpractices in some of them. To check the menace of cheating, it was decided that examination centres would be set up only in Government and Government-aided institutions. This turned out to be a daunting task. A screening committee was constituted in each district, comprising the district administration, the Secondary Education and Higher Education Departments and a coordinator from Lucknow University. Their task was to identify potential examination centres in the district, including State and Central universities, degree and intermediate colleges, engineering colleges, ITIs, polytechnics and even Government schools. Nevertheless, this was not sufficient. There was so much resistance to change that when requests and persuasions failed to yield results, the organising team ultimately had

to be convinced by those at the highest level.

The Deputy Chief Minister and Chief Secretary held a special video conference with the District Magistrates and finally, after a meticulous exercise, success was achieved and 1,089 centres were identified.

The mammoth task of organising the centres, informing the students and mobilising the district administration was done through virtual meetings over the next month. Centres had to be changed because of new containment zones and floods in a few districts. Care was taken to ensure that the candidates did not bear the brunt of any of this and were kept updated through e-mails and SMS. Battling time constraints and infection risks, a programme for training invigilators and superintendents was designed. They were educated in the best practices for infection prevention as well as new anti-cheating measures. The optimum use of technology was witnessed at all levels during the crisis.

Ensuring the safety and health of candidates and staff was the highest

priority and adequate monetary allocation was made for sanitisation of each centre — a minimum of ₹4,000 plus an additional ₹20 per candidate if the number surpassed 200 at any centre.

Face masks and sanitisers were provided free of cost. Thermal scanners were used and proper social distancing was maintained in and outside the centres. Lucknow University adopted an innovative method for taking the thumb impressions of the students. Instead of the routine common ink pad, an individual disposable ink strip, specially made for the JEE, was given to each student for the purpose.

On the day of the examination, static magistrates and flying squads were deployed and an effective face-detection system was used. The technology uses Artificial Intelligence (AI) to collect information of the candidate's face from 27 points and matches him/her with the profile photo on 13 indicators including hair, ears, spectacles and so on. Each candidate's biometric picture was taken on special phones with this app.

Other mobile phones and communicating devices were not allowed inside the centre. CCTV cameras that had been specially-installed in each examination centre were continuously monitored through live webcasting at the university's command centre, having 100 screens.

Before the examination was held, there were live debates in newsrooms and drawing rooms on whether this exam should be conducted at all. People argued that admissions to B.Ed could be made based on marks obtained in the final year of college itself and that this test could be done away with in view of the need for safety. However, the fact remains that this would be unfair to all stakeholders as final year exams are not standardised across universities.

Additionally, marking is often done on a bell curve based on the student pool of that university. Thus, the top few students from each university are expected to score higher, irrespective of how they compare with students across the State. Thus, a JEE was conceived years ago. Denying

this opportunity to a student body that has already suffered academically due to the Corona crisis would have been remiss.

The option of holding the test online this year was given due consideration, but the digital divide across the State and access issues, especially for the vulnerable sections, weighed against it.

Since this is a prestigious course with fierce competition, it was essential to give a fair and uniform opportunity to all. The result will be declared on September 5 and the new session will commence in October-November. Conducting this exam was an experience worth sharing. It showcased the sensitivity and caution of the State Government and set the trend for holding competitive exams during the outbreak. It is an example for others to emulate, right from the selection of centres to logistics. It shows how fair, safe examinations can be held, even in these testing times.

# Industrial production declines 16.6 % in Jun

**PTI ■ NEW DELHI**  
Industrial production declined by 16.6 per cent in June, mainly due to lower output of manufacturing, mining and power generation, as per the government data released on Tuesday. According to the Index of Industrial Production (IIP) data, manufacturing sector production registered a decline of 17.1 per cent, while the output of mining and power fell 19.8 per cent and 10 per cent, respectively. In a press release, the Ministry of Statistics and Programme Implementation issued a disclaimer saying that "it may not be appropriate to compare the IIP in the post-

pandemic months with the IIP for months preceding the Covid-19 pandemic". However, on a monthly basis, the Index of Industrial Production has shown improvement. The index, which was 53.6 in April, improved to 89.5 in May and 107.8 in June, the data revealed. The IIP had expanded by 1.3 per cent year-on-year in June 2019. The data further revealed that the contraction in the consumer durables and capital goods segment was 35.5 per cent and 36.9 per cent, respectively during June 2020. However, consumer non-durables segment posted a growth of 14 per cent. The IIP

for April-June period has contracted by 35.9 per cent, according to the data. It had registered a growth of 3 per cent during the same period last fiscal. In view of the preventive measures and announcement of a nationwide lockdown by the government to contain the spread of Covid-19 pandemic, a large number of industrial sector establishments were not operating from March-end, 2020 onwards. This has had an impact on the items being produced by the establishments during the period of lockdown. With the lifting of restrictions in the subsequent periods, industrial activity is now resuming.

# Sensex builds on gains amid global rally; HDFC twins sparkle

**PTI ■ MUMBAI**  
The BSE Sensex closed in the green for the fourth straight session on Tuesday, propelled by index heavyweights HDFC twins and Reliance, amid robust gains in global equities. A strengthening rupee, encouraging quarterly results and persistent foreign fund inflows further bolstered market sentiment, traders said. After touching a high of 38,556.27, the 30-share BSE Sensex pared some gains to end 224.93 points or 0.59 per cent higher at 38,407.01. The NSE Nifty jumped 52.35 points or 0.46 per cent to finish at 11,322.50. The Nifty has extended its winning run to six sessions. Axis Bank was the top gainer in the Sensex pack, rally-

ing 3.96 per cent, followed by IndusInd Bank, ITC, HDFC Bank, Tata Steel, HDFC, ICICI Bank and Reliance Industries. HDFC twins and RIL accounted for over half of the Sensex's gains. On the other hand, Titan, Bharti Airtel, HCL Tech and ONGC were among the laggards, dropping up to 3.73 per cent. Global markets surged to over five-month highs as investors looked forward to an agreement on a US stimulus package. Market participants also cautiously weighed the news of Russia becoming the first country to officially register a coronavirus vaccine and declare it ready for use, despite international skepticism. The number of cases around the world linked to Covid-19 has crossed 2 crore,

while the infection count in India has reached 22.68 lakh. "Indian markets continued their positive run, in spite of intraday volatility and unabated virus infections across the country. It was in sync with positive global cues, on the back of expected stimulus measures from the US, improving economic data points from China and the first coronavirus vaccine getting registered in Russia. "Indian markets continued their run on the basis of earnings results and stock specific news, amidst hopes of another round of stimulus measures by the government. This expectation should ensure liquidity in the markets in the near term," said Vinod Nair, Head of Research at Geojit Financial Services. Meanwhile, the dol-

# ₹ settles 12 paise higher at 74.78 against US \$

**PTI ■ MUMBAI**  
The rupee appreciated by 12 paise to close at 74.78 against the US dollar on Tuesday tracking weakness in the greenback and gains in the domestic equity market. Foreign traders said gains in the domestic currency were supported by foreign fund inflows into domestic equity and debt markets. Foreign institutional investors were net buyers in the capital market as they purchased shares worth ₹302.88 crore on Monday, according to provisional exchange data. At the interbank forex market, the local unit opened at 74.83 against the US dollar and gained further ground to settle at 74.78, up 12 paise over its previous close of 74.90.

lar index, which gauges the greenback's strength against a basket of six currencies, was trading 0.13 per cent lower at 93.46. Market participants will track Index of Industrial Production (IIP) numbers scheduled to be released later in the day for further cues, they said. After touching a high of 38,556.27, the 30-share BSE Sensex pared some gains to end 224.93 points or 0.59 per cent higher at 38,407.01. The NSE Nifty jumped 52.35 points or 0.46 per cent to finish at 11,322.50. Brent crude futures, the global oil benchmark, rose 0.47 per cent to USD 45.20 per barrel. "Indian rupee gained in line with other Asian currencies amid weakness in dollar," HDFC Securities Deputy Head Retail Research, Devarsh Vakil said.

# More industry-friendly reforms in mining sector very shortly: Pralhad Joshi

**New Delhi:** Mines Minister Pralhad Joshi on Tuesday said the Government will come out with more industry-friendly reforms in the mining sector very shortly. "More industry-friendly, productive friendly reforms will be brought to the mining sector very shortly," Joshi said during a webinar on "Indian Mining Industry: Contribution Towards Aatmanirbhar Bharat" organised by FICCI. "At this juncture I would also like to urge the industry stalwarts and stake-

holders to share their insights as to how collectively we can collaborate and innovate to make this sector self-reliant," he said. The minister also invited investors, explorers and miners to come and explore the huge opportunities that the Indian mining sector offers. The minister said that other issues like illegal mining, environment clearance and forest clearance will be deliberated and suitable action as per the law will be taken in the due course of time. **PTI**

# ₹1-lakh cr Agri Infra Fund to be crucial in enhancing farm sector share in GDP: Farmers' body

**PTI ■ NEW DELHI**  
The Rs 1-lakh crore Agriculture Infrastructure Fund launched by the Government will be crucial in enhancing contribution of the agriculture sector to the country's GDP, especially at a time when it is expected to add to economic stability amid the coronavirus-induced slowdown, according to farmers' body FAIFA. The Federation of All India Farmer Associations (FAIFA) said the fund will be important for farmers, agri-entrepreneurs, start-ups, agri-

tech players and farmer groups looking to boost the country's agriculture infrastructure. The federation claims to represent farmers and farm workers of commercial crops across Andhra Pradesh, Telangana, Karnataka and Gujarat. "Agriculture currently contributes to over 14 per cent of the national GDP and provides livelihood to over 40 per cent of the nation's workforce. In 2020-21, its contribution towards economic stability is expected to be even higher amid the COVID-19-induced economic slowdown,"

FAIFA said in a statement. This fund will be crucial for farmers, agri-entrepreneurs, start-ups, agri-tech players and farmer groups looking to boost the country's agriculture infrastructure, it added. "It will also allow the agriculture sector to help enhance its contributions to the GDP, improve balance of trade, stimulate greater export potential of the farm sector and ensure a stable and prosperous life for farmers by increasing incomes," the farmers' body said.

# CII calls for early FTP to raise India's global export share to 5 pc

**PTI ■ NEW DELHI**  
Industry body CII on Tuesday asked the Government to come out with new foreign trade policy at the earliest in view of the Covid-19 outbreak to increase India's shares in the global merchandise exports to 5 per cent by 2025. The Confederation of Indian Industry (CII) has also outlined a 10-point agenda for increasing India's exports of goods and services in line with the prime minister's vision of an "Aatmanirbhar Bharat". For developing international competitiveness, key suggestions by CII include re-examining FTAs and tariff structure with an aggressive market-seeking approach, and build India brand and undertake market promotion in key markets.

The CII report, titled 'Re-orienting India's Export Endeavour in the Covid-19 World', states India must aim to achieve 5 per cent share in world merchandise exports and 7 per cent in services exports by 2025. India's share in global merchandise exports is 1.67 per cent, with a low share in top globally traded items. In services, it enjoys 3.54 per cent share. The onset of the COVID-19 outbreak that led to a global trade slowdown, affected Indian exports substantially, and led to a drop in Indian

exports by 35 per cent in March, 60 per cent in April, and 36.5 per cent in May 2020. Outlining 10 areas where action is required to boost exports, the chamber said an open and facilitative import environment is required to attract global companies and ensure competitive access to intermediate goods. In general, higher duties on finished goods and lower duties on intermediates should be applied. CII Director General Chandrajit Banerjee said the pandemic situation has impacted world trade negatively. However, it also provides a big opportunity for India to better engage with the world and boost its export performance. This is an opportune time for India to strengthen its domestic manufacturing through a strong partnership between the government and industry, he said. "As more and more countries are looking at realigning their trading strategies and diversifying their import sources post the COVID-19 outbreak, India must leverage the present situation to emerge as an alternative destination for sourcing cost-effective, quality products", stated Banerjee.

Greater Noida Chief Executive Officer Narendra Bhooshan on Tuesday made a surprise public hearing. The hearing was a surprise inspection. All protocols of Covid-19 was followed. Officers concerned were ordered for immediate redressal of the problems by talking to the present allottees/residents themselves. Sachin Kumar Singh, Special Officer was also present at the time of the said inspection

# Mankind Pharma ties up with South Korean co for clinical trials of Covid-19 drug

**PTI ■ NEW DELHI**  
Mankind Pharma on Tuesday said it has collaborated with South Korean firm Daewoong Pharmaceutical Co for conducting phase-I clinical trial of a novel formulation of Niclosamide for the treatment of Covid-19 patients in India. The trial is designed towards addressing the need for an investigation on this new formulation based on encouraging preclinical evidence for the treatment of Covid-19, Mankind Pharma said in a

statement. "We are excited to collaborate with Daewoong Pharmaceutical Co Ltd to bring novel formulation of Niclosamide (DWRX2003) for the treatment of Covid-19 patients in India. "We believe that the product would provide for a safe and effective alternative to patients suffering from this disease," Mankind Pharma COO Arjun Juneja said. Both the companies have received approval from the Drugs Controller General of India (DCGI) to conduct phase-I clinical trials.

# BITDA Revenue at ₹379 cr, PAT at ₹65 cr

**Gurugram:** RITES total standalone revenue has decreased by 33.9% to ₹366 crore on account of lessexports scheduled for the quarter and impact of restrictions & supply chain disruptions due to pandemic. Similarly, operating revenue, excluding other income, stands at ₹323 crore in Q1FY21 against ₹519 crore in Q1FY20. EBITDA and PAT stand at ₹94 crore and ₹60 crore against ₹151 crore and ₹93 crore, respectively, in Q1FY20. After making adjustment for one-time expenditure on CSR of ₹9.92 crore and donations (PM-CARES Fund) of ₹7 crore, EBITDA and PAT stand at ₹111 crore and ₹75 crore, respectively, with improved margins of 30.4% and 20.6% against 27.3% and 16.8% in Q1FY20, respectively.

**Highlights for Q1FY21 Consolidated Financials**  
1) Total Revenue stands at ₹379 crore against ₹573 crore in Q1FY20  
2) EBITDA stands at ₹121 crore with margin of 31.9% against ₹167 crore in Q1FY20  
3) Profit After Tax stands at ₹65 crore with margin of 17.1% against ₹102 crore in Q1FY20  
**Highlights for Q1FY21 Standalone Financials**  
1) Total Revenue stands at ₹366 crore against ₹553 crore in Q1FY20  
2) EBITDA stands at ₹111 crore with margin of 30.4% against ₹151 crore in Q1FY20  
3) Profit After Tax stands at ₹60 crore with margin of 16.4% against ₹93 crore in Q1FY20.

# POWERGRID posts Profit After Tax of ₹2,048 crore for Q1FY21

**Total Income rises by 5% to ₹9,817 crore**  
**New Delhi:** Power Grid Corporation of India Limited (POWERGRID), a 'Maharatna' Company under Ministry of Power, GoI and the 'Central Transmission Utility (CTU)' of the country, has posted a Profit After Tax of ₹2,048 crore and Total Income of ₹9,817 crore on consolidated basis for Q1FY21. On standalone basis, the Company posted Profit After Tax and Total Income of ₹1,979 crore and ₹9,620 crore respectively for Q1FY21. During the

quarter, the Company recognized as an exceptional item, the one-time consolidated rebate of ₹1,075 crore to DISCOMs / Power Departments of the States and Union Territories for passing on to the end-consumers on account of Covid-19 pandemic against the billing of Apr'20 & May'20. Excluding the impact of this one-time rebate, the Company's profit increased by 18% over the corresponding period of FY2019-20 on standalone basis. For the quarter, the Company incurred a Capital Expenditure of about ₹1,906 crore and capitalized assets worth ₹1,184 crore (excluding FERV) on consolidated basis.

# SKILLS THAT MATTER

The ability to innovate and provide effective solutions for unanticipated problems is an important skill that a management graduate should learn, says **PROF VINAYTOSH MISHRA**

**QUOTE OF THE DAY**  
**Resolve to edge in a little reading every day, if it is but a single sentence. If you gain fifteen minutes a day, it will make itself felt at the end of the year.**  
— Horace Mann

## BTech admission rank list announced

**PNS ■ NEW DELHI**  
The SRM Institute of Science and Technology (SRMIST), has announced the SRM B.Tech Rank List for 2020 admissions. In the light of the ongoing pandemic, the SRMJEEE which determines entry into the much sought after engineering degree programmes, was cancelled this year, and replaced with rankings based on +2/pre-university/equivalent marks in PCM/PCB submitted by the candidate. A total of 1.36 lakh candidates from across India and overseas had applied for admission to SRM B.Tech 2020. The top 10 rankers represent the student diversity of SRM, and come from diverse backgrounds across India: Ekkaluri Rishitha, Andhra Pradesh; R Sanjay, Karnataka; Abhinav Tripathi, Rajasthan; Dharshin Balakrishnan, Tamil Nadu; Shivam Kumar, Bihar; Arun Martin, Kerala; Ajay Parmar, Madhya Pradesh; Rudr Kesar, Jammu and Kashmir; Mayank Singh, Uttar Pradesh and Hil Savani, Gujarat, emerged as toppers in the all India Top 10 Rank list. On enrolment, top 100 rank holders will be awarded Founder's Scholarship with 100 per cent tuition and hostel fee waiver. The top 101 to 500 rank holders will be awarded SRM Merit Scholarship with 100 per cent tuition fee waiver. The university also offers an incredible range of scholarship to the tune of ₹40 crores benefiting 3200+ students every year, making studying in the university affordable to all. The next step in the admission process is the rankings along with the allocated branch will be sent to the candidates registered email ID.

## Educational toys are here

**PNS ■ NEW DELHI**  
In times like these, when kids cannot step out of their homes, it's very difficult to keep them engaged. Most of the parents are concerned about the increased screen time for their children. But what if that screen time can be made hands-on and educational? Now with PlayShifu's Augmented Reality based educational toys, children can sharpen their skills, learn, and play, all at the same time! Orboot Earth is a one-of-its-kind Augmented Reality globe that transforms your tablet or smartphone into a magical gateway. Travel to any corner of the world and explore thousands of undiscovered trivia. Scan the globe to catch world's wonders pop up in 3D, interact with them, and hear their enchanting stories. Explore wildlife, landmarks, cultures, cuisines, and inventions of various countries. The globe doesn't have borders or names but the Orboot Earth app has detailed information with maps. It sensitises young minds to cultures and people around the world. Built for ever-curious kids, it sparks their imagination. It helps children with geography, world knowledge, environmental science, social science that in turn develop STEAM skills. Encouraging hands-on play, Orboot Earth's world tour comes with a travel kit — passport, stamp, and lots of stickers for the little globetrotter.

**The first skill a management graduate should learn is to prioritise the tasks. Smaller short-term benefit providing tasks need to be jettisoned paving way for larger projects and long-term objectives**

healthcare and education are being delivered. The present approach adopted focusses on physical distancing and digital proximity (PDDP) as a result, online shopping of the essential supplies is at an all-time high. Now businesses should innovate to pave the way for service delivery similar or better than traditional service delivery. The ability to innovate and provide effective solutions for unanticipated problems should be the fourth skill a management graduate should learn.

The prevailing tension between India and China has resulted in escalated anger in India. The people are calling for boycotting Chinese products. The Government has banned 59 mobile apps citing security concerns as a reason behind the move. If your business is dependent on the raw materials from China, your supply chain is at risk. Hence, maintaining the balance between global and local should be the fifth skill a B-School graduate should acquire.

Leadership matters, and a manager should demonstrate these skills during tough times. Gone are the days of managers barking orders and expecting employees to dutifully abide. Accountability, responsibility,

and transparency are on the rise in the business world. The manager is required to be sensitive, compassionate and demonstrate self-awareness. Thus, Leadership is the sixth skill; I would recommend a manager to learn in a B-School, if at all it could be taught.

A manager should learn to perform a stress test of the organisation, in expectation of a sudden outbreak of calamities like COVID-19. The manager should have the knowledge and desired sensitivity to anticipate the different risks an organisation could face.

They should also have the ability to prepare the risk mitigation strategy for these identified risks. Thus, managing the risk is the seventh skill a manager should acquire.

Finally, it is difficult to predict the future with certainty, but we can acquire the above mentioned skills to be better prepared for the challenges. The future doesn't always unfold as per our plan, thus, lamenting about the past is futile. Henceforth, living in the present, and preparing for the future should be the new mantra of the current times.

The writer is Assistant Professor, FORE School of Management, New Delhi

We are witnessing unprecedented times in our lives. The COVID-19 outbreak has completely changed the way we know it. The people have been forced to remain locked in their homes for months, and it has affected their physical and mental health. Millions have lost their jobs and the unemployment rate is at an all-time high in countries from India to the USA. Historic events such as the COVID-19 outbreak, will have a lasting effect on humanity, and this unique time of pandemic will leave us with many lessons to learn in life and management of businesses. The seven management skills that must be taught in B-Schools to make budding managers better equipped to face challenges affecting businesses, during a pandemic.

The first skill they should learn is to prioritise the tasks. Smaller short-term benefit providing tasks need to be jettisoned paving the way for larger projects and long-term objectives. They should be taught that, if things are not going their way not to lose heart and trying while keeping eye on the larger goals. way not to lose heart and trying while keeping eye on the larger goals.

Heraclitus, the Greek philosopher maintained that change is the only constant in nature. The biggest lesson COVID-19 has taught is that life is full of uncertainties and one needs to be prepared to deal with them. We need to fortify ourselves with new technologies, keep ourselves updated, and identify different goals. Thus the second must have skill a management graduate should acquire is change management.

Suddenly, we have started hearing about the Spanish Flu and how it affected mankind. We are also witnessing how the experience from the past of managing a different strain of coronavirus made South Korea better armed to tackle the COVID-19. This pandemic will provide us with many exemplary case studies on how businesses failed or succeeded in this pandemic. The management students should develop a keen eye and learn a lesson or two from such examples which will give them a hint on what the future holds for them.

To manage unforeseen situations organisations, need to innovate fast. As we have seen, the learning curve for digital technologies has drastically reduced. The pandemic has changed the way essential services like

## Make way for intelligent engineers

With COVID-19 pandemic, work and workplaces are undergoing a tectonic change. The post Coronavirus world will be in need of skilled engineers who are equipped with the knowledge of AI, ML and RPA, says **DR SG GOPALAKRISHNA**

Engineering education in India has been at the forefront to create engineering leaders in multi-disciplinary fields like chemical engineering, mechanical engineering etc. With time the teaching pedagogy at engineering institutes along with curriculum have evolved dynamically. Earlier the focus was much more on theoretical learning. Now, an integrated approach towards following work-based learning, multidisciplinary programs in emerging courses and a shift towards outward facing engineering courses is being followed.

The pandemic situation in the country has shown that technology has been a huge enabler in times of crises. With the COVID-19 pandemic clouding the world, work and workplaces are also undergoing a tectonic change. The post COVID world will be in need of skilled engineers who are equipped with the knowledge of emerging technologies like Artificial Intelligence, Machine Learning and Robotic Process Automation.

In general, experts believe that industrial automation, manufacturing industries will see a sharp rise with the unlocking procedure in the country. MSME and young startups are also expected to pick up. As e-consumers are already shifting to e-commerce platforms and are becoming dependent on it. This means, such players will need professionals to handle humongous

data to understand consumer behaviour patterns, buying behaviour etc. Here arises the need of data science and data analytics, because when such data is on the web, the need for various forecast and predictions also emerge.

Following are some of the ways in which AI will revolutionise the career journey for engineers in the post COVID world:

**Healthcare and AI:** As healthcare professionals are working day in and day out to come up with a vaccine that can help the world get back on its feet, AI is a key enabler in this sector. As costs continue to swell in the healthcare industry, cost savings are also crucial. AI plays an important role in medical research. As the government is keen on medical research and the environment is conducive, hospital research,

robotic surgeries are some domains where AI can be used.

**AI in retail and supply chain:** With the unlocking procedure in the country, factories are now under the mounting pressure of cutting costs and increased efficiency in production. The sudden lockdown has also compelled the retail industry to strengthen their supply chain and logistics. Starting from integrating their CRM tool with AI to post sale customer service, everything can be driven through AI.

**AI in Industrial Automation:** The evolution of new computing technologies and artificial intelligence, industrial automation has become more than just a buzzword. For manufacturing companies, it is essential to come out of their traditional technologies and make

changes in their manufacturing processes for eg: re-programming or re-tooling the application. Such industries can optimize scheduling, operator productivity and help in gaining production visibility.

**AI in Agriculture:** Companies are developing autonomous robots for essential tasks like harvesting. Predictive analytics is being used to develop and track different environmental conditions suitable for crops, service of agricultural machinery, crop yield and weather conditions.

**AI in Construction and Real Estate:** AI is used in real estate projects to predict cost overruns. Machine learning and AI are used to scrutinise the data and forecast cost based on size of the project, types of contractors, skills and competence level of workforce. It also helps to envision the start and end date of the project.

We can foresee a world post Covid with tremendous changes and opportunities as well. Organisations are already adapting to the new normal and transforming digitally. The engineering talent with skills and different competencies in such emerging technology will help organisations drive through the new normal. A broad understanding of emerging technologies like AI will enable them to create, innovate and collaborate.

## Detailed analysis of IPMAT 2020

The overall level of the exam was easy and the cut-offs are expected to be on the higher side, says **ANKIT KAPOOR**

After getting postponed many times due to the on-going pandemic IIM Rohtak conducted its Integrated Program in Management Aptitude Test (IPMAT) on July 20, 2020 in a Google form format for its five-year Integrated Programme. Being conducted for the second time this came as a surprise as the exam was conducted through Google form.

While the structure of the paper was changed this year, various guidelines were also issued by the prestigious institute in different forms including the exam to be conducted as an open book exam through Google sheets with weightage being given to the past academics.

Being an MCQ based aptitude test, the questions from last year's pattern were reduced to 60 to be solved within 45 minutes, with 20 questions each in Quantitative techniques, Logical Reasoning and Verbal Ability sections. The marking scheme was that each correct answer will get you 4 marks and each incorrect attempt would get you a penalty of 1 mark.

The difficulty level of the paper was more or less on similar lines of 2019, but overall, it was easy. While many students faced technical glitches and complaints regarding submission of the paper, still the paper was conducted smoothly with some minor delay of 10 to 15 minutes.

The overall level of the exam was easy and the cut-offs are anticipated to be on the higher side. The detailed analysis of each section shows that the quantitative techniques' section had

moderate level of difficulty while no questions were asked from higher maths. And a student could easily attempt 13 to 14 questions. While the Logical reasoning section was easy, with only a set of two question being little confusing and 16-17 questions can be considered as a good attempt in this section. One question from the topic 'Dice' was incomplete as the figure required to solve the question was missing.

The Verbal Ability section was again very easy following the footsteps of last year's exam. The questions were direct. There were few questions that were ambiguous, but overall an attempt of 15-16 questions was good.

Post the Aptitude test there was a break of 15 minutes, and the students

were then required to write essays on the topics provided as part of the Written Ability Test (WAT). This too was changed this year. The students were given 30 minutes and they were supposed to write on two topics, namely 'Post COVID World' and 'What does being successful mean to you?' Both the topics according to the students were easy and they could write their thoughts in the given time.

Candidates will be shortlisted for Personal Interview on the basis of their performance in the exam which will consist (Entrance Test, WAT, and past academic record).

## Webinar on new education policy

**PNS ■ NEW DELHI**  
The All India Technical and Management Council (AITMC) has organised a webinar on the New Education Policy (NEP) which has recently been released by the Government. The impact of the New Education Policy on higher education and the possibilities of skill development were discussed in the webinar.

Aman Mittal (Additional Director, Lovely Professional University), Dr Pramod Pampatwar (Founder Director, VNIT Alumni Association), Preet Sindhu Sihag (CEO, AITMC) and Smt. RajniJhulka (Advisor & Strategist,

STEAM) were present as the key speakers. Brijesh Srivastav, producer of the programme *Aap Ki Baat* welcomed all the speakers as the moderator of the webinar. This education policy has been appreciated by all the speakers in the webinar.

Preet Sindhu Sihag (CEO, AITMC) said that this education policy will promote life-long learning. When a person becomes a life-long learner, then he is ready to deal with all the challenges coming in his/her life. This policy will not only help build educated youth but will also create empowered youth. It is very much confident about the future of our students with the introduction of this policy.

## New educational reforms in place

**PNS ■ NEW DELHI**  
In continuation of pertinent educational reforms being made of Ministry of Education, Shri Ramesh Pokhriyal 'Nishank', Education Minister launched online the Minimum Standards of Architectural Education Regulations Act, 2020 in a simple ceremony here on August 11, 2020.

Council of Architecture (COA), in a first after educational reforms, brought these reforms in Architecture after 38 years in India.

The occasion was graced by Sanjay Dhotre, Minister of State for Education, Amit Khare, Secretary Education, senior officials of Ministry of Education, Ar Habeeb Khan, President Council of Architecture, Sapna, VP, COA, RK Oberoi, Registrar, COA, Heads of Architectural Institutions, Executive Members of COA and other officials & members of the Council.

Pokhriyal reminded about the unique historical and architectural beauty of India. He focused on the monuments and temples that put India in leader-

ship position in the world and further said that COA should take inspiration from the present and past treasure of Architecture and bring a paradigm shift in the field of Architecture to make India a leader again.

Sanjay Dhotare also emphasised on the role of architectural and said that Architecture is in built in the history and culture of India and he appreciated the initiative of COA to bring up these reforms which the new generation of Architecture should take as a challenge to turn around the culture and heritage of India.

Khare, Secretary Education appreciated the initiative of COA. The role of Shri RK Oberoi, Registrar, COA was highly appreciated for being instrumental in bringing these Regulations to the light.

Earlier the Education Minister Pokhriyal appreciated the work of Ar Habeeb Khan President of the Council and also asked the young architects to take a leap in the field of Architecture.

The programme concluded with a vote of thanks by Sapna, Vice President of the Council.

## JKLU unveils virtual lab

**PNS ■ NEW DELHI**  
In the times of COVID-19 pandemic when the education has become online and the future of education completely depends upon experiential learning, JK LakshmiPat University, in collaboration with All India Management Association (AIMA), on July 30, 2020 unveiled the first-ever virtual lab for management students for business stimulation exercises in Jaipur. Dr RL Raina, VC, JKLU, mentioned that the BizLab will expose students to real economic, environmental and business issues related to finance, operations, marketing and other business functions and that with the support of AIMA, it can develop and evolve as the most effective learning tool for management.

# Take a flying leap

The drone market size in the country is estimated to grow at a CAGR of 18% by 2023, creating jobs in various industries offering a plethora of lucrative options, says ARVIND BALI

Isn't the concept of machine flying sound amazing? Constant innovations in technology are growing at a fast pace, playing a great role in transforming our lives. Yes, we are talking about eye in the sky technology that has been increasingly adopted for different purposes across various industries. Drones, also known as Unmanned Aerial Vehicles (UAVs) are equipped with state-of-the-art remote control systems, GPS, HD cameras, and autopilot functions. Also referred to as a ground cockpit, drones are controlled by remote ground control systems (GSC).

The technique has emerged as a boon during the Corona pandemic. States like Gujarat, Telangana, Maharashtra have used the drone for different purposes during Lockdown, whether for monitoring an area, sanitising or thermal scanning, it has proved to be an excellent technique in all places. In view of this, there is a great possibility of increasing its utility in future.

From real estate to construction, agriculture to logistics, and wind energy to defense industries, drones have entered many major markets and are benefiting them to a great extent. The telecom industry is one of the recent industries being revolutionised by UAVs. Drones offer an ideal tower inspection solution to the telecom companies through visual analysis and aid in digitising assets for tower companies.

**MARKET SIZE**

The UAV market in the coun-

try has grown over a period of time. According to the 6Wreserach consulting firm, the drone market size is estimated to grow at a CAGR of 18 per cent by 2023. Drones are at the forefront of the new-age generation technological shift and so, many big corporate companies are investing heavily in the drone space.

The association for Unmanned Vehicle Systems International predicts that there will be more than 100 new jobs in unmanned aircraft and drone technology by 2025, and the global market for commercial applications of drone technology is expected to reach \$127 billion by 2020. New drone jobs will be created across a wide span of industries. In a recent report, FICCI and EY projected that the value of the Indian UAV industry and the market would be around \$885.7 million by 2021. The widening possibilities for which UAVs can be used thanks to their flexible and rapidly evolving software and hardware, has led to their employment in a variety of fields.

**JOB OPPORTUNITY**

Drone technology makes it easier to capture visual information and utilise data through enhanced computer models. UAVs offer a great market opportunity for equip-

**Drone technique has emerged as a boon during the pandemic. Many States have used drones for different purposes during lockdown like monitoring an area, sanitising or thermal scanning**

ment manufacturers, investors, and business service providers.

Employment opportunity area would be passive infrastructure (ground, training center), active infrastructure (hardware and software), drone services and maintenance (customer support, call centers), data drone collection and processing, pilot/operator, engineer, link engineer, and some sectors which are connected to the drone. Things are getting automated which is changing the existing job profiles and leading to upskilling. Many of the things which required human intervention are now getting automated. At the same time, new types of jobs are emerging.

**SKILLS**

In view of future employment prospects and career opportunities, Telecom Sector Skill Council formed under the aegis of the Ministry of Skill Development and Entrepreneurship (MSDE) is in the process of designing a curriculum related to drone technology. Low-level to high-level skills will be required in the field of UAV technology. However, skill gaps exist among the workforce and there is a need to fill that gap. Different modules are being worked on by the council to reduce the skill gap so

that youth can become skilled and able to get employment in the industry.

Recently, the Director-General of Civil Aviation (DGCA) has issued draft guidelines on UAS through a circular titled *Requirements for Operation of Civil Remotely Piloted Aircraft System (RPAS)*. The UAV ecosystem within India is currently host to only a handful of companies that are manufacturing and catering to the consumers.

These companies are also concerned about the ongoing discussions on UAS regulations and the fact that they may not be able to meet the market demands.

In the next few years, the country will be the largest importer of drones worldwide. It will also leave many countries behind in terms of usage. Drones have now started being used in industries on large scales. This aerial vehicle will replace the need for manpower and will create new opportunities. These jobs will not only be in the form of remote pilots, but there will also be a dire need of skilled people on the front like drone engineering, operations, monitoring, sales, and marketing.

The writer is Acting CEO, Telecom Sector Skill Council

# 'Social commerce can help women'

For women looking for business without investment, social commerce within the food industry is an ideal solution, says VARUN KHURANA

Social commerce is not a new concept in the country major chunk of social commerce existed only in the fashion, beauty, and retail industries. Today, social commerce is gaining popularity for one of the fundamental aspects of life—fresh food.

A \$200 billion fresh produce category is now witnessing major disruption through social commerce. It is garnering the attention of consumer, entrepreneurs, and investors. In fact, consumers are increasingly preferring their food sourced through social commerce for various reasons such as higher credibility, rational price and most importantly, fresher produce (delivered within a day). For women looking to be a part of the business environment without monetary investment, social commerce within the food category is the ideal solution. Let us take a look at how social commerce is playing a key role in helping women make it big in business.

Increasing Internet penetration and social media usage have paved the way for the rise of social commerce. A majority of the population today uses and is in fact hooked onto social media and brands are leveraging this aspect. With the rise in demand for fresh produce, women are joining hands with brands to become resellers within their community to make a mark for themselves in their community by leveraging social commerce. At present, fresh produce is a supply-led model and social commerce is flipping it to demand-led model that further helps in solving the problem of middlemen and wastage. Apart from this, it helps resellers connect with their customers efficiently and offer real-time feedback to the farmers regarding the quality of the produce.

For the first time, women are taking the centrestage in spurring the adoption of e-commerce and helping the industry as well as themselves progress. The advent of technology, rapid digitisation of businesses, and easy access have helped drive this change. For women sellers, a slew of features aided by cutting-edge tech-

Varun Khurana  
Founder, Otity

nology such as voice chats/chatbots, real-time updates and feedback to the farmers, and most importantly, WhatsApp-based marketing is coming handy to open more doors to become micro-entrepreneurs.

Women sellers also have a higher average order value, better retention and repeat orders, making them more suitable. In fact, not just urban cities, but women resellers hail from tier-II and tier-III catchment areas are hopping on the fresh produce social commerce bandwagon to fulfill their goals and achieve financial independence with almost no investment. A whopping 68% of women in most platforms sell from tier-II and tier-III cities.

They also help customers gain trust for unbranded products since they usually tend to lean towards known/established brands. In return, social commerce platforms offer easy access for women to build an entrepreneurial empire of their own through community engagement without hindrances.

Social commerce is quickly becoming a multi-million-dollar market in India. With technological advancements, greater digitisation and the availability of regional languages providing easy access and seamless experience, the rise of women entrepreneurs through social commerce is inevitable.

Management students study multiple topics in the domains of business and management and hence are better equipped to handle various crisis situations including a pandemic like COVID-19. The students acquire the required knowledge, skills, and competencies and become adept at the case analyses and problem-solving in response to some real-world problems.

The management students can tackle the crisis after COVID-19 in the following ways:

**Healthcare:** The management students can sensitise the people about the various dos and don'ts to the citizens and enable them with the required knowledge, skills and competencies and preventive measures to avoid the deadly pandemic of COVID-19.

**Education:** The management students

can sensitise about the various apps and technologies to the children and their parents to enable them to maximize productivity in the process of online teaching, learning, and assessment. This will make the child and their parents more familiar with the software, platform, or app, and hence the outcomes of academic delivery will improve.

**Entrepreneurship:** The management students can enable the young and budding entrepreneurs by giving them training or assistance. The management students can guide the entrepreneurs from the small and medium enterprises sector by giving them knowledge or assistance in making the business plan.

**Hospitality management:** The management students can reinforce the

## MINDIT

importance of hygiene and other allied aspects to the employees working in the Hospitality sector.

**Facilities management:** The students can focus on getting the whole area sanitised by the latest machines/gadgets by including the right chemicals mixed in water in the right proportions.

**Implementation of preventive strategies:** The students can implement the various preventive strategies like lockdown, measurement of temperature of all the incoming and outgoing guests by using the thermal infrared scanner, wearing of masks,

usage of sanitizers, stoppage of people coming from COVID infected areas, etc.

**Design management:** The students can work in collaboration with the students of fashion design to focus on producing low-cost masks with better user experience. They can also focus on innovative dress designing for the protection of Doctors, Nurses etc.

**Sanitisers:** The students can procure the materials used in the process of preparing the sanitisers and prepare them in small packing materials at an affordable cost for the residents of the society.

**Lifestyle management:** The students

can sensitise the residents about the various aspects of lifestyle management so that the residents are able to raise their immunity and avoid falling sick.

**Diet management:** The management students can inform the people around about the importance of diet management. They can also give them the recommended diet according to the region, season and availability of fruits and vegetables.

**Logistics planning and management:** The students can work for the logistics planning and management so that the patient can be quarantined on a fast track basis in case someone is diagnosed with COVID 19.

**Quarantine management:** The management students can get the quarantine management done in a professional manner

so that the disease does not spread to other parts of society.

**Supply chain management:** The students can coordinate with various suppliers and vendors to ensure the supply of eatables and other necessary items to all the residents of the society.

**People management:** Students can convince people about avoiding unwanted travel for unwanted reasons.

**Social distancing management:** The management students can come together and sensitise the residents about social distancing. They can also mark the squares and circles with marking paint/chemicals and bring the behavioural change in the residents.

**The University of Calgary invites applications for its International Entrance Scholarship.** Students entering the first year in any undergraduate degree in the upcoming fall term are invited to apply for the scheme.

**Award:** \$15,000  
**Nationality:** Anyone can apply

**Eligibility:** Must be an international student entering the first year in any undergraduate degree in the upcoming fall term. Must have satisfied the university's English Language Proficiency requirement.

Renewable in the second, third, and fourth year at the University of Calgary, provided recipients to achieve a GPA of 2.60 or more over a minimum of 24.00 units in the previous fall and winter terms. Pre-qualification degree, copies of academic transcripts, certificates of English language proficiency, a statement, and a copy of passport.

**Admission requirements:** Applicants who possess a high school diploma can take part in an undergraduate degree course at the University of Illinois Springfield.

**Language requirement:** Entrants whose native language is not English will have to submit an official score report from the TOEFL or IELTS.

**How to apply:** Applicants will be eligible to apply for this application programme if their application for admission in an undergraduate programme has been accepted successfully.

**Application deadline:** The last date to apply for this scholarship is December 1, 2020.

**STUDY ABROAD**

## Online to on-campus pathway is way forward

The University of Canterbury, New Zealand is offering online programmes for one semester for students to continue their studies

With the New Zealand border currently closed to non-New Zealand citizens and residents, University of

Canterbury, New Zealand (NZ) is pleased to confirm that students outside of NZ will be able to start a range of programmes in 2020 in an online to on-campus pathway. This pathway will enable students to complete one semester of study online and then come to UC to continue your studies when the NZ border reopens to international students.

The online to on-campus pathway allows you to get started with your studies now, and still continue to be able to benefit from a truly international education and experience.

If you are eager to get ahead in your higher education, then starting your studies online is your best choice right now. Given the present global conditions, studying online is a viable way to

begin your international education journey, and is a stepping stone to achieving a world-class qualification. Online study will also allow you to stay at home for a little longer, which is comforting in these times of uncertainty. Plus, you will save money on living expenses and be able to delay travel until a safer time.

The UC has changed the way we charge tuition fees for this pathway, allowing you to try out online learning before you need to pay the tuition fees. The aim is to give you a sense of how it all works and to decide if online learning personally works for you, without any financial risk.

Your tuition fees won't be due until seven weeks after you have begun your online study.

If you have already paid your tuition fees to UC, you will be able to withdraw from your online studies with a full refund up until these dates. We want to offer a chance to get comfortable with online learning, before you are required to make any financial commitment. If you find online learning is not suitable, you can choose to defer your offer and start again whenever you are able to arrive on campus.

**IN BRIEF**

**ATAL BIHARI VAJPAYEE HINDI UNIVERSITY SIGNS MOU**

The Atal Bihari Vajpayee Hindi University, Bhopal has signed a MoU with First Aid Council of India. The objective is to educate the students of urban and rural areas who are unable to take education due to lack of resources, provide them employment oriented courses and increase literacy rate. Under this, Atal Bihari Vajpayee Hindi University and FACI will open study centres or extension centres in Madhya Pradesh. This is a great initiative to increase the employment and self-employment. Through these study centres the university and the First Aid Council of India are going to start a one-year First

Aid Specialist Diploma Course, Naturopathy and Yogic Science Diploma Course and Ayurvedic Pharma Diploma Course for students. Scholarships will also be provided to students by the university as per rules of Madhya Pradesh government. By completing this diploma, the candidate will also be able to open their own first aid centres.

Along with diploma courses, a number of certificate courses will also be conducted in this study centres like Ayurveda and Medicine, Unani and Medicine, Homeopathic Pharmacy, Alternative Medicine and Medical Acupuncture and Naturopathic.

**55% INDIANS HAVE FACED NEPOTISM IN THEIR CAREER**

Based on a recent poll conducted by Inshorts, 80% Indians believe that nepotism i.e. use of power in order to get jobs and other benefits for your family or friends over others isn't a good practice. 55% of these participants, at some point, have faced nepotism in their careers. Additionally, 51%

participants believe that it is not only Bollywood that faces nepotism. 58% believe that it can be controlled or reduced and 62% participants will not consider taking a job/promotion by taking a favour from a friend or relative in power. The poll was conducted as a part of the Inshorts Pulse of the

nation poll. More than two lakh app users responded. Nepotism has been a topic of debate since quite long - and it is quite common for people to use their contacts to get a job, internship or a break in career. Be it Bollywood, politics or any other industry, the discussion of merit vs privilege cannot be silenced anymore.

**A COURSE ON BIOMIMICRY BY IIT MADRAS**

The Indian Institute of Technology Madras is all set to offer a full semester, one-of-its-kind course under the interdisciplinary stream on Biomimicry. As the name suggests is to imitate or look at Nature as a source of inspiration to solve complex problems. It is the intersection of

biology and engineering. You do not have to be either a biologist or an engineer to learn biomimicry, all you need is curiosity. The course has potential not only in engineering, technology and design, but also in areas like management, human resources,

administration, social sciences and the arts. School children can benefit from learning biomimicry and can lead to not just innovating from Nature but also creating a sustainable way of life.

SINGLES

**KUBO JOINS VILLARREAL ON LOAN**  
**MADRID:** Villarreal have signed Japanese playmaker Takefusa Kubo on loan from Real Madrid for 2020-2021 season. The 19-year old impressed last season in his debut campaign in the top-flight on loan at Real Mallorca although was unable to prevent the team from being relegated a year after winning promotion.

**KUZNETSOVA WITHDRAWS FROM US OPEN**  
**MOSCOW:** Former US Open champion Svetlana Kuznetsova has joined a growing list of players who have decided not to play in this year's tournament due to concerns over the Covid-19 pandemic. The Russian world number 32 on Monday announced her decision on Instagram where she also said she would skip the Western & Southern Open which is being held in New York this year instead of Cincinnati as a lead-up to the Aug 31-Sept 13 US Open.

**TSIMIKAS JOINS LIVERPOOL FROM OLYMPIAKOS**  
**LIVERPOOL:** Premier League champions Liverpool signed Greece defender Kostas Tsimikas from Olympiakos for a reported fee of £11.7 million (\$15 million) on Monday. Tsimikas agreed a five-year contract with Liverpool and is expected to provide back-up for first choice left-back Andy Robertson at Anfield.

**LAWRENCE EXITS BIO-SECURE BUBBLE**  
**SOUTHAMPTON:** Uncapped England batsman Dan Lawrence, who was one of the reserves in the ongoing Test series against Pakistan, has left the team's bio-secure bubble due to a family bereavement. "Lawrence, who has yet to make his Test debut, was named as one of the reserves in the #raiseThebat Test series against Pakistan. He will not be available for selection when the second Test starts on Thursday at the Ageas Bowl," the England and Wales Cricket Board (ECB) said in a statement.

**SABALENKA ADVANCES IN TOP SEED OPEN**  
**LEXINGTON:** World No 11 Aryna Sabalenka made a winning return at the WTA's resumption in the United States as she battled past America's Madison Brengle to enter the second round at the inaugural Top Seed Open. The No 2 seeded player from Belarus defeated Brengle 6-1, 6-7(5), 6-2 after nearly two-and-a-half hours of play on Monday. But world No 15 Johanna Konta failed to enter the second round as she lost to unseeded Czech Marie Bouzkova 6-4, 6-4.

**UTT POSTPONED INDEFINITELY**  
**NEW DELHI:** The fourth edition of Ultimate Table Tennis (UTT), scheduled in India from August 14 to 31, has been indefinitely postponed due to the Covid-19 pandemic. With sporting events yet to start in the country and the International Table Tennis Federation (ITTF) itself still not certain about the resumption of professional tour, the postponement was inevitable.

**FSDL TEAM REACHES GOA FOR INSPECTION**  
**PANJIM:** A 9-member delegation of ISL organisers, Football Sports Development Ltd (FSDL), reached Goa on Tuesday and will be there for the next few days to take stock of the venues and training ground readiness. It is expected that a final announcement of the single-site venue, where the seventh edition of the ISL is scheduled to be played, will be made by the end of this week. The team will visit the three identified playing venues (JLN Stadium in Fatorada, Tilak Maidan in Vasco and Bambolim Stadium), about 10 training grounds and have also lined up meetings with the local authorities on their agenda.

**MCA APEX COUNCIL MEETING ON AUG 14**  
**MUMBAI:** Resumption of cricketing activities in the megalopolis will top the agenda of the Mumbai Cricket Association's (MCA) Apex Council meeting to be held on August 14. Cricket in the megalopolis has come to a grinding halt since mid-March due to outbreak of Covid-19 pandemic and Mumbai is one of the worst affected cities in the country. "We will discuss resumption of cricketing activity and also the Standard Operating Procedures sent by the BCCI to all the state associations in this regard," an Apex Council member said.

Nieva seeks 7 more boxers at national camp

**PTI ■ NEW DELHI**  
 Resumption is done and expansion can now follow, said Indian boxing's High Performance Director Santiago Nieva, revealing that addition of seven more boxers has been proposed at the ongoing national training camp for the Olympic-bound in Patiala. Nine male boxers and a few of their women counterparts are training at the National Institute of Sports (NIS) in Patiala, taking the first step towards a restart amid the Covid-19 pandemic. These include world Silver-medallist and top Olympic medal hope Amit Panghal. "We are looking to add seven more boxers, two coaches and a support staff member to this list in the next few weeks. Approval has been sought (from SAI). We are assessing things one month at a time," Nieva said.

"The boxers who are here are training under the strict health safety protocol given to us and things have been smooth. I can't give you names but the ones we want included next are second in rankings of their respective categories," he said. The camp started in the first week of this month after boxers, willing to take the trip to Patiala were quarantined, tested and then allowed to enter the NIS. In between, a controversy flared up when the Olympic-bound duo of Vikas Krishan and Satish Kumar "unknowingly" broke the quarantine protocol. The two have since made Bengaluru's Inspire Institute of Sports (IIS) their training base and won't be coming back, despite getting a SAI go ahead, due to the travelling involved. "We are currently able to do 70 per cent of the things that we used to do," Nieva said of the

training regimen in Patiala. "As per the SOP (Standard Operating Procedure), we cannot enter the ring or do sparring or pad work. But we can do running, strength training, and lot of (punching) bags. That's enough for now," he added. A boxer not able to access the ring, does it feel weird? "Not as of now. May be another three-four weeks and it will begin to feel weird but what to do. We have to be patient. Like the rest of the world, we have to adjust and adapt," Nieva said. With all international competition halted for the time being and Olympics postponed to next year, Nieva said the boxers can afford to take it a bit slow. "We have enough time to get back top form. It's still one year for the Olympics, I am fine with the pace of training at this point. But it remains an evolving situation and we are all adjusting," Nieva said.

gen levels dropped on Monday. "The mens camp is in doubt after six positive results, more reports are still awaited from the state Government," a SAI source said.

Lukaku scores in ninth consecutive Europa League game to take Inter in semis; Red Devils needed extra time to beat Copenhagen

United effect

AFP ■ COLOGNE

Bruno Fernandes scored a penalty in extra time as Manchester United scraped past FC Copenhagen 1-0 on Monday in the quarter-finals of the Europa League, reshaped into an eight-team straight knockout tournament in Germany due to the coronavirus pandemic. The Portugal international notched his competition-best seventh goal of the season as United set up a semi-final clash against Sevilla or Wolves, joining Inter Milan in the last four following the Italian side's 2-1 victory over Bayer Leverkusen in Dusseldorf. "Third time this season we've been to the semis, every competition we've been in.

Delighted we've gone through, we deserved to win tonight," United manager Ole Gunnar Solskjaer told *BT Sport*. "Their keeper was fantastic, unbelievable. We hit the post a few times, there were a couple of VAR decisions against us. It could have been one of those nights that you end up with penalty shoot outs. They made it hard for us." All games from the quarter-finals onwards in this season's Europa League are being played behind closed doors as one-off ties across four venues — Cologne, Duisburg, Dusseldorf and Gelsenkirchen — in a unique format following a five-month interruption. Solskjaer recalled Fernandes, Paul Pogba, Marcus Rashford,

Sarfraz should retire from Tests: Ramiz

PTI ■ KARACHI

Former Pakistan captain Ramiz Raja believes wicket-keeper-batsman Sarfraz Ahmed should retire from Tests and focus on white ball cricket. Sarfraz, a former captain, was seen performing the duties of 12th man in the series opener between England and Pakistan in Manchester. "In my book I am clear once you have been captain and remained on a pedestal then it is very difficult to come down and be on the bench," Raja said on the Youtube channel, *Cricket Baaz*. "I would advise Sarfraz to think about it and retire from Test cricket and just focus on white ball cricket, a format in which he is very good and known for his aggression," he added. Raja, who featured in 57

Tests, said a former captain and senior player of Sarfraz's stature carrying drinks, although not rare in cricket, is frowned upon in Pakistan.

"There is nothing wrong with that because even James Anderson carried drinks when he didn't play in the second Test against West Indies. But in our cricket culture these things are not looked upon nicely and if they involve a former captain," Raja said. "I don't see him getting a chance in the Test format soon so he should focus on white ball cricket where he will play and be respected as well," he added. Raja feels the presence of Sarfraz in the squad also adds pressure on Muhammad Rizwan, who kept the wickets for Pakistan in the first Test. "He being in the Test squad also adds pressure on Muhammad Rizwan who knows there is a former captain keeper breathing down his neck and that is not good for him. I think Sarfraz should not be on the bench. He should call it a day from Test cricket."

Inaugural Lanka Premier League postponed

PTI ■ COLOMBO

Sri Lanka Cricket (SLC) has postponed the inaugural edition of the Lanka Premier League (LPL) due to unavailability of top foreign players who would have had to undergo 14-day compulsory quarantine owing to rising cases of Covid-19 in the island nation. The T20 League was scheduled to start on August 28, subject to approval from the Government and Ministry of health but the 14-day compulsory quarantine period turned out to be an issue with regards to foreign players. "We had a discussion with the health authorities and the 14 day quarantine period for anyone entering the country is compulsory. So it's difficult to play the tournament at the end of August," SLC President Shammi Silva told *NewsWire*. "We will play the tournament in mid November after IPL," Silva's information indicated that they are looking at roping in the best T20 freelancers. A total of 23 matches were scheduled in LPL which was supposed to end on September 20. According to reports, a total of 93 international cricketers, including England's World Cup-winning pacer Liam Plunkett and New Zealand seamer Tim Southee, were also listed for the tournament.

IPL teams to carry exclusive net bowlers to UAE

**NEW DELHI:** The Indian Premier League shifting its base to the United Arab Emirates for the 2020 edition may prove to be a blessing in disguise for at least 50 unheralded cricketers, who are set to travel with the eight teams as "exclusive" net bowlers. At least three franchises, Chennai Super Kings, Kolkata Knight Riders and Delhi Capitals confirmed that they are preparing a roster of net bowlers. The list comprises mostly first-class, U-19 and U-23 state level cricketers who will get to bowl to the likes of MS Dhoni, Suresh Raina, Rishabh Pant for close to a month. The convention all these years has been using local bowlers for nets apart from the junior fringe players but the strict bio-security measures for the tournament means that all franchise will have to arrange for quality bowlers during practice sessions. While BCCI has capped the squad strength (players) to 24, the franchises have not been specified contingent volume which will vary from team to team but it could be safely assumed that most of the eight sides will not avail any local net bowlers. "If all goes well, we are planning to take around 10 bowlers exclusively to UAE for the practice sessions. They will be accompanying the team and will remain till the tournament starts," Chennai Super

Kings CEO Kashi Vishwanathan said on Tuesday. The Kolkata Knight Riders also confirmed that they will also have 10 net bowlers in their roster, likely to be hand-picked by former Mumbai captain and their academy coach Abhishek Nayyar. "It will be a blend of players of who have played Ranji Trophy while some of have played U-23 and U-19 national level tournaments," someone who is privy to developments in the KKR camp informed. The Delhi Capitals are also taking around six net bowlers who will be a part of the team's "bio bubble". "They will be staying with the squad and will travel with the team for the net sessions," a franchise source said. The Rajasthan Royals are also on course to finalise the number of net bowlers they will carry. Royals as well as Royal Challengers Bangalore can fly out bowlers from their own respective academies. It is expected that there will be a healthy number of spinners in overall net bowlers' list. "On slow Dubai tracks, it will be important that teams stack up their line-up with more spinners especially for humid conditions. You will see a lot of left-arm spinners and wrist spinners who have played a decent level cricket being included apart from the pacers," the talent scout said. **PTI**

Kiwis to host Windies, Pak, Aus & B'desh in summer

PTI ■ AUCKLAND

New Zealand Cricket CEO David White on Tuesday said Pakistan, Australia, Bangladesh and the West Indies have confirmed they will tour the country during the summer. White said New Zealand Cricket (NZC) is working to implement bio-secure bubble, similar to the one the ECB is using in their ongoing season. "We are making tremendous progress. I was just on the phone to the West Indies, they're confirmed, Pakistan is confirmed, Australia and Bangladesh... So 37 days of international cricket," White was quoted as saying by *ESPNcricinfo*. White added that women's team will tour Trans-Tasman rivals Australia in September with the reverse fixture slated for February. "The White Ferns will tour Australia in September and then the Australia Women's team will tour New Zealand in February. We are just working through the content but probably five ODIs and three T20Is," White said. According to the current Future Tours programme (FTP), New Zealand are slated to host West Indies and Pakistan for a Test and T20 series each. The red-ball series being a part of the World Test Championship. Bangladesh are scheduled for ODIs and T20Is followed by Australia for T20 series.

Kohli, Paine best Test captains right now: Faiz

**NEW DELHI:** Domestic veteran and Ranji Trophy-winning skipper with Vidarbha, Faiz Fazal believes India's Virat Kohli and Australia's Tim Paine are two of the best captains in the world at the moment. In a recent interaction on *Sports Tiger's show Off the Field*, on being asked who the best captain in the world, Faiz answered, "I am a fan of Tim Paine, he is very good as a Test captain, Virat is also very good in Tests." On being asked about him not getting a call to the national team after scoring a half-century in his debut match, Faiz said, "The competition in Team India is very tight, I feel very fortunate that I played for India because that was the aim, to play for the country. Nothing can be compared with that. But I still aim to play for the Test team. But, yes, I feel disappointed that I could not continue my place in the Indian team." **PNS**

Men's hockey camp uncertain after 6 positive cases

PTI ■ NEW DELHI

The upcoming training camp for India's male hockey players in Bengaluru looks uncertain after half a dozen of them tested positive for Covid-19 but the women can resume practice after all of them tested negative for the dreaded virus. Six Indian men's team players — skipper Manpreet Singh, striker Mandeep Singh, defenders Surender Kumar, Jaskaran Singh, drag-flicker Varun Kumar and goalkeeper Krishan Bahadur Pathak — have tested positive after reaching Bengaluru for the national camp, scheduled to start on August 20. Of these, Mandeep has been hospitalised after his blood oxy-

gen levels dropped on Monday. "The women's camp is still on course after all the players tested negative. They are currently under 14-day quarantine period and the light intensity camp will begin once its over," the source added. Currently, 33 male and 24 female players are in Bengaluru for the camp. The six Covid positive men — mostly from Punjab — were part of a 10-member group that travelled together from New Delhi. According to sources close to the developments, the number could rise as all the test reports of the men's team have not yet come. The light intensity national camp was supposed to start in

Mandeep shifted to hospital

PTI ■ BENGALURU

Indian hockey team forward Mandeep Singh, who tested positive for Covid-19, has been admitted to a hospital in Bengaluru after his blood oxygen level dropped but his condition is stable, the Sports Authority of India (SAI) said on Tuesday. "During night monitoring of vitals on August 10 (Monday) it was found that Mandeep Singh's blood oxygen level was dropping below normal which

indicated that he is moving from mild to moderate severity of Covid," the SAI said in a statement. "SAI authorities on campus took an immediate decision to shift him to SS Sparsh multispecialty hospital as a precautionary measure. His condition is currently stable," added the statement. The 25-year-old has played 129 games for India and scored 60 goals so far. He was a part of the Gold-winning team at the 2018 Asian Champions Trophy. expected to continue till September 30.

Ikee to return to pool

**TOKYO:** Japanese swimming star Rikako Ikee has registered for a competition in Tokyo this month, her first since her shock diagnosis with leukaemia last year, local media reported on Tuesday. The 20-year-old was a strong favourite for 100-metre butterfly Gold at her home Olympic Games before reveal-

ing last year that she had been diagnosed with leukaemia. She was discharged from hospital in December after being hospitalised for about 10 months and resumed training in March. Public broadcaster *NHK* and *Kyodo News* said on Tuesday that Ikee has registered for a 50-metre freestyle race organised by the Tokyo Swimming Association on August 29. Ikee was also considered a contender for the Tokyo 2020 200m freestyle, but her diagnosis forced her to switch her focus to competing in the 2024 Olympics. She has not said if she plans to rethink and compete in Tokyo next year, following the postponement of the Games. **AFP**

Halep makes second round of Prague Open

**PRAGUE:** Top-seeded Simona Halep had to fight hard to advance to the second round of the Prague Open in beating unseeded Polana Herczeg 6-1, 1-6, 7-6 (3) on Tuesday. It was the first competitive match for Halep since she won the Dubai Championships in February. The Romanian will face next Czech wild card Barbora Krejickova. Second-seeded Petra Martic, who reached Palermo semis last week, overcame Varvara Gracheva 7-6 (2), 6-3 to face Kristyna Pliskova in the second round. Third-seeded Elise Mertens recovered from a second set scare to beat Jasmine Paolini 7-5, 4-6, 6-3. **AP**
