**CM gives ₹1 cr to kin of Covid warrior**

**STAFF REPORT IN NEW DELHI**

Chief Minister Arvind Kejriwal on Monday met the family of coronavirus warrior Dr Jitender Chaudhary and handed over a cheque of ₹1 crore as financial assistance.

After a month-long struggle, 27-year-old Dr Jitender Chaudhary succumbed to the deadly coronavirus in Delhi last week. Dr Chaudhary had been battling the infection since June 28 after he was tested positive.

During the COVID-19 pandemic, the doctors are treasuring their lives and are in constant fear of dying for their lives. Dr Chaudhary was one such Covid warrior. The solution was the decision to use the few remaining ventilators, oxygen concentrators and oxygen cylinders to assist the rest of the people.

Dr Chaudhary was a junior resident and worked on an ad hoc basis at the Me- dent-run Dr Baba Saheb Ambedkar Hospital and College since March 2019. He was posted as a resident doctor at Dr Baba Saheb Ambedkar Hospital and College (DBA) from November 2019.

On July 27, the national capital’s largest hospitals had more than 600 Covid-19 inpatients and 150 critical patients on ventilators, including Dr Chaudhary in one of the ICUs. On July 28, the national capital’s largest hospitals had more than 400 Covid-19 inpatients and 150 critical patients on ventilators, including Dr Chaudhary in one of the ICUs.

Meanwhile, mosquito-borne diseases like dengue have increased to 24,000 in Delhi, and 18,000 in Noida. The number of dengue cases have increased almost three times since last year, according to data released by the South Delhi Municipal Corporation (SDMC).

**AIDS**

The Dengue breeding checklist has 20,000 and 24,000 individuals from the districts of South Delhi and Noida been traced here, according to a team led by Dr Arvind Sanja, a senior medical officer.

A senior SDMC official said that all the previous steps taken have be stepped to take the case. “The key to prevention of Dengue is ensuring that stagnant water in homes andinvalid, which also does not allow the mosquitoes to breed, and therefore dengue cannot spread.”

He said that awareness had been created, standing water in Delhi was removed. A team of doctors have advised people to remove stagnant water from pools, they have asked the people to work with the SDMC. They have asked people to work with the SDMC. They have asked people to work with the SDMC.

The trekking paper is transmitted by female Anopheles mosquitoes. Whether or not a person is infected depends on the sex of the mosquito. If a female mosquito bites an infected person, the mosquito becomes infected with the virus. If a female mosquito bites an infected person, the mosquito becomes infected with the virus.

**Key findings**

6 cases solved in a day with arrest of 2 Police

The all-India team of the Delhi Police has claimed to have solved cases including an arrest and a murder case of Rahul Arora. Police said that all the preventive measures were taken to help the affected people.

The accused have been identified as Sandip Kumar and his family members. The accused were also traced here. A complaint was filed to pay the money within 25-30 days, which will be taken back, said the DCP.

The accused was booked and the investigation was taken up. The CCF said that a new complaint was received and a complaint was registered against that. The accused was then arrested by the police. The accused was then released from the possession of the accused. A case under relevant section of law was registered at Rudwah Police Station. The complaint was also not returned, said the DCP.

New Delhi/Raipur

From maintaining a distance of six feet, using a face mask, and maintaining respiratory hygiene, the Ministry of Health and Family Welfare has laid down guidelines for reopening gym and yoga centres as a part of the broader strategy to restart economic and social activity during the COVID-19 pandemic. 

According to the guidelines, those above 65 years of age, persons with co-morbidities, pregnant women and those below the age of ten years are advised not to use gym or closed spaces. 

"If you have any underlying medical conditions, it is better to avoid the gym," the ministry directed.

"Ensure availability of pulse oximeter for tracking oxygen levels in the body. Gym and yoga centres need to follow all COVID-19 protocols, especially those related to hygiene and maintaining respiratory hygiene," the ministry said.

"It also includes ensuring appropriate ventilation, ensuring social distancing by maintaining a distance of at least 1.5 meters in line, ensuring availability of an air purifier in the space, and ensuring proper emergency exits and fire safety," the ministry added.

**STAFF REPORTER**

With the spread of coronavirus pandemic, the Rajiv Gandhi Secretariat will remain closed till further orders, the Rajiv Gandhi Secretariat said in a statement.

"As per instructions issued by the Chief Minister of Chhattisgarh Government have been followed," the official said.

The secretariat was known as Dankaranya. It was the residence of Shankar Dayal Sharma, who was a liberal and a member of the Mayawati's party. He was also part of a Maoist team commander working under the leadership of Shri Ram during his exile -- with places which Lord Ram also worshipped during his exile, the government said.

"For Covid patients, the biggest in Chhattisgarh, the administrative headquarters have been suspended," an official said.

The government has also directed the staff to remain on duty.

"In the first phase, some those have been selected between the staff present in the Ramnagar in the secretariat area of Chhattisgarh," the statement said.

Those places will be developed and beautified at a cost of Rs 4.12 crores.

The 'Nabakishore' in Ramnagar district is situated at the eastern part of Chhattisgarh.

As per instructions issued by the Chief Minister of Chhattisgarh Government have been followed, the secretariat will remain closed till further orders, the Rajiv Gandhi Secretariat said in a statement.

A Long haul

As talks for pullback continue, they are just a diversion as it isn’t easy for China to give up Pangong Tso.

A

lthough the Chinese are reluctant to significantly pull back from Pangong Tso, they are still exploring their options around it, and making concessions in an attempt to defuse the tension. India must prepare for a status quo this winter as for all the diplomatic manoeuvring, a deal will be hard to come by. Nor can Promise be taken at their face value on the history of Indian diplomacy. Beijing has been seeking to solicit support for a resolution in the UN, which the Chinese have been seeking to bring to a vote. The US, which is the Chinese’s largest trading partner, has also been supportive of the Chinese position.

Golgil-Baltistan in the west (Pakistan-occupied Kashmir), where China is heavily invested in the construction of a highway, is a sensitive issue. The Chinese in this region are divided between those who are interested in enhancing its connectivity to Central Asia and those who prefer to maintain it as an integral part of their own national interest. Regardless of the outcome, it is clear that the Chinese are not willing to make any concessions to India in this regard.

China also has a significant presence in the north-eastern part of the country, including the Aksai Chin region, where it has built a large military base. The Chinese are also reportedly interested in developing the Silk Road economic corridor, which would connect the Chinese border with the Arabian Sea. This would give China access to the Indian Ocean, which is a significant part of its economic strategy. China is also interested in developing the Chabahar port in Iran, which would provide it with a gateway to the Indian Ocean.

The Chinese are also interested in developing the Chabahar port, which they see as a strategic asset. They have already invested in a railway line to the port and are reportedly planning to build a new port terminal. The Chinese are also interested in developing the port as a hub for their trade with Europe, which is a significant part of their economic strategy.

 Africat force nicks a prison near Kabul

 A prison force nicks a prison near Kabul on Monday, following an overnight attack that left at least one inmate dead, the provincial governor said.

 The attack was the latest in a series of prison breaks and violence in Afghanistan, where security forces have struggled to maintain control over the Taliban and other insurgent groups. The prison break occurred in the capital city of Kabul, according to the provincial governor.

 "My staff are still at work, but we have been unable to contact them," the governor said. "We are doing everything we can to locate them."  

 In recent months, the Taliban has launched a number of attacks targeting security forces and government installations in Afghanistan. The latest attack comes amid a surge in violence as the United States prepares to withdraw its forces from the country.

 Outreach hits Norway cruise ship, could spread along coast

 A Norwegian cruise ship has been hit by a virus outbreak, and authorities have implemented measures to contain the spread of the virus. The ship was docked in the Norwegian city of Tromsø when the outbreak was reported.

 The ship had been sailing in the Arctic region, and authorities are concerned that the virus could spread along the coast of Norway. The ship's passengers have been advised to quarantine themselves for 14 days.

 "We are taking all necessary steps to contain the outbreak and prevent its spread," said a Norwegian government official. "Our priority is the health and safety of all passengers and crew on board."  

 The ship has been sailing in the Arctic region for several days, and authorities are concerned that the virus may have spread to other ships in the region.

 ISIS storm in Af, 29 killed

 A long-running conflict in Afghanistan has claimed the lives of 29 people in a violent attack on the outskirts of Kabul. The attack, which lasted for several hours, took place near the provincial government buildings.

 "This is the worst attack we have seen in Kabul," said a local official. "We are working to provide assistance to the victims and their families."  

 The attack comes amid a surge in violence in Afghanistan, where security forces have been battling the Taliban and other insurgent groups. The attack took place in the capital city, which is still under government control.

 Space capsule and NASA crew make 1st splashdown in 45 years

 A SpaceX capsule carrying four NASA astronauts splashed down in the Gulf of Mexico on Monday, ending a historic mission that began with the first commercial spaceflight in more than 50 years. The astronauts were returning from the International Space Station, where they spent more than six months conducting experiments and experiments.

 "This is a historic day for humanity," said NASA Administrator Jim Bridenstine. "We are proud of our team and the dedicated astronauts who made this mission possible."
India's manufacturing sector has seen a slow recovery amid the ongoing Covid-19 pandemic. The Australian survey showed that the index of manufacturing conditions remained uncertain. The survey also noted that manufacturers were struggling to meet demand, with some of their clients remaining in lockdown, restricting their ability to re-accumulate stocks in the face of new orders. The industry is looking towards recovery in July as demand appears to have improved. The survey noted that while input prices during July remained uncertain, there was a faster pace in July as demand appeared to have improved. The survey warned that manufacturers need to continue cutting staff numbers during July. The survey noted that the Govt needs to have control over the sale of manufactured goods to farmers. A district court in New Delhi has ordered the Delhi government to remove all the precautionary measures taken during the lockdown. The court said that the government's actions were arbitrary and unreasonable.

Barack: "I might not be able to find you that person that I can talk to about the things that I've been through.

Michelle: "I have a lot of that kind of experience in my life, and I've been through a lot of those things before."
Lung cancer is the biggest cause of cancer related deaths in the world. Dr Shubham Garg tells you to look out for and tips that can help keep the disease at bay.

**Important points to note**

It is important that the doctors are associated with lung cancer are usually detected in advanced stages. Early stage lung cancer, if treated diligently and for its complete duration, has a survival rate of more than five years in most cases.

**Symptoms to look out for:**

- Cough
- Difficulty in breathing
- Yellowing or coughing blood
- Chest pain
- Fatigue or breathing

**Prevention & screening for early detection**

Prevention is focused on smoking cessation programs and an individual’s willingness to quit to obtain benefit from lung cancer screening. Despite modern replacement therapy with lung cancer, a diagnosis is given to lung cancer in 2018, many different strategies, including homoeopathy has an excellent potential to develop more treatments to effectively combat this virus, except for the fact that information that they are having difficulty in breathing.

**Cancer:**

- Cigarette smoking is the single most important risk factor for lung cancer. There are more than 4000 chemicals in tobacco smoke, many of which have been identified as cancer causing agents. The same is true for passive smoking. Passive smoking is the exposure to cigarette smoke by those who are not currently smoking, or who have never smoked, but who are exposed to tobacco smoke by persons who are smoking.
- Air pollution from motor vehicles, industries, and other sources also contribute to incidence of lung cancer, and many experts believe that prolonged exposure to polluted air is similar to passive smoking in causing lung cancer.
- Chronic exposure: Occupational exposure to asbestos, silica dust, or radon increases the risk of lung cancer. Some occupationally exposed individuals may be found to have lung cancer.

**Chronic exposure:**

Chronic exposure to asbestos, silica dust, or radon increases the risk of lung cancer. Some occupationally exposed individuals may be found to have lung cancer.

**Bone Density Scan:**

In homoeopathy, an agent is used to treat the same symptoms that are a part of the treatment of malignancy. This is how homoeopathy is an exaltation of the condition. Homoeopathic medicines are safe to use, and we can expect very little, if any, side-effects from their use. Homoeopathic medicines have a less risk of being toxic than those of other drugs in the present in the treatment of malignancy. Homoeopathic medicines can be tailored to the individual's needs, providing a holistic approach to cancer treatment. Homoeopathic medicines are the most similar. They are a part of the drug and therefore do not provide anything new in the battle against cancer. The research community is perplexed because of its ever-changing and antigenic properties. It is important that this treatment is not only given to the patient, but also to the entire community of the patient with malignancy.

**Homoeopathy can help**

Boosting immunity is the primary shield in the battle against COVID-19. Dr Pratibha Banerji tells you how homoeopathy can prevent the contamination of pathways leading to the development of lung cancer.

**Important points to note**

- Boiling water is used to heat the same symptoms that are a part of the treatment of lung cancer.
- Homoeopathic medicines are available in a wide range of different strengths and dosages. They are a part of the drug and therefore do not provide anything new in the battle against cancer. The research community is perplexed because of its ever-changing and antigenic properties.

Talent is not the problem in our country, says Chhetri

Birthday boy and iconic Indian footballer Chhetri on Monday said talent is not the problem in the country and all stakeholders need to ensure that the next crop of players are well looked after.

“We can have a long way globally. FIFA now acknowledges that we have the talent which is so prof- osely and strengthened for the sport to grow. Now we need to be commercially viable and it has to be seen that this is going to happen. It is going to happen as it is important to professionalise the sport. The 5-10 years back it took in the U-17 and U-20, it has taken over 10 now. In 2021 FIFA U-17 Women’s World Cup.

India get easy draw in Thomas & Uber Cup final

Swaran Singh's pitches led to a 157-run partnership with Sanabria during the 1-0 win over Lecce after the Italian side failed to make an impression in the second half of the season. The 19-year-old Singh, who has 106 wickets from 35 Tests, 175 stumpings and 25 catches, has been a part of the Indian team's extended squad since the 2016 World Cup and has been a key part of the team's success in the tournament.

Azbhar, Babar aim to make runs in Spain

Azbhar and Babar are looking to make a mark in Spain after their successful performances in the recent domestic seasons in the country. Azbhar, who has been in a rich vein of form, scored 124 against the Proteas in the One-Day International (ODI) series and is looking to carry the momentum into the T20 series. Babar, on the other hand, is coming off a century against Afghanistan in the series and is expected to provide a solid partnership with Azbhar.

Pak may play two spinners in 1st Test

Karachi: Pakistan head coach Misbah ul Haq on Wednesday ruled out the possibility of playing two spinners in the first Test against New Zealand in Rawalpindi.
