Desi push bans 101 defence imports

Giant step towards Atmanirbhar Bharat, says Rajnath; embargo on guns and missiles import from Dec

PNS ■ NEW DELHI

The Government on Sunday announced an import embargo on 101 items to give a major boost to the Indian defence industry.

This move towards self-reliance will see the domestic players manufacturing weapons ranging from artillery guns to missiles and assault rifles to name a few.

They will also be expected to bag orders worth over ₹4 lakh crores over the next seven to eight years as the Army, IAF and Navy will be procuring world class weapon systems developed and manufactured within the country.

The negative list or the embargo will commence from December this year in a graded manner and continue till 2024 as the Services are now amidst negotiating deals with foreign vendors. As defence deals take relatively longer time compared to other contracts, the Government has gone in for timeline for stopping imports.

Making the important

announcement about the import embargo, Defence Minister Rajnath Singh said here it is a big step towards Atmanirbhar Bharat (self-reliance) in defence.

In a series of tweets, he said the Defence Ministry has prepared a list of 101 items for which there would be an embargo on the import beyond the timeline indicated against them.

The Minister also said the Defence Ministry has also bifurcated the capital procurement budget for 2020-21 between domestic and foreign capital procurement routes.

- This will see the domestic players manufacturing weapons ranging from artillery guns to missiles and assault rifles to name a few
- They will also be expected to bag orders worth over ₹4 lakh crores over the next seven to eight years as the Army, IAF and Navy will be procuring world class weapon systems developed and manufactured within the country
- A separate budget head has been created with an outlay of nearly ₹52,000 crore for domestic capital procurement in the current financial year, Rajnath said
- More equipment for import embargo would be identified progressively by the Department of Military Affairs in consultation with all stakeholders

A separate budget head has been created with an outlay of nearly ₹52,000 crore for domestic capital procurement in the current financial year, he said. He said Prime Minister Narendra Modi has given a call for a self-reliant India based on the five pillars, i.e., economy, infrastructure, system, demography & demand and announced a special economic package for Self-Reliant India named 'Atmanirbhar Bharat'.

Taking cue from that evocation, the Ministry of Defence prepared the list, said Rajnath, adding it will offer a great opportunity to the Indian

defence industry to manufacture the items by using their own design and development capabilities or adopting the technologies designed and developed by the Defence Research and Development Organisation (DRDO).

Elaborating upon the policy, the Minister also said almost 260 schemes of such items were contracted by the Tri-Services at an approximate cost of ₹3.5 lakh crore between April 2015 and August 2020.

"It is estimated that contracts worth almost ₹4 lakh crore will be placed upon the domestic industry within the

next 6 to 7 years," he said.

Of these, items worth almost ₹1,30,000 crore each are anticipated for the Army and the Air Force while items worth almost ₹1,40,000 crore are anticipated by the Navy over the same period.

Singh said more equipment for import embargo would be identified progressively by the Department of Military Affairs in consultation with all stakeholders.

The list also includes, wheeled Armoured Fighting Vehicles (AFVs) with indicative import embargo date of December 2021, of which the Army is expected to contract almost 200 at an approximate cost of over ₹5,000 crore, he said.

The Defence Ministry officials said the embargo on imports is planned to be progressively implemented between 2020 and 2024.

The aim is to appraise the Indian defence industry about the anticipated requirements of the Armed Forces so that they are better prepared to realise the goal of indigenisation.

PC: PROMISED BANG ENDED WITH WHIMPER

PNS ■ NEW DELHI

Taking a dig, Congress leader and former Home Minister P Chidambaram said the Defence Minister promised a 'bang' on a Sunday morning and ended with a 'whimper'.

The only importer of defence equipment is the Defence Ministry. Any import embargo is really an embargo on oneself. What the Defence Minister said in his historic Sunday announcement deserved only an Office Order from the Minister to his Secretaries!

Import embargo is high sounding jargon. What it means is we will try to make the same equipment (that we import today) in 2 to 4 years and stop imports thereafter!, the Congress leader said in a series of tweets.

2L Covid cases in just 3 days; daily death crosses 1K

A health worker takes a nasal swab samples to test for Covid-19 in Hyderabad on Sunday

If trend continues, by August end, cases will soar to 35 lakh

PNS ■ NEW DELHI

As India breached 2 million Covid-19 cases on Friday and just in three days from then it has added two lakh more cases, taking the overall count well past 22 lakh cases on Sunday death in a day increased to 1,000.

The country has started recording more than 60,000 cases every day, and death toll are above 900 on daily basis.

The way India is adding new cases and death, by the end of this month, the country could have around 3.5 million cases and nearly 75,000 deaths.

Apart from Maharashtra, Andhra Pradesh and Tamil Nadu states such as Bihar, Uttar Pradesh, Assam, Karnataka and West Bengal have started reporting huge number of cases on daily basis.

With several States still not carrying out adequate number of tests, the caseload could go up substantially when the testing

is ramped up.

On Sunday, the country saw its highest single day death count of around 1,000 with Maharashtra alone reporting 390 deaths during the last 24 hours. Maharashtra reported 12,248 new cases, 390 deaths, while 13,348 patients discharged today. The total positive cases in the State rose to 5,15,332 including 3,51,710 recovered patients and 17,757 deaths. Active cases stood at 1,45,558.

Mumbai reported 1,066 new positive cases and 48 deaths, while situation in Dharavi remained under control. Tamil Nadu accounted for 119 deaths as there was no let up in the number of positive cases fatalities being reported from various places in the state, which recorded 5,994 new cases.

This is for the eleventh day in a row Tamil Nadu is testing less than 6,000 persons per day. On August 1, the State had 5,879 patients while the numbers came down to 5,875 on August 2 and 5,609 on August 3.

Though the number further came down to 5,063 on August 4, since the last five days it has been showing hike in the number of positive cases.

Centre transfers ₹17,100 cr to bank accounts of 8.5 cr farmers electronically

Modi launches agri infrastructure fund with capital of ₹1 lakh-crore

PNS ■ NEW DELHI

In a move to direct financial support and to empower the farmers of the country, Prime Minister Narendra Modi on Sunday electronically transferred ₹17,100 crore to the bank accounts of over 8.5 crore farmers as part of the PM-KISAN scheme.

The Prime Minister also launched the agriculture infrastructure fund with a capital of ₹1 lakh crore for agri-entrepreneurs, startups, agri-tech players and farmer groups for post-harvest management and nurturing farm assets through a video conference on the

occasion of "Balam Jayanthi", a day when farmers worship plough.

The first sanction of over ₹1,000 crore was made to over 2,280 farmers under the Agriculture Infrastructure Fund.

Speaking on the occasion, Modi said no middlemen or commission was needed as the amount went straight to farmers.

He also expressed satisfaction because the objective of the scheme was fulfilled.

"₹17,000 crore of PM-Kisan Samman Nidhi have been deposited into bank accounts of 8.5 crore farmers with a single click. No middlemen or commission, it went straight to farmers. I am satisfied because the objective of the scheme is being fulfilled," PM Modi said during the launch of a financing facility for farmers.

Colleagues falling prey to ultras, 12 BJP men desert party in Valley

MOHIT KANDHARI ■ JAMMU

Grassroot workers of the Bharatiya Janata Party (BJP) are turning out to be "sitting ducks" in Kashmir valley in the absence of adequate security cover for even those who figure on the "hit list" of terrorists and fearing for their lives, about one dozen BJP workers have so far resigned from the membership of the party recently.

Four party workers from Budgam resigned following fresh attack on a BJP worker in the area on Sunday.

It is learnt the BJP workers have forwarded their letters of resignation to SSP Budgam and District President Budgam BJP. Budgam BJP president Aga Mohsin told reporters the letters of resignations of four BJP workers are in circulation on WhatsApp.

"I will talk to them regarding their resignations," he

added. According to a police spokesman, a BJP worker hailing from Budgam was shot at and critically injured by terrorists. He was out for a morning walk when terrorists targeted him.

This is the third incident in the valley in the last one week.

On August 6, BJP sarpanch Sajad Ahmad Khanday was killed in Vessu village of Qazikund block in South Kashmir's Kulgam district. On August 4, BJP Panch Arif Ahmad was also critically wounded after terrorists fired at him in Akhran Qazigund.

According to a police spokesman, at about 6.30 am terrorists fired upon a BJP worker identified as Abdul Hameed Najar, son of Mohammad Jamal.

"The BJP worker was shifted to SMHS hospital Srinagar for treatment where his condition is stable," police spokesman added.

State reports 9 more Covid death

3,563 cases in Ranchi

PNS ■ RANCHI

Jharkhand reported nine Covid casualties and 530 fresh cases in 24 hours until Sunday 10 PM as per the state bulletin. At the same time 607 people were discharged from hospital after they recovered from the infection.

On Sunday out of 5182 samples collected, 4953 samples were tested, 4423 samples were tested negative, 530 samples were tested positive while nine persons died due to infection. The Sunday health bulletin is relief for State Government as a day back (Saturday), State reported the highest ever single-day spike in Covid-19 cases and fatalities after 1,084 people were found infected with coronavirus and 14 patients died in different hospitals across the State.

As per Sunday health bulletin the maximum cases were reported from Garhwa where 85 fresh cases were reported, followed by Ranchi were 71 Covid infection were traced. East Singhbhum figured third with 48 cases. In casualties three person lost the battle fighting infection in East Singhbhum, while in state Capital two persons died due to infection.

A health worker wearing PPE kit collects sample from a person for Covid-19 test during Unlock 3.0 in Ranchi on Sunday

Vinay Murmu | Pioneer

On August 8 night, Ranchi topped the list after detecting a maximum of 412 cases, the highest ever single-day spike of any district. Besides, Giridih reported the second highest number of cases adding 286 patients.

Of the 14 deaths reported on Saturday, seven occurred in East Singhbhum's Jamshedpur, four in Dhanbad and one each in Ranchi, Godda and Koderma districts.

With the report of 71 fresh cases in State Capital the number of Covid cases in Ranchi

spiked to 3563 while 29 persons have died due to infection. The biggest worry for Ranchi is that the Centre on Saturday advised 13 districts including Ranchi across eight states and a Union territory to focus on ramping up testing and addressing delays in diagnosis results, flagging that the coronavirus disease (Covid-19) case fatality rate in these regions was higher than the national average and that they contributed 14% of all deaths due to the disease in India.

The 13 districts are:

Kamrup Metro in Assam, Patna in Bihar, Ranchi in Jharkhand; Alappuzha and Thiruvananthapuram in Kerala, Ganjam in Odisha, Lucknow in Uttar Pradesh; North 24 Paraganas, Hooghly, Howrah, Kolkata and Maldah in West Bengal, and Delhi.

Sources said that though the mortality rate in Ranchi is high in all districts the state mortality rate is much lower.

The State mortality rate is .97 per cent while the national mortality rate is 2.04 per cent.

CISF official asked if I am Indian as I don't know Hindi: Kani

PTI ■ CHENNAI

DMK MP Kanimozhi on Sunday said a Central Industrial Security Force officer asked her if she was an Indian, when she asked the woman official to speak in Tamil or English.

"Today at the airport a CISF officer asked me if 'I am an Indian,' when I asked her to speak to me in Tamil or English as I did not know Hindi. I would like to know from when being Indian

is equal to knowing Hindi. #hindiimposition," Kanimozhi who is also the DMK's women's wing secretary said on her twitter handle.

A number of social media users replied supporting her, with one of them saying, "I am an Indian and Hindi has nothing to do with it! #hindiimposition Pass it on!". According to party sources, the incident occurred in Chennai when the MP was at the airport to board a Delhi flight in the afternoon.

CM dons Panchi, beats Mandar on Int'l Day of World's Indigenous People

PNS ■ RANCHI

Donning a traditional Panchi, tribal attire worn by men and women of Santhal Pargana region, Chief Minister Hemant Soren on Sunday indulged in true-blue tribal festivities by beating Mandar and shaking a leg to the beats of tribal music after planting Sal and Karam saplings at Nilamber Pitambar Park in Ranchi on the occasion of International Day of the World's Indigenous People.

Before letting the festive

Vinay Murmu | Pioneer

mood soak in, Soren announced that International Day of the World's Indigenous People will be a government holiday in Jharkhand next year onwards. "This year, the festive fervour got marred by Covid-19 pandemic, but the day will be celebrated every year with great enthusiasm and extravagance in Jharkhand," he said.

The Karam and Sal saplings, which the Chief Minister planted on Sunday, also assume significance in the tribal culture. While Karam tree is considered sacred and worshipped by the tribal community in Jharkhand, Sal tree often finds a presence in Sarna Sthal, the tribal place of worship, and is also seen as the custodian of forest dwellers in Jharkhand, which has South East Asia's largest Sal forest in West Singhbhum's Saranda.

"Although the tribal people have been given special powers by the constitution of our country, it is our duty to pon-

der upon the development that the community has seen over the past decades. On this day, we all must vow to preserve the tribal culture and work for holistic development of tribal people," said Soren.

The Chief Minister also raised concern over unemployment caused during lockdown in state, and said that it was the Government's responsibility to come up with ideas to overcome the slump in the job market and other economic activities of Jharkhand. "We have maintained a close watch on Covid-19 since its entry in our state. These are tough times, but we have to fight this pandemic and emerge victorious," he said.

Soren also extended his wishes to members of tribal community living across the globe and wished them 'Johar', a tribal word that is used in almost all tribal languages and dialects in Jharkhand for wishing people.

I-Day celebration to be curtailed, no schoolchildren allowed

PNS ■ JAMSHEDPUR

In the view of rising cases of Covid-19, nation's 74th Independence Day celebration will be curtailed. For the first time in history, the city will witness a completely different Independence Day function. The district administration has decided to organise the main Independence Day event at the Jamshedpur Collectorate Auditorium on August 15 rather than at Gopal Maidan in Bistupur. Moreover, the administration has strictly banned participation of children in the

event. The day will be celebrated without public gathering under social distancing norms. Deputy Commissioner Suraj Kumar said that the main event of the district will be celebrated at Jamshedpur Collectorate Auditorium on August 15 in view of the spreading of coronavirus. Kumar said in accordance with the guidelines of the Ministry of Home Affairs, Government of India and Ministry of Health the program the day will be celebrated without violating the norms of Covid-19.

The Deputy Commissioner has also directed educational institutes, social organisations to simply host Tricolour without mass gathering. Patriotic fervour and the spirit of nationalism are filling the air as the steel city gears up to celebrate its Independence Day. Preparations are underway by various segments of the society to celebrate the Independence Day in a befitting manner. On the other hand, the markets particularly Sakchi and Bistupur have turned into sale points of Indian flags,

stickers, banners and buntings which have been printed in hundreds of thousands numbers. The business is in full swing as these items are in great demand by the people. "Besides the regular increased patrolling and enhanced positioning of cops at all sensitive places the border check-posts with the neighbouring states have also been strengthened to prevent anti-social elements from sneaking in the city," said police personnel. Checks and search operations have been initiated at important places in the city. As

a precaution, all incoming vehicles are being subjected to spot checks. A vigil look will be kept on vehicles entering the city on eve of Independence Day. Additional policemen have been deployed at sensitive areas. Though Intelligence reports have not specified any particular threat perception, a general alert has been sounded across the city. However, concern over the recent spurt in criminal activities in the city over a thousand police personnel have been posted in and around the city and at all vital installations.

Private clinic of corona positive doctor sealed

PNS ■ DHANBAD

Amidst rising number of Corona positive patients in Dhanbad, the administration has sealed the private clinic of a PMCH doctor who was found positive on Friday late night. The administration has started search of patients that visited the lady doctor residing under Saraidhela police station area. The health department has also taken swab of her family members including two lady staff who assisted her in the private clinic. Swab of family

members other doctors who were positive also was collected for test, according to health department authorities. Meanwhile, a 22-year-old man identified as Pintu Bhagat resident of Govindpur Bazaar area committed suicide on Sunday by jumping into village well. Govindpur police station in-charge Surendra Kumar Singh while conforming the incident said, a suicide note was found in his trousers recovered from his house suggests that Pintu probably was in depression. Pintu was suffering from

fever since last few days according to his elder brother Deepak Bhagat and supposedly was scared of Corona as one of the lines of his suicide note mentions he used to visualize death, said the OC- in-charge while talking to media. Deepak said they had a shop of manufacturing steel trunks and since lockdown the business was dull. "Why Pintu committed suicide is perplexing me as economic conditions if not were very good it was not that bad too," said Deepak to mediapersons.

12 BSF jawans found infected in Hazaribag

PNS ■ HAZARIBAG/BOKARO

At least 12 Border Security Force (BSF) Jawans tested positive for Covid-19 in Hazaribag, triggering panic among officials and other members of BSF here, health officials said. As many as 18 people were found infected in the district on Saturday and 12 of them were from BSF. Meanwhile, 12 new Covid-19 positive cases have been reported in Bokaro district, including one doctor of Sadar Hospital Bokaro, one staff of Civil Surgeon Bokaro and staff of doctor's Hostel Bokaro General Hospital (BGH) last night, informed district Bokaro Deputy Commissioner Rajesh

Kumar Singh on Sunday. Among the positive cases, a 34-year-old man and a 60-year-old woman from Mahato Tola Govind Market admitted at RIMS; a 54-year-old man and 50-year-old woman from Chhatni Tand Balidih also

admitted at RIMS Ranchi; 54-year-old female from Sector 8C; 40 and 43-year-old male from Sector 4D; a 29-year-old male from Doctor Hostel BGH; 33-year-old female from Chandankiyari; 51-year-old male from Community Health

Center Chas and a 44-year-old male from Civil Surgeon's office, he said adding "four of them were admitted to RIMS while 8 were shifted to COVID hospital at Bokaro." "Contact tracing of all of them is being done," said the DC. To prevent the spread of Coronavirus infection, the DC issued an order yesterday, directing the three branches of State Bank of India, BS City, State Bank of India Chas Branch and State Bank of India Chas Court Area Branch to be sealed for the next 72 hours. Meanwhile, 15 persons, including six residents of Ranchi, 5 of Jamshedpur and 4 of Kolkata, were discharged after they were tested negative for the

Sars-Cov-2 virus for the second time and sent back to their home after recovering fully, said DC. Expressing concern over the spurt in Coronavirus positive cases in the district Bokaro Deputy Commissioner Rajesh Kumar Singh said, everyone needs to be vigilant. Most of the cases are from Bokaro urban areas, hence more security and vigilance are necessary. He urged that everybody must apply a mask, follow social distance, and wash their hands with soap. The best way is that all of you stay safe in your own homes. The total number of active cases rushed to 234 in the district while the death toll in the district stands at four, he said.

JAMSHEDPUR WITNESSING 100 CASES PER DAY IN FORTNIGHT

PNS ■ JAMSHEDPUR

The city is witnessing 100 positive cases per day in the past 15 days. Moreover, deaths have started taking place of the persons belonging to very densely-populated localities of the city. The death toll reached 70 with two Covid deaths taking place at Tata Main Hospital on Sunday morning. Two men who died of the Coronavirus on Sunday were hailing from

Harizan Bustee at Dhatkidih in Bistupur and Old Purulia Road in Mango, both the localities are densely-populated. The deceased who was from Harizan Bustee was a 69-year-old man with symptoms of high fever and breathing problems. He was admitted at the hospital on August 7, but he died there on Sunday morning. Similarly, the deceased from Old Purulia Road in Mango was a 54-year-old man who

- The death toll reached 70 with two Covid deaths taking place at Tata Main Hospital on Sunday morning
- Two men who died of the Coronavirus on Sunday were hailing from Harizan Bustee at Dhatkidih in Bistupur and Old Purulia Road in Mango, both the localities are densely-populated
- The deceased who was from Harizan Bustee was a

- 69-year-old man with symptoms of high fever and breathing problems
- Tata Main Hospital has started plasma therapy for the seriously-infected Covid patients General manager, Tata Main Hospital, Rajan Chaudhury declared that they have already started plasma therapy on the serious patients and has appealed to those who have recovered from the Covid to donate their blood

was admitted at the Tata Main Hospital with the complaint of high fever on August 3. The city witnessed its first

Covid death when a 71-year-old man who was a resident of Sonari died at the Tata Main Hospital on July 4. About an

hour later an 88-year-old woman who was admitted at the Tata Main Hospital died of pneumonia at the hospital. The hospi-

tal authority sent the swab sample of the deceased for examination to the MGM Medical College, where the test report came out Covid-19 positive. "As per our understanding from a rough estimate over 70 percent of the city population might be asymptomatic Covid patients," said East Singhbhum district civil surgeon, Rajendra Nath Jha. Jha, said there is no plan for conducting a random sample test for the Covid in view

of shortage of the man power in the district health department. "We know that carrying out random test locality wise is a better step, but when we are not able to do the regular test, then there is no question of conducting a random test. Per day, we are collecting on an average about 700 swab samples for the Covid test. Of these only 350 samples are processed for the testing, remaining 350 remain pending. While 50 per

cent samples remain untested, we cannot think of a random test," noted the civil surgeon. Tata Main Hospital has started plasma therapy for the seriously-infected Covid patients General manager, Tata Main Hospital, Rajan Chaudhury declared that they have already started plasma therapy on the serious patients and has appealed to those who have recovered from the Covid to donate their blood.

MANGO CULTIVATION AT HURLONG FACES WATER CRUNCH

PNS ■ DALTONGANJ

The upcoming mango cultivation in 5 hectares under Birsia Harit Gram Yojna (BHGY) at Hurlong faces water crunch. DC Palamu Shashi Ranjan who inspected this BHGY at Hurlong on Saturday said, "The mango growers there complained of water problem. There is a water body there but its output is inadequate."

Ranjan said, "I have asked Panki block officials to work out for a 100x100x10 size water harvesting structure here to overcome the water scarcity for this mango cultivation." Under BHGY 112 mango plantation can be done in one acre of land with 5 meter distance between two such plantations. Ranjan said he reviewed MGNREG schemes under Panki block and found

MGNREGA labourers' engagement 'far below' the limit a day. DC said as against a minimum engagement of 100 labourers a day he found engagement of 60 labourers or at some places far less than this too. Ranjan said, "I was told there by elected people of the various panchayats that lesser engagement of labourers is all due to their involvement in sowing and transplantation of

paddy saplings in the fields." The DC agreed more push is needed in health sector in Panki where he was told quacks and fake nursing homes flourish most. Ranjan agreed during his interaction with people there came up issue of sand as sand is brought in Panki from another block Tarhassi which gets costlier just because of the transportation cost of the sand.

Maoist commander arrested in Dumka, arms recovered

PNS ■ BERMO

Bokaro and Dumka police along with 35th SSB and 26th CRPF battalion carried out a joint operation and arrested a hardcore Naxal rebel with arms and ammunition here on Sunday, said Bokaro Superintendent of Police (SP) Chandan Kumar Jha said. Bokaro SP Chandan Kumar Jha has confirmed the arrest of a Naxal zonal commander Chhotu Manjhi from Tuti jharna village under Chatrochti police station in the state's Bokaro district and seized rifles, Carbine, SLR magazine and other explosives from his possession. Manjhi, who carried a bounty of Rs.1 lakh on his head, was arrested on Sunday in a joint operation of the district police and the Dumka police. A member of the CPI (Maoist), Manjhi was allegedly involved in many dreadful incidents in Bokaro. At present, according to the police, Chhotu Manjhi was working in Santhal Pargana as Zonal commander.

He was looking after his organisation's affairs in Dumka, Godda, Jamtara and Pakur districts, and had been recruiting youth in the Santhal Pargana division into his organisation. After coordination with Dumka police the Bokaro police team reached Dumka on Sunday afternoon and recovered a huge cache arms and ammunition from the forest area of Maslia. As per information provided by Dumka and Bokaro police, the team recovered one regular rifle, one regular insas rifle, one regular. 303 rifle, one regular carbine, 3 SLR rifle magazine, 350 ammunition, 1650 detonators, 100 cartridges, 144 SLR rifle cartridges, 66 cartridges of Insas rifle and other explosives from Dumka forest area. Chandan Kumar Jha SP Bokaro said, Chhotu Manjhi is expert in operating arms and has taken training in Jhumra, while his associates were also involved in many Naxal incidents. He said the Naxal zonal commander was involved as many as 37 dreadful naxal incidents.

3 cybercriminals held in Giridih

PNS ■ GIRIDIH

Three cybercriminals, majority of whom are aged between 19 and 24 years and involved in several bank frauds, were arrested at Dumari area in Giridih, Sandeep Suman Cyber Dy SP said on Sunday. Addressing media persons, Dy SP Sandeep Suman said, "The criminals mostly target residents of Madhya Pradesh, Punjab, Haryana, Maharashtra among others posing as bank officials. Some of the accused work in private firms while others are students. They were nabbed after we received a tip-off and conducted raids in areas under Dumari police station." Sandeep Suman added that some

of the teenagers in this group were into this crime for the last two years while others were involved for over four years. On the modus operandi, DySP said, "Like other organised gangs, they mostly used to first send some links to the cell phones of their targets. The moment the mobile phone user would click on them, these cybercriminals would clone confidential data like ATM pin numbers, bank account numbers and others. They also targeted Paytm users." DSP Sandeep Suman said police also recovered 21 mobile handsets, 43 SIM cards, 11 ATM cards, nine cheque and pass books, five voter identity cards, three pan cards and two motorbikes from their possession.

Celebrating Handloom Day joyfully

JAYA JAITLEY

On Handloom Day, observed every year on August 7, let us fill our ears with the beautiful, rhythmic sounds of handlooms clicking away under deft fingers that arrange rainbow threads into textures, motifs and patterns to clothe and please us all. India is truly blessed for having the largest variety of living handloom traditions in the world. It shows the skills and the power of resilience of its handloom weavers of all religions, cultural and regional backgrounds throughout history, even through eras when they were sought to be wilfully destroyed. On this day of celebrating our Handlooms, we must honour their makers and their wearers, not through tokenism but through practical and sincere commitment to keep alive our great multi-cultural woven heritage and, more important, sustain the livelihoods of the entire chain of people from cotton, silk and wool producers, spinners dyers, weavers, to the marketplace to bring it to the wearer. The customer/wearer then makes the ultimate choice that decides whether a heritage and a livelihood lives or dies. In a brief mention of our organisation which has dedicated itself for 34 years to those two important goals, the Dastkari Haat Samiti, it has focussed its services not towards those who are strong and already established in the minds of their customers, but to enable the lower rungs of not only handloom weavers but multiple craftspeople and traditional artists to improve their skills, designs, market outreach and gain the confidence to negotiate the much larger world outside their tiny rooms with single looms. With this in mind, we have, in more than three decades, created artistic crafts maps of all states of India, to point people to the locations of makers, imagined the concept of Dilli Haat, and worked hard for it to be estab-

lished with the help of the Ministry of Textiles in 1994. It is a now very popular marketplace in the capital that enables handloom weavers to bring their textiles directly to the customer without a middleperson and sustained thousands of livelihoods. The Samiti then created a major program called Akshara, where Indian scripts were crafted in multiple skills, including handloom weaving. This revived ancient traditions of sacred words or blessings on textiles, and made literacy meaningful to unlettered weavers. It has also produced many books on Crafts and Handloom Textiles, including Woven Textiles of Varanasi, apart from children's stories. Our example of focussing on weavers at the lowest rung of the ladder was our project with women gamchha weavers in Bengal. Gamchhas survive because they are used by a wide array of menfolk of the working classes. Rickshaw pullers, vegetable vendors, manual labourers, fishermen, farmers – all use this small length of colourfully checked cloth for multiple purposes. We see them but never notice them. To weave low cost but beautiful, vibrant saris for urban women, and by offering a gamchha 'style' of scarf, bandana, head band and now as a mask as a defence across one's face against the Corona virus, we have brought better incomes to women who barely earned Rs 200 a day. We must not kill simple Indian textile acces-

sories like gamchhas by allowing Chinese machine-made towels flood our pavements. Let us honour the humblest weavers, and especially women across India, including in the North-East, who do not pass a day without sitting at their looms. While focussing on women, let us imagine the woman spinning on the front porches of their homes in Andhra Pradesh and the Kashmiri woman spinning pashmina yarn in her garden, and acknowledge that women are often at the crucial base of the great handloom chain. Finally, the Dastkari Haat Samiti's latest contribution towards the glory of Indian weaving across the world, offers its Crafted in India project created in collaboration with Google Arts & Culture on its renowned digital platform (G.co/craftedindia). It provides intricate stories and insights with high quality images, of many of the best handloom weaving traditions of India. Our tribute to handlooms must now, in the time of a pandemic and the clarion call for an Atmanirbhar Bharat, make our new approach Innovate-Create-Elevate for Handlooms. Attention should be paid to ensuring local markets and products like the gamchha. It is the synthetic and mechanised replacements that have destroyed local markets for handlooms. Old administrative systems with a top down approach must be replaced by dynamic, flexible, less rigid ideas and integrated programs than link in many more ways with every other discipline to make the handloom weavers life recognised, dignified, sustainable, desirable and viable. Our dedication this year need not be not just to wear a handloom sari, kurta or scarf on 7th August, but to make handlooms India's new Fabrics of Freedom.

(Founder President, Dastkari Haat Samiti)

Tricolour themed masks banned in capital ahead of I-Day

Can't disrespect national flag, says admin

PNS ■ RANCHI

The Ranchi district administration on Sunday issued a ban on sale of themed masks having pictorial and symbolic representation of tricolour ahead of Independence Day celebration. With the Independence Day celebration approaching, various road side vendors are selling masks having pictorial and symbolic representation of Indian flag. Ranchi additional district magistrate (law and order) Akhilesh Mishra today issued the directive banning sale of tri-

colour masks. As per district administration directive, if the vendors and shopkeepers are found selling tricolour masks then action will be initiated against them. The district administration has asked Block Development Officers (BDOs), Circle Officers (COs), station house in-charge and other law enforcement agencies to ensure that sale of masks having pictorial and symbolic representations of tricolour is banned in Ranchi district. "Wearing masks is mandatory to check the spread of Coronavirus. However, we have learnt that some vendors are selling tricolour themed masks to cash Independence day fervour. It is very much possible that once the celebration is

Trade unions protest against Centre's privatisation policy

PNS ■ RANCHI

Members all trade unions affiliated to the left parties and Congress gathered at Raj Bhawan on Sunday to protest against the privatisation policy of the Central Government. The Unions also decided to celebrate Bharat Bachao Diwas on August 9, which is the day on which Mahatma Gandhi announced 'Quit India Movement' against British rule. The trade unions are organizing Bharat Bachao Diwas against the plunder of public property of the Country in the

memory of the historic day August 9 and to protest against alleged sale of public properties to the capitalists at throwaway price. Addressing the gathering on the occasion, CITU General Secretary Prakash Viplay said that the conspiracy to sell public sector industries, disbanding national banks and handing them over to their favorites, ending the life insurance corporation, defense, coal, petroleum, steel, heavy engineering, railways, the working class of the Country will not tolerate the anti-national action and

handing over all strategic industries, other industries and institutions including highway, telecom airport, port in the hands of foreign capitalists. Just as Mahatma Gandhi's call for do or die became part of a nationwide campaign on August 9, 1942 in the struggle for independence, similarly the working class is ready to sacrifice against the plunder of national wealth and to protect India's self-respect and economic sovereignty, he added. The trade unions appealed to its members to give full support to the upcoming strikes

like a joint nationwide protest day of coal workers on August 18, a pan-India strike of scheme workers (anganwadi workers, mid-day mill workers) on August 7. The unions called upon all their affiliated unions to express solidarity with these strikes and protest at the local level. The protest was held by strictly following the World Health Organization (WHO)'s advisory and physical distance rules in all these programmes. After the programme, a limited member of delegations submitted a memorandum to the local administrative officials of demand letter to the President of India. Raghunandan Raghavan of HMS, PK Ganguli of AITUC, Shubhendu Sen of ACTU and others were also present on the occasion.

2 businessmen brothers, four others die in gas chamber

PNS ■ RANCHI

Deoghar based two businessmen brothers and four others died due to asphyxiation at Devipur main market locality under Devipur police station in Deoghar on Sunday morning. Police said that businessmen brothers identified as Brajesh Chand Barnwal (48) and Mithilesh Chand Barnwal (42) were jointly constructing a house where a concrete cesspit tank was recently constructed. Cesspit tank was recently constructed and today they had called labourers to remove formworks and to clean the cesspit chamber. Rest of the deceased were identified as Govind Manjhi (48) and his two sons Babloo Manjhi (26) and Lalu Manjhi who was 24 years old. They

were identified as residents of Kolharia village under Devipur police station. The sixth deceased was identified as Lilu Murmu (27) identified as resident of Pirhakatta. "As per information one of the labourers stepped inside the chamber and when he did not come out and respond for half an hour another labourer stepped inside. When the second labourer also did not respond to Mithilesh and then his brother also went inside the chamber. Remaining two labourers who scaled inside the chamber. All died inside the chamber," said one police personnel. Police were informed by local residents when family members started crying after knowing the incident. Rescue team was quickly dispatched and the victims

were taken out with the help of an earth mover. They were rushed to the hospital where they were declared dead on arrival. Later on, their bodies were referred to district Sadar hospital for post-mortem. Deoghar DC also reached Sadar hospital to inquire about the matter. "We are waiting for a post-mortem report to ascertain actual cause of death but it is clear that all of them died due to asphyxiation and possibility can't be ruled out that toxic gases might have accumulated inside the cesspit chamber causing their death," said police sources. District administration is also exploring the option of financial assistance to the family members of deceased labourers.

J'khand professional Congress holds webinar to fight Covid-19

PNS ■ RANCHI

Under the aegis of the Jharkhand Pradesh Professional Congress Committee, a Webinar was organised on the subject of effective thinking for effective precautions. Jharkhand Health Minister Banna Gupta, AIPC Regional Coordinator Jarita Latiflong, Chief Operating Officer Alim Zaveri, Dr Anant Sinha, Dr Suyash, Sinha, Dr Harsh, Dr Rajeev, Arnav Dey, Bhuvanesh Thakur, Afsar Imam, and many officials of Jharkhand Professional Congress including DK Singh, Khyati Munjal, Abhishek Manav and Manish Gautam took part in the Webinar. During the online discussion, Health Minister Banna Gupta said, "A person is afraid of a threat as long as it is far. When it comes near, you should fight it out. The Government of Jharkhand has exerted full power to fight corona in the State. Right now it has intensified Covid testing, so the people here can return to their

Proposal for Sarna Code recognition to be passed in Assembly: Oraon

Finance Minister and JPCC President Rameshwar Oraon along with Rural Development Minister Alamgir Alam pays tribute to Mahatma Gandhi on the occasion of World Indigenous Day in Ranchi on Sunday
Vinay Murmu | Pioneer

PNS ■ RANCHI

On the occasion of World Tribal Day on Sunday, Jharkhand Pradesh Congress Committee (JPCC) Chief and Food Supply Minister, Rameshwar Oraon said that a resolution will be passed from the Legislative Assembly seeking the recognition of a separate Sarna Dharma Code and sent to the Central Government. Oraon expressed hope that the Central Government will give Sarna Code recognition. He said this at an event organised at the party headquarter in the State Capital on World Tribal Day. The programme started with a garlanding on the portrait of the martyrs, including the great figures of tribal society, Bhagwan Birsa Munda,

Amar Shaheed Siddho-Kanhu, Chand-Bhairav, Nilambar-Pitambar and Shaheed Veer Buddhabhugat. Several Congressmen including Rural Development Minister Alamgir Alam, Agriculture Minister Badal, former Union Minister Subodh Kant Sahay were present in the programme. Addressing the gathering on the occasion Oraon said that the Congress Party has been a major contributor to the country's independence and development of the Country and in which tribal society played a big role. "Tribal community has also contributed a lot in the freedom struggle of the Country. After independence, the constitution of the country was made, in the constitution, adequate steps were taken to protect the interests and rights of tribal society," he added.

The webinar was conducted by Arita's Regional Coordinator Jarita Latiflong and questions were asked from the doctors present in public interest. At the same time, Chief Operating Officer Alim Zaveri said a message to the Health Minister of the State that how people can become health conscious

normal lives and employment as before." The webinar was conducted by Arita's Regional Coordinator Jarita Latiflong and questions were asked from the doctors present in public interest. At the same time, Chief Operating Officer Alim Zaveri said a message to the Health Minister of the State that how people can become health conscious. The President of the Professional Congress Committee in the webinar, Aditya Vikram Jaiswal, thanked the respected speakers who attended the webinar and said that all the speakers gave valued suggestions.

Meanwhile, after the district administration announced to hold the state I-day ceremony at Morabadi ground, the district administration started preparation for holding I day celebration. On Sunday Ranchi Municipal Corporation sent over a dozen cleanliness staff members to deck up the area. Workers were found sanitising the main stage and cleaning the vicinity, besides filling the existing potholes with sand. Earlier, the district administration had planned to celebrate I day celebration at JAP I ground, but the district administration later changed the venue. This year I day celebration will feature those who had won the battle against corona virus will be special guest in I day celebration.

Semi-buried newborn survives ants, monsoon rain in Lohardaga village

ADMITTED IN RANCHI HOSPITAL

Some villagers heard the baby cry while they were passing by the locality in Chandlaso village, around 80 kms from Ranchi and decided to check on the baby

PNS ■ RANCHI

A newborn baby boy, who was left semi-buried near a graveyard in Lohardaga's Kuru block, survived ants, insects and monsoon rains for several hours before villagers came to his rescue, police said on Sunday. "It is indeed miraculous how the baby survived. Although he has sustained injuries due to ant bites and moisture in the soil, he is healthy now," said Anil Oraon, the officer in-charge of Kuru Police Station, under which the graveyard falls. Some villagers heard the baby cry while they were passing by the locality in Chandlaso village, around 80 kilometers from capital Ranchi, at about 7:30pm on Saturday and decided to check on him, police said. "Villagers found that the baby was semi-buried and still alive. They rescued him and subsequently informed us," Oraon said. The baby, police said, was born on the same day and even his umbilical cord was not removed. He has been handed over to the Child Welfare Committee (CWC), which admitted him at Rani Children's Hospital in Ranchi for treatment on Sunday. "Prima facie, it seems that the baby was abandoned because he was illegitimate. Also, killing the baby was not the intention. His parents might have abandoned him and mud accumulated over his body," said Rajkumar Verma, former chairperson of CWC Lohardaga. The CWC has also written to Kuru police station asking them to lodge an FIR against the parents of the abandoned baby. Verma said will be in custody of the CWC for the time being, and eventually be handed over to eligible parents for adoption. Incidents of babies being abandoned have been a concern for the CWC not only in Lohardaga but across Jharkhand. "Several babies are abandoned every year in our state. They are mostly abandoned to hide premarital pregnancy and illegitimate relationships," said Tanushree Sarkar, member of CWC Ranchi.

5 captive elephants in Betla National Park get massage, fruits

M FAIYAZ AHMAD ■ DALTONGANJ

Less than a week away from World Elephant Day on August 12, five captive elephants of Betla National Park, namely Juhi, Rakhi, Sita, Kaal Bhairav and Murugan, are having their own beautiful time in captivity these days where their mahouts are giving them a happy bath, vigorous herbal massage and lots of fruits. Principal chief conservator of forest and chief wild life warden H S Gupta said "All these are being done to make these captive elephants feel good, great and at home." Gupta said "Elephants are quite intelligent animals and they at once understand love,

scorn and contempt of human beings." Chief wild life warden said,

"Quite recently I had been to Betla National Park where I saw and found these captive ele-

phants do need more human touch than just taking them out in routine ritual in the jungles to

make them find their own feed." Gupta said his men are taking care of their nails, soles of feet, trunk, tusks etc as nails and soles are the most vulnerable to infection. Gupta was all praise for one highly experienced mahout Imamuddin whom he described as "Haathi Ka Saathi" saying this mahout understands the body language of the elephants and the elephants also understand him. Chief wildlife warden said, "Our giving them bath, massaging, cleansing of nails, soles etc are a part of rejuvenation of their vitals which also carry a strong note that there must be an end to human elephant conflict and peaceful co existence will be too good for each other."

Andaman will be hub of ‘blue economy’: Modi

PNS ■ NEW DELHI

A day before the launch of the 2,300-km optical fibre cable connectivity project in Andaman & Nicobar, Prime Minister Narendra Modi said on Sunday that the Union Territory would be developed as a hub of ‘blue economy’ and ‘high-impact’ projects would be developed in 12 islands.

The Prime Minister was interacting with BJP workers of Andaman and Nicobar Islands through a video conference in the presence of party president J P Nadda.

The meeting comes a day before inauguration of the submarine optical Fibre cable connecting Chennai and Port Blair which would provide fast internet to the archipelago.

The submarine cable, which will also connect Port Blair to Swaraj Dweep (Havelock), Little Andaman, Car Nicobar, Kamorta, Great

Modi urges people to maintain ‘do gaj ki doori’

Nicobar, Long Island, and Rangat of the Island group, is expected to transform life in the remote Island including defence, business and tourism sectors.

An estimated 2,300 km of submarine optical fibre cable has been laid at an expenditure of about ₹1,224 crore and the project has been completed well within deadline.

“The internet connectivity in Andman and Nicobar will go through a sea change after the inauguration of the facility on Monday. This will facilitate online education, tourism and business in the island,” said the Prime Minister who also pointed to the strategic location of its ports which he said are established in “competitive distance” with many places and countries.

He said “high-impact projects would be developed in 12 islands” and Andaman and Nicobar would emerge as a “blue-economy” front in the country.

Addressing the workers, Modi again stressed on “do gaj ki doori” and the importance of wearing facemask to keep away coronavirus. “We need to insist on these two things and also spread awareness...”, the Prime Minister said.

Modi said in the time of pandemic it is important that “dialogue should continue” with all and “ we should be useful for all”.

During the interaction, party workers described to the Prime Minister how they provided food and medical aid to people stuck in the island during the lockdown. Modi praised their efforts in serving the distressed people in the island during the coronavirus pandemic saying “you have passed with flying colours”.

He asked party workers to continue their work with the spirit of ‘Seva hi sanghthan’ motto.

The total number of coronavirus patients in Andaman and Nicobar Islands reached 1,222 on Saturday. The Union Territory has 778 active cases, while 425 have been cured of the disease so far. In all, 19 patients have died in the islands.

Gehlot urges MLAs to save democracy

PNS ■ NEW DELHI/JAIPUR

A head of the Rajasthan Assembly session, Rajasthan Chief Minister Ashok Gehlot has appealed to all MLAs to listen to the voice of people to save democracy and stand with the truth in the interest of people of the State.

In a letter to all MLAs, Gehlot sought their cooperation in fulfilling the promises of development and prosperity of the State. “It is my appeal that you should listen to the voice of people in order to avoid wrong tradition, to maintain people’s trust in us and to save democracy,” Gehlot said in the letter.

The Assembly session in the State, which has been witnessing political turmoil after the rebellion by former Deputy CM Sachin Pilot and legislators loyal to him, will start on August 14. Gehlot is likely to seek a trust vote during the session

Pilot was sacked as deputy Chief Minister and the president of the State unit of the Congress after he and some MLAs loyal to him rebelled against Gehlot. Many believe that Gehlot still has an edge in the numbers game and is confident of a majority.

“You may be a legislator from any political party, you

should ensure and take a decision after understanding voter’s feeling that how a people’s elected government continues to work strongly for state’s welfare,” he said, emphasising that efforts to destabilise Government are not succesful.

The Chief Minister expressed faith that legislators will act in the larger interest of people of the state and will cooperate in fulfilling the promises of development and prosperity.

In the three-page letter the Chief Minister also wrote about the novel coronavirus pandemic besides mentioning ‘attempts to topple his Government’. The senior Congress leader also said that former Prime Ministers - Indira Gandhi, Rajiv Gandhi, Atal Bihari Vajpayee - faced defeats during elections, “but they didn’t let the institution of democracy weaken”.

“I appeal to all of you that to save the democracy, to ensure that voters continue to trust us and a wrong precedent is not set by us, you all should listen to the voice of people. While respecting the sentiment of your family members, your voters, please channelise your efforts in ensuring the government - elected by the people - continues to deliver with all its strength,” the 69-year-old leader wrote.

“I am confident that you all

with stand with the truth and will contribute in delivering promises made to the public,” he said.

“Amid the pandemic, we should all be concerned about fighting coronavirus... saving lives, economy, jobs. The state Government is working day and night for this. At such a time, some of our colleagues and opposition leaders are trying to conspire against us... this is unfortunate,” Gehlot’s letter read.

Between 1993 and 1996, “similar attempts were made to make such deals in order to topple the Bhairon Singh Shekhawat government,” he mentioned.

“At that as the Union Minister and state’s party chief, I had raised objection with (former Rajasthan governor) Baliram Bhagat and ex-Prime Minister PV Narsimha Rao, stressing that it’s against the democratic values to topple an elected government. Voters here will never want that such a precedent is set,” the Chief Minister added.

Victory and defeat are a part of election cycles but the “people’s mandate is the most important,” he stressed.

“Our fight is to save democracy, it will continue. We will win. Truth shall win... people shall win. All the MLAs -

whether those from the ruling party or opposition - will win who don’t want the government to be destabilised,” Gehlot tweeted on Sunday.

Gehlot has claimdd that he has the support of 102 MLAs, one above the majority mark. The BJP has 72 MLAs. Both the parties have been guarding their flock amid the crisis.

BJP MLA Nirmal Kumawat had alleged that the Congress government in Rajasthan was “harassing” opposition MLAs, and said they were on a pilgrimage to Somnath to seek mental peace.

Congress MLAs are currently holed up in a Jaisalmer hotel as the party has accused the BJP of horse-trading following the revolt by Pilot and 18 MLAs loyal to him.

Pilot and his 19 MLAs in his camp are at resorts in BJP-ruled Haryana.

Earlier this week, the BSP appeal seeking a temporary freeze on the merger of its six former legislators with Rajasthan’s Congress government, was dismissed by the High Court. The six MLAs have sought transfer of the case to the Supreme court.

If there is a freeze on the merger, Gehlot’s numbers will drop and he will have a tougher fight on his hands in case of a trust vote.

NGT directs DDA to file response to plea alleging pollution in lake

PTI ■ NEW DELHI

The National Green Tribunal has directed the Delhi Development Authority (DDA) to file response oo a plea alleging that a lake in east Delhi is being polluted by operation of boat services.

A bench headed by NGT Chairperson, Justice Adarsh Kumar Goel, also noted the submission that concretisation around trees is taking place in violation of its orders.

“Let DDA file its response within one month failing which coercive measures under Section 25 of the National Green Tribunal Act, 2010 read with section 51 of CPC may be the only option left with the Tribunal. The response be filed by e-mail,” the bench said.

According to the applicant, he made a representation to the authorities but the same has not been acted upon.

The Delhi Tourism and Transportation Development Corporation told the bench that no pollution is being caused in operating boats on the lake.

With regard to the issue of concretisation of the trees, action is to be taken by DDA, the tribunal noted.

Rahul plays centre over ‘looming unemployment’

PNS ■ NEW DELHI

Former Congress chief Rahul Gandhi on Sunday hit out at the Centre over looming unemployment in the country. He accused the Narendra Modi Government of failing to meet its promise of jobs for two crore people every year, and then enacting policies that “destroyed India’s economic structure” and left crores without jobs.

His attack on the Government came as the Congress’ youth wing launched a “Rozgar do” campaign with the objective to raise the voice of the youth against alleged unemployment prevailing in the country.

“When Narendra Modi became the Prime Minister, he promised the youth of the country that he will give jobs to two crore youth every year. He sold a dream, but the reality is that 14 crore people have become unemployed due to the policies of Narendra Modi,” Rahul alleged.

Rahul alleged that the Modi Government’s decision of demonetisation and its “faulty” implementation of GST and the lockdown have “destroyed” the economic structure of the country.

“Why did this happen? Because of wrong policies. Demonetisation, faulty implementation of GST and then lockdown - these three steps have destroyed the economic structure of the country and the truth now is that India cannot give employment to its youth,” the former Congress chief said in a video message he tweeted.

Therefore, the Indian Youth Congress has hit the streets, he said, expressing happiness that the IYC will raise these issues in all towns and streets.

“Please join the ‘Rozgar Do’ programme and along with Youth Congress, get jobs for the youth of this nation,” the Gandhi scion said.

He also congratulated the Youth Congress on the occasion of its foundation day and urged them to keep fighting for the youth of the country. Expressing solidarity with the campaign, Congress general secretary Priyanka Gandhi Vadra said “youth power” is India’s strength.

“As opposed to the BJP Government’s job-destroying policies, there is a need to create more and more employment opportunities for the youth of India,” she said on Twitter.

“Rozgar Do is the demand of young India. Employment is the need of young India,” she said.

Under the “Rozgar Do” campaign, the voices of the unemployed youth will be amplified all over the country, the IYC said.

“Anti-youth policies of the central government will be highlighted among the youth of the country through social media and other mediums,” it said in a statement.

Several Congress leaders posted videos on social media voicing concerns over alleged rising unemployment in the country.

Congress’ chief spokesperson Randeep Surjewala said the Demand of every youth of this country is “Rozgar Do” (give employment).

“We all demand, it is our right that the youth of the country should get employment on the basis of qualifications and get ahead in the progress of the country,” he said.

Several Congress leaders like Digvijaya Singh, Depender Hooda, Gaurav Gogoi, Rajeev Satav, Gaurav Vallabh and Ragini Nayak called for employment opportunities for the youth on social media as pet of the campaign.

KVIC set to open first of its kind Training-cum-Production Centre of Silk in Arunachal Pradesh

PNS ■ NEW DELHI

The far-flung tribal village of Chullyu in Arunachal Pradesh will soon be bustling with spinning and weaving activities with Khadi and Village Industries Commission (KVIC) set to open the first of its kind Training cum Production Center of Silk in the State.

Conceived just six months ago, the Centre will be launched in the first week of September. The KVIC has refurbished and converted a dilapidated school building into the training cum production center. The school building has been provided to KVIC by the education department of Arunachal Pradesh Government zero rent.

Machinery like handlooms, Charkha, Silk reeling machines and warping drums have already arrived and installation of machines are in full swing. The first batch of 25 local artisans of Chullyu village has been selected to begin the training with.

The project was conceived in February this year during the visit of KVIC Chairman Shri Vinai Kumar Saxena to this tribal village Chullyu.

The project was conceived in February this year during the visit of KVIC Chairman Vinai Kumar Saxena to this tribal village Chullyu

Identifying a great potential of silk production and other activities of village industries in the village, Saxena sanctioned setting up of training cum production center for the Eri Silk, which is traditionally worn by local tribals.

The work, however, progressed at a slow pace due to Covid-19 lockdown.

Recently KVIC also distributed 250 honey bee boxes in Chullyu village which has rich flora for production of high-altitude honey.

Located on the main highway just 30 km before the most popular tourist spot Ziro, Chullyu is a scenic village known for its eco-friendly ways of living. It is easily approachable by tourists which is an advantage for the local artisans.

Kharif cultivation all set for new record this year

RAJESH KUMAR ■ NEW DELHI

Despite the loss of 4.5 lakh hectare crops due to floods in 11 States and 20-60 per cent deficiency in rainfall in eight States, kharif cultivation is all set for a new record with sown area under many crops including major oilseeds and cotton exceeding the normal area.

According to kharif sowing data released by the Agriculture Ministry, a total of 966 lakh hectares were planted till date, nearly 10 per cent more than 878 lakh hectare sown in the corresponding week last year. Though there is nearly two months left in the season, paddy plantation such as rice, soyabean, cotton, maize and groundnut already surpassed the normal sown area.

The data shows that there is a spectacular 17.36 per cent increase in rice planting too. As compared to 274.19 lakh hectare planted in same week last year, the area under rice so far is nearly 322 lakh hectare, an increase of 47.60 lakh hectare.

Telangana, Bihar, Jharkhand, West Bengal, Odisha, Chhattisgarh, Maharashtra have reported more paddy plantation so far while Assam, Punjab and Himachal Pradesh reported

less area under rice sowing. Similarly, there is a 4.22 per cent increase in area under pulses with moong exceeding its normal area and urad and arhar inching closer to the respective normal areas.

Total under pulses so far is close to 119.59 lakh hectare as against 114.77 lakh hectare planted in the same period last year, an increase of 4.82 lakh hectare.

India has received 531.6 mm rainfall as against the normal of 533 mm so far while over 1.33 crore population have been affected due to floods across India. According to the India Meteorological Department, the rain deficiency in Nagaland recorded 25 percent, Manipur 46 percent, Mizoram 26 percent, Tripura 10 percent, Delhi 33 percent, Himachal Pradesh 34 percent, Jammu and Kashmir 52 percent and Rajasthan 22 percent, so far while Assam, Bihar, Gujarat, West Bengal, Karnataka, Kerala,

The data shows that there is a spectacular 17.36 per cent increase in rice planting too

Uttarakhand and Uttar Pradesh are among those States reeling under the flood.

As per the central water commission report, most of the river in the country are overflowing or above the danger mark.

As against the designated area of 110 lakh hectare, soyabean is sown over 118 lakh hectare so far.

Similarly, cotton has covered 123.64 lakh hectare as against the normal area of 121 lakh hectare. The area sown in the same week last year was 118.73 lakh hectare. At 47.29 lakh hectare, groundnut planting is nearly 44 per cent more than 32.86 lakh hectare in the corresponding week in the previous kharif season.

The normal area under groundnut is 41.41 lakh hectare. Against the assigned area of 74.73 lakh hectare, maize is planted over 75.88 lakh hectare already.

1.5L tele-consultations held via eSanjeevini, eSanjeevaniOPD

PNS ■ NEW DELHI

Tele-consultation medical facilities -eSanjeevini and eSanjeevaniOPD- launched by the Centre is finding good response from the patients stuck at home due to the ongoing Covid-19 pandemic.

About 1.5 lakh tele-consultations have been completed on the tele-medicine service platforms of the Union Health Ministry.

“It is planned to implement tele-consultation in all the 1.5 lakh Health and Wellness Centres (as spokes) in a ‘Hub and Spoke’ model, by December 2022,” said a senior official from the Union Health Ministry.

So far, eSanjeevani and eSanjeevaniOPD have been

implemented by 23 States while others are in the process of rolling it out.

Union Health Minister Dr Harsh Vardhan in a review meeting said, “We have started implementing the vision of Digital India through broadband and mobile phones at the Ayushman Bharat - Health and Wellness Centres.

“This has substantially augmented our health infrastructure during the COVID pandemic”.

Echoing similar sentiments, Minister of State for Health Ashwini K. Choubey said that it would be a “gamechanger for people in the rural areas who do not have easy access to medical specialists located in cities”.

Presently, telemedicine is

being provided through more than 3,000 HWCs in 10 States.

Owing to the ongoing COVID-19 pandemic, the Health Ministry launched the second tele-consultation service enabling patient-to-doctor telemedicine through ‘eSanjeevaniOPD’ free of cost in around 20 States.

Presently, on an average, around 5,000 consultations per day are provided through both the modes (eSanjeevani and eSanjeevaniOPD). The telemedicine platform is hosting over 40 online OPDs, more than half of these are specialty OPDs which include gynaecology, psychiatry, dermatology, ENT, ophthalmology, anti-retroviral therapy (ART) for the AIDS/HIV patients, non-com-

municable diseases (NCDs) etc.

The top ten States which have registered highest consultations through eSanjeevani and eSanjeevaniOPD platforms are Tamil Nadu (32,035 consultations), Andhra Pradesh (28,960), Himachal Pradesh (24,527), Uttar Pradesh (20,030), Kerala (15,988), followed by Gujarat (7127), Punjab (4450), Rajasthan (3548), Maharashtra (3284) and Uttarakhand (2596).

The majority share in the doctor-to-doctor eSanjeevani consultations at AB-HWCs has been of Andhra Pradesh (25,478) and Himachal Pradesh (23,857) while Tamil Nadu leads in the patient-to-doctor eSanjeevaniOPD services with 32,035 consultations.

India at worst phase in its Covid fight : Dr VK Paul

PNS ■ NEW DELHI

Niti Ayog member Dr VK Paul on Sunday said India has 1,466 cases per million whereas the world average, into the seventh month of the pandemic, is around 2,500 per million even as he warned people not to be complacent if cases begin to decline.

“The trailer is over I think, but we are still before the interval,” he said at a webinar organised by the India International Centre on the topic towards a holistic long-term medicare system.

He pointed out that currently, India is experiencing the worst phase in its fight against Covid-19 with a total of 64,399 new coronavirus cases getting

Mortality rates in India continue to be low

reported in the last 24 hours, taking the overall caseload to 21,53,011, while the death toll mounting to 43,379 with 861 fresh fatalities.

But there may be a silver lining said Dr Paul.

Citing the day-wise daily new cases data, he said, “If we look at the five-day moving average, we could see some kind of stabilisation; I do not know whether it is true or random, that only time will tell. Maybe, there is something out there, which is indicating that we may have moved away from

the exponential rise and we may be stabilising. But that only time will tell.”

Dr Paul said that the first phase of the Covid-19 pandemic was in the most populous cities, in the western half of the nation, where the pandemic originated.

It seems now that the pandemic in this part of the country is now reaching some kind of peak. “As we have seen in the context of Delhi,” he added.

Dr Paul said, “We still have large swathes of our geography and large swathes of our population, which are naive to this virus. The virus loves people, the virus loves dense places, the virus loves irresponsible citizens who do not look after their respiratory secretions and do not maintain physical dis-

tance.”

He insisted that mortality rates in India continue to be low and in terms of response, home-based isolation protocols have succeeded. “Deaths will be imprinted in pages of history, how many deaths happened in this pandemic in a given nation? Need to keep a sharp eye number of deaths? In case of fatality rate, India is currently at 2.06 per cent. Some states have below 1 per cent case fatality rate. The highest we have seen for a state is 6 per cent or little above 6 per cent” said Dr Paul.

He insisted that in India the mortality burden so far has been on the lower side. “We would like to keep our case fatality rate below 1 per cent and it is possible,” he added.

CPCB proposes fine up to ₹1L for incessant honking, loud construction activity at odd hours

PNS ■ NEW DELHI

Incessant honking, loud construction activity, loud-speakers at odd hours among other noise pollution actions will attract fines ranging from ₹1,000 to ₹1 lakh, country’s top pollution watchdog Central Pollution Control Board (CPCB) has proposed.

The new fines have been proposed in response to a set of cases going on in the National Green Tribunal (NGT) regarding noise pollution wherein the applicants complained that despite sever-

al court orders, the problem of noise pollution continues in the national capital.

In November 2019, a bench headed by the NGT chairperson A.K. Goel had

asked the CPCB to look at revising fines for bursting crackers and for repeated violations. The tribunal had also asked laying down stringent

compensation for tampering with the sound limiters.

In a report filed with the NGT in June this year, the CPCB came out with a string

of penalties for violation of noise pollution norms.

For instance, violation of norms regarding the use of loudspeakers/public address system can result in seizure of the equipment and a fine of ₹10,000.

Similarly, violation of noise pollution norms regarding the use of diesel generator sets can result in sealing of DG sets and a fine of ₹10,000 to ₹100,000 depending upon its size.

The violation in cases of sound-emitting construction equipment can result in a

fine of ₹50,000 and its seizure or sealing.

The violation of noise norms while bursting fire-crackers beyond the time limit (prescribed by the Supreme Court) could attract a fine of ₹ 1,000 (in the residential, commercial or mixed zone) and ₹3,000 (in a silence zone).

But in case of violation of norms during public rallies, marriage procession or any religious event, a heavier fine of ₹10,000 could be levied on the organiser in residential/commercial or mixed

zone and ₹ 20,000 in a silence zone.

In case of the first violation of noise rule within a fixed premise in a function organised by the resident welfare organisation, a marriage function, public or institution event, banquet hall, open ground functions, a fine of ₹20,000 may be levied while a second violation could result in a fine of ₹40,000.

However, more than two violations could result in a fine of ₹100,000 and sealing of the premises, as per the CPCB proposal.

Death toll in Idukki landslide at 42 now

KUMAR CHELLAPPAN ■ KOCHI

The death toll in Friday's landslide at Munnar in Kerala reached 42 as search and rescue team retrieved 17 dead bodies by Sunday evening. The rescue team had retrieved 25 dead bodies on Saturday. A family of 18 members were perished in the disaster leaving a lone survivor.

Efforts are on by the NDRF team to locate the workers who were washed away in the early morning water rush. But those engaged in the operation said that chances of locating any more survivors were remote because of the prevailing weather condition.

The Kerala Government has come under severe criticism from opposition parties as they alleged that the solatium of ₹2 lakh granted to the deceased by the administration was low compared to what

was offered to those who killed in Friday evening's air crash involving Air India Express Dubai-Kozhikode flight. The Kerala Government had declared ₹10 lakh each to the families of those who lost their lives in the air crash.

Union Minister of State for External Affairs who visited Munnar and Rajamali said that the Kerala Government should be more humane in its approach towards the victims of the landslide in the High Ranges. "A compensation matching the solatium allocated to the deceased in the air crash should be provided to victims in Munnar landslide," said the union minister.

Inclement weather continued to torment most of the 14 districts in the State on Sunday. The State Disaster Committee had issued red alert in seven districts while orange alert has been issued in six districts on Sunday.

Death and destruction were reported from various low lying lands in the districts of Alappuzha, Kottayam, Pathanamthitta and Idukki in southern Kerala. Situation was no different in Wayanadu, Kozhikode, Thrissur and Malappuram as rivers in all these districts have been overflowing since Saturday.

The Main Central Road connecting Angamali with Thiruvananthapuram was flooded in various places and this threw traffic out of gear in most places. According to Indian Meteorological Department many districts in Kerala are likely to receive heavy rainfalls on Monday also. There are strong possibilities of sea waves of 4 meter height hitting the coastline from the southern end to the northern tip of the Kerala coast in the next 24 hours, announced the IMD.

Kerala reports 1,211 new cases

KUMAR CHELLAPPAN ■ KOCHI

Kerala, battered and bruised by nature's fury for the last three days saw Covid-19 continuing its dance of destruction across the State as 1,211 new patients were diagnosed with the pandemic on Sunday.

According to the media release issued by the Government of Kerala (chief minister Pinarayi Vijayan does not meet scribes on Sunday), 1,026 patients contracted Covid-19 through social transmission. Thiruvananthapuram continued to top the list of districts with 292 Covid-19 cases while Malappuram (170) and Kottayam (139) came second and third respectively.

The only news that offered consolation was in the number of patients who were cured of covid-19 and discharged from hospitals. The day saw 970 patients leaving hospitals for homes.

The new patients include 76 expatriates and 78 persons from other parts of the country.

There were 103 persons who could not pinpoint the source from where they contracted the pandemic.

The release said 12, 347 patients were being treated across the State for the pandemic out of which 11, 742 are in hospitals. On Sunday, 1,278 persons were admitted to the hospitals on account of Covid-19.

Infected people roaming around pose big threat to health of others: Officials

PRADEEP SAXENA ■ ALIGARH

The negligence of the district administration and the health department has proved to be a threat to health of many people now. Covid positive patients are roaming around in the public and no wonder how many people they have come in contact with.

A 60-year-old corona positive woman, in Jawahar Nagar, was found selling vegetables. Don't know how many people would have come in contact with her. A 13-year-old girl of the same family went to the mill to get flour. The danger of spreading the infection to the girl child also cannot be ruled out.

6 people of the same family were found infected in Jawaharnagar. The infected patients were not admitted even after 20 hours had passed. Meanwhile, the family members continued to do their work like other days. Such carelessness is coming to the fore. That too in a situation when the infection of corona in the district is spreading rapidly.

The work of sealing and sanitizing the areas around the house of infected patients is also not being done prop-

erly. Infections are also spreading by seeking contact with infected patients and delaying their reports. Systems like Containment Zone and Red Zone are no longer visible anywhere. There is a provision for penalty on entering the market without wearing a mask. But there is no shortage of people who are taking risks themselves and putting other people's lives at risk as well. Policemen are remaining mute and simply spectating people roaming around the streets without masks. Social and physical distance is also not being followed in the market. For this, no concerned efforts are being done by the district administration.

Vishnu Kumar Bunty, social worker told that the infected woman of Jawahar Nagar was selling vegetables. She was not admitted even after 18-20 hours. The girl at her house went to the store to get the goods. The businessmen of Vishnupuri were also not admitted for about 18-20 hours. When the infected patients are not being admitted, then when and how will they check the people who come in contact with them. Then how will Corona break the chains. There is a need to follow the rules strictly and act honest-

ly.

Dr. BP Singh, CMO stated that after the list of infected patients is out, attempt to admit the Covid +ve patient at the earliest are made. If it is delayed then it is not good. Awareness and public support is necessary to break the corona infection chain. Health department and administration is also making efforts for this. The court is also very serious about social distance and masks.

A PAC Jawan who was covid positive was found roaming in the Hathras Market.

A Jawan from the Provincial Armed Constabulary(PAC), who had tested positive for Covid -19 along with 11 others two days ago, was found roaming in the market in Hathras, near the district hospital where he was admitted on Friday.

According to sources the Jawan tried to hide his identity by saying that he came to buy medicine for a patient admitted in the hospital. However later on he admitted that he is covid positive and stepped out to buy medicine for his upset stomach as no one in the isolation ward was giving medicines for his upset stomach.

Temple trust land given free on rent to Church in TN

KUMAR CHELLAPPAN ■ CHENNAI

The uninitiated may see this as the standing proof of the Social Justice for which the Dravidian political parties stage agitations across Tamil Nadu. But this has resulted in creating a serious wedge between the Hindus and Christians in the State and the responsibility lies with the Hindu Religious and Charitable Endowment Department of Tamil Nadu.

More than four grounds of prime land belonging to the famous Sri Gangaadswar Temple in Chennai's Purasawalkam area has been given free on rent to the Salvation Army, an organization engaged in proselytization. "The Divisional Head Quarters

of the Salvation Army operates from the premises along with a Church, absolutely free of cost as the HRCE has given it on Rent Free basis to the Church," said TR Ramesh, president, Temple Worshippers Society, Tamil Nadu.

Ramesh said the land and building given to the Salvation Army are worth ₹2.5 lakh per year but the HRCE has not collected anything till date from them. This land and building belong to the Temple Trust and as per the by-laws governing

the Temple properties, the land or building can never be rented out or leased or sold to a non-Hindu organization.

It may be remembered that the Madras High Court had asked the HRCE Department in 2018 to inform the court about the "whereabouts" of the 50,000 acres of Temple lands in the State to which the Department is yet to give any report.

The HRCE officials remained uncommunicative . according to Ramesh, they refused to part with any information despite his efforts to get the terms and conditions on which the premises has been given to the Salvation Army.

H Raja, national secretary, BJP, who launched the Hindu Temples Reclaim Movement

has some shocking information with him. "We took a sample survey of the temples. In the survey, we uniformly found that 5 per cent of the temples exists no more. Among the 38,646 temples, we estimate that at least 1,800 temples could have been demolished to give way to buildings and shopping complexes. Then, at least 20 per cent of the temples have been abandoned or are under-used," said Raja.

Ramesh had some startling information to make on Sunday. "Peaceful soldiers of Abrahamic religions along with pseudo Hindus have encroached the Sree Kailasanathar Swamy Temple at Raasipuram and built public toilets right next to the temple," said Ramesh.

Army intelligence, national intelligence agency question fake colonel

PRADEEP SAXENA ■ ALIGARH

A fake lieutenant colonel resident of Nurpur, Ludhiana, who cheated people in the name of being admitted to the Army, was questioned by the Army Intelligence and intelligence agency in the district prison. Along with this, the site of arrest of this fake lieutenant colonel was also checked.

It is said that the Army Intelligence also closely inspected the vehicle recovered from the fake colonel. They also recovered three SIM cards. It has been told that there are 15 cases of cheating on this fake colonel in Punjab as well as in Haryana and Rajasthan. Police of three states were looking for

him.

Pradeep alias Piru, a resident of Nurpur Ludhiana, used to cheat people in the name of being recruited into the army by being a fake lieutenant colonel in the name of his brother Shrawan Singh son of Gurmel Singh. He had taken seven and a half lakh rupees in the name of enlisting in the army from Ramkumar, son of Kalicharan, resident of Kudwara village of Mont police station in Mathura district.

While registering a report on Ramkumar's statement, the police detained a fake lieutenant colonel in uniform in a car near Battodevi School in village Bhilpur. Fake PAN card, fake ID, fake canteen card,

fake identity card, fake educational records were recovered from him.

After the fake lieutenant was caught, the Army Intelligence is also trying to find out to whom its wires are connected. A four-member team of Army Intelligence led by Major Gaurav Niranjana inspected the arrest site on and recovered three SIM cards.

Pradeep alias Piru was admitted to the Army in 2002 on the basis of his Shrawan Singh's credentials and was sacked in 2016. After that, he was roaming around and cheating on people. It has been told that a woman also used to work along with him. Police is searching for her.

Terrorist killed, two hurt as Army foils infiltration bid in Poonch

Jammu: Alert jawans of the Indian Army eliminated one terrorist while two others received injuries when an infiltration bid was foiled along the line of control in Krishna Ghati sector of Poonch on Friday.

Thorough searches were being conducted in the area to retrieve the dead body of a terrorist but the same was dragged away from the site.

Meanwhile, a fresh incident of ceasefire violation was also reported late Sunday evening in Shahpur Kirni and Krishna Ghati sectors of Poonch.

According to a Jammu based Defence Spokesman, Lt-Col Devender Anand," a group of terrorists had attempted to infiltrate from across the LoC in Krishna Ghati sector on August 7, 2020. The alert Indian Army troops detected the terrorists close to LoC and immediately engaged them resulting in on the spot killing of one terrorist and serious injuries to other two".

Defence PRO further stated, during searches it was found that the dead body of the terrorist had been dragged away from the incident site. However, one AK 47 Rifle, two AK 47 Magazines and some eatables were recovered from the incident site.

Defence PRO said, "Pakistan markings on the eatables and a few other items clearly indicate the complicity of Pakistan in sponsoring terror activities in J&K".

He said, the security forces are maintaining a robust Counter Infiltration grid along the Line of Control to foil any nefarious designs by Pakistan.

According to Lt-Col Devender Anand, "on Sunday at about 5.50 p.m Pakistan initiated unprovoked ceasefire violation along the line of control by firing with small arms and shelling mortars in Shahpur Kirni and Krishna Ghati sectors in Poonch. "the Indian Army retaliated befittingly", he added.

119 more succumb to virus, 5,994 new infections in TN

KUMAR CHELLAPPAN ■ CHENNAI

Number of Covid-19 cases across Tamil Nadu remains critical and there is no let up in the fatalities being reported from various places in the State. On Sunday, the Government medical bulletin said 119 persons succumbed to coronavirus while the number of new cases diagnosed with covid-19 showed 5,994.

This is for the eleventh day in a row Tamil Nadu is testing less than 6,000 persons per day. On August 1, the State had 5,879 patients while the numbers came down to 5,875 on August 2, 5,609 on August 3. Though the number further came down to 5,063 on August 4, since the last five days it has been showing hike in the number of positive cases.

As part of aggressive testing carried out across the State, 68,179 persons were tested on Sunday. The number of persons discharged from hospitals till date crossed the 2.38 lakh on Sunday. This is against the 2.96 lakh persons diagnosed with covid-19 till date in the State.

There were 53,336 active patients across Tamil Nadu on Sunday.

Chennai tested positive for 989 out of the 5,994 new patients across the State. Chengalpatt (397), Kancheepuram (393) and Thiruvallur (396) remained problematic districts in the cluster of four districts which include Chennai.

Theni (360) is the only other district which tested more than 300 new patients other than the four districts cluster led by Chennai. The death toll in Tamil Nadu reached 4,927 on Sunday.

WB OK's charter flights from abroad

PIONEER NEWS SERVICE ■ KOLKATA

The Bengal Government which has temporarily banned flights from corona hit regions have however decided to let international charter flights ferrying Indian nationals land in the State.

The State Government has conveyed its intentions to the External Affairs Ministry saying that all the corona negative patients taking chartered flights to Bengal would be allowed to land at State airports provided they board the flights after having tested for corona and the stated flights follow certain standard operating procedures.

"Only those with negative RT PCR reports will be allowed," Government sources said adding a letter to this effect had been sent to the Union Government on Saturday.

The standard operating procedure in such case will be effected from August 10, sources said adding the MEA has been requested to pass on the SOP to the Aviation Ministry and

Indian Missions abroad.

The flights coming to Kolkata will be required to carry clearance certificates from the Indian Missions or the MEA.

Besides it has also been said that the respective airlines ferrying in stranded passengers from abroad will have to apply for a no-objection certificate from the State Government providing the sponsor, the number of passengers along with their details apart from an undertaking that the passengers so flying in are corona negative.

With the total number of infected patients in Bengal passing 1 lakh mark the State government has taken certain strong measures that include restrictions on the international flights and the flights coming from the corona hit regions of the country.

Besides, the Government has also taken a decision to impose bi-weekly lockdowns to break the corona chain in the State to some extent.

Shami's ex-wife gets life threat for praising Ram Puja at Ayodhya

SAUGAR SENGUTPA ■ KOLKATA

Hasin Jahan the estranged wife of India fast bowler Md Shami has lodged a formal complaint with the Kolkata Police after getting life threats from some people for praising the ground-breaking ceremony at Ram Temple site in Ayodhya.

Prime Minister Narendra Modi inaugurated the programme at Ayodhya on August 5 after which Jahan, also an actor and a model congratulated the nation and called for religious unity.

"Soon after she posted her comments some people started trolling her and she was even given rape and murder threats," a close acquaintance said adding Jahan had always been known for outspoken ways.

The actor on Sunday registered a formal complaint with the Lal Bazar police headquarters in Kolkata seeking action against people who had been harassing her on the Net, sources said adding the police were investigating the matter.

Cases under relevant sections of the IPC and IT laws have been registered sources said.

"The offenders have told her that being a woman from a particular community she should not have made such comments," sources said adding however that the actor had no immediate intentions of joining politics.

Besides lodging a police complaint Jahan who hails from Birbhum district of Bengal is also known to have brought the matter to the notice of Prime Minister Narendra Modi, Home Minister Amit Shah and Chief Minister Mamata Banerjee, sources said.

AI crash: Capt Sathe's mortal remains arrive in Mumbai, funeral tomorrow

TN RAGHUNATHA ■ MUMBAI

The body of Capt. Deepak V. Sathe - who was killed in the ill-fated Dubai-Kozhikode Air India Express flight crash - was brought from Kochi to Mumbai in cargo flight on Sunday. His funeral is expected to be held on Tuesday.

Captain Sathe's mortal remains were flown from Cochin International Airport in Kerala to Mumbai's Chhatrapati Shivaji Maharaj International Airport (CSMIA), from where the bereaved family members the body was received by family members, his colleagues, Air India officials and aviation fraternity who paid tributes to him.

Capt Deepak's family lives in the Jalvayu Vihar complex in the upmarket Powai off Andheri (East) in north-eastern Mumbai. Capt. Deepak is survived by his wife and two sons, Shantanu and Dhyananjay - both of whom have graduated from Indian Institute of Technology-Bombay (IIT-B). His elder son Shantanu - who is currently in the United States, while younger son Dhyananjay works for a firm in Bengaluru, while daughter Anjali lives in Mumbai.

Since Shantanu is based in Seattle and is expected to reach Mumbai only by Monday, late Sathe's family has scheduled his funeral for Tuesday.

Late Capt Sathe's aged parents are in Nagpur, it is not certain yet that they will be arriving in Mumbai for son's last rites.

In a related development, late Sathe's family has appealed to the media for privacy in its hour of grief.

"Wing Commander (Retd) Deepak Sathe's demise has pained the entire Sathe family and we are all together. Under these circumstances, we are unable to answer any media queries, so kindly do not insist," the family said in a statement put out on the social media Sunday evening.

The bereaved family sources said that late Capt Sathe had planned to make a surprise visit to Nagpur to celebrate his mother's 84th birthday on Saturday. But, destiny had other plans for late Capt Sathe. He had last met his parents in March this year and was constantly in touch with them over the phone since then. He had spoken to his parents a day before the aircrash.

However, it was not clear whether Capt. Sathe's aged parents - both in their nineties and who live in Nagpur - would be arriving here for the last rites.

An IAF pilot for 27 long years, he had joined Air India in 2005, after his retirement. With 10,000 hours of flying experience on the Boeing 737 aircraft, late Capt Sathe had flown 6,662 of these hours as the commander.

K'taka Health Minister tests corona positive

Bengaluru: Karnataka Health Minister B. Sriramulu on Sunday said that he has tested positive for coronavirus. He is the fourth Minister in the state to be diagnosed for the disease, apart from Chief Minister B.S. Yediyurappa.

"In the wake of flu on Sunday, I have been tested for coronavirus and came positive," he said on social media.

Hospitalised in a state hospital in Shivajinagar, Sriramulu expressed confidence that he will get cured soon, and asked people not to worry.

From the beginning of the pandemic in March, the minister said that he has been extensively touring the state to review the Health Department's work and make arrangements to combat the virus.

Sriramulu said that he has prayed to God to heal him soon and bestow strength to serve more people during these hard times.

Meanwhile, all the people who came in contact with him recently have been requested to take precautionary measures.

State Ministers B.C. Patil, S.T. Somasekhara and C.T. Ravi have also tested positive for coronavirus.

Gujarat's virus tally breaches 70K-mark, toll climbs to 2,654

Gandhinagar: Gujarat's Covid-19 tally breached the 70,000 mark on Sunday as 1,078 fresh cases were reported, while 25 more deaths took the toll to 2,654, health officials said.

The state's total number of cases was at 71,064 following the detection of fresh infections.

As many as 1,311 patients were discharged on Sunday, taking the total number of recoveries to 54,138.

Surat, the new Covid hotspot registering 20.59 per cent of Sunday's positive cases, saw 222 cases, while Ahmedabad saw 153 cases coming up.

Vadodara once again after Saturday, saw its daily spike climbing to 110.

Vadodara was followed by Rajkot 95, Jamnagar 63, Panchmahals 47, Bhavnagar and Amreli with 35 each, Bharuch 28, Junagadh and Gandhinagar with 27 each, Kutch 25, Valsad 21, Dahod and Surendranagar with 18 each, Kheda, Mahesana and Patan with 11 each, Botad, Sabarkantha and Narmada with 10 each, Mahisagar, Banaskantha and Morbi with 9 each, Porbandar and Dap with 7 each, Anand and Devbhumi Dwarka with 5 each, Navsari 3, Aravalli and Dang with 2 each and Chhota Udepur with one positive case.

The total number of Covid deaths in Ahmedabad has reached 1,638. Besides, 505 people have died in Surat, 100 in Vadodara, 46 in

Gandhinagar, 45 deaths in Rajkot, 30 deaths in Patan, 26 deaths in Bhavnagar, 24 in Aravalli, 23 in Mahesana, 17 in Panchmahals, 16 in Banaskantha, 15 in Kheda, 14 in Anand and 11 in Bharuch.

The death toll rate of Ahmedabad which used to be around 81 per cent of the total toll during the peak in June gradually got lower. On Sunday, it came down to 61.71 per cent. Gujarat's mortality rate has come down under 4 to 3.73 per cent, but is still one of the highest in the country.

Till now the health authorities have conducted nearly 10 lakh tests, 9,87,630 RT-PCR tests in Gujarat. Out of a total RT-PCR tests carried out in the 9,16,566, have been found negative.

There are 14,272 active cases, out of which the condition of 14,199 is stable, whereas 73 critical patients are still on ventilator.

Currently, there are nearly 4.9 lakh people quarantined in the state at 4,88,222, where 4,86,610 are home quarantined and 1,612 in government facilities.

New cases coming up in Agra's rural belt

Agra: A number of new coronavirus cases now getting reported from the rural hinterland of Agra has got the authorities worried, even as 34 new cases took the district's total tally to 2,065.

Three members of a family in Barara village were found positive while several villages on the Gwalior Road and Shamshabad Road too have reported new coronavirus cases.

In a village in Bah area, three generations of a family were found corona positive. New cases have been reported from villages in Fatehabad area as well.

Meanwhile, Mathura district reported 25 new cases, Mainpuri 26, Etah 35, and Firozabad 13 cases in the last 24 hours.

Active cases in Agra have gone up to 297, with 1,667 recoveries. The recovery rate is 80.73 per cent. The number of containment zones in the city is 121.

Agra's infection rate has steadied at 3.23 per cent, and is considered to be on the lower side compared with other cities of Uttar Pradesh.

The death rate too has come down to 4.89 per cent from 6.30 per cent earlier on.

The SN Medical College management says it is now fully geared with trained manpower and medical infrastructure and medicines. A 200-bed hospital is equipped with dialysis machines, ventilators, and facilities for plasma therapy etc.

FIRST COLUMN

October surprise awaits the US?

Maybe Trump will arrange the premature certification of a COVID-19 vaccine, so he can roll it out just before the Nov 3 election

An “October Surprise” in the US is now almost inevitable, because that will be US President Donald Trump’s last chance to get re-elected legitimately. Trump might try to cling to office even if he loses the vote, but it would be a lot easier and neater if he actually won a majority in the Electoral College on November 3. In US political jargon, an “October Surprise” is a news event deliberately created or timed to influence the outcome of an election, particularly one for the US presidency and usually involves foreigners or a threat to the nation. It is planned such that all other issues are forgotten, Americans rally around the flag and the incumbent wins on a surge of patriotism. Or that’s the theory, at least.

The same thing happens elsewhere, too, of course and not necessarily in October. That’s when it needs to happen in the US to win a presidential election. For instance, a “July Surprise” happened recently in Belarus because of the August 9 presidential election. Alexander Lukashenko, the strongman who rules Belarus, “discovered” Russian mercenaries in his country. It matters little that they were unarmed and on their way to Istanbul, but President Lukashenko told his people that there was a plot. “So far there is no open warfare, no shooting, the trigger has not yet been pulled, but an attempt to organise a massacre in the centre of Minsk is already obvious. Only I can save our country. Vote for me,” was Lukashenko’s impassioned plea to his citizens.

Trump will need something like that because otherwise the Coronavirus is going to kill him politically. This was not true as recently as early June, because up until then the US was not performing especially badly in dealing with the pandemic. It looked a lot worse because of Trump’s bizarre behaviour — the endless, shameless lies, the narcissism, the suggestions that people should inject bleach and so on — but in terms of COVID-19 deaths per million people, the US fatality rate was still lower than other major Western countries, except for Germany and Canada.

The US was late to go into the lockdown, but so were they all, at least compared to most Asian countries. Until recently, if you were a Trump supporter, you could still believe he was doing a good job. It was Trump’s rush to end the lockdown, not all the earlier nonsense, that did the real damage. He believed that he would lose the election if the economy didn’t revive, but by opening up too fast he managed to revive the pandemic at the same time.

The numbers tell the tale. This week the US will record its 1,65,000th death from COVID-19. That’s almost a quarter of all the Coronavirus fatalities in the world. Much worse, US deaths are still going up while casualties elsewhere in the developed world have fallen steeply. That’s almost entirely due to Trump.

Take Canada, for example. It is very similar to the US in its economy and demography but different in social and political terms. Canada has universal healthcare and a much less drastic divide between the rich and the rest, for example, which probably explains why the US’ cumulative death rate per million is 484, while Canada’s is only 237. The history is, therefore, an American death rate twice as high as Canada’s: Not great but structurally inevitable. By now, however, Canada has managed to get its casualties down to ten a day, whereas the US is back up to around a 1,000 fatalities a day.

Even allowing for Canada’s much smaller population, that is ten times worse. This is what coming out of a lockdown too early did to the US, and it is all down to President Trump. The pandemic is raging once again in the US and there may be a quarter-million deaths there by election day in November. US “deaths per million” are going up three per day, which means that the US will overtake Chile (now at 509 casualties) in less than one week, Italy (582) in a month, Spain (609) in five weeks. It might even catch up with the UK (682) by election day.

Most of those newly-dead Americans will be over 60, so probably they would have been Trump supporters. Their relatives and friends are bound to notice eventually. As it is, Joe Biden’s lead over Trump in the polls has already widened to 10 per cent. How could Trump turn that around in the remaining 82 days? His only hope is to manufacture an “October Surprise” involving China, a restaged “Tonkin Gulf Incident” i.e. the one real and one phantom firefight that embroiled the US in the Vietnam War.

Or perhaps he could manufacture a terrorist “threat” so humorous that it would give him a pretext to declare martial law nationwide. Or maybe Trump will arrange the premature certification of a COVID-19 vaccine so he can roll it out just before the November 3 vote. If it kills a lot of people later on, who cares? He won. Trump knows that if he loses the November election, he will spend the rest of his life in court, possibly even in jail. He will do whatever it takes to win. It isn’t over yet.

(Gwynne Dyer’s new book is ‘Growing Pains: The Future of Democracy and Work.’)

—PDP LEADER AND FORMER J&K MINISTER

NAEEM AKHTAR

Nip the NPA crisis, now

The Govt and the RBI must urgently reassess the moratorium policy and limit it only to the hardest-hit, address the delays in IBC resolution and not drive away depositors

After the release of the Reserve Bank of India’s (RBI’s) half-yearly Financial Stability Report (FSR) on July 24, shares of banks and finance companies were battered at the stock market. Though the private banks (PVBs) like ICICI, HDFC, Axis Bank, Bandhan Bank got seared, the public sector banks (PSBs), too, bore the brunt of the bloodbath on the bourses. The mayhem exposed the structural weaknesses of the Indian banking system and the severity of the Non-Performing Asset (NPA) crisis looming over them.

As the RBI Governor Shaktikanta Das emphasised (and his sentiment was echoed by the Chairman of the 15th Finance Commission) the soaring NPAs and the consequent capital erosion of the banks would need immediate recapitalisation of both PVBs and PSBs.

To alleviate the pandemic-created stress on borrowers, the RBI has already placed a moratorium on the payment of loan instalments and deferment of interest payments till August 31. However, the banks are fearing — as articulated by the HDFC Chairman — that even solvent borrowers may take advantage of this relaxation and not repay their loans. This would further worsen the financials of the banks.

The FSR has also acknowledged that there is a major risk that the moratoriums may have serious implications on the financial health of the banks. Overall, about 50 per cent of all loans — 65 per cent of Micro, Small and Medium Enterprises (MSME) borrowings and 56 per cent of retail loans — were under moratorium as on April 30, against only 39 per cent of corporate loans. The PSBs have a larger share — 58 per cent, 82 per cent and 80 per cent respectively for corporate, MSME and individual loans, as against 20 per cent, 43 per cent and 34 per cent respectively for the PVBs.

As far as Non-Banking Financial Companies (NBFCs) are concerned, 56 per cent, 61 per cent and 46 per cent of the loans are under moratorium respectively for these categories. The scenario is really disquieting. The RBI has assumed a contraction of the Gross Domestic Product (GDP) by 4.4 per cent, gross fiscal deficit of 10.9 per cent and Consumer Price Inflation (CPI) of 4.1 per cent as the baseline scenario assuming steady recovery from the second-half of the current fiscal. The GDP contraction and fiscal deficit numbers may be a tad too optimistic, given the severe economic disruptions with no end in sight.

The FSR has stated that the Capital to Risk-Weighted Assets Ratio (CRAR) of Scheduled Commercial Banks (SCBs) stood at 14.8 per cent while their Gross Non-Performing Asset (GNPA) ratio stood at 8.5 per cent in March. But it projected that the GNPA ratio may worsen further to 12.5 per cent by March 2021 under the optimistic baseline scenario and may escalate to 14.7 per cent under a severely-stressed scenario.

The implications of these numbers are indeed very serious. As of March, the total NPAs of SCBs stood at ₹8.62 lakh crore; at the baseline scenario which seems a bit hopeful, this would rise to around ₹13 lakh crore and at the worst case scenario to ₹15 lakh crore, at which level, all undercapitalised and overleveraged banks would cease to be going concerns.

In fact, the pandemic has wiped out all the work done so far by the SCBs by using a large part of their capital to correct their balance sheets

“THE RECAPITALISATION BOND ROUTE BY WHICH THE GOVERNMENT ISSUES BONDS TO THE BANKS, WHICH PROMPTLY INVEST THEM IN GOVERNMENT SECURITIES, IS NOTHING MORE THAN AN ACCOUNTING TRICK. APART FROM INCREASING THE GOVERNMENT’S INTEREST LIABILITIES, IT RARELY ADDRESSES THE DEEPER STRUCTURAL PROBLEMS OF THE BANKS. WITH LOW CREDIT OFFTAKE AND HIGHER NPAs, BANKS WILL BE FORCED TO FURTHER LOWER THE DEPOSIT INTEREST RATES — ALREADY AT THE ROCK-BOTTOM — AND DRIVE DEPOSITORS TOWARDS THE EQUITY MARKET OR GOLD. THIS IS HARDLY A RECIPE FOR REVIVAL

— which was so assiduously pursued by the RBI during the last few years. This has seen a steady decline in their GNPA ratio from 11.5 per cent in March 2018 to 8.5 per cent in March this year. Though this reduced their CRAR, however, it still remained above the Basel III-compliant RBI norms. Now, the loans are likely to rise to a 20-year high as a result of the crisis triggered by the pandemic.

As the RBI Governor said in the foreword to the FSR, “The financial system in India remains sound. Nonetheless, in the current environment, the need for financial intermediaries to proactively augment capital and improve their resilience has acquired top priority. In the evolving milieu, while risk management has to be prudent, extreme risk-aversion would have adverse outcomes for all.”

Under the current crisis, risk aversion, both by banks and borrowers, is only to be expected as evidenced by the banks parking their excess liquidity with the RBI instead of lending. Credit demand has not picked up despite the easing of the lockdown and financial vulnerabilities are likely to be amplified, leading to a further deterioration in the asset quality of the banks due to the piling up of mountains of bad loans.

As a 90-day window is given for paying the loan instalments to keep the loans from being classified as NPAs, the exact position would be known only in December after the expiry of the moratorium on August 31. But there is an urgent need to recapitalise the banks — both PSBs and PVBs — for building stronger buffers for them to be able to absorb the losses.

The recapitalisation bond route by which the Government issues bonds to the banks, which promptly invest them

in Government securities, is nothing more than an accounting trick. Apart from increasing the Government’s interest liabilities, it rarely addresses the deeper structural problems of the banks.

While the GNPA ratio of PSBs may increase to 15.2 per cent under the baseline scenario (16.3 per cent under the worst-case scenario), the ratios of the PVBs and even the foreign banks are likely to increase to 7.3 per cent and 3.9 per cent, respectively. Erosion of the capital will shrink the system-level CRAR of the banking sector as a whole from 14.6 per cent in March to 13.3 per cent by next March under the baseline scenario and to 11.8 per cent under severe stress conditions.

Five banks will fail to meet the minimum prescribed CRAR level of nine per cent by March 2021 — five more will be close (under 10 per cent) without merger or recapitalisation which might increase their systemic resilience. However, mergers of PSBs, now practically stalled because of the lockdown, have their own problems. The NPAs of the State Bank of India (SBI) worsened after its merger with associates two years ago, with write-offs and persistent slippages eating into profit and capital both, besides impeding the growth of credit.

Other mergers — Bank of Baroda (BoB) with Vijaya Bank and Dena Bank and Punjab National Bank’s (PNBs) 1993 merger with the New Bank of India also faced many problems. It is unlikely that the current mergers of healthy banks with weak banks will improve the health of the banking system as a whole; in any case, they will not cause any significant reduction of the NPA ratios of the amalgamated banks. Then there is the added danger

of spillover effects from the NPAs of NBFCs, which are still unable to recover from the IL&FS shock of 2018. Bank lending to NBFCs had increased dramatically from ₹3 lakh crore in December 2016 post-demonetisation to ₹8 lakh crore in May this year. Any increase in their NPAs will automatically trigger a contagion, leading to further deterioration of the banking system. The gravity of the situation cannot be overemphasised.

The structural problems with the recovery of bad loans have remained unresolved even after operationalisation of the Insolvency and Bankruptcy Code (IBC). Of the total claims of ₹3.52 lakh crore from 190 companies (till December 2019), ₹1.52 lakh crore (43 per cent) has been recovered, which of course was a significant improvement over the earlier recovery rate of 10 per cent. But only two cases — Bhushan Steel and Essar Steel — accounted for 49.5 per cent of the overall recoveries.

Given the huge number of case-loads — 1,961 as of December 2019 — and the time taken for disposal by the National Company Law Tribunal (NCLT), the system is already getting clogged like never before. With low credit offtake and higher NPAs, banks will be forced to further lower the deposit interest rates — already at the rock-bottom — and drive depositors towards the equity market or gold. This is hardly a recipe for revival. The Government and the RBI must urgently reassess the across-the-board moratorium policy and limit it only to the hardest-hit, address the delays in IBC resolution and not further alienate and drive away the depositors.

Did an Islamic State ever exist?

The modern State is a fairly recent European construct and has been borrowed to project a retrospective interpretation about what an Islamic State meant

THE roots of the concept of the State lie in the political ideas formulated in ancient Greece and the Roman Republic. Greek philosophers Plato and Aristotle write of the “polis” (the city State) as an ideal form of association, in which the religious, cultural, political and economic needs of the citizens can be satisfied. The ancient Roman idea of *res publica* is more similar to the modern concept of the State. The *res publica* was a legal system, the jurisdiction of which extended to all Roman citizens, securing their rights and determining their responsibilities.

However, it wasn’t until the 16th century that the modern concept of the

State fully emerged in Europe. Between the 17th and 19th centuries, the idea was expanded and developed in the works of philosophers like John Locke, Thomas Hobbes, Jean-Jacques Rousseau, Jeremy Bentham and Karl Marx. By the 19th century, the concept of the State as we know it today, had been practically established in various regions of Europe.

According to the noted political anthropologist Professor Irfan Ahmad, till the 17th century, “the State governed by not governing.” Seldom did it interfere in most affairs of its subjects. Its main interest was to extract levies and taxes. Its administrative scope was limited. The French philosopher, Michel Foucault, claimed that the scope of the State began to expand from the 16th century. The idea of the State in non-Western regions was no different. According to Irfan Ahmad, the nature of the State in Muslim-majority regions and in regions being ruled by Muslims was also static. It was only interested in gathering taxes and aiding the monarch and his vassals to

retain their wealth and power.

The State as we know it today, is thus a comparatively recent construct and a product of political and economic modernity. So what do concepts such as “Islamic State” or “*Riyasat-i-Madina* (State of Madina)” really mean? Such terms are often used by ideologues and politicians in Muslim-majority regions. The thinking behind them is that Islam is inherently political and its sacred texts lay out a blueprint for a State run by laws prescribed by Allah. Those who hold this view insist that such a State came into being with the arrival of Islam that actively regulated every political, economic and social aspect of the community.

Irfan Ahmad writes that till the 16th/17th century, the working of the State, even in powerful Muslim empires, was as limited as it was in non-Muslim realms. He adds that the idea of an Islamic State is actually not more than a 100 years old. According to the works of Egyptian scholars Ali Abdel Raziq and Saïd al-Ashmawi, theologically, Islam treats faith and the

concept of State separately and, in fact, puts more emphasis on faith and how it can operate as a moral guide. Ahmad writes, “to impose the modern concept of the State on 7th century Arab society is misleading.” Because of infrastructural weaknesses, the State could not have expanded its scope beyond a handful of duties, even if it wanted to.

The Syrian academic and historical Aziz Al-Azmeh, in a widely-debated 1990 essay *Utopia and Islamic Political Thought*, demonstrates that there is no political theory (about a State) in classical Islamic political thought. Fact is, those who insist that there is, are simply projecting the modern concept of the State on ancient and medieval Islamic polities, reimagining these polities as Islamic states which influenced almost every aspect of the lives of their citizens. According to Ahmad, such projections are the result of ideas that first emerged in the early 20th century.

One of the pioneers in this respect was the prolific South Asian ideologue

and Islamic scholar Abul Ala Maududi. Ahmad writes that, as a young man, Maududi was associated with *The Muslim*, a daily that took an anti-British, pro-Congress Party position and promoted Muslim-Hindu unity and a secular set-up in India. However, after 1937, Maududi changed his stance, especially when Jinnah’s Muslim League began to press for a separate Muslim-majority State. Ahmad writes that all major political players in British India had become smitten by the concepts of the State and nationalism introduced in the region by the British colonialists. The Muslim League began to speak about a Muslim State, the Congress about a post-colonial secular Indian State and the Leftists about a socialist State.

Rejecting all these concepts as ungodly, Maududi came up with the theory of Government of Allah or Islamic State. He then set out to formulate a new political theology, by interpreting Islamic scriptures in the context of the State. In a 1941 essay, he writes, “In reality, the classical Arabic

word *deen* approximately has the same meaning which the word State has in the contemporary age.” Noting that the modern State regulates almost every facet of people’s lives, he contemplated the creation of an Islamic State that would regulate every aspect of its citizens’ lives according to laws laid down by the Islamic scriptures.

Maududi understood the Muslim League as a secular Muslim nationalist organisation. So, to neutralise Maududi’s criticism, Pakistan began to borrow his ideas. Yet, Maududi’s own party could not gain much traction among voters. This was probably due to the aforementioned ploy by the State and, more so, because from the mid-1970s, even non-religious parties began to adopt ideas from Maududi and fused them with their secular outlook. His ideas in this context reached completion as an elaborate theory in his 1979 magnum opus, *Four Fundamental Concepts of the Quran*.

The theory suggested that an Islamic State existed during the early days of the faith because the sacred

scriptures were treated as an all-encompassing political constitution and that such a State fell away because of corruption and needs to be re-enacted. Interestingly, this is the narrative popularised by the Imran Khan Government. Though Maududi’s thesis was inspired by largely European ideas of the State, this does not bother those who take the revisionist historical claims of his theories as fact.

Ever since the 1980s, whenever there are claims and promises made by a variety of ideologues and leaders in the Muslim world, about working towards an Islamic State, it is assumed that it is rooted in the workings of a 7th century Islamic realm. According to Ahmad, objective history does not support this. As Egyptian scholar Nasr Abu Zayd says, “Religious scriptures are at the mercy of the ideology of its interpreter. For a communist, they would reveal communism, for a fundamentalist they would be fundamentalist text, for a feminist it would be a feminist text, and so on ...”

Trump signs virus relief order for Americans

Washington: President Donald Trump on Saturday signed executive orders extending economic help to Americans hit by the coronavirus crisis after his Republican party and opposition Democrats failed to agree on a new stimulus package.

"We've had it and we're going to save American jobs and provide relief to the American workers," he said at a press conference in his golf club in Bedminster, New Jersey.

With double digit unemployment, massive disruption to businesses from social distancing rules, and stubbornly high rates of coronavirus infection, many Americans have been relying on relief measures approved earlier by Congress, but which mostly expired in July.

Trump said his decision to circumvent Congress with executive orders would mean relief money getting "rapidly distributed."

One order aims to get \$400 a week added to unemployment benefits, while two others offer some protection from evictions and relief for student loans.

A fourth measure — opposed by many Republicans as well as Democrats — orders a freeze in payroll taxes.

Trump, speaking in the ballroom of his Bedminster, New Jersey golf club with an audience of club members cheering him and laughing at his colorful insults against opponents, said he was also working on new tax cut ideas.

However, his executive orders are likely to face court challenges, since they short-circuit Congress, which has constitutional power over most spending decisions.

Democrats, Republicans and White House negotiators had worked all last week with-

Rajapaksa takes oath as Lanka PM, cements family's grip on power

Colombo: Mahinda Rajapaksa was sworn in on Sunday as Sri Lanka's new prime minister at a centuries-old Buddhist temple after his party won a landslide victory in parliamentary elections that allowed the influential family to consolidate power for the next five years.

The 74-year-old former president and Sri Lanka People's Party (SLPP) leader was administered the oath of office by his younger brother and President Gotabaya Rajapaksa at a gathering of Buddhist monks, representatives of the diplomatic community and other senior officials.

"I am humbled by the opportunity given to me to serve my people again," he tweeted soon after starting his fourth innings as prime minister.

Mahinda Rajapaksa said the trust bestowed on him by the people will inspire him to continue to serve the country. The prime minister vowed that he would ensure that Sri Lanka would embark on a progressive journey during his tenure.

Supporters of the SLPP lit firecrackers to celebrate his

swearing-in as the 13th Prime Minister at the Rajamah Viharaya in Kelaniya, a north Colombo suburb, at the auspicious hour of 9:28 am local time.

The Rajamaha Viharaya, also known as the Kelaniya temple, dates back to 2,500 years. According to the website of the temple, it has often been associated with the rise and fall of Sri Lanka.

The SLPP, led by Mahinda and Gotabaya Rajapaksa, registered a landslide victory in the August 5 general election, securing two-thirds majority in Parliament needed to amend the Constitution to further consolidate the powerful Rajapaksa family's grip on power.

India's High Commissioner to Sri Lanka Gopal Baglay on Saturday became the first envoy to congratulate the new prime minister when he called on Mahinda Rajapaksa.

Baglay recalled that Prime Minister Narendra Modi had complimented the people and Government of Sri Lanka on the successful conduct of elections and had acknowledged the impressive electoral performance of the SLPP. *PTI*

Azar leads highest-level US delegation to Taiwan in decades

Taipei: US Health and Human Services Secretary Alex Azar arrived in Taiwan on Sunday in the highest-level visit by an American Cabinet official since the break in formal diplomatic relations between Washington and Taipei in 1979.

Beijing has already protested Azar's visit as a betrayal of US commitments not to have official contact with the island. China claims Taiwan as its own territory, to be brought under its control by military force if necessary.

Azar is due to meet with the island's independence-leaning President Tsai Ing-wen along with health officials during a three-day visit aimed at highlighting cooperation in the fight against the coronavirus.

Taiwan's government-run health care system has been credited with keeping the number of coronavirus cases to under 500 with just seven deaths, despite its close proximity to China where the virus originated.

China sees Taiwan as a key irritant in its troubled relationship with Washington, with whom it is also at odds over trade, technology, the South China Sea and China's

response to the virus pandemic.

The US maintains only unofficial ties with Taiwan in deference to Beijing, but is the island's most important ally and provider of defence equipment.

Azar is the first health secretary to visit Taiwan and the first Cabinet member to visit in six years. In 2014, then - Environmental Protection Agency administrator Gina McCarthy visited Taiwan, sparking protests from Beijing.

Azar's office said he will hold discussions on COVID-19, global health and Taiwan's role as a supplier of medical equipment and technology Azar's visit was facilitated by the 2018 passage of the Taiwan Travel Act, which encouraged Washington to send higher-level officials to Taiwan after decades during which such contacts were rare and freighted with safeguards to avoid roiling ties with Beijing.

China has cut contacts with Tsai over her refusal to recognise China's claim to the island and has brought increasing diplomatic, economic and

military pressure against her, including by poaching away several of its remaining diplomatic allies and excluding it from international gatherings including the World Health Assembly.

That, in turn, has increased already considerable bipartisan sympathy for Taipei in Washington and prompted new measures to strengthen governmental and military ties.

Also Sunday, Taiwanese Foreign Minister Joseph Wu met with the first representative of Somaliland to the island ahead of the territory's opening of a representative office in Taipei.

Wu earlier tweeted that Mohamed Omar Hagi Mohamoud had "braved Chinese pressure" — a reference to reports that China had sought to block relations between Taiwan and the region on the Horn of Africa that broke from the rest of Somalia but is not recognized by the United Nations as an independent country.

"The fact 'sovereignty & friendship aren't for sale' deserves international recognition," Wu tweeted. *AP*

Afghan council frees Taliban prisoners to set up peace talks

Kabul: A traditional Afghan council concluded Sunday with hundreds of delegates agreeing to free 400 Taliban members, paving the way for an early start to negotiations between Afghanistan's warring sides.

The declaration read out in both of Afghanistan's official languages of Pashto and Farsi calls for an immediate start to negotiations and cease fire. The move looks to bring the United States a little closer to returning its troops and ending its longest military engagement.

No date has been set but negotiations between Kabul's political leadership and the Taliban are expected to begin as early as next week and will most likely be held in the middle eastern state of Qatar, where the Taliban maintains a political office.

The Afghan negotiations were laid out in a peace deal signed by the United States and the Taliban in February. At the time of its signing it was touted as Afghanistan's best chance

at ending decades of war.

Afghan President Ashraf Ghani praised delegates for their decision, urged the Taliban to stop fighting.

Taliban political spokesman Suhail Shaheen said the decision "was a good step, a positive step." He said negotiations could start within one week of their prisoners being freed.

As for a cease fire, Shaheen said the Taliban was committed to the deal it struck with the United States and according to that deal "the cease fire will be one of the items to be discussed during the intra-Afghan negotiations."

The council's decision to free the prisoners does not come as a surprise as delegates were urged by the US at the start of the council, or jirga, on Friday to take "this difficult action" so negotiations could begin to bring an end to the war.

"To remove obstacle, to start peace talks and to stop the bloodshed, the Jirga confirms

the release of 400 Taliban prisoners," said Atefa Tayeb, a council secretary who read out the final declaration at the conclusion.

The deal negotiated between the United States and Taliban calls for the government to free 5,000 prisoners and for the Taliban to free 1,000 government and military personnel in its custody as a goodwill gesture ahead of the start of negotiations.

Kabul balked at the release but eventually freed all but the last 400. President Ghani said he was not authorized to free these because of the seriousness of their crimes, and asked for the council to decide instead. He did not detail of what the 400 were accused.

Delegates were therefore given the stark choice of either freeing the prisoners or seeing a war that has killed tens of thousands continue. The delegates said they wanted international guarantees that the Taliban would not return to the battlefield.

Washington's Peace envoy Zalmay Khalilzad spent more than a year and a half negotiating the deal with the Taliban to provide for the withdrawal of American soldiers after more than 19 years in Afghanistan.

The withdrawal began earlier this year but roughly 8,600 US soldiers remain in Afghanistan and their return

will depend on the Taliban honoring its commitment to fight against other terrorist groups and ensure Afghanistan is not again used to attack the United States or its allies.

The withdrawal of US and NATO troops is not dependent on the success of negotiations between Kabul's political leadership and the Taliban. *AP*

Pak welcomes Afghan council's recommendation

Islamabad: Pakistan on Sunday welcomed A traditional Afghan council's recommendation to release the remaining 400 Taliban members, expressing hope that the move will help in an early start to negotiations between Afghanistan's warring sides.

The traditional Afghan council concluded Sunday with hundreds of delegates agreeing to free 400 Taliban members.

"We hope that with the implementation of this step

relating to the prisoners' release, as envisaged in the US-Taliban Peace Agreement, the intra-Afghan negotiations will commence at the earliest," the Foreign Office (FO) said in a statement. The deal negotiated between the US and Taliban calls for the government to free 5,000 prisoners and for the Taliban to free 1,000 government and military personnel in its custody as a goodwill gesture ahead of the start of negotiations. *PTI*

Officials resign in Lebanon in wake of deadly blast

Beirut: Lebanon's information minister resigned on Sunday as the country grapples with the aftermath of the devastating blast that ripped through the capital and raised public anger to new levels.

The resignation comes after a night of demonstrations against the ruling elite, blamed for the chronic mismanagement and corruption that is believed to be behind the explosion in a Beirut Port warehouse.

Hundreds of tons of highly explosive material were stored in the waterfront hangar, and the blast sent a shock wave that killed at least 160 people, wounded nearly 6,000 and defaced the coastline of Beirut — destroying hundreds of buildings.

Manal Abdel-Samad said in her resignation letter that change remained "elusive" and

she regrets failing to fulfill the aspirations of the Lebanese people.

Her resignation comes as about half a dozen lawmakers offered their resignation in protest over government performance. Local media also reported that another minister, and a close advisor to Prime Minister Hassan Diab, was also expected to resign.

Diab met with his Cabinet reportedly to discuss the resignations Sunday, but there were no comments after the meeting.

"Given the magnitude of the catastrophe caused by the Beirut earthquake that shook the nation and hurt our hearts and minds, and in respect for the martyrs, and the pains of the wounded, missing and displaced, and in response to the public will for change, I resign from the government," Abdel-Samad wrote. *AP*

Riot declared as fire burns in Portland police union offices

Portland (US): A fire inside a police union building led authorities in Portland, Oregon, to declare a riot and force protesters away from the offices as violent demonstrations continue in the city that had hoped for calm after federal agents withdrew more than a week ago.

A group of demonstrators broke into the Portland Police Association building, set the fire and were adding to it when officers made the riot declaration late Saturday, police tweeted. Video shot by a journalist shows smoke and flames arising from inside the building.

Several hundred people had gathered outside the offices, which are located about 5 miles (8 kilometers) north of the federal courthouse that had been the target of nightly violence earlier this summer. *AP*

Belarus strongman president faces strong election challenge

AP ■ MINSK

Belarusians are voting on whether to grant their authoritarian president a sixth term in office, following a campaign marked by unusually strong demonstrations by opposition supporters frustrated with the country's stumbling economy, political repression and weak response to the coronavirus pandemic.

Incumbent Alexander Lukashenko, in office for 26 years, has made it clear he won't hesitate to quash any attempt by his opponents to protest the results of Sunday's election.

"If you provoke, you will get the same answer," he said after

casting his ballot.

"Do you want to try to overthrow the government, break something, wound, offend, and expect me or someone to kneel in front of you and kiss them and the sand onto which you wandered? This will not happen." But some voters were defiant.

"There is no more fear. Belarusians will not be silent and will protest loudly," 24-year-old Tatiana Protasevich said at a Minsk polling place Sunday.

The head of staff for main opposition candidate Sviatlana Tsikhanouskaya was detained late Saturday for allegedly participating in authorized protests and is likely to be in jail until at least Monday.

Thousands protest against Israel's Prime Minister Benjamin Netanyahu in front of his official residence in Jerusalem

YOUR TIME'S UP: PROTESTERS TARGET NETANYAHU OVER JOBS, COVID

Jerusalem: Thousands of Israelis rallied outside Prime Minister Benjamin Netanyahu's residence in Jerusalem on Saturday as anger mounted over corrup-

tion allegations and his handling of the coronavirus crisis. "Your time is up", read the giant letters projected on to a building at the protest site, as demonstrators

waved Israeli flags and called on Netanyahu to resign over what they say is his failure to protect jobs and businesses affected by the pandemic. *AFP*

North Macedonia cops find 94 migrants hidden in truck

Skopje (North Macedonia): Police in North Macedonia say they have found 94 migrants packed into a truck in a country's southeast.

A police patrol stopped the truck with Macedonian national license plates late Saturday near the town of Radovich, 110 kilometers (68 miles) southeast of the capital, Skopje. The truck driver fled from the scene, police said Sunday.

Police found 94 migrants from Syria, Afghanistan, Iraq and Pakistan packed into the truck cargo area.

The migrants were detained and will be transferred to a migrant shelter in the southern border town of Gevgelija, pending deportation to Greece, where they came from.

The Greek border with North Macedonia was closed earlier this year due to the coronavirus pandemic.

But trafficking networks remain active, ferrying migrants who make their way from Turkey into Greece and then attempt to head north toward more prosperous countries in the European Union. *AP*

US tops 5 million confirmed virus cases, to Europe's alarm

Rome: With confirmed coronavirus cases in the US hitting 5 million Sunday, by far the highest of any country, the failure of the most powerful nation in the world to contain the scourge has been met with astonishment and alarm in Europe.

Perhaps nowhere outside the US is America's bungled virus response viewed with more consternation than in Italy, which was ground zero of Europe's epidemic. Italians were unprepared when the outbreak exploded in February, and the country still has one of the world's highest official death tolls at 35,000.

But after a strict nationwide, 10-week lockdown, vigilant tracing of new clusters and general acceptance of mask mandates and social distancing, Italy has become a model of virus containment.

"Don't they care about their health?" a mask-clad Patrizia Antonini asked about people in the United States as she walked with friends along the banks of Lake Bracciano, north of Rome. *AP*

New Zealand marks 100 days of virus elimination

Wellington: New Zealand on Sunday marked 100 days since it stamped out the spread of the coronavirus, a rare bright spot in a world that continues to be ravaged by the disease.

Life has returned to normal for many people in the South Pacific nation of 5 million, as they attend rugby games at packed stadiums and sit down in bars and restaurants without the fear of getting infected. But some worry the country may be getting complacent and not preparing well enough for any future outbreaks.

New Zealand got rid of the virus by imposing a strict lockdown in late March when only about 100 people had tested positive for the disease. That stopped its spread. *AP*

Nagasaki urges nuke ban on 75th anniv of US A-bombing

Tokyo: The Japanese city of Nagasaki on Sunday marked its 75th anniversary of the US atomic bombing, with the mayor and dwindling survivors urging world leaders including their own to do more for a nuclear weapons ban.

At 11:02 am, the moment the B-29 bomber Bockscar dropped a 4.5-ton (10,000-pound) plutonium bomb dubbed "Fat Man," Nagasaki survivors and other participants stood in a minute of silence to honor more than 70,000 dead.

The August 9, 1945, bombing came three days after the United States dropped its first atomic bomb on Hiroshima, the world's first ever nuclear attack that killed 140,000. On August 15, Japan surrendered, ending World War II.

At the event at Nagasaki Peace Park, scaled down because

of the coronavirus pandemic, Mayor Tomihisa Taue read a peace declaration in which he raised concern that nuclear states had in recent years retreated from disarmament efforts.

Instead, they are upgrading and miniaturizing nuclear weapons for easier use, he said. Taue singled out the US and Russia for increasing risks by

scrapping the Intermediate-Range Nuclear Forces Treaty.

"As a result, the threat of nuclear weapons being used is increasingly becoming real," Taue said. Noting that the Nuclear Proliferation Treaty entered into force 50 years ago, Taue urged the US and Russia to show a (asterisk)workable way(asterisk) towards their

nuclear disarmament at the NPT review process next year.

He said that "the true horror of nuclear weapons has not yet been adequately conveyed to the world at large" despite struggle and efforts by hibakusha, or atomic bombing survivors, to make Nagasaki the last place of the tragedy.

He also urged Japan's government and lawmakers to quickly sign the 2017 Treaty on the Prohibition of Nuclear Weapons.

After taking part in the ceremony, Prime Minister Shinzo Abe criticized the treaty for not being realistic. None of the nuclear states has joined, and it is not widely supported even by non-nuclear states, he said.

"The Treaty on the Prohibition of Nuclear Weapons was adopted without taking into consideration the reality of

the harsh national security environment," Abe said at a news conference.

"I must say the treaty is different from Japan's position and approach" even though they share the same goal of abolishing nuclear weapons, he said.

Abe has repeatedly refused to sign the treaty. He reiterated that Japan's approach is not to take sides but to serve as a bridge between nuclear and non-nuclear states to encourage dialogue to achieve a total nuclear ban. Survivors and pacifist groups say Japan is virtually siding with the US and other nuclear states.

Abe cited "severe national security environment and a wide gap between the two sides on nuclear disarmament." He also noted Japan faces threats of development and modernization of nuclear weapons from

"neighboring countries in the region." Taue, who spoke before Abe, disagreed, saying: "Among the nuclear-weapon states and countries under the nuclear umbrella, there have been voices stating that it is too early for such a treaty. That is not so. Nuclear arms reductions are far too late in coming."

While Tokyo renounces its own possession, production or hosting of nuclear weapons, as a US ally Japan hosts 50,000 American troops and is protected by the US nuclear umbrella. The post-WWII security arrangement complicates the push to get Japan to sign the treaty as it beefs up its own military to deal with threats from North Korea and China, among others. An aging group of survivors have expressed a growing sense of urgency to tell their stories, in hopes of reaching

younger generations to continue their effort toward establishing a nuclear-free world.

"There is not much time left for us survivors," said Shigemitsu Fukabori, 89. He was a 14-year-old student mobilized to work at a shipyard when Nagasaki was bombed.

"I'm determined to keep telling my story so that Nagasaki will be the last place on Earth to have suffered an atomic attack."

Fukabori, who almost instantly lost four siblings, said he never forgets the pile of charred bodies, bombed-out street cars and the badly injured desperately asking for help and water as he rushed back to his house in the back of the Urakami Cathedral, which was also nearly destroyed.

"We don't want anyone else to have to go through this," he said. *AP*

Asia-Pacific may see \$31.4-54.3 bn remittance losses due to Covid-19: ADB

PTI ■ NEW DELHI

Asia Pacific, which accounts for a third of the global migrant workforce, is likely to face remittance losses of USD 31.4-54.3 billion due to the coronavirus pandemic, the Asian Development Bank (ADB) said in a report.

The Governments need to come up with policy measures to reduce the economic and social fallout arising out of it, the ADB said.

Job losses stemming from Covid-19 are hurting households around the world, but for Asia and the Pacific's 91 million migrant workers — a third of the global migrant workforce — the impacts will be particularly severe, the ADB said in August 2020 brief on 'COVID-19 Impact on International

Migration, Remittances, and Recipient Households in Developing Asia. "ADB economists estimate that the region faces remittance losses ranging from USD 31.4 billion to USD 54.3 billion. To reduce the economic and social impacts, policy responses are proposed in areas such as social protection, immigration, labour, and health," it said. In 2019, six of the 10 largest remittance recipients globally were from this region-India, China, the Philippines, Pakistan, Bangladesh, and Vietnam, the Manila-headquartered multi-lateral funding agency said. The countries likely to face more severe effects from the pandemic-induced decline in remittance inflows are the ones where remittance shares to gross domestic product (GDP)

and per capita remittances are high.

These include Tonga, Samoa, and other Pacific countries, with remittances relative to the size of their economies and populations very high.

Central Asian countries such as Georgia, the Kyrgyz Republic, and Tajikistan, sending a large number of seasonal and long-term migrants mainly to the Russian Federation and Europe, will also be hard-hit, along with some of the major migrant origin countries such as Nepal and the Philippines, it added.

Remittances to Asia and the Pacific, amounting to USD 315 billion in 2019, are an important and stable source of income for families back home and help strengthen external financing—alongside foreign

direct investment and tourism recipients—in many developing economies, said the report penned by four ADB economists.They boost general consumption as well as investment and help sustain Government debts by contributing to the foreign currency revenue base, said the economists.

Jobs and worker welfare are severely affected by the pandemic globally but some sectors are hurt more than others such as retail and wholesale trade, hospitality and recreation, manufacturing, and accommodation and food service sectors.

These are the sectors largely in non-essential services with frequent face-to-face interactions and the migrant and informal workers are among those facing the most

severe impacts, as they often do not have regular contracts nor strong bargaining power, said the report. "Migrant workers are more vulnerable from lay-offs once prolonged lockdowns and production breaks drive companies out of business.

Also, uncertainty looms about the timing of full recovery, even as lockdowns are lifted, with concerns about persistent weak demand in some economic sectors.

"The wide-scale economic cost of the COVID-19 pandemic is expected to reach between USD 5.8 trillion and USD 8.8 trillion globally, equivalent to 6.4 per cent to 9.7 per cent of global GDP, reflecting the spread of the pandemic to Europe, the United States, and other major economies," said the report. The ADB said that

employment in host economies of Asian migrants is contracting significantly.

"The remittance flows to developing Asia is to plunge amid the pandemic as during the first months 2020, remittances began to contract in major migrant source countries...While some migrant workers may feel altruistic and send more money to their families in extremely difficult situations, prevailing weak economic forecasts are pointing toward declining remittances." However, relative increase in remittance inflows is observed in June in selected countries which can be attributed to lifting of lockdowns in destinations that allowed migrants to remit over the counter and introduction of policy measures that incentivise transfer

by reducing restrictions and transaction fees, the ADB said.

Citing a study of 10 migrant sending countries in Asia, the ADB said remittance dependent households are at risk of falling into poverty, as it is estimated that a 1 per centage increase in the share to GDP to remittances inflow from overseas is associated with a reduction in poverty gap by 22.6 per cent and poverty severity by 16 per cent.

A study based on micro-data from selected economies in South Asia and Southeast Asia suggests that a 10 per cent increase in remittance inflows leads to a 3–4 per cent rise in real GDP per capita, it said.

Recommending policy actions to the host and source countries, ADB economists said governments of host coun-

tries of migrants need to ensure that migrant workers have access to social protection, including employment-related support and social assistance, as well as health services. They should support employers to help retain and hire laid-off workers, including migrant workers.

Such effort contributes to the smooth recovery of the economy by ensuring workforce availability and the reduction of contagion risks, said the report. Among others, the host and source countries should continue to recognise remittance service providers as one of the essential businesses to allow migrants and families to transact without disruption as remittance money is a lifeline for many poor and vulnerable families left behind.

‘TRAI to give decision on priority plans within 2 weeks of telcos reply’

PTI ■ NEW DELHI

TRAI expects to finalise its decision on priority plans of Vodafone Idea and Airtel within two weeks of getting detailed responses on its queries from the two telcos, according to a regulatory source.

The source said that while TRAI had "serious concerns" on multiple issues pertaining to the priority plans, it had granted additional time up to August 10 to the two telcos to respond to its fresh round of questioning, as the players themselves had sought more time to reply.

Telecom Regulatory Authority of India (TRAI) is probing whether assuring minimum, faster or average data speeds is technological feasible or not.

And indeed, if it is, why should telecom operators offering priority/platinum plans not be able to quantify the same, and clear the air around treatment that will be meted out non-premium customers as well, the source privy to the ongoing enquiry said.

Telcos must clearly quantify the benefits being offered

TRAI is probing whether assuring minimum, faster or average data speeds is technological feasible or not

to consumers (of the priority plans) in return for what they are being charged. Subscription to a mobile plan is akin to a 'sale' where consumer is the purchaser of the service and hence the telcos "must quantify" exactly what services such users are going to get.

Merely using the term 'better service' is not suffice, the source said.

Asked about the timelines for TRAI to come to a conclusion on the ongoing issue, the source said that the two telcos themselves had asked for some more time earlier this month to answer TRAI's second round of queries, many of which were technical in nature and needed concrete data.

TRAI will finalise its decision on priority plan issue within two weeks of getting

response from the telcos, the extended time for which is Monday (August 10), the source said.

Service quality must be specified for two sets of users now -- priority and general users, and that information too has not been given by the companies, so far, the source added.

Moreover, when the plans were filed, the operators should have drawn the regulator's attention to the fact that these represented differentiated offerings.

TRAI had recently granted additional time to Bharti Airtel and Vodafone Idea to submit detailed responses on fresh set of questions on premium plans, where queries range from what happens when a non-priority customer is surrounded by priority users during congestion, to limit of throughput configured for the two sets of network subscribers.

TRAI shot-off nearly two dozen additional questions to Airtel and Vodafone Idea over the contentious premium plans on July 31, and had asked them to explain their stand backed by data and presentation.

PTI ■ NEW DELHI

Indian Railways is committed to integrate with the Government e-marketplace (GeM) portal to move all its procurement to the platform, Union Minister Piyush Goyal said on Sunday.

The railways' direct procurement of goods for its operations or its public sector undertakings or production units stood at about ₹70,000 crore-₹75,000 crore, the Commerce and Industry and Railways Minister said.

"I am happy to share that GeM and Indian Railways are burning the midnight oil, working day and night to ensure this entire ₹70,000 crore procurement on the GeM platform," Goyal said at the GeM-CII National Public Procurement Conclave 2020.

"Our own belief is that it will save railways not less than 10-15 per cent and that could be a saving of as high as ₹10,000 crore," he added. Railways buys more than 98 per cent of its goods and services in India and moving this purchase to the GeM platform in the next "probably 8-12

months" will help in making procurement process more transparent, seamless, efficient and faster, Goyal said.

"The railways has committed itself fully to integrate with GeM and move all procurement there (GeM)...Imagine we will save 1000s and 1000s of man hours of procurement time.

"The amount of elaborate tendering, advertisements, bids, bids opening, reverse auction, all of that become so seamless that our digital system of the railways will flag the requirement on the GeM portal, and it will be available for the whole world to see and more and more people will be enticed to register on GeM as suppliers," Goyal said.

He added that if any supplier or vendor provides bad quality goods, it will be black listed not only on GeM, but throughout the government system.

"We will ensure that the entire government system does not entertain that company anymore," he said, adding that at a later stage, GeM will move from goods and services to contracts.

The minister said the government's public procurement would be in the range of USD 100-150 billion (about ₹7.5 lakh crore-₹11.25 lakh crore), and probably more if one combines all the PSUs, state government and local bodies.

He said GeM should play a role in publicising all those products which are not made in India, but are required in India in a big way so that "we can encourage" entrepreneurs to plan to make those products in India, as is being done by railways. He said railways has identified the products which are imported and is working through RDSO (Research Design and Standards Organisation) to develop new vendors for those products.

"We have taken certain game changing reform measures in railway vendor registration also. Number of products have been moved out of vendor registration.

"So mostly safety items are being kept for vendor registration...If you are registered in any one organisation, you are deemed to be Sregistered throughout the railways," he said.

CAIT launches ‘China Quit India’ campaign to boycott Chinese goods

New Delhi: On the anniversary of Quit India Movement, the Confederation of all India Traders (CAIT) on Sunday launched a campaign 'China Quit India' to boycott Chinese goods, while its members held protests across 600 places across the country.

The trader's body said there is an urgent need to check "China's growing foot-steps in India and import of Chinese goods".Adding a new dimension, to its nationwide campaign "Bhartiya Saamaan-Hamara Abhimaan", CAIT said it has launched 'China Quit India' movement to boycott

Chinese goods and "held a protest dharna at about 600 places in different states of the country."Expressing concerns over Chinese investment in various Indian companies, start-ups and digital apps, CAIT said there is a need to take necessary action in this regard. It said that Chinese investments in Government projects and various sensitive construction works should be put under government scanner.

On the 78th anniversary of Quit India Movement, it said people across the country had come together under the leadership of Mahatma Gandhi to

protest against the British Raj.

While releasing the agenda of the 'China Quit India campaign', CAIT Secretary General Praveen Khandelwal "urged the central government to carry out an all-round siege of China and its activities in India"."Several Chinese companies have made large investments in Indian startups in sizable numbers, all such startups should be asked to exclude Chinese investors and the government should announce a lucrative policy to encourage Indian people to invest in these startups," he said.

CBDT issues guidance note on MAP

STIPULATES CASES WHERE ITAT HAS PASSED ORDER

PTI ■ NEW DELHI

Indian authorities will not deviate from the resolution order passed by statutory appellate body ITAT in cross-border tax disputes which are undergoing simultaneous resolution through mutual agreement procedure (MAP), the income tax department has said.

MAP is an alternative dispute resolution process under the tax treaties, under which

competent authorities of two countries enter into discussions to resolve tax related disputes. As many as 600 tax disputes have been resolved under MAP between April 1, 2014 to December 31, 2018.

The Central Board of Direct Taxes has come out with a guidance note on MAP which also specifies cases or situations in which India will provide access to MAP. Tax disputes relating to transfer pricing adjustments, determination of existence of a permanent establishment, attribution of profits to permanent establishments, characterisation or re-characterisation of an expense or receipt as a taxable expense or taxable income would be covered

under MAP if they result in taxation not in accordance with the relevant DTAA.

The guidance note also said that India shall provide access to MAP even in a situation where the Indian tax authorities apply domestic anti-abuse provisions. The CBDT also said that in case of orders of Income Tax Appellate Tribunal, the Competent Authorities of India shall not deviate from the orders of the ITAT for the relevant year where the dispute is decided on merits," the CBDT guidance note said.

Such MAP cases shall be closed as having been resolved by a domestic remedy. "However, if the order of the ITAT does not resolve the disputes but only sets them aside to be adjudicated afresh, then access to MAP would be provided again after the fresh

that are also being examined under MAP. "Since the ITAT is an independent statutory appellate body, which is outside the administrative jurisdiction of the Indian tax authorities; and is the highest fact-finding body on tax matters, the CAs in India shall not deviate from the orders of the ITAT for the relevant year where the dispute is decided on merits," the CBDT guidance note said.

Such MAP cases shall be closed as having been resolved by a domestic remedy. "However, if the order of the ITAT does not resolve the disputes but only sets them aside to be adjudicated afresh, then access to MAP would be provided again after the fresh

adjudication by tax authorities, if requested for by the relevant taxpayers," it added.

In May, the Govt amended Income Tax rules to state that Indian authorities would "endeavour" to resolve disputes under MAP within a time-frame of 24 months, a move aimed at speedy settlement of cases of MNCs which have opted the alternative dispute resolution process. Nangia & Co LLP Partner Shailesh Kumar said Indian tax authorities have apparently shown their intention to provide a speedy resolution to taxpayers opting for MAP by appointment of two dedicated offices for taking up MAP applications and negotiations.

Aramco’s Apr-Jun profit down 73%, but sees oil market recovery

IANs ■ NEW DELHI

Energy giant Saudi Aramco has reported a 73 per cent fall in its profit, or the net income, for the April-June quarter to \$6.6 billion amid the pandemic.

During the same period of 2019, the company had reported a net income of \$24.7 billion. For the first half of 2020, it has reported a net income of \$23.2 billion, compared to \$46.9 billion reported during the corresponding period a year ago, the company said in a statement.

"Aramco navigated challenging market conditions to record net income of \$6.6 billion for the second quarter and \$23.2 billion for the first half of 2020, respectively, compared to \$24.7 billion and \$46.9 billion in the corresponding periods of 2019.

This demonstrates Aramco's agility, strength and resilience across market cycles," it said.

Noting that strong headwinds from reduced demand

and lower oil prices reflected in the company's second quarter results, Aramco President & CEO Amin H.

Nasser said that the company foresees a partial recovery in the energy market as economies open up.

"We are seeing a partial recovery in the energy market as countries around the world take steps to ease restrictions and reboot their economies. Meanwhile, we continue to place people's safety first and have adapted to the new normal, implementing wide-ranging precautions to limit the spread of Covid-19 wherever we operate," the CEO said.

He noted that despite the challenges, the company delivered "solid earnings" because of low production costs, unique scale, agile workforce, and unrivalled financial and operational strength.

This helped the company to deliver on its plan to maintain a second quarter dividend of \$18.75 billion to be paid in the third quarter, Nasser added.

E-auction dates for commercial mining of coal likely to be extended again: Sources

PTI ■ KOLKATA

The dates for submission of bids for online auction of coal blocks for commercial mining could be further extended due to disruptions caused by the Covid-19 pandemic, sources said on Sunday.

The Centre had earlier extended the dates for submission of technical bids. According to the revised schedule, the last date for submitting a technical bid is 2 pm of September 29, and e-auction would be carried out for qualified bidders between October 19 and November 9.

However, the sources said further extension is likely to be sought by investors, keeping in mind the COVID-19 restrictions on travel and movement. "We are not sure whether this extension will be enough for bidders to complete evaluation and feasibility studies, which have to be conducted with rigorous on-ground data and inputs

. If needed, fresh extension would be sought," a senior official of a large corporate bidder told PTI.

BSNL to enhance data speed in Andaman Nicobar by 10 times from Monday

PTI ■ NEW DELHI

State-run BSNL will start offering up to 10 times faster broadband speed at 100 mbps and up to 20 times more data download limit for its customers in Andaman and Nicobar Islands from Monday, the company said on Sunday.

The announcement from BSNL comes a day before the launch of 2,312 kilometre long Chennai-Andaman and Nicobar Islands (CANI) submarine optical fibre cable project by Prime Minister Narendra Modi.

"Despite many challenges the project is completed in a scheduled timeline and without any cost overrun. Being a first of its kind project in India, BSNL ensured that the laying of submarine optical fibre cable is completed as per global specification to ensure quality," BSNL chairman and managing director P K Purwar said.

BSNL will enhance data speeds across all the plans between 2-10 times after the launch of the project without charging any extra amount

from the customers, according to details shared by the company.

"For BSNL wire line segment, copper broadband customers are now provided with higher speeds which is up to 10Mbps and up to 15 times more data download ranging from 30 GB to 750 GB in a month on its existing plans," the statement said.

The data speed restriction after the download limit, will also be enhanced from 512 kbps to up to 2 Mbps in various plans, it added.

"BSNL FTTH (Optical Fibre) customers are also provided with higher speed up to 100 Mbps and up to 15 times data volume download ranging from 60 GB to 1500 GB in a month on its existing plans. The data speed restriction after the download limit, is also enhanced from 512 kbps to up to 4 Mbps in various plans," the statement said. BSNL customers who have subscribed to the high end plan of ₹7,999 will be upgraded from 10 mbps speed to 100 mbps download speed.

Planned layoffs at British companies surge

AP ■ LONDON

The number of British companies planning to cut staff numbers in June was five times higher than in the same month a year earlier, in an ominous sign of Covid-19's economic impact.

Figures obtained by the BBC show that 1,778 companies informed the Government of plans to cut a total of 139,000 jobs.

A year earlier the figure was 345 companies announcing a total of 24,000 job losses.Businesses are required to inform the Insolvency Service if they plan to cut 20 or more jobs.

During the pandemic the government has been paying the salaries of almost 10 million furloughed workers. Economists are predicting a surge in unemployment when that program ends in October.

The U.K. Economy shrank by more than 20 per cent in the first half of 2020, and despite some signs of recovery the Bank of England says the economy will end 2020 9.5 per cent smaller than it started the year.

81% micro enterprises confident of recovery post Covid-19, says survey

PTI ■ NEW DELHI

Despite several businesses remaining closed during the lockdown, 81 per cent of micro enterprises polled are confident of a recovery post Covid-19 whereas 57 per cent reported not having any cash reserves to survive, according to a survey.

Initial results of a six-month survey that is underway by GAME (Global Alliance for Mass Entrepreneurship) in association with LEAD at Krea University covering 1,500 micro enterprises also reveal that 40 per cent tried to borrow money to cover expenses.

However, only 14 per cent of the overall borrowing was from formal borrowing sources.

As per the revised criteria, any firm with investment up to Rs 1 crore and turnover under Rs 5 crore is classified as a "micro" enterprise.

Madan Padaki, co-founder of GAME, said COVID-19 has left a devastat-

ing impact on the Indian economy, especially micro-enterprises that comprise around 99 per cent of all firms in India.

"Through this longitudinal survey, we intend to truly understand the on-ground situation and challenges faced by micro-enterprises in managing cash flows, dealing with broken supply chains and delayed payments. By keeping our ears to the ground, we want to provide specific recommendations to all ecosystem actors to accelerate the recovery of these enterprises," Padaki said.

The survey also revealed that across all respondents, female business owners faced more household challenges than men.

In fact, 70 per cent female business owners suggested inter house conflicts as the biggest challenge while 53 per cent men responded to the same. Women also faced more unaffordable expenses than men, with 46 per cent suggesting the same, the survey said. PTI

Trend Blazer

We will find light: Hrithik

Actor **HRITHIK ROSHAN** feels helpless witnessing the series of tragic incidents that has plagued us over the past months.

“It is difficult, yet important to latch onto every ray of hope... A feeling of helplessness engulfs me as I witness a series of tragic events in our world. Beirut explosion. Air India crash. Mauritius environment emergency. Floods and distress. Earthquake. The collapse of the last Arctic ice shelf. All this while we battle a pandemic. My prayers for the peace of the departed souls. Condolences for the grieving families. May we uplift each other in these unfortunate times and stand strong. This too shall pass. We will find light,” he wrote on Instagram.

‘I wanted to introduce Jammwalions to push-ups. I thought the best way to do it was to demonstrate

Kalari Dand to them. It targets the core, back, chest, shoulders, back, legs and triceps. It's the humblest of all workouts. It does not require any heavy equipment or trips to the gym.’
—Vidut Jammwal

Bored of tying your hair in a top knot, hiding those dull, lifeless strands? It doesn't help that the monsoons make the hair frizzy, weak and create all sorts of havoc to our tresses.

Actor **KALKI KOECHLIN** tries something she has never done before — colouring her hair at home in a rich hue of mahogany.

“I have heard L'Oreal Paris Casting Creme Gloss Hair Colour is one of the easiest and the best. Not just because it gives you a great colour but also because it makes your hair really glossy,” she says.

‘Co-writing a screenplay’

Singer **MADONNA** has revealed that she has been writing a screenplay lately.

The pop diva has been collaborating with *Juno* writer Diablo Cody. In a black-and-white video Madonna has shared, she can be seen sitting at a discussion with Cody.

“When you're stuck in a house with multiple injuries what do you do? Write a Screenplay with Diablo,” Madonna captioned the post.

Their table in front is covered in drafts and different scripts.

Madonna can be heard saying, “All these details are important.”

It wasn't all work, though. At one point, the superstar singer was in the mood for some fun and games, with two peanuts up her nose.

With the COVID-19 pandemic, everyone is compelled to acknowledge the fact that things cannot function the way they used to anymore. As a part of the business community, society and the larger ecosystem, the need to learn to adapt to the new normal has become a necessity. Studies reveal how workplace conducts can be modified and regulated as per the changing requirements as the lockdown is gradually being lifted up.

A survey by Pulse studied the key competencies to survive the current pandemic. Its second survey focussed on the priorities and policies HR functions should adopt to help organisations and employees navigate through the current crisis. The third survey now focusses on the relevance of POSH Act and Policy (The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013) in the new normal considering the emerging current realities that have surfaced.

It lists these top priorities for organisations to look at while evaluating the relevance of POSH Act and Policy while redesigning and reshaping their work culture and employee behaviour.

MODIFYING THE POLICY FOR REMOTE WORKING

As the workforce continues to adapt to the changing needs of their work environment and undergo dramatic shift in workplace dynamics, organisations should constantly re-look and refresh their frameworks, practices, processes and policies for workplace safety.

Thus, an important aspect to workplace safety is that the POSH policy should be modified to meet the needs of remote or virtual working. During work from home (WFH), the need for POSH training has become a pressing requirement as per the data in the survey.

REDRESSAL OF DOMESTIC VIOLENCE DURING WFH

Emerging dimensions of workplace conduct and safety are equally important. This period of lockdown has led to a staggering increase in domestic violence cases in India and globally. With social distancing in place, several people are unable to contact or seek help from their regular support system. Taking this into account, Twitter India has also launched search prompts to help domestic violence victims. Thus, with the merging of workplace and personal space, there is a need to keep safety of employees under check.

The policy says that the workplace covers both organised and unorganised sectors and includes any offsite, get-togethers, or any place that comes under the ambit of work-related relationship. Therefore, the need to safeguard the physical and mental safety of an employee within the new normal with a shift in the work space, work safety must continue to be a top priority for companies.

FOCUS ON LGBTQ-RELATED HARASSMENT

While some companies have made the POSH policy gender-neutral, a need for the POSH Act to be made into a gender-neutral act by law has also emerged. This indicates the need for LGBTQ-related harassment to be taken into consideration while reviewing the

Up close with new rules

Organisations need to evaluate their POSH Act and Policy too while redesigning and reshaping their work culture and employee behaviour in times of remote working. By TEAM VIVA

policy in offices to ensure safety is not a privilege limited to a few within the workforce.

CYBER BULLYING OR VIRTUAL HARASSMENT

The need for HR leaders to review complex scenarios under the POSH Act has become a pressing need. We are connected virtually for long hours when it comes to work life as lines between professional and personal space have blurred.

Emerging challenges have also surfaced with virtual connectivity becoming a part of our everyday work that needs to be addressed. As per Gartner, by 2030, demand for remote working will increase by 30 per cent with “Gen Z” entering the workplace. Cyber bullying or harassment on virtual platforms is a pressing concern that should be addressed in the POSH policy.

SENSITISATION AND CODE OF CONDUCT FOR “NOT CAMERA-READY” BEHAVIOUR

As a major portion of our workforce continues to work from home, they operate in this workplace while interacting with colleagues and work teams. Therefore, a certain level of sensitisation of managers and other employees on “not camera-ready” behaviour, code of conduct and dress code for video conferences, virtual or video conference guidelines are required to be clearly stated and put in place. It will help maintain a certain level of professional conduct among employees.

POSH TRAINING DURING WFH

It is important for companies to conduct training and awareness sessions for employees across the verticals within the organisation. It should include the leadership, managers, employees, newly-recruited staff and interns who are now getting on-board virtually. The need to be sensitised to expected standards of

professional behaviour, redressal mechanism and clear implications of false and malicious complaints need to be taken into consideration with assurance of swift action.

Popular method for facilitating training sessions or activities across industries on the POSH Policy and Act were Face-to-Face. However, even

though social distancing is the norm, the need to sensitise employees across multiple locations should not be undermined. Utilisation of virtual platforms has become an excellent mode of communication and learning with online training and webinars to support and address training needs of employees in an organisation.

WEBBED

BIO HACKERS

A medical student enters a top German university on a secret mission to uncover a conspiracy linking a family tragedy to a visionary biology professor. Starring Luna Wedler, Jessica Schwarz and Thomas Prenn, season 1 releases on Netflix on August 20.

CLASS OF '83

Demoted to an academy job, a cop trains five foolhardy students as assassins in his risky revenge plot against police corruption and the underworld. Starring Bobby Deol, Bhupendra Jadawat and Hitesh Bhojraj, the film releases on Netflix on August 21.

THE SLEEPOVER

What do you do if your parents are kidnapped by a crew of international thieves? You begin a wild overnight adventure complete with spy gear. The film releases on Netflix on August 21.

Discovering the truth

Filmmaker and author **VIVEK AGNIHOTRI's** new book, *Who Killed Shastri?: The Tashkent Files*, uses the democratic Right to Information to question the mysterious death of a Prime Minister

After his first book, *Urban Naxals: The Making of Buddha in a Traffic Jam*, director and screenwriter Vivek Agnihotri is now set to come up with his second non-fiction book, *Who Killed Shastri?: The Tashkent Files*.

Known for writing screenplays of films like *The Tashkent Files*, *Buddha In A Traffic Jam*, and *Dhan Dhan Goal*, Agnihotri has bound together the elements of the mystery around the legendary Lal Bahadur Shastri's death in the book.

According to the author, this is “the first-ever book to investigate the mysterious death of independent India's second prime minister, Lal Bahadur Shastri, from all possible angles.”

Commenting on his book, Agnihotri said, “Four years ago, I figured out that the first fundamental right of a citizen in a democracy has to be the right to truth but how is it possible if we don't even know the truth of our second prime minister Shri Lal Bahadur Shastri mysteri-

ous death in Tashkent. That's how this journey begins after filling many RTIs and struggling with all the possible sources. We decided to chase the history and discover the truth behind Shastri ji's death and in his journey. I rediscovered the synergetic politics of India after the humiliating defeat by China in 1962 till the emergency. How India was sold and I concluded that whoever killed Shastri are the same people who sold India, too. This book is my spiritual journey into politics and very strongly conveys that it's because of the absence of spirituality and moral values in politics; how India has suffered generations after generations. This book is also a warning to the new generation as it aims to explain to them why they must fight in moral politics and always stand up and fight for right the truth.”

Vivek's directorial film, *The Tashkent Files* (2019), also came with a hashtag question — Who killed Shastri? More than half a century after that fateful morning in Tashkent and the question still remains unanswered — Did Shastri really die a natural death or was it an assassination birthed from political disagreements? For the director, it was a tweet that inspired him to work on the mystery related to his death.

The filmmaker and author has also made the book available online for pre-orders. He has released the cover of the book on social media, for pre-orders and to get feedback. The book will hit the stands on August 28.

On the work front, Vivek will start working on his new project, titled, *The Kashmir Files*.

BEFORE IT'S TOO LATE

We must remember that the current condition of the world is a warning bell to improve ourselves and prepare well for unexpected emergencies, says RAJYOGI BRAHMAKUMAR NIKUNJ JI

The current events, especially growing border tensions between the two Asian countries reflect the present state of world. Likewise, the growing pandemic situation and the Indian government's handling of this and other national issues such as those relating to Kashmir or Assam, indicates the state of the Indian nation. The current events prove how egoism, confrontation and violence have become the rule of the day. The situations in the Western Asia is, indeed, becoming more and more complicated with the passing of each day. It is acquiring new angles and dimensions, and is nearing its ignition point. There are now emerging new alignments and emnities. Many nations are now getting involved into it, either because of the resolutions of the UN Security Council or because of some other reasons. Even if this situation is now defused, it will be only for a temporary phase and will keep smoldering visibly or covertly.

Similarly, there are deep inter-party dissensions, social rifts, ethnic bickerings and economic divides, which have added a new dimension to the present Indian scenario. These are, in fact, un-resolvable because these are in-built. Hence, social scientists call them structural defects in the society which cannot be corrected unless the structure of the society is changed. However, those who are well-versed with spiritual knowledge, would have no difficulty in diagnosing the present maladies that afflict the world in general and the Indian nation in particular. They would understand that the present situation is due to gross selfishness, ego and lack of self-control, all of which are rooted in body-consciousness.

If we look at these happenings from a spiritual point of view, then it becomes very clear as to why are they caused and what are their results. Time and again, it has been said by many religious and spiritual leaders that the world-situation would soon take a wide turn for the worse so much so that we will have to change our ways of living. A time would soon come when people would flock in large numbers for receiving the spiritual knowledge. Silence and yoga would become the highest power to cure mankind from all kinds of mental diseases. Looking at the series of events across the world, this situation seems to be arriving very soon. Hence, we must all prepare ourselves in advance for such a crisis. And for that, we need to first of all pay greater attention towards self improvement. Our stage of purity and peace must get strengthened and become unshakable. We must pay full attention to the inculcation of all divine qualities such as humility, patience, tolerance, contentment, honesty, sincerity and more. We must not lag behind even in a single divine attribute for our goal is to become paragon of virtue or a divine being, who has all divine qualities. For achieving this cherished goal, the time left is very less. Hence, if we don't wake up and speed up now, we will not be able to reach our goal. We must remember that the current condition of the world is a warning bell for us to improve ourselves and prepare well for unexpected emergencies.

Leave no one behind

Virtual classes may have become the new normal for education but what about the students deprived of gadgets, asks KALPANA DHAKU MALAYE

It was the third week of March. The teachers had almost completed the syllabus and the schools were busy preparing for the final exams. Computation of the average of the unit test scores of each student was being done. At that juncture, the novel Coronavirus had advanced and bared its fangs in India.

As a precautionary measure, the government announced the closure of all the educational institutions. The students were briefed on the safety measures and a break till March 31 was declared. However, the risk of contracting the virus called for further closures and restrictions. The students and parents were in a dilemma. Further, on April 1, cancellation of the final exams were announced. Every educational institute was asked to promote the students to the next grade based on their school assessments, projects, periodic tests and term exams. The well-heeled schools started classes via apps like Zoom.

As the reopening of schools remain under a cloud of uncertainty, the state of

the current academic year looks too grim. There seems to be no thoughtful programme or policy in sight for engaging the students meaningfully. Virtual schooling has been implemented all across the country even though a large number of students are deprived of internet connectivity and gadgets like smartphones and laptops. The virtual mode became a one-way communication where the doubts of the students remain unanswered. Amid all this, are we really interested in knowing what students have to say about 'learning from home'?

Well, it appears doubtful as not much has been said about it. This spontaneous virtualisation of education came with various challenges for both the administration and the students. In schools that were not equipped with technology to conduct online classes, teachers had to fend for ways to launch home-based learning. Some of them created lecture videos and forwarded them to parents and children. It was like delivering a lecture without keeping any scope for questions. It signaled that

neither the participation of students was taken care of nor their accessibility to online education was thought about.

Another major issue of accessibility emerged in the families where there was only one cell phone and two to three children. It became important for the child to attend classes online as the absentees were reprimanded by the school. On the other hand, parents/older siblings were jittery because when they wanted the handset for work, the child was busy attending the online classes. A kid of a daily wage earner developed an inferiority complex because she couldn't access the file her teacher had sent. It was difficult for her to keep up with the virtual classroom exercises and activities. She faced a lot of disruption in her studies. Initially, the parents tried to pacify her but when she refused to relent, they had to borrow money to buy a smartphone. This story is not restricted to just one family, it's all pervasive. There are millions of stories of such children committing suicide for not being able to access digital education.

The pandemic has posed many barriers in front of our education system — Have teachers been trained to handle technology with ease? How many students are equipped to handle e-learning? What criteria was used to declare a school as a digital institute? According to the latest information, one of the bizarre criteria was if the teachers of the school owned a mobile phone, it was considered to be a digital school.

From a global perspective, "Half of the total number of learners — around 826 million students — kept out of the classroom by the COVID-19 pandemic. They do not have access to a household computer. Almost 43 per cent (706 million) have no internet at home at a time when digitally-based distance learning is used to ensure educational continuity in the vast majority of countries." These figures were compiled on the basis of data from the UNESCO Institute for Statistics and the International Telecommunication Union.

While speaking about online education, one is compelled to compare it with

the offline mode. When children go to school, they gain education not merely through books but vibrant activities and interactions with teachers and friends. The best we were giving children was making education a multi-sensorial experience for them rather than just a digital one. In classrooms, when the teacher narrates an incident, the students unknowingly compare it with their own experiences and become eager to share their stories. All these happenings go into developing the intellect and character of the child. Online education is taking away experiential learning, an integral part of the school setting. It seems that e-learning can never be an alternative for in-person education.

Although virtual classes have become the new normal for education, but what about the students belonging to the underprivileged section of the society?

(The article was written originally in Marathi. It has been translated in English by Alka Gadgil.)

—Charkha Features

August is the month for two garden W's: weeding and watering. Regular attention to both keeps a vegetable or flower garden pretty and productive well into autumn. For now, let's look at watering. It's not necessarily less rain that makes soils drier in August; it's August's combination of heat and lush plant growth that quickly dries the soil.

Don't expect to recharge your soil with water by standing in place with hose in hand, directing a shower of water onto your tomato plants. You may find this satisfying and relaxing on a hot summer evening, but no one has the patience to stand fixed in place long enough to do plants any good. If you don't believe me, scratch an inch or so into the soil with your finger the next time you finish watering in this manner. Unless you held the hose immobile for about an hour, only the surface is wet.

INFREQUENT, DEEP WATERING FOR DEEP ROOTING

Shallow watering develops shallow root systems that can't reach water deeper in the ground. Promote deep rooting by giving your soil weekly, but thorough, soakings that wet the soil at least

SOAK OR DRIP?

Early morning or late afternoon, when the air is cooler, usually calmer and leaves dry off reasonably fast, are the best times to water with a sprinkler, suggest experts

six inches deep. One inch of water on top of the soil will do this, as measured in straight-sided cans set out with your sprinkler. Or, equivalently, apply about a half a gallon of water over every square foot of ground.

You'll probably do this weekly watering with a sprinkler. Most sprinklers take about an hour to put down that inch of water.

Some gardeners shy away from watering when the sun shines for fear that beads of water on the leaves will act as magnifying glasses and burn the leaves. Not true! (How many plants die after a sun shower?) Middyay is not the best time to water because evaporation and wind will carry much of the water off target. Nighttime also is not a good time to water because the leaves stay wet too long, promoting diseases. Early morning or late after-

noon, when the air is cooler and usually calmer and leaves dry off reasonably fast, are the best times to water with a sprinkler.

FREQUENT, SHALLOW WATERING IS AN OPTION

The shallow watering and the resulting shallow rooting that I cautioned against are bad only if you can't keep up with the shallow watering. You can keep up with it — and reap other benefits — with an alternative method of watering called drip or trickle, irrigation.

The essence of drip irrigation is simply a plastic pipe laid in the garden row, with emitters at intervals out of which water slowly drips. Dripping takes longer but is more efficient than sprinkling (it was developed for farming the desert by Israeli agricultural scientists), because water can be applied slowly to approximately offset what plants are using. Dripped water is less subject to evaporation and lessens the chance of diseases by not wetting plant leaves. The shallow layers of soil are also where beneficial bacteria, fungi and other soil microorganisms are most active.

Drip irrigation, by pinpointing water near your garden plants, also results in less weeding. A

sprinkler spreads water not only to your garden plants, but also to paths and areas between rows, where it promotes weed growth. Drip irrigation is really more than just plastic pipes with holes in them. The emitters are engineering marvels that drip consistent amounts of water along their lengths and are somewhat self-cleaning. Despite that self-cleaning feature, every drip system should also begin with a sediment filter.

One of the best features of drip irrigation is that makes frequent, shallow watering possible simply by attaching a timer to your hose spigot. I set my timer each spring and hardly think about watering at all until I bring it and the sediment filter back indoors in autumn. Drip lines can be left in place outdoors all year.

Reserve hand watering for the first few days that vegetable and flower transplants are in the ground, and for your weekly deep watering for newly planted trees and shrubs.

It might seem that almost every time you finish your hand watering, rain falls. Cause and effect? No. It's your imagination. —AP

Do one thing every day that scares you.

VIT D TWICE A DAY MAY KEEP VERTIGO AWAY

Researchers have revealed that taking vitamin D and calcium twice a day may reduce your chances of getting vertigo again — a sudden internal or external spinning sensation, often triggered by moving your head too quickly.

"Our study suggests that for people with benign paroxysmal positional vertigo, taking a supplement of vitamin D and calcium is a simple, low-risk way to prevent vertigo from recurring," said study researcher Ji-Soo Kim from Seoul National University in South Korea.

"It is especially effective if you have low vitamin D levels to begin with," Kim wrote in a paper published in the journal Neurology.

About 86 people of people with this form of vertigo find that it interrupts their daily life or causes them to miss days at work.

A DRUG BENEFICIAL FOR KNEE OSTEOARTHRITIS

Researchers have found that bisphosphonates — a class of drugs that prevent the loss of bone density and used to treat osteoporosis and similar diseases — appear to be safe and beneficial for osteoarthritis patients.

Osteoarthritis (OA) is the most common form of arthritis and a leading cause of disability worldwide with more than 300 million sufferings with the condition, yet there are no effective treatments to stop the disease or its progression. According to the study, published in the journal Osteoarthritis and Cartilage, one of the lesions in OA that causes pain and progression of the structural pathology of the disease is bone marrow lesions.

Researchers believe bisphosphonates may alter bone marrow lesions, and thereby could improve pain in OA and halt its progression. Alternatively, they could also alter the mechanical properties of bone, thereby potentially contributing to detrimental effects.

DIZZINESS WHILE STANDING LINKED TO DEMENTIA

Researchers have found that people who feel dizzy or lightheaded when they stand up may have an increased risk of developing dementia.

The condition, called orthostatic hypotension, occurs when people experience a sudden drop in blood pressure when they stand up, according to the study published in the journal Neurology.

The study found the link with dementia only in people who have a drop in their systolic blood pressure, not in people with only a drop in their diastolic blood pressure or their blood pressure overall.

"People's blood pressure when they move from sitting to standing should be monitored. It's possible that controlling these blood pressure drops could be a promising way to help preserve people's thinking and memory skills as they age," said study author Laure Rouch from the University of California in the US.

According to the study, the people with systolic orthostatic hypotension were nearly 40 per cent more likely to develop dementia than those who did not have the condition.

NEW TEST PREDICTS DIABETES IN BABIES

Researchers have come up with a new method to predict which babies will develop type 1 diabetes.

According to the study, published in the journal Nature Medicine, the new approach moves a step closer to routine testing for newborns which could avoid life threatening complications.

"We know that while genetics have a strong correlation as a risk factor for family members to develop T1D, most newly diagnosed individuals do not have a known family history," said study researcher Sanjoy Dutta from the JDRF, a US-based NGO.

The new approach doubled the efficiency of programmes to screen newborns to prevent the potentially deadly condition of ketoacidosis, a consequence of type 1 diabetes in which insulin deficiency causes the blood to become too acidic.

FLU CLINICS MAY REDUCE PANDEMIC IMPACT

Opening clinics dedicated to treating influenza can limit the number of infected people and help to flatten the curve or reduce the peak prevalence rate, say researchers.

While the work focused on influenza, the findings, published in the journal PLOS One are relevant for policymakers seeking ways to reduce impacts of the ongoing COVID-19 pandemic.

"Dedicated clinics would have less of an impact than interventions such as vaccination, but at the statewide level, we're talking about cutting the overall number of infections by six figures," said study author Julie Swann from the North Carolina State University in the US.

"And while our work here focussed on the H1N1 strain of influenza, the findings are useful as we grapple with how best to respond to COVID-19," Swann added.

Bayern's Robert Lewandowski celebrates with teammate Leon Goretzka after scoring his team's first goal from penalty spot. AP

AFP ■ BARCELONA

Lionel Messi scored a brilliant solo goal as Barcelona saw off Napoli on Saturday but they are likely to need something even more special from their captain to beat Bayern Munich in the Champions League quarter-finals. Messi's weaving run and finish came between an early Clement Lenglet header and a Luis Suarez penalty, also won by Messi, as Barca stormed into a 3-0 lead in the first half at Camp Nou.

But Lorenzo Insigne gave Napoli hope just before the interval and an unconvincing second period from Barcelona

London dreams

Lewandowski scripts another dominating Bayern win over London club, this time against Chelsea to set up Barca clash

left them hanging on for a 3-1 win on the night, 4-2 on aggregate. "A second goal would have given them a feeling of euphoria that can hurt you," said Barca coach Quique Setien. "It's normal to get a little nervous." In winning the penalty, Messi took a heavy kick from Napoli's Kalidou Koulibaly and needed treatment. "It was a heavy knock," said Setien. "It will have to be treated but I don't think there is a problem."

After finishing five points

behind Real Madrid in La Liga, Barca resumed in the Champions League with doubts hanging over the form of the team and the future of their coach. And victory against Napoli eases the pressure but the performance will not inspire confidence, even with Messi seemingly rejuvenated after three weeks rest. Napoli, whose own league season only finished last weekend, should have had the advantage of rhythm but a disastrous opening half an hour left them with too much to do.

Barcelona's Lionel Messi, right, embraces Napoli's goalkeeper David Ospina after the end of Champions League round of 16, second leg soccer match. AP

Koulibaly, linked with a move to several elite European clubs this summer, endured a particularly disappointing night. Yet Barcelona will have to improve significantly to match Bayern, who advanced after putting seven past Chelsea over two legs and are arguably favourites to win the tournament. "It's going to be very complicated," admitted Setien ahead of the quarter-final on Friday. Messi now has four goals in his last three games and in a one-off match in Lisbon, the Argentinian is capable of anything. But Bayern have their own trump card in Robert Lewandowski and a more complete team that makes them heavy favourites to reach the semis.

7-1 IN TWO LEGS At Allianz Arena, treble-chasing Bayern Munich seal a 4-1 home win over Chelsea in the last 16, return-leg tie after Robert Lewandowski netted twice to . "The anticipation is enormous. Barcelona has a good team with very good players, but if you look at the last few weeks, we can fly to Portugal with a lot of confidence," said Bayern defender David Alaba. Lewandowski, the

Champions League's top-scorer, bagged his 12th and 13th goals in Europe this season and played a part in all four Bayern goals in Munich on Saturday. Leading 3-0 from the first leg at Stamford Bridge in February, before the coronavirus pandemic halted the competition, Bayern progressed 7-1 on aggregate. "We can be pleased, it was our first game for a month and it's not easy to keep the rhythm," added Alaba. "We have prepared for this for the last two weeks and you could see the result." Lewandowski netted a penalty with just 10 minutes gone at the Allianz Arena. Winger Ivan Perisic then doubled Bayern's lead before England striker Tammy Abraham tapped home a loose ball to give Chelsea brief hope. However, replacement midfielder Corentin Tolisso put the result beyond doubt when he fired home a Lewandowski pass with 14 minutes to go. "I am really happy with how we played over the 90 minutes, the first 30 minutes we shut Chelsea out," said Bayern head coach Hansi Flick. This was a world-class display from Lewandowski who added a late header to his pair of assists. He is now four goals short of

NUMBER GAME

66 With a brace against Chelsea, Robert Lewandowski is now the outright fourth-highest scoring player in Champions League history, with 66 goals

7 Chelsea's 7-1 defeat on aggregate to Bayern Munich was the second-heaviest inflicted on an English team in CL history, behind only Arsenal's 10-2 aggregate defeat in the last 16 in 2016/17, also against Bayern Munich

7 Robert Lewandowski was involved in all seven of Bayern's goals against Chelsea this season (3 goals, 4 assists). He was the first player to register 3+ goals & assists against an opponent in a season since Luis Figo in 2004/05 vs Roma

35 Lionel Messi has scored against 35 different clubs in the CL; two more than the next best Cristiano Ronaldo

53 Robert Lewandowski has scored 53 goals in 44 appearances in all competitions this season, finding the net in 36 of those 44 matches (82%)

1 Lorenzo Insigne is the first Italian player ever able to score at least one goal at Bernabeu vs Real Madrid and one goal at Camp Nou vs Barcelona in the UCL history

Cristiano Ronaldo's record of 17 Champions League goals in 2013/14. "It's not a goal of mine," said Lewandowski when asked about Ronaldo's record. "We have a few more games in the knock-out round and I am just as happy creating goals as scoring them." The Poland star was also coy when asked about a rivalry with Barcelona star Lionel Messi. "We have to perform well and show our quality as a team against a good Barcelona side, it's a big game for everybody."

Pirlo is new Juve boss

AFP ■ TURIN

Former Italy and Juventus star Andrea Pirlo was appointed the Italian champions' new coach, just hours after Maurizio Sarri's sacking with the club promising a "new chapter in world football". Sarri, 61, leaves Juventus after just one season, a day after the Italian giants crashed out of the Champions League in the last 16 to French club Lyon. The 41-year-old Pirlo, with no previous top-level coaching experience, recently took over the Juventus U-23 side and arrives on a two-year contract. "The choice is based on the belief that Pirlo has what it takes to lead from his debut on the bench, an expert and talented squad to pursue new successes," Juventus said. "Today, begins a new chapter of his career in the world of football: from Maestro to Mister." Pirlo's swift appointment, a day after their Champions League exit, is again a bold choice for club president Andrea Agnelli. Other former players have turned to coaching such as Zinedine Zidane, Frank Lampard and Gennaro Gattuso, but Pirlo does so without experience. The former midfielder does, however, know Juventus and its players well after an impressive four-year spell from 2011 to 2015. "Pirlo has had a legendary career as a player. In his four years at the centre of the Juventus midfield, he won as many league titles, a Coppa Italia and two Italian Super Cups," Juventus said. He also won two Champions Leagues and two league titles with AC Milan. At Juventus, Pirlo will now find himself coaching some of his former teammates such as Juventus goalkeeper Gianluigi Buffon, a year older at 42.

Verstappen wins Silverstone race

AFP ■ SILVERSTONE

Max Verstappen delivered Red Bull's first victory at Silverstone since 2012 on Sunday when he made the most of a superior strategy in sizzling conditions to beat both Mercedes and claim victory in the 70th Anniversary Grand Prix. It was the Dutchman's first victory of the season and the ninth of his career and the first time a race had been won by a driver who did not start on pole position in seven races since last year's Mexican Grand Prix. Verstappen owed his victory to a team decision to start the race on hard compound tyres while his main rivals all launched from the grid on mediums, the two Mercedes men struggling to manage tyre-wear throughout the race. During the race, Red Bull asked him to ease off, but he replied saying "I don't want to drive like a grand-ma" before the team relented. Verstappen won by 11.326 seconds ahead of championship leader and six-time champion Lewis Hamilton who passed Mercedes team-mate Valtteri Bottas in the closing stages.

Bottas, who started from pole, said: "Very frustrating for me, to start from pole and finish third. "It's not ideal and I think that as a team we were sleeping at some points in the race. My strategy was far from ideal." Hamilton's podium finish meant he equalled Michael Schumacher's career record of 155 podium finishes. It was also his record-extending 38th points scoring finish in a row. Charles Leclerc came home fourth after a sterling drive for Ferrari ahead of Alex Albon in the second Red Bull, Lance Stroll and his Racing Point teammate Nico Hulkenberg. Esteban Ocon finished eighth for Renault ahead of Lando Norris of McLaren and Daniil Kvyat of Alpha Tauri.

Serena fit & ready to play

LEXINGTON: Serena Williams on Saturday said that she is pressing ahead with plans to play in the US Open despite a wave of player withdrawals from the upcoming Grand Slam event over coronavirus fears. The 23-time Slam winner returns to tennis next week at the inaugural Top Seed Open WTA event in Lexington, Kentucky, relaunching her season after a six-month hiatus caused by the Covid-19 pandemic. Williams, who was one of the first players to commit to the US Open despite the pandemic, said her plans remain unchanged, adding that she was tentatively planning to go to

Europe for the rescheduled French Open. "I see myself doing it all if it happens," Williams said when asked about her schedule during a virtual press conference. "But I am not planning for the future, as tournaments got

cancelled I was just like, 'Let me just work on today and see what happens.'" Williams revealed that she had been practicing on her own court, built with the same hard-court surface used at the US Open. She has also stayed fit with construction of a home gym. Serena, who is also scheduled to play the Western and Southern Open tune-up event in New York before the US Open, admitted that only tournament play would allow her to properly gauge her fitness. "Everyone has an opportunity to be more fit now, because we spent so much time at home

to work on ourselves," Williams said. "Fitness wise, there is going to be a tonne of fitness, but match fitness is different to fit-fitness." Williams, who turns 39 in September, meanwhile said she was unable to say whether she would be at the rescheduled Tokyo Olympics in 2021. "That is just looking too far ahead, I don't know if Tokyo plans to be in Tokyo, we will have to wait and see," she said. "I don't know what to expect. One thing I have learned is don't plan, I am living for the day and for the moment, in a good way but I am not making plans too far out." AFP

BCCI may start domestic season from Nov 19

NEW DELHI: The BCCI is mulling November 19 as tentative date for start of domestic season with Syed Mushtaq Ali T20 tournament but Indian players in various IPL teams won't be able to play first few rounds due to quarantine protocols in place. The delay in the beginning of the domestic season due to pandemic means that only Mushtaq Ali trophy and Ranji Trophy (Dec 13 - March 10) comprising of 245 games (across formats with 38 teams) will be played. There will be no Vijay Hazare Trophy, Duleep Trophy or Challenger Series this year and as of now there is no provision for Irani Cup also. "This is a tentative list that has been prepared and it has gone for approval of president Sourav Ganguly and secretary Jay Shah," a senior BCCI official told PTI. While this is a draft schedule, it is being asked how the Indian players, who will return from IPL, will play since they will have to be in a 14-day quarantine as per Government rules. "That's an issue primarily for the uncapped players, who would be with the squad and would like to play some cricket. Now even a player's team is

knocked out before play-offs, he won't be back before November 3 and till Nov 17 will be in quarantine. "For those whose teams are in play-offs and may reach finals, they will have to miss the first few rounds in that case. But again this is a draft proposal and there could be some tweaks in it," the official said. However with BCCI expecting to conduct the next IPL in India, starting end of March or early April, it is imperative that they keep a three-week window between Ranji final and beginning of IPL which will help the domestic stars recover after hectic tournament. PTI

Shan, Woakes rise in rankings

DUBAI: Pakistan batsman Shaan Masood's century in the first Test has propelled him to a career-best 19th place in the ICC rankings for Test batsmen while Chris Woakes's match-winning 84-run knock in England's chase helped him jump 18 places. Left-hander Masood's first-innings knock of 156 pushed him up by 14 places and Buttler's innings of

38 and 75 have lifted him from 44th to 30th while Ollie Pope has attained a career-best 36th after scoring 62 and seven. In the bowlers' list, Pakistan leg-spinners Yasir Shah moved up two places to 22nd place after finishing with eight wickets in the match. Shadab Khan has re-entered the rankings at a career-best 69th position. PTI

Root hails Poms mental strength after 'brilliant chase'

AFP ■ MANCHESTER

England looked all but beaten when they stumbled to 117-5 in their pursuit of a 277-run target set by Pakistan at Old Trafford but captain Joe Root felt confident about his team's battling qualities. "We knew it would take something special but after last summer it is very hard to stop believing. It's a real strong trait of ours," he said. Almost a year on from Ben Stokes' heroic batting display to stun Australia in the 2019 Ashes at Headingley, Jos Buttler and Chris Woakes combined to deliver a counter-attacking display in a 139-run sixth-wicket stand. Buttler (75) was trapped leg-before with 21 runs still required and the second new ball due, but Woakes (84) stuck it out, edging the winning boundary down to third man to seal a famous victory. "It was a brilliant chase. I couldn't be more proud of the lads," Root said. "Jos, it shows the mental

Chris Woakes returns to pavilion after he guides England to win in 1st Test. AP

strength, to play that situation and manage different passages of it, calculating risks, manipulating the spinner, brilliant innings, and Chris was magnificent too.

Stokes out of series for 'family reasons'

PTI ■ MANCHESTER

England's star all-rounder Ben Stokes will miss the remainder of the three-match Test series against Pakistan due to family reasons, the country's cricket board announced on Sunday. The England and Wales Cricket Board (ECB), however, did not specify the exact reasons for his pull-out. "Stokes will leave the UK later this week and travel to New Zealand. He will miss England's two Test matches against Pakistan at the Ageas Bowl starting on Thursday 13 August and Friday 21 August," the ECB said in a statement. He will be flying to Christchurch — where his parents Ged and Deb live. Stokes' father — a former rugby league international — was hospitalised days ahead of England's Boxing Day Test against South Africa in December last year, and has since been recuperating at home in New Zealand.

choice but to reel in the target in one-day mode. "It was good idea to take them on and put them under pressure," Woakes said. "He is one of the best white-ball players in the world — one of best run-chasers — and he showed why today."

Saina begins training but will join SAI camp after couple of weeks

PTI ■ NEW DELHI

London Olympics Bronze-medallist Saina Nehwal has resumed training at a separate facility in Hyderabad after the coronavirus-induced break and is likely to join the national camp at the SAI Pulella Gopichand Academy in a couple of weeks. Saina is one of the eight Olympic hopefuls who have been allowed by the Sports Authority of India (SAI) to resume training at the SAI Pulella Gopichand Academy from August 7 following the Telangana Government's approval. However, the former world No 1 has, for the time being, decided to train with shuttle husband Parupalli Kashyap and 2014 Commonwealth Games Bronze medallist RMV Gurusaidutt at a different centre near the Gopichand academy. "We have been training at a centre near the Gopichand academy for a week now. It is a small facility. We started with the basics as it was after a long time that we were hitting the court," Kashyap, a former Commonwealth Games champion, said. "Saina has just joined. She will probably start training at the Gopichand academy in a couple of weeks. She wants to get fitter and reach a decent level. She has sought the permission of Gopi sir and discussed it with new Indonesian coach Agus Dwi Santoso," he added. Kashyap, who is currently ranked 24th in the world, believes the Gopichand academy is equipped with enough courts to accommodate a few more players, who can start training by following social distancing and other regulations laid down by SAI.

Akram criticises Ali's captaincy

PTI ■ MANCHESTER

Fast bowling great Wasim Akram has come down heavily on Pakistan captain Azhar Ali for his decisions during the first Test against England, saying he "missed a trick quite a few times" in the visitors' three-wicket defeat here. Akram was particularly critical of Ali's decision to under-bowl pacer Naseem Shah, who was used for just 13 overs out of 82 in the second innings while defending a target of 277. "It will hurt. It will hurt the Pakistan team and the cricket lovers in Pakistan," Akram was quoted as saying by Sky Sports. "Winning and losing is part of cricket, but I think our captain missed a trick quite a few times in this game, as far as his leadership is concerned," the former Pakistan captain said. Akram felt with England reduced to 117 for five, the need of the hour was to put pressure on Buttler, who was fighting for his Test spot, and Woakes, who averaged just 5.22 with the bat in his previous six Tests. "When Woakes came in, there were no bouncers, no short deliveries, they let him settle down and runs were coming easy," Akram said dissecting the errors of Pakistan skipper Ali. "Once the partnership got going, nothing happened — the turn didn't happen, swing didn't happen — and Buttler and Woakes just took the game away."

'LET OFF THE HOOK' Pakistan head coach Misbah-ul-

Haq is not happy with his side's below-par batting effort in the first Test but more disappointing to him was how the visitors let England off the hook during their run chase. "...We are disappointed that we let England off the hook after they were five wickets down at one stage. The way Buttler and Woakes counter-attacked our bowlers it was very skilful," Misbah said. "Over all, we could have done better with the bat in the second innings. It would have been a different scenario if it was a 300 above target. It is very important to put up decent score in the second innings against England's quality bowling attack in their own conditions."
