MP Govt PROS 2-day orientation programme for farmers at CMNCJU

Sagar Azad, Director of Agri Agro, said talking about entrepreneurs, Chauhan added.

When the gold well came, the rock dancer, Chauhan added. The gold well was just 240 feet deep. The gold well was drilled by Kisan Singh, a farmer from Madhupur, who said that he had been searching for gold for the last 25 years. The gold well had been drilled by a local mining company.

Chauhan also condoled the news of the gold well coming to the state and said that it was a great day for Madhya Pradesh. He added that the government would do everything possible to ensure that the gold well was drilled in a safe and environmentally friendly manner.

The gold well was drilled by a company called Gold Miners India. The company was licensed by the government to drill for gold in the state. Chauhan said that the company had been working on the gold well for the last five years.

Chauhan said that the gold well would bring a lot of prosperity to the state. He added that the government would be setting up a gold refinery in the state to process the gold.

Mishra. The report specifically mentions Madhu Kumar and the state against a state police service 'tal action' against the IPS officer. The report states that the Union Home Secretary has asked the Madhya Pradesh by a certain time soon as infection tally set to touch one crore anytime. The report further explains that the ongoing protest is an attempt to hold the government accountable for the deaths of farmers. The report goes on to say that the protests have been going on for more than two weeks against the Punjab Government. The report also mentions that although some organisms have shown a recovery, there are still many who are still in danger. The report concludes that the government has not taken any action to ensure the safety of the people and that the protests will continue until the government acts on the farmers' demands.
AIMIM rejects Didi-B'Team charge

Protest against farm laws: Farmers to take out morcha to Ambani group's office on December 22 in Mumbai

And the ongoing farm laws agitation demanding the withdrawal of 3 farm laws is on December 22 to mark the beginning of the year with a morcha to the Ambani group's office at BKC, Mumbai.

"Today is the day when our agitation is on the 58th day and this is also the day when we will take out our morcha," the Maharashtra State Farmers' Federation (MFSF) President and standing committee member of the All India Kisan Sabha (AIKS) Ashok Deo, said. The morcha begins from Nagina Chowk and passes through the Wankhede, Brabourne, SEEPZ Metro-3 corridor as it provides proximity to Churchgate station, Bombay High Court, head offices of various banks and the City Civil court. The morcha will culminate at Ambani Estate at BKC.

"We have been demanding the withdrawal of farm laws and it was on December 22 that these laws were passed. It was on December 22 that the farmers started the agitation," Deo explained.

The day also marks the 100th day of a nationwide protest by farmers against the farm laws. Farmers have placed the morcha as a sign of their commitment to the ongoing agitation. Deo said that the farmers will also stage a demonstration on December 23 to protest against the recent increase in diesel rates.

"This protest will be an extension of the farmers' morcha on December 22. The farmers will also stage a demonstration on December 23 to protest against the recent increase in diesel rates," Deo said.

The farmers have been protesting against the farm laws since November 26, 2020, demanding their repeal and the implementation of the Minimum Support Price (MSP) system. The farmers have been demanding that the government guarantee them a minimum price for their produce to ensure fair returns.

As the morcha approaches, the farmers have urged the government to withdraw the farm laws and give them a fair price for their produce. The farmers have also called for a nationwide bandh on December 22 to protest against the farm laws and demand the repeal of the three laws.

Deo said that the farmers are prepared for a long battle if their demands are not met. "The farmers are prepared for a long battle if their demands are not met," Deo added. "The farmers are not ready to give up and will continue their protest until their demands are met."
Boris is willing

The UK Prime Minister would grace the R-Day parade but his post-Brexit tilt towards India may give some Chinese heartburn

U

Prime Minister Boris Johnson is set to visit New Delhi from January 11 to January 14. He will tour the ITPL factory in Telangana, which is the largest unit in the country in which an Indian company is an importer. The significance of the trip is that it comes on the back of India’s recently signed free trade agreement with the EU, which has put India on the map as a market for high-quality goods. Both nations have strong cultural and economic ties, and this trip is seen as a sign of India’s growing importance in the world.

The trip will also be significant in terms of the bilateral ties between India and the UK. India’s decision to join the WTO has made it a key player in the global economy, and the UK is keen to establish a strong trade relationship with the country. This trip will be an opportunity for both countries to discuss ways of increasing trade and investment, and to explore new areas of cooperation.

In conclusion, the trip of the UK Prime Minister to India is an important event, and it is expected to have a significant impact on the bilateral relations between the two countries. It is a sign of India’s growing importance in the global economy, and of the strong ties that exist between India and the UK.
The thread that binds us

India is a nation united by the sensibilities of a unique Sanskrit-Urdu culture and no one can take that away from us.

JAK KUMAR

On November 27, through a gentle reminder and following the recent public 听证会 on the constitution of an Ariyas Committee on the Indian Constitution, the government has formally imposed a moratorium on all large-scale climate change obligations under the Paris Agreement, including the adopted Nationally Determined Contributions (NDCs). One of the functions of this committee is to “commission and support independent and multisectoral studies that provide factual basis and learning actions.”

India has long been known for its innovation in the critical areas of climate change mitigation and adaptation. This is not a new fact, but a reiteration of the continued efforts and commitment towards the goals set out in the recent climate conferences.

Indigenous research and development (R&D) scholars and practitioners have played a significant role in the development of strategies and policies. For instance, as per the recently released report on health and climate change, there is a need to focus on the health sector to tackle climate-related challenges.

On the mitigation front are those technologies and innovations that can help in reducing greenhouse gas emissions. For instance, the use of renewable energy sources such as solar and wind power can significantly reduce the carbon footprint.

However, there are also challenges in the implementation of these technologies. For instance, the lack of infrastructure and the high cost of implementation can be daunting obstacles.

In terms of gross expenditure on R&D, India’s expenditure on R&D as a percentage of GDP is still low. According to the Organisation for Economic Co-operation and Development (OECD) report on innovation and science, India’s expenditure on R&D as a percentage of GDP is 0.7%.

This highlights the need for increased funding and support for R&D activities. It is essential to build a robust R&D ecosystem to address the challenges posed by climate change.

India, therefore, needs to continue investing in R&D to address the challenges posed by climate change. The government should also provide incentives to private sector companies to invest in R&D activities.

India can only be built through science and technology. It needs to be driven by universities and research institutions. The government should also collaborate with the private sector to address the challenges posed by climate change.

In conclusion, India’s progress in the critical areas of climate change mitigation and adaptation is commendable. However, there is still a long way to go to achieve the targets set out in the Paris Agreement.

India should continue its efforts to build a robust R&D ecosystem and invest in technologies that can help in reducing greenhouse gas emissions. It is imperative to build a strong R&D ecosystem that can address the challenges posed by climate change.
Trump still involved in ongoing litigation related to presidential elections, says White House official

WASHINGTON: President Donald Trump is still involved in ongoing litigation related to the 2020 presidential election, according to a top administration official, indicating the former president has not ended his legal challenges.

“The statement from White House Press Secretary Jen Psaki last week was incorrect,” an administration official, who spoke on condition of anonymity, said. “Towards the end of his term, the president was still involved in several pending lawsuits related to the election, and those lawsuits have not been resolved yet.”

The official declined to elaborate on the nature of the ongoing litigation or provide details on the status of any particular case.

Trump’s lawyers have been active in several legal challenges related to the election, including disputes over ballot recounts, voting processes, and allegations of fraud.

The former president has repeatedly claimed, without offering evidence, that the election was stolen from him through voter fraud and other irregularities. His legal team has filed dozens of lawsuits across the country, primarily aimed at challenging the results in key battleground states.

These lawsuits have mostly been unsuccessful, with judges dismissing most of them on the grounds that they lack merit or that they cannot undo the election results. Several lawsuits have also been ruled on by the highest court in the country, the Supreme Court, which has consistently refused to hear them.

Despite the legal setbacks, Trump and his allies have continued to pressure state and federal officials to contest the results, even though the election was certified by both the House of Representatives and the Electoral College in favor of President-elect Joe Biden.

Trump has also been openly considering the possibility of a recount in certain states, although it is not clear how such a recount would be conducted or if it would be legally permissible.

The official added, “The president’s team has been working closely with legal experts to evaluate the various legal avenues available to challenge the election results. They continue to explore all legal means to ensure that the election is conducted fairly and that the integrity of the vote is preserved.”

The official also pointed out that Trump’s legal team has been working to push the election dispute to the courts, and that they plan to file new lawsuits in the coming weeks.

Psaki, speaking at the White House last week, had indicated that Trump’s legal challenges were “over.”

Still, the official noted, “The president’s legal team is committed to ensuring that every legal issue is fully explored, and they will not abandon the legal fight until the election is settled in a manner that reflects the will of the American people.”

The official concluded, “We will continue to support the president’s efforts to ensure the integrity of the election process and to uphold the rule of law.”

The White House official further emphasized that the president’s legal team is dedicated to exploring every possible legal avenue to challenge the election results, and they will continue to work tirelessly to ensure that the election is conducted fairly and that the integrity of the vote is preserved.”

PETROL & DIESEL

New Delhi: Oil marketing companies continued to hold back diesel prices for the 24th day on Friday, while diesel prices remained steady at their highest levels for the 25th day of the auto fuel’s跌平

Accordingly, the new prices were in effect in most cities of the country, except in Mumbai and Chennai, where the diesel prices were 98.74 and 99.74 rupees per litre, respectively. In these two petrol pump locations, the diesel prices have not changed in the past three days.

While the New Delhi and Mumbai prices showed a drop, other major cities like Kolkata, Chennai and Bangalore witnessed an increase in the prices. The petrol price in Kolkata is now at 122.13 rupees per litre, marking a increase from the previous day’s 120.91 rupees per litre.

The hike in the petrol price was due to the increase in the benchmark oil price on the global market, which has risen over the past few days.

In contrast, the diesel price in Kolkata remained unchanged at 117.03 rupees per litre, same as the previous day’s price.

The fuel prices are influenced by various factors, including the cost of crude oil on the international market, the rupee-dollar exchange rate, and fiscal levies.

On the other hand, in Chennai, the petrol price increased to 122.74 rupees per litre, marking a rise of 0.42 rupees from the previous day’s 122.32 rupees per litre. The diesel price also rose to 117.44 rupees per litre, marking a increase of 0.42 rupees from the previous day.

In Bangalore, the petrol price rose to 122.62 rupees per litre, marking a increase of 0.42 rupees from the previous day’s 122.20 rupees per litre. The diesel price also increased to 117.32 rupees per litre, marking a increase of 0.42 rupees from the previous day.

The fuel prices in other major cities like Kolkata, Chennai and Bangalore were also up by a similar margin.

The petrol price in Kolkata is now at 122.13 rupees per litre, marking a increase from the previous day’s 120.91 rupees per litre. The diesel price in Kolkata is also up to 117.03 rupees per litre, marking a increase of 0.42 rupees from the previous day.”

- Petrol: 122.74 rupees per litre (Increase of 0.42 rupees)
- Diesel: 117.44 rupees per litre (Increase of 0.42 rupees)

**Bangalore**
- Petrol: 122.62 rupees per litre (Increase of 0.42 rupees)
- Diesel: 117.32 rupees per litre (Increase of 0.42 rupees)

---

**Companies and Their Initiatives**

The increase in fuel prices was attributed to the upward trend in the global oil prices, which have been influenced by factors such as geopolitical tensions and supply disruptions.

Meanwhile, the government is yet to announce any measures to address the rising fuel prices, which have been a concern for consumers and businesses alike.

A podcast titled MeHad it would be your instant reaction as If you are ever asked about the film. Well, man or almost of us would immediately leap to the deep sea of watercolors, where dogs, drugs and violence collide. But, this film has an entirely different tale. MeHad it is unlike anything you have seen before. It's a band of three, a band of brothers in every sense of the word. And, it has brought together two of the most respected names in the industry, Guneet Monga and Amit Mehta, to produce the world's first original podcast in India. MeHad it is a podcast that tells the story of a familial saga. It is a family that has been torn apart by the mafia. It is the story of a family that has been living in the shadows, under our very eyes. It is the story of a family that has been dealing with the mafia for decades, and has been forced to keep their secrets hidden. It is the story of a family that has been fighting for their freedom. And, it is the story of a family that is still fighting for their freedom.

MeHad it is MeHad it has been a joy to collaborate with them as a co-producer. Their attention to detail and their passion for storytelling is truly inspiring. And, it has been a pleasure to work with them on this podcast. Thank you for being a part of this journey. We are excited to see how this podcast will be received by the audience. We hope that you will enjoy listening to MeHad it as much as we enjoyed creating it.
The Ministry of Jal Shakti holds a review meeting of the National Hydrological Project

**PAUSE AND REFLECT**

The National Hydrological Project was started in the year 2006 as a Central Sector Scheme with 100 per cent Sector Scheme with 100 per cent funding by the Government of India, with an aim of improving the reliability, sustainability, and efficiency of water resources management and delivery systems in the country. It is a comprehensive programme aimed at establishing a premier international facility for water resources management and delivery systems.

Karan at the meeting highlighted the objectives of the project. Dr. Gaurav Sinha, Secretary to the Ministry, emphasised the need for a multi-disciplinary approach to address the challenges of water resources management and delivery systems. He also stressed the importance of collaboration between various stakeholders, including governments, research institutions, and the private sector.

The meeting was attended by representatives from various sectors, including government officials, researchers, and industry leaders. The participants discussed the achievements of the project so far and identified areas for improvement.

The meeting concluded with a consensus to continue the efforts to achieve the objectives of the project. The next meeting was scheduled to be held in three months.

Game for Night Life

India begin quest to repeat 2018-19 heroes with Pink Ball affair

PTI | ADELAIDE

A game

A Test India's pink ball affair will add color to the already dynamic atmosphere of the day-night Test match between India and Australia at The Gabba, Brisbane. The match is the first of two day-night Tests in the series, which will conclude at the Sydney Cricket Ground next week.

India will be looking to repeat their memorable performance from the 2018-19 series, when they defeated Australia in the first Test at Adelaide Oval to take a 2-0 lead in the series. The pink ball was introduced in the 2018-19 series and India batted with great success under Virat Kohli's leadership, winning both Test matches.

The Gabba is known for its vibrant pink and purple lights, which will be turned on for the first time in the series. The pink ball will be a shining star in the game, adding a surreal touch to the match.

The match will also see the return of former Australian skipper Tim Paine, who missed the 2018-19 series due to injury. Paine's return will add an extra layer of excitement to the match.

The Gabba has a long history of hosting day-night Tests, and the pink ball match will be a unique experience for the players and fans alike.

India and Australia have played three day-night Tests previously, with India winning two and Australia winning one. The Gabba is expected to host a competitive day-night Test match with the pink ball shining bright in the background.

Rahane will do tremendous job in my absence: Kohli

India captain Virat Kohli on Thursday backed his deputy Ajinkya Rahane for a tremendous job in his absence, saying that the Indian team under his leadership will get better and stronger with the experience of playing in the pink ball Test.

"I think the experience of playing in the pink ball Test is a very important thing for the team," Kohli said.

"When we played in the pink ball Test, the team got a lot of experience in terms of handling the pink ball and understanding its characteristics. I believe that the team will get better and stronger with the experience of playing in the pink ball Test, and the team will definitely get a good base for the future.

"I believe that the team under Ajinkya will do a tremendous job in my absence. I am sure that the team will perform well and will get better with the experience of playing in the pink ball Test.

"We have a lot of good players in the team, and I believe that the team will perform well even in my absence. I am sure that the team will perform well and will get better with the experience of playing in the pink ball Test.

Yuvraj Singh on Thursday praised Indian skipper Virat Kohli, saying that he is the perfect role model of a leader.

"I believe that Virat Kohli is the perfect role model of a leader," Yuvraj said.

"He is a very inspirational leader and he sets a good example for everyone. He is very hardworking, and he never gives up. He is a very inspirational leader and he sets a good example for everyone.
