**PRO-FARM LAW POSTER**

**Punjab BJP uses protesting farmer’s image**

Haryana Government has released a series of 39 pictures to portray the state’s farmers as demoralised. The 39 pictures are set to portray the farmers and a ‘leader’, in their campaign against the new farm laws, as being different from their real selves. The campaign was launched by Khalsa Struggle for Rights on Tuesday in the wake of the farmers’ protest against the new farm laws, which has reached its third week.

**KISAN DIWAS**

**SAD workers to participate in mass one-hundred strike on December 23**

**PUNJAB**

On the occasion of Kisan Ki Daawat, the Punjab government has decided to organise a massive protest against the new farm laws. The SAD members have been given the task of ensuring maximum participation in the rallies. The farmers will be protesting in all districts of the state on December 23, the Kisan Ki Daawat. The chief minister of Punjab, Captain Amarinder Singh, has made it clear that the rally will be peaceful, but if there is any provocation, the police will use all necessary force to maintain law and order.

The Prime Minister also emphasized the importance of improving the employment of the people of the state. He said that the government has taken several initiatives to improve the employment of the people of the state, including providing funds for employment infrastructure and improving the quality of employment services.
Sastry, who was innocent, Sephy broke into the house and killed her. She found the body in the room and reported it to the police. The police investigation revealed that the murder was committed by an unknown person.

The murder of the 16-year-old girl, who was murdered in the same manner as her mother, shocked the entire country. People from all walks of life expressed their condolences and called for justice for the victim. The interviewing team said that they were confident that justice would be done and the murderer would be brought to justice.

The case was handed over to the Special Investigation Team (SIT) of the Uttar Pradesh Police. They conducted a thorough investigation and collected evidence that led to the arrest of one person, identified as Qasim Shaikh.

Qasim Shaikh, a 32-year-old man from Aligarh, was arrested on January 19, 1993. He confessed to the murder of the two girls and revealed that he had a grudge against their family. He said that he had a conflict with their family and wanted to teach them a lesson.

The case was transferred to the Supreme Court and the top court constituted a Special Court to try the case. The Special Court was set up under the Special Courts (Trial of Offences) Act, 1974.

The Special Court conducted a thorough investigation and collected evidence. The murder was committed in the Nandita Lane area of Aligarh on March 27, 1992. The Kerala government didn’t have any information about the murder until the next day.

The Special Court convicted Qasim Shaikh and sentenced him to death. The case was appealed to the Supreme Court, which upheld the conviction and sentence.

Qasim Shaikh’s appeal was dismissed by the Supreme Court on January 8, 2001. He was executed on January 15, 2001, by hanging.

The murder of the two girls was a big blow to the community and it created a lot of fear and作了。
Inbound doldrums

With the inbound tourism non-existent this year, locales which depended on foreign tourists find themselves struggling for survival. On 16 March 2020, when the coronavirus infections in India were still concentrated in Delhi and Kerala, tourists in Rajasthan began the first cluster of COVID-19 cases in India. No one had any conception that the virus would turn into a pandemic. But within a few months, the tourism sector went into a tailspin.

In Goa, the flow of domestic Indian tourists and white-collar migrants who have made Goa their holiday spot, to the destination of holidaying, has dried up. Goa and Kerala, both tourist-dependent states, are one of the few states where the tourism sector does not have to rely on international tourist inflows. Even in these states, the tourism sector is in a tailspin.

Following the travel ban enforced by the government, the situation for the tourism sector looks bleak. The Indian government’s action to ban international travel has hit the tourism sector hard. As per the guidelines, international tourists are not allowed to enter India. This has left the tourism sector in a bind.

Nepal has a long, shared history with India

There is a strong connection between these two countries.

New COVID-19 strain

The new variant of Coronavirus is spreading in the UK and has been identified in at least 20 other countries. The new variant is spreading in the UK and has been identified in at least 20 other countries. It is not yet known whether the new variant is more transmissible or more severe than other variants of the virus. However, experts are monitoring the situation closely and taking steps to prevent its spread.

There are some concerns between Shrikanth Reddy and Virendra Singh, who are part of the Opposition. The Opposition is accusing the government of not doing enough to contain the virus.

There are positives and negatives in the current situation. On the one hand, the government is being criticized for not taking enough measures to control the spread of the virus. However, the government is also being praised for its efforts to contain the spread of the virus.

There has been a rise in the number of COVID-19 cases in India. There are many concerns about the virus, and the government is working to control the spread of the virus.

There are many concerns about the virus, and the government is working to control the spread of the virus. The government is taking steps to contain the spread of the virus, and the public is being urged to take precautions to prevent the spread of the virus.
Humanity hurtling towards a climate crisis

The world’s environmental conservation challenges cut out. It must forge a resilient strategy for 2021 and beyond

FARAH DARRAJ

The COVID-19 pandemic has taken a toll on our mental health and our societies; it has exposed and exacerbated the effects of climate change. While the COVID-19 pandemic has been the dominant news story, the impacts of climate change have not diminished. The Pacific islands and the Brazilian Amazon are two regions that have been hit hard by the COVID-19 pandemic, and the impacts of climate change have also been severe. The Pacific islands have been hit by a series of hurricanes, while the Amazon has experienced a series of forest fires.

The COVID-19 pandemic has also highlighted the importance of protecting the environment. The pandemic has shown that we need to be more resilient and adaptable, and that we need to be able to respond quickly to new challenges. The pandemic has also highlighted the importance of investing in the environment, and of investing in the health of our communities.

With the dates for Boards to be announced in March 2021, there is a lot of angst among the students. BHARTI GOYAL shares tips that will come in handy for them.

T he Royal exams are valued as the foun- 
dation of a child’s future in the Indian 
educational system. Apart from the academic aspect, the country has a special focus on the students of classes 10 and 12. The outcome of these exams is important in the event that they decide their future course of action. Millions of students across the country have put in their hard work and devotion toonday exams, which are now being canceled. And hence, the students lost cre-de.

Nonetheless, there is no reason for students to lose their motivation looking at excellent results in the summation. To make the job easier for students, it is essential to keep their lifestyle as normal as possible. Consider it their personal time to come out from the clutches of the syllabus. Meanwhile, schools are making all efforts to help students in completing the course. Now, the students must follow certain tips to prepare something that helps them score well.

Prepare a time table, stick to it: First and foremost, prepare your study calendar that is aligned with your lifestyle style. Rather than jumping to other books, do the same with your timetable. Also, students should prepare short reminders of their timetable to underline (or highlight) the crucial sessions to summarize their study in the best method.

To thrash out weaknesses, take tests every week: To become ready for the exam day, a student must take several tests throughout the year to maintain their confidence. This will not just help in revision but also improve your time management skills. You may also consider taking data from other sources as a material as explaining answers to someone he has been taught helps you understand better. As an academician, you are expected to undertake student work to make them study. Rather than just reading books, students should try examining the data from an external environment and the external processing and use of data from an analysis. Thus, the management even more important.

W

t is important to know what skills are necessary for the position that one has applied to. ANKIT SHYAMSUKHA shares tips that will help aspirants to land their dream job.

Digital skills have opened up new avenues for students. The current generation of students are being trained to solve problems using technology in every field. Although the role of arts in schools and higher education is still being debated, the advent of technology has opened up new opportunities for students.

The Faculty of Engineering at the University of Wits in South Africa recognized academic excellence in digital skills by offering scholarships to students entering the school. These digital science students are being trained to solve problems in the future world of work, which is defined by software, algorithms, and data science.

One of the most important skills that students need to possess is the ability to work in a team. This is a critical skill in the modern workplace, where teams need to collaborate and innovate to solve complex problems. In addition, students need to have strong communication and analytical skills, which are essential for success in any field.

For full details and terms, please visit the website of the Faculty of Engineering at the University of Wits.

For the Faculty of Engineering, Engineering at the University of Wits, engineering students, digital science.

REAL TIME FLOOD FORECASTING BY IIT MADRAS

The Indian Institute of Technology Madras (IIT Madras) is using real-time flood forecasting and management to help mitigate the impact of floods in the Indian subcontinent. The institute’s flood forecasting system uses real-time data from satellites, rain gauges, and other sensors to predict the likelihood and severity of floods in the region.

For more information, please visit the website of IIT Madras.

MATH IS GREAT: HOW TO GET THE PERFECT SCORE

For many, math is a subject that gives them nightmares. However, by following a few basic tips, one will fall in love with numbers, says ANITA KISHOR.

Mathematics is an incredibly important subject. It has incredible power and can be used to solve problems in various domains. One of the best ways to understand mathematics is to break it down into smaller, more manageable concepts. To achieve this, students should focus on understanding the basic principles of math, such as addition, subtraction, multiplication, and division. Additionally, students should focus on understanding the underlying concepts of math, such as patterns, relationships, and functions. By focusing on these concepts, students can build a strong foundation in mathematics.

For more information, please visit the website of the Institute of Mathematical Sciences.
Australians living in India woke up to the news that India had beaten England in their Test series. For those away from home, the series was a reminder of the love and hate that characterise a relationship that has lasted for 126 years. Four Test matches and three ODIs have now been played, and Australia has lost all of them.
