MODI takes up controversy over formation of Telangana again

Prime Minister Narendra Modi took up the controversy over the formation of Telangana again in Parliament on Thursday.

"I would like to refresh Azad saab's memory, people will not forget past things easily. When Telangana was formed, what was the situation of the AP?" said Mamatha. "We have to protect our people."
The DGP of Telangana Police, Mahender Reddy congratulated the Telangana Police for securing the conviction of the accused in the Hajipur case.

The DGP of Telangana Police, Mahender Reddy said, “The Telangana Police have secured the conviction of the accused in the Hajipur case. This is a landmark achievement for the Telangana Police and it shows that our police force is competent and capable of dealing with any kind of case. We are proud of our police force and we are confident that they will continue to uphold the law and maintain peace and order in the state.”

The Hajipur case was a complex and challenging case that involved multiple crimes, including murder, rape, and desecration. The accused had been on the run for several years, but the Telangana Police were able to track him down and bring him to justice.

The case was a testament to the determination and professionalism of the Telangana Police, who worked tirelessly to collect evidence and build a strong case against the accused. The verdict was a significant victory for the victims and their families, who had been waiting for justice for many years.

The Telangana Police are committed to ensuring justice is served and the law is upheld. They are dedicated to protecting the citizens of the state and maintaining law and order. They are proud of their achievements and are committed to continuing their work in the future.

The chilli farmers are badly hit by China annually. “China has export market with 5,000 tonnes of chilli produced in Telugu states mainly Andhra Pradesh,” Minister for Food, Agriculture and Commerce, Ramachandra Rao in the Rajya Sabha. The minister also added that remunerative prices are on contrary the prices are seen collapsing with the sudden demand for red chilli by the Chinese market due to the outbreak of virus, China suspends export and import of chilli, prices slumped on the world market.

With the minister addressing, the state government wanting to review the sudden demand and high prices on the chilli production. “There is no much of chilli for the other countries to receive,” Rao said.

The minister also mentioned that the farmers are facing serious problem over purification of land with the government. “There is no much land for the farmers to face the problems in near future,” Rao added.

Minister for Agriculture and Commerce, Ramachandra Rao in the Rajya Sabha.

The minister appreciated the Revenue employees for confronting blood donation camps during the lockdown. “We have to appreciate the Revenue employees to get ready to face the problem in near future,” he said.

He said that Revenue employees are working at 100 hours a week. When the department gets to work for some dishonest employees.

The minister also predicted the revenue employees of Andhra Pradesh for confronting the lockdown situation.

There was no need for the other government to want the Revenue employees to rectify this mistake.

Rao said, “Revenue employees are facing serious problem over land records for the past 60 to 70 years, the minister said. YSRCP MP, V. Vijayasai Ramachandra Rao also tied to the government over the division of projects.

Rahul: PM talks of Nehru and Pak, but silent on jobs

We asked the prime minister repeatedly how many people have lost their jobs this year and a half, and for two minutes you can tell the youth about employment. It is an added task, but it is a must done about it. Youth can be mapped by the following issue of unemployment and other issues from Jharkhand and Uttarakhand.

Fighting back at Modi after the latter’s statement, Gandhi said the Prime Minister only knows about the Prime Minister’s issue. He also added that the Prime Minister is not talking about the youth and the women of the country.

Prime Minister Narendra Modi today went on the offensive in Parliament after the government’s policy of easing the nation’s economic plight with nationwide asset sales and special economic zones.

NPR was done in 2004, why is opposition feeling goonish? Modi today uses the press to put the government in the spotlight and what your government does out loud.

PRIME MINISTER Narendra Modi today went on the offensive in Parliament after the government’s policy of easing the nation’s economic plight with nationwide asset sales and special economic zones.

The congress leader’s comment follows a Parliament session that saw a tussle over a no-confidence motion against the government.

The government earlier said that the state sales were worth Rs 8.22 trillion, USD 5 trillion, but the party leader claimed that its main concern was that the Prime Minister is not talking about the youth and the women of the country.

#Germany. Exchanged views on Bundestag (Parliament) "Received the Indo-German Minister S Jaishankar on Feb 7. He informed me that India and Germany are working closely on following issues: Defence: signed MoUs for production of six transport helicopters under HAL bangalor. Two Russian defence firms have also been brought in for project. In total, 60 will be produced. Of these, 60 will be HAL and two Russian defence companies. Kamov military helicopters, to be rolled out by 2024. Aerospace: signed MoUs for cooperation in aero-engine technology. Visakhapatnam: We exchanged views on joint participation in 2024 naval exercise Bigil, starring Vijay in Cinemas. H-1486" COVID 19: Coronavirus: Forces on alert along China: Nepal borders

The Indian armed forces are on high alert along the border with China as there are reports of a massive troop presence in the country in view of the current situation. The army is currently deployed at the forward areas and the air force has been put on a higher level of alert. The Prime Minister will address the nation on Thursday.

Lack of a robust policy environment is causing STIs to flourish

There are ongoing fights in the country about successful strategies of national governments, international organizations and research institutions to tackle STIs. India in particular has made some notable advances in this direction, with the establishment of the National STI Control Programme. However, the lack of a robust policy environment is causing STIs to flourish.

Experts hail RBI measures to boost economy, improve supply of liquidity

**Radius of Fed’s influence is now the global oil demand**, says Moody’s

The Reserve Bank of India (RBI) on Thursday stuck to its prediction of 6-6.5 per cent expansion for the fiscal year 2020-21, while keeping its policy rates unchanged.

The RBI stuck to its prediction for real GDP growth of 6-6.5 per cent for the fiscal year 2020-21, which is at the lower end of the government's projection for the six months to March 2020.

The RBI also kept its benchmark lending rate at 4 per cent, and the repurchase rate (Repo) at 4.40 per cent.

The RBI’s monetary policy announcement on Thursday came out with guidelines for the fund infusion programme as part of efforts to support entities in some of the troubled sectors in the economy.

The fund infusion programme will enable the RBI to provide liquidity to significant financial institutions and provide sectoral support to some of the troubled sectors in the economy.

The RBI’s move has been widely hailed by the stakeholders.

**Base rate:**

The RBI had reduced its base rate, or the benchmark lending rate, by 125 basis points (bps) to 4 per cent in March, and by 25 bps to 3.75 per cent in August last year to shore up demand and credit growth in the economy.

**Monetary policy actions:**

The RBI had already announced some of its policy measures such as keeping the repo rate unchanged and a CRR exemption for increased liquidity of up to Rs 250,000 crore.

Prime Minister Narendra Modi had also instructed the RBI to provide additional liquidity of Rs 50,000 crore.

**Steady output:**

According to the RBI, steady output was seen in the wake of the RBI’s measures. It had also announced a Rs 9.5 lakh crore fund infusion programme.

**Reduced activity levels:**

The outbreak of coronavirus disease (COVID-19) has already induced a short-term reduction in global oil demand.

**Reduced activity levels:**

While the economic activities across the globe are expected to be affected, the industries and supply chains are likely to be impacted as well.

**Reduced activity levels:**

The RBI, in its policy announcement, also said that the economic activities across the globe are expected to be affected.

**Reduced activity levels:**

It added that the economic activities across the globe are expected to be affected.

M any educational institutions are encouraging children from a young age to take up coding in order to prepare them for future jobs. One such effort was a rural hackathon that was held recently to find workable solutions for problems in villages and communities with active participation from the students of government schools, Goyer and other educational institutions.

One such event in Telangana is the Rural Hackathon series, Multiplication of any Table, organized and coordinated by the Telangana Social Welfare and Residential Educational Institutions Society (TSWREIS).

This is a unique event in the rural hackathon series involving young rural children and the students of government schools and the rural communities. The hackathon was organized for 100 hours spread over 75 days to find workable solutions for various problems of the rural areas. It was held simultaneously in 111 communities and villages and 170 expert volunteers were engaged in the hackathon.

Almost all the 170 hackathon participants were garment workers, school children, students of the government schools, and experts from different fields. The hackathon was organized by TSWREIS, a part of the Ministry of Women and Child Development, Government of India.

Before the hackathon, the students toured the villages and communities and identified problems that needed to be solved such as finding means to increase productivity in agriculture, reducing the load of grazing of cattle, giving support to women especially those in villages and creating awareness among the children about the importance of education and the will and power of people to fight for their rights. The students were given training in coding via e-learning and conducted a workshop for 100 hours spread over 75 days. Nearly 120 students and experts were drawn from the rural communities to help with the project.

The children and the trainers both agreed that after the training, digital technology has become part of the children’s thought process. At the age of 15, these kids not only are learning to code in HTML and Java script which seemed impossible a few years back, but they also have a deep understanding of the importance of learning to code and computational thinking skills. The 5,000 and more students were given training in coding and learnt computational thinking which will enable them to take up any budding project in their future ahead with. The training and the trainers both agreed that after the training, digital technology has become part of the children’s thought process. Surya ton leads Mumbai's fightback

Younis Khan. The 46-year-old veteran was consistent throughout his innings and ended in the crease for the 12th time this season.

Prasad said: “I felt seriously for Surya who was gloomy when I delivered the blow. But he took it with the grace and handled it really well.”

The forward added the change is about taking on Belgium since India, Philippines and Romania are weak teams.

Fernando Portugal paced Estonia to a 2-0 win and the U-19 team’s semi-final against Bangladesh on Sunday, confirming their qualification for the World Cup at the semi-finals.

Estonia are in a strong position to reach the final of the World Cup as their semi-final opponents, Bangladesh, have not been able to perform well so far.

The health scare has led to several withdrawals of athletes from the Games, and athletes are keeping their fingers crossed for a smooth event in Tokyo.

Mumbai, the cricketing capital of India, is currently gearing up for the World Cup with a series of matches against the best teams in the world.

The Walker Cup was introduced in 1908 and is a biennial match played between the leading male amateur golfers in the United States and Great Britain and Ireland. The current format of the competition was introduced in 1993 and involves four matches to be played over four days.

The Tokyo Olympics began last Friday but for Surya, his focus was on the challenge in front of him.

Up next for India will be the group stage encounter against New Zealand on Monday, in which they are hoping to win their first game of the tournament.

As big as a fan of Doini as anyone else: MSK Prasad

Fernando Portugal paced Estonia to a 2-0 win and the U-19 team’s semi-final against Bangladesh on Sunday, confirming their qualification for the World Cup at the semi-finals.

Estonia are in a strong position to reach the final of the World Cup as their semi-final opponents, Bangladesh, have not been able to perform well so far.

The health scare has led to several withdrawals of athletes from the Games, and athletes are keeping their fingers crossed for a smooth event in Tokyo.
