Now India 3rd worst Covid-hit nation

With 21,514 fresh cases, 412 deaths in a day, India replaces Russia with only US and Brazil ahead of it

WHO ends HCO trial for coronavirus

The World Health Organisation says it is ending a trial into whether anti-malarial drug hydroxychloroquine helps patients hospitalised with Covid-19. WHO said on Saturday it has “accepted the recommendations” from the committee overseeing the trial to discontinue testing of hydroxychloroquine and Spotlight/trametinib, a drug combination used to treat sarcoma, a bone and soft tissue cancer.

The agency adds that while there was no “solid evidence” that the drugs were helping patients, it has not ruled out the possibility that they might help a small subset of patients. WHO says the decision won’t affect possible trials on different anti-malarials or on different combinations of the drugs before potential exposure to the coronavirus or shortly afterward.

August 15 deadline for desi vaccine in doubt

The possible timeline for the launch of Covaxin, being jointly developed by Indian Council of Medical Research (ICMR) and Bharat Biotech, got a new contours after the ICMR of Science and Technology declined a statement that the vaccine would be released by Independence Day.

The ministry said there is no such statement and that the release would depend on the “clinical success” and the “availability of supply chain.”

The ICMR had on Tuesday made the statement in response to a query to the Ministry of Science and Technology as to when the vaccine would be released.

The ICMR, in its statement, also made it clear that the data from the trials have not yet been reviewed by the Drugs Controller General of India (DCGI) and the vaccine would not be released till the regulator’s nod.

The statement came after reports of the vaccine being available by Independence Day, a day the Ministry of Science and Technology had denied.

The Ministry of Science and Technology had on Tuesday said that the vaccine would be released on Independence Day.

The ministry also said that the release of the vaccine would depend on the availability of supply chain and that the DCGI would need to give a clearance before the vaccine is released.

The Ministry is expected to submit the data of the clinical trials to the DCGI soon.

The ICMR said that the trials are nearing completion and the vaccine will be ready soon.

Four Delities caught driving caught with gun in Haridwar

STAFF REPORTER IN NEW DELHI

Delhi Police has arrested four men from New Delhi after they were found in possession of a gun on a moving car.

According to the Rajasthan Police, at around 3:30 am on the evening of June 5, police stopped a car coming from the Sonepat-Alahabad route and the driver of the car was found to be without a driving license.

The police subsequently found four men sitting in the car and a gun was recovered from one of them.

The police have identified the four men as Pratibha N. Sharma, Akhil Sharan Sharma, Shilpi N. Sharma and Surender P. Sharma.

The police have referred the case to the Scheduled Caste and Scheduled Tribe (Assistance and Development) Department of the Delhi Police.

All Punjab colleges, universities to promote students on previous year's performance

Bhupinder Singh Bhullar, Vice-Chancellor of Punjabi University, has announced that all students of the university who failed in the previous year's exams will be promoted to the next year's semester.

He said that the university's academic council has approved the decision to promote students who failed in the previous year's exams.

The decision was taken in response to the students' demands and the current pandemic situation.

The university has also decided to conduct online exams for the current semester.

We have five COVID19 related deaths 74,990 patients have recovered in Delhi, said the Health Minister

Delhi has recorded five COVID19 related deaths and 74,990 patients have recovered from the virus in the last 24 hours.

According to the Health Ministry, the total number of COVID19 cases in Delhi has increased to 3,174,418, including 672,484 active cases.

The death toll in the city has risen to 7,874, with 12 more patients succumbing to the virus.

So far, 2,760,745 patients have recovered from COVID19 in Delhi, making up 88% of the total cases.

The active cases in the city have decreased to 672,484, down from 695,332 in the previous 24 hours.

The daily positivity rate in Delhi has also dropped to 3.4%, from 3.7% in the previous day.

The Health Ministry has further advised the public to follow COVID19 protocols, including wearing masks and maintaining social distancing.

It has also urged people to get vaccinated against COVID19 to curb the spread of the virus.

With the number of COVID19 cases declining across the country, the Delhi government has lifted several restrictions, including the closure of public places and schools.

However, the government has urged people to continue following COVID19 protocols to prevent the virus from making a comeback.

31 patients reported in Uttarakhand on Sunday

COVID-19 TALLY NOW AT 3124 IN STATE, 2524 RECOVER

IN DEHRADUN

H D E R M A D H I N A R J P

The number of novel coronavirus (Covid-19) patients in Uttarakhand jumped to 3,124 on Sunday with 30 new cases of the disease. The authorities also discharged 22 patients of the disease, taking the total number of recoveries from the state to 2,524.

A total of 21 new cases were reported from Dehradun, four from Nainital, three from Chamoli, one from Pauri and one from Rudraprayag. Dehradun has reported 1,558 Covid-19 patients so far, followed by Nainital at 380, Chamoli at 268, Pauri Garhwal at 267 and Rudraprayag at 168.

A medical team of four doctors from Uttarakhand Medical College, Dehradun, had gone to Nainital in the morning to conduct health check-up of patients sent from Chamoli, Rudraprayag, Pauri, Bageshwar, Almora, Nainital and Dehradun. These five districts are high Covid zones.

Among the 30 patients diagnosed with Covid-19, 17 were males and 13 were females. Most patients were in their 40s and 50s.

Of these, 28 patients were hospitalised in Fever Care Centre (FCC) and three were in dedicated Covid hospitals.

At present, a total of 93 patients are in FCCs and 91 in dedicated Covid hospitals. The authorities have created 1,148 beds in FCCs and 1,357 in dedicated Covid hospitals in the state.

Notably, 41 of the 30 patients had contact of 30 days with a positive case and 14 of them had contact of 14 days with a positive case.

According to the officials, a total of 2,05,400 samples have so far been collected for Covid from across the state where 1,41,945 were reported negative and 63,455 positive.

Of the 30 patients, 23 were males and seven were females. Among the male patients, 12 were in their 40s, five in 30s and six in their 50s. Three were in their 20s and six were in their 60s. Among the female patients, three were in their 40s, one in 30s and one in her 60s.

Of the 30 patients, 16 were hospitalised in FCC and 14 had been admitted to dedicated Covid hospitals.

The total number of recoveries is now 2,524 while the number of active cases is 500 as of Sunday.

Shravan- The holiest month in the Hindu calendar

According to Hindu beliefs, it was during Shravan month that Lord Shiva, the god of destruction and creator of the universe, visited Mount Kailash and meditated for 12 years in the form of a lingam. This month is dedicated to Lord Shiva and is considered one of the holiest months of the Hindu calendar.

It is believed that Lord Shiva performed his penance for 12 years in Shravan month to get rid of業ievies that had accumulated in his past lives. During this month, devotees perform special prayers and rituals to please Lord Shiva, seeking his blessings and protection.

The month of Shravan is considered auspicious for performing charity work and giving gifts. It is believed that performing charitable acts during Shravan month has the maximum effect and will result in greater rewards.

The month of Shravan is also considered a time to perform puja and aarti of Lord Shiva, and the month is marked by various festivals and celebrations dedicated to Lord Shiva.

In Hindu mythology, during this month, Lord Shiva is believed to have performed the famous Tandava Nata, a dance of destruction, to destroy demons and restore peace to the universe.

In addition to this, Shravan month is also known for its special gruits such as Sawan Puja, Karva Chauth, and Sawan Amavasya. These rituals and auspicious dates are considered significant for performing pujas, fasting, and performing other spiritual activities.

In the Hindu calendar, Shravan month falls in the month of July or August, depending on the lunar cycle.

Haldwani ISBT survey report sent to Centre, approval awaited

The Uttarakhand government has sent a survey report on approval of wedding venues and banquet halls to the Centre for approval.

Not many people are booking venues for their weddings this month, due to the government's restrictions on the number of guests during the coronavirus pandemic.

Aanchal Dairy helped milk producers during lockdown

The Aanchal Dairy, a cooperative society in Dehradun, has helped milk producers during the lockdown by providing support and resources to the dairy farmers.

The dairy has extended its support to milk producers in all districts, providing milk procurement, daily milk collection, and other assistance. The dairy has also established good relations with the cooperatives and dairy farmers, ensuring that they continue to receive support during the pandemic.

The JDA, which is responsible for milk procurement and distribution in the state, has worked closely with the Aanchal Dairy to ensure that milk farmers receive the necessary support.

The dairy has also collaborated with the state government's agriculture department to ensure that milk producers receive training and guidance on best practices and sustainable farming methods.

A mild ticked off the Opposing ‘Rokhtok’ in the Sena mouth of 12 members to the Party (BJP) on Sunday over the Sena and the Bharatiya Janata Party’s (BJP) decision to step down from the NCP Government.

Taking into the account the number of deaths from the hospital, the Opposition Devendra Fadnavis has sent a letter to the Governor, asking him to take serious action against the government.

Tamil Nadu had reported 1,000 deaths on Sunday, and the number of deaths in the state has crossed 10,000. The state government has failed to control the pandemic, and the situation is dire.

Tamil Nadu: 60 dead, 4,183 test +ve on Sunday

In an effort to prevent the spread of Covid-19, the Tamil Nadu government has imposed strict lockdowns in the state. The state has recorded a total of 4,183 cases on Sunday, and the situation is dire.

According to the government, the number of cases is increasing each day, and the situation is getting worse. The state government has urged people to stay home and follow the lockdown guidelines.

Covid vaccine faces stiff opposition from whistleblowers

It is important to note that the government has not taken any serious action against the whistleblowers who have exposed the illegal activities of the medical companies.

Adams, popularly known as the ‘Warrior’, had been using his social media platform as a whistleblowing tool to highlight the irregularities in the medical industry.

A hand and the head of the six survivors were saved by the Tamil Nadu Governor on Saturday. The six survivors were airlifted to the hospital and underwent surgery.

Meanwhile, the total number of deaths in the state has crossed 10,000. The state government has failed to control the pandemic, and the situation is dire.

Bangla smugglers attack hurt three BSF personnel

A group of unidentified Bangladeshi smugglers attacked three BSF personnel in the Border Security Force (BSF) area in the North 24 Parganas district.

The incident took place while the BSF personnel were patrolling the area. The attackers were armed with sharp-edged weapons and managed to escape. The BSF personnel opened fire and killed two of the attackers.

Meanwhile, the total number of deaths in the state has crossed 10,000. The state government has failed to control the pandemic, and the situation is dire.
The vaccine race

Showmanship is for politics, not science, warn researchers on the ICMR’s rush to clear Covaxin by August 15

S cience cannot be rushed, it is a common refrain across our scientific community as the nation’s top scientific advisory body rushes to clear Covaxin by August 15. The Ministry of Science has to curb such ambitions with a statement saying it would not be ready before October. In fact, the ICMR’s rush across all the world to secure a new vaccine is not only posing to the strain on the science but also on the taxpayers who are paying for this research.

Worrying, for Indians, will be the final report of the shots, the trial documents for Covaxin do not mention Phase 3. Even for Phase 1 and Phase 2, there appears to be no such report. Several experts have asked why Covaxin is being rushed to be first into the market, especially since no vaccine in the world has been tried out on so many people.

The four stages of dealing with the grief of a pandemic

Denial, panic, scapegoating and the usual suspects are the way societies have dealt with new diseases throughout history.

---

The 1930s has been the time of generation since the pandemic started. The first wave of infections was reported in China, but it was only when the pandemic arrived in Europe and the United States that it became clear how serious the situation was.

The panic that ensued led to a rise in anti-Chinese sentiment and a growing fear of the virus. In Europe, there was a widespread belief that the virus was a result of a biological weapon developed by China.

In the United States, the government under President Franklin D. Roosevelt took the lead in fighting the pandemic. The government implemented strict quarantine measures, which led to a rapid decrease in the number of cases.

The pandemic eventually tapered off, and the United States emerged as a global power. However, many countries continued to experience outbreaks, and the pandemic continued to affect the world for many years to come.

---

The current pandemic has brought about similar reactions, with governments implementing lockdowns and restrictions to control the spread of the virus. However, the pandemic has also led to a rise in misinformation and conspiracy theories, with many people refusing to take basic precautions or believe in the science behind the pandemic.

The pandemic has also had a significant impact on the economy, with businesses closing and unemployment rates rising. However, the pandemic has also shown the importance of international cooperation, as countries have worked together to develop vaccines and provide aid to those affected.

The pandemic has also led to a rise in anti-vaccine sentiment, with some people refusing to get vaccinated despite the proven effectiveness of the vaccines. The pandemic has also highlighted the importance of public health and the need for continued investment in healthcare systems.

BAGHDAD (AP) — The Iraqi military said Saturday that its air force targeted a small village in western Iraq near Iran's border, killing two Iranian-backed militiamen and a civilian. Iran has denied any involvement in the attack.

The attack occurred just hours after President Donald Trump's administration said it had killed several Iranian generalss, including Qassem Soleimani, the leader of the Iranian Revolutionary Guard's Quds Force, in a U.S. airstrike on the outskirts of Baghdad. The attack came as tensions between the United States and Iran were high following weeks of escalating tensions.

The strike was carried out by a French-made AMX-20 armed police helicopter, according to the Iraqi military.

Commander of Iraq's armed forces, General Abdul-Wahab Suleiman, said in a statement that the United States had informed them of the strike.

Trump, in a statement, praised the military and said the strike was a “strong and well-planned” response to what he described as Iran’s “wanton and dangerous” behavior.

Shabbir, a senior official with the Iraqi military, said that the strike was a response to Iran’s “provocative actions” and that it was aimed at protecting American citizens in Iraq.

The attack comes as tensions between Iran and the United States continue to escalate, with both countries accusing each other of trying to stir up trouble in the region.

Trump has repeatedly threatened military action against Iran, and his administration has imposed sanctions on the country, targeting its oil exports and financial institutions.

Indian exchanges see only 4 IPOs in Jun quarter: Report

COVID-19 IMPACT

PB FI NEW DELHI

The total number of initial public offerings (IPOs) in the first quarter of the current fiscal is likely to remain at four, down from six during the same period last year, a report by a leading electronic exchange said on Tuesday.

The report, released by the Bombay Stock Exchange (BSE) on Tuesday, said that the number of IPOs is expected to be around six in the current quarter.

The report also said that there is a strong possibility of a further decline in the number of IPOs during the second quarter of the current fiscal.

The report also said that there is a strong possibility of a further decline in the number of IPOs during the second quarter of the current fiscal.

Kangana picnics with family in Manali

Actor KANGANA RANUT is enjoying some time in Manali before the form of monsoons. The actor organised a picnic for her family in the picturesque mountains of the area. "Though there maybe in the green zone, they appreciate all the permitted things given by the Himachal Pradesh authorities," the actress "team sweetheart."

They also shared a video where Kangana can be seen enjoying her time on the green grass while laughing her heart out. Clearly, she is spending quality time with her sister Parvati and niece Prithvi.

"There's an added advantage of being a star's son. People think I'm not very easy for us. In a way to get a little attention it helps. It's easier for people who are from the film industry but it's double the effort to make it on our own. I managed to get out of my shadow. He has been in this industry for 30 odd years," — Tiger Shroff

Biologist JEREMY WADE, in his new series, investigates baffling, unsolved mysteries of remote areas, disappearing fish species, islands lost in time and the sad plight of once-thriving rivers.

Biologist Jeremy Wade has spent the past 16 years researching the Lake Garda Monster. In a documentary that was filmed in the 16th century, the Lake Garda Monster is shown to be a nine-season series on Animal Planet's one

**Claire opens up on postpartum anxiety**

The Vampire Diaries actor CLAIRE HOLT has revealed that she suffered with postpartum anxiety after the birth of her son Jamie. In an Instagram post, Claire opened up about her battle with postpartum anxiety.

"After having Jamie, I really struggled with postpartum anxiety. Breathing was incredibly difficult, I often suffered from a cow's milk protein allergy, I was sleep deprived and felt overwhelmed," she said.

"It was hard for me to go back to work. I was really struggling with all the emotions. It was really hard for me to find any sense of normalcy and I was really struggling," she added.

Claire said it was a very difficult time for her and that it was important to talk about it.

"It's really important to talk about these things. I want to share my story because I know it's not easy to talk about these things. I want to be a voice for other women who are going through the same thing," she said.

Claire is known for her roles in the TV series The Vampire Diaries and the film The Mortal Instruments: City of Bones.

Ayurveda explores the relationship between the mind and the body, and has a holistic approach towards mental health issues and depression, says Geeta Ramesh.

Better late than never
Due to lack of awareness, poor state of education and disconnection from the outside world, Ban Raaj, a tribal community, needs education, especially women, says Narendra Singh Bisht.

The ultimate truth
No human can ever be above anyone. Only he can build the knowledge about himself, the nature of the soul and creation itself, says Rajaji Brahmanand Naikji, J.

In India, the tradition of following a guru dates back to the Vedic times. It is said by many Indians that their guru is their lord. That is why everyone looks for gurus and has respect for them. To be a guru is considered to be the ultimate truth. For most Indians, a guru is a perfect example of a man who never makes any mistake. They follow a path of righteousness and high moral standards.

There are many kinds of gurus in the world. Some of them are considered the most important by god to rule humanity. If we look closely at their beliefs, we will find that many of them are not true and cannot be trusted. Some gurus are even considered to be false and do not have any moral standards.

In the ancient Kama theory, the philosophy of the Vedanta, it is said that the soul of all beings is the same. According to this theory, the human soul is connected to the divine soul in the form of a guru. The guru is the one who gives liberation to the soul.

Some gurus are even considered to be avatars of Lord Shiva. Some of them are even considered to be messiahs sent down from heaven, in whom people believe without reservation.

A guru is like a pillar of strength, a safe haven, in whom people believe without reservation. Some gurus are like gods, because he is the one who gives liberation to the soul.

Lewandowski crosses 50-goal mark as Bayern Munich beat Leverkusen to win DBF-Pokal title

Champions League

**JOHN BIRKETT**

Bayern Munich have secured their eighth consecutive Bundesliga title by beating Bayer Leverkusen 3-0 in front of closed doors in Munich on Saturday.

The defending champions came into the match as clear favorites and looked like they were on the verge of lifting the trophy minutes after the kick-off when Robert Lewandowski turned home a cross from David Alaba to open the scoring. Lewandowski has now scored 27 goals in 25 Bundesliga games this season, surpassing his previous best of 25 goals in 29 games in 2012/13.

On 39 minutes, Leverkusen nearly got a second, but the ball hit the post off the crossbar. The Bavarians then extended their lead on the hour mark when Joshua Kimmich whipped in a cross from the left and Thomas Müller met it with a header to make it 2-0.
