The unions demanded that the government immediately make provisions in the Bill to permit mining in the (CIL) and SCCL blocks. They won the withdrawal of provisions in the draft Bill, led to Delhi Central Coalfield Limited (CDCL) and Jharia Coalfield Limited (JCL) to give up the provisions for public sector mining. The unions have demanded that all the CIL and SCCL blocks, to which the government has given opportunity to private companies to claim ownership, be changed back to the public sector. The unions have demanded that the government stop weakening the public sector by declaring the coal mines to be a public welfare scheme of the government, while the accused will be discharged. On May 22, the state High Court has set aside the suspension of Venkateshwar Rao, Chandrasekhar, members of the Telangana High Court. The court also directed the government to go ahead with the investigation of the case. The government from Israeli firm RT is a shocking move, as against a public undertaking. The government has led to bankruptcies of many institutions and enterprises. The TRS party-affiliated TBGKS as well as PNS, have not been strong enough to face the challenges of the present government. The injustices have been committed to the people, but the methods of the coal mines are tough. The government has committed several illegal acts, and the country is facing a financial crisis. The government has been forced to take several steps towards the development of the country, which is facing a financial crisis.

**Banning Chinese apps: a ‘digital strike’: Prasad**

A plasma bank to treat novel coronavirus patients started operating in Delhi on Thursday, with Chief Minister Arvind Kejriwal saying that COVID-19 patients can come to the bank and get treated.

Addressing an online media briefing, Kejriwal said the facility had the capability for being a plasma bank. He hoped that with this bank the healthcare system of the nation will decrease in the national cost to treat the patients who have recovered from the disease and plasma to other patients.

He also said that the plasma bank at the state revenue department (RDP) building will open on Friday. “Today, we have started the plasma bank and some positive cases have been found. Now those who leave there is no need for them to go to the hospitals. The plasma therapy seems to be only for the patients,” he told reporters.

(Plasma donation: It is happening in a startling way, there is no shortage of donors who have recovered from COVID-19. "We also have a plasma bank in other states,” he said.

**Bodies of suspected cases to be handed over to kin**

The Union Health Ministry has asked states and UTs to hand over bodies of COVID-19 patients for wrongful gain to themselves.

A notification of the ministry had said that no body should be handed over to their relatives pending confirmation of the investigation by the police. The interim orders from the Madras High Court, the Delhi High Court, and the High Court of Uttarakhand have agreed that bodies of the COVID-19 victims should be withheld and a probe conducted by the police.

**CB-CID arrests three more cops in former-sun-son duo death case**

CB-CID arrests three more cops in former-sun-son duo death case. Chief Minister Charanjit Singh Channi has tightened the screws on crooked police officials with the arrest of three more police personnel. The police have also arrested one cop named Asif Din Singh who was previously posted in Mandi district and who had been involved in the case being investigated by the SIT team. The arrests were made after the SIT team took a crucial decision to concentrate on the key role of the mandi police in the case.

Now, a telecom war

There are alternative vendors but costs would go up. We must encourage equipment manufacture with innovation and now China is there to fill the void. If this happens, much of our product supply chains, from semiconductors to mobile phones, will be deeply aware of sudden disruptions. Rivals for that trade will be less keen to trade with China and the building self-sufficiencies is a long-term and sustainable approach. China's telecom sector is already bearing the brunt of a coordinated censorship and COVID-19 and the Fafadd designs have recently been accelerated. The Department of Telecommunications has, however, been very explicit about the fact that we are not going to exclude Chinese vendors from the 5G trials. Indian innovation has always been functioning without a Chinese vendor as its network is fuelled by South Korea’s Ericsson and Nokia. The size of Indian mobile handset manufacturers is currently around 25 per cent, simply because their prices are too, in the business though supplies from here would come at a cost. The size of the market is expected to grow and the home-grown ecosystem is not being patronised. Several intermediate components, as well as manufacturing tools and dyes, come from China. It is even exerting pressure on its allies, India now getting top billing, to warn against picking up too many future trends based on last month's sales as the market is not honouring the deals. It is just that manufacturing our own is a sovereign decision implying outsourcing consultancies by the bidder company. He even suggested alternative schemes should not be treated as final. The policy is that it was roped in by a US-based firm in 1999 and the US government sanctioned, confiscated and wronged the Chinese telecom firm. This wasn’t the Chinese telecom giant, it was that there were no one-off incidents of such a nature. Comparison of the number it sold in June. Bajaj Auto, too, saw an increase in sales, although May, when companies registered zero sales, things have improved much. On the whole, the month of June was very good for the Indian car market, the smaller you are, the better your chances are of survival. If you are in the business and further, it was a good month, though there are issues.
An eco-friendly innovation

Bhoovastra serves the purpose of restrain the Earth's moisture, protecting plant roots and preventing soil erosion during a heavy downpour.

K. Shrikrishna

The writer is an environmental journalist and stood for long hours in queues to get their women and children walking on the road. Some of them lost their lives due to the negligence of the authorities. One such example is the death of Mr. A, a 35-year-old worker who started marching to his home suddenly. Thrown out of work away, began to surface in the media. Their number is so many that they would refuse to share their contact details. In the RDS system of data collection, everyone must be made comfortable in giving their contact details. In the RDS system, the infected individual is asked about the contact details of their peers. In the fight against the COVID-19, there would not have been much difference in the contact tracing if all of the States for whose administration the infected people contacted the health department. Clearly, there were no takers for the Inter-State Migrant Workers Act, 2020. These deficiencies in the socio-economic classes. These deficiencies made huge contributions did not address the problem before it erupted over being identified. It would rather be a better and an important mechanism for the contact tracing. The infected individual is asked about the contact details of their peers. In the fight against the COVID-19, there would not have been much difference in the contact tracing if all of the States for whose administration the infected people contacted the health department. Clearly, there were no takers for the Inter-State Migrant Workers Act, 2020. These deficiencies made huge contributions did not address the problem before it erupted over being identified. It would rather be a better and an important mechanism for the contact tracing.
India's trade deficit with China reduces to $48.66 bn in FY20

India's trade deficit with China fell to USD 48.66 billion in the 2019-20 fiscal year from USD 65.76 billion in 2018-19, according to a report by the commerce ministry.

The trade deficit between India and China in the past five years has been significantly reduced. In 2016-17, the trade deficit with China stood at USD 106.6 billion. The trade deficit with China for the current financial year ended March 31, 2020 is around USD 50 billion.

The reduction in the trade deficit with China is due to several factors, including a decline in imports from China, a rise in exports to China, and a reduction in the value of the rupee.

The trade deficit with China stood at USD 65.76 billion in 2018-19 and USD 106.6 billion in 2016-17, according to the commerce ministry.

The ministry said that the trade deficit was mainly due to factors such as the sharp decline in crude oil prices, the coronavirus pandemic, and the impact of the Sino-India border tension.

India's imports from China fell to USD 72.36 billion in 2019-20 from USD 82.5 billion in 2018-19, while exports to China increased to USD 23.64 billion from USD 21.86 billion.

India has been reducing its dependence on China for critical goods such as smartphones, components for the auto sector, and other high-end products.

India's imports from China were dominated by the electronics sector, followed by pharmaceuticals, plastic goods, and metal products.

India's exports to China were mainly in the form of garments, textiles, and agro-products.

India's trade surplus with China rose to USD 21.7 billion in 2019-20 from USD 14.8 billion in 2018-19.

India's exports to China are expected to grow further in the current fiscal year, driven by rising demand for goods from the country and increasing investments in the Indian market.

India's trade with China has been a major concern for the country, as Beijing has been accused of dumping goods in the Indian market and of not providing fair and equitable market access.

To reduce the trade deficit, India has been implementing measures such as the Make in India initiative, the Atmanirbhar Bharat campaign, and the 'Vocal for Local' campaign.

India has also taken steps to diversify its supply base, including from China, to reduce its dependence on any single country.

India is also working on building strategic reserves of critical goods, including medical equipment, to ensure self-sufficiency in the event of supply disruptions.

India is also considering imposing import duties on certain goods from China, as a way to protect domestic industries and jobs.

India is also looking to increase its exports to China, particularly in sectors such as agriculture, textiles, and IT products.

India is also looking to invest in infrastructure projects in the border areas to improve connectivity and reduce the trade deficit.

India is also looking to work with other countries, such as Singapore and Malaysia, to improve trade flows and reduce the trade deficit.

In an unvarnished conversation with SHIKHA DUGGAL, actress Salony Luthra talks about her upcoming web film Bhanumati and Ramakrishna with Naveen Chandra.

Bhanumati and Ramakrishna

My web film is a very realistic approach to the life of unmarried women. It’s not about my personal belief, but with our shallow thinking society it’s not their issue and not married yet, obviously why? so we are trying to touch a topic that has not been touched due to our undeveloped perception. Our society is like a burned-out story with a strong setting and some of the usual deviations which has left us with a void about the uniqueness of women. The Old Belief wants me to look relatable to my fandom so why not bring in a social message!

Chemistry with my co-actor

Yes, wonderful; my chemistry with Naveen as a nurse and her professional relationship on the screen. We can never fake chemistry on screen, your audience will be able to catch you and your chemistry won’t fall from it. It is a very good relationship, you will see it throughout the film. We have a strong bond with the character and with Naveen, we use different honest chemistry sequences with him. He’s a very dear friend to me, I come from a very simple background and Naveen was the only character I had known so far. We were just in-rehearsals and while teaching me the govt. tasks to render us an outstanding performance in front of the camera. Never let an actor cut your light, that’s what I had to say to him, when he had other parts in the film. I did the character as per the demands of the script and filled it with a lot of emotions which I put in this film. I will be doing my next cinematic project with somebody who I feel is my home ground.

Your reason to do this film

Yes, a hard-hitting reason to do this film purely for its content. When I heard the story, I felt empathy and wanted to bring on the screen. It doesn’t matter if you have some quicksilver or not. When we bring on something we want to portray, we want to normalize it. It’s not the time to hide anything. I wanted to make a film with female emotions hence it is a film with true emotions. I was asked to put on some weight! My producer put me on an amazing diet, it came out quite, well on the screen too, so I was content with it.

In contrast to the old belief that age affects only females, our experience the joys of fatherhood. The couples in India are diagnosed with infertility every year. According to the Indian Institute of Medical Sciences, over 15-20 million couples in India are diagnosed with infertility every year. It has been estimated that about 30% of all infertility cases in India are male infertility. Male infertility refers to a condition where a man is unable to cause pregnancy in a fertile woman. "Women in India often hear the story ‘you are the one who has to be the savior of the family’. The couples who have been suffering from infertility problems for a long time, couples want to be the first to take the responsibility. We are trying to provide them with a strong story line and a chance to express themselves.”

Male infertility as common as female infertility, but curable

In contrast to the old belief that age affects only females, research has shown that male infertility is on the rise in men. Older men also have a high risk of experiencing abnormal sperm, and they, too, account for infertility cases in India. While the couples experiencing infertility often blame the woman to be the main factor. Fertility issues are rampant in cities where pollution is high and weather is extreme. Infertility in men and women can experience infertility and have equal chances of facing conception issues due to infertility. In all the couples experiencing infertility, the man’s fertility issues are more common than the woman’s. Smoking, low fitness can all lead to a decrease in the fertility of the man. Smoking causes testicular atrophy and lowers the sperm count, making it difficult for the man to conceive. Inactive men and women can experience infertility and have equal chances of facing conception issues due to infertility. Trishala Dutt speaks about her mental health post boyfriend's death

Bollywood star Sanjay Dutt's daughter Trishala Dutt has penned an emotional note to mark one year of her boyfriend's death on Thursday. The note opened up about going through therapy and connecting with herself.

Trishala took to Instagram where she shared a picture of her job post his demise.

"Today marks 1 year since the loss of my boyfriend. He lived a life full of joy, love, laughter, fun, pranks, and care. I miss him. I’m beyond grateful for the time we had together. He lived a life full of joy, love, laughter, fun, pranks, and care. I miss him."

"I’ve done a lot of grief work — from talk therapy, to joining support groups, going for therapy and quitting one’s mental health if my own feelings made me feel like a burden to others, to joking around. He was kind, gentle, thoughtful, and always made me feel like the luckiest girl in the entire world to have been his...as he lived his life."

She shared that she still has one year of her journey, and will always be and feel like the luckiest girl in the entire world to have been his...as he lived his life. She expressed her gratitude for the time they had together and said, "I am excited to wear each and every piece at a time."

"Our apparel line with Styched is an expression of ourselves and we want fans to be as comfortable as possible in the process, and it’s nothing I can’t fix once I’m in the right mind-set."

She is half a heart without him, and will never ever forget him. "I was his entire heart every second of our relationship" she said. "He lived a life full of joy, love, laughter, fun, pranks, and care."

"I’m half a heart without him, and I will never ever forget him. I was his entire heart every second of our relationship. I was his entire heart every moment go by. You have to have the darkest moments and take out the rollercoaster of emotions for the rest of your life. I know grief won’t ever subside, however, it’s gone is gone."

"I’m grateful for the memories of that moment."

"Trishala shared that the past year she stood at a point where she can’t use of tears. I usually cry if it doesn’t come out of my eyes. I try to keep it inside. She felt that she had several public breakdowns where strangers have come up to her and asked if she needed any assistance.

"Trishala added that she ate nothing in the night and gained 3 kg [5 lbs]."

"She also shared, ‘We process, and it’s a feeling I can’t define once I’m in the right mind-set (and I’m happy to share my mental health and personnes has got so much more. I’m not ashamed to admit it because it’s an amazing therapist, support groups, and I’m thankful for them. She shared that she still has many things that remind her of him."

"Trishala added, ‘I have never felt so bad, never suffered as much as I did when I was with him, but I will never forget him. My only wish is that I have left of him, and I will never ever forget him. I have loved every moment of my life, and will always be and feel like the luckiest girl in the entire world to have been his...as he was mine."

"If there is one realization that I have come to this year, it’s that life is precious."

"If there is one realization that I have come to this year, it’s that life is precious. It’s not just the passage of time, it’s being present in the moment and cherishing it."
Srinivas bags Nizam rights of biggies

With theatres reopening staring at an indefinite delay, Adepu Srinivas aka Warangal Srinivas surprised one and all on Thursday when he informed the media that he has bought the Nizam rights of one and all on Thursday when he informed the media that he has bought the Nizam rights of six successful films from the Nizam region. With business activity at an all-time low owing to the pandemic, Srinivas acquisitions have come as a bit of positive news from the industry which is otherwise reeling under losses since March. All the four films that Srinivas has acquired are in the final stages of production. If not for Coronavirus outbreak, except Virata Parvam, the remaining films would’ve hit the cinema by now. The Karthikeya Exhibitors chief is also believed to be in talks to get the Nizam rights of biggies for the Nizam region. Srinivas is also turning producer with G Nageswara Reddy’s Shankar directed work, starting to shoot the remaining half abroad. He is lining up a couple of other production ventures as well.

AN ADDITION TO THE TITLE

I'm human, I get zits: ILEANA

When I was young, I was a social media junkie who consumed content voraciously. I’m human and does get zits. I’m actually looking for the opportunity to address acne conditions and talk about tips and tricks on how to deal with it. Another user asked her about physical reactions when she’s was named for the Oscars. She replied “I thought it was a prank! Through the buzz I was getting, I was thinking people were joking around me and I couldn’t believe it. Of course, I got happy.”

New Zealand being mootted for Rang De

With Avatar sequels, James Cameron’s sci-fi spectacle, getting the permission of Kiwi government supervised self-isolation, before beginning to shoot. The idea of shooting a film in New Zealand, a novel concept, was developed during the global pandemic. With the coronavirus and the countries forcing travel restrictions, it was decided to shoot a film in New Zealand. The idea was to start shooting in March, but with the COVID-19 pandemic, shooting was delayed. Now, the film is looking at New Zealand as a possible location for shooting. If Sridhar gets the nod, the cast and crew of the film needs to adhere to the 14-day government supervised self-isolation, before beginning to shoot.

Warangal Srinivas bags Nizam rights of biggies

With the ongoing Coronavirus outbreak, the Telugu film industry is facing its worst crisis in recent times. However, the upcoming films are moving forward with some changes. The Nizam rights of some successful films have been acquired by Warangal Srinivas.

PAWAN TAKES TO CHATURMASHA VRATA DEEKSHA

On the sets of his upcoming period drama ‘Chaturmasya’ which is currently in production, actor Pawan Kalyan was supposed to begin shooting from Ashada Shukla Dusshiti. However, due to the pandemic, the shoot has been postponed.

Bridesmaid sacking for having ‘huge’ boobs

A bridesmaid has been fired after her 3D breast implants caused her to be dubbed ‘Boob Tube’.

The 22-year-old was hired to be a bridesmaid for her best friend’s wedding and was due to walk down the aisle with her.

But the bridal party was left horrified when they saw pictures of the bride’s new implants which featured an ‘unlamentably large’ protrusion.

The woman said the pic was not of her, adding: ‘I saw your photo on WhatsApp and it was ridiculous.’

Sopore girl first to get J&K domicile certificate

A young girl from Jammu and Kashmir was on Thursday the first person to get domicile certificate in the union territory.

Mohammad Sajid, 21, applied for a domicile certificate in Sopore district in J&K and became the first person to get domicile certificate in the union territory.

A woman from Srinagar, Meenakshi, was also given a domicile certificate.

Lamborghini unveils €2.7 million luxury yacht

Italian supercar manufacturer Lamborghini has unveiled a luxury yacht that costs €2.7 million — the equivalent of 10 Lamborghini Huracans.

The yacht, named Lamborghini 63, is the latest in a string of luxury yachts to bear the Lamborghini name.

The 63m boat was designed in collaboration with Italian design house Pininfarina and features a carbon fibre hull with a length of 63m and a beam of 11m.

Novak & Wife teste corona -vera

He has been in the headlines after he was seen wearing a mask at the tennis tournament in Dubai last week.

BIDWELL ON BRITISH ART

Applying the laws of Britain and the British Empire to a collection of British and American paintings, sculptures, photographs, prints, and drawings from the 19th and 20th centuries, the National Gallery of Art, Washington, DC, presents British Art: Private Collections in America, 1850–1950. The exhibit includes over 150 works, focusing on the period from 1850 to 1950, when art collecting in England was still a relatively new and less established practice than it is today. The show offers a unique opportunity to explore the history of British art collecting in America during this period, when artists were gaining recognition and a market for their work was emerging. The exhibit is open to the public from April 10 to August 11, 2019.
