Chinese troops withdraw 1.5 km from LAC; no patrolling in border areas for some time

**Visibility**:

The two countries have agreed to withdraw their troops 1.5 km from the Line of Actual Control (LAC) on both sides of the valley along the two Doklam ridges. The Chinese Foreign Ministry (MFA) said in a joint statement that both sides have agreed to withdraw their troops from the three locations in a few days.

The senior officials of the two countries noted that the military disengagement process has started and would try and mitigate the tensions in the border areas for full restoration of peace and tranquillity in the border areas.

On the other hand, the Chinese MFA spokesperson, Zhao Lijian said:

"They reaffirmed that both countries have continued to maintain close coordination and consultation in the wake of the recent military disengagement.

"They have reaffirmed the importance of abiding by agreements and understandings between the two sides, and that both sides should carry out the next round of military disengagement.

"They reaffirmed that both sides should act responsibly to prevent any actions that could distort peace and tranquillity in border areas, and that both sides should prevent any action that could cause the situation to deteriorate.

"They have agreed to hold meetings at all levels to continue to maintain close coordination and consultation on the border issues between the two sides."

Thieves strike at Panch Prarmaharshi temple in Bhopal on intervening night of Monday and Tuesday: A thief, who is a member of the gang of Bhairon, the accused of stealing the idol of Goddess Durga and Lord Shiva from Bhopal’s Panch Prarmaharshi temple, was caught in the act on Monday night.

The accused, identified as Bhairon, was caught in the act of stealing the idol while the temple was closed. The incident took place at about 11 p.m. on Monday when the temple was closed for the night.

The accused was apprehended by the police after he was seen trying to remove the idol from the temple premises. He was subsequently taken into custody.

The police are investigating the matter and have launched a probe to trace the other members of the gang.

LU’s Biochemistry department to include Covid-19 as subject

The Biochemistry department of Lucknow University (LU) has decided to include Covid-19 as a subject in its curriculum. This decision was made to provide students with a better understanding of the disease and its impact on human health.

“Covid-19 has been a significant global health crisis, and it is important for students to have a comprehensive understanding of the virus and its transmission,” said Dr. Rakesh Singh, Head of the Biochemistry department.

The department has proposed to include a module on Covid-19 in the curriculum, covering topics such as virus biology, transmission, treatment, and prevention. The module will be taught by experienced faculty members with expertise in virology and infectious diseases.

To ensure the success of the new module, the department has also proposed to conduct regular training workshops and seminars to keep the faculty updated with the latest developments in the field.

Clinical team monitored 1,764 patients suffering from mental illnesses, 6,51,927 people visited

A clinical team of doctors from Lucknow’s IMS Medical College monitored 1,764 patients suffering from mental illnesses. They also visited 6,51,927 people’s homes as part of door-to-door surveillance. This initiative was implemented to ensure the delivery of mental health services.

“The initiative has been successful in providing access to mental health care to a large number of people,” said Dr. Rakesh Gupta, in charge of the Clinical team.

The team members were equipped with mobile phones to conduct follow-ups with patients and take necessary actions as per the requirements.

In another development, the Lucknow Municipal Corporation (LMC) has proposed to provide incentives to one of the leading private hospitals in the city. The incentives would be provided to encourage gun-shot wound (GSW) patients to seek treatment in the hospital.

The proposal was made based on the fact that the hospital has a good track record in treating GSW patients. The incentives would include financial assistance for hospitalization and medical treatment.

The proposal is expected to be discussed in the next meeting of the LMC’s Standing Committee. The decision will be taken after considering the inputs from the hospital management and the city’s health officials.

LU to launch new degree courses for women

Lucknow University’s (LU) Women’s Studies programme has decided to launch new degree courses. The courses will be offered at both undergraduate and postgraduate levels.

The university has proposed to offer four new courses: Women’s and Gender Studies, Gender and Sexuality, Women’s Rights and Gender Justice, and Women’s Health and Reproductive Rights.

The courses are expected to attract a large number of female students and will be offered in the upcoming academic year.

Coronavirus does not cross placenta: Doctor

KANPUR (PNS): Kanpur Nagpur reported 45 more coronavirus positive cases on Tuesday, taking the tally of infected people in the city to 1,140. Chief Medical Officer Dr Shaikh said 35 new cases were detected between Monday evening and Tuesday evening.

He said that 29 cases were admitted in the city and were put under quarantine. According to the official report, another 6 cases were admitted on Tuesday. A testing unit was also provided for suspected cases. The doctor added that 60 cases were released on Tuesday.

He said that the new positive cases were identified through contact tracing, contact screening, and random testing. Contact tracing was conducted in 12 cases, contact screening in 16, and random testing in 17.

The doctor further stated that the city has detected a total of 1,140 cases of COVID-19 since the first positive case was reported on March 1, 2020. Among these, 1,098 cases have recovered, while 42 cases are still under treatment.

Kanpur has been identified as a hotspot of the COVID-19 pandemic due to its high population density and dense urbanization.

DM seeks zone-wise list of 10 top GST defaulter

KANPUR: District Magistrate BK Singh said on Tuesday that the DM has issued a zone-wise list of 10 top GST defaulters.

The DM said that the list was prepared to help the GST authorities in identifying the defaulters and taking necessary action.

The list includes companies from various sectors such as construction, retail, and manufacturing.

Construction works resume

Gorakhpur: District Magistrate Sushil Kumar Pal said on Tuesday that construction works have resumed in Gorakhpur.

He said that the work was suspended due to the lockdown imposed to curb the spread of COVID-19.

Covdi: No need for prior approval for therapy: Dr Kamal

KANPUR: Dr Abhimanyu Singh, a consultant in pulmonology and infectious diseases, said on Tuesday that there is no need for prior approval for therapy.

He said that the patients can be treated as per the doctor's discretion and that the government should not interfere in this matter.

Kidnapped nurse

KANPUR (PNS): Nursery nurse Nidhi Singh was kidnapped by four men on Monday night.

The kidnappers demanded a ransom of Rs 5 lakh and threatened to kill the nurse if the demand was not met.

The police have launched an investigation into the case and have appealed to the public for information.

Provide job opportunities to labourers

District Magistrate Sushil Kumar Pal said on Tuesday that the government is offering job opportunities to labourers.

He said that the labourers can apply for these jobs through the Uttar Pradesh Industrial and Development Authority (UPIDA) website.

Girl stolen in Aligarh

A 12-year-old girl was kidnapped and her mobile phone was snatched on Monday.

The police have registered a case and are investigating the matter.

Criminal case registered

A criminal case has been registered against a man who was caught with a stolen mobile phone in Lucknow on Monday.

The police have arrested the accused and are processing the case.

State of Uttar Pradesh

Coronavirus has affected many areas of the state, including Gorakhpur and Kanpur. The government has implemented strict measures to curb the spread of the virus.

The state has recorded over 1,000 positive cases of COVID-19 so far, with 35 deaths reported.

The government has also announced a lockdown in certain areas to prevent the spread of the virus.

The state has declared a state of emergency due to the pandemic and has taken several measures to combat it.

The state government has announced financial assistance to the families of the deceased and has also provided food kits to the poor.

The government has also announced a special package for the healthcare sector to ensure the availability of medical supplies and equipment.

The state has also launched a helpline to provide information and assistance to the people.
Remdesivir at ₹80K! Govt urged to act against hoarding

India has one of lowest Covid-19 deaths: Study

Researchers say India has one of the lowest Covid-19 death rates across the world. A paper published in the BMJ found the country's fatality rate was significantly lower than that of every other country. The study, which aimed to assess and compare the global death rate from Covid-19 infections, found the number of deaths per one million people in India was 23.4. In comparison, the number of deaths in the US was 1,478.4, China 2,343.1, France 6,898.1, UK 4,713.5, Brazil 4,204.4, India 3,996.1 and Russia 3,280.9.

No ‘herd immunity’ sans high fatality rate news jolt for India

BJP’s RS member Shiv Pratap Shukla seeks apology from Cong for playing Modi

The Bihar unit of the Bharatiya Janata Party (BJP) has issued a tough warning to Prime Minister Narendra Modi amidst the rising Covid-19 cases in the state. Speaking to ANI, a senior BJP leader said that if the government does not take immediate steps to control the virus, the state will not provide any reservation for the Prime Minister in the Assembly polls.

Indian government is considering giving booster doses of Remdesivir to Covid patients in the next 14 days, a senior official said on Tuesday.

SARS-CoV-2 antibodies were not found in 60 per cent of the patients suffering from the disease, diabetes and obesity while the study holds importance for future control plans.

The study, published in the journal Science, said that older age and conditions such as diabetes, hypertension, heart disease and obesity were more at risk for severe cases of Covid-19.

In these genealogical trees, the researchers found that women of colour are more likely to be infected by the virus than their male counterparts, and that children are less likely to have severe Covid-19 disease than adults.

The Indian government has begun discussions with pharmaceutical companies to bring the drug Remdesivir to the country.

The drug has been found to be effective in treating the disease in pre-clinical trials and has shown promise in early-stage clinical trials.

The Central government has announced that the drug will be made available in India from December 12.

The Centre has said that the drug will be available at an MRP of ₹20,000 per patient.

Adequate stocks of the drug have been ensured with the past five months, the Centre said.

India is one of the largest producers of the drug in the world.

The drug was approved by the Food and Drug Administration (FDA) of the US in May 2020.

In previous studies, the drug has shown promise in treating the disease, including a trial in China which showed a reduction in the time to recovery in patients treated with Remdesivir.

The drug is being used in clinical trials in several countries, including the US, Europe and Asia,

We should be cautious in interpreting these results, as they may not be generalizable to the broader population.

The study has not addressed the question of whether Remdesivir is effective in treating Covid-19, the same is not true for other antiviral drugs.

The drug is currently undergoing Phase 3 clinical trials in several countries, including the US, Europe and Asia.

The drug has been shown to have few side effects and is generally well-tolerated by patients.

The Chief Minister also said that the government is committed to providing quality healthcare to all citizens of the state. He added that the government is working towards ensuring that all healthcare facilities are fully equipped and staffed with adequately trained professionals.

3 MORE ARRESTED FOR ATTEMPTED MURDER

The police have arrested three more individuals in connection with the attempted murder of a person in Mumbai. The arrested individuals were held in connection with the incident that occurred on Tuesday.

NEW DELHI: The two central government agencies, the National Food Security Mission and the Ministry of Rural Development, have decided to issue a notification to make the minimum support price (MSP) for wheat and rice higher than the current levels.

In a move to boost the economy and revive demand, the government has decided to increase the MSP for wheat to Rs 2,300 per quintal and for rice to Rs 1,700 per quintal. The decision was announced by the Agriculture Minister during a virtual meeting with state officials.

The move is expected to provide a boost to farmers and help in the country's economic recovery.

JAIPUR: The Jaipur Police have arrested a man in connection with the murder of a woman in the city. The accused, identified as Rajesh Kumar, was arrested from his residence in the city.

The woman, identified as Sunita Joshi, was killed in an apparent murder inside her residence on Monday. The police have registered a case under Section 302 of the Indian Penal Code.

The police have launched a probe into the case and are investigating the circumstances surrounding the woman's death.

AHMEDABAD: The Ahmedabad Police have arrested two individuals in connection with the death of a woman in the city. The accused, identified as Ramesh Chandra and Rakesh Chauhan, were arrested from their residence in the city.

The woman, identified as Swati Patel, was found dead in her residence on Monday. The police have registered a case under Section 302 of the Indian Penal Code.

The police have launched a probe into the case and are investigating the circumstances surrounding the woman's death.

COCHIN: The Cochin Police have arrested a man in connection with the theft of a gold necklace from a shop in the city. The accused, identified as K. R. Madhavan, was arrested from his residence in the city.

The man was arrested after a video recorded by the shop owner showed him taking the necklace. The police have registered a case under Section 379 of the Indian Penal Code.

The police have launched a probe into the case and are investigating the circumstances surrounding the theft.

THREE MURDER CASES SOLVED IN AHMEDABAD

The Ahmedabad Police have solved three murder cases in the city in the past two weeks. The cases were cracked by the police after a series of investigations.

In one of the cases, a man was found dead in a house located in the city. The police tracked down the accused and arrested him after a two-day search.

In the second case, a woman was found dead in a house located in the city. The police tracked down the accused and arrested him after a two-day search.

In the third case, a man was found dead in a house located in the city. The police tracked down the accused and arrested him after a two-day search.

The police have launched a probe into each of the cases and are investigating the circumstances surrounding the deaths.

ATMEL: The ATMel Corporation has announced a new line of microcontrollers designed for industrial applications. The new line of microcontrollers is expected to provide better performance and lower power consumption for industrial applications.

The microcontrollers are designed to be used in a wide range of applications, including industrial automation, factory automation, and robotics.

The new line of microcontrollers is expected to be available for sale in the next quarter.
US says foreign students must leave if classes go fully online

Washington: A US government move affecting hundreds of thousands of foreign students has hit a temporarily stumbling block in the form of a federal court decision, but it is likely to go back to court and probably won’t be halted for long.

Many students had been waiting to hear if they could stay and complete their studies online this fall, with the US Department of State warning non-elite students to study abroad if they could.

In Washington: “We simply have not yet:... students to study abroad if they could.”

But in a narrow and technical ruling last week, US district judge Aas Kahn of San Francisco decided that the US Department of Homeland Security’s (DHS) refusal to allow students to attend classes online and return to the US was illegal.

The court said the government had failed to show that remote learning was any less dangerous than physically attending in-person classes.

It said the students had not had a chance to be heard on that point.

DHS Deputy Homeland Security Secretary Chad Wolf had argued that students who were allowed to stay in the US to do their online classes would be exposed to the virus, and the risk was particularly high for those who were “highly vulnerable”.

The judge agreed that students who returned to the US would be exposed to the virus, but that did not mean returning to the US was illegal.

It also said that the government had not properly explained that the students were vulnerable or endangered.

It ruled that the government must allow students staying in the US to attend classes online.

But the judge did not say the government had to allow students who are out of the country to return to the US.

The ruling means that, for now, students are free to stay in the US and continue to take classes online, but it was not clear when the government would appeal the judge’s decision.

“It’s a very complex and highly technical area of law,” said Student Legal Services director favourite

The court, which is located in San Francisco, was not the last word. The US Supreme Court, with its conservative majority, has the final say.

But even an appeal would be unlikely to alter the outcome of the case. The judge’s decision is likely to stand.

DHS had not yet decided whether to appeal the decision, and the US Justice Department was considering whether to intervene in the case, said an official with knowledge of the matter.

If the judge’s decision is upheld, it would mean that, in addition to staying abroad, international students could return to the US to complete their classes online.

But it was not clear how many students would do so.

About 90% of all international students are on F-1 visas, which require them to physically attend college classes.

But the United States has banned most temporary foreign workers and visitors from entering the country, including international students, due to the pandemic.

That has made it impossible for many students to return to the US to complete their classes.

The government has said it is considering allowing some students to return to the US, but it has not made a final decision.

The judge’s decision also means that, for now, students can take classes online while staying abroad.

But it is not clear how long that will last.

The judge said the government could appeal the decision and have it reviewed by a higher court.

The government has already appealed other cases that it has lost in court, but it is not clear if it will appeal this case.

The judge’s decision is likely to have a significant impact on international students.

It means that many students who had been planning to return to the US to complete their classes will now be able to stay abroad.

That could help some students, but it could also make it harder for others.

The government has said it is considering allowing some students to return to the US, but it has not made a final decision.

The judge’s decision also means that, for now, students can take classes online while staying abroad.

But it is not clear how long that will last.

The judge said the government could appeal the decision and have it reviewed by a higher court.

The government has already appealed other cases that it has lost in court, but it is not clear if it will appeal this case.

The judge’s decision is likely to have a significant impact on international students.

It means that many students who had been planning to return to the US to complete their classes will now be able to stay abroad.

That could help some students, but it could also make it harder for others.

The government has said it is considering allowing some students to return to the US, but it has not made a final decision.

Institutional education, which is confined within the four walls of classrooms, has transformed into virtual classrooms aided by digital environments and this shift brings positive changes in the system, says APARUP PAKHIRA

The Ministry of Information Technology recently disclosed that the IT sector’s workforce has grown by 6.7% during the first quarter of 2020. The number of software professionals in India is now around 6.81 million. In terms of consumption of data, online consumption has increased by 250% during the same period. It’s very indicative and has a lot of impact in every sector. The impact has also affected students. Students are getting badly affected due to the lockdown, and local lockdowns, the programme of educational institutions is being developed, and is being implemented in the virtual form, to help parents at home. For example, the Ministry of Consumer Affairs, Food and Public Distribution and Ministry of Education has launched the scheme of Muddha Ka Mula. Under this scheme, students have to submit the assignment through their mobile devices. It has affected every industry and the growth of the industry which is mainly due to lack of skilled manpower. It has affected every industry and has also affected the students who are seeking a stable career.

The Ministry of Consumer Affairs, Food and Public Distribution and Ministry of Education has launched the scheme of Muddha Ka Mula. Under this scheme, students have to submit the assignment through their mobile devices. It has affected every industry and the growth of the industry which is mainly due to lack of skilled manpower. It has affected every industry and has also affected the students who are seeking a stable career. The last date for submission of applications is July 31, 2020. The programme is modular in nature, it has 180 credits, the programme has three levels and has 30 credits per semester. The programme is designed for students to get a practical understanding of skill-based education system. Under this programme, the students have to complete 120 credits and the remaining 60 credits are in the form of skill-based learning modules. From the 2020-21 academic year, the programme will be operational across the country.

The Indian government has announced a new programme called the Industry Capacity and Skill Initiative (ICSI). The ICSI programme is a part of the government’s efforts to skill and upskill the workforce to meet the demands of the industry. The ICSI programme is expected to create 3.8 million jobs in the next five years. The programme will be implemented in two phases:

1. Phase 1: Industry Capacity Development

   - The first phase of the programme will focus on capacity building in the industry. This will involve the creation of new skill development centres and the development of new skill development programmes. This phase will be completed by March 2021.

2. Phase 2: Skill Development

   - The second phase of the programme will focus on skill development. This will involve the implementation of skill development programmes in the industry. This phase will be completed by March 2024.

The ICSI programme is expected to provide a significant boost to the skill development sector in India. It is expected to create 3.8 million jobs in the next five years. The programme will be implemented in two phases:

1. Phase 1: Industry Capacity Development

   - The first phase of the programme will focus on capacity building in the industry. This will involve the creation of new skill development centres and the development of new skill development programmes. This phase will be completed by March 2021.

We've got to get on to Ben early: Simmons

There are only two weeks to go before the Test series begins and the West Indies have yet to name their squad... but England will be keeping a close eye on the development, says Andrew Strauss

M championship has always been about patience and taking your chance, and it's of the utmost importance that we don't overdo things with Ben, he told BBC Sport. "There are only two weeks to go and he will need to be on his game in a matter of weeks. It's not just about putting him in the team; it's about getting him in the team."

"I've spoken to Ben a lot in the last few weeks and it's been great to hear him say how excited he is to get back into the team. He's been working hard and he's ready to go."

Simmons added: "He's a really good cricketer and I think he'll be a great addition to the team. He's a really good fielder and he's got a great temperament."

"He's got a great understanding of the game and he's been around the block a bit. He's a really good team player and he'll fit in really well."

Benjamin Smith went out to be one of the best in the business in the game but on his 13th birthday, he acknowledged: "It was beautiful, " he said. At 13 years old, the West Indies star is already a threat to the best in the game on both bat and ball. He is set to captain the Windies in 131 Tests, said Simmons. "We need to make sure that he is not too far away from his game and that he keeps improving."

When Tottenham can't celebrate winning the FA Cup with fans, they can celebrate winning with a statue. The striker has scored 20 goals in all competitions this season and his team-mates are urging him to go out and get a goal against West Ham to equalize. The striker scored twice in the game, but the team lost 3-0. It was a heart-breaking day for Spurs fans."

"He is a fantastic player and he has done so much for the club and I am sure he will be remembered by many for years to come," said the former West Indies captain. "You have to be careful with him and give him the break he needs."
