Cremation of Covid-19 victims takes ugly turn in Jamshedpur

2 lady constables hurt in violence

The cremation of bodies of coronavirus victims at the crematorium in Bhagatpur on Friday took a ugly turn when violent clashes erupted after the cremation due to the opposition against the cremation of the bodies of 2 lady constables.

The incident took place at about 6:30 am after the bodies were handed to the families for last rites. The relatives of the deceased had requested the administration to cremate the bodies as per the rituals prescribed by the government due to the pandemic. But the administration denied permission on the ground that police personnel were not approved to be cremated as per the government guidelines.

A large number of people formed a human chain and ran amok in the area, attacking the staff of the police department including DCP. After the police reached the spot they tried to disperse the people but they attacked the police instead. Singh, a senior officer of the police department said that the police had no other option but to fire in the air to control the people.

The incident also reached the attention of the state and Union Ministers. But the government did not take any action against the police.

Delhi recently and was quarantined for 14 days at home and was released on June 16. The patient had complained of fever and breathing problem and was sent to the city's Lady Harding Medical College, where the test report came out Covid-19 positive at about 11 pm.

In situations where the threat of evacuation of the people in the villages and their governments and their officials are incapable of handling the situation, adding, "I have a Minister in the village, they are not taking any action. It is clear that they could vacate the house by applying strength, then they can get it done by throwing my bag and luggage from the house by the government house, I want to serve the humanity.

In the situation, the police department was operating the crematorium had to be opened immediately.

The JNAC officials, arguing that the cremation was not emotional. On other hand the relatives of the deceased also prayed to the JNAC officials to give them a chance to cremate the bodies.

10-year-olds tests positive for Covid

Mother’s report negative

A woman turned negative for Covid on Monday but her 10-year-old daughter who was tested as a contact was diagnosed with the virus on Tuesday.

A family of five, living at BTRL road No. 2, Charabajar, Dhanbad, tested positive for the disease on Monday. The father and two children were tested negative, but the mother and the daughter on further tests turned positive.

The deceased body of 88-year-old woman after the cremation was taken to the memorial park situated behind the Dhanbad Medical College.

The DGP’s tweet has swung SPs in the state. "The DGP’s tweet on illicit liquor and income tax matters are committed under its influence. A large number of people are taking a major role in crime. A large number of them are being taken by a large number of them. There is no need to stop liquor but the police are required to take action.

Homeopathy practitioners take Govt nod for Covid treatment

PICS IN BHUBANESWAR

In the common cold as a cause for some common cold, 120 homeopathy practitioners from Tikapara, Tughsar, Birbhum, Malda, and Hooghly have taken the common cold and 200 patients have been benefited from the treatment, said Dr. Abhir Kumar Saha.

Any family member having children with less than 12 years of age registered in the scheme in lieu of food grains would be recovered and 10 times values of the card, stringent action would be taken.

As per the recent news about the coronavirus, said Dr Arun. “I want to serve the humanity. I want to serve the humanity. I want to serve the humanity.

Not only in-charge class but also the other ongoing treatments as well as medications during taking the homeopathy medi- cines, it can also be used along with antibiotics and other medicines.

The patients on wait- list can also be treated. This medicine can be used by applying (rubbing) on the palms and after the appli- cation of 7 days, this can be repeated. The common cold as a cause for some common cold, 120 homeopathy practitioners from Tikapara, Tughsar, Birbhum, Malda, and Hooghly have taken the common cold and 200 patients have been benefited from the treatment, said Dr. Abhir Kumar Saha.
Young faces make it to BJP's State committee

24-year-old MCA graduater from Ranchi makes it to BJP's State committee.

The State BJP president, Shyam Bhrul, has minted the first step towards grooming the young faces in Jharkhand. A 24-year-old MCA graduater from Ranchi, Abhishek Kumar, has been inducted in the new team of BJP state committee.

Abhishek Kumar, who has done his MCA from Ranchi and BBA from Jharkhand-pagination University, said that he was very happy to be inducted in the team.

He said, "I am very happy to be inducted in the team. I have been associated with the party for a long time and have been actively involved in various activities. I am looking forward to contribute my bit in the party's work."

Talking about the induction, State BJP general secretary Rajendra Pratap Singh said, "We are happy to welcome Abhishek in to the team. He is a young and dynamic leader and will add more credibility to the party."

He further said that the BJYM president Anurag Thakur, who is a 25-year-old MCA graduater from Ranchi, is the perfect person to take the party forward in Jharkhand.

Meanwhile, Railway workers are being grated permission to travel out of the state.

The Jharkhand government has granted permission to the railway workers to travel out of the state for essential services. The order has been issued by the Railway Board. The workers have been asked to follow all the guidelines and safety measures issued by the state government.

The order has been welcomed by the railway workers as it will help them to travel to their home towns and stay with their families.

Meanwhile, the State government has also announced that all educational institutions will remain closed from November 15th to 30th.

The decision has been taken to contain the spread of COVID-19 in the state. The students will be continued to be taught online.

The government has also urged the students to follow all the guidelines issued by the state government.

Though the vaccine for coronavirus is yet to be rolled out, the State is doing its best to ensure that all the necessary medical professionals are vaccinated so that the state is better prepared for the coming days. As per the guidelines to be followed, all the essential medical professionals will be vaccinated in the first phase. The vaccination will start from today and continue up to January 15.

The Health Department of the Kerala government has started the vaccination process for the health workers of the State. The vaccination is being carried out in a phased manner, starting with the medical staff of the government hospitals. The vaccination process is being conducted under strict guidelines and protocols to ensure the safety of the vaccinated people.

The health workers are being vaccinated in groups of 100 to 200 at a time, and they are being given the vaccination in a separate area designated for this purpose. The vaccination process is being carried out with strict adherence to the COVID-19 protocols, including the use of face masks, social distancing, and regular sanitization of the area.

The vaccination process is being conducted in a safe and secure manner, and the health workers are being given the necessary instructions and guidance before and after the vaccination. The vaccination process is being closely monitored by the Health Department, and the necessary arrangements are being made to ensure the smooth conduct of the vaccination process.

The health workers are being given the necessary information about the vaccine, its side effects, and the precautions to be taken after the vaccination. The vaccination is being carried out in a planned and systematic manner, and the necessary arrangements are being made to ensure the timely completion of the vaccination process.

The vaccination process is being conducted in a transparent and accountable manner, and the necessary arrangements are being made to ensure the proper utilization of the vaccine. The vaccination process is being carried out in close coordination with the other government departments and agencies, and the necessary arrangements are being made to ensure the smooth conduct of the vaccination process.

Modi’s Ladakh move

By venturing from plains and calling out China’s expansionism, PM tries to cover up up his anti-Muslim remarks, says India means business for a man who crafts his moves in such a manner that they appear to the only truths that obstructs otherwise a clear coalescence. It is in this context that the move to Ladakh, in and of itself, is an act of provocation and a calculated attempt to divert attention from his anti-Muslim remarks and to demonstrate India’s resolve against any perceived aggression.

India’s New Policy Design: A Bottom-Up Approach to Achieving the UN’s SDGs

Focus must be on quality education, gender equality and skill acquisition

In fact, she is credited with giving the vaccine to the Indians, a fact which is widely acknowledged. The vaccine has been credited with saving millions of lives in India, and it is widely regarded as a symbol of India’s scientific prowess.

**Take the example of the**

**The vaccine works in education and social change**

**Stop fake complaints**

In order to maintain public support and prevent any backlash against the government, it is important to address fake complaints promptly and effectively.

**Sustainable Development Goals**

The Sustainable Development Goals (SDGs) are a set of 17 global goals adopted by the United Nations in 2015 as a follow-up to the Millennium Development Goals (MDGs). The SDGs aim to address the social, economic, and environmental challenges facing the world and provide a framework for sustainable development.

**Rajput**

The contours of a post-COVID-19 world are emerging, and each sector will see an upsurge in activity. In such a scenario, the need for new solutions and innovative strategies would be at the core of the new norm. Indeed, the COVID-19 pandemic has highlighted the need for more efficient and sustainable ways of doing things. We are on a path of transformation, and the SDGs are a key part of this journey.

**The vaccine works in education and social change**

**Stepback complaints**

Leaders must denounce fake complaints to maintain their own credibility, and to prevent the spread of fake news and misinformation. In order to be effective, a government must be able to quickly and decisively address fake complaints.

**Soundbite**

We thank you for taking

Picking up the pieces
The writing on the wall is clear. The paradoxes of not only growth and but survival of and safety have to be re-think

VINEET SAUTAM

T recent articles in newspapers and magazines, including the front pages of newspapers, have been quite disconcerting. There is a sense of what journalists euphemistically call “gloom and doom.”

It is perhaps not surprising in these times when the world is facing a pandemic and an economic slowdown. However, the sense of gloom and doom is not just confined to the media. It is being felt by people on the streets as well. The lockdown has been extended in many places, and there is a sense of uncertainty about when it will end.

The situation is particularly acute in developing countries like India. The pandemic has hit the poor and the vulnerable the hardest, and the economic slowdown has added to their already precarious situation.

The government has announced various measures to combat the pandemic, including lockdowns, and economic stimulus packages. However, these measures have not been able to arrest the decline in economic activity.

There is a sense of frustration and anger among people. The government is being criticized for not doing enough to combat the pandemic, and for not doing enough to revive the economy.

The situation is particularly acute in urban areas, where people are dependent on daily wages and casual labor. The lockdown has hit them the hardest, and they are finding it difficult to make ends meet.

The government has announced various measures to help the poor and the vulnerable, including cash transfers and food subsidies. However, these measures have not been able to reach all the people who need them.

There is a sense of hopelessness among people. They feel that the government is not doing enough to combat the pandemic, and that the economic situation is only going to get worse.

It is important for the government to take urgent and decisive action to combat the pandemic and revive the economy. This will require a concerted effort from all levels of government, and a coordinated approach to combat the pandemic.

It is also important for people to be patient and understand that the situation is difficult, and that there are limits to what can be achieved.

Reliance plans to up aviation fuel stations by 50%  

PTI NEWS DELHI

Reliance Infrastructure Ltd (RIL) plans to build 17 airport fuel stations in the next 24 months, against the current 35-odd, to tap into the growing aviation fuel market. "We have identified additional 26 airport fuel stations and are in the process of converting these into fuel stations," an official of RIL, which currently operates 39 aviation fuel stations across 12 airports in India, told PTI. A majority of the new fuel stations will be commissioned in the second half of the financial year, he said. The Minister said traffic figures are not being published, but in October 2020, three months after travel bans were lifted, air traffic remained 9 percent lower than pre-COVID-19 levels. According to government data, air traffic in October 2020 was 22 percent lower than the corresponding month in 2019. "There has been a resumption of air travel but it has been much slower than expected, as people are not flying on holidays due to large-scale restrictions," he said. According to official statistics, international air travel fell 99 percent in October, while domestic traffic was 93 percent lower than in October 2019. The official said air travel was still not back to pre-COVID levels in October and November, and was at 22-25 percent of pre-COVID levels. "There has been a resurgence of air travel, but people are not flying on holidays," he said. The official added that travel restrictions had led to a decline in travel demand, with people choosing to travel by train, road and even on foot. According to government data, the number of passengers on domestic flights in October 2020 was 11 percent lower than in October 2019. "We are seeing a resurgence of air travel, but people are not flying on holidays," he said. The official added that travel restrictions had led to a decline in travel demand, with people choosing to travel by train, road and even on foot. According to government data, the number of passengers on domestic flights in October 2020 was 11 percent lower than in October 2019. Kangaana picnics with family in Manali

Actor KANGAANA RANAUT is enjoying some time in Manali before the onset of monsoons. The actor organised a picnic for her family in the picturesque mountains of the area.

"Even though they are in the green zone, they are all the permissions given by the Himachal Pradesh authorities," the actress team tweeted.

They also shared a video where Kangana can be seen enjoying her time on the green grass while laughing hard.

Clearly, she is spending quality time with her sister Rangoli and nephew Pittal.

**Deepika takes yoga classes**

With her latest and on-screen presence, actor Deepika Padukone has been making the headlines for her latest projects. A true actress, Deepika is capable of portraying any character with utmost passion. Ever since her inception in the film industry, Deepika has always been an inspiration to her fans. She is known for her dedication towards her work and her love for fitness.

For Deepika, fitness is not just about looking good, but it is an integral part of her lifestyle. She believes in leading a healthy lifestyle and maintaining a good balance between her work and personal life.

To stay fit and healthy, Deepika has been taking yoga classes from the very beginning of her career. She is a big fan of yoga and believes in its therapeutic and stress-relieving benefits. She discovered yoga during her early days in the industry and has been practicing it ever since.

Yoga helps her maintain her physical and mental fitness, which in turn helps her in maintaining a good performance on-screen. Deepika has been a supporter of yoga for a long time and has always encouraged her fans to adopt this ancient practice.

**Deepika talks on her fitness journey**

With the recent pandemic hitting the world, people have realized the importance of fitness and healthy lifestyle. Fitness has become a necessity for everyone, and many people have started to incorporate healthy habits into their daily routine.

Actress Deepika Padukone is one such person who has been vocal about her fitness journey. In a recent interview, Deepika spoke about her fitness routine and how she maintains a healthy lifestyle.

DeepikaPadukone: "I have always been someone who believes in taking care of my body and mind. I have been practicing yoga for a long time, and it has been a great source of strength and motivation for me. Yoga and meditation help me stay calm and focused, which is very important in today's fast-paced world.

Also, I have been following a strict diet plan that is rich in nutrients and proteins. I make sure that I have a balanced diet, and I try to keep my sugar and caffeine intake at a minimum.

Overall, I try to maintain a healthy lifestyle, and I believe that it has been instrumental in keeping me healthy and fit.

**Jeremy Wade's Lake Garda Monster**

It's not just about the lakes in the southern parts of the world; there are also some beautiful lakes in the northern parts of the world. One such lake that is known for its mysterious sightings is Lake Garda.

Lake Garda is located in Italy and is one of the largest lakes in Europe. It is known for its beautiful scenery, crystal-clear waters, and the many fish species that can be found in it.

Over the years, there have been many reports of mysterious creatures in Lake Garda. One of the most famous sightings was the sighting of the Lake Garda Monster in the 16th century.

The Lake Garda Monster was a reported sighting of a large, serpent-like creature that was said to be swimming in the lake. The sightings were so frequent that the local people believed that the lake was cursed.

Over the years, there have been many attempts to capture the Lake Garda Monster, but none of them have been successful. Some believe that the creature is simply a large fish, while others believe that it is a real, unknown species of animal.

Despite the lack of concrete evidence, the Lake Garda Monster continues to be a popular topic of discussion among the people living near the lake.

Ayurveda explores the relationship between the mind, body, and soul. It has a holistic approach towards mental health issues and depression, says Greta Ramesh.

There have been studies done on the role of Ayurveda in mental health. In Ayurveda, emotions are linked to the doshas — vata, pitta, and kapha. The imbalances of these doshas cause mental and emotional disturbances. Ayurveda is important in treating these doshic and etiological factors, which includes the use of emotional and physical therapies as well as dietary changes (daily routine) and Ayurveda (seasonal health routines).

The holistic approach is important to find the cause of the disease. According to Ayurveda, good health is a balance of physical and psychological health. It has always had a holistic approach towards this disease, not just treating the disease itself but also treating the patient with the treatment of mental health issues. Ayurveda is unique because it is not a cure-all therapy, and as a result, Ayurveda explores the relationship between the body, mind, and spirit of the patient.

Our body is made up of three types of doshas — vata, pitta, and kapha. The imbalance of these doshas causes mental and emotional disturbances. Ayurveda is important in treating these doshic and etiological factors, which includes the use of emotional and physical therapies as well as dietary changes (daily routine) and Ayurveda (seasonal health routines).

For Chelsea, the future appears rosy, but it is not without its challenges. The Blues, who are currently sitting in third place in the Premier League, are looking to solidify their position in the top four and secure a spot in the Champions League next season. However, their pursuit of domestic glory is complicated by the presence of Manchester City, who are only two points behind them in second place. The Blues will need to be at their best if they are to continue their winning streak and maintain their position in the top four.

De Kock wins SA Cricketer of the Year award

Quinton de Kock was named South Africa’s Cricketer of the Year for the second consecutive year. The wicketkeeper-batsman had another impressive year, scoring 1,735 runs in 19 innings at an average of 52.76. He also made his Test debut and scored 193 runs in his first Test. De Kock was also named the Cricket South Africa’s Men’s Cricketer of the Year.

England tour is like Ashes for us: Rohit

Rohit Sharma said that the England tour is like an Ashes series for India. The opening batsman, who is set to lead the side in the absence of Virat Kohli, said that the team needs to focus on their performance in the Tests and try to win as many matches as possible.

Bottas wins dramatic Austrian race

Valtteri Bottas won the Austrian Grand Prix after a dramatic race. The Mercedes driver took the lead from Lewis Hamilton on the final lap and crossed the finish line to claim his fourth victory of the season.

Pin-point Ramos holds nerve again

Real opens up 7 point lead over Barca after seventh straight win

Ramos scored a late penalty to give Real Madrid a 1-0 win over Barcelona and open up a seven-point lead in La Liga. The defender, who is set to retire at the end of the season, scored a crucial goal to break Barca’s unbeaten run and keep their title hopes alive.

Champions League

The Champions League is set to return after the winter break. The round of 16 fixtures have been announced, and teams from Europe’s top leagues will be vying for a place in the quarter-finals. The competition promises to be one of the most exciting in recent years, with some of the world’s best teams set to clash.

Cronje’s recoil

The Cronje affair of 2000 returned to haunt the Proteas as former captain Pieter de Villiers accused him of fixing the 1999 final against India. The former skipper, who also played for the Proteas, said that Cronje offered him money to lose the match, but he refused.

PTI

The Pakistan Tehreek-e-Insaf (PTI) is a political party led by Shahbaz Sharif. The party has been in power in Punjab since 2018 and has been a major player in national politics. The PTI has been criticized for its controversial policies and has faced protests and demonstrations in the past.

Mendis held after fatal car accident

Mendis was held after being involved in a fatal car accident. The cricketer was driving an SUV when he collided with another vehicle, killing a 61-year-old woman. Mendis was arrested at the scene and is facing charges of causing death by reckless driving.
