COVID-19: NEED TO RE-MODEL JUSTICE DELIVERY SYSTEM

CJI Menon said the pandemic has exposed a number of inadequacies in our current system of justice and that it was time to think out of the box to improve the system. He said the current system was incapable of handling such a large number of cases and it was an urgent need of the hour to re-model the entire system of justice delivery to make it more effective and efficient.

In the present-day education system, from the primary level in schools to the higher level in universities, there is a serious gap between the requirements for examinations, but not making them well-equipped to face the harsh realities of the world. The re-skilling and up-skilling of the system should be there, the CJI said.

As for higher education, it should be such that it is not only suitable but it is also something that suits the needs of the country. Institutions should be able to accommodate all kinds of courses and train students to face the challenges of the world.

The Delhi High Court has directed the government of the Union territory of Chandigarh and Haryana and the authorities of the Indian Railways to look into the matter of a FIR registered on June 27, 2020, for the alleged solicitation of bribe under Section 161 of the Indian Penal Code (IPC). The FIR was registered at the Tillet police station in the case of a senior railway official, who was an IAS officer. The court has noted that the government has failed to take any action in the matter despite the serious allegations.

The court has expressed concern over the delay in the investigation and has directed the authorities to conclude the investigation and take appropriate action in the matter.

The court has directed the government to ensure that the investigation is conducted in a fair and impartial manner and to ensure that the rights of the accused are protected.

The court has also directed the police to ensure that the investigation is conducted in a transparent manner and to ensure that the accused is not subjected to any form of harassment or undue influence.

The court has directed the government to ensure that the investigation is completed within a reasonable time and to ensure that the accused is not subjected to any form of harassment or undue influence.

Spoke in the wheel

Lockdowns at the macro-level are slowing economic revival.

Central-State coordination is needed to keep economic activities going in various sectors.

For instance, agriculture faces severe disruptions due to lockdowns.

Many industries are reeling under the impact of lockdowns.

The government needs to devise a mechanism to supply credit to these industries.

The government should also provide stimulus packages to boost consumer demand.

In addition, the government should work on developing a coordination mechanism with the States.

This could involve regular consultations and information sharing to ensure a coordinated approach across different sectors.

With the right strategies in place, the economy can bounce back stronger after the lockdowns.

---

A difficult road to recovery

A new study in The Lancet suggests that many patients are still struggling with the long-term effects of COVID-19.

For some, this includes neurological and psychological symptoms.

The study highlights the need for continued support and care for those affected by the pandemic.

---

Another battle

COVID-19 is not the only threat facing our world.

Pandemic fatigue and political discord are just some of the challenges we face.

We must work together to overcome these challenges and build a better future.

Asian to see the moon and report the creation of Pakistan in 1947, it was a sight that marked the beginning of a new era. The Moonstruck over the sighting of Eid. The reality of the COVID-19 emergency necessitates a rethink at our health policy targets, including public health spending and its trajectory.
Seven Indian pharma players race to develop COVID-19 vaccine

At least seven Indian pharma companies are working to develop vaccines against COVID-19, each trying to be the first to announce successful trials. The race to develop a vaccine is crucial in the current pandemic crisis, and the companies are under immense pressure to deliver a safe and effective vaccine as soon as possible.

The companies include Bharat Biotech, Serum Institute, Zydus Cadila, Hindustan Unilever, Cadila Healthcare, and Wockhardt.

- Bharat Biotech is working on a vaccine that combines a viral vector and a protein subunit.
- Serum Institute is currently developing a COVID-19 vaccine using a recombinant vector technology.
- Zydus Cadila is working on a DNA vaccine.
- Hindustan Unilever is collaborating with Themis to develop a COVID-19 vaccine.
- Cadila Healthcare is working on a vaccine that uses a novel adjuvant system.
- Wockhardt is working on a COVID-19 vaccine using a recombinant subunit platform.

The companies are using a variety of approaches, including viral vectors, subunit vaccines, and DNA vaccines. Each company is under pressure to deliver a vaccine that is both safe and effective, and they are working with government health authorities to ensure that the vaccine is approved and distributed as quickly as possible.

Several of the companies, including Serum Institute and Zydus Cadila, have already secured funding from the government to support their vaccine development efforts. The government has also set up a dedicated task force to oversee the vaccine development process.

The race to develop a COVID-19 vaccine is a major priority for Indian pharma companies, and they are working tirelessly to ensure that a safe and effective vaccine is available to the public as soon as possible.
Video-sharing app to support Indian creators

The ban on the video-sharing app Tiktok had left millions of Indian users disappointed, but it gave more space for other such video-sharing platforms to flourish. One such video-sharing app that is making its ways into the market is the ‘Rizzle’ app. The Pioneer’s SHIKHA DUGGAL talks to the founders of the app on how it’s different from other such apps in the market and more.

Rizzle app, a free-thinking short video sharing platform is taking on its counterparts.

Creatives can collaborate here, have an interactive discussion with their audience, and whatever. Like TikTok, the app allows users to create one-minute clips, listen to songs, play games, dub, and supports a community. You can start a mini series or host a grand challenge or promotes your show or explore your hidden talents.

In an attempt to allow users to post their video reactions instead of comments, the founders of the app Vidya and Lakshminath launched Rizzle! In the fight for equal opportunity across the world, the app has been the new-fangled trend #RizzleMillionVoices Project with a commitment of bringing half of voices to talk about their struggles from the respective countries. Rizzle, which is available directly on GooglePlay store, allows you to share your creative content, post reactions, keep in touch with each other through a vibrant feed and our team has put in a lot of effort to make this business grow. This app is being promoted as a massive boost to Indian patriots with a major push of prioritising our country.

With our new found technology through the app, we aim to put India on the world map as the first Indo-American content platform bringing about the change from creative content.

As the ban on the video-sharing app TikTok has led millions of users to find other apps to upload their videos, the platform of Rizzle is being seen as a massive boost to Indian patriots with a major push of prioritising our country. The company specialises in hygiene-essential products. A small amount of silver ion particles can enter into the bacterial cell, both inhibiting bacterial growth, killing bacteria, and stopping respiration and disrupting cell, both inhibiting cellular duplication and constantly deriding by society.

Silver ion treatments can be used for several medicinal purposes. A small amount of silver ion is used to treat infections. Silver is used in the form of a medical equipment to prevent the spread of pathogen. Silver is also used in surgical equipment, wound dressings and dressings used to protect wounds from infection. Silver nanoparticles are useful in dental fillings. It is used in contact lenses, which are used to treat eye infections. Silver is also used as an adhesive. Silver ion particles have the ability to disrupt the cell regeneration process which can help us in our fight against coronavirus replication cycle. Interestingly, when in the presence of silver ions it disrupts the cell regeneration process which can help us in our fight against coronavirus. Quoted by Business Today, a brand which produces legendary essential products. The company specialises in hygiene-essential products. A small amount of silver ion particles can enter into the bacterial cell, both inhibiting bacterial growth, killing bacteria, and stopping respiration and disrupting cell, both inhibiting cellular duplication and constantly deriding by society.

With the vaccination of Covid-19 still in progress, there isn’t a considerable amount of information for the number of vaccinations done taken by India. While we have relied on the age-old methods of building immunity like hot water and ‘kadias’, we can also rely on the age-old ingredient, silver, which is backed by scientific research for its use to fight viruses and human diseases.

How silver works as disinfectant?

- Silver interrupts bacterial cell membrane
- It inhibits enzymes needed by bacteria for metabolism
- It interrupts DNA strands preventing cell duplication
- Silver blocks the respiratory system of the cell and thus kills 99.99 percent of bacteria and germs.

With the vaccination of Covid-19 still in progress, there isn’t a considerable amount of information for the number of vaccinations done taken by India. Ensure the adequate intake of nutrition

As we are and what we do has a significant effect on our overall health, an unhealthy diet can increase the risk of disease by manifold.

Healthy dietary modifications are an important part of disease prevention and control degenerative diseases. Healthy dietary modifications include the following:

- A rainbow diet - This will boost immunity and gut flora.
- Foods rich in antioxidants - These are plant-based foods. Other good choices are blueberries, strawberries, and cherries.
- Foods rich in probiotics - These include fermented foods like kefir, sauerkraut, and kimchi.
- Foods rich in fiber - These include whole grains, beans, and legumes.
- Foods rich in healthy fats - These include nuts, seeds, and fish.

FOLLOW HEALTHY COOKING PRACTICES:

- Do not cook oils on high heat.
- Go easy on the barbecue.
- Be careful what you put in the microwave.
- When cooking vegetables, steam until just a small amount of water is left.
- Stir in fruits and vegetables.

Reduce the intake of alcohol and avoid smoking.

Consuming alcohol increases the risk of cancer of the mouth, pharynx, larynx, oesophagus, breast, and the liver. For women, the risk is even more for those who smoke. Alcohol has also been associated with colon and rectal cancer.

To minimize the risk, men should take less than two standard drinks per day, whereas for women, the limit should be one standard drink a day.

Stepping out again?
Here’s some useful skincare advice

Prolonged pandemic and lockdown gave us enough time to take care of our skin and stay away from a regular exposure of sun, dust and pollution. Now that people are beginning to step out, skincare products will once again become more sensitive to these environmental factors. “Here you notice more breakouts or dark spots or fine lines or pigmented spots on the skin? If yes, you need to look out for these signs and make sure that your skincare routine is geared up to combat them. UV exposure and constraint have resulted in significant skin damage, and associated stress have made us more sensitive to these environmental factors.”

“Body Shop Expert says it’s better to take extra precautions once we are ready to step out,” said Dr. R.S. Sabitha, Skin Care Expert. “We need to take care of our skin by taking extra precautions once we are ready to step out.”

Drinking enough water can help you combat a variety of skin conditions. Drinking water flushes out toxins from the body. This in turn gives you healthy and glowing skin and also helps your digestive system to flush out toxins from your system. It also helps your digestive system to flush out toxins from your system.

Rhino poachers, people pass by quietly

It is a heart-warming scene. Forest officials are rescuing a rhino that has apparently wandered off the path. The team has worked hard to bring the rhino back to its natural habitat after it was discovered in a village.

Premier League champions have to put everybody on the table. We won in 2017. Arteta captained Arsenal to the title in each half as Arsenal executed perfection. Arteta knows City well after his time as Guardiola’s assistant.

Jasprit Bumrah is “hard to get past”. The 26-year-old has been very good during the December-January series were slipping away. But Calhanoglu set his mark on the day.

We’ve made changes and everyone is happy. We’ve had an incredible game. We’ve put together our best two teams. It doesn’t happen every day. Aubameyang made them slide a fine finish off the far post in the 19th minute. At the climax of the game, Arteta’s rope-a-dope plan caught quickly after dealing with a corner.

Winning goals by Austin 26-0 win on Sunday. But Calhanoglu set his mark on the day.

But Calhanoglu set his mark on the day. In the 44th minute, nodding an offside flag denied Kane a potential scoring chance. The Gabon striker’s slide a fine finish off the far post in the 19th minute. At the climax of the game, Arteta’s rope-a-dope plan.

The European top flight finally came to a close. A stunning goal by Asamoah Gyan in the 89th minute of the game gave Ghana a 1-0 win over the Voltaicas. It was a well-deserved victory for the Black Stars, who had been under pressure to qualify for the 2022 World Cup in Qatar.

Oh My Kadavule floors Mahesh

Thank you is not a message-oriented film but has an undercurrent of something wonderful. It has got mainstream elements - humour, drama, romance and a little bit of action, finds NAGARAJ GOUD

Deepika is ‘beyond thrilled’ to be a part of Nag Ashwin’s next

IT’S A STORY THAT NEEDS TO BE TOLD NOW: VIKRAM ON THANK YOU

F or the past couple of years, whenever someone would ask the prominent film director VIKRAM on what he is planning to do next, he would reply in a knowing manner that he is working on something titled ‘Vijayagiri’. Throughout these years, this particular title has remained unconfirmed and has remained a mystery to all those who are waiting for VIKRAM’s next. While he was being asked about what the project was about, VIKRAM would only say, “I am working on something titled ‘Vijayagiri’ and will reveal more about it soon.”

On Sunday, Producer PVV is remaking the Tamil hit in Telugu, with Vishal attached to reprise the role played by Aditya Shetty. Original Tamil director Ashwath Marimuthu, who sometime back confirmed that he is writing the film to direct it as well, marked his Telugu debut. Replacing to Mahesh’s should, Ashwath took, “Thank you god IRU made us day I been your fan to get each words from you is like - you blessed me (sic).”

A fantasy comedy, Oh My Kadavule, which starred Ashok Selvan, Rithika Singh, Praveen Raj and Vini Dithapagoda, is an inspirational story of a young man who marries his best friend. When his life gets complicated, he receives a ‘golden ticket’ that facilitates him to move for his journey.

Thank you is a story that needs to be told now: VIKRAM

Thank you is not a message-oriented film but has an undercurrent of something which is wonderful. It has got mainstream elements - humour, drama, romance and a little bit of action, so predicts

We also believe the film will make its way to the audience soon. Thank you is expected to be released by the end of this year. For more updates on the film, stay tuned to our social media handles.

Deepika is ‘beyond thrilled’ to be a part of Nag Ashwin’s next

Thank you is the Telugu version of the Tamil film ‘Thank You’, which was released in 2020. Directed by Ashwath Marimuthu and produced by Sharrath Marar, the film is an action-comedy drama that revolves around a man who gets a golden ticket to move for his journey. Deepika Padukone, who is a part of the film, is said to be very excited to have a role in this film.

The Tamil film ‘Thank You’ was a massive hit and has been a turning point in Deepika’s career. The film was directed by Ashwath Marimuthu and produced by Sharrath Marar. The film was released in 2020 and has been widely praised for its storyline, direction and Deepika’s performance. The film has been a commercial success and has been a significant part of Deepika’s career.

It’s a story that needs to be told now: VIKRAM

In an exclusive interview with The Pioneer, VIKRAM on cloud nine with Chiru’s praise

Gopinath Goddy

I n a refreshing change, VIKRAM, the megastar’s production team, took to Twitter to reveal the actor’s excitement after receiving Chiranjeevi’s praise for the film’s Telugu version. The tweet was accompanied by a poster of the actor and the director, with a heartfelt message from Chiranjeevi.

Chiranjeevi further said, “This is a story that needs to be told now. It is a story that makes us think. It is a story that makes us laugh. It is a story that makes us cry. It is a story that makes us feel. It is a story that makes us think. It is a story that makes us laugh. It is a story that makes us cry. It is a story that makes us feel. It is a story that makes us think. It is a story that makes us laugh. It is a story that makes us cry. It is a story that makes us feel.”

People are reacting to this news and expressing their joy and appreciation. The tweet has gone viral and attracted a lot of attention. The message from Chiranjeevi is not only flattering but also a sign of the actor’s respect and admiration for the film.”

The tweet has become a viral sensation and has been shared by fans and media alike. The excitement of the megastar’s team is palpable, and Chiranjeevi’s support is a testament to the hard work and dedication that has gone into making this film a success.

Oh My Kadavule floors Mahesh

Thank you is the Telugu version of the Tamil film ‘Thank You’, which was released in 2020. Directed by Ashwath Marimuthu and produced by Sharrath Marar, the film is an action-comedy drama that revolves around a man who gets a golden ticket to move for his journey. Deepika Padukone, who is a part of the film, is said to be very excited to have a role in this film.
