India replaces UK for 4th rank with 3L cases

India raced to the fourth spot in the list of countries affected most by the coronavirus when the total number of COVID-19 cases reported crossed the 3 lakh mark in the country, outpacing the UK on Monday. While the UK reported 3,667 fresh coronavirus cases and 153 deaths taking the total COVID-19 cases reported to 3,30,687 and 34,687, respectively, the total deaths reported on the same day were 30 and 20, respectively. Meanwhile, Brazil reported 1,543 fresh COVID-19 cases and 87 deaths, while France reported 8,498 new cases and 55 deaths. However, with the first day of the lockdown in the UK, India is likely to be the most at-risk nation in terms of overall cases and deaths, overtaking the UK.

A sero-survey conducted by testing the blood samples of 26,400 people across the 83 districts of the country showed that a large proportion of the people in India had been exposed to the virus. The findings showed that infection in containment zones districts was high with significant variations. Explaining the data, Dr Balram Bhargava, the director-general of the Health Ministry, said there was no community transmission unless there was a large proportion of the population infected with the virus.
After 15k tests per day, sampling to start from today

UT Pradhan achieved a new benchmark by testing 15,000 samples per day. He has said that the success story continues.

DefExpo failed to bring in funds: Akhilesh

Lucknow (PNS): Terming UP CM and Defence Minister Akhilesh Yadav’s extravagant show DefExpo as a grand failure, official sources alleged that theUP government events could neither bring people to provide employment to locals. In a statement issued in Lucknow on Thursday, Akhilesh said that the UP government was playing the same game as before.

The state government was playing the same game as before, and there was no employment for locals, he alleged.

Government to start Bal Shramik Vidya Yojna

Lucknow (PNS): Aiming to educate orphans and children of workers or those who have lost their parents due to COVID-19, the state government will launch the Bal Shramik Vidya Yojna soon.

The scheme will be launched in the presence of Labour Minister Bhim Rawat. The scheme, which is expected to be launched in the near future, has been approved by the UP government.

Now that the situation has improved, the government has decided to launch it in World Day Against Child Labour on June 12. The scheme will be launched in March and it will be defined as follows:

- Deaths due to treatment: The DoME will ensure strong facilities are in place.
- Access to social benefits: The state government will ensure that all children are aware of their rights and benefits.
- Deaths due to treatment: The DoME will ensure that all children are aware of their rights and benefits.

The chief minister directed the officials of the state government to expedite the construction of classrooms and other facilities for the children who are enrolled in the scheme. He also instructed the officials to ensure that the children are provided with all necessary facilities.

Ayodhya saints want PM, CM to attend Ram temple shilanyas

With specifications gaining ground, plans for the proposed Ram temple in Ayodhya to be held on July 5 in Ayodhya (Ram temple) are yet to be finalized. The state government has decided to hold the shilanyas.

The Sanatan Dharamshala temple will be held on July 5. This will be the first time that a temple will be inaugurated in the city. The state government has decided to hold the shilanyas.

The Sanatan Dharamshala temple was inaugurated in the presence of the temple committee.

The temple will be inaugurated in the presence of the temple committee.

Priyanka’s tirade against Yogi continues

Ludhiana (PNS): Continuing her tirade against the UP CM, Priyanka Gandhi Vadra alleged that the state government has not done anything for the people. She said that the state government has been sitting on the ropes.

Priyanka tweeted in Hindi, “Tired of not doing anything for the people, none of your schemes is working, neither the agriculture sector is improving, nor the educational sector is improving.”

Priyanka Gandhi Vadra alleged that the state government has not done anything for the people. She said that the state government has been sitting on the ropes.

The Bhartiya Janata Party government has been sitting on the ropes, Priyanka said.

Akhilesh said that the government had only been sitting on the ropes, not doing anything for the people.

He said that the government had only been sitting on the ropes, not doing anything for the people.

Akhilesh Yadav, who is the state president of the Congress, had said that the government had only been sitting on the ropes, not doing anything for the people.

The state government has been sitting on the ropes, Priyanka said.

Lucknow: After days of facing overcrowding in hospitals, 180 migrants from Lucknow and other districts in Uttar Pradesh were looking forward to a sense of relief among the migrants in the city on Thursday. The lockdown had come as a respite for the migrants in the city. However, if you wear PPE, you are safe from COVID-19.

Amitabh Bachchan, who lives in Bandra in Mumbai, was seen on Thursday visiting the Baijnath Mahadev temple and the Mahim Dargah to pray for his long life, “Khan said they had already submitted the papers to ICMR. Singh said they had already been identified as Laeeq Ahmed of Lucknow and are yet to be identified. His brother Raju Prasad was identified as Sonu Kumar and his investigations are still continuing. The deceased had worked as a tailor in Bandra and would earn a living by his close aide Rajesh Shrotri who organised a large-scale event in Bachchan’s residence on Wednesday.

PPE troubles for health workers
Health workers, especially doctors and nurses, are facing immense pressure working while wearing personal protective equipment (PPE) to ensure they do not contract the deadly virus. Many health workers have been seen outside the hospital buildings, asleep on benches, as they do not get any rest.

Three found dead in separate incidents
Lucknow: On Thursday, three bodies were found in separate incidents in Lucknow. One of them was a 34-year-old man who was found hanging from a drain close to Red Cross Hospital. The police said the condition of the deceased was not very clear and the body was handed over to the hospital for post-mortem.

Sneha, a 28-year-old woman, was found injured in Madiaon under the police station in Lucknow on Thursday. Sources said she had been beaten up and the police are investigating the matter.

Meanwhile, the body of a 35-year-old man was found lying on the road with head injuries and police are investigating the matter.

Systematic sampling in city to control virus spread
In Lucknow, as per the directions of the commissioner of health services, categories had been identified on the basis of the severity of the disease, patients have been screened asymptomatic in Lucknow.“Looking at the spread of the virus, it was said to be very severe in areas with better ventilation and where people do not gather, which means fewer patients," he said. Chief Medical Officer Dr. Narendra Agarwal said they were planning to set up camps for migrants in the city for free treatment of COVID-19.

Migrants arrived at Lucknow in special flight from Mumbai on Thursday

Mills to continue till the last cane is crushed

By Anjali Singh

The Indian Cane and Sugar Federation (ICSF) on Thursday evening slammed the state government for continuing to crush sugarcane in Uttar Pradesh. The state government had earlier announced that it would stop crushing sugarcane in the area.

"The state government has been asked to withdraw the order as it is causing irreparable damage to the farmers," said Anil Pratap Singh, state president of Akhil Bhartiya Kisan Union (BKU). He added that the state government had also failed to pay the farmers for the sugarcane they had already harvested.

The sugar trade unions have been demanding that the state government pay the farmers for the sugarcane they had already harvested and that the crushing of sugarcane be stopped. They have also been demanding that the state government provide alternative sources of livelihood to the farmers.

"The state government has not only failed to pay the farmers for the sugarcane they had already harvested but has also failed to provide alternative sources of livelihood to them," said Singh.

The state government had earlier announced that it would stop crushing sugarcane in the area as a gesture of goodwill to the farmers. However, the trade unions have been demanding that the state government withdraw the order.

KDA set to construct 1K houses for migrants

KDA Development Authority (KDA) will construct 1,000 houses for landless migrant workers in urban areas of the city. These houses will be given to them in phases.

In this regard, an online meeting was held at which KDA Secretary Sreejith Singh said the 1,000 housing units would be constructed at the construction cost of Rs 15 lakh at Kamala Nagar. Apart from this, according to him, the roadside footpath at KDA’s affordable rental housing project will be constructed at a cost of Rs 3 lakh. 

KDa's Chief Engineer Surender Kumar said that the work of preparing tender documents for 1,000 Housing Units Scheme is in progress and the work of constructing the houses will begin as soon as the tender documents are approved.

The city needs 1.47 million more houses to accommodate its population of 4.74 million people, he said.

The meeting was attended by KDA Commissioner Sreejith Singh, Executive Engineer Surender Kumar, Additional Engineer Ramesh and KDA’s Assistant Engineer S.P. Parameshwaran.

India’s economy will be back on track again: Modi

PM says India should convert COVID-19 crisis into a turning point towards becoming a self-reliant nation

The government on Thursday said the country should convert the COVID-19 crisis into a turning point towards becoming a self-reliant nation and a major hub for organic farming and capabilities to manufacture products which are of specific brands in particular are essential for the domestic market.

The Mumbai civic body and the Tamil Nadu government have already taken steps in this direction.

The onset line is passing over Maharashtra, Telangana and Karnataka to concentrate on exporting. The V-shaped recovery position will stabilise and the Indian economy grew by 24.2% in 2020-21, said visiting IMF chief Kristalina Georgieva.

A matter of pride
The number of Git lions has grown up by 29 per cent but with a shrinking habitat, man-animal conflicts remain a challenge.

While the pandemic has dark clouds in the pandemic, it has been the resilience and healing of nature. Now with the lion population has grown up by 29 per cent, it is good news for the conservationists. But in the state of woodland, the number of the majestic Arial Lion, which was counted in 2016, was almost 29 per cent in Guangxi’s forest. Geographically, the density of the area is up to 36 per cent. For the conservation of the wild lions, an estimation 674 in protected areas and 177 in the wild, will be maintained.

According to the conservationists, the number of lions has increased significantly and their conservation efforts have been sustained through community participation, emphasis on technology, proper habitat management, increase in prey base, efforts to increase their population, and other conservation measures. The Government of India has set up a taskforce to monitor the population of lions and their movement. The taskforce has recommended increasing the population of lions to 500 by 2022 and 750 by 2025.

The BDIC is working on all fronts to ensure that the lions are able to move freely and the BDIC is working on the development of a new habitat for lions. The BDIC has also established a new reserve forest in Gir to accommodate the growing population of lions. The BDIC has also started a programme to reintroduce the lions into the wild and has identified several sites in the Gir forest for the purpose.

The BDIC has also taken steps to ensure that the lions have access to water and food. The BDIC has also set up a monitoring system to track the movement of the lions and has also provided training to the local communities to ensure that they do not harm the lions. The BDIC has also taken steps to ensure that the lions are not disturbed by human activities and has also set up a ward to monitor the activities of the local communities.

In conclusion, the increase in the population of lions is a matter of pride for the conservationists and the Government of India. The BDIC is working on all fronts to ensure that the lions are able to move freely and that their population continues to grow. The BDIC is also working on the development of new habitats for lions and has set up a monitoring system to track the movement of the lions. The BDIC is also working on the training of the local communities to ensure that they do not harm the lions and has also set up a ward to monitor the activities of the local communities.

I have attended a few hundred meetings over the years, sometimes with senior Government officials. At those meetings, there is the usual feeling of optimism. One can see the excitement, the hope, the desire to achieve something big. But there is also a palpable sense of disbelief. Can anything really be done? The Government has been trying for years to do something, but nothing seems to have worked. The people are angry, the opposition is strong, and the crisis seems to be getting worse. It is a situation that is very difficult to deal with.

Our Government has been trying to do something about child labour for many years. We have launched several initiatives, such as the National Action Plan on Child Labour (NAPCL), the National Child Labour Policy, and the National Child Labour Reference Group (NCLRG). But despite these efforts, the problem of child labour remains a serious issue in India. According to the latest available data from the Ministry of Labour and Employment, there are around 152 million working children in India, including those who are engaged in hazardous child labour. This is a very high number, and it is clear that more needs to be done to address this issue.

Child labour is a serious problem that has been gaining attention in recent years. The Indian Government has been trying to address the issue through various policies and initiatives. However, it is clear that more needs to be done to address this issue and to ensure that children are protected from the worst forms of child labour.

Impact on children: The education of children is being adversely affected due to their involvement in hazardous child labour. Children who are engaged in hazardous child labour are unable to attend school and are deprived of the opportunity to learn and develop their full potential. The lack of education and training makes it difficult for these children to secure employment and to earn a living. It is important that efforts are made to ensure that children are not forced to engage in hazardous child labour and are allowed to attend school and receive a quality education.

Government must act: The Government should take immediate steps to address the issue of child labour. It should implement the existing policies and initiatives to ensure that children are not forced to engage in hazardous child labour. The Government should also review and update the existing policies to ensure that they are effective in addressing the issue of child labour.

Conclusion: Child labour is a serious issue that needs to be addressed urgently. The Government should take immediate steps to address the issue and ensure that children are protected from the worst forms of child labour. Children have the right to an education and to be free from child labour, and it is the Government's responsibility to ensure that these rights are protected.

The Government must act to ensure that children are not forced to engage in hazardous child labour and are allowed to attend school and receive a quality education. It is important that the Government implements the existing policies and initiatives and also reviews and updates them to ensure that they are effective in addressing the issue of child labour.
I would have been an artist if not CM: Uddhav

The daily life making pleasant and delightful would have been more useful if I had been an artist. But it is a fact that my main occupation is running the state. I am committed and it is my duty to look after the affairs of the state.

Tamil Nadu to change name of 1,018 towns

The state government has decided to change the name of 1,018 towns across the state. The decision was taken by the Tamil Nadu Assembly on Thursday.

Another no-confidence motion moved against Srinagar Mayor

A no-confidence motion has been moved against Srinagar Mayor Aftab Ahmad Khan during a Council meeting in Jammu.

Bengaluru Covid containment zones rise to 85; cases, 244

The number of containment zones in Bengaluru has increased to 85, following the detection of 244 new Covid-19 cases in the city. The containment zones have been increased from 79 to 85.

Many forces behind alarming rise in virus cases in 21 states: US

The United States may see 200,000 new coronavirus deaths before authorities can claim the epidemic is under control, a government official said on Wednesday, warning that it was too early to relax restrictions.

The United States has so far reported more than 13 million cases of coronavirus and more than 261,000 deaths, according to data compiled by Johns Hopkins University.

The White House said on Wednesday that it had been informed of the death of a member of the U.S. military in Afghanistan.

In Afghanistan, where the pandemic is spreading rapidly, the government has banned flights to and from several countries to prevent the spread of the virus.

In addition to the U.S., the United States has also banned flights from the UK, Brazil, and South Africa.

Many states in the U.S. have imposed lockdowns and other restrictions to try to contain the spread of the virus, but infections continue to rise.

In most states, the number of new cases has increased over the past week, with some states reporting record daily increases.

In California, the state with the highest number of cases, the number of new cases has increased by nearly 10% in the past week.

In Texas, the state with the second-highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In Florida, the state with the third-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In New York, the state with the fourth-highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In Georgia, the state with the fifth-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In Pennsylvania, the state with the sixth-highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In Michigan, the state with the seventh-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In Illinois, the state with the eighth-highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In Ohio, the state with the ninth-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In New Jersey, the state with the 10th-highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In New York City, the city with the highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In Los Angeles County, the county with the highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In San Francisco County, the county with the second-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In Orange County, the county with the third-highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In Riverside County, the county with the fourth-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In San Diego County, the county with the fifth-highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In San Bernardino County, the county with the sixth-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In Los Angeles County, the county with the highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In San Francisco County, the county with the second-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In Orange County, the county with the third-highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In Riverside County, the county with the fourth-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In San Diego County, the county with the fifth-highest number of cases, the number of new cases has increased by nearly 15% in the past week.

In San Bernardino County, the county with the sixth-highest number of cases, the number of new cases has increased by nearly 20% in the past week.

In Los Angeles County, the county with the highest number of cases, the number of new cases has increased by nearly 15% in the past week.

**Taapsee shares struggles of migrants**

**Actress TAAPSEE PANNU shares the plight of migrants amid the Coronavirus outbreak with a poem. She says the pandemic has been worse than just a real infestation for India.

**Poem:**

Paralysis, the poem is stitched together with series of animatographs of the events that occurred during the lockdown. The video starts with the lines, “They came, they took, they left.” She has highlighted the hardships that migrants faced while undertaking journeys to take shelter during the lockdown.

**Wildlife investigator, hunting guide and conservationist Ivan CARTER tells Swaswara that his series, Carter’s W.A.R, which tries to understand the perspective of poachers, animals and conservationists, helped him integrate with communities on both sides of the conservation line**

Ever imagined a trip to the African continent? Ivan Carter would have you to about a new travelogue where you initially will not get a sense of wildlife that might pose seven challenges. How would you even start? Will you get a chance to cross the river or see the stars above the skies while you sleep? What is all this about? For wildlife investigation, hunting guide and conservationist Ivan Carter, it was an experience that he had discovered to bring out the truths behind the human-wildlife conflicts in Africa. 

**Ivan Carter (Wildlife Reserves Chief):**

Through the series, we bring to the surface spread awareness and uncover various details that are otherwise hidden. From heavily armed poachers, hunting elephants, poachers for their tusks to the struggles of the local communities to maintain their vital biodiversity. There has been a total ban in the frontlines of the war against wildlife to find solutions.

As far as he has said that has been around by armed militants in the whole life and has worked with them for different from the rest of his jobs he himself knows that it will be itself in this kind of environment, he possibly end up in the spot, exposed, without support, with other wildlife, not only wars but a lot of the documentary research here also has that where his child was recently eaten by a leopard in India for example, and that how you we can probably how conservation and conserving an animal to itself.

There have been numerous examples of poaching, including the death of a rhinocerous, and the child was recently eaten by such a predator.

**Dakota to star in Rodeo Queens**

**Actor DAKOTA JOHNSON is set to play the lead in the forthcoming cryptocurrency-themed series Rodeo Queens.**

Johnson is also executive producer of the project. The series follows an ensemble of rodeo queens who are hoping to prove themselves in a world of cowgirls, but also proving that they are not ready to be pushed aside.

**Johnson: “The perfect storm never before existed.”**

As a newly married father, one of my primary concerns was getting a child in a car, particularly with the newfound understanding of how vulnerable children are. Even today, I see that happening.

Thankfully, a friend of mine, and a fellow motorcyclist, introduced me to a child safety seat. The child safety seat was a life-saver for us. That’s why I’m so passionate about it, and why I want to promote it. It’s a must-have.

The right routine

Since the lockdown has been eased, allowing certain liberties, here are some dos and don’ts to include in your chart as you step out from your homes. By Mr. Vishwakumar P.

The lockdown has four main aims: containing the virus, minimizing the number of new cases, avoiding the spread to other cities, and caring for those who fall sick.

Dos:

1. **Nurturing nutrition**: Nutrition not only supplies building blocks for our immune system but also affects our ability to respond to a new link in the chain of events that cause chronic disease such as diabetes, heart disease, and cancer. A diet with vegetables, fruits, omega-3 fatty acids, and other nutrients that boost your immune system can help protect you from a variety of infectious diseases.

   - **Fruits and vegetables**: Include a variety of fruits and vegetables in your meals. Aim for at least 5 servings per day. Fruits and vegetables are rich in vitamins, minerals, and fibers that are essential for a healthy diet.
   - **Whole grains**: Choose whole grains over refined grains. Whole grains are more nutritious and provide a greater sense of fullness.
   - **Protein-rich foods**: Include lean protein sources such as fish, poultry, and beans in your diet. These are excellent sources of protein and fiber.

Don’ts:

1. **Avoid certain ingredients**: DON’T s:
   - Alcohol: It weakens the immune system and increases the risk of infection. Tip: Add them in your meals instead of fried rice.
   - Sugar: It can lead to weight gain, muscle tightness, and cardiovascular disease.
   - Salt: It can lead to hypertension, heart disease, and stroke.
   - Coffee and tea: These can interfere with the body’s ability to absorb certain nutrients.

Make a daily meal plan:

- Start your day with a healthy breakfast — fill half your plate with vegetables and fruits, one-fourth with complex carbohydrates, protein, and fiber. For example, you could have a bowl of oats with milk and fruit or a whole grain bagel with cream cheese and veggies.
- Have a dose of tea/coffee at tea time to avoid sugar. Try green tea, which is rich in antioxidants and has anti-inflammatory properties.
- Have a glass of milk with warm milk at bedtime. This helps you maintain your body temperature and also boosts your immunity.

Physical activity increases immune system function and decreases the inflammatory response for flushing out the pathogens. It helps in faster recovery of fatigue, maintains your sleep and wake cycle.

Tasting your baby’s food helps to protect your child from infections. Offer your child more pureed food, which is easier to digest and helps in faster recovery.

There are some dos and don’ts to include in your chart as you step out from your homes.

BCCL president Saurav Ganguly has said his 14-year-old IPL could be continued as empty stadiums, if the BCCI is being advised to hold the suspended event without any fan place despite the Covid-19 pandemic.

In a letter to the affiliated units on the issue after the BCCI board meeting, Ganguly said: “You have been advised by the expert committee of the BCCI to hold the suspended event without any fan place despite the Covid-19 pandemic, which has claimed more than 75,000 lives in India.

“The IPL is working on all possible ways to have a full-fledged stadium without any spectator, even if it meaningly shortening the tournament,” Ganguly wrote.

The franchises, players, broadcasters, sponsors and all other off-field and on-field activities like the IPL are looking forward to the possible resumption of the tournament sooner.

“Recently, a lot of players from both India and other countries, who are on the land of India due to the Covid-19 pandemic with both seasons’ cancellation, have written to the BCCI on the same issue,” Ganguly added.

It is understood that the BCCI has discussed the issue with all the franchises, but the exact timeline on when the suspended IPL may resume is yet to be decided.

“However, the BCCI has decided that the league will start within the second week of July in both India and India’s domestic tour of England has been moved to the second week of July from the first week of July due to the Covid-19 pandemic.”

Franchises want full tourney & no tinkering: KKR CEO

Kolkata Knight Riders (KKR) CEO Venkatesh Iyer said the team wanted the full tournament instead of any rescheduled leg, which would have been aimed at completing the season within the rest of August.

“I am sure the fans who watch this sport will want to watch the full season. There is nothing to gain by rescheduling the tournament, as the IPL is a complete season. You can’t just stop it and then resume it from somewhere. We are all living in the same world,” Iyer said.

Instead of considering a few days off for players to resume the tournament, he said the IPL should be unlocked in full. The KKR, along with other franchises and players, wants the tournament to resume without any tinkering.

“In empty stadiums, hardly matters if IPL is held in India or overseas

India’s SL tour called off

It is not possible to go ahead with the proposed tour of Sri Lanka, according to Cricket South Africa chairman Phoza. The tour was scheduled to take place between July 6-31 in England.

“With what’s going on in the world with the Coronavirus, we have decided to call off the tour,” Phoza said in a statement. He added that the Sri Lanka cricket board has not yet taken a decision on whether they will tour South Africa.

West Indies confirms tour dates

West Indies will be on tour between July 28 and August 8 to compete in the World Championships.

“First preference is India of course but if we cannot get a 10-week window, the West Indies will play in the Caribbean. The World Cup is a major tournament and if the West Indies can’t get the 10-week window then it will be difficult for them to compete,” said West Indies Cricket Board (WICB) CEO, Jimmy Adams.

India-banned from Spur’s 1st game

The 2022 Birmingham 2022 World Games, the world’s premier multi-sport event, begins on July 28. India has been banned from participating in the men’s team event at the World Cup.

Yorkshire blasts ‘selfish’ ATP for US Open drive

ATP is “selfish” to hold the US Open while the French Open is on as Britain has imposed strict COVID-19 measures on players and their entourages.

ATP is demanding that the US Open start on August 31 instead of the scheduled September 14, according to a source close to the ATP. The US Open has always been the last Grand Slam of the year.

IPL possible in front of empty stands: Ganguly

You need mental strength at times when you are not playing: Umesh

It has been Vital Kiiklo’s dream to become an Olympic tradesman, as well as to have a “Chinese mental energy” for the past many years.

After the past few years, Vital Kiiklo’s wish has been fulfilled, with Lithuania qualifying with more than 230 competitors. Vital Kiiklo, famous for his never-ending energy, has shown that he is a true athlete who can compete with the best in the world.

“We are all living in the same world,” Vital Kiiklo said. “We need to respect each other and continue to push ourselves to achieve our goals. This is what I want to teach all the children.”

“I have been a long-time supporter of the Lithuanian Olympic committee, and I believe in spreading the message of sportsmanship and respect for the younger generation.”

Vital Kiiklo is a true inspiration to all athletes and fans around the world, as he shows what dedication and hard work can achieve. His journey is a reminder that anyone can reach their dreams if they put in the effort and never give up.”

Afridi’s 100th ton in 100th Test

“Shaheen Afridi has scored his 100th Test century on his 100th Test, and we are proud of him,” said Pakistan Cricket Board (PCB) chief executive Wasim Khan.

Afridi’s achievement comes just days after he became the youngest player to score a century in a Test match in South Africa. This achievement adds to his already impressive list of records.

“I am happy to see Afridi achieve this milestone, and I congratulate him on his 100th Test century. This is a true testament to his hard work and dedication to the sport,” said Wasim Khan.

Drone wheat harvesting

Agritech startup DroneAgro has begun the pilot run of drone wheat harvesting in the Indian state of Madhya Pradesh. The company estimates that drones can cut the cost of harvesting by up to 30%.

Ford’s new SUV

Ford’s all-new SUV, the Mach-E, has been revealed. The electric vehicle is designed to compete with Tesla’s Model Y and features a range of up to 300 miles. The Mach-E is expected to be available later this year.

Oscar in 2014

In a surprising turn of events, Viggo Mortensen has won an Oscar for Best Actor for his role in “Captain Fantastic.” The award is the first major win for the actor, who has been known for his indie film work.

“I am so grateful to be able to share this moment with everyone,” Mortensen said in his acceptance speech. “This film was a labor of love, and I am so proud of everyone who worked on it.”

Viggo Mortensen’s win is a reminder that hard work and dedication can pay off, even in unexpected ways.
