57.12L workers given jobs under MGNREGA projects

The UP Pradesh government has announced that 57.12 Lakhs workers under MGNREGA projects are going to be given jobs in the state. This decision is made in the wake of the COVID-19 and is likely to be followed by similar steps taken by the central government through the relief package.

According to Ravi Shankar Prasad, the Union Minister of Electronics and Information Technology, in a video conference with the activities of his party fellow members, the UP government has been given a mission to engage 57.12 Lakhs of employment, and so far 4.93 crores man days of employment have been created. Chief Minister Yogi Adityanath regularly holds high-level meetings to review the Covid situation in the state. In one of his meetings, the minister was apprised of the Rural Development Department development that as many as 16.5 crores man days were linked to employment in the state. These projects are being implemented under MGNREGA (Mahatma Gandhi National Rural Employment Guarantee Act) Scheme. An additional 10 lakhs of jobs will be created under the scheme in the next month.

Earlier, while chairing the meeting of state-level government officials, the minister had asked them to link women to the road development project under MGNREGA and provide employment to the grass root workers. He said there would be no shortage of work under the scheme. In addition to these, health and social welfare schemes are also going to be implemented. The state government has already been able to start the process of issuing work cards to the migrant workers to ensure food security for them. The chief minister also asked the minister and other officials to link these workers to the state's welfare schemes.

MGNREGA projects, which are linked to the activities of the state governments, electricity consumers, state regulatory commissions, the Central electricity authority, the state electricity boards, and some other organizations, have been given the task of providing employment to the workers. The Rural Development Department is working to expedite the process of issuing work cards to the migrant workers to ensure food security for them. The chief minister also asked the minister and other officials to link these workers to the state's welfare schemes.

The CM also asked the officials to keep the scheme in mind while the government is working on the matters related to the state's welfare schemes. The chief minister also instructed the officials to ensure that the workers are given jobs in the state which is the highest in the country.

AFIP urges PM to withdraw Electricity Bill

The power engineers of the country have appealed to Prime Minister Narendra Modi to withdraw the Electricity (Amendment) Bill, 2020 and the money bill, 2020 has been introduced in the Lok Sabha. The Bill seeks to amend the Electricity Act, 2003, and to empower the states to appoint members of state regulatory commissions. According to the Bill, at least one regulator from the state regulatory commission must be elected from amongst members of the commission.

Shivpal Yadav, Member of Parliament (MP) from Lucknow (UP), and a member of the UP Congress, said on Monday that the Bill will not only affect the work of the state regulatory commission but also the people in the state. He said that the Bill is not in the interest of the people and the state regulatory commission.

In a letter written to the prime minister, Yadav said that the Bill is not only against the principles of power, but it is also against the principles of public service. He said that the Bill is not in the interest of the people and the state regulatory commission.

In the last couple of days, the all-party meeting of the state regulatory commission has been increased in the state. On Saturday, 93 cases were reported from Noida, followed by 214 cases from Ghaziabad, 72 cases from Ghaziabad, 17 cases from Ghaziabad, and 4 cases from Ghaziabad. A total of 1,032 cases were reported from Ghaziabad, 1,134 cases from Ghaziabad, 2,974 cases from Ghaziabad, 5,074 cases from Ghaziabad, and 8,547 cases from Ghaziabad.

STF nabs kingpin of female recruitment racket

The Madhya Pradesh special task force (STF) has arrested a kingpin of a female recruitment racket in the state, the police said on Monday. The arrested kingpin, accused of running a racket, was nabbed in Raipur, Chhindwara and MPTC seat (Malegaon) with the help of the Raipur and MPTC police. The police said that theSTF team is working on the investigation to recover the racketeers' properties.

Four teachers were arrested from Mango Pack House in Lucknow, according to the Lucknow Mango Growers' Association. The association's president, Anand Kumar Jha, said that the four teachers, who were initially employed at the temple premises, were later contracted to work at Mango Pack House.

The four teachers were suspended due to the use of forged documents. The association has ordered a full-fledged investigation into the matter. The teachers have been working at Mango Pack House for over a year. The employment of the teachers was suspended for four months, and they were arrested for using forged documents.

Land acquisition e-way begins

The Lucknow Municipal Corporation (LMC) has started the e-way process for land acquisition for the construction of an expressway. The e-way process is an initiative of the government to streamline the land acquisition process and ensure transparency.

The e-way process involves the electronic generation of a unique number for each land parcel, which is then used for the documentation and transfer of ownership. The e-way process is expected to reduce the time taken for land acquisition and streamline the process.

Anu Shankar, the Additional Director of Land Acquisition, said that the e-way process will help in the transparent and efficient management of land acquisition. Shankar said that the process will be implemented across the city, and all land parcels will be covered.

The e-way process is part of the Lucknow Metropolitan Development Authority's (LMDA) plans to develop infrastructure in the city. The LMDA is working on various projects, including the construction of an expressway, to improve the city's infrastructure.
Local train services resume in Mumbai after 84 days

The Western and Central Railways have resumed their services in Mumbai after 84 days with the state government allowing only essential services. The rail services, which were suspended due to the coronavirus pandemic, were reinitiated to cater to the essential category suburban lines. The rail services were suspended on March 22, 2020, and the Western Railway resumed its services on Monday, while the Central Railway resumed its services on Tuesday.

The resumption of suburban train services is a significant development, especially for employees of the Maharashtra government, who have been working from home due to the pandemic. The resumption of rail services will enable them to commute to work without fear of being exposed to the virus. The rail services will also help other essential workers who need to commute to work.

The rail services were suspended in Mumbai in March 2020 due to the coronavirus pandemic. The rail services were resumed in other cities, such as Delhi, but not in Mumbai until now. The resumption of rail services in Mumbai is a welcome development, and the state government is to be commended for its efforts to ensure the safety of the public.

The rail services will operate from 5:30 am to 9:30 pm, and the frequency of the trains will be increased gradually. The rail services will operate from Monday to Saturday, and the services will be closed on Sundays. The rail services will operate from Monday to Saturday, and the services will be closed on Sundays.
A series of COVID-19 patients including a government employee have been detected from Delhi. A total of 24 patients, including two government employees, have been diagnosed with the virus in the city in the last 24 hours. Of these, one has been discharged. With this, the total number of positive cases in Delhi has reached 269. Out of these, 213 have been discharged, leaving 60 active patients. Delhi’s overall positivity rate (MC Mackal Ramesh) has improved to 1.97%.

According to the latest information from the Delhi Microbiology department, 32 positive samples have been received. Among the negative reports, 12 samples were collected from Ramjas College, 11 from JNU, 7 from UGC, 2 from JNU, and 1 from GBPUA&T. The 60 active patients are currently doing safe and sound under the watch of doctors. The 269 positive patients have been admitted to various hospitals in the city.

While the new cases have lowered, the death toll of COVID-19 patients has increased to 40. A 77-year-old woman from the Kishangarh area passed away after succumbing to the virus. Another 75-year-old man, a resident of the Nangloi area, also passed away in the same way.

健康教育 (Health Education) in the city has been emphasized. The Health Department has arranged a series of campaigns to guide the people about the precautions to take against the virus. The campaigns are being successful and the people of the city are actively participating in them.

District-wise information is as follows:

- **Central Delhi**: 13 new cases and 2 recoveries.
- **North Delhi**: 19 new cases and 2 recoveries.
- **Northwest Delhi**: 17 new cases and 2 recoveries.
- **West Delhi**: 20 new cases and 2 recoveries.

17 new coronavirus positive cases reported in Kanpur

The health department of Uttar Pradesh has confirmed 17 new coronavirus positive cases in Kanpur. The positive cases include 13 men and 4 women, with the age range between 20 and 45 years. None of the cases were reported from the hospital. The positive cases are from different parts of the city, including Manda, Chhatalpur, and Bhathpur.

Medical facilities in the city are fully functional, with the hospital and local health departments taking all necessary precautions to contain the spread of the virus. The city administration has also announced a lockdown in the affected areas to prevent the spread of the virus. The health department has also advised people to stay at home and follow all necessary precautions to prevent the spread of the virus.

Kanpur District Magistrate Dr. Parul Yadav has appealed to the public to remain cautious and follow all necessary precautions to prevent the spread of the virus. She has also advised the public to follow the guidelines of the health department and to report any symptoms of the virus to the nearest hospital.

The health department has also advised the public to avoid large gatherings and to maintain social distancing. The government has also issued an advisory to all citizens to wear masks and to follow all necessary precautions to prevent the spread of the virus.

The health department has also advised the public to follow all the necessary precautions to prevent the spread of the virus.

One person died and two others recovered in a coronavirus related incident in the city. The health department has also advised the public to follow all the necessary precautions to prevent the spread of the virus.

The health department has also advised the public to follow all the necessary precautions to prevent the spread of the virus.

India, China raised nuclear stockpile: SIPRI

Pioneer News Service

India and China have raised their nuclear stockpiles, which has raised concern among security analysts. The Stockholm International Peace Research Institute (SIPRI) has reported that both countries have increased their nuclear arsenals. India's stockpile is estimated to be around 13,400 nuclear weapons, while China's is around 2,500. This increase has led to a so-called nuclear triad between the two countries, setting the stage for a new era in regional arms control.

Nuclear warheads are stored in silos, underground bunkers, and on submarines. This triad model involves multiple delivery systems, which increases the chances of deterrence. Each country has developed a mix of nuclear weapons, with India focusing on missile-based systems and China also developing its own submarine-launched ballistic missile (SLBM) arsenal.

The increase in nuclear arsenals has raised concerns about the potential for a first use or miscommunication among leaders. India's stockpile is reportedly larger, with an estimated 13,400 nuclear weapons, compared to China's 2,500. This imbalance could influence strategic calculations and increase the risk of miscalculation.

Security analysts have warned that the increased nuclear tension could spill over into other areas of conflict, such as the territorial disputes over the Line of Actual Control in the Galwan area. The two countries have maintained a delicate balance of power, where any miscalculation could lead to an escalation.

The increased nuclear stockpiles have caught the attention of the international community, with concerns about the potential for a first use or miscommunication among leaders. India's stockpile is reportedly larger, with an estimated 13,400 nuclear weapons, compared to China's 2,500. This imbalance could influence strategic calculations and increase the risk of miscalculation.

Depressed India

As we live in troubled times. The master of wholesale bungling is nothing if not efficacious in discharging the task of exaggerating the aggregate of our tribulations. To begin with, the situation is evident to the point of being insufferable. We are now living in an age of unrelenting economic hardship. The livelihoods of our people are threatened. The country is facing a crisis of unprecedented proportions. We are dying inside and outside. The only thing that is left is the hope that something can be done.

I ternational political relationships is a topic that has not been sufficiently addressed, at least not in the way that it should be. Particularly in the context of the pandemic, with its overwhelming impact on the world, it is crucial to understand how these relationships are shaping and being shaped by the virus. This article seeks to explore some of these dynamics, with a focus on China and India, two countries that have, to varying degrees, embraced different strategies in managing the pandemic. India, under the leadership of Prime Minister Narendra Modi, has taken a more aggressive posture, pursuing a “war on coronavirus” approach that emphasizes testing, tracking, and quarantining. China, under the leadership of President Xi Jinping, has taken a more contained approach, focusing on lockdowns and border closures.

The article begins by examining the role of the United Nations in coordinating global responses to the pandemic. It notes that while the UN has been a key player in the global response, it has faced challenges in effectively coordinating efforts across countries. The article then goes on to discuss the leadership of Modi and Xi, highlighting their different approaches to managing the pandemic. The article concludes by arguing that the outcomes of the pandemic will depend on how countries work together to contain the virus and respond to its impacts.

In summary, the article provides a nuanced analysis of the complex interplay between international relations and the pandemic, offering insights into the different strategies adopted by India and China and the implications for global cooperation. It also raises important questions about the role of the UN and other international organizations in facilitating a coordinated response to the pandemic.

The article ends with a call to action for policymakers and other stakeholders to work together to contain the virus and mitigate its impacts, recognizing the interdependence of global efforts in achieving these goals.

The article is a valuable contribution to the ongoing dialogue on the pandemic and its implications for international relations. It highlights the importance of cooperation and coordination among countries in managing the crisis and provides a framework for understanding the different approaches and outcomes.

The article is a must-read for anyone interested in international relations and the pandemic, offering insights into the complex dynamics at play and the critical role of cooperation in responding to the crisis.
In a significant trend in the Indian housing market, the difference between the ready resale rates (RR) or circle rates and the market values of property in the major cities has been reduced over the past few years, according to a report by Anarock Property Consultants. The report showed that over the past five years, RR rates have come much close to the market price of properties.

It noted that from a more than 100% difference in the two rates in certain areas in Shimbhur, Pune, Gurugram and others in 2019, some localities now show a more 6% difference. The report cited a 2019 study by the Government of India, which found that circle rates decrease with increasing property values in certain areas. The report concluded thatRR is not linked with the property values in all the cases as it was claimed by the Government in some cases.

Gurugram saw a circle rate rise by 43% in the last four years, from Rs 2,990 per square foot in 2016 to nearly Rs 4,333 per square foot in 2020. However, market values increased only marginally in the same period. The average circle rate of Gurugram is Rs 4,154 per square foot and currently stands at Rs 7,710 per square foot, an increase of 84% in the last four years. The market value of Gurugram is Rs 7,710 per square foot, an increase of 80% in the last four years.

He said that registering a property below circle rates is not punishable. Section 45A of the T-A Act says that developers or sellers will attract penalties for selling below the circle rates. However, mortgage lenders, who allow such lending, are not penalised. In cases of property below the circle rates, the banks will offer an additional tax exemption, but the price is not reduced to the level of the circle rate. The report noted that a number of banks reduced stamp duty on properties in Gurugram and other locations, and demand for such properties has risen significantly.

The report also noted that in Gurugram, there are instances in which buyers do not have to pay stamp duty, while in other locations, stamp duty is charged. The report stated that the stamp duty is charged on the circle rate, not the market value.

Indian market plunges tracking global peers as Covid fears deepen

Bears on Monday crashed over 1.6% as fear of second wave of coronavirus infections globally deepened pessimism over economic recovery hopes.

"Accordingly, we expect the central banks to continue altering the policy stance. In the context of fiscal policy, we do not expect to see a massive fiscal package," rating agency ICRA said.

Accordingly, ICRA has cut the growth forecast for FY 2021 FY21 to 10.5% from 10.7% in its report released on Wednesday. While the agency maintained the pace of fiscal spending, it said it was not enough to support growth in an environment of rising fiscal deficits and the loss of revenue. "It is likely that the government's fiscal stimulus measures, in combination with the central bank's measures, will help capture the momentum in the economy," ICRA said.

The agency maintained its stance on the rupee at 70, by June 2021.

Indian stock benchmarks on Monday crashed over 1.6% as fear of second wave of coronavirus infections globally deepened pessimism over economic recovery hopes.

"Accordingly, we expect the central banks to continue altering the policy stance. In the context of fiscal policy, we do not expect to see a massive fiscal package," rating agency ICRA said.

Atlanta shooting, statues and new focal points for protests

Atlanta's mayor and a prominent civil rights leader are blasting plans to install new monuments in the city as the latest in a series of developments that has led to increased tensions in the city, which is grappling with how to honor its history.

The announcement of a new monument in Atlanta to celebrate the life of the civil rights leader Martin Luther King Jr. has sparked a backlash from some members of the city's African American community, who see it as a way to reframe the city's history and gloss over the pain of segregation and racial inequality.

The mayor, Keisha Lance Bottoms, has said that the new monument will be a way to celebrate King's legacy and to honor the contributions of the city's African American community.

But civil rights leaders and some members of the city's African American community have raised concerns about the monument, saying that it will reframe the city's history and gloss over the pain of segregation and racial inequality.

Some members of the city's African American community have also raised concerns about the use of King's image in public spaces, saying that it can be used to reframe the city's history and gloss over the pain of segregation and racial inequality.

The phenomenon of monuments and statues being removed or toppled in the wake of the George Floyd protests has raised questions about the meaning and purpose of public monuments. While some argue that they serve as a reminder of the past and should be preserved, others say they are symbols of oppression and should be removed.

In Atlanta, the debate over monuments is ongoing, with some calling for the removal of a statue of Confederate General Robert E. Lee and others opposing any changes.

The Atlanta shooting, which took place in early October, has sparked a national debate about race and violence, with some calling for new legislation to address the issue.

The shooting, which occurred in a Georgia Wendy's restaurant, has sparked a national debate about race and violence, with some calling for new legislation to address the issue.

The COVID-19 is an infectious disease with a high incidence in the world and approximately 20-30 percent of the COVID-19 cases show mild symptoms. All serious viral respiratory illnesses may be complicated with severe courses and may result in death or in chronic airway diseases in which COVID-19 may impact the brain.

- Direct infection of the brain or the brain or nerves by virus itself. For example, Loss of smell is a very prominent feature of late-stage COVID-19 that can be the beginning of infection of COVID-19.
- Immune-mediated brain injury in the brain or nervous system. Studies have shown that multiple circulating proteins in blood, brain attack, pro-inflammatory cytokines, and other complications.

A stroke occurs when there is an interruption of a flow of blood to the brain either due to reduced or hemorrhage. It can be often kill brain cells if not treated immediately.

Symptoms of an inhibition from an inability to move one side of the body to difficulties speaking or forming words.

- Do not delay treatment.

- Simple patients may experience sudden recovery if you are not appropriate treatment within the golden hour (four-five hours) for intravenous thrombosis and six hours for mechanical appropriate treatment within the golden hour (four-five hours).

A 40,000-watt mountain of photographs, the National Geographic Society’s 20th International Photography Competition is among the world’s largest photo competitions and is a chance for anyone with a camera to take part.

The competition is open to all photographers, whether professional or amateur, and all entries are evaluated by a panel of judges.

The competition is divided into five categories: Nature, Wildlife, People, Insider’s Eye and Underwater.

The winners of each category will receive a year’s subscription to National Geographic magazine, a cash prize, and a trip to Washington, D.C., to attend a ceremony honoring the winners.

The competition is open to entries from anywhere in the world, and entries can be submitted online from April 15 to July 15, 2021.

The competition has provided a platform for photographers to share their stories and capture the beauty of the world around them.

In 2020, the competition received more than 35,000 entries from 150 countries, and the winners were announced in October.

The competition is an opportunity for photographers to showcase their talent and inspire others with their work.

For more information, visit the National Geographic Society website.
Djoker breaks down in tears at his event

E

Ntronic Novak Djokovic was in tears at an enthusiastic home crowd in Belgrade on Monday after the 11-time Grand Slam champion had been leading his Serbian teammates to the Balkans charity tennis tournament.

"I am not crying because I won't be selected for the US Open tournament, but because I have been part of this campaign," Djokovic said.

Djokovic, 33, who has pulled out of the US Open, which begins this week, put on a brave face as he appeared in front of around 6,000 fans packed into the National Tennis Centre in Belgrade.

"I am so grateful to everyone who has supported this campaign," Djokovic said.

The Serbian's tournament in Belgrade on Monday was the first since he tested positive for COVID-19 in late May.

"Today I have broken down in tears and thanked everyone who was there," Djokovic said.

The 11-time Grand Slam champion said his parents and two of his coaches had been tested positive for COVID-19.

"We will help others who have been affected by the virus," he added.

However, Djokovic was also asked to comment on the recent outbreak of the virus in the country,

"I would like to thank everyone who has been working hard to control the virus," he said.

"We are working together to ensure that everyone stays safe.
