China’s new fronts in eastern Ladakh

Satellite images show Chinese infrastructure in Galwan, Depsang: no official reaction so far

PMO NEW DELHI

Even as the two sides have been engaged in disengagement along the Line of Actual Control (LAC) in eastern Ladakh, the People’s Liberation Army (PLA) has been forced to retreat from its positions at Pangong Tske Rechgaa-Tso, Tso Kar, along the McMahon line. This has left a significant portion of the eastern Ladakh region in India.

The tension between India and China in eastern Ladakh had escalated after the Chinese had built up their positions on banks of Pangong Tso, which is India’s territory. India and China were holding disengagement talks in eastern Ladakh on Thursday.

India has said that the Chinese troops had withdrawn well within the lines agreed in the disengagement process.

China continues to build up its military presence in eastern Ladakh, as visible from recent satellite images. The Chinese have built a series of structures, including bunkers and tunnels, along the border with India.

“China continues to build up its military presence in eastern Ladakh, as visible from recent satellite images. The Chinese have built a series of structures, including bunkers and tunnels, along the border with India.”

China’s strategic move comes at a time when the Indian Army has been put on high alert, with reinforcements being rushed to the border. The Indian Army is preparing for a prolonged standoff with the Chinese, who are expected to continue building up their military presence in the region.

India, on the other hand, has deployed additional troops and reinforcements in the region to meet the challenge. The Indian Army has been put on high alert, with reinforcements being rushed to the border. Chhattisgarh Chief Minister Bhupesh Baghel on Wednesday dedicated to the public one of the biggest Solid Waste Management (SWM) projects of the state. Nearly 30 lacs of tons of waste will be disposed of with added scientific technique. The project is primarily based in Raipur city and is expected to be completed within 15 years.

Baghel said that every day nearly around 1,000 tons of mixed waste is being transported through 213 collection points by 300 vehicles and 250 trishaws.

For the entire project, the government has sanctioned Rs 1.55
crore. Presently, door-to-door waste collection is on in all 24 wards of the city. All the door-to-door waste vehicles come to transfer stations and carry the residue in a portable container which is taken by the respective municipal corporation to the respective waste processing units.

The company has given a 30 years land lease agreement. In this processing plant, 2.5 lacs of Domestic Solid Waste (DSW) and 0.5 lacs of Industrial Waste (IW) will be processed. The company has also assured that the waste treatment will be scientific, safe and eco-friendly.

The Chhattisgarh government has offered 75
cyber for scientific processing of waste from each household and organization would ensure 100
coms of waste and 960 other organizations.

Parwani urged the captains of Indian industry to join the movement to boycott Chinese goods.

Personnel and staff imports four category of products from China— limited use goods, single material goods, raw material goods for assembly of goods in India and technology driven products. The CAIT which launched the campaign on June 18, has targeted Chinese goods in a phased manner.

In the first phase, it has identified Chinese goods from an abhorred list of about 100 categories of products which have been banished. These categories have already been eliminated in the market.

A future-way to end India’s water crisis

If water is not placed under the cash nexus when it is in short supply, people will go thirsty till there is water or copper or coal.

PREPARE NOW FOR WHAT LIES AHEAD

We need to plan for the multiple waves of the pandemic that will hit us once the Indian economy opens up completely.

Aayog, all of the largest cities in India face a water crisis and this unfortunate situation is driven by a combination of factors, including climate change, urbanization, and rapid population growth. These factors have led to an overwhelming demand for water resources, which has in turn led to a decrease in the availability of water.

The situation is exacerbated by the fact that many of these cities are also facing a water crisis due to the lack of proper infrastructure and a failure to manage water resources effectively. This has led to a situation where the cities are unable to meet the demand for water, leading to a shortage of water.

The situation is not likely to improve in the near future, as the demand for water is expected to increase due to population growth and urbanization. Therefore, it is essential to take immediate action to address the water crisis in these cities.

Some possible solutions to the water crisis in these cities include:

1. Developing new sources of water: This includes exploring alternative sources of water such as desalination plants, rainwater harvesting, and ground-water recharge. These methods can help to increase the availability of water and reduce the demand for it.

2. Improving water management: This includes developing effective water management plans, improving water distribution networks, and ensuring that water is used efficiently.

3. Promoting water conservation: This includes implementing water conservation measures, such as water-efficient appliances and fixtures, and promoting the use of water-saving technologies.

4. Encouraging water reuse: This includes developing systems for water reuse, such as greywater recycling and wastewater treatment, to reduce the demand for water.

In conclusion, the water crisis in these cities is a serious problem that requires urgent action. It is essential to develop and implement effective solutions to address this crisis and ensure that the cities have a reliable and sustainable water supply in the future.
Indian military participate in Victory Day Parade in Russia

DEFENCE MINISTER Rajnath Singh was on Saturday present in Moscow as a special guest in the Russian Federation for the Victory Day Parade at the Luzhniki Stadium. The Defence Minister arrived here on Friday for a three-day visit to attend the celebrations.

The Russian armed forces will stage a military parade on Saturday to mark the 75th anniversary of their victory over Nazi Germany in World War II. There will also be a flypast by military aircraft and a show by land-based forces.

The visit of the Defence Minister is also to review the preparations taking place for the visit of a larger contingent of the Indian military, comprising the Indian Army, the Indian Air Force and the Indian Navy, for the military parade on the 75th anniversary of Victory Day, to be held on May 6, 2021.

The Defence Minister will also have meetings with his Russian counterparts to review the ongoing and planned defence cooperation between India and Russia.

The Defence Minister on Saturday had also attended the Russian President’s gala dinner in Moscow.

Indian security agencies are effective in disrupting terror threats despite some gaps

The Ministry of Home Affairs, in its report titled ‘Disrupting Terror Threats Despite Some Gaps’, said that Indian security agencies have been effective in disrupting terror threats despite some gaps. The report attributes this to the strong commitment of the government, the intelligence agencies, and the law enforcement agencies.

The report highlights the successful thwarting of several terror threats, including the one that led to the Pulwama attack in 2019. It also notes the success of the intelligence agencies in tracking down the masterminds of past terrorist attacks.

The report further states that the Indian security agencies have been successful in disrupting terror threats despite some gaps, such as a lack of coordination among different agencies and a shortage of resources. However, it also highlights the need for better coordination and cooperation among different agencies.

The report concludes that while there are some gaps in the current system of counter-terrorism, the Indian security agencies have been successful in disrupting terror threats despite these gaps.

US citizens likely to be left out as Europe recovers borders

A makeshift field hospital in New York City. AP

Amidst uncertainty over the status of travel restrictions, US citizens are likely to be left out as Europe recovers borders.

European nations appear to be taking a hard line on travel restrictions, especially for Americans, as they try to ease restrictions on foreign travel.

In the US state of Arizona, for example, the governor has said that people in 11 days.

In the UK, the government has announced plans to lift travel restrictions for vaccinated travelers, but the US has yet to announce similar plans.

The US Department of Homeland Security has said that it will begin processing visa applications for migrants who have been approved for travel to the US.

US virus cases surge to highest level in 2 months

A person wearing a mask in a hospital. AP

A new coronavirus case in the US has pushed the total number of cases to over 4.5 million, making it the highest level in two months.

The new cases come as the US continues to face a surge in infections, with over 40,000 new cases reported in just the past week.

The US has been experiencing a steady decrease in the number of cases, but recent spikes have raised concerns among public health experts.

US authorities have been urging people to wear masks and practice social distancing, especially in areas where the virus is spreading rapidly.

The US Centers for Disease Control and Prevention has recommended that people wear masks in public and practice social distancing, especially in areas with high rates of transmission.

New York City continues to be the worst-hit area in the US, with over 20,000 new cases reported in the past week.

The situation is particularly concerning in New York City, where the number of cases has been increasing steadily in recent weeks.

The city has been urged to continue implementing strict public health measures to control the spread of the virus.
PFC Q4 net profit down nearly 80 pc to ₹693.7 cr

Prount Finance Corporation (PFC) reported a 76.4 per cent decline in consolidated net profit at ₹693.7 crore for the quarter ended March 31, mainly due to a fall in interest income. The company had posted a consolidated net profit of ₹2,397.2 crore in the quarter ended March 31, 2019. For the fiscal year 2019-20, consolidated net profit declined to ₹3,727.2 crore from ₹4,678.4 crore in 2018-19. For the quarter ended March 31, 2020, consolidated net profit stood at ₹2,228.4 crore from ₹2,410.6 crore in 2019-20. The fall in interest income is primarily due to transition to uniform regulatory lifting and Total income during the quarter under consideration increased by 4.5 per cent to ₹3,917.2 crore from ₹3,754.7 crore in the corresponding period of the previous year, and the net profit to turnover ratio improved to 17.7 per cent from 14.2 per cent in the same period of the previous year.

The company had on March 29 announced that it has filed a voluntary Amalgamation Scheme 2020 in respect of 44 tax disputes to resolve tax disputes.

In its letter to the company members, the company said its Board of Directors has decided to opt for the Amalgamation Scheme in respect of 44 cases, which are tax disputes, in order to maintain a capex spend of 10.5 per cent of gross capital expenditure.

IMF predicts India's economy to grow 4.5% in 2021

The International Monetary Fund (IMF) projected the global growth at 3.3 per cent in 2020, in line with its April forecast. The fund predicted a recovery in India's economy in 2021, with a growth of 5.4 per cent, down from 6.6 per cent in 2019. The IMF expected a recovery in the global economy in 2021, with a growth of 4.9 per cent, down from 5.4 per cent in 2020.

The fiscal policies in India have been supportive; the country’s recovery will be stronger in 2021, the IMF said. The fund added that it is important that India continues to maintain fiscal discipline and support the private sector.

Sensex snaps 4-day winning run

The benchmark BSE Sensex ended a 4-day winning streak at 48,702.94 points, up 170.77 points or 3.48 per cent, as the market was geared up for voting in the last phase of Lok Sabha elections. The Nifty also ended the day at 14,582.05 points, up 52.50 points or 0.36 per cent.

The rally has been attributed to gains in banks, auto and infra stocks.

Economy is expected to bounce back in 2021

The Indian economy is expected to bounce back in 2021 with a robust six per cent growth, more gradual than previously anticipated in April, the IMF said. The fund added that India’s economy is projected at 5.4 per cent, the more gradual than previously anticipated in April, the IMF said. The fund added that India’s economy is projected at 5.4 per cent, the IMF added.
I have been truly delighted to see that people are coming to the store that is not even in a developed area. Not too long ago, you had a wish list of all the things you wanted to buy but didn’t have the time to go out and look at them. If you missed out on a new product, you didn’t have the opportunity to purchase it. This is a proud moment for the Indian consumer, as in the past one in four was likely to buy from a single brand. But now, with the introduction of the Amazon marketplace, you can now purchase products from a wide variety of brands while staying at home.

Emma, Jack and Star in Robots

For today’s experience driven traveller, the Christmas season is the perfect time to celebrate. For the first time in India, the Trafalgar Square in Delhi, India is being transformed into a winter wonderland. The festive atmosphere, with its white lights and winter scenery, is sure to put a smile on the faces of all visitors. The Christmas season is a time for family and friends, and the Trafalgar Square is the perfect location to celebrate this special time.

The Challenges of Online Shopping

The online shopping experience has changed significantly over the past few years. With the rise of social media and e-commerce platforms, people are shopping online more than ever before. However, this has also led to an increase in online fraud and scams. It is important for consumers to be aware of these risks and take steps to protect themselves from online fraud.

Conclusion

In conclusion, the online shopping experience has changed significantly over the past few years. With the rise of social media and e-commerce platforms, people are shopping online more than ever before. However, this has also led to an increase in online fraud and scams. It is important for consumers to be aware of these risks and take steps to protect themselves from online fraud.
Along with transporting 62.5 lakh tonne food grains in two months from Punjab and Haryana to 18 other states, Northern Railway is restoring travel opportunities and improving punctuality.

The longest India’s railway in the country, the 'Pragati Express' (Locomotive no. 11249) on its way to Indian Railways' 71st foundation day on 25 June 2020, with President Ram Nath Kovind's message to all of India. The President's message was broadcast over the station's public address system.

This was the first time in 167 years of Indian Railways when President's message was broadcast over a railway station.
