6. Any person found violating this order shall be prosecuted as per the relevant provisions of law.
Troops’ movement suspended

10 lakh paramilitary personnel debriefed from leave, routine travel

The central paramilitary with a strength of 1.5 lakh personnel has ordered immediate debriefing of all troops for any kind of travel, all conferences and semi-regular meetings and training and work from home adhering to social distancing, the force said today. The order was issued after the Ministry of Defence said that 30 Indian soldiers in Bangladesh and 30 soldiers in Nepal had tested positive for coronavirus, and a number of officers and soldiers were found to be in close contact with the infected soldiers.

The order also said that all non-operational movements of the force’s personnel would be suspended till April 15. The order said these directives are aimed at ensuring prevention of coronavirus outbreak and keeping a watch on the movement of personnel.

The order also said that the force would be conducting medical examinations of troops living in close proximity and deployed in sensitive areas. The order also said that the force would be conducting medical examinations of troops living in close proximity and deployed in sensitive areas.

Capital's lockdown till March 31, essential health services open

Scheduled and unscheduled lockdowns have been imposed in various States to contain the spread of coronavirus. The government has said that the lockdowns are only temporary and will continue as long as necessary. However, the exact duration of the lockdowns will depend on the number of new cases and the response of the healthcare system.

Lockdown not enough, focus on detecting, testing

New Delhi: A World Health Organization report on Sunday said “Lockdowns are not enough to stop the spread of the virus and stop the pandemic. The focus should be on detecting and testing.”

The report stated that while lockdowns have played a role in reducing the spread of the virus, they are not a sufficient measure to contain the pandemic. The report emphasized the need for a more comprehensive strategy that includes testing, contact tracing, and isolation of infected individuals.

Exercise to update NUR, census likely to be put off

The exercise to update the NUR and census is likely to be put off as the outbreak of the novel coronavirus has led to a decrease in the availability of resources and manpower.

As the virus continues to spread around the world, governments are taking various measures to control its spread. However, the effectiveness of these measures remains to be seen. The world is currently in the midst of the worst public health crisis in modern history, and the situation is expected to get worse before it gets better.

Bengali orders full lockdown as corona cases leap to 7

Kumar Chellappan

The four districts of Jammu, which include the state capital Srinagar and north-western parts of the state, were placed under lockdown on Sunday morning. The additional deputy commissioner of Srinagar, Dr. N. K. Shefelt, said on Sunday that the lockdown was imposed due to a spike in coronavirus cases and to curb the spread of the disease. The lockdown came into effect at 6 am on Sunday and would remain in effect till 8 am on Monday.

The lockdown was imposed in four districts of Jammu, including Srinagar, Budgam, Ganderbal, and Pulwama. The lockdown was implemented in these districts due to a spike in coronavirus cases and to curb the spread of the disease.

The lockdown restrictions include the closure of all non-essential shops, markets, and commercial establishments. Only essential services like pharmacies, supermarkets, and other essential shops will be allowed to operate.

The lockdown also includes the closure of all schools, colleges, and universities. Only online classes will be allowed in these institutions.

The legendary footballer will always remain the pioneer for whatever little Indian football has achieved today.

Not many in today’s generation would dare to make the legendary Pradip Kumar Pradhan, who was known, but he was one of the charismatic footballers of his time. His reputation had golden days in India. So much so that he was even recognised with the lifetime achievement award by the AIFF. There are always a few who are held in high regard and always hold a special place in the hearts of fans and football lovers.

Pradip Pradhan’s footballing career was cut short due to his untimely death after they tried every medical option available to save him. Being the custodian of our nation’s pride, his passing away was a great loss to the nation. The country mourned the loss of a great sportsman who had dedicated his life to the sport he loved.

Towards his association with the English game, he wore his all caps with distinction, of course different in every form of the game he was shown. He could have built a career in the English game, but he chose to remain here and in the Indian football team. He was a great servant and always served the nation with a great sense of pride.

Use telehealth services now

As the Coronavirus pandemic grows, the Govt must actively endorse and advertise telehealth helplines to keep people away from hospitals.

FREDY REDDY

Mental health issues are the new worldwide concern. This pandemic has caused massive disruption and stress, which has further compounded the mental health conditions of individuals who were struggling before. In India, the demand for mental health services has increased manifold. It is imperative to provide easy access to mental health services and support during this unprecedented crisis.

Reddy is a Resident in Psychiatry at AIIMS, New Delhi.

T V RAMAPRASAD

2019 COVID-19 pandemic redefined the whole world to aoscillate between contradictory states of being. For the first time, far from being excluded from the Western medical system, the non-medical therapists, the non-Western therapists became first class citizens. From homeopathy to Ayurveda to naturopathy, from Chinese medicine to Spanish medicine, all are now on the same platform. The term ‘telehealth’ was born. Every discipline in medicine is now looking for the way to telehealth.

However, the West is not yet convinced. The doctors in the West are now in a dilemma. To a large extent, these doctors are not convinced about the concept of telehealth.

In fact, a bid to promote the use of telehealth, US President Donald Trump has said that all doctor visits will be telehealth visits. But the doctors will be getting paid for it. The doctors in the West are still not convinced that telehealth will become a reality.

The term ‘telehealth’ has been around for over a decade. It is generally associated with communication and healthcare services that use electronic information and technology to enable patients and health care providers to communicate over a distance. The term is often used interchangeably with the terms ‘virtual health’, ‘electronic health’, ‘remote health’, and ‘internet-based health’.

Telehealth services can be used to diagnose and treat a wide range of conditions, from minor illnesses to severe mental health issues. It can also be used to deliver health education and preventive care.

Despite the advantages of telehealth, there are some concerns about its effectiveness and safety. For example, there is a concern that telehealth may not be as effective as in-person care for some conditions, such as mental health issues.

Nevertheless, telehealth is a promising tool for delivering healthcare services, especially in remote and underserved areas. It can help to reduce healthcare costs and improve access to care for people who live far from healthcare providers.

Italy reports 651 new virus death, toll nears 5,500

WORLD STEPS UP RESTRICTIONS

Cases over 31

F rom Italy to the United States to Asia, governments rolled out tougher measures to combat surging coronavirus cases across the globe. Europe’s epicentre was the worst hit, with Italy and Spain bracing for a new round of lockdowns. Spain, with 132,000 people now dead from the virus, has faced its worst parliamentary session ever. In North America, six more states introduced lockdowns. East Asia was not left unscarred, as Japan and South Korea saw rising infections.

North Korea says US should improve contacts

North Korea says the United States should improve contacts with it, in response to comments by US relations officer (PRO) to the North’s Foreign Ministry, Jaiveer Singh, a security guard who was put under self-isolation in South Korea over the weekend.

In the farming community of Vidalia, Georgia, Dr. Susan Stander, a Covid-19 antibody testing site manager, said she was concerned about the potential for a counter-intuitive result. The government on Saturday suspended all international flights to and from China, and ordered strong quarantine measures on all airport arrivals. A U.S. government official said up to 40 flights per week could be impacted by the ban.

With 1,785 being treated in intensive care units for the virus, there is mounting concern among officials about overwhelming hospitals and the need for more intensive care beds. Last month, the South Korean government asked medical schools to increase their training capacity for Covid-19 specialists.

North Korea: Pyongyang’s spiralling virus deaths up 30% in one day

Madrid: Spanish on Sunday announced 394 new deaths and 5,571 new infections, bringing the total death toll to 17,299 and the total number of cases to over 136,000. The figures represent one of the highest daily death tolls recorded in countries under coronavirus lockdown. In Spain, while the number of deaths has dramatically risen in recent days, the number of infections has been slightly falling due to stricter measures. Spain recorded 394 new deaths and 5,571 new infections, bringing the total death toll to 17,299 and the total number of cases to over 136,000. The figures represent one of the highest daily death tolls recorded in countries under coronavirus lockdown.

**NBFCs must be provided with relief measures to tide over COVID-19**

The Reserve Bank of India (RBI) has announced a series of measures to help non-banking financial companies (NBFCs) tide over the COVID-19 crisis. These measures include an extension of the moratorium on loan repayments, an increase in the eligibility criteria for the Liquidity Adjustment Facility (LAF), and a reduction in the statutory liquidity ratio (SLR).

**COVID-19 Outbreak**

The number of COVID-19 cases around the world has surpassed 8 million, with more than 400,000 deaths reported. The virus has spread to more than 180 countries and territories, and is continuing to wreak havoc globally.
Trend: Analog watchwatches are making a comeback as designs inspired by different eras and traditions of bygone years are the new trend among discerning buyers.

‘You’re the most beautiful woman I’ve ever known’...!

The Tudor North Flag Swiss watch, renowned for intricate yet elegant timepieces, has become a welcome icon in the industry. It is highly revered as a design that is both timeless and innovative. The latest model, released in 2010, has received numerous accolades for its sleek and elegant design. The watch features a 41mm stainless steel case with a blue dial, white gold markers, and a link bracelet. It is powered by a self-winding movement and is suitable for both men and women. The watch is also waterproof to 100 meters, making it suitable for diving and other aquatic activities. It is available in limited edition quantities, making it a highly sought-after item among watch enthusiasts.

‘Are you sure you’re not forgetting something?’

The application of high-quality materials and craftsmanship is evident in the watch’s design. The use of precious metals and gemstones adds to its luxurious feel. The watch is also equipped with advanced technology, such as a chronograph function, making it a versatile timepiece. It is an ideal gift for any occasion and is sure to impress anyone fortunate enough to receive it. Whether you are looking to add a touch of elegance to your wardrobe or to make a statement at any event, the Tudor North Flag Swiss watch is the perfect choice.
Tomas Pueyo published a paper on the COVID-19 pandemic in The Lancet that estimated that the world is very likely now experiencing another wave of infections. The findings are based on analyzing a global dataset of confirmed cases, deaths, and test results. Pueyo found that the current wave is expected to peak in January 2022, with an estimated 5% of the world’s population becoming infected every week. This wave is likely to be more severe than previous waves due to the emergence of new variants and the continued spread of the virus in under-vaccinated populations. Pueyo called for increased vaccination efforts and stronger public health measures to mitigate the impact of the pandemic.

INFLUENCE OF TECHNOLOGY ON THE ENVIRONMENT

The widespread use of technology has had a significant impact on the environment, with both positive and negative effects. On the one hand, technology has enabled us to develop more efficient and sustainable energy sources, such as wind and solar power, which can help reduce our reliance on fossil fuels. On the other hand, the production and disposal of electronic devices can also have a negative impact on the environment, with the release of hazardous materials and the depletion of natural resources. It is important for us to continue to develop and use technology in ways that are environmentally sustainable and responsible.

OATMEAL AND BREAD

Oatmeals and breads are both made from grains, but they have different properties and uses. Oatmeals, which are made from ground oats, are typically used in breakfast dishes, such as oatmeal porridge or oatmeal cookies. Bread, on the other hand, is made from flour, water, and yeast, and can be prepared in a variety of ways, such as in the form of bagels, donuts, or sandwiches. Both oatmeals and breads are good sources of fiber and can be healthy additions to a balanced diet.
**ARES**

Aptitude tests like Paloo Thakkar, the first Indian hockey player to go to New Zealand, former director of Hockey India, Arif Ansari, and the first Indian woman hockey player, Pallavi Malhotra, have played a crucial role in the sport's growth. Paloo has always been a player who has gone beyond the call of duty, which is inspiring for younger players. He has been a great role model for many players, including Prabhjot Singh, who is currently playing for the Indian team.

**DKODING**

The sports authority of India (SAI) has taken some crucial steps to address the COVID-19 pandemic and its impact on sports. The SAI has announced the suspension of all sports events and competitions, including the Olympic qualification tournaments, until further notice. This decision was taken after consultations with the Indian Olympic Association (IOA) and the Indian Medical Association (IMA). The SAI has also directed all sports federations and associations to follow the guidelines issued by the Ministry of Health and Family Welfare (MoHFW) and the Indian Medical Council (IMC).

**DN**

The executive director of the Indian Olympic Association (IOA), Sandeep Mittal, has said that the organization is monitoring the situation closely and will take further action as per the government's guidelines. He added that the IOA is ready to work with the government to ensure a smooth resumption of sports activities.

**Economist**

The economist, Arun Jaitly, has said that the suspension of sports events is necessary to curb the spread of COVID-19. He added that the government should also consider providing financial assistance to athletes and sports federations affected by the pandemic.

**The Hindu**

The sports minister, Kiren Rijiju, has said that the government will work with the IOA and other sports federations to ensure a safe and healthy environment for athletes. He added that the government will provide financial assistance to athletes and sports federations affected by the pandemic.

**The Times of India**
