CM directs departmental heads to work for improving economy

Chief Minister Trivendra Singh Rawat directed the departmental heads to take necessary steps for improving the State’s economy. He said that the meeting was attended by the official officials of all the departments and the heads of the departments.

He expressed his happiness that the lockdown in the State has ended. However, most of them stated that they would continue to work hard to improve the State’s economy. He said that there had been a significant increase in the State’s revenue collection and that they had to work hard to maintain the momentum of the State’s economy.

Singh Rawat along with his Cabinet colleagues will have to be involved for this. He also said that the reviving the state’s micro-econ- vation caused by COVID-19 was a major challenge for the State. He said that various states to tackle the sit- uation have taken various measures, and entrepreneurs along with the State government also have to give special attention to this.

Pandey submitted the com- plaints regarding the State’s micro-econ- vation caused by COVID-19. He also thanked the State government for their efforts in this regard.

As per the World Health Organization, vaccine coverage can help reduce the risk of virus transmission. However, the effectiveness of the vaccine may vary depending on the specific vaccine used, the number of doses administered, and the individual’s health status.

The government has been working to ensure that everyone has access to the vaccine, and they have been rolling out vaccination programs to reach as many people as possible.

The government has also been working to increase the supply of vaccines, and they have been working with vaccine manufacturers to increase production. They have also been working to ensure that the vaccines are Reachable, affordable, acceptability, and delivery (RADD) framework.

Coronavirus could be much ado about nothing: Veteran Doctor

A recent outbreak of coronavirus disease (COVID-19) in India has raised concerns about the potential for widespread transmission and the need for public health measures to control the spread of the virus. The number of infected cases has continued to rise, with the total reported cases exceeding 640,000 as of May 5, 2020. The World Health Organization (WHO) has declared COVID-19 a pandemic, and many countries have taken measures to contain its spread, including social distancing, quarantine, and lockdowns.

The Indian government has implemented several measures to contain the spread of COVID-19, including lockdowns and restrictions on movement. These measures have had a significant impact on the economy and daily life, with widespread job losses and disruptions to businesses. However, there has been some criticism of the government's response, with some arguing that the measures were too strict or too lenient.

Despite the concerns about the spread of COVID-19, there has been a lack of public understanding of the virus and its transmission. This has led to misinformation and fear, with some people attributing the outbreak to various sources, including government failures and foreign agents.

It is important to recognize that COVID-19 is a highly infectious disease, and public health measures are essential to control its spread. However, it is also important to remember that the response to the outbreak should be proportionate and not overly dramatic, as this can have negative economic and social implications.

In conclusion, COVID-19 is a serious threat, and public health measures are necessary to control its spread. However, it is important to recognize that misinformation and fear can have negative consequences, and that a proportionate response is essential to mitigate these effects.

Coronavirus cases in India:

- Total confirmed cases: 642,153
- cured cases: 303,129
- deaths: 18,302
- active cases: 320,722

State-wise distribution:

- Maharashtra: 247,087
- Tamil Nadu: 52,401
- Delhi: 28,891
- Karnataka: 25,382
- Kerala: 22,329
- Uttar Pradesh: 19,065
- Rajasthan: 18,010
- West Bengal: 15,355
- Haryana: 10,831
- Gujarat: 10,005
- Madhya Pradesh: 9,956
- Andhra Pradesh: 9,730
- Bihar: 8,349
- Telangana: 8,164
- Jammu & Kashmir: 7,814
- Puducherry: 2,125
- Other states: 31,494

Update on vaccination:

- Total COVID-19 vaccine doses administered: 10,87,56,278
- First dose: 55,68,49,463
- Second dose: 11,716,679

COVID-19 vaccines: Covaxin, Covishield

T
he no doubt that revenues collected by States from a variety of sources—comprising license fees, customs duties, sales tax, and excise duties—have increased significantly since the 1970s. The increase has been from Rs 11,135 crore in 1970-71 to Rs 1,66,409 crore in 2016-17. This is a sixfold increase. But what has not been captured in these statistics is that the States have been forced to borrow massively from the RBI or the National Bank in order to meet their revenue needs. This has resulted in a massive increase in the debt burden of the States. The total debt of the States has increased from Rs 6,096 crore in 1970-71 to Rs 14,40,715 crore in 2016-17. This is a twentyfold increase.

Will the crisis in the Middle East get worse? What will the impact of the pandemic be on the Middle East? These are questions that are being asked by people all over the world. T he COVID-19 crisis has brought to the fore an interesting and unprecedented community level action. What we are seeing happening in Wuhan, and in a number of countries, is a whole-of-society approach to contain the spread of the virus. The citizens are all engaged in this effort, and the ability to win the war against the virus will lie in their hands.

Predictably, the issue of China’s knitting of global supply chains has come into the limelight again. This is particularly true now, when the world is reeling under the impact of the COVID-19 pandemic. China is known for its global supply chains, and the ability to win the war against the virus will lie in the hands of the citizens.

Learning from tragedy
It is an established fact that each disaster has led to a better system, so would the COVID-19 crisis

China’s liability under international law

Article 75 of WHO’s Constitution gives it the right to refer matters to the ICJ for advisory purposes. China’s failure to disclose information and disseminate data about the virus during its mystery stage, coupled with its willingness to inflict real damage on human welfare as a result of the coronavirus pandemic, has led to a major shift in the way that it is perceived. China’s international relations, particularly with the United States, have deteriorated significantly following the virus outbreak. The United States has accused China of deliberately concealing the severity of the virus, which has led to a number of countries suspending their travel to China.

China has also been criticized for its slow response to the pandemic, including its initial reluctance to share data with the World Health Organization (WHO). The WHO has accused China of deliberately concealing the severity of the virus, which has led to a number of countries suspending their travel to China.

The international community has called for China to be held accountable for its actions during the pandemic. The United States has accused China of deliberately concealing the severity of the virus, which has led to a number of countries suspending their travel to China. Germany has also criticized China for its slow response to the pandemic, including its initial reluctance to share data with the WHO. The WHO has accused China of deliberately concealing the severity of the virus, which has led to a number of countries suspending their travel to China.
The number of confirmed coronavirus cases worldwide surpassed 25 million on Sunday, according to data compiled by the Johns Hopkins University. The milestone was reached in just 10 days, after the 20 million mark was hit on July 28. Roughly 648,000 deaths have been reported around the world, according to the figures compiled by the U.S. Centers for Disease Control and Prevention (CDC). The number of newly reported cases in the past 24 hours topped 250,000, with a notable rise in the United States, where a record 60,000 new infections were reported, according to data from the Johns Hopkins University.

The United States became the first country to surpass 5 million coronavirus cases, with more than 5.3 million infections reported so far, according to data from Johns Hopkins. The country also passed another milestone, reaching 150,000 deaths, according to the same source. The coronavirus pandemic has claimed more than 1 million lives worldwide, according to the World Health Organization (WHO).

The pandemic has caused a devastating economic impact, with millions of jobs lost and economies shut down. The International Monetary Fund (IMF) has forecast a global recession this year, with GDP falling by 4.9%.

As the world struggles to contain the virus, some countries have started to relax lockdown measures, while others are imposing new restrictions. The pandemic has also led to a surge in cases in parts of the world, particularly in South America and South Africa.

We continue to monitor the situation closely and provide updates as needed.

Daniel Pearl murder case: US demands justice from Pakistan

Daniel Pearl, the Wall Street Journal reporter killed in Pakistan in 2002, was the victim of a barbaric act, the United States government has said, as it asks for justice in the case.

The US government has asked for the “immediate” arrest of Cheema and his accomplices, who are said to be involved in the killing of Pearl, a US citizen. The US has also demanded that Pakistan cooperate fully in the investigation.

The US government’s statement comes as Pakistan is facing increased pressure to account for its role in the killing of Pearl, who was kidnapped and killed in 2002.

China either incompetent in preventing COVID-19 spread or did it for a reason: Trump

President Donald Trump has accused China of being either incompetent in preventing COVID-19 from spreading or did it for a reason. "It should have been stopped when it was caught. But it should have been caught and stopped. It should have been stopped on the port. It should have been contained. This is China," he said. "They should have contained it. They should have contained it." Trump’s criticism comes amid widespread criticism of China’s handling of the pandemic, with many countries accusing it of not being transparent and not taking sufficient action to contain the virus.

Researchers find antibody that blocks infection in coronavirus in cells

Researchers have identified an antibody that blocks the infection of coronavirus in cells. The antibody, called SARS-CoV-2 neutralizing antibody, was found to be effective in preventing the virus from entering host cells, according to a study published in the journal Nature.

The antibody, which was isolated from a patient who had recovered from COVID-19, was found to bind to a specific region of the virus, preventing it from entering cells.

The discovery could pave the way for new treatments and vaccines against COVID-19, which has infected millions of people worldwide and killed thousands.

NZ, Australia consider use of ‘travel bubble’

New Zealand and Australia are considering establishing a travel bubble to allow for the safe and unrestricted movement of people between the two countries. The proposal is part of a wider effort to gradually ease travel restrictions and reopen economies around the world.

The travel bubble would allow for the safe and unrestricted movement of people between New Zealand and Australia, with the aim of restoring normal travel and trade between the two countries.

The proposal has been welcomed by both governments, which have been under pressure to restart their economies after months of lockdown.

COVID-19 Outbreak

Death toll in Italy has exceeded 3.5 million

The total number of coronavirus deaths worldwide has surpassed 350,000, according to data compiled by Johns Hopkins University. The milestone was reached on Friday, with the number of deaths in Italy exceeding 35,000.

The pandemic has caused a massive economic downturn, with many countries imposing lockdowns and travel restrictions to contain the virus. The crisis has also led to a rise in unemployment and a fall in economic activity.

---

Italian lockdown extended

The Italian government has extended the lockdown measures in the country, which have been in place since March, until the end of May. The measures include stay-at-home orders, restrictions on public gatherings, and the closure of non-essential businesses.

The government has been under pressure to ease the lockdown measures, but it has been criticized for not doing so sooner.

---

WikiLeaks: London court delays Assange extradition hearing

The UK government has delayed the extradition hearing of WikiLeaks founder Julian Assange, who is facing extradition to the US on charges of conspiring to obtain and disclose classified documents. The hearing was originally scheduled for May 5, but it has been postponed to August 17.

Assange’s lawyers have been critical of the decision to delay the hearing, arguing that it will cause further delays and uncertainty for both Assange and the US government.

---

delta variant

The spread of the delta variant of the coronavirus has been identified as a major challenge for the world’s health systems. The variant is highly contagious and has been spreading rapidly in many countries, including the US, India, and Brazil.

The delta variant has been linked to a rise in hospitalizations and deaths, and many countries have been struggling to contain its spread.

---

COVID-19 death toll

As of May 5, the global death toll from COVID-19 has surpassed 3.5 million, according to data from Johns Hopkins University. The pandemic has caused a massive economic downturn, with many countries imposing lockdowns and travel restrictions to contain the virus. The crisis has also led to a rise in unemployment and a fall in economic activity.

For safely resuming to or newly getting into active lifestyles, the same time improve balance and flexibility.

However, appropriate exercises along with medication and therapy will need to take place. Thus, exercise rehabilitation is a highly recommended program to eliminate the risk of re-injury, or post-operative complications in a survivor and improve overall emotional well-being of an individual.

As cardiovascular Diseases claimed more than 17.5 million cases in general you should be able to do at least 10,000 steps a day in total control of asthma.

A bunch of practices known as relaxation exercises can improve your sleep. Start by curbing your enthusiasm.

Sattu is a flour that is made from green gram seeds and commonly known as Bengali Chana Dal. It is a very important aspect of diet to take into consideration because it provides essential nutrients to stay focused and help in maintaining your weight but also fill the gaps in your diet for the day.

For those who are looking for a natural and nutritious breakfast that provides a huge amount of energy, a very good option is to make a healthy smoothie with sattu. It is good for Diabetes too.

There is nothing great than a healthy and balanced diet. It provides essential nutrients to stay focused and also boosts digestion.

If you feel this page is helpful or you found it useful, please share it with your friends and family. Thank you for being a part of our journey.

A night's sleep is essential to stay awake during the day. It helps in restoring the body's energy levels and is crucial for physical and mental well-being. On an average, 7-9 hours of sleep per night is recommended for adults. This is the time during which the body repairs itself and eliminates toxins from the body. In short, it is the time when the body rejuvenates and refuels itself.

My mission is life is to serve not to judge, and to do so with some passion, some compassion, some love, some perspective, some courage.

Those lines by Maya Angelou pretty much sum up British textile historian, Jenny Houghton. In her new book, *A Woven Life*, co-authored by journalist Malya MerChandNal, By Saksie Shima

The book is an emotional journey that takes readers through the pages of history, exploring the ways in which textiles have shaped the world. Houghton, a renowned scholar in the field of textile history, has spent her career uncovering the stories behind the threads and fabrics that have woven their way into the fabric of our lives.

The COVID-19 crisis has led to a renewed appreciation for the role of textiles in our lives. As Houghton notes, "With the pandemic, we have all had to relearn the value of things that we used to take for granted. Textiles have always been a part of our lives, but now more than ever, we see their importance."

The book covers a wide range of topics, from the traditional to the modern, the local to the global. It explores the ways in which textiles have been used to express cultural identity, to tell stories, and to solve problems. The authors delve into the history of textile production, the evolution of materials, and the role of textiles in society.

The book also highlights the importance of textiles in the current global crisis. Houghton notes that "Textiles can be a powerful tool in the fight against COVID-19. They can be used to create masks, gloves, and other protective equipment."

The book is a testament to the power of textile history, and a reminder of the importance of preserving this vital aspect of our cultural heritage.

Aamir clarifies the truck rumour

Recently, an unverified video had surfaced on social media that said: "Aamir Khan has dispatched a truck full of vegetables to each of 100 villages in the country, giving 3000 in each of them, to be distributed in an emergency "atchet area in Delhi.

But the #COVID19 crisis, the video stated that the truck was stuck in a traffic jam on April 29 and was loaded with one-tonne packets of vegetables by Aamir.

Refuting all such claims and rumours, Aamir took to social media to debunk the news and said: "Guys, I am not the person putting money in village's bag. It's either a completely fake story or Robin Hood doesn't want to reveal himself. Stay safe.

the nation, on Sunday witnessed one of the most significant events in India, with the government announcing measures to battle the coronavirus pandemic. The measures, which included a complete lockdown for 21 days, were aimed at containing the spread of the virus and saving lives.

In the midst of the chaos and uncertainty, the world of cinema has been forced to adapt and find new ways to connect with audiences. With the traditional film industry facing unprecedented challenges, filmmakers have had to think creatively to keep the stories flowing.

One such example is the live-streaming fundraiser concert, which saw a massive turn-out from both the wood and Bollywood participation.

Leaving Neverland

There is a certain rhythm to things in the way filmmaker KAREEN GILL handles migration in his documentary, *Sent Away*, which tells the story of those who are left behind.

The film follows the journey of a young Sikh man, who is forced to leave his homeland to escape conflict and violence. He travels to the United States, where he must navigate a new reality and find a way to make a new life for himself.

The filmmaker's use of personal stories and统计数据 allows viewers to feel connected to the individuals featured in the film. By highlighting the experiences of those who have been forced to leave home, the film raises important questions about migration and the impact it has on individuals and communities.

Despite the challenges faced by the characters in the film, their resilience and determination are inspiring. The film is a powerful reminder of the human cost of migration and the importance of finding ways to support those who are left behind.

But as with any film, there are limitations to what can be achieved within the constraints of a documentary format. The filmmaker must balance the need to tell a compelling story with the constraints of available resources and time.

Nevertheless, *Sent Away* is a necessary and timely contribution to the ongoing conversation about migration and its impact on individuals and societies around the world.
Longines, the Swiss luxury watchmaker, celebrates the official timekeeper of the Olympic Games with a touch of class! The brand has launched a new collection, the HydroConquest, specifically designed for the Olympic Games. The HydroConquest is a 44mm stainless steel watch with a blue dial and white rubber strap.
