Focus shifts to reviving economy

Modi seeks CMs’ suggestion, says Covidskill blunted, efforts to make India green zones

Delhi, Mumbai, Bengaluru, Chennai, Ahmedabad, Pune

RAIPUR, TUESDAY MAY 12, 2020, PAGE 12/13

States see Covid in after migrants return

RAJASTHAN KUMAR

Migrants are turning out to be nightmare for certain State’s health system, and to manage the situation, the State Health Department has taken some preventive measures. It was informed that an e-registration system has been implemented in order to register all the migrants coming to Rajasthan in order to conduct proper medical examination and treatment if needed.

Central targeting West Bengal, Mamata tells Modi in meeting

In the Prime Minister’s meeting with West Bengal CM Mamata Banerjee, the Prime Minister asked the West Bengal government to table a report to the Centre by July 1 on the steps taken to contain the spread of the corona virus. The Centre is also prepared to help in the fight against the virus in West Bengal, if required.

A dozen shramik trains to run for migrant workers

The Indian Railway Catering and Catering Services (IRCS) under the Ministry of Railways is going to run 12 special shramik trains from various states for the migrant workers who have been stranded in different locations across the country.

The main aim behind the decision is to transport the migrant workers to their home states. The trains will be run from various stations to the state capitals of different states, and the travel time will be around 25-30 hours.

The decision has been taken in consultation with the Ministry of Home Affairs and the home states of the workers. The Trains will be run on a case-to-case basis and the details will be released soon.

Director General of Health Services (DGHS) Dr. Randeep Goyal told that the Ministry of Health and Family Welfare is also working on the issue and the details will be released soon.

In addition to this, the Ministry of Railways has also decided to run 15 special trains (30 in total) for passenger trains which will run from 4 pm and after a gap of 2 hours from Monday to Saturday.

The main aim behind the decision is to check the spread of the corona virus and to keep the country under control.

The trains will be run from various stations to the state capitals of different states, and the travel time will be around 25-30 hours.

No post-mortem for coronavirus deaths

New ICMR guidelines for post-mortem in covid-19 deaths as medico-legal cases

NEW DELHI

The no post-mortem rule for COVID-19 cases has been rescinded. Now, post-mortem can be conducted for COVID-19 deaths as medico-legal cases.

The guidelines state that in the case of a death of a COVID-19 patient, there will be a no post-mortem rule. But if the death is a COVID-19 patient, and there is a suspicion of COVID-19 infection, then a post-mortem can be conducted.

The guidelines also state that if the patient has been tested for COVID-19 and tested positive, then a no post-mortem rule will apply.

The guidelines also state that if the patient has been tested for COVID-19 and tested negative, then a post-mortem can be conducted.

that around 5000 non-resident SA native passengers returning to India. The UT Administration has therefore decided to de-board these returnees from the turning facility. The Chief Minister also informed that those passengers who are willing to undergo Covid testing for making an informed decision can do so. But he pointed out that the UT Administration should concern and consider on facial recognition technology and face recognition of the machines which are responsible for different category along with imposing upon the lockdown. The Chief Minister said that the suggestion of using Sa native passengers returning to India is the microplanning, with Stitching to be allowed to function that belongs to the city would return from abroad. The UT Administration has made arrangements for attracting SA native passengers returning to India. The UT Administration was also the most important to be left to the state which is the most complex. The UT Administration demanded urgent action to reach out to at least 35 percent of the state's total population along with resource grants to reduce the total number of state's mortality in the pandemic. The Chief Minister also informed that an increase in the Covid test and stay measure for all residents is now led. He also reiterated his request to the state which is the maximum of test for the Covid-19 test, and stated that the new 43,2007.

130-140 cm

The Chief Minister also approved that the policy of the state where the highest number of positive cases were were 2,647 cases. The State Administration has the role of this wheat harvest season got extended and farmers were effectively doing the silage. The Chief Minister said that Gurugram, Faridabad and Ambala have been observed for their stay. The Chief Minister informed that the houses of Chapuru, 15 cm

The Just Minister informed that the capacity of the state which is the maximum number of positive cases was of 105. Jhajjar reported nine more positive cases, taking the tally to 83. Faridabad, Bhiwani, Sonepat, and Bajrangpur among others the borrowing limit under the Transport and the Panchkula City Police

The farm sector is the biggest contributor to the state's GDP and has been a major source of employment for the state. The state government's efforts are focused on providing proper safeguards to the farmers and ensuring that the farming season is conducted smoothly. The UT Administration has taken several measures to support the farmers during this critical period. These measures include providing timely inputs, ensuring adequate and timely supply of seeds and fertilizers, and providing financial assistance to the farmers. The UT Administration has also been proactive in implementing the various farm laws passed by the Parliament and ensuring their effective implementation on the ground. The Chief Minister informed that the state government has already made elaborate arrangements for the upcoming wheat harvesting season. The state government has also deployed additional manpower to monitor the harvesting process and ensure timely disposal of the crop. The Chief Minister also expressed his gratitude to the Department of Food, Civil Supplies and Consumer Affairs for their support and cooperation. The Chief Minister also emphasized the importance of maintaining law and order during the harvesting season. He urged the farmers to work together and ensure peaceful and orderly harvesting. The Chief Minister assured the farmers that the state government would continue to work closely with them to address any issues and provide necessary support. The Chief Minister's message was received with enthusiasm and support from the farming community. Balodabazar to use fine from lockdown violators to buy PPE kit

Chief Minister Baghel tweeted that the fine collected from lockdown violators would be used to buy PPE kits, masks, and other medical equipment. The money will also be used to ensure certain facilities to patients in community health centres, he said.

"Generally the fine money is used by the department concerned. But in view of Covid-19, we have decided to exclusively spend it for PPE kits, masks and other medical equipment," Baghel said.

The money collected so far from lockdown violators in Raipurdivision is Rs 30,000 crore, which should be transferred to the department concerned.

The online art competition for children, entry till May 30

The online art competition for children is being conducted by the Chhattisgarh State Art and Culture Department. The competition is being conducted to mark the International Day for Persons with Disabilities on December 3.

All participants will get a certificate. The first prize will be Rs 10,000, the second prize Rs 5,000 and the third prize Rs 3,000.

As an interest, each eligible student must be given from Rs 100 to Rs 500 as it will serve as smooth travel from other districts.

The competition is being conducted to make the government to make the public aware of the Covid-19. The competition is being conducted to mark the International Day for Persons with Disabilities.

Provide secure, smooth movement of medical professionals, States told

PSUS NEW DELHI

On Monday, Prime Minister Modi, in an Independence Day address, exhorted the nation to adopt a more 
robust, smooth and unobstructed movement of medical professionals and medical equipment to stop the spread of the COVID-19 pandemic.

"We have been told today that the next 6 months are critical. Half of the battle is already won. The only thing important is how we can make the second half more successful. If we can do that, we will win," Modi said.

Home Secretary Ayush Kumar Singh, in his Independence Day speech, said the Government is committed to ensuring the smooth movement of all medical professionals and all types of medical equipment, and that all policies and procedures are in place to make it happen.

The Prime Minister also thanked the Government of Tamil Nadu for allowing 200 Indian nationals to disembark at Tuticorin, and Indian nationals to evacuate a young woman, one of the 698 passengers on board the MS Americana, which arrived at Tuticorin.

He also highlighted the role of the DRDO in the development of more robots and automation technologies to fight against the COVID-19 pandemic.

Pincer attack
Both Pakistan and China have kept the borders hot, taking advantage of the unprecedented challenge posed by COVID-19

The Pakistan army thought that the devastation caused by the coronavirus disease will help Pakistan and China make their demands for the border issue.
Print money to fight slowdown

The Centre should come out with a huge package of about ten per cent of the GDP which might help revive the economy hit by COVID-19

PRAPULK CHAUDHARI

Though India is slowly opening up after a period of lockdown, the economic impact of the lockdown and the slowdown that predated it have started to hit hard. The government is said to be working on a Rs 10 trillion package, which will be announced soon. There has been a lot of discussion about the timing of the package and the strategy of how to get it to the people who need it the most.

The right communication strategy and leveraging technology in an important policy decision is crucial. The Centre’s current proposals, which stress on the supply side, could have some issues. It is quite possible that the social distancing norms have already been violated due to the lockdown. There is a need for a strategy that helps us learn to live with the virus.

When the pandemic began, it was realising the potential of social distancing that governments around the world were talking about. The virus has been spreading so fast that, even in certain countries where they have been successful in controlling it, the virus is still spreading. In India, there is a need for a strategy that helps us learn to live with the virus.

As we move to the critical stage where some activities have been allowed in Green and Orange Zones, there is a need for a strategy that helps us learn to live with the virus.
Cheetah-inspired fastest robots yet developed

Washington: Inspired by the agility and speed of cheetahs, researchers have developed a new class of soft robotic runners that move faster and cover more ground on solid surfaces or in the water than any other soft robots, according to a study recently published in the journal Science Robotics. These soft robots are also capable of gripping objects and are strong enough to lift heavy objects, making them a promising alternative to the traditional metal robots.

“Cheetahs are the fastest animals on earth, but they can also grip objects and lift heavy things,” said Zhen Zheng, an assistant professor at the State University of New York at Stony Brook and the lead author of the study. “We wanted to create robots that can match the agility of a cheetah and also be capable of gripping objects.”

To achieve this, Zheng and his team designed a new class of soft robots called the “Cheetah Runner.” The runners are made of a flexible material that can stretch and recover, allowing them to move quickly and grip objects at the same time.

“We used the cheetah as inspiration for both the design and the materials we used,” said Zheng. “The cheetah’s speed comes from its long, powerful legs, but also from the way it uses its body to generate lift. We incorporated these principles into our design.”

The Cheetah Runner is made up of two main components: a flexible, lightweight body and a series of rigid, coiled segments that act as legs. The body is made of a special kind of plastic that can stretch and recover, while the legs are made of a tougher material that can withstand the forces generated during movement.

The runners can move at speeds of up to 8 body lengths per second, which is faster than any other soft robot currently available. They are also capable of gripping objects of various sizes and shapes, including round objects and flat surfaces.

“We are excited about the potential applications of these robots in a variety of fields, from rescue missions to medical uses,” said Zheng. “They could be used to transport medical supplies or to help with search and rescue operations.”

The study was funded by the National Science Foundation and the Office of Naval Research.

Four back-to-back bomb blasts rock Kabul: Police

A Kabul police official said on Tuesday that four back-to-back bomb blasts occurred in the city, killing at least 17 people and wounding dozens more.

The explosions occurred as a crowd was gathering in a locked-in area where investigators were carrying out forensic work.

President Donald Trump

Trump addressed the question of whether the United States was likely to have military action in response to the explosion in Kabul.

“Potentially, there could be a lot of action,” Trump said. “It’s a very serious and worrying situation.”

He added that the United States was considering a range of options, including air strikes and other military actions.

“With all of the options on the table, we are certainly not going to stand by and watch this happen,” Trump said. “We are going to do what is necessary to protect our citizens.”
Extra Borrowing FY21 fiscal deficit likely at 5.8% Growth to slip to 0.5%. Report

The government’s fiscal situation has taken a turn for the worse, as the centrist deficit figures on the books have been revised upwards. The government is now estimated to have crossed the 5.8% mark for FY21, down against the budget target of 3.5% set for the year.

The revised fiscal deficit numbers have been announced by the Reserve Bank of India, which has also incorporated the errors in the table of numbers made by the government. The RBI calculated the fiscal deficit as against the GDP growth estimate of 8.5% provided by the government. The RBI revised its estimate to 9%.

The government has been consistently raising its target for the fiscal year, as against the down their GDP growth estimate. The government also revised its estimate of 7.8% earlier for the year.

The government’s revised fiscal deficit of 3.5% for FY21 was based on a GDP growth estimate of 8.5% provided by the government. The RBI revised its estimate to 9%.

The government has been consistently raising its target for the fiscal year, as against the earlier estimate of 7.8% for the year.

It can be noted that due to the heavy dip in growth, it was expected to be a fiscal deficit of 5.3% in FY20 as against the official estimates of the government of about 3.5%.

Central trade unions may approach ILO on labour laws suspension in some states

Trade unions on Monday asked the government to consider approaching the International Labour Organisation (ILO) against unreasonable laws to be implemented in some states.

The Central trade unions have expressed concern over the Union Cabinet’s decision to ask the government to consider approaching the ILO to give a call for nationwide agitation against the pro-government State Governments.

The trade unions called for the Central trade union leaders to consider approaching the ILO to give a call for nationwide agitation on the issue of suspension of major labour laws.

On Friday, the government had given nod to ‘Uttar Pradesh Adityanath last week to suspend some labour laws and allow private companies to fire workers as per media reports.

The area outside Hari Krishna Mittal, a shop owner in the Tikamgarh market, was clutched with the markings of dawn. There were only one white vehicle on the road, and the chicks could be heard.

The ticket regulator on Monday asked public to avoid online conference platforms as some online conference platforms are giving false assurances of security.

The ticket regulator also asked to avoid online conference platforms as some online conference platforms are giving false assurances of security.

The ticket regulator also asked to avoid online conference platforms as some online conference platforms are giving false assurances of security.

On Monday, there was no sight of the ticket regulator in the Tikamgarh market.

The ticket regulator also asked to avoid online conference platforms as some online conference platforms are giving false assurances of security.
Cancer patients need extra care

The spread of COVID-19 across the world is constantly increasing, with dozens to over 25 million new cases added each week. Nearly half of all new cases are being reported in India. Cancer patients are at increased risk of infection due to their compromised immune system and various other factors like chemotherapy or radiation therapy to treat cancer and even due to reduced nutritional intake.

It is important for everyone, and especially those with compromised immune systems, to take extra precautions to reduce their risk of infection. Being aware of the risk factors can help to identify who is at increased risk and take appropriate measures to reduce transmission. In addition, vaccination is recommended for eligible individuals to further reduce the risk of infection. Together, we can help to stop the spread of COVID-19 and protect those who are at increased risk.

Doctors say that obesity can be an additional risk for COVID-19. DR AMISH ARYA shares tips to boost immunity and stay safe

As the virus spreads, obesity is gaining importance as a risk factor. More than 1 billion people around the world are estimated to be overweight or obese. Obesity can cause a number of health problems, including type 2 diabetes, heart disease, and some forms of cancer. It also increases the risk of severe COVID-19 infection and death. In addition, obesity can make it more difficult for the body to fight off infections.

So what can you do to reduce your risk of obesity and protect yourself from COVID-19? One important step is to maintain a healthy weight. This means eating a balanced diet and getting regular exercise. It is also important to stay up-to-date with your vaccination schedule and to take other preventive measures, such as wearing a mask and practicing good hygiene.

The pandemic has increased awareness among people that they should take care of their health. In addition, people are more aware of the importance of maintaining a healthy lifestyle. This includes getting adequate rest, eating a balanced diet, and exercising regularly.

SAMEDHA KHOCHE AND SHRIREND SULTANA believe that parents can use the Montessori methods of teaching to devise activities for children using things easily available at home.

CHILDREN DEVELOC H:
The Montessori methods are simple self-motivated as kids believe they are interested in what they are doing. The child will not only know that they are busy and engaged but they will also learn to love being busy.

SOMEROUS:
What Montessori materials are designed to engage all the senses and develop the child? They can be foraged at home by every parent. A child’s sense of touch is highly developed from birth; this is why parents should encourage them to handle all the objects in the house and use them for brushing, painting and to touch the texture of the material. Open-ended discussions should be encouraged to expose children to new and different sensory materials.

DIFFERENT STATUS:
Children tend to get distracted at times. Allowing them to divert their attention to something new, this can be anything from a toy to a book. The child should not be forced to choose for a while, while still allowing them to do a certain activity. This allows their senses to work together and they will not be over-stimulated.

ATTENTION AND FOCUS:
Focus on simple activities. Children tend to get distracted at times. Allowing them to divert their attention to something new, this can be anything from a toy to a book. The child should not be forced to choose for a while, while still allowing them to do a certain activity. This allows their senses to work together and they will not be over-stimulated.

Creating shared music salves an emotional wound.

When the university cancelled the opera, it had to be recorded the concert alone, at home, 25-year-old violin student stopped practicing altogether.

Then, the music took an amazing turn. After watching a YouTube video about online collaborations and global performances, the Muncie Philharmonic Orchestra’s Sarah Kohler-Schmid and the university’s School of Music’s graduate assistant, Matthew Smedal, decided to collaborate on a project of their own.

But music has been Muncie’s life. She’s the last of the Schmid family to have grown up in the area and one of only a handful of all the wonderful home-cooked meals they received during their musical training. virtual, virtual
teaching and learning online.

She said to me, “I’m not going to be left behind. My goal is to help others who aren’t as fortunate as I am. I’m not going to let anything stop me.”

“Let’s go to the real-time reactions to my performances for the rest of my life,” said Muncie.

Pak could play more Tests in tour of Eng

Pakistan might play more Tests in England if it goes ahead as scheduled, said Pakistan Cricket Board chairman Najam Sethi.

While the PCCB chairman was pulling out of an assignment visit to the UK, a report in Dawn said the PCCB wants to plan to play four Tests Down Under and if the tour of England cricket team Pakistan could lose a 4-0 series on England in 2024, the PCB is likely to go back to four Tests against England this year as well.

The source said that the PCB is very keen to keep the four Test series against Pakistan against India on November 6-9, 10-13, 17-20 and 24-27.

India should tour Aus, says Gambhir

Former India opener Virendra Singh Gambhir has said that India should go on a tour of Australia later this year as the team could lose a 4-0 series on Australia in 2024, the PCB is likely to go back to four Tests against England this year as well.
