NDP BEATS EXIT POLLS, RETAINS BHARAT 

BJP sweeps MP bypolls, bags 20 seats, Cong 8

Media reports:

The BJP has crossed end of two by-polls in Madhya Pradesh and Rajasthan, leaving the Congress to dispute with the Bahujan Samaj Party (BSP) to 5 seats, while the JD(U) won 3 seats.

The results of the by-polls in Madhya Pradesh gave the BJP a commanding lead over the Congress, which won 8 seats.

In Rajasthan, the Congress won 8 seats, while the BSP won 2 seats.

BJP leader Rahul Gandhi, who was present for the by-polls, said, “We are happy with the results and congratulate the BJP for their victory. However, we will continue to fight for the people of Rajasthan.”

The by-polls were called in response to the recent political turmoil in the state, which had led to the resignation of several MLAs and the collapse of the Congress government.

The results of the by-polls have come as a relief for the BJP, which was facing a series of setbacks in recent months.

BJP chief JP Nadda said, “These results are a clear mandate for the BJP. We will work hard to strengthen our government and ensure a bright future for the people of Rajasthan.”

The Congress and the BSP have both beencriticized for their performance in the state, and the results of the by-polls have raised hopes of a change in the political scenario.

The BJP has won a majority in both states, and the party leaders have expressed their determination to continue their work for the people of Rajasthan and Madhya Pradesh.

NDP leaders have congratulated the BJP on their victory and have pledged to continue their efforts to strengthen the government and work for the people of the state.

The results of the by-polls have also been welcomed by the Bahujan Samaj Party, which has been a consistent supporter of the BJP in the state.

The by-polls have been seen as a test of the popularity of the Congress government in the state, and the results have come as a relief for the BJP, which has been facing a series of setbacks in recent months.

The BJP has won a majority in both states, and the party leaders have expressed their determination to continue their work for the people of Rajasthan and Madhya Pradesh.

Shivraj thanks people of State after bypolls results

**STAFF REPORTER** Bhopal

“Villagers are the people of Madhya Pradesh, Chief Minister Shivraj Singh is the people’s representative,” Chief Minister Shivraj Singh told people in the wake of the results of the Bhopal North-West Assembly seat on Monday. People, he said, will be the main instrument of development in the state. The state government will speed up work in every field.

Chief Minister Shivraj Singh said that the new dimensions of the project of the state will unfold with the bypoll results of the last month. He will take forward the work in the new government.

His new government will include all of them, the Chief Minister said, and added that the work on the state government’s new projects will fast forward. People are the supreme judges of the government, the Chief Minister said. The government will not be slow in its work. The work will be carried out as soon as it can.

Police nab vehicle lifter, recover 4 two wheelers worth Rs 2 L

**STAFF REPORTER** Bhopal

Fifteen police personnel have arrested a vehicle lifter and recovered four two wheelers worth Rs 2 lakh in a police encounter on the Byasi Road in Bhopal on Monday.

According to the police, the lifter was arrested by a trap after a police vehicle was ambushed when the lifter was transporting stolen vehicles to an adjacent village.

The accused was tried by the police and found guilty of stealing two wheelers. He also had a trap of.xls and used to drive商标 to evade the police.

Sleep-wake cycle hormone ‘Melatonin’ may be useful in Covid treatment: Study

**Journal of Biological Rhythms**

Melatonin, a hormone that regulates the sleep-wake cycle, has been shown to be beneficial in sleep disorders. However, it may also be a viable treatment option for COVID-19, according to a study published in the Journal of Biological Rhythms. The study found that melatonin administration could reduce the severity of COVID-19 symptoms and improve sleep quality in infected patients.

**Insights:**
- Melatonin is a powerful antioxidant that can protect against oxidative stress.
- It can modulate the immune response and reduce inflammation.
- Melatonin may help to improve sleep quality, which is crucial for recovery from illness.

**Implications:**
- Further research is needed to confirm these findings and evaluate the best dosing regimen for COVID-19 patients.
- Melatonin may be a promising add-on therapy for managing COVID-19 symptoms in conjunction with standard care.

**Social justice & more**

An add-on to the identity politics in economic terms and a credible political face to deliver it are important takeaways from the Bihar elections

---

**NIKHIL SEEMS TO BE BOTH A Benefactor and Victim of SOCIAL JUSTICE POLITICS. HE AND LAL PRASAD JADAV HAVE THEIR ARCHITECTS, TOGETHER, THEY HAVE EVEN DEVELOPED RURAL YERNS, SETTING THE POLITICAL NARRATIVE AND EVEN FORCING THE NATIONAL PARTIES TO PLAY SECOND FIDDLE TO THEM**

Why did this discourse fail in the Bihar elections? To further add to the economic context of the elections, the Bihar government has been working on a project of social justice, which promised both dignity and economic benefits to the marginalized sections of the society. However, the politics of social justice, which the RJD was promoting, failed to deliver on its promises, and the voters saw it as a failure of the government.

---

**Vaccine politics**

Chung e's triumph in the Bihar elections has been a source of inspiration for many others. The way he handled the COVID-19 vaccine distribution and administration has been widely praised. However, the success of the vaccine drive has come at a cost. The government has been criticized for not doing enough to ensure that all citizens have access to the vaccine, and many have been left behind.

**Diwali gloom**

The Diwali season is traditionally one of the main festivals in India, but this year it was marred by a struggling economy and the ongoing COVID-19 pandemic. The situation was further worsened by the recent electricity blackouts, which have led to a shortage of power in many parts of the country.
A fine mess in Ethiopia again

In only a week, it has worked its way up from local clashes to air strikes. This is so reckless that it makes US policies look tame by comparison.

A merica should congratulate themselves. Their election system is definitely better than Ethiopia’s. In fact, it’s so much better that it is almost safe to say that Ethiopia’s is corrupt.

The US, a federal country with a complex and decrepit voting system, has an election day due in the fall of 2022, a quarter-million of COVID-19 deaths, President Donald Trump is floundering, and the US has worked itself into a few major crises. For instance, the US has worked itself into a few major crises.

The Government of Ethiopia of Tigray region of Ethiopia is accused of the same corruption, and that is why the US is not a fine mess in Ethiopia again. The first reason is that the US is not a fine mess in Ethiopia again.

The Tigray region’s political and military situation was widely monitored, and it was reported that the situation was worsening by the day. The US military operations led to the Tigray region, a part of Ethiopia, being declared a war zone.

The situation in Tigray is complex and volatile, and it is important to monitor it closely. The Tigray region’s government has been accused of human rights abuses and crimes against humanity.

The US has been a vocal critic of the Tigray region’s government, and it has repeatedly called for a de-escalation of the conflict. The US has also provided humanitarian aid to the Tigray region.

The US has imposed sanctions on the Tigray region’s leaders and has called for an international investigation into the situation.

In addition to the ongoing conflict, there are also concerns about the role of China in the region, as well as the impact of the conflict on the wider region of East Africa.

The US has been pushing for a political solution to the conflict, and it has called for a peace agreement between the Tigray region’s government and its opposition.

Trump says media should be called out for election interference

Washington: US President Donald Trump on Monday said media should be called out for their election interference and that voter fraud is a "frightening and dangerous new phenomenon".

Trump said that some media outlets had "no respect for people who have voted and will have a vote in the upcoming election".

"We have to have a fair election, and we have not had a fair election in many, many years," Trump said in a tweet.

Trump's comments come after his campaign announced it had filed a lawsuit in Texas seeking to prevent vote counting.

The lawsuit accuses media organizations of "fomenting election interference", saying they had "no respect for people who have voted and will have a vote in the upcoming election".

Trump's claim of "no respect" for voters has been a central theme of his re-election campaign.

In a tweet on November 3, Trump said: "The media is not fair and cannot be trusted, they are not respected by voters or anyone else."

The US president's threats to use active-duty soldiers and military hardware to suppress street protests have raised the possibility of an armed conflict.

On Monday, the US military announced that it would deploy troops to protect federal buildings and facilities in Washington, D.C., as security measures ahead of the November 3 election.

The deployment comes amid concerns of potential violence and civil unrest following Trump's claims of voter fraud and his subsequent legal challenges.

Media organizations have been critical of Trump's claims of voter fraud, accusing him of attempting to undermine the democratic process.

In response to Trump's tweets, several media outlets have defended their impartiality and commitment to accuracy and honesty, with some calling for a "more accurate and honest vote count".

The media's role in election coverage has been a contentious issue in recent years, with some criticizing media outlets for favoring one candidate over another.

In this context, it is important to consider the impact of media coverage on public perception and the integrity of the electoral process.

As the election approaches, it is crucial that media organizations maintain their commitment to accuracy and fairness, providing a reliable source of information for voters.

Markets maintain record on vaccine boost

Sensex touches 43,000-mark

PTI | MUMBAI

Early rally on green shoots

By Jagdish Sureka

Green shoots are the result of results from Pfizer’s Coronavirus vaccine showing promising results in small initial trials. A statement from the global market sentiment on the trend on the one hand, the BSE Sensex rose 697.22 points to close above 43,277 on Tuesday. In the 30-share index, 21 stocks rose and nine declined. The broader Nifty also closed at a record high of 12,860.6, surging 468.25 points or 3.80 per cent. Both the benchmark indices are trading at record levels for the second straight session. Rajiv Prakash, executive director, Global Institution Business School, said he attributes the rally to robust global performance and market sentiment. However, the Nifty was down for most of the session and failed to cross 12,500. Most Asian markets also rallied, with Nikkei 225 ending up 1.3 per cent at 26,434 during the session. The broader BSE Midcap and the Smallcap indices also saw gains.

Rupee slips 3 paise to 74.18 against USD

Mumbai: The rupee on Tuesday fell 3 paise to close at 74.18 against the US dollar, tracking a firming of domestic crude prices and a stronger greenback.

Apart from performing mundane tasks, AI has the ability to accelerate all industries in multiple ways. DR SUKHINDER SINGH DARI tells you how it can benefit lawyers and the legal system.

For a luxurious experience
While luxury education might be a relatively novel concept in the Indian educational space, it has perpetually proven relevance. PRANAV RAJ AGGARWAL tells you what the future holds for the industry.

In the current scenario, when kids are compelled to stay indoors, there has been an increased demand for ways to keep them safe and engaged. The Diwali Festival, the National Centre for Panthers School and Arti Nagpal have organized an E-charity event named The Love Drive, with an aim to educate, entertain and add joy to the lives of children in the city.

The event aims to provide children with a super fun and enjoyable experience while also encouraging social awareness, thereby making a meaningful contribution to society. The activities will include arts and crafts, games, refreshments and more.

The theme of the event is "Love," and the money raised from ticket sales will be donated to the Children's Aid Society to support underprivileged children. The event is open to all children aged 6-12 years, and the family-friendly atmosphere is perfect for kids and parents alike.

Tickets can be purchased online through the official event page or at the venue on the day of the event. For more information, visit the website or contact the organizers directly.

Winter fiesta for kids
With education going online, the role of teachers is also going to take a drastic change, says MINAL ANAND

Teachers of tomorrow
With education going online, the role of teachers is also going to take a drastic change, says MINAL ANAND

The COVID-19 pandemic has forced us to adapt to the new normal, which means choosing courses that are relevant. GAGAN ARORA shares tips on what programme to pursue.

On path of success

The University of Sheffield, UK recently surveyed over 10,000 students and found that 25% of them are more likely to pursue an online course. The trend is evident across the globe with the rise in online education. New courses like Executive MBA, Master of Business Administration (E-MBA) have attracted a lot of students who are looking to pursue their studies from home.

The University of Sheffield offers a wide range of online courses that are designed to meet the needs of students from all over the world. The courses are delivered in partnerships with other universities and organizations, providing a flexible and accessible way to learn. The university offers a variety of courses in fields such as business, economics, and management, as well as courses in more specialized areas like engineering and healthcare.

The online courses at the University of Sheffield are designed to provide a high-quality education that is accessible to students from all backgrounds. The courses are delivered through a combination of video lectures, interactive discussions, and assessments, allowing students to learn at their own pace and in their own time. This flexible approach enables students to balance their studies with their work and family commitments, making it easier for them to pursue higher education.

This is a great opportunity for students who are looking to enhance their skills and knowledge in their field of interest. The online courses offered by the University of Sheffield provide a unique opportunity to learn from world-renowned experts and gain valuable insights into the latest developments in their field.

To know more about the courses offered by the University of Sheffield, visit their official website at https://www.sheffield.ac.uk/.

agriculture sector offers plethora of options

The agriculture sector is undergoing a change due to innovation. The Government is taking steps to boost investments in this field. This has opened doors to youth looking for opportunities, says PREET SINGH SANDHU

India is the second-largest agricultural land in the world. Therefore, the agriculture sector is growing at an average rate of 3% per year. The Government is making a policy to encourage startups who work in the agricultural sector. It is expected that the industry will reach INR 15 lakh crores by 2025.

There are many startups providing new business models. The agriculture sector has suddenly surged prices, very often due to factors such as weather conditions, market fluctuations, and technological conditions, which cannot be ignored. The Government is trying to reduce the burden on farmers and increase the income of farmers by providing them with various types of assistance. The Department of Agriculture is developing the agriculture sector and creating a component for it.

INDIAN INSTITUTE OF TECHNOLOGY BOMBAY (IIT-Bombay) is a top-notch institution in the field of engineering and technology. It is located in Mumbai, India and offers undergraduate, postgraduate, and doctoral programs in various fields such as computer science, electrical engineering, mechanical engineering, and chemical engineering.

IIT-Bombay is known for its quality education and research, and it has produced numerous industry leaders and entrepreneurs. The institute has a strong emphasis on research and innovation, and it collaborates with various industries to develop new technologies and solutions.

The institute also offers a variety of programs that cater to the needs of students who want to pursue a career in the field of technology. These programs include a master's degree in computer science and engineering, a master's degree in electrical engineering, and a master's degree in mechanical engineering.

Students of IIT-Bombay are known for their strong technical skills and their ability to work in teams. The institute has a vibrant student community, and it provides various opportunities for students to get involved in extracurricular activities.

The institute also offers a variety of scholarships and fellowships to help students finance their education. These include the IIT-Bombay Merit Scholarship, the IIT-Bombay Merit Cumulative Scholarship, and the IIT-Bombay Research Scholarship.

If you are interested in pursuing a career in technology, IIT-Bombay is an excellent choice. It offers a world-class education and provides students with the tools they need to succeed in the global technology industry.

Elaborating on this technology, Prof. Prasanta K. Sahoo, Head of the Department of Computer Science and Engineering, said: ‘Any industry that uses a lot of technology, whether it is software or other types of technology, must be able to adapt to the changing trends of the industry. That is why having the right kind of skills is very important for students who are entering the workforce.'

Ongoing projects in the institute include projects in areas such as artificial intelligence, data science, and machine learning. The institute is also actively participating in various research initiatives and collaborations with industry partners.

SOUP, a non-profit organization that supports innovation and entrepreneurship, has set up a programme to help students in the field of technology. The programme provides students with mentorship, funding, and networking opportunities to help them succeed in their careers.

The programme also offers a variety of workshops and seminars that help students develop the skills they need to succeed in the industry. These workshops are led by industry leaders and provide students with valuable insights into the latest trends and technologies in the field.

In conclusion, the Indian Institute of Technology Bombay offers a unique opportunity to students who are interested in pursuing a career in technology. The institute provides a world-class education and offers students the tools they need to succeed in the global technology industry. SOUP is a great resource for students who are looking for support and mentorship as they enter the workforce.

The injury isn’t that bad. It was mainly the pain while batting and fielding only that hurt but you being able to bat again for the team, I really need that and couldn’t risk it for the team.

I just told the girls that these are the last 20 overs of the tournament. Because of the COVID-19 situation, we didn’t know when we’ll come out next, so we wanted to give it our all.

It feels good to pick a faller but it isn’t easy to give it all on the batting side. I worked very hard on my bowling and if I was playing consistently even in the knockdown and I was in touch.

I think the four over mid-wicket bouncer areas, the hard ball at the top of off-stump, the yorkers and a few softer deliveries would be the areas we would have worked on.

**PX DELHI**

D alia captained Shreyas Iyer and Deepak Hooda, who responded to the call of the team and the fans. The match was against Himachal Pradesh but Mumbai Indians claimed the victory. Mumbai Indians retained the trophy by 139-7 on the final day on Monday. The first of Indian cricket to come to the party on the big day, after Tigri picked all three for 31 and set things up.

Those spells won you the game. The event was a challenging total by taking 4-13 and finishing the debut Test in Pakistan on 32-2 in 13 overs. Only 0.5 runs against the #1 Test team in the world. Pakistan Cricket Board’s announcement.

Babar Azam is the first Test batsman to score a century in the final Test against India. He made 108 runs in the first innings at 15.42. The team had planned to build a strong partnership after finishing the first two overs of 10 runs at an average of 8.50. It was tough to bat so I knew any opening bowler could make an impact.

I think we should have scored around 130-140 but somewhere we fell short of 120. I am happy, she said.

However, Mumbai Indians came back strongly during final five overs as the mercurial Rishabh Pant and the experienced player with white-shirt, Rohit Sharma, hit back strongly.
