SC STAYS HC CBI PROBE AGAINST U'KHAND CM

New Delhi: The Supreme Court on Thursday stayed the Uttarakhand High Court's "drastic order" for a CBI probe into corruption allegations against Chief Minister Trivendra Singh Rawat, saying it was passed without hearing him and taking "everybody by surprise". The corruption allegations levelled by two journalists pertained to the money transferred allegedly into the accounts of relatives of Rawat in 2016 when Rawat was the in-charge of Jharkhand BJP unit.

FORMER GUJARAT CM KESHUBHAI PATEL DEAD

Ahmedabad: Former Gujarat Chief Minister Keshubhai Patel died here on Thursday after prolonged illness, family sources said. Patel (92) had recovered from Covid-19 recently and was rushed to a hospital in Ahmedabad Thursday morning following health complications, the sources said.

GOVT BANS EXPORT OF ONION SEEDS

New Delhi: The Government on Thursday banned exports of onion seeds with immediate effect amidst rising prices of the bulb in the domestic markets. Earlier, the export of onion seeds was in the restricted category, which means an exporter was required to obtain a licence or permission from the government for shipments.

PTI ■ ISLAMABAD

In a sensational admission, a senior Pakistani Minister on Thursday admitted that Pakistan was responsible for the Pulwama terrorist attack in Jammu & Kashmir in 2019 that killed 40 CRPF personnel and brought the two countries to the brink of a war.

"Humne Hindustan ko ghus ke maara (We hit India in their home). Our success in Pulwama is a success of this nation under the leadership of Imran Khan. You and we are all part of that success," Science & Technology Minister Fawad Chaudhry said in the National Assembly during a debate.

When some of his fellow lawmakers objected to his mention of "success in Pulwama", the Minister said that "after the Pulwama incident, the way Pakistan went inside the Indian territory to target it, the entire media in India was ashamed of it."

However, he didn't retract his statement about "success in Pulwama" under Prime Minister Khan's leadership.

Chaudhry, a close aide of Prime Minister Khan, made the remarks a day after Opposition Pakistan Muslim League-Nawaz (PML-N) leader Ayaz Sadiq said that Foreign Minister Shah Mahmood

Qureshi in an important meeting pleaded to release Indian Air Force Wing Commander Abhinandan Varthaman, who was captured by the Pakistani Army on February 27, 2019 after his MiG-21 Bison jet was shot down in a dogfight with Pakistani jets.

In the early hours of February 26, 2019, the IAF jets bombed the Jaish-e-Mohammad (JeM) terror camps in Balakot in Khyber Pakhtunkhwa of Pakistan and avenged the Pulwama terrorist attack that claimed the lives of 40 CRPF personnel.

The international community led by the US has pressed Pakistan to deny safe haven to terror groups operating from its soil and bring the perpetrators

of the Pulwama attack to justice.

"Legs were shaking and forehead perspiring, and the foreign minister (Qureshi) told us, 'For God's sake, let him

(Varthaman) go back now because India is attacking Pakistan at 9 PM in the night", Sadiq said, recalling the high-level meeting which was also attended by Army chief Gen Qamar Javed Bajwa, and added that "India was not planning to attack...They just wanted to kneel before India and send back Abhinandan."

Chaudhry, who was the Information & Broadcasting Minister at the time of the Pulwama attack, criticised Sadiq's remarks and termed them as "inappropriate".

He said Sadiq lied with a lot of confidence regarding his statements and asserted that everyone has the right to disagree with the Government but the state should not be subjected to criticism.

Pak leaders shaken with fear as its Min pleaded for release of Abhinandan lest India attack

Islamabad: "Legs were shaking and forehead perspiring" at a meeting of Pakistan's top leaders, including Army chief General Qamar Javed Bajwa, wherein Foreign Minister Shah Mahmood Qureshi

pleaded to release Indian Air Force Wing Commander Abhinandan Varthaman, saying if he was not released, India would attack Pakistan, a top Pakistani opposition leader has said.

Don't want to put you in risk during Covid, says Naveen

CM assures B'swar people to monitor dev works personally

PNS ■ BALESWAR

BID supremo and Chief Minister Naveen Patnaik on Thursday told the voters of the Baleswar Sadar Assembly constituency that he didn't go to them directly because he doesn't want to put any of them in possible danger of Covid-19 infection.

Patnaik said this while addressing voters through videoconferencing from his residence in Bhubaneswar. "I know you all love me. If I had visited Baleswar for poll campaigning, you would have gathered in large number, which is not wise at all when Covid pandemic is prevalent. I don't want that anyone of you fall into danger for me."

Thus, I am meeting you through videoconferencing now. After corona situation comes under control, I will go to you and talk to you about development," said Patnaik.

Terming Baleswar as an important place of the State, Patnaik said his Government has established Fakir Mohan University and a new medical college and hospital. His Government is stressing on the rights and development of the slum-dwellers. As such, a programme has been launched for the development of slums of Baleswar city. The Chief Minister also mentioned about his Government's efforts for empowerment of women.

He concluded, "You all know that the general election will be held after three years. Lots of development work can be done within the period. Like Bijepur, I'll myself monitor the development work of Baleswar. I appeal to you all to vote in favour of BJD candidate Swarup Kumar Das."

93 new +ve in BBSR, total 28,295

Two more die; 254 recover; 57 infected in Cuttack city

PNS ■ BHUBANESWAR

The Covid-19 positive cases dipped further in Bhubaneswar with 93 cases detected on Thursday. With this, the city's positive tally rose to 28, 295, which included 1,722 active cases.

The new cases included 72 local contacts and 21 quarantine cases, the Bhubaneswar Municipal Corporation (BMC) said.

Meanwhile, two more persons succumbed to the disease in the city, increasing the death toll to 162. However, 254 more persons recovered on the day, taking the total recoveries to 27,080.

In Cuttack city, 57 more positive cases were registered on the day, pushing the tally to 14,738, which included 828 active cases.

The new cases included 26 local contacts and 19 institutional and 12 home quarantine cases. As many as 57 more persons recovered on the day taking the city's total recoveries to 13,843.

STAFF REPORTER ■ NEW DELHI

Delhi's air quality inched closer to the severe category on Thursday morning as pollution levels rose sharply after a marginal reduction, primarily due to calm winds and spike in farm fires.

The Central Government's Air Quality Early Warning System for Delhi said a significant increase in the number of "fire points" was observed over Punjab (around 3,000), Haryana and Uttar Pradesh which is likely to impact the air quality of Delhi-NCR and other parts of northwest India.

Delhi recorded an air quality index (AQI) of 397 at 11 am on Thursday. The 24-hour average AQI was 297 on Wednesday, 312 on Tuesday, 353 on Monday, 349 on Sunday, 345 on Saturday and 366 on Friday.

Sixteen monitoring stations, including at Shadipur (406), Patparganj (411), Jahangirpuri (429) and Vivek Vihar (432), recorded air quality in the "severe" category.

An AQI between 0 and 50 is considered "good", 51 and 100 "satisfactory", 101 and 200 "moderate", 201 and 300 "poor", 301 and 400 "very

poor", and 401 and 500 "severe". A senior scientist at the India Meteorological Department (IMD) said the wind speed dipped on Wednesday which allowed accumulation of pollutants. "Following slight relief, the air quality again entered the 'very poor' category by the evening," he said.

PM10 levels in Delhi-NCR stood at 420 microgram per cubic meter (µg/m3) at 10 am — the highest this season so far, according to CPCB data.

PM10 levels below 100 µg/m3 are considered safe in India.

PM10 is particulate matter with a diameter of 10 micrometers and is inhalable into the lungs. These particles include dust, pollen and mold spores.

Farm fires worsen Delhi's air to 'severe'

₹1 cr fine, 5-yr jail for polluters: Govt's anti-pollution Ordinance

PNS ■ NEW DELHI

Pollution-related offences will now invite a jail term of up to 5 years and a penalty up to ₹1 crore. The Centre issued an Ordinance — Commission for Air Quality Management — on Wednesday night after the approval of President of India to curb air pollution in Delhi and NCR.

In recent years, the region has been facing huge air pollution issues with respective Governments in Delhi, Haryana, Uttar Pradesh and Rajasthan passing the buck on each other.

The ordinance will also have the power to prohibit activities that are likely to cause or increase air pollution in the NCR and adjoining areas. "The Ordinance may be called the Commission for Air Quality Management in National Capital Region and Adjoining Areas

Ordinance 2020. It shall apply to NCR and also adjoining areas in so far as it relates to matters concerning air pollution in the NCR. It shall come into force at once," said the notification issued by the Union Law Ministry.

As per the Ordinance, the adjoining areas where it shall be in force include Punjab, Haryana, Rajasthan and Uttar Pradesh, adjoining areas of the NCR and Delhi where any source of pollution is located which is causing an adverse impact on air quality in the NCR.

The commission which will be heavily dominated by bureaucrats will consist of over 20 members, including a chairperson, who is or has been a secretary of the Government of India or chief secretary of a State, a representative of Environment Secretary and five ex-officio members who are either chief secretaries or secretaries in charge of the environment

departments of Delhi, Punjab, Haryana, Rajasthan and Uttar Pradesh, it added.

"There shall be a full-time secretary who shall be the chief coordinating officer of the commission and shall assist in managing the affairs of the commission," it said.

The commission which will have three sub-committees, one each for monitoring and identification, safeguarding and enforcement, and research and development will have power to take mitigation measures, issue directions/orders suo moto and entertain complaints under any other existing laws such as the Air (Prevention and Control of Pollution) Act, 1981 and the Environment (Protection) Act, 1986.

The EPCA in the last 22 years when it was set up by the apex court has introduced several important interventions to control pollution.

Covid survivors could carry virus: Research

Findings show 16.7% recovered patients tested +ve in follow-up

PNS ■ NEW DELHI

Covid-19 survivors should not drop their guard and should avoid close contact with others as they could still be carrying the virulent coronavirus, researchers have said.

According to a study, published in the American Journal of Preventive Medicine, close to 17 per cent of patients considered fully recovered, as per the WHO criteria, from Covid-19 tested positive for the virus in follow-up screening.

Patients who continued to have respiratory symptoms, especially sore throat and rhinitis, were more likely to have a new positive test result.

This suggests the persistence of these two symptoms should not be underestimated and should be adequately assessed in all patients considered recovered from Covid-19. Researchers from Agostino Gemelli University Policlinic

Covid-19 IN INDIA
TOTAL
CASES: 80,71,140
DEATHS: 1,20,910
RECOVERED: 73,48,735
ACTIVE: 6,00,095

looked at a group of recovering Covid patients to see how their bodies react after treatment and quarantine.

The study included 131 patients who all met the WHO's guidelines for ending quarantine following their infections. Those guidelines require a patient to be fever-free without using medications for three days. They must

also have an improvement in their symptoms and test negative for Covid twice at least 24 hours apart.

"Researchers have focused on the acute phase of Covid-19, but continued monitoring after discharge for long-lasting effects is needed," said the study lead author Francesco Landi from Catholic University of the Sacred Heart in Italy.

A new RT-PCR test was administered at the time of post-acute care admission.

Demographic, medical, and clinical information was collected, with an emphasis on the persistence of symptoms and signs related to Covid-19 such as cough, fatigue, diarrhea, headache, smelling disorders, loss of appetite, sore throat, and rhinitis.

Protesters set on fire furniture after clashes with the police over immersion of Goddess Durga idols in Munger on Thursday

PTI

PNS ■ NEW DELHI

Fresh violence erupted in Munger on Thursday even as the Election Commission (EC) shifted out Bihar's Munger District Magistrate Rajesh Meena and Superintendent of Police Lipi Singh. The protesters set some police stations and outposts on fire and ransacked the SP office.

The EC has also ordered an enquiry into the firing and stone-pelting during the immersion of an idol of Goddess Durga on late on Monday in which one person

had died and several others were injured. The poll body has asked Magadh Divisional Commissioner Asangba Chuba Ao to complete the probe within a week. The EC has also asked the State Government to appoint a new DM and SP in the district soon. Meanwhile, in a fresh violence, the agitated crowd, comprising mostly youth, set police outposts at Purab Sarai and Basudeopur on fire, and ransacked the SP office and several other police stations and outposts. The office of SDO was also allegedly targeted by the protesters.

13 more die, State Covid toll up to 1,297

1,617 new +ves; total now 2,87,099; 1,908 recover; total recoveries 2,72,038

PNS ■ BHUBANESWAR

As many as 13 more patients succumbed to Covid-19 in eight districts of the State on Thursday, increasing total death toll to 1,297. While two deaths each occurred in Khordha, Cuttack, Baleswar, Nuapada and Angul districts, one each succumbed in Keonjhar, Jagatsinghpur and Sambalpur.

The deceased in Khordha included a 49-year-old man and a 71-year-old woman (both of Bhubaneswar). The deaths in Nuapada were of a 52-year-old man and a 52-year-old man.

The fatalities in Baleswar were a 41-year-old man and a 50-year-old woman. The deaths in Nuapada were of a 65-year-old man and a 50-year-old man. The casualties in Angul were a 43-year-old man and a 60-year-old woman.

The other deceased were a 58-year-old man in Keonjhar, a 48-year-old man of Jagatsinghpur and a 48-year-old man of Sambalpur. Meanwhile,

compared to last few days, new positive cases increased on Thursday with a figure of 1,617. With this, State's total caseload mounted to 2,87,099, which included 15,619 active cases. Of new cases, 941 were from quarantine while 676 were local contacts.

Khordha registered highest 222 cases followed by Cuttack 128, Sundargarh 93, Mayurbhanj 85, Kalahandi 84, Jagatsinghpur 80, Baleswar 76, Puri 76, Angul 75, Balangir 68, Nuapada 59, Kendrapada 54, Keonjhar 53, Dhenkanal 45, Jajpur and Nayagarh 40 each, Jharsuguda 39, Bargarh 35, Nabarangpur 33, Koraput 32, Bhadrak 30, Sambalpur 22, Ganjam 20, Boudh 19, Malkangiri 17, Rayagada 15, Kandhamal 14, Deogarh 11 and Gajapati and Subarnapur eight each.

Besides, 36 cases were reported from State pool. With 41,395 Covid tests were done during period, State's cumulative tests rose to 44,63,559. However, another 1,908 persons recovered on day, taking total recoveries to 2,72,038.

RBI lauds Odisha Govt’s fiscal reforms

‘Approaches help State recover from financial crises’

PNS ■ BHUBANESWAR

The Reserve Bank of India (RBI) has appreciated the efforts of Odisha Government in taking up reforms in financial management, which is helping the State recover from financial crisis during Covid 19 pandemic. The RBI’s latest report on the State Finances and Experience of Odisha pointed out that the Government identified “fiscal risk management” as one of the key reforms suggested by the IMF South Asia Regional Training and Technical Assistance Center (SARTTAC) in 2019.

The State has adopted a three-stage approach to fiscal risk management with identification and measurement of

fiscal risks, fiscal risk reporting and mitigation and management of fiscal risk. All possible sources of fiscal risk were identified and the impact of each fiscal risk worked out as ratio of GSDP and classified as high, medium and low on the basis of the level and possibility of occurrence.

The State Government also used the IMF’s State-Owned Enterprise Health Check Tool to assess the financial health of the State PSUs. Fiscal risk reporting, critical approach for transparency and public disclosure are envisaged through a two-stage approach, remarked the RBI.

First, a fiscal risk register as part of the mid-year fiscal strategy report identifying the sources of fiscal risks exposure

and likelihood and severity of risk materialization has been put in place. Secondly, a fiscal risk statement to be released along with the annual budget documents would incorporate all possible fiscal risks for the State in quantified terms.

This statement would be a part of the disclosure that the government intends to bring out, starting from the financial year 2021-22. As a part of fiscal risk management measure for Covid-19 crisis, the State would utilise a portion of the CSF for amortisation of the entire open market borrowing during 2020-21.

The State intends to broaden base coverage of funds and uses them to address possible fiscal stresses in future, pointed out the RBI.

Covid facilities’ functioning extended to Dec 31

PNS ■ BHUBANESWAR

The State Government has extended functioning of Covid-19 health facilities, which have signed MoUs with administration or funding agencies till December 31.

“After careful consideration of the recommendation of the Technical Committee, Government has been pleased to extend functioning of Covid-19 facilities who have signed MoUs with Government and/or funding agencies, for another period of three months with effect from 1.10.2020 up to 31.12.2020,” Health Department said in a letter to all Collectors.

Further, to rationalise use of general beds, number of these beds approved in facilities which have shown less than 50% occupancy in last two weeks shall be reduced by 50% of approved capacity. The approved capacity in intensive care units (ICUs).

Hirakud Dam oustees’ plight

NHRC seeks report from Chief Secy by Dec 7

PNS ■ KENDRAPADA

The National Human Rights Commission (NHRC) has sought a comprehensive report from the Chief Secretary of Odisha on the issue of large scale displacement and subsequent failure of the Government in rehabilitation and resettlement of more than 26,000 families due to construction of the Hirakud Dam, a world class project.

Adjudicating the case filed by Supreme Court lawyer and rights activist Radhakanta Tripathy, the NHRC passed the order seeking a reply by December 7.

Explaining plight of the displaced victims, Tripathy stated that without proper rehabilitation and compensation more than 26,000 families have been displaced for construction of Hirakud Dam pro-

ject. The execution of Hirakud Dam Project had submerged more than 360 villages covering more than 1,23,000 acres of land and displaced more than one lakh people.

About 70 years have gone, even the third generation of the victims could not get justice due to corrupt and lethargic bureaucracy, Tripathy alleged.

Pursuant to the direction of the NHRC, the Revenue Divisional Commissioner (RDC), Northern Division, Odisha, in his report had submitted that the land was acquired for Hirakud Dam Project during the year 1952-53. Steps were taken from time to time to mitigate grievances of the displaced families who belong to Jharsuguda, Sambalpur, Bargarh and Subarnapur. The issues with regard to DC Patta, payment of ex-gratia, homestead land, set-

tlement of agriculture land, basic Amenities etc. stand settled.

It has, however, been admitted that certain service groups of people including Jhankar, Chowkidar, Nariha, Dhoba and Bhandari were not awarded full compensation and yet to be rehabilitated.

Tripathy in his rejoinder alleged that the displaced families are yet to be compensated and rehabilitated and has given specific instances and details in support of his allegations and requested the NHRC to depute its Special Rapporteur for fair probe.

The NHRC had deputed its Special Rapporteur for detailed investigation. In his investigation report of the Rapporteur stated that a large number of people have not got compensation and yet to be settled.

Ex-Puri BJP chief Mishra no more

Was popular as ‘cycle man’

PNS ■ PURI

BJP leader Sarat Mishra passed away due to heart attack at his house in native Khajuria village near Brahmagiri on Thursday. He was 70 and is survived by his two married sons and daughters.

Mishra was the district president of the BJP for four consecutive terms. His demise sent a shockwave not only among BJP leaders and workers but also among outsiders for his simplicity and cohesive attitude.

He was very popular for his cycle and Brahminical sandal Tipa on forehead and Kurta-Pyjama wears, besides a betel-chewing mouth.

Even till recent time, he was pedalling to visit meeting places of the party.

ECoR workers observe ‘Protest Day’

Demand ₹24K minimum pay, send memo to PM

PNS ■ BHUBANESWAR

The East Coast Railway Mazdoor Union (ECoRMazU) raised various labour issues while observing the “Nationwide protest day”, called by the Bharatiya Mazdoor Sangh, on Wednesday.

Earlier, the ECoRMazU had conducted “Chetawani Saptah” from October 10 to 16 against the anti-labour policy of the Union Government.

On Wednesday, the ECoRMazU submitted a 10-point charter of demands to the Prime Minister through DRMs of Khurda, Sambalpur and Waltair at division Level, CWM/MCS at workshop level

and GM/ECoR at zonal level. General secretary Sachita Nanda Biswal in presence of Khurda BMS secretary Santilata Sethy and BMS district president Ganeshwar Das and other members of the ECoRMazU were present.

The demands include removal of anti labour provisions in the newly-enacted

labour codes, stopping of privatisation in Railways and abolition of contract workers system, revision of PLB ceiling at 18,000 per month, restoration of old pension scheme, minimum pay of Rs 24,000, immediate defreeze of DA and Implementation of MACPS benefits with promotional hierarchy in every five years.

Youth loses vision after being thrashed by cop

PNS ■ BARIPADA

In a yet another instance of police excesses, a youth lost his vision in one eye after allegedly being beaten up by a Constable for not wearing a helmet at Baripada on Wednesday.

Sipu Das of Baripada fell sick and rushed to Station Bazaar to get medicines without wearing helmet. On his way back, policemen deployed for vehicle checking intercepted him near the Palbani by-pass.

When he was about to park his motorcycle, a Constable of Reserve Police started hitting him with a lathi. Sipu was hit in her right eye with the stick that led to severe bleeding.

Seeing the injury, the cops released him from the spot.

After reaching his house when his eye swelled and the pain worsened, Sipu’s family admitted him to the PRM Medical College Hospital here. Reportedly, the pupil of the eye was damaged.

After the news surfaced, district SP Smit P Parmar took up the matter seriously and assured to take stringent action against the guilty.

No Nagarjuna Besha darshan

PNS ■ PURI

Devotees would not be allowed to pay obeisance to the deities at the Jagannath Temple in Puri during the Lord’s Nagarjuna Besha scheduled on November 27.

A decision was taken in this regard during a meeting of the Srimandir Niti Sub-Committee on Thursday. In view of Covid-19, the sub-committee decided not to allow public darshan of the Nagarjuna Besha.

Notably, the Nagarjuna Besha of the Holy Trinity falls in every 25 years. Earlier in day, the Puri district administration imposed restrictions on visit Habisyalis to city during holy month of Kartik. The administration requested Habisyalis not to visit city unless it is completely necessary.

Wrong challan, but...

Car owner heckled by Cuttack RTO

PNS ■ BHUBANESWAR

A vehicle owner of Bhubaneswar, who had been issued a wrong challan by the Cuttack Regional Transport Office, was allegedly threatened and heckled by the Regional Transport Officer (RTO) when he informed him about it on Thursday.

According to Pitabsh Nayak, his car ODO2AJ 3155 had been parked at his home when the traffic violation notice of October 27 was issued. Nayak had received an e-challan from the Cuttack RTO asking him to pay Rs 2,000 as fine for a traffic rule violation at 10.56 am on October 27. When he went to the Cuttack RTO office to inquire about the matter and showed his vehicle’s photo to the RTO staffs, they admitted that it was a mistake and told him the challan would

be cancelled. But when he wanted to meet the RTO personally regarding the matter, the staffs allegedly misbehaved with him. The RTO also threatened to send him to jail, alleged Nayak. He questioned how can two vehicles have the same registration number. His car is a commercial vehicle while the challan was issued for a non-commercial vehicle.

“If someone commits a crime with the vehicle with the same registration number, I would land in trouble. I suspect that the other vehicle is a stolen one or there is some fraud,” he said.

ATC, Akshaya Patra provide 84K meals in Puri

PNS ■ BHUBANESWAR

The American Tower Foundation, the global Philanthropic initiative of American Tower Corporation (ATC), has partnered with the Akshaya Patra Foundation to distribute grocery kits pan India through the ATC CSR Foundation India as Covid-19 relief measures.

The programme aims to provide 19 lakh meals across 31 locations to families who have been adversely impacted owing to the ongoing coronavirus pandemic.

The distribution drive in Odisha was carried out over a period of 14 days, providing 2,000 grocery kits (Which made around 84,000 meals).

ATC Asia president Amit Sharma said, “As an engaged member of the business and broader social community, American Tower Corporation (ATC) is committed to sup-

port Covid relief work and provide assistance through its NGO partner Akshaya Patra Foundation by making available grocery and ration kits to the vulnerable communities.”

Each food kit comprised rice, wheat flour, sugar, pulses, cooking oil, and salt. The distribution drive was conducted across various locations in Puri.

Akshaya Patra Foundation CEO Shridhar Venkat said, “We are deeply grateful to American Tower Foundation for collaborating with us in reaching out to distressed and unserved communities. Covid-19 has reinforced that we must collectively help those facing economic hardships.

During this entire pandemic phase, we have served 80 million meals to families, thanks to donors such as American Tower Foundation.”

Coal search at Mandakini mines fast-tracked

Angul DM asked to prepare rehab package, talk to people directly

PNS ■ BHUBANESWAR

The issues relating to coal exploration at the Mandakini coal mines in Angul district have been put on fast track with Chief Secretary Asit Tripathy reviewing and resolving the issues on Thursday.

Steel and Mines Principal Secretary Surendra Kumar outlined various contours of the issues for discussion.

The matters relating to conduct of socio-economic survey (SES), processing of forest diversion proposal, procuring environmental clearances, drilling activities for estimating resource quality and preparation of scientific mining plan were discussed in meeting. Tripathy directed Angul district Collector to prepare a comprehensive rehabil-

itation package as per provisions of the coal bearing area development act and rehabilitation policy of the State.

He asked the Collector, the SP and the concerned Tehasildar to communicate with would-be-affected people directly without any middle man and explain them properly about the rehabilitation package.

“Proper housing with basic infrastructure facilities must be made in rehabilitation sites, said the Chief Secretary.

Forest and Environment ACS Dr Mona Sharma appraised that a forest diversion proposal has been prepared, which would be sent to Ministry of Forest and Environment in the coming week.

Kumar apprised that Nabkrushna Choudhury Center for Development Studies made pre-study preparations for socioeconomic survey. It was decided to start SES and non-coal proving operations in the coming week.

‘Political will key to environ protection’

PNS ■ BHUBANESWAR

The Orissa Environmental Society (OES) celebrated its 39th foundation day and award function through videoconferencing under chairmanship of its president Dr Sundara Narayana Patro on October 25. Former Chief Secretary Bijay Kumar Patnaik, former ADG (Tiger Project) and NTCA Member Secretary Dr Anup Kumar Nayak graced the occasion as guests. Appreciating initiatives of the OES in the environment front, Patnaik emphasised on resolving con-

flict between environment and development, and preserving quality of our environment. He stressed on enhanced political commitment that holds key to generating public awareness on environmental protection. Dr Nayak delivered 9th Prasanna Kumar Dash memorial lecture on “Tiger conservation scenario

in India”. “Tiger as a flagship species plays a significant role in maintaining equilibrium of forest ecosystems. India with 70% of world’s tiger population needs to fortify its 32 major tiger corridors to enhance habitat connectivity. Odisha also holds a lot of promise with Similipal, Sunabeda, Satkosia, Debrigarh

and other areas as potential tiger territories,” he said. On occasion, former Additional PCCF and Chief Wildlife Warden Saroj Kumar Patnaik was felicitated with the Lifetime Achievement Award, former KIIT School of Electrical Engineering Director Er Mayadhar Swain was bestowed with Dr BC Panda Award for Environment and Science Communication and nature and environment conservation activist Prasanna Kumar Behera was conferred with Parvati Mishra Memorial ‘Environmentalist of Year Award 2020.

AIIMS OPD services from Nov 2

PNS ■ BHUBANESWAR

The All India Institute of Medical Sciences (AIIMS), Bhubaneswar would start its Out-Patient Department (OPD) services from November 2 to cater to patients’ needs. The OPD was closed from July 10 due to Covid except for day-care services, radiotherapy, dialysis, trauma

and the emergency and life-saving surgery and IPD services. Initially, the number of registrations would now be restricted to 30 patients per department per day until November 8.

The number of registrations would be increased to 50 patients per department per day for a week from November 9 onwards.

RTOs open on Oct 31

PNS ■ CUTTACK

The State Transport Authority (STA) on Thursday asked all Regional Transport Offices (RTOs) to remain open on October 31 from 3 pm to 5 pm for vehicle registrations even though the day is a Government holiday on the occasion of Lakshmi Puja.

The decision was taken as it is expected that sale of motor vehicles would increase during the Lakshmi Puja this year. For smooth disposal of dealer point registration and approval, the RTOs were asked to do the job from home.

SOCIAL CANVAS

Coastal highway Odisha’s long overdue

MANAS JENA

The natural advantage for Odisha is its 480 km coast

Let not project be delayed

line. But the same has not been explored fully for the development of the people of the State. Today connectivity infrastructure has become a lifeline of contemporary development and non-connectivity perpetuates socio-economic backwardness.

But in spite of popular demand for a coastal highway and the promise of one by the Central Government in 2015, little progress has been achieved in the project so far. Both the Centre and the State have been responsible for such delay in neglecting a backward State. There are

tremendous potentials of port based high value economic activities in the coastal areas and opportunities of ecotourism by developing road, rail and air connectivity.

In the whole range of areas from Talasara of Baleswar district to Bahuda Muhana of Ganjam district, there are about 15 locations which can be developed into small ports and corridors of export and import linking two major developed port areas of neighbouring States.

This will pave the way for industrialisation in the areas, especially for manufacturing

units and agro-based industries. The existence of eco-hubs such as Chilika lagoon and Bhitarkaniaka sanctuary and other locations and heritage spots can be fully developed as epitome of tourist destinations of international standard with all modern facilities to attract the people from all over the world.

This can be further developed as destinations for health care centers, educational institutions and corporate offices linking people globally to generate employment and bring change in quality of life of the local peo-

ple suffering since generations in spite of development of science and technologies.

The backwardness of Odisha remain unchanged despite so many plans and programmes. The poorest State is identified as a major contributor of distress migrant workers to India and outside. The State has also not yet substantially reduced the poverty level of its inhabitants.

Not only distress migration or poverty but also in the field of health and education, the State performed very miserably in comparison to other developed States of the country. The need of major public investment in connectivity such as road and railway,

besides in canal and industrialisation in coastal areas has always been treated with less priority. It is a fact that whatever development happens today it is because of very few projects such as Paradip express highway, Paradip port and some industries.

Though both the mineral resources and sea coast are two natural advantages of Odisha but they have not been focused in the State development model as priority sector investment.

Since generations it has been told that Odisha has enough natural resources and the key to its development is optimum use of them. However, there has been lit-

tle plan of investment to tap the natural resources. The federal principles of Indian democracy are not respected and followed in letter and spirit and regional imbalances continue to afflict the country.

The States having natural resources are exploited for overall development of the country while the interest of the mineral bearing backward States is ignored.

The States are not allowed with financial autonomy for utilisation of their own strategic resources for the people either.

Odisha has been facing such continuous negligence by the Centre since years. Despite a long standing

demand for mineral royalty revision and according the special category State status by Odisha, the Centre has lent a deaf ear.

Therefore, time has come for the Odisha Government to refrain from making investment in charity work and lay focus in building connectivity all over the State including a coastal highway.

The fate of coastal highway as promised by the Union Government must not be like that of the Khordha-Bolangir railway line which was planned by the British but was yet to see the light of the day even after 75 years of independence.

21 yrs on, Super Cyclone still haunts K’pada residents

Those who lost family members yet to get over gloom

RJESH BEHERA
■ KENDRAPADA

The people in several villages have not forgotten the Super Cyclone nightmare as yet despite passage of 21 years. The cyclone that had ravaged the State in 1999 took 387 lives in Kendrapada district.

As many as 1,308 villages across nine blocks besides two urban local bodies in the district had borne the nature’s fury. The State Government provided Rs 44 crore as ex-gratia and for rehabilitation work after the cyclone.

For octogenarian tribal widow , Parbati Kisko, a resident of Panikhia under Lanjuda GP of Mahakalapada block, the trauma of losing four members of her family, including husband, daughter and two grand children , is still afflicting her

when she reminisces that fateful day. “The storm blew away everything at a stroke.

I was witness to the tragedy that unfolded right before my eyes. Our village located near the sea under Gogua GP faced the onslaught straightaway. Everything was over in a few minutes. My husband, daughter met watery grave following

8 feet long tidal wave swept away all my family members when they were trying to ride on the roof top. I survived as I luckily was already on the roof top,” said Parbati.

As many as 12 people had died in her Gram panchayat in the cyclone. Similarly, for Rajaram Pal and Malati Patra of Sandhakuda slum, life has

come to a full circle after the 1999 gale. While Rajaram lost his 8 family members, including father ,mother , siblings ,wife and his two children following the tidal wave came crashing and swept all his family members, his eldest son was rescued in nick of time while he was drowning.

Similarly, Malati had also lost all his six family members, including husband, two sons and a daughter , in the catastrophe. The death of her husband and kins followed by a struggle for survival had left her to fend for herself.

After the cyclone, Rajaram failed to take care of his eldest son. As a result the villagers of Sandhakuda managed to unite the widower Rajaram with the widow Malati by solemnising their marriage.

Tiding over adversities, the

couple is now leading an easy life with their children these days. Every year on October 29, their faces turn pale and hearts grow heavy when they pay tribute to their lost family members .

Another Super Cyclone victim, Tapaswini Senapati (37) of Tentulikanda village under Barkanda GP of Mahakalapada block recounting the fateful night stated with tearful eyes, she lost her uncle, aunt and her sister in the catastrophe. The tidal water had swept away her family members .

“As we have a building so the villagers came to take shelter. Suspecting the building would collapse due to the crowd, I, my sister, my uncle’s daughter, uncle, aunt and four others came out from the house in order to go to other safer place in the village. But as ill

luck would have it, the tidal water swept away my uncle, aunt and my sister. I and my uncle’s daughter managed to hold tamarind tree branches and managed to spend more than 24 hours by drinking the gale water.

We spent time with poisonous snakes,” said Tapaswini, who has been eking out a living by operating a betel shop at her village.

Similarly, Kalandi Hati, a resident of Tentulikanda remembering the dreaded night stated that he had lost his father,mother, elder brother, elder sister-in-law and a nephew in the gale as the sea water barged into the house and swept away all the family members.

Notably, 27 people had died in Barkanda gram panchayat due to the super storm.

JSpur holds Super Cyclone anniv

PNS ■ JAGATSINGHPUR

The 21st Super Cyclone anniversary was observed by the Jagatsinghpur district administration amid Covid-19 guidelines on Thursday.

District Collector Saroj Kumar Mishra lighted a lamp at the memorial pillar stands remembering Super Cyclone

deceased in front of the Collectorate. He paid homage to the victims and said the Super Cyclone of 1999 is an unforgettable disaster especially for Jagatsinghpur district, which had faced widespread destruction and thousands of human casualties. Other district officials were present on the occasion.

Flying Squad officials attacked

PNS ■ JAGATSINGHPUR

As many as four officials of a Flying Squad were attacked and injured at Madhyasana under Biridi police limits in Jagatsinghpur district on Wednesday night. An FIR against more than 40 persons has been lodged in this

connection. According to reports, the Flying Squad led by Additional Tehsildar had conducted a raid at Madhyasana after receiving information that a feast was being organised in the locality in violation of the Covid-19 guidelines. During the raid, a faceoff situation emerged between the Flying Squad.

In Ganjam

One killed, 2 hurt while assembling bombs

PNS ■ BRAHMAPUR

A person was killed and two others were critically injured in an explosion while they were allegedly assembling bombs to be used for hunting in a house at K Bhimpur village under Badagada police station in Ganjam district on Thursday.

The deceased were identified as Bulu Mallick of K Bhimpur while the injured were Prakash Nayak and Nandiya Nayak- of the nearby Batasasan village. They were shifted to Sheragada hospital.

As per reports, the three were assembling country-made bombs in morning when the explosion took place leading to the death of Bulu at spot.

MLA Gond harvests paddy at farmland

PNS ■ NABARANGPUR

In an exemplary act inspiring others to take up agriculture, Umakote MLA Nityanand Gond along with his wife Chaiti, a teacher by profession, and local farmers has been reaping paddy at his farmland in Nabarangpur district.

Born in a farmer family, Gond often devotes a significant amount of time to farming despite his busy schedule as an

MLA. “I always consider myself as a farmer in terms of my primary identity. Whenever I find spare time, I engage myself in agriculture. Earlier, I was able to give more time to farming.

However, after being elected as an MLA, my responsibilities have increased; and currently I can’t devote that much of time to farming,” Gond said. He advised youths to take up agriculture and contribute to nation’s progress.

Kin suspects fishy, lodges FIR

70-yr-old woman missing in Ganjam

PNS ■ BRAHMAPUR

Hemalata Mallick (35) of Chhanna Bagada village under the Digapahandi police circle led by Ganjam BJP district vice-president Paresh Chandra Rath, former State secretary Srikanta Padhi, Simanchal Sasmal, Narayan Mallick and Alok Nayak met the IIC, Digapahandi Police Station and lodged a FIR demanding protection to senior citizens and conduct of an impartial probe into missing of her physically disabled aunt Saibani Mallick (70) since October 10 evening.

According to Hemalata, the missing case was linked to an old family rivalry in the village. Some aggrieved villagers had threatened to kill her and other members of her family to

settle a score. Following the threat to her life, Hemalata who was staying with her aunt to take care of her had shifted to another nearby village ‘Nuabandhapalli’ where she was staying since last about one month.

But to look after her old, ailing, and disabled aunt, Hemalata was frequently paying visit to Chhanna Bagada village at regular intervals. On October 12 she came to know that her aunt was missing from home and on arriving there she noticed further that her utensils were scattered and all doors were opened.

She was worried about condition of her old aunty and suspected something fishy. Demanding immediate step to locate her aunty, she sought an impartial Probe into matter.

Sarda Mines asked to stop ore dispatch to JSPL

2 officers of Joda mining office axed

RAJENDRA K SAHU
■ CHAMPUA

By an order of Joint Director of Mines (JDM), Joda ,despatch of iron ore from Sarada Mines Private Limited to Jindal Steel and Power Limited(JSPL) situated at Deojhar near Barbil of Keonjhar has been stopped since October 22 till further orders.

The Sarada Mines situated in three adjoining villages such as Soyabali, Balita and Thakurani has been asked to stop the despatch activities.

JDM Joda Salil Behera said

that a team of State Level Enforcement Squad (SLES) of the Director of Mines had inspected the mines on October 6.

Basing on the observation, he was asked to take action against the lease holder, said Behera. However, sources close to Director of SMPL Arjun Saraswat Sharma revealed that on October 22 , a show cause notice was issued to them by the Director of Mines , Bhubaneswar to submit a reply with regard to irregularities in stacking and sampling in the mines.

Simultaneously, another order came from the JDM, Joda to stop the despatch. On the other hand, sources close to the JSPL revealed that they had some stock in the dispatch

point of SMPL for which necessary royalty and tax had been paid by them.

Moreover, they have also an order with them from the Supreme Court dated 30.01.2020 to transport the stock from dismatch point of SMPL. So the order to stop transportation is a violation of SC order, the JSPL sources maintained. However, Director of Mines sources revealed that there was some mess with regard to stock permitted in favour of JSPL.

Sources further revealed that Mining Officer Prasanna Kumar Panda and Junior Mining Officer Gokulananda Behera have been suspended over the issue after which there is an atmosphere of fear among all staff in the mining office.

INBRIEF

YOUTH FOUND DEAD ON RAILWAY TRACKS IN BBSR

Bhubaneswar: A youth was found dead on railway tracks at the Patia railway station here on Thursday. The identity of the deceased, believed to be of 30 to 35 years old, was yet to be ascertained. Though the exact reason behind the death was not known, preliminary investigation suggested that he might have died after being hit by a train. The body has been sent to the Capital Hospital here for postmortem. The Government Railway Police (GRP) lodged an unnatural death case in this connection.

EX-IPS OFFICER ON MORNING WALK DIES IN BBSR

Bhubaneswar: Retired IPS officer and former DGP of Jammu and Kashmir Milan Mohanty died on Wednesday while on a morning walk at the Forest Park here. While walking on a pavement, he suddenly collapsed. He was rushed to the Capital Hospital, where doctors declared him dead.

NANDANKANAN OFFERS VIRTUAL TOUR

Bhubaneswar: Good news for wildlife lovers that they would get connected with the Nandankanan Zoological Park (NZP) from home amid the Covid -19 pandemic as the NZP authorities have now offered a virtual tour of the zoo. The visitors can see the animals and can enjoy the beauty of zoo virtually staying at home, informed the NZP in a tweet.

DHENKANAL MP DISTRIBUTES FOOD KITS TO POOR

Pallahara: As a support during Covid-19 pandemic, Dhenkanal MP Mahesh Sahoo distributed 300 food kits to poor people of Pallahara block on Wednesday. Each kit contained 16 kg of ration items, including rice, dal, oil and sugar. The MP too assured to distribute more food kits to needy people in coming days. Even as people expressed happiness over the kit distribution, some political opponents criticised the MP for providing kits too late.

BLOOD DONATION CAMP FOR EX-MLA'S BIRTHDAY

Sambalpur: BJD activists on Wednesday celebrated former Sambalpur MLA Dr Raseswari Panigrahi's 74th birthday in a very simple manner. They also organised a blood donation camp, where 75 units of blood were collected. People at Burla and Hirakud also celebrated her birthday by distributing fruits and sweets to poor people and patients and lighting lamps in temples. After her defeat in the 2019 election, Dr Panigrahi is devoting the first half of the day in service of patients as she is a renowned gynaecologist.

TWO POACHERS HELD FROM KAPILASH SANCTUARY

Dhenkanal: Forest officials have arrested two poachers from the Kapilash Wildlife Sanctuary in Dhenkanal district. The arrested are identified as Tuna Karua (19) and Twin Kondalkane (20) of Rameikhamar village under the Gondia police limits. Eight arrows and a country-made gun were seized from their possession. A case has been registered against them and they were forwarded to court.

POEM COLLECTION 'MO PRITHVI' RELEASED

Champua: “Mo Prithvi”, a compilation of poems, was released in a special programme organised by the Matilagna Sahitya Sansad on Thursday. Its writer Sarada Prasad Acharya, who was born at Salipur, is now established at Joda town. He also works as a reporter from Joda for an Odia daily.

Man blackmails Anganwadi Worker with obscene video

PNS ■ BALESWAR

The Jaleswar police in Baleswar district arrested a 30-year-old married man on the allegation of video-recording his intimate moments with a married Anganwadi Worker and trying to extort money from her. The accused was identified as Bikram Pradhan. A private bank employee, Pradhan had come in contact

with the woman three years ago and had kept a physical relationship with the victim after getting intimate with her.

Later, he blackmailed the victim to make their intimate moments video viral if she doesn't pay him Rs 30 lakh. When the woman refused to pay the money, he uploaded the videos and pictures in social media and forwarded it to her husband.

IN KORAPUT

CDPO arrested taking ₹1.75L bribe

PNS ■ KORAPUT

Vigilance officers arrested Koraput district's Nandapur Child Development Project Officer (CDPO) Snigdharani Mishra while demanding and accepting a bribe amount of Rs 1.75 lakh from a person to pass a SHG bill of Rs 9,47,843 on Tuesday.

She was taking the bribe money from one Snehalata Dalapati, a member of the Tini Bharabi SHG, Badsan Sahi, Nandapur when she was caught red-handed.

The SHG was engaged in supplying take home ration (THR) to Anganwadi Centres and, thus, had to get Rs 9,

47,843 for the month of September. Later, the Vigilance sleuths conducted raids on her office rooms and residence at Semiliguda.

Mitigating hunger: India cuts a sorry figure

GOURANG CHARAN PARIDA

In a just-released report of Global Hunger Index (GHI) -2020 by the UN, India's position is disappointingly poor. India ranks at 94 out of 107 nations of the world, placed in the category of “serious”.

The more disappointing story is that India ranks below the ranks of many South Asian countries like Bangladesh, Nepal, Indonesia, Myanmar,

Srilanka and even Pakistan. In all four indicators of measuring the intensity of hunger such as child mortality, malnourishment, child wasting (low weight than height) and child stunting (no access to acceptable diet), India has failed miserably, as the world report says. In fact, all our rhetoric about our 'vikash' mock at us; the much hyped poverty eradication policies and programmes do not really seem to address the problems of the marginalized poor.

It is true there are several poverty alleviation programmes in India meant to address the poverty alleviation and to make the hunger index zero.

The elected Governments since independence look sincere to give focus on hunger eradication. There is Mid Day Meals scheme for the school children, the biggest hunger eradication scheme in the world. There is Anganwadi system to provide nutritious

food and ration to pregnant and lactating mothers and there is, as well, the scheme of providing subsidised grains of 5 kg per person below the poverty line per month as prescribed in the Food Security Act -2013.

But despite all these Government schemes, hunger still parades and all these poverty eradication programmes do not appear doing much for the purpose. Hunger is not a single phenomenon caused by the lack of food alone. It is caused by some other factors like malnutrition, extreme poverty, unsafe housing, unsafe drinking water, orphaned and abandoned children and lack of medical care.

There are many disgusting images coming out in media , both in the print and the TV's about hunger and malnutrition in rural India. Odisha's scenario is no exception . There was a horrifying Nagada story in Odisha four years ago which created a hue and cry in the

State and in the national level . Between March and July 2016 more than 20 children died due to malnutrition in Nagada ,a small tribal village of Jajpur district.

When Saraswati, a one year old Juang girl succumbed to severe malnourishment, the images of malnourished children of Odisha with lean and thin figure having inflated bellies shook the conscience of the Indian elites. They began to compare Nagada with the sub Sahara regions.

Of all images we have seen in the recent months in India, migrant labour exodus is a havoc the Covid -19 has caused so far. A few of them are heart breaking. Thousands of Indians carrying their meager possessions were walking on the highways after India went into full lockdown in March, 2020.

This reverse migration of labourers from cities to the villages now seems to reveal the lack of concerns for the India's

most vulnerable. Hunger and malnutrition are not rural event alone although we conveniently conclude that low rural wages do not help the people to buy expensive food and the rural pregnant women are under-nourished which leads to children's death at both time and which leads to the birth of small and sicker babies.

But malnutrition is an urban event too when the urban educated women due to lack of awareness grow their children malnourished by feeding them junk food.

Therefore, in order to achieve its zero hunger target by 2030 as set by the UNO, India needs to stop drafting new poverty eradication schemes but instead implement the existing schemes effectively.

There is a need of more social spending on education and health as well because hunger eradication is not only an economic issue, it is a social

issue too - poverty forces dropouts in the schools. A hungry never hesitates to commit crime and sin Mahatma Gandhi's Talisman's story is more appropriate and relevant now – ‘when you are in doubt or when the self becomes too much with you, apply the following test- recall the face of the poorest and the weakest man whom you may have seen and ask yourself if the step you contemplate is going to be of any use to him; Will he gain anything by it? Will it restore him to a control over his own life and destiny? In other words will it lead to Swaraj for the hungry and the spiritually starving millions? Then you will find your doubts and yourself melting away’.

Let our rulers follow this talisman story when they think of any policy to end poverty and hunger.

TO SECURE COMMUNICATION SYSTEM

Army develops own messaging app SAI

PNS ■ NEW DELHI

In an effort to have secure communication system in the backdrop of Pakistan-based agencies hacking smart phones of the Indian security personnel, the Indian Army has developed its own messaging app. It is named ‘SAI’ (Secure Application for Internet). It will help the Army officers to talk to each other in a safe system of their own and not be apprehensive of spying by the rival agencies. In fact, the army had to ban more than 90 apps in the last one year to avoid spying. The Navy banned the use of smart phones by its personnel while sailing on warships after some personnel were allegedly trapped by a Pakistani based agency and made to reveal operational information. Seen as big boost to the ‘Atmanirbhar’ project, the app

is similar to other messaging apps like WhatsApp, Telegram, SAMVAD, GIMS & supports an end to end encryption messaging protocol. The SAI app also supports secure voice, text & video calling service for Android users. The SAI scores over on security features with local in-house servers and coding which can be tweaked as per requirements. “The application has been vetted by a CERT-empenned auditor and Army Cyber Group. The process for filing Intellectual Property Rights (IPR), hosting the infrastructure on NIC and working on iOS platform is currently in progress. SAI will be utilised by the Army to facilitate secure messaging within the service,” the Army said. Defence Minister Rajnath Singh reviewed the functionalities of the app and complimented Colonel Sai Shankar

for his skill and ingenuity in developing the application, the statement added. The indigenously designed system comes at a time when there were concerns over the use of commercial mobile applications by the Army officials for communicating with each other thereby compromising security. The Army had ordered its personnel earlier this year to delete popular apps such as Facebook, Truecaller, Instagram and games like PUBG from their mobile phones. The order was intended to plug leakage of sensitive national security information from phones of armed forces personnel. The in-house application has been developed by Colonel Sai Shankar . The army has also developed a software for infrastructure management.

NIA raids 7 more locations in terror funding case

PNS ■ NEW DELHI

In continuation of Wednesday’s search operations, the NIA on Thursday conducted more searches at seven locations in Srinagar, Baramulla, Anantnag and Kulgam (Jammu and Kashmir) and two locations in Delhi in connection with the case relating to certain NGOs and Trusts raising funds in the name of charitable activities and then using those funds for carrying out secessionist and separatist activities in the Valley. The NIA had registered the case on October 8, 2020 under Indian Penal Code Sections relating to criminal conspiracy and sedition besides various provisions of Unlawful Activities (Prevention) Act. The case was registered on a directive from the Union

Home Ministry following receipt of credible information that certain NGOs and Trusts are collecting funds domestically and abroad through donations and business contributions etc. in the name of various welfare activities such as public health, education and the like. Further, these funds were sent to Jammu and Kashmir through various channels such as hawala and cash couriers and are used to carry out and sustain secessionist and terrorist activities in J&K, the NIA said in a statement. The latest round of searches were conducted at JK Yateem Foundation at Srinagar and Kulgam, The Salvation Movement at Srinagar, run by Zafar Akbar Bhat, Human Welfare Foundation at Delhi and Anantnag, Jammu and Kashmir Voice of Victims at Baramulla, run by Abdul Qadeer, Falah-e- Aam Trust at Budgam, run by GM Bhat and Charity Alliance, at Delhi, run by Zafar ul Islam.

₹10,211 crore allotted for safety, upkeep of 736 dams across country

PNS ■ NEW DELHI

Cabinet Committee on Economic Affairs (CCEA) on Thursday allotted ₹10,211 crore for the safety and maintenance works of 736 dams across the country. The CCEA also approved Ethanol purchasing policy and increased procurement prices of different levels of Ethanol products benefitting sugarcane farmers and extended the mandatory use of jute materials for packaging benefitting the jute industry. “The CCEA chaired by Prime Minister Narendra Modi has approved the Dam Rehabilitation and Improvement Project (DRIP) Phase II & Phase III with the financial assistance of the World Bank (WB), and Asian Infrastructure Investment Bank (AIIB) to improve the safety and operational performance of selected dams across the whole country, along with institutional strengthening with system wide management approach. “The project cost is ₹ 10,211 crore. The Project will be implemented over a period of 10 years duration in two Phases, each of six years duration with two years overlapping from April, 2021 to March, 2031. The share of external funding is ₹7,000 crore of the total project cost, and balance ₹3,211 crore is to be borne by the concerned Implementing Agencies (IAs). The contribution of Central Government is

₹1,024 crore as loan liability and ₹285 crore as counter-part funding for Central Component,” said Union Minister Prakash Javadekar detailing the Cabinet meeting decisions in media briefing. The CCEA approved fixing higher ethanol price derived from different sugarcane based raw materials under the Ethanol Blended Petrol (EBP) Programme for the forthcoming sugar season. “The price of ethanol from C heavy molasses route be increased from ₹43.75 per lit to ₹45.69 per litre. The price of ethanol from B heavy molasses route be increased from ₹54.27 per lit to ₹57.61 per litre. The price of ethanol from sugarcane juice / sugar / sugar syrup route be increased from ₹59.48 per lit to ₹62.65 per litre,” said Government in a statement. “Consistent surplus of sugar production is depressing sugar price. Consequently, sugarcane farmer’s dues have increased due to lower capability of sugar industry to pay the farmers. Government has taken many decisions for reduction of cane farmer’s dues. With a view to limit sugar production in the Country and to increase domestic production of ethanol, Government has taken multiple steps ,” said Javadekar. The CCEA also approved that 100% of the foodgrains and 20% of the sugar shall be mandatorily packed in diversified jute bags. The decision to pack sugar in diversified jute bags will give an impetus to the diversification of the jute industry.

Minister warns of actions for Covid protocol violations at Srinagar airport

PNS ■ NEW DELHI

The Union Civil Aviation Minister Hardeep Singh Puri on Thursday promised to take immediate action after a passenger posted images on Twitter of people flouting social distancing protocol at the Srinagar airport. Sanjay Raina, who posted three pictures on Twitter on Thursday morning showing passengers standing extremely close to each other during a security check at the airport. Raina tagged Puri in his tweet, saying: “Shocking violation of #COVID19 protocol , sheer incompetence of authorities & security personnel at #SrinagarAirport. Horrible to say the least. Someone needs to take responsibility. Hats off to airline staff still managing.” In his response, Puri said that he had discussed the matter with Arvind Singh, Chairman, Airports Authority of India (AAI). “We will check the facts & take immediate corrective action,” the minister added.

Hi-tech gadgets to help clean Ganga ghats in Yogi's UP

PNS ■ NEW DELHI

The Uttar Pradesh Government has chalked out a ₹10 crore plan to cleanse the Ganga Ghats in the State with the help of CCTVs and state-of-the-art gadgets. The cleaning and monitoring plan will be executed in phases, with work to be first rolling out from religious hotspot Kashi. Around 200 CCTVs and best of state-of-the-art gadgets will be deployed to cleanse and monitor sanitation work at the ghats which are thronged by thousands of devotees every day. The officials posted at the Ganga Namami Department of the Yogi Government will monitor the activities sitting in their offices in Lucknow through the computers connected with the 200 CCTVs installed on the Ghats. “The 200 CCTV cameras to monitor the safety and cleanliness of the Ghats will be directly connected to the computers of officials associated with the Namami Gange project at Lucknow, the capital of the State,” said an official from the State Government. The task is in keeping

with the promise made by Prime Minister Narendra Modi and State Chief Minister Yogi who have promised to make Ganga incessant and clean. Not only the ghats, efforts are already being undertaken to keep cleanse the constituency of Prime Minister Narendra Modi so as to make it a role model. For executing this mammoth task, the UP Government has already started the process of selection of an agency. This time along with cleaning workers, modern machines will also be deployed on the Ghats. The waste released from the Ganga Ghats will be collected into these machines to be recycled to ensure that the garbage does not again flow into the water and spoil ghat on the bank of the river. After 79 ghats of Kashi, the Namami Gange department is also working on a plan to rejuvenate the cleaning system of 19 ghats of Prayagraj, 20 in Bithur, 21 of Kanpur Nagar, 27 ghats of Mathura and Vrindavan. “With the completion of the job at Kashi, work will be started at other ghats as well,” said the official.

Cops, babus acting as political servants of TMC: Guv to Shah

SAUGAR SENGUPTA ■ KOLKATA

There is no rule of law in Bengal which had been reduced to a police State, Governor Jagdeep Dhankhar has told Union Home Minister Amit Shah with whom he met in Delhi on Thursday.

Alleging that the Mamata Banerjee Government had reduced Bengal into a “Banana Republic,” the Governor said that he was anguished about how the next year’s Assembly

elections would be conducted the State.

Emerging from a meeting with Shah the Governor said “you don’t have any idea of what is happening in West Bengal. The law and order situation has completely crumbled down. Police and bureaucrats are working as political servants of the ruling party. The crime statistics has gone up and Al-Qaeda is spreading its fangs in Murshidabad.”

Alleging that, the State had been reduced to a “police state” and a “banana republic” he said that all his requests for information on the state affairs are ignored by the Government.

“It is my duty to save the Constitution. ... I believe in reformation and that can happen only through dialogues. But they hardly respond to my letters. Under such circumstances, how can a constitutional head like me have a sound sleep?”

He however remained evasive about whether Bengal had become a fit case for President’s Rule though he said that there was a “virtual anarchy” in Bengal and the political violence had become a matter of concern.

“Political leaders are getting killed. The power of corridors in the state is infested by non-state actors. This is surely not democracy,” he said even as the ruling Trinamool Congress leadership launched a scathing

counterattack on the Governor saying “he is a liability for Bengal.”

Bengal Minister Partho Chatterjee said “so much has been said by him and so much has been said about him in the past one year that nothing more is left. ... And all such discourses have only proved that he is acting as the BJP’s spokesperson who has converted the Governor’s House into a party office. Less said about him the better.”

Another senior leader said that there was nothing new in what the Governor had said on Thursday.

Rather what is new is the timing of his visit to Delhi and meeting with the Home Minister which took place hours before his shifting of office to Darjeeling for a month.

“Had he gone to meet the Home Minister just before his Darjeeling trip people would have said that he has gone to

take the briefing on his political activities in Darjeeling... Now he can at least say that he had gone to brief the Home Minister about the State of affairs in Bengal and in the disguise he is carrying back instructions on what he has to do in Darjeeling,” where he will stay for a month from November 1.

Meanwhile all hell broke loose at Bagnan in Howrah where the BJP supporters

clashed with the police during a saffron party sponsored bandh to protest against the inordinate delay by the administration to conduct second post portem on a slain party worker who was allegedly murdered by the TMC men about a fortnight ago.

The police resorted to lathi charge after the angry saffron workers threw burning tyres in front of the local police station. Several persons were arrested, sources said.

Andhra allows Govt schools, colleges to reopen from Nov 2

IAANS ■ AMARAVATI

Andhra Pradesh has allowed All Government schools and colleges to reopen from November 2 with all precautionary measures amid the Covid pandemic.

Chief Secretary Nilam Sawhney confirmed that the state government is going ahead with reopening educational institutions. The date for reopening schools was already communicated earlier, even as the uncertainty over colleges has also been cleared now.

“Schools would be run on alternate days in three phases for which officials are making arrangements. Precautionary measures would be taken to contain the spread of Covid-19,” Sawhney said.

As part of the reopening,

classes 9, 10 and intermediate first and second year will function on alternate days for only half a day.

Likewise, all Higher Secondary colleges will also start functioning from November 2 on rotation basis and from November 23, classes 6, 7, and 8 would start functioning on a half day basis. “Classes 1, 2, 3, 4 and 5 would start functioning from December 14 on alternate days and on a half-a-day basis. The same schedule would apply to all government schools and colleges,” she added. Though the state government thought of reopening schools almost a month ago, it extended the reopening by a month, to a time when active Covid cases have come down to around 26,000.

Vijayan blames Centre, investigative agencies for arrest of Sivsankar

KUMAR CHELLAPPAN ■ KOCHI

Chief Minister Pinarayi Vijayan blamed the Centre and its investigative agencies for the arrest of his former Principal Secretary M Sivsankar who was arrested by the Enforcement Directorate late Wednesday night in connection with gold smuggling and money laundering.

Briefing the media about the Covid-19 situation in Kerala on Thursday, Vijayan read out a prepared statement to express his displeasure over the way central agencies are handling the gold smuggling scam though he remained silent about the arrest of Bineesh Kodiyeri, son of party strongman Kodiyyeri Balakrishnan.

“A senior Customs official (Anish Rajan IRS) had told the media that there was no interference from the Chief Minister’s Office to get the baggage addressed to the UAE Consulate released. But he was transferred out of the State overnight and there was no reaction from anybody about this transfer,” said Vijayan when asked about the arrest of Sivshankar.

He said the whole gold smuggling scam, LIFE Mission corruption charges and other allegations were part of the strategies of the Congress and the BJP to portray the government in poor light. “This will not work. We stand committed to the upliftment of the poor and downtrodden,” said the chief minister.

Instead of directly attacking the Centre, Vijayan opted to read from Congress President Sonia Gandhi’s article published in a newspaper recently about how the Centre was misusing its probe agencies to target and victimise opposition parties. “Rahul Gandhi too had told recently that he was a victim of the political vendetta,” said Vijayan.

The Chief Minister claimed he had no acquaintance of any kind with Sivsankar. “He was appointed to my office based on his experience in different departments of the government and that was how I met him,” said Vijayan.

But a senior IAS officer said that Sivsankar was an officer promoted to the IAS from the State Government cadre and he was a senior leader of the SFI during his student days.

NIA raids 4 locations in Assam, Maha in Delhi gold smuggling case

PNS ■ NEW DELHI

The National Investigation Agency (NIA) on Thursday conducted searches at four locations in Guwahati (Assam) and Sangli (Maharashtra) in connection with the Delhi Gold Smuggling Case.

These locations are premises related to accused persons and their handlers from where they used to give effect to the commission of crime,” the agency said in a statement here.

The NIA further said, “During the searches, incriminating documents and electronic devices containing details of suspicious transactions as well as of the persons involved in the instant crime, who are also having linkages abroad

including Myanmar and Nepal, were seized.”

The NIA had registered the case on September 16 this year which relates to seizure of 83.62 Kg of smuggled gold bars having market value of Rs 42.89 crore at New Delhi Railway Station on August 28, 2020 from the possession of eight accused persons.

Interrogation of these accused has so far revealed that they had collected the said consignment from Guwahati for its further delivery at New Delhi on the directions of their handlers who are suspected to have sourced the smuggled material from Myanmar, Nepal and Bhutan, it said, adding further investigation is continuing.

Maharashtra logs 91 deaths, 6,738 cases

TN RAGHUNATHA ■ MUMBAI

Amid the continued flattening of the Covid-19 curve, Maharashtra on Thursday witnessed an upward fluctuation in deaths and a dip in the number of infections in various parts of the State.

A day after the state logged 91 deaths and 6,738 infections, the daily death tally went up to 156, while the infected cases dropped to 5,902. With 156 fresh deaths, the Covid-19 toll in Maharashtra rose from 43,554 to 43,710. Similarly with 5902 fresh infections, the total infected cases jumped from 16,60,766 to 16,66,668.

As 7,883 more people were discharged from various hospitals in the state, the number of people discharged from various hospitals after full recovery since the second week of March this year went up to 14,94,809. The recovery rate in the state rose from 89.53 to 89.69 per cent.

Of the 156 deaths reported on Thursday, Mumbai accounted for a maximum of 33 deaths, while there were 27 deaths in Pune, 19 in Thane, 11 in Solapur and 10 in Nagpur.

In the lower range, there eight deaths in Nanded, 7 each in Satara and Sangli, 4 each in Ahmednagar, Ratnagiri, Jalna and Chandrapur, 3 each in Nashik and Akola, 2 each in Palghar, Raigad, Aurangabad, Beed, Washim and Bhandara and one each in Parbhani, Latur, Osmanabad, Amravati, Buldhana and Gadchiroli As many as 11 districts reported zero deaths. With 34 fresh deaths, the Covid-19 toll in Mumbai toll shot up from 10196 to 10229, while the infected cases rose by 1120 to trigger a jump in the infections from 2,54,240 to 2,55,360.

UP cops booked in corruption case

PRADEEP SAXENA ■ ALIGARH

The Inspector of Kanpur branch EOW (Prevention of Corruption Organization) has registered a corruption case at Lodha police station against SO and an inspector posted in Lodha. One of them is currently SO at Pisaawa police station in the district, while another is on suspension from Meerut. After the registration of this case, departmental action against Pisawa SO is fixed.

CPM leader’s son held by ED in drug case

KOCHI: The CPI(M) in Kerala suffered two major setbacks on Thursday which has put the party in a dilemma as it gets ready for the elections to the local self Government and the legislative Assembly.

M Sivsankar, former Principal Secretary to Chief Minister Pinarayi Vijayan, was sent to the Enforcement Directorate’s custody for seven days on Thursday by the District Sessions Judge, Ernakulam in connection with charges of gold smuggling, money laundering and interference in the functioning of other department of the Government. Later in the day, the ED arrested Bineesh Kodiyeri, the controversial son of CPI(M) strongman Kodiyyeri Balakrishnan on charges of narcotics smuggling.

Sivsankar was arrested by the ED late Wednesday night following the Kerala High Court dismissing the former’s anticipatory bail application. The IAS officer, a former leader of the CPI(M)’s student wing SFI, was the most powerful bureaucrat in Kerala who was addressed as “Super CM” by other ministers in the cabinet and other bureaucrats, was considered as Vijayan’s eyes, ears and words.

The arrest memo served on

Jyotiraditya’s test

The MP bypolls would prove if he can indeed get even with former CM Kamal Nath and earn his stripes in the BJP

The byelection in Madhya Pradesh may have got swamped by the Assembly polls in Bihar and its results may not threaten the ruling BJP Government in the State. But it is significant in deciding the political future of stalwarts both within the BJP and the Congress. The number game is fairly settled. The BJP currently has 107 seats in the 230-member Assembly, with the support of Independents, Samajwadi Party (SP) and Bahujan Samaj Party (BSP) MLAs. So, given its ambition to do without props of any kind and consolidate its position as the single largest party, it would just about need to win nine of the 28 seats going to the polls and cross the half-way mark. The Congress has 88 MLAs after Jyotiraditya Scindia revolted and took 22 loyalists with him to the BJP, toppling the Kamal Nath Government. It would need to win all 28 seats to cross the halfway mark, a tall order, though party hopefuls are arguing that even 20-plus seats could keep it in the running as it could manage the deficit by co-opting smaller parties. This presumptive logic isn’t much to bet on. The desperation of the Congress is understandable considering it wants to prove a point to Jyotiraditya that his exit hasn’t really affected the party’s grassroots matrix. In one word, therefore, the bypolls are his test. He may have defected with the loyalists but can he ensure vote transference with such ease? Particularly when the Congress is relentlessly calling him a traitor, even drawing on his family history to show how the Scindias betrayed Rani Laxmibai. Besides with most of the seats going to the bypolls being located in the Gwalior-Chambal region, which has the highest number of caste atrocities and violence and where the Dalit vote swing matters politically, Jyotiraditya has to have an umbrella appeal to win and not just depend on his legacy. His being in the BJP could actually be a liability as this is a BSP bastion and its people were at the forefront of protests against the dilution of the Scheduled Castes and Scheduled Tribes (Prevention of Atrocities) Act in 2018. Besides, the BSP is contesting all seats here this time and unless, as a kingmaker, its chief Mayawati decides whom to side with in the event of a mixed verdict, the going could be tough for Jyotiraditya. Of course, his staunch follower and Dalit candidate, Imarti Devi, whom Kamal Nath insulted, could mop up some of the sympathy votes from the community at the expense of the Congress. The BJP has obliged Jyotiraditya for catapulting it back to power by giving tickets to the rebel MLAs loyal to him. This has not been to the liking of its Chief Minister Shivraj Singh Chouhan, who wouldn’t want Jyotiraditya to challenge his stature. So the latter has to prove his mettle in his adopted party by ensuring the maximum wins. If he does, his stakes will rise but if he fails, then he could be badly marginalised. As it is, the State BJP campaign is still pivoted around Chouhan and has hardly taken note of the new entrant. This is Jyotiraditya’s big chance to prove his political currency and if he fails, he will be of no use to any party. Not even Congress. In fact, if Jyotiraditya succeeds, it would be the most effective message of getting even with Kamal Nath and convincing the grand old party of the need for a generational change. If he does really well, he could even get a Central Ministry, something he has been wanting since he crossed over.

Though the BJP needs single digits to coast home, Chouhan wants to win at least half of the seats to show that he is not dependent on Jyotiraditya’s clout. Having conceded tickets and ministerial berths to the young leader’s group following Central pressure, the Chief Minister wants to show he is in command. But Chouhan is caught between the criticism of his handling of COVID-19 and the challenge from Union Agriculture Minister Narendra Singh Tomar, who has the blessings of the Central party leadership to undercut him. As far as Kamal Nath is considered, the bypolls are his last chance to take another shot at chief ministership. But with below the belt attacks and scorning a woman legislator, he may have just scripted his own downfall. Kamal Nath has an axe to grind with Imarti Devi, who is a Jyotiraditya Scindia loyalist and defected with him to the BJP. In fact, the sexist remark against her came days after and probably as a hitback to her accusation that Nath bribed MLAs when he was Chief Minister, that he gave cash doles of ₹5 lakh to Congress MLAs who could not be granted ministerial posts. In retrospect, her needless victimisation only drew attention to his greed for power by managing numbers. Of course, the seasoned politician he is, he knows how to work the arithmetic in case of an adverse scenario. But the old-style politics may not work at a time when the BJP won’t be sparing any resources either to ensure that one party-rule flows from the Centre to other States.

DU imbroglio

The power tussle between the Vice-Chancellor and the Pro-VC only harms the most prestigious university

Delhi University (DU) is not only India’s largest and most prestigious Central university, home to several top colleges of the country, it is also the most politically active. However, what is happening in DU right now is unprecedented in its 98-year history as President Ram Nath Kovind has ordered an enquiry against Vice-Chancellor Yogesh Tyagi on the grounds of “misconduct” and “dereliction of duty.” Tyagi has been suspended till the probe is completed since he can influence the investigation while in office. Much of this has been precipitated by the health of the Vice-Chancellor, who had to be admitted to AIIMS on emergency grounds back in July and a Pro-VC, Professor PC Joshi, had to be appointed. However, after Tyagi returned to work, he tried to invalidate several appointments made by the Pro-VC, even those that had been cleared by DU’s Executive Council. The row escalated when Tyagi appointed Professor PC Jha as the interim Registrar despite the Union Ministry of Education’s claims that the new order was not effective as the VC was still on leave while issuing it. However, the Executive Council resolved that Professor Suman Kundu would continue as Director, South Campus and acting Registrar till a permanent Registrar was appointed. This was followed by Tyagi removing Professor Joshi as Pro-VC and appointing Geeta Bhatt in his place. Meanwhile Joshi had notified the appointment of a new Registrar, Vikas Gupta, whose interview had been completed and appointment cleared by the Executive Council. This is a truly bizarre and ridiculous situation, particularly when the 2020-2021 academic year is about to start. By initiating an enquiry against Tyagi and completely clipping his wings, his term is as good as over. However, the Ministry should take its fair share of the blame here. When the V-C was admitted to hospital in an emergency condition, it should have stepped in to put a system in place. At the same time, it has consistently overlooked past lapses flagged against Tyagi, including not filling vacant positions, delay in redressal of sexual harassment cases and vigilance complaints in university, mishandling of the issue of ad-hoc teachers, which led to a massive agitation, and non-submission of detailed plans for implementation of the Institution of Eminence (IoE). The last straw came in the form of certain appointments he made while being on medical leave.

This mess needs to be immediately rectified by the Ministry and if Tyagi is to be removed, a new V-C must be found post-haste. This is a situation that is unprecedented and if elections and a pandemic were not ongoing, this would be the top headline of the day. This development is not surprising after decades of Ministers and bureaucrats striking at the autonomy of Central universities. Institutions of higher learning thrive when they are allowed to function independent of the Government and where the V-C is prided for his integrity and not seen as a political appointee.

REENA AMOS DYES

In mid-October, a 17-year-old girl, Neema (name changed) was found by the Uttar Pradesh (UP) Police in a dazed state, hungry and delirious. Sold to traffickers by her poverty-stricken parents on the advice of “well-meaning” neighbours in her village in Madhya Pradesh, the teenager had escaped from her tormentors in Delhi. Neema walked and hitch-hiked for three days to cover a distance of 200 km before she was spotted by concerned passersby and the police in Hathras. Unaware of her whereabouts and determined to reach home, she was still 794 km short of her home in Mandla district when she was rescued. The girl told the police that there were 12 other minors like her, confined to one room in Delhi. Fortunately, they all managed to escape.

Neema is not the only child from her village to have been trafficked. Several others like her have been sold by needy parents. This story is repeated over and over again in India, particularly in rural areas. India is starving and its children are bearing the brunt of this hunger. They are being sacrificed at the altar of the crippling poverty that has worsened because of the sucker punch delivered to the already tottering economy by the Coronavirus. As feared by the experts in the field of rescue and rehabilitation of trafficked children, the number of minors, particularly girls, sold to traffickers for as little as ₹10,000-₹50,000, has grown alongside the number of people rendered jobless by the pandemic. As a result, desperate parents, having to choose between survival of the family for a little while longer and their love, chose the former. So many girls and boys were sold to traffickers across the country.

This is despite the fact that Articles 23, 39, 14 and 21 of the Constitution guarantee every child freedom from exploitation in any form. The Immoral Traffic (Prevention) Act, 1956 was enacted in pursuance of the International Convention signed at New York on May 9, 1950 and it was amended in 1986 to widen its scope to cover all citizens. However, according to rights advocates, the Act has glaring lacunae as it fails to define the term “traffic” or “trafficking” and aims to penalise those who aid and abet commercial sexual exploitation. Therefore, its focus on the def-

opinion

Nobody’s child

Fuelled by a pandemic-hit economy and the lack of personal accountability, India’s child trafficking problems have further worsened

inition of the term brothel leads to the inference that commercial sexual exploitation takes place only in a brothel and not in other places, such as in a house. The Act is clearly not victim-centric as women and children, who are forced into prostitution, are also treated as criminals and arrested when raids are conducted.

Similarly there are several other laws to protect the rights of children, such as the Commissions for Protection of Child Rights Act, 2005, the Right of Children to Free and Compulsory Education Act, 2009, the Protection of Children from Sexual Offences Act, 2000. The rights of child labourers can be adequately secured only if the monitoring and controlling provisions contained in the said statutes are fully implemented. However, they are not despite the Supreme Court insisting upon their applicability.

In 2013, the top court lamented that despite its directions, little or no progress was made by the States in protecting the rights of children. Thus, we have horror stories emerging from across the country. Desperate children, sold to traffickers by impoverished parents, making hopeless bids to return home to the same parents who pushed them into the hell in the first place.

Though Neema and several others like her have escaped for now, not everyone is so lucky. Thousands of children are being trafficked globally for initiation into the sex trade, to be recruited as bonded labour, drug runners, child terrorists or human shields. The International Labour Organisation has predicted that with the pandemic ravaging economies globally,

the world may witness an increase in child labour for the first time in 20 years and there is a huge risk of years of progress in this arena being reversed. First, it was hunger induced by the lockdown that fuelled the trafficking. And now that the economy has opened up, it is the demand for cheaper labour and bigger margins by businesses. Closer home, ever since the lockdown was imposed and then eased a few months later in phases, Delhi-NCR has become a hub of trafficking as more and more children are being rescued from factories and brothels.

The Delhi Commission for Protection of Child Rights rescued 93 children from gold and jewellery factories in Karol Bagh in May. Of them, 57 were below the age of 14 and some were even 10-year-olds. The rest of the children were between 14 and 18. Then in July, nine child labourers were found working at several scrap shops in North East Delhi’s Mustafabad. But these rescues are like a drop in the ocean as the lockdown slowed down such initiatives as well. There was a time when only 27 per cent of the Anti-Human Trafficking Units were functional. Thankfully, in September, 36 children under 14 years were rescued from bangle-making units in West Delhi’s Jahangirpuri area where they were made to work for 15 hours a day and sleep in the same dingy room. All lured or sold on the promise of food and a roof over their heads.

Nobel laureate Kailash Satyarthi, Chairperson of NGO *Bachpan Bachao Andolan*, estimates that in Delhi, “at least five lakh children are in full-time

jobs. That means every sixth child is out of school and working somewhere.”

Every time we hear such statistics, we are shocked and angry. Even more disturbing is the fact that these children are there in our midst, suffering abuse, hardship, deprivation and long hours of work in dingy, dark and polluted places where they have no business to be. We are blissfully ignorant of this invisible, silent and hapless workforce. The tiny factory workers, who are well hidden from our sight, toil to pandor to our penchant for buying things at discounted prices, the cheaper the better. But we are content sweeping our collective guilt under the carpet, simply because they do not torment us visibly.

We do know that certain industries traditionally employ children. Like *bidi* factories, the carpet industry, the garment sweatshops, incense and firework factories, brick kilns, the farm sector and so on. But when buying these products, do we ever take the pain to ensure that the brand that we are purchasing has nothing to do with child labour? It is our demand for cheaper products that in turn creates the demand for child labour as businesses then can keep the cost of production down and their margins up. We don’t bother to boycott goods over unethical trade practices. If we did so, the factory owners would have revised their norms. So, by extension, we are as guilty as the perpetrators of the crime of trafficking and hiring child labour.

And what about child labourers, who are staring us right in our faces? What of the minor

hired to “baby-sit” children? Or the ubiquitous *chotus* (apprentices/assistants) all over India, selling *chai* at the local tea shop and even delivering it to our offices and at the railway station? What of the little boy cleaning the car in the neighbourhood, his little hands and muscles straining to carry a heavy bucket full of water? Or the shoeshine boy, the child manning a roadside *dhaba*, serving food to customers? Have we ever bothered to question the people who hire them or even inform the law enforcement authorities about their presence? Clearly we do not want to get out of our comfort zone and easily attribute it to a societal crime, without realising we form the society that condones it. We could have picked up the phone and called the NGOs and rights activists who can help the child in distress. But we don’t do that either.

And what about children caught in the sex trade? If people stop watching child pornography, there will be no market for it. If men stop violating minor girls for a price, there will be no market for it again. So, on all counts, society is as guilty as the criminals who traffic children.

Apart from a mindset change, there has to be community alertness and personal accountability by each citizen. There must be non-Governmental and Government intervention to ensure that hapless parents do not take the extreme step of trading their children for a dole. There is no time to be lost, else a nation will forget the meaning of *bachpan*.

(The writer is Senior Editor, The Pioneer)

LETTERS TO THE EDITOR

Poor football

Sir — As per the Centre’s guidelines, many cinema halls are reopening. However, the football remains in single digits. Currently, the halls are permitted to operate with 50 per cent capacity; one seat between two persons is to be kept empty to ensure social distancing. Other mandatory norms include wearing of masks, applying sanitisers, compulsory thermal scanning, adequate ventilation and freezing temperature settings of all air conditioning at 23 degree Celsius or above. Even with strict guidelines in place, people are extremely hesitant to visit the theatres. Also, no big-time releases are slated for now as it is preposterous to imagine a producer or an actor risking his/her fortune during such crucial times. Over the months since the lockdown, the loyal film audience has adapted to online streaming apps. Adjusting to big screens again might take some time. Also many are cutting on expenditure owing to their financial stress. The cinema hall owners, too, are in a quandary because of the financial losses they have been bearing due to the complete clo-

Punjab makes a point for its farmers

The Punjab Assembly has passed three farm Bills as the farmers’ protests against the recently passed farm Acts intensify. The Central laws are silent about the Minimum Support Prices (MSP) for agricultural produce. Sale of produce to the private traders, companies, corporates and other agencies cannot take place in the Agricultural Produce Market Committees (APMC) *mandis* anymore, and levy of fee for trades has been prohibited. Thus, farmers have no option but to approach the courts for dispute resolution. The thought of a takeover of the agriculture sector by traders using their financial power is haunting the farmers.

According to the State Bills, “no sale or purchase of wheat or paddy shall be valid unless the price paid for such agricultural produce is equal to or greater than the MSP” announced for the two crops. And if an individual or a company or any other agency compels or exerts pressure on a farmer to sell the agro-produce at a price below the MSP, then such person shall be deemed to have committed a punishable offence. The

Bills also have a provision to levy a fee on trade platforms outside the markets established under the Punjab Agricultural Produce Markets Act 1961 to fund welfare activities. These proposed amendment Bills are not just meant to counter the Centre’s laws but to save the peasantry of Punjab.

Haridasan Rajan
Kozhikode

Defence agreement

Sir — On October 27, India and the US signed the Basic Exchange and Cooperation Agreement (BECA) to further military ties between the two countries. India will now be able to keep an eye on the movements of Chinese warships in the Indian Ocean Region (IOR). BECA will help us get real-time

access to American geospatial intelligence that will enhance the accuracy of automated systems and weapons like missiles and armed drones. Sharing information on maps and satellite images will help us gain access to topographical and aeronautical data. The signing of the long-negotiated defence pact comes against the backdrop of a tense border standoff with

China in eastern Ladakh. The increasing defence and security partnership between the two nations will help monitor the situation in the Indo-Pacific at a time when China is attempting to expand its economic and military clout in the region. In June, India and Australia had signed a pact allowing their militaries to access each other’s bases. A similar agreement with Japan also came to fruition last month after years of negotiations. It is also hoped that the sharing of technology will contribute significantly towards bringing India closer to the lofty goal of *atmanirbharta* in the defence sector.

FIRST COLUMN

Make the right policy choices

A continued prosperity for nations will only be achieved by allowing and championing a global open market for trade, goods and digital services

KUMARDEEP BANERJEE

It is festival time globally, and not just the religious and fun variety but also the vital festival of democracy or elections. It is for the first time in our lifetimes that festivities, mostly associated with huge crowds jostling to reach the ballot box or *bedi* (the pedestal on which the idols of deities are kept), are taking place in the shadow of a raging global pandemic. Forced departures from well-known rituals associated with festivals make these times a case study for future generations. Many would have seen a video on social media of an idol being immersed using mechanised trolleys, with least human intervention, in the recently-concluded Durga puja festivities. Now switch to the theatre of democracy in Bihar, where Assembly elections are being held. The common thread between the two festivals is, technology. Bihar, would perhaps be the first State in the country where technological interventions played a key role in the elections.

First, the Election Commission (EC) allowed online filing of nominations for candidates and many political parties chose to reach out to their constituents through virtual rallies and put up huge LED walls for public viewing. Given the absence of many veterans active in Bihar elections for at least three decades, most of the young scions of the colourful, vociferous and politically-influential families were suddenly catapulted to the centrestage of a new narrative. This young brigade of Biharis, technologically more versatile than their parents, sought votes on issues. Something hitherto unheard of in a State, known for its divisive caste and religious biases. It was surprising to see rival candidates promise lakhs of jobs to young voters in a State grappling with the problem of the jobless migrant labourers.

The most welcome aspect of this election has been the reliance on technology in a State which could well be a case study on the digital divide between India and Bharat. Many statisticians will point to a survey which revealed that more than half of Bihar's women and around 40 per cent men have no access to mass media. This, when extrapolated over digital media, means a significant part of the population can either be completely insulated from the impact of technology or could be the next addressable unconnected millions, who need to be put on the information technology expressway of prosperity.

Now let's jump across the Pacific to the US, which, too, is about to witness one of the fiercest and cacophonous elections on November 3 amid the COVID threat, deaths and economic destruction. The common binary binding Bihar elections, Durga Puja festivities and US elections is again, technology. After all, the new dominance game and the race to be a global superpower is now increasingly getting defined by your first tap on a smartphone, first digital payment/electronic transaction, first contact-free shopping for world-class brands from the comfort of your home and perhaps the first digital date after months of trying to understand each other's typos and abbreviated texts.

Therefore, restrictions on digital applications, depending on the country of origin, to applying the same principles to hardware solutions in technical infrastructure, to forming an alliance of like-minded technology fraternity of nations were some of the key highlights in the election campaign of the two presidential candidates of the world's richest democracy. What it also highlighted was the fact that increasingly, the physical restrictions (read policies) of trade and commerce dominating economic relations between a bunch of nations will now be enthusiastically copy-pasted in the digital arena to prevent loss of sovereign powers and dominance at the global high tables.

COVID has put the spotlight on public policy issues, which, till February, were still in advanced stages of intellectual discourses. It has challenged our ability to adapt and eventually recover from the disease. And the only sector which has truly helped this advancement is technology. It reacted quickly and ensured teachers, parents and children were handed online course materials for seamless academic learning and doctors were given online tools for initial digital health interventions for patients. It gave the Government effective platforms for interaction and empowered it to push critical policy goals. Technology enabled digital live *darshans* of beautiful but deserted *pandals* and online delivery of *prasad* for the religious, too. If the human race has been pushed ahead by three decades in one stroke by the lockdown and technology has taken centrestage, it is also time to think and refresh many global policy challenges and perhaps release an update. Policymakers have to realise that imposing strict restrictions, based purely on case-by-case models, and having a physical worldview of digital policy issues can be self-defeating in the long run. A continued prosperity for nations will only be achieved by allowing and championing a global open market for trade, goods and digital services. It must be kept in mind that the new normal for policy-making at sovereign-level negotiations must be dictated by a set of principles. This must be compulsory in all digital agreements between consumers and technology providers, governments and their counterparts across borders. A multi-lateral approach must be championed. It is time to click on the right button.

(The writer is a policy analyst)

RAJESH RANJAN

Among the issues in public discourse that have caught the attention of the country is the problem of corruption, which elicits strident criticism. The issue has triggered a slew of reforms aimed at strengthening the fabric of integrity, like the enactment of the Public Procurement Bill, the Lokpal Act incorporating, *inter alia*, the public disclosure of assets by public servants, reforms in higher judicial appointments and so on. While anti-graft activists differ in terms of strategies and focus areas, there is a unanimous acceptance of the fact that technology and e-governance promote greater transparency. The rationale is very simple. Deny the opportunity for manual manipulation and replace it with technology, crafted around well-defined protocols and legal safeguards with minimal human intervention.

It has been five years since India adopted the UN's 17 Sustainable Development Goals (SDGs). Corruption in general and venality in public life in particular adversely affect the fulfilment of these SDGs. Therefore, a proactive and preventive vigilance regime forms the backbone of good governance and is critical to their realisation. How then do we make governance more effective without inhibiting its objectives? Today, administrative affairs grapple with leakages in public delivery of welfare and development goals on account of manual processes that can be manipulated. But by leveraging technology, these leakages can be plugged. Incremental improvements to technology should continue to be the mainstay of advancements in administration.

In the recent discourse on procurement methods, transparency of policy, procedure and practices is increasingly being seen as an imperative of using public monies to remove any allegations of opacity and inconsistencies in decision-making. Achieving transparency ensures that procurement is open to public scrutiny, which results in best value for public monies. For example, the transparency of procedure as achieved in online applications is one of the simpler yet effective features of digitisation, as it shifts the onus of submitting correct information and data to the applicant. This, once verified by the public servant, retains the maker-checker wedge in a direct way.

In an effort to plug leakages in procurement systems, the Government launched the Government E-Marketplace (GeM) in 2016 as an end-to-end marketplace for goods and services required by Central and State Governments as well as Public Sector Undertakings. As per an assessment by the Centre for Public Impact, the savings impact of GeM has been substantial, wherein a maximum price reduction of approximately 56 per cent of goods and services, coupled with demand aggregation, has already led to savings to the tune of ₹40,000 crore annually. Given the fact that the public procurement economy constitutes about 20 per cent of India's GDP, it is imperative to build on this initiative through amplified efforts and bring as many goods and services on board as possible. And in order to make the platform more robust, addressing the issue of quality control should be the next level of sophistication that GeM should aspire for.

In the next 10 years, the business of Government will experience massive disruption. This comes on the back of technological enhancements that reduce the need for intermediaries and ensure that the sanctity of process remains unimpeachable. One such technology which has been discussed widely in recent times is blockchain. A NITI Aayog discussion paper has identified use-cases where the technology can potentially improve governance, ranging from tracing of drugs in the pharmaceutical supply chain to verification of education certificates. The three key principles of the blockchain technology are: Transparency, decentralisation and accountability.

“HOWEVER, A SIGNIFICANT FACTOR IN BLOCKCHAIN'S SUCCESS WILL BE A COUNTRY'S ABILITY TO DEVELOP/REFORM LAWS AND BUILD ROBUST DATA PROTECTION AND MAINTENANCE REGIMES. TILL SUCH TIME WE ADDRESS THESE ISSUES, BLOCKCHAIN IS NOT LIKELY TO HAVE A MONUMENTAL IMPACT IN CREATING AN INTEGRITY-FIRST GOVERNANCE ECOSYSTEM”

One of the most interesting areas of intervention for this technology would be in the space of land records. Ever since the Permanent Settlement of Bengal in 1793, the issue of land records has occupied the administration and citizenry with its complexities, misgivings and fraud. The system is riddled with inefficiencies that reduce trust in the Government. Currently the UNDP is involved in certain Proof of Concept (POC) pilots across India. The underlying theory intends to create an immutable history of transactional records that helps in checking authenticity; a tamper-proof system to avoid forgery; a distributed ledger so that all stakeholders see the same information; and a secure encrypted environment, where updates are available in near real time. The NITI Aayog paper also identifies this value proposition. For example, the paper notes that, in order to ensure that transactions are not fraudulent, the physical presence of witnesses is mandated at the time of sales deed registry. Deployment of blockchain would potentially eliminate the need of these processes while maintaining the sanctity of the transaction.

This helps create a tamper-proof audit trail that allows for tracking decision-making and ensures that they are in accordance with anti-corruption principles. It addresses concerns around cyber security. Currently there are interesting pilots being conducted across the world, where deployment of blockchain is being tested for public procurement, wherein systems are being built in to identify graft with a view to disincentivise corrupt actors from accessing the system at the outset.

From the perspective of Internal Controls and Governance (Vigilance), it is strongly recommended to employ a five-part test while assessing such deviations from process: Whether the issue being pursued has corrupt connotations; the general reputation of the employee involved; whether better options were available and ignored without valid reasoning; whether the situation inhibited the selection of any

other option but the one finally chosen and finally, whether the larger interest of the organisation was safeguarded or not.

Deployment of technological solutions like blockchain can potentially remove the need or significantly reduce the time taken for making such assessments. In a recent paper released by Denmark's Ministry of Foreign Affairs, titled *Code to Integrity*, the authors have highlighted how blockchain can be a powerful tool in the fight against Government corruption. The report cites case studies of countries like Kenya, Rwanda and Ghana where Government records pertaining to court systems, education and land rights are migrating to distributed ledgers.

However, a significant factor in blockchain's success will be a country's ability to develop/reform laws and build robust data protection and maintenance regimes. Till such time we address these issues, blockchain is not likely to have a monumental impact in creating an integrity-first governance ecosystem.

The general environment now is in favour of a regime which ensures that companies not only do profitable business but do so in a manner which is ethical. The United Nations Convention against Corruption, ratified by India in 2011, as well as the anti-corruption principles expounded by the Organisation for Economic Cooperation and Development (OECD) cover a wide gamut of vulnerable areas and aspects of business operations, including anti-bribery, public procurement and conflict of interest. More and more countries in the coming years will be obliged to establish laws and mechanisms in place to ensure clean business operations as well as seize and confiscate assets derived from corrupt practices.

India, too, needs to review its existing legal framework to address issues around data security, corrupt practices and corporate governance with a view to address our anti-corruption objectives and provide the necessary guidance to well-intentioned officials in the Government.

The Centre made a significant change to the Prevention of Corruption Act in 2018. The element of intention has been added under definition of criminal misconduct. Similarly, broadening the definition of "unfair advantage" and introduction of corporate criminal liability will go a long way in apprehending or deterring bad actors on both sides from indulging in bribery. The amendments also have ensured that our obligations under the UN Convention against Corruption are adequately addressed and bring us closer to leading anti-bribery legislations in the world such as the UK Bribery Act.

While these amendments will go a long way in guiding the work of internal control agencies, it would be important to institutionalise a system, wherein compliance against said legislation and established processes can be checked and quantified. A metrics-based system for oversight over governmental processes will bring transparency, build trust and spur further digital innovation to make any administration more robust without inhibiting public interest-oriented decision-making.

It would be incorrect to end this discussion without addressing the well-intentioned public servant who finds the processes leading to greater transparency and ensuring value for taxpayers' money cumbersome and time-consuming and who is, therefore, tempted to short-circuit it. Well-intentioned though it may be, but any attempt to overwrite the processes, despite even demonstrable honesty of purpose, carries the major risk of opening up the system to misuse by corrupt players and would lead to eventual loss of public trust and decimation of the structure of public procurement. Thus, the intent of processes involved is to keep the proverbial Caesar's wife above suspicion. Through robust yet streamlined procedures, a bureaucrat can achieve the intended outcome and avoid unintended consequences.

Nurture e-retail in a post-pandemic world

This approach would be in keeping with the Centre's focus on a Digital India where citizens are able to leverage their connectivity into better opportunities

MOHIT CHAUDHRY

Most nations imposed some form of shutdown to limit the spread of the Coronavirus. India's lockdown, which involved a near cessation of all movement and economic activity, has been rated as one of the most stringent across the world. Not surprisingly, it had a severe impact on our economy.

A sector that was hit particularly hard is retail. This is due to several reasons. First, shops and warehouses were closed during the initial phases of the lockdown. This brought the

operation of both physical and digital retailers to a standstill. Second, restrictions on inter-State movement of goods and the opening of only specific industries disrupted supply chains. For instance, the Centre recognised both medicines and processed foods as essential goods and allowed their sale. However, similar status was not granted to units which manufacture the packaging for medicines and processed foods. Hence, sellers of these goods found it difficult to operate. Third, the system of issuing passes and permits to personnel working for physical and digital retail was not well-implemented. It was unclear which authority would issue the passes and for how long they would remain valid. Further, personnel having to travel across districts were required to obtain separate passes from the authorities for each district. Fourth, the Ministry of Home Affairs issued an order directing all employers to ensure full payment of wages to all employees even if they were unable to work.

As a result of the order, several migrant labourers returned to their towns and villages once restrictions on movement of persons were lifted. A survey of retailers selling their products online, conducted as part of the Esya Centre's report on e-commerce, shows that nearly 60 per cent of such entities will be unable to recover losses suffered because of the lockdown. Given that people are likely to be wary of entering shops and stores even after lockdowns are eased, it is important to explore different avenues through which retail outlets can avoid further losses.

One such avenue is e-retail. A report by Global Trade and Regional Integration Unit of the World Bank highlights the utility of e-commerce in the post COVID normal. Not only can e-commerce help reduce the risk of new infections and preserve jobs, it can also increase the acceptance of prolonged social distancing measures among the population. Further, previous research has shown that there are

numerous benefits for MSMEs that adopt e-commerce, in the form of better price discovery, access to new consumers, support with logistics and inventory management. It is in recognition of the above that several nations, such as the United Kingdom and New Zealand, have given preference to digital forms of retail both during and after the lockdown. However, India is one of the few countries that has not leveraged the numerous benefits that e-commerce brings, particularly during a lockdown.

Policy-making towards e-commerce, both before and during the lockdown, may have hindered the operation of e-commerce entities. Prior to the lockdown, legacy government rule-making on e-commerce presented several barriers to the growth of the sector. These included ever-changing FDI rules, unresolved issues of data localisation and source code disclosure as well as the over-regulation of platforms. During the lockdown, the Government failed to adopt

a clear and consistent approach to policy formulation *vis-a-vis* retail. As an example, both physical and digital retailers were only allowed to sell essential goods in the initial phase of the lockdown. This continued till about mid-April, when the Government issued a notification which allowed e-retailers to deliver non-essential items from April 20. In conformity with this order, e-commerce firms began to make predations to resume their full scale of operations. However, on April 19, the Government withdrew its notification, seemingly under pressure from industry organisations that represented small and medium traders. Subsequently, relaxations regarding delivery of non-essential items were first given to physical outlets while e-retail continued to be limited to essential items for 8-10 days thereafter. The zonation framework introduced by the Government additionally preferred physical outlets in Red zones, as they could sell a wide range of merchandise while e-retail tasks were limited to

essential goods.

As pointed out, e-commerce enjoys numerous advantages over physical retail, particularly in a situation where social distancing continues to be important. Hence, there is a need to provide a policy environment that fosters the uptake and adoption of e-commerce by both consumers and sellers. To achieve this, we recommend a five-step recovery process. The first steps are geared towards fostering an atmosphere of trust and credibility between the Government and market entities.

This can be achieved by holding regular consultations, opening avenues for feedback and providing sufficient notice before major changes. Further, policy actions should not skew competition between physical and digital business models. Instead, both models should be allowed to leverage their respective strengths. Finally, the Government must reassess what it seeks to achieve through its proposed e-commerce policy. In the current sce-

nario, a policy framework governing e-retail or e-commerce in general, should look to assist small enterprises in capacity-building for a digitally enabled future through the provision of finance, skill development and underlying infrastructure. There is, therefore, a need to move away from legacy regulatory institutions, based on licensing and control, to an entity that actively participates in capacity-building and development of small and medium retailers in India. In this context, it is worthwhile to explore the role being played by digital economy development authorities in countries such as Malaysia and Vietnam, which actively promote the adoption of digital solutions and e-commerce for SMEs as well as consumers. This approach would be in keeping with the Government's focus on a Digital India where citizens are able to leverage their connectivity into better opportunities and prospects.

Pak leaders trembled lest India attack it

Foreign Minister pleaded to release Abhinandan

Islamabad: Legs were shaking and forehead perspiring at a meeting of Pakistan's top leaders, including Army chief General Qamar Javed Bajwa, wherein Foreign Minister Shah Mahmood Qureshi pleaded to release Indian Air Force Wing Commander Abhinandan Varthaman, saying if he was not released, India would attack Pakistan, a top Pakistani opposition leader has said.

Recalling the tension in Islamabad after India bombed a terror training camp in Pakistan's Balakot on February 26, 2019, Pakistan Muslim League-Nawaz (PML-N) leader Sardar Ayaz Sadiq criticised the Imran Khan government over its response, saying the Opposition has supported the government on every issue, including Kashmir and Varthaman, but it will no longer be appropriate to provide any further support, Dunya News reported on Wednesday.

Sadiq, who was the Speaker of the National Assembly during the PML-N government, made a similar statement earlier on Wednesday in Parliament here that Foreign Minister Qureshi in an important meeting pleaded that let Varthaman go back because India is attacking Pakistan.

The 37-year-old IAF pilot was captured by the Pakistani Army on February 27 after his MiG-21 Bison jet was shot down in a dogfight with Pakistani jets during aerial combat.

In the early hours of February 26, 2019, the IAF jets bombed the Jaish-e-Mohammad (JeM) terror

camp in Balakot in Khyber Pakhtunkhwa of Pakistan and avenged the Pulwama terrorist attack that claimed the lives of 40 CRPF personnel.

Before his jet was hit, Varthaman downed an F-16 fighter of Pakistan. He was released on the night of March

1 by Pakistan.

In a speech in the National Assembly, Sadiq said that Prime Minister Imran Khan skipped the high-level meeting, which was attended by top leadership, including Army chief Gen Bajwa and Foreign Minister Qureshi.

No constitutional, Sharia constraints on construction of temple: Pak religious body

Islamabad: Pakistan's supreme religious body has said that there are no constitutional or Sharia restrictions on the construction of a Hindu temple in Islamabad or any other part of the country.

The Council of Islamic Ideology (CII) made its decision in a meeting on Wednesday on the basis of the Constitution and the Liaquat-Nehru Agreement of 1950, which led to the establishment of the Evacuee Trust Property Board (ETPB) in Pakistan, the Dawn News reported.

The CII also allowed the government to hand over an ancient Hindu temple and adjoining Dharamshala (community centre) in Saidpur village to Islamabad's Hindu community.

"In view of the current population in Islamabad the ancient temple and the adjoining Dharamshala at Saidpur village be opened to the Hindus and they should be facilitated to

reach there to perform religious services as per their beliefs," the CII said.

The decision, signed by 14 CII members, added that Hindus, like all other religious groups in the country, have the constitutional right to a place for last rites according to their faith.

"Under this Right the Hindu community in Islamabad can have a suitable place for cremation of their dead and perform last rites of the deceased according to religious instructions," the council said.

An application was referred to the CII by the Ministry of Religious Affairs on July 6, seeking its opinion on the allotment of a land to the Hindu community for a crematorium, community centre and temple. The ministry had also sought the CII's advice on the allocation of Rs 100 million by the prime minister for the construction of the crematorium and temple. **PTI**

Pak anti-terrorism court acquits PM Imran Khan in 2014 Parl attack case

Islamabad: Pakistan Prime Minister Imran Khan was acquitted by an anti-terrorism court on Thursday in the 2014 Parliament attack case but other senior ministers, including Foreign Minister Shah Mahmood Qureshi, were summoned on November 12 for the indictment.

Anti-Terrorism Court Judge Raja Jawad Abbas Hassan, however, halted proceedings against President Arif Alvi due to the presidential immunity granted to him. The Express Tribune reported.

On August 31, 2014, workers of the now ruling Pakistan Tehreek-e-Insaf (PTI) and Pakistan Awami Tehreek (PAT) tried to enter Parliament and go towards the Prime Minister's House and clashed with police.

Police had invoked sections of the Anti-Terrorism Act against Khan and other PTI leaders, according to a report in the Dawn newspaper.

The incident had happened during the sit-ins by PTI and PAT workers in front of the Parliament. **PTI**

China gravest threat to future of religious freedom: Pompeo

Jakarta: China is the "gravest threat" to the future of religious freedom, US Secretary of State Mike Pompeo said Thursday, in his latest verbal assault on Beijing during a whirlwind Asian tour.

Pompeo has made attacks against China the focus of his trip this week which kicked off in India and included visits to Sri Lanka, the Maldives, Indonesia and, later Friday, Vietnam.

In Indonesia -- which has the world's biggest Muslim population -- Pompeo took aim at China's treatment of its Uighur Muslim minority.

"The gravest threat to the future of religious freedom is the Chinese Communist Party's war against people of all faiths: Muslims, Buddhists, Christians, and Falun Gong practitioners alike," Pompeo said in a speech Thursday to

major Muslim organisation the Nahdlatul Ulama. "The atheist Chinese communist party has tried to convince the world that its brutalisation of Uighur Muslims in Xinjiang is necessary as counter-terrorism or poverty alleviation," he added.

Rights groups say that more than one million Uighurs languish in camps in the north-west Xinjiang region as Beijing attempts to forcibly integrate the community and root out its Islamic heritage.

China has denied the numbers and describes the camps as vocational centres that teach skills to prevent the allure of Islamic radicalism following a series of attacks.

"But we know that there is no counter-terrorism justification in forcing Uighur Muslims to eat pork during Ramadan, or destroying a Muslim cemetery," Pompeo said. **AFP**

Saudi citizen wounds French consulate guard in Jeddah

Jeddah: A Saudi citizen wounded a guard in a knife attack at the French consulate in Jeddah Thursday, officials said, as France faces growing anger over satirical cartoons of the Prophet Mohammed.

The assault follows another knife attack at a church in the French city of Nice that left three people dead and several others wounded, in what authorities are treating as the latest jihadist attack to rock the country. "The assailant was apprehended by Saudi security forces immediately after the

attack. The guard was taken to hospital and his life is not in danger," the French embassy said in a statement.

Police in Mecca province, where Jeddah is situated, said the attacker was a Saudi, but it did not give the nationality of the guard, who they said had sustained minor injuries.

The French embassy in Riyadh strongly condemned the attack and urged its nationals in Saudi Arabia to exercise "extreme vigilance".

Neither the Saudi authorities nor the French embassy

gave any indication of the motivation for the attack.

But it comes after French President Emmanuel Macron vigorously defended the publication of satirical cartoons of the Prophet Mohammed by the satirical magazine Charlie Hebdo on free speech grounds.

Regional heavyweight Saudi Arabia — home to Islam's holiest sites — has criticised the cartoons, saying it rejected "any attempt to link Islam and terrorism" but it stopped short of condemning the French leadership. **AFP**

2020 US election to be most expensive in history, expected to cost \$14 bn

New York: The 2020 Presidential election is turning out to be the most expensive election in history and twice as expensive as the previous presidential election cycle, with the total cost of the election expected to reach an unprecedented \$14 billion, a research group said.

The Center for Responsive Politics said that an "extraordinary influx" of political donations in the final months — driven by a Supreme Court battle and closely watched races for the White House and Senate — pushed total spending in the election past the previously estimated 11 billion dollars figure.

The Center said that the 2020 election will cost \$14 billion, shattering spending records.

Democratic presidential nominee Joe Biden will be the first candidate in history to raise \$1 billion from donors. His campaign brought in a

record-breaking \$938 million through October 14, riding Democrats' enthusiasm to defeat Trump.

President Donald Trump raised \$596 million, which would be a strong fundraising effort if not for Biden's immense haul.

"Even amid a pandemic, everyone is giving more in 2020, from ordinary individuals making small donations to billionaires cutting eight-figure checks to super PACs.

Women are smashing donation records, and Americans are increasingly donating to candidates who aren't running for office in their state," it said in a statement. **PTI**

Hong Kong charges teen activist with secession under security law

AFP ■ HONG KONG

A teenage Hong Kong democracy activist was charged on Thursday with secession, the first public political figure to be prosecuted under a sweeping new national security law Beijing imposed on the city.

Tony Chung, 19, appeared in court two days after he was arrested by plainclothes police in a Hong Kong coffee shop

opposite the US consulate, also charged with money laundering and conspiring to publish seditious content.

He was remanded into custody until his next court hearing on January 7 and faces a possible life prison sentence if convicted under the new law.

Chung is a former member of Student Localism, a small group that advocates Hong Kong's independence from China.

APPEAL FOR IDENTIFICATION

General public is hereby informed that an unidentified dead body of an unknown male, **Age:** 30-35 years, **Complexion:** Shallow, **Height:** 5'6", **Built:** Thin, **Face:** Round, was wearing Red colour Shirt and Grey colour Pant, was found unconscious behind Monestry near Yamuna river Civil Line, Delhi on 23.10.2020. He was admitted to AAA Hospital vide MLC No. 2241/20, dated 23.10.2020,

further referred to Safdarjung Hospital, Delhi. During treatment he was declared dead on 25.10.2020. In this regard a **DD No. 42A, U/S 174 Cr.P.C., dated 23.10.2020 has been registered at P.S. Civil Line, Delhi.**

Any person having any information or clue about the deceased may kindly inform to the undersigned on the following address or telephone nos.

UK's Labour Party suspends Jeremy Corbyn in antisemitism row

London: The UK's Opposition Labour Party on Thursday suspended former leader Jeremy Corbyn from its ranks after a report by the country's human rights watchdog held the party "responsible for unlawful acts of harassment and discrimination" during his time in charge.

The Equality and Human Rights Commission (EHRC), which had launched an investigation into antisemitism within the party following a string of complaints, found that Labour had broken the law in its failure to handle antisemitism, or anti-Jewish, complaints and there were "serious failings" by its leadership at the time.

However, in his reaction to the report, Corbyn said that the number of complaints made during his tenure were "dramatically overstated".

"One antisemite is too many, but the scale of the problem was also dramatically overstated for political reasons by our opponents inside and outside the party, as well as by much of the media. That combination hurt Jewish people and must never be repeated," said Corbyn, in reference to the report.

A Labour Party spokesperson issued a statement soon after to announce that Corbyn had been suspended from the party. **PTI**

PROCLAMATION REQUIRING THE APPEARANCE OF A PERSON ACCUSED

See Section U/S 82 Cr. P.C.
Whereas complaint has been made before me that accused **Deepak Kumar, S/o Dilbagh Singh, R/o 161-B, Behind Shiv Mandir, Dheerpur, Delhi** has Committed (or is suspected to have committed) the offence in case **FIR No. 414/18 U/S 376/506/IPC & 6 POCSO Act, P.S. Economic recovery faster than expected: PM

Confident of meeting \$5-trn target by 2024

PTI ■ NEW DELHI

The Indian economy is getting back on track faster than expected as a timely lockdown and various relief measures announced by the Government helped address issues faced by all sections of society and all economic sectors due to the Covid-19 pandemic, Prime Minister Narendra Modi has said.

He also expressed confidence that the target of making India a USD 5-trillion econo-

my will be achieved by 2024, saying that the crisis gave the Government an opportunity to carry out reforms that were waiting to happen for decades but no one earlier took the initiative.

"Reforms across sectors such as coal, agriculture, labour, defence, civil aviation and so on have been undertaken which will help us get back on the high growth path that we were on before the crisis," Modi said in an interview published in the Economic Times newspaper on Thursday.

On COVID-19 vaccine, he said every Indian will be vaccinated as and when a vaccine becomes available, though the focus initially would be on protecting the most vulnerable and the frontline workers.

Modi reiterated that there should be no room for complacency in fighting this virus and the only way forward is to take precautions such as wearing masks, hand washing and social distancing.

He said the government in the very beginning decided to be proactive and introduced a timely nationwide lockdown.

"We not only got the broad timing of various phases of lockdown right, we also got the unlock process right and much of our economy is also coming back on track. The data for August and September indicates that" he said.

He said this is a new virus and countries which had initially controlled the outbreak are now reporting a resurgence.

"The geographical spread of India, population density, the regular social gatherings must be kept in mind when we look at these numbers and seek to compare with others. Many of our states are larger than countries," he added. Modi said India's response in tackling the crisis has been focused on increasing capabilities to handle the situation, making people more aware, creating more facilities etc in keeping with the dictum 'Hope for the best but prepare for the worst'. Asked about plans for further stimulus for the economy, he said, "We will take all measures needed to constantly stimulate the economy in a timely manner while ensuring overall macro-economic stability."

"Remember, we are still

not over with the pandemic. Yet, our economy has shown a remarkable capability to bounce back, largely because of the resilience of our people.

"This is something that is not captured in these numbers but is the reason behind those numbers. The shop-owner, the trader, the person running an MSME, the person working on the factory floor, the entrepreneur, all these are the heroes responsible for the strong market sentiment and revival of the economy," he said.

Modi further said India has not started speaking about manufacturing only after the pandemic and the work has been continuing on increasing manufacturing for some time now. India is, after all, a young country with a skilled work-

force. But India doesn't believe in gaining from the loss of others. India will become a global manufacturing hub on its own strengths. "Our effort is not to become some country's alternative, but to become a country which offers unique opportunities. We want to see the progress of all. If India progresses, one-sixth of humanity will progress," he said.

Referring to a new world order that was formed after World War II, the prime minister said something similar will happen post-COVID-19.

"This time, India will ride the bus of manufacturing and integrating in global supply chains. We have specific advantages in the form of democracy, demography and demand," he said.

Govt likely to extend Air India bid deadline to Dec 14

PTI ■ NEW DELHI

The Government is likely to extend the deadline to bid for Air India till December 14 and also give flexibility to a potential investor to decide on the humongous debt with the national carrier, a source said.

The deadline to bid for buying out Air India ends on October 30.

The flexibility to potential investors on the quantum of the ₹ 60,074 crore debt that they want to absorb will replace the current condition of the buyer taking over more than a third of the debt and transferring the rest to a special purpose vehicle.

The source said the Air India Specific Alternative Mechanism (AISAM) has cleared the extension of deadline to December 14 to give time to potential investors to raise queries on the changes being made in the Preliminary Information Memorandum

INVESTORS TO GET FLEXIBILITY ON DEB

(PIM).

As per the Air India EoI floated by DIPAM in January, of the airline's total debt of Rs 60,074 crore as of March 31, 2019, the buyer would be required to absorb ₹23,286.5 crore, while the rest would be transferred to Air India Assets Holding Ltd (AIAHL), a special purpose vehicle.

Bidding for Air India to be done on enterprise value: Puri

PNS ■ NEW DELHI

The Ministry of Civil Aviation has revised the bidding parameters for Air India's divestment and has decided to ask for bids at enterprise value instead of equity value. The deadline for inviting bids has also been till December 14. The Ministry has also extended the cap on airfares till February 24, 2021. In the wake of the coronavirus outbreak, the aviation ministry implemented a cap on domestic airfare in May. The

Ministry has also announced the direct flights between Amritsar and Nanded will restart from November 10.

"The bids will now be invited on the enterprise value where bids will be invited on both equity and debt, Union civil aviation Minister Hardeep Puri announced on Thursday while addressing a press conference. The decision was taken by the Air India Specific Alternative Mechanism on Wed following a meeting with the home ministry, Puri added.

Sensex extends losses amid F&O expiry

L&T slumps 5 pc post earnings

PTI ■ MUMBAI

Equity benchmarks nursed losses for the second straight session on Thursday as investors offloaded banking, finance and infra stocks amid expiry of monthly derivative contracts and lacklustre global cues.

A depreciating rupee and weak Q2 results from blue-chips further sapped risk appetite, traders said.

The 30-share BSE Sensex ended 172.61 points or 0.43 per cent lower at 39,749.85 in choppy trade.

On similar lines, the broader NSE Nifty fell 58.80 points or 0.50 per cent to 11,670.80.

L&T was the top loser in the Sensex pack, dropping 4.99 per cent, after the engineering major posted a 45 per cent decline in consolidated net profit for the September quarter.

Titan, ONGC, Axis Bank, HUL, NTPC , M&M and

HDFC were the other major laggards, shedding up to 3.32 per cent.

On the other hand, Asian Paints, UltraTech Cement, HCL Tech, Kotak Bank, ICICI Bank and Reliance Industries were among the gainers, spurring up to 2.79 per cent.

Maruti results not a sign of a 'rebound'

SALES UP 10% OVER SAME PERIOD LAST YEAR BUT PROFIT GROWTH FLAT

PNS ■ NEW DELHI

Maruti-Suzuki revealed that net profits for the quarter ended September 30, 2020 had grown marginally to ₹1,371.6 crore versus ₹1,458.6 crore in the same period last year. Sales however for the quarter grew to ₹17,689.3 crore mainly on account of selling 393,130 vehicles in the quarter primarily in the domestic market. Speaking to the media after the results were announced, RC Bhargava, Chairman of Maruti-Suzuki India Limited made it clear that he did not view the restoration of demand as a 'rebound' and argued that some of the increased sales were also due to the extremely weak first quarter. He also said that these sales

did not even take into account the demand for the festive season which began mid-October. It was revealed that the company sold 96,700 vehicles during the Navratri-period and with Dhanteras and Diwali in November as well as the inventory reduction sales in December, October-December quarter ought to be very positive as well. However, Bhargava refused to predict how sales would develop post December as he believed that the true impact of the pandemic and lockdown might be felt in 2021.

Additionally, while Maruti-Suzuki, the country's largest carmaker saw commercial and fleet sales decline from seven percent of its sales to just 2.4

percent as behavioural patterns change and commuters show an increasing preference for personal mobility. In addition, Maruti-Suzuki management claimed that the company had not been adversely impacted by the decision to withdraw from the diesel market following the introduction of Bharat Stage - 6 emission norms from April and in fact had grown marketshare to 49.4 percent in the relevant quarter up from 48.3 percent and Bhargava also attributed this to increased demand for CNG vehicles. He also said that there is no need for any demand side reduction in GST rates at the current time as "we are selling everything that we are producing".

Govt approves mandatory packaging of food grains in jute bags

PTI ■ NEW DELHI

To help the jute industry, the Government on Thursday decided to extend the norms for mandatory packaging of 100 per cent food grains and 20 per cent sugar in diversified jute bags. The decision on the extension of norms for mandatory packaging in jute materials was taken at the meeting of the Cabinet Committee on Economic Affairs.

"The Cabinet Committee on Economic Affairs chaired by Prime Minister Narendra Modi has approved that 100 per cent of the foodgrains and 20 per cent of the sugar shall be mandatorily packed in diversified jute bags," said an official release. Information and Broadcasting Minister Prakash Javadekar, while briefing media after the Cabinet meeting, said the CCEA decision will benefit

fit farmers and workers located in the eastern and north-eastern regions of the country, particularly in West Bengal, Bihar, Odisha, Assam, Andhra Pradesh, Meghalaya and Tripura. Union Textiles Minister Smriti Irani said that the decision will benefit 3.7 lakh workers and 40 lakh farmers, especially in West Bengal.

"Government purchases over Rs 7,500 crore worth jute bags to sustain core demand of the sector. Decision to provide extension for mandatory package in Jute material will further boost demand for jute and support livelihood of Jute workers," Irani said in a tweet. The decision also mandates that initially 10 per cent of the indents of jute bags for packing food grains would be placed through a reverse auction on the Gem portal, the release said.

Fare limits to remain in place for another three months: Puri

PTI ■ NEW DELHI

The upper and lower limits on domestic airfares will remain in place for another three months post November 24, Civil Aviation Minister Hardeep Singh Puri on Thursday.

The Ministry had on May 21 placed these limits through seven bands, classified on the basis of flight duration, till August 24. Later, it was extended till November 24.

Puri said if the scheduled domestic flights reach pre-COVID levels by the end of the year, he will have no hesitation in removing the fare limits at that time. "We are extending the price bands for another three months," he said at a press conference.

INBRIEF

IDBI BANK TO RAISE UP TO ₹6,000 CR

New Delhi:IDBI Bank on Thursday said its board has approved a proposal for raising up to Rs 6,000 crore through an issue of shares to qualified institutional players. The winners in this contest were awarded by Deputy Chief Vigilance Officer. The programme was organized by maintaining all COVID-19 protocols and social distancing.

HOUSING COMMISSIONER INAUGURATES OPEN GYM IN JAIPUR

Parliamentary panel questions Paytm about Chinese investment, storing of data in servers abroad

New Delhi:A parliamentary panel on Thursday questioned Paytm representatives about the quantum of Chinese investment in the company and told them that the servers on which customer data is stored should be in India.

Top officials of Paytm appeared before the Joint Committee of Parliament on the Personal Data Protection Bill, and submitted their suggestions on key aspects of the proposed legislation such as management and transfer abroad of sensitive personal data, sources said. Members of the panel from different political parties asked Paytm why the server on which data of its customers is collected and stored is abroad when it claims to be an Indian firm, sources said. The panel members told Paytm representatives that the server on which customer data is stored should be based in India, sources said, adding that they also wanted to know about the quantum of Chinese investments in the digital payment service and specifics about its "backend linkages".

Kemmu's tattoo took four years

Actor **KUNAL KEMMU** is a tattoo lover and he recently visited a tattoo studio to complete a four-year-old tattoo.

On Wednesday, Kunal took to Instagram and posted a few pictures and a video to flaunt the tattoo, which has the face of a tiger with hyper-realistic details on his calf muscles.

"It's finally completed. I never posted this tattoo since it wasn't complete even though I've had it since 2016. But finally after almost about 30 hours split over an average of six hours per session it's done and I love it," he captioned the post.

A day ago, Kunal's wife and actress Soha Ali Khan posted a video that shows Kunal patiently lying in the studio while his tattoo was being done.

'With every new release, the count of butterflies in my stomach increases, and right now I feel tensed, eager to know what the audience feels. There is a sense of double pressure because we are releasing Taish in two formats, as a full-length feature film and as a web series. Both formats have their target audience.'

—Bejoy Nambiar

BOBBY DEOL, SANYA MALHOTRA and VIKRANT MASSEY will co-star in the forthcoming crime thriller *Love Hostel*, a film set against the pulsating backdrop of rustic North India.

The film will be written and directed by **Shanker Raman**, a National Award-winning cinematographer who previously directed the acclaimed film *Gurgaon*.

"I am happy to have found the perfect partners in Vikrant, Sanya and the formidable Bobby Deol. *Love Hostel* as a film not only questions what our society has become but also the paths we take to solve our problems," Raman said.

Khloe is COVID-19 positive

Reality TV personality **KHLOE KARDASHIAN** has come out and spoken about testing positive for COVID-19. She confirmed being infected by the Coronavirus in a recorded clip from isolation.

"Just found out that I do have Corona. I have been in my room. It's gonna be fine, but it was really bad for a couple days," she said in the video.

The news of Khloe testing positive is confirmed on an forthcoming episode of the reality show *Keeping Up With The Kardashians*.

Khloe was vomiting, shaking and having hot and cold flashes. She also shared that she had a burning cough and was having difficulty in speaking.

GIVING LIFE TO THE WORN AND TORN

A team of students develops Artificial Intelligence algorithms to digitally reconstruct the damaged murals from Ajanta Caves. CHAHAK MITTAL talks to them about how AI can help historians solve ancient puzzles

Imagine walking inside the oldest fort or monument in your city. You find out that the building is in a tattered condition. All that remain are blackened corners, broken window panes, crooked steps, faded marble floors, stones chiselled out of the walls, and tarnished inscriptions. Now imagine viewing everything in the condition it would have ideally been when the rulers living in that palace actually existed. Well, this is no more a mere thought or a wishful imagination, if we think digitally!

Reconstructing places of historical significance physically might include a lot of archaeological investigations, primary and secondary sources of research, guesswork, labour, funds and time. However, ever imagined if we were to revamp and reconstruct them digitally?

Well, Ancient AI, a team of IIT Roorkee students, has developed deep-learning Artificial Intelligence (AI) and Machine Learning (ML) algorithms to digitally provide aid to the restoration process of murals recovered from the Ajanta Caves in Maharashtra. The restored digital murals have now been deposited at the Arctic Digital Archive (AWA) located close to the North Pole. This will ensure its protection from natural disasters and secure accessibility for future generations for over 1,000 years.

So how does the algorithm work? Parth Chhabra, second year student of Mechanical Engineering and leader of the team, says, "The algorithm that we have created helps fill the spots and spaces present in an image based on their surroundings and previously-learned features from various other paintings. Also, we can use it to colour the image to give it a more realistic look."

The algorithm was worked upon as a part of the *Tech4Heritage Hackathon*, which aimed at finding AI & ML-based solutions to help in the restoration process of murals recovered from the Ajanta Caves. It was spearheaded by the Rishihood University, Internity Foundation and Sapio Analytics, supported by the Ministry of Culture and LTI (Larsen & Toubro Infotech). Ancient AI, the winner team, now has the opportunity to work closely with the Sapio Analytics Heritage Restoration Team.

Another student from the team, Kushagra Babbar highlights that they utilised a dataset of more than a 1,000 reference paintings to develop AI models built on General Adversarial Networks (GANs). So what were the challenges in curating the data? He adds,

Parth Chhabra

"The biggest challenge that we faced was creating a data set of damaged paintings and their corresponding restored images, which are not readily available. Hence, we thought of a completely opposite approach, that of damaging some clean images to an extent, which matches real-life damaged images. With image-processing, we took spots from the damaged ones and overlaid them on the clean ones. Post that, through Neural Style Transfer, a fascinating AI achievement, we styled our images similar to the damaged ones. With this and some randomisation, we created a dataset of approximately 850 damaged images from the 36 clean ones, of the paintings. It took around 40 to 50 hours generating this much big dataset. Completing this step was very crucial

Kushagra Babbar

since our result for the next step depended a lot on this. It was a very challenging process and this could not have been done without team work. We divided the images equally among us and generated 210 images each."

Several museums and exhibitions are now evidence of how art is being displayed through AI and VR technologies, making experts believe that AI is the future face of preserving history. Sahil Agarwal, co-founder and CEO, Rishihood University, explains how, "Technology certainly has a massive role in the future of art and history. There are several benefits to this. Today, when I enter the fossils section of a museum, I can not only see the part of an animal's skeleton, I can visualise the real animal movement and other char-

acteristics such as how it grew older and so on, through the AI. When I look at a painting, I can feel as if the painting is a visual reality around me. People are developing games and videos on history using AR and VR. Similarly, AI can be used to curate, store and recreate art. I believe the day is not far where the machine can learn from an artists' style and recreate an art."

So, what would an art on climate change look like if Van Gogh were to depict it in his style? he questions and says, "I think AI will reach that sophistication!"

Finding out evidence for historical theories and tracking records of past events have only been hindered by the labour-intensive process of identifying data from artefacts and handwritten inscriptions. Talking about how AI can help historians solve ancient puzzles, Kushagra says, "AI is the most efficacious way to build any automated solution. With the help of different algorithms in computer vision and natural language-processing, we can extract and even predict the ignored and missing information about ancient civilisations. Even if it is an old painting or an ancient literature in an unknown language, through AI, we can restore and know our past much better. I think the hackathon was a great opportunity to channelise our skills and have a head start in restoring our own culture, identity and heritage."

Even though the technique might be of major help to the historians, experts argue that looking at the current pandemic and frequently-occurring health haphazards, archaeological puzzles do not seem to be as urgent as computer science projects in healthcare, finance and other industries. Talking about whether AI's usage has more of an urgency towards healthcare infrastructure rather than historical research at present, Sahil says, "Algorithm-based decision-making is quite useful, definitely in the areas such as healthcare, where we are short

of skilled professionals. However, I will not say that there is an urgency because the robustness and efficiency of such technologies develop over time. They need constant human supervision to maintain and improve their decision-making. The implication of incorrect results from technology in healthcare is much more severe than in an area like archaeology. Therefore, we should not prioritise among the two. Rather, we should judge whether the technology has sufficiently matured so that it can be applied for mass usage in a particular area."

Parth agrees that applying algorithmic techniques to historical research can improve AI's capabilities "more than directly applying them to a sensitive area like healthcare right now."

Well, why just healthcare and finance, Sahil believes that "education" is an area where AI has immense potential. He adds, "It can become a 24x7 companion for a student. Using AI, a person can realise her/his current levels and ways of learning, how efficiently one reads and what time of the day is best suited for one to read, what skills one needs to pick up if s/he wants a particular job, etc. Similarly, employers can use AI to track the levels and speed of learning much before the recruitment and for on-the-job training. Some companies are developing AI-based recruitment models, too."

For Parth, "AI can excel in Agriculture and Farming, Security and Surveillance, Sports Analytics and Activities, Manufacturing and Production, Live Stock and Inventory Management, Autonomous Vehicles, Logistic Supply Chain, creating Virtual Assistant or Chatbots, Retail and Fashion."

He adds that while this was about recreating the images of the damaged structures, the team aims to work on a project that could involve "interpreting the ancient texts through AI!"

Exquisitely expensive

The Lexus LS 500h is a brilliantly crafted car. But even in its segment, it is far too pricey

think of the design as the perfect slashing of a katana by a samurai master.

Now to the driving, I have never really enjoyed driving cars in this category because honestly, nobody who acquires such a vehicle would ever drive it themselves. This is a car that one is driven around in, just like its competition the Mercedes-Benz S-Class, BMW 7-series, Audi A8 and Jaguar XJ. Getting into the 'luxury seat', diagonally behind the driver, you get

to push back the front passenger seat and use an ottoman as well as get all the other nice features such as a mas-sager, screen et al. From a driving point of view, the 354 horsepower engine can drive the car very fast but when you are sitting in the driver's seat, you wish you had white cotton gloves because you do feel like a chauffeur. The hybrid system ensures that you get amazing fuel economy as well, despite having a big, fat V6 motor under the hood.

If you have to arrive in style, this is a great car. The problem is that it is twenty lakh more expensive than its sole competitor in the market, the BMW 745Le, BMW's hybrid 7-series. Yes, the Teutonic sense of luxury and aesthetics are very different, weirdly enough in terms of modern technology the BMW is slightly better off, the LS500h feels slightly dated. Even a chauffeur would like Apple CarPlay I guess. The combined power output of the BMW is superior and unlike the LS500h, it is a plug-in hybrid.

This is a car you buy because you admire the Japanese aesthetic, because you have walked the streets of Akihabara, because you have experienced both — the practicality and the sensibility of a bento box. There may not be a practical reason to buy this car over the competition, but at ₹1.82 crore anybody considering this car does not necessarily have practicality on their mind and the aesthetic sense and practical sense are independent of each other. This is a vehicle you buy if you love anything and everything Japanese.

Nushrratt was a revelation: Hansal

Actor Nushrratt Bharuccha, who recently teamed up with the award-winning director, Hansal Mehta, for Amazon Prime Video's forthcoming film, *Chhalaang*, has been praised by the director.

Hansal said, "Nushrratt was a revelation! With so many wonderful actors in the film, she held her own and how. She was hard working but always chilled out. Her performance was comfortable and she worked really hard on her accent to make it a part of her characterisation. She has a lot of potential. And she is a very chilled out person to be working with."

He added that Nushrratt worked "remarkably hard" to get her *Haryanavi* diction for the film right. The actor who gained fame after the *Pyaar Ka PUNCHNAME* series will now be seen opposite Rajkumar Rao in the film. The film is set to release on the Diwali weekend, on November 13. Other than this, Nushrratt will also be seen in *Hurdang* opposite Sunny Kaushal and Vijay Varma.

RAINBOW

IN MY PLATE

Chef DAVID EDWARD RAJ suggests including fruits, vegetables and other key components of different colours to the platter so that they form the required nutrition base needed for a healthy body and mind

The lockdown phase has got many food enthusiasts to don the chef's hat and innovate with various dishes and cuisines. More focus has been given to healthy eating during the peak of the pandemic as staying immune to the virus was considered as important as breathing. However, there is a myth attached to healthy eating that it does not tastes upto the mark and its presentation is not so attractive. To change this mindset, chefs across the world have been innovating with food to introduce meals that are not just tasty and healthy, but also visually appealing.

Though there are ample nutritious food items available in the restaurants as well as on the shelves of supermarket, one of the fanciest yet basic idea is 'eating the rainbow'. Yes, that's right. The term 'eating the rainbow' means including foods of different colours to the platter. This comprises fruits, vegetables and other key components that together form the required nutrition base that is needed for a healthy body and mind.

It is a commonly known and acknowledged fact that more the inclusion of vegetables and fruits in our diet, the better it is for the body. However, there is a lack of motivation which entails most people not following this eating habit.

The concept of this food being used for medicinal purpose has been around for more than a millennium and is still actively followed across various schools of medicine like Ayurveda and Unani. Such special foods were known and treasured due to their use in treating or

preventing diseases. Hence, it is important for us to include more fruits and vegetables in our diet because they possess vitamins and minerals that not only help prevent but also delay the onset of various diseases.

ESSENTIAL NUTRIENTS AND THEIR BENEFITS

Vitamins like vitamin C, vitamin K, riboflavin, folic acid and compounds called carotenoids (some of which can be converted to vitamin A in the body) are found in many vegetables and fruits. Guava and gooseberry are some of the easily available sources of vitamin C. Vegetables like capsicum are rich in thiamine, a member of the B complex family of vitamins.

Some vegetables like potato, sweet potato, tapioca, yam and fruits like mango, banana and sapota make a fair contribution towards energy intake. Most vegetables and fruits are high in water and fibre contents and low in calorific value.

Many of the greens are packed with iron. Drumstick called as *Moringa* is loaded with essential nutrients. The leaves are the most nutrient dense part of the plant and one of the finest sources of calcium, iron, zinc, selenium and magnesium. Fresh pods and seeds are the

best for oleic acid — a healthy fatty acid that keeps the heart health in check. *Moringa* leaves are loaded with great amount of protein and are one of the best sources.

Flavonoids, a diverse group of phytonutrients (plant chemicals)

found in probably all fruits and vegetables also play an important role. Along with carotenoids, they are responsible for the vivid colours in fruits and vegetables. Flavonoids are the largest group of phytonutrients. They are found in lemons, oranges,

plums, peaches, apricots, apples, green leafy vegetables, yellow capsicum, onions and broccoli.

Grape fruit is known to reduce blood cholesterol and glucose concentrations. Yellow fruits like mangoes and green leafy vegetables and carrots are rich in beta carotene which is converted to vitamin A in the body and also helps to fight cancer.

Red fruits like tomatoes and watermelon contain lycopene, which is important for fighting prostate cancer and heart diseases.

Strawberries, blueberries, apples, grapes and onions are being studied for their anti-ageing effects.

The most natural way to overcome constipation is to increase intake of green leafy vegetables and other high fibre vegetables and fruits. Their high water and fibre content and low energy values promote satiety, decrease energy intake and could be important in weight management. Nutritionists recommend regular moderate exercise and many servings of soups and salads for those who need to shed a few pounds. Substituting fruits and vegetables for a calorie dense evening snack helps in weight loss.

(The chef is Director — Culinary development & Innovation, Elixir India.)

The diet connection

Here's a list of superfoods that can lower the risk of breast cancer

A healthy lifestyle which includes exercise and a nutrient-dense diet may help reduce the risk of cancer. Foods which are rich in antioxidants and fiber have been found to regulate oestrogen and inhibit cancer cell formation. Small changes to a routine can help reduce the risk of breast cancer. Rohit Shelatkar, VP at Vitabiotics, Fitness and Nutrition Expert lists down some superfoods to add in ones diet to reduce the risk of breast cancer.

Walnuts: Walnuts are packed with Omega-3 fatty acids, antioxidants and phytosterols which helps regulate oestrogen levels and slow the growth of breast cancer cells. They have been known to help fight inflammation which in itself is beneficial in avoiding heart disease and a host of other chronic conditions, but it is also linked to cancer.

Blueberries: Research suggests that blueberries can reduce the growth of breast cancer tumours by causing cancerous cells to self-destruct, a process called apoptosis. Frozen wild blueberries are just as antioxidant and nutrient-packed as fresh. One can consume blueberries with smoothies, oatmeal or yogurt.

Sweet Potatoes: The sweet potato can inhibit proliferation and can regulate cell growth, defend and repair them. Studies have shown that women who eat sweet potatoes on

a regular basis are at a 17 per cent lower risk of developing breast cancer.

Flaxseeds: Flaxseed has all kinds of amazing health benefits, including lowering blood pressure and cholesterol. It is the richest source of lignans — a type of antioxidant. Dietary flaxseed has the potential to reduce tumour growth in patients with breast cancer. One can add flaxseeds to smoothies, yogurt par-faits or mix in the morning oatmeal.

Garlic: Garlic gets its cancer-busting properties from allicin, a component of garlic that's been shown to inhibit the division of cancer cells. Other cancer risks also found to lower lung, stomach, and prostate, possibly due to the flavonols present in the garlic. Eating garlic raw can maximise the anti-cancer effects.

Green Tea: It is packed antioxidants with immense health benefits. One of those benefits includes having anti-breast cancer properties.

Decreasing the number of fatty foods in the diet and replacing them with whole foods will reduce the risk and have been shown to improve the survival rate of breast cancer patients. While no single food is guaranteed to keep oneself cancer-free, changing the diet to include more of these superfoods that can help fight breast cancer would prove beneficial. —IANS

R E C I P E S

PANEER MAKHANA IN MAKHANI GRAVY

WHAT YOU NEED

- Paneer: 200 gm
- *Makhane* (Popped lotus seeds): 50 gm
- Whole spices (green cardamom, cinnamon, clove and bay leaf): 15 gm
- *Ghee*: 30 gm
- Milk: 100 ml
- Cashew, white poppy seeds and melon seeds paste: 60 gm
- Cashew nut: 20 gm
- Raisins: 20 gm
- Cardomom powder: 5 gm
- Salt to taste
- White pepper powder: 2 gm
- Sugar: 15 gm
- Tomato purees: 100 gm
- *Kastoori methi*: 15 gm
- Saffron: 1 gm
- Fresh coriander leaves (to garnish)
- Pomegranate seeds (to garnish)

METHOD

- Dry roast *makhana* and leave it aside.
- Heat *ghee* in a pan and add whole spices.
- Once they start to crackle, add cashew, poppy and melon seeds paste and start stirring.
- Now add milk little by little and cook the gravy. Then add tomato puree and cook till the *ghee* separates.
- Add salt, sugar and white pepper powder. Make paneer *kofta* by grating the paneer. Stuff with nuts and flavour with cardomom powder.
- Cook another minute or so. If gravy gets thicker, add more milk and cook again.
- Turn off the heat, add fried *koftas*, roasted *makhane* and mix well. Add saffron and mix once again.
- Sprinkle coriander and pomegranate seeds. Serve immediately.

Courtesy: Chef Vaibhav Bhargava, Band Baja Barat Restaurant.

ALL TRICK, NO TREAT

WHAT YOU NEED

- Jameson: 50 ml
- Lemon juice: 25 ml
- Toffee syrup: 20 ml
- Chocolate bitters
- Egg whites: 25 ml

METHOD

- Take one cup sugar and butter (half stick).
- Continuously stir over medium heat for five minutes until it turns into rich brown colour.
- Add water if too thick and allow toffee syrup to cool.
- Place all ingredients into a cocktail shaker, add ice and shake well.
- Double strain into a chilled glass of your choice. Garnish with sprinkling of nutmeg and chocolate.

Courtesy: Pernod Ricard India.

RAW BANANA, COCONUT AND SAGO KABAB

WHAT YOU NEED

- Raw banana: 600 gm
- Fresh coconut: 250 gm
- Soaked sago pearls: 300 gm
- Almond: 40 gm
- Peppercorn: 1 tbsp
- Salt to taste
- Green chilli: 5
- *Ghee*: 20 gm

METHOD

- Wash, boil and cool banana. Then grate banana and fresh coconut.
- Further, soak sago for two hours and drain water.
- Heat *ghee* in a pan, add grated coconut and cook till it turns golden brown.
- In a mixture grinder grind half of the roasted coconut

and keep the rest half aside.

- Fine chop green chillies. Mash half of sago and keep half sago for coating kababs from both sides.
- Then assemble all the above ingredients in a bowl and mix well.
- Divide above mixture in small balls and make round and flatten kababs.
- Then spread soaked sago

pearls on a plate, place flatten kababs on sago and firmly press so that sago can coat the kabab. Do this for both sides.

- Heat *ghee* in a non-stick pan. When hot place kababs and cook them from both sides till it turns golden brown.
- Serve hot.

APPLE GALETTE WITH GINGER AND HONEY

WHAT YOU NEED

- Plain flour: 225 gm
- Salt to taste
- Butter (chilled and cut into small cubes): 125 gm
- Castor sugar: 2 tbsp
- Cold water: 2½ tbsp
- Crisp dessert apples: 4
- Ground almonds: 140 gm
- Demerara sugar: 55 gm (1 tbsp extra for dusting)
- Stem ginger (drained of syrup and finely diced): 100 gm
- Runny honey: 2 tbsp
- Lemon juice: 3 tbsp
- Melted butter: 2½ tbsp
- Stem ginger syrup (for glazing): 2-3 tbsp

METHOD

- Preheat the oven to 190 degree celsius.
- **For the dough:** Sift the flour and

salt into a bowl, add the chilled diced butter and rub together until

the mixture resembles breadcrumbs. Stir in the sugar, add

the water and bring the dough together into a ball using a spatula, wrap in cling film and rest in a cool place for an hour.

- Peel the apples, cut into quarters and remove the cores.
- Cut each quarter into three or four slices and reserve.
- Sprinkle the apples with two to three teaspoons of the lemon juice to prevent from browning.
- Roll out the dough very thinly on a flour dusted worktop to a circle 38 cm (15 inches) in diameter.
- Brush the base of the casserole with a little melted butter and line the base and sides with the rolled out pastry, allowing the excess to stand proud of the rim.
- Combine the ground almonds, demerara sugar and chopped stem ginger together and spoon into the pastry lined pan.
- Arrange the sliced fruit on top in a neat circle pattern starting from the centre and working outwards.

- Mix the honey with the lemon juice and brush over the top of the fruit.

- Wet the inside exposed edges of the pastry with a little water and fold it into the pan, gently pressing together where the pastry overlaps. This can be in six or seven places and should look quite rustic.
- Brush the top of the turned over pastry with the melted butter and sprinkle with the extra demerara sugar.

- Bake the galette in the centre of the preheated oven for 50 to 55 minutes until golden brown and crisp, covering it with a sheet of loose foil, once it is nicely browned.
- Remove the galette from the oven and brush the apples with the stem ginger syrup.
- Serve warm or at ambient temperature with vanilla custard, whipped cream, honey yogurt or ice cream.

Hat-trick hero RASHFORD

Substitute Marcus nets thrice in Utd's 5-0 win; Messi beat Cristiano-less Juve

AFF ■ TURIN

Marcus Rashford was again the star for Manchester United in the Champions League with a hat-trick in a 5-0 thumping of RB Leipzig on Wednesday as Barcelona put their off-field troubles to one side to win 2-0 away to a Juventus side deprived of Cristiano Ronaldo.

Rashford's late goal earned United a 2-1 victory away to Paris Saint-Germain last week and at Old Trafford, the England striker came on as a second-half substitute and scored three times from the 74th minute on in what was a fine win against last season's semi-finalists.

Paul Pogba released Mason Greenwood to open the scoring in the first half, before the youngster made way for Rashford after the break and Ole Gunnar Solskjaer's side ran away with the game to make it two wins from two in Group H.

Anthony Martial also netted from the penalty spot as United ruthlessly exposed the side who currently top the German Bundesliga and went clear at the top of the section.

"We looked dangerous throughout and that we could score every time we went forward," said Rashford. "It was a real team performance."

Meanwhile PSG got their campaign up and running by beating Istanbul Basaksehir 2-0 in Turkey, although they lost Neymar to an adductor injury in the first half.

Both PSG's goals were scored in the second half by Moise Kean, the on-loan Everton striker heading in Kylian Mbappe's corner in the 64th minute and then turning to fire in the second late on.

BARCA BOUNCE BACK

In Turin, Barcelona bounced back from their weekend defeat in the Clasico against Real Madrid and shut out the boardroom crisis which led to president Josep Maria Bartomeu resigning on Tuesday.

Ronald Koeman's side had luck on their side as they took the lead through a deflected Ousmane Dembele strike and then saw Alvaro Morata have three goals disallowed for off-side for the hosts.

The absence of Ronaldo because of a positive coronavirus test meant no chance to see him renew his on-field rivalry with Lionel Messi, but the Argentine got his name on the scoresheet late on, netting a stoppage-time penalty to seal Barca's second victory in as many Group G outings.

"This was our best game all season," said Koeman.

Juve had Turkish defender Merih Demirel sent off late on as their underwhelming start to the season under novice coach Andrea Pirlo continued.

Their next game is away at Ferencváros, who came from behind to draw 2-2 with 10-man Dynamo Kiev in Budapest.

Mechanical engineer, is a young and dynamic leader of the masses. who is entirely devoted to the cause of Dalits and the marginalised in his constituency. As a student leader he led many social movements, and has done enviable social services during covid 19 by way of organizing free kitchen for the poor and migrant labours, orphan and even for the stray animals. He took active part in empowering women by organizing self help groups. His dedication to public welfare and his outstanding leadership in times of crisis are clear reasons for his selection as a candidate.
3	Reasons as to why either individuals without criminal antecedents could not be selected as candidates (not more than 100 words)	Considering his above merits along with his dedication to the cause of the marginalized, women and the minority, he has an edge over others as a contesting candidate. He is deeply involved in sensitizing people on Covid guidelines, taking care of the patients and their families during the unprecedented pandemic, providing gainful employment to the labourers of his area have endeared him with the people. His head and heart and commitment to the service of the people are obvious reasons for selecting him as a candidate.

(2) Name of the Constituency: 102-Tirtol (SC) Assembly Constituency
