Bihar Khomena namesh darg DUF among eight

Tenetaces of conspiracy spread through India and beyond, says NIA

PIS IN NEW DELHI

The National Investigation Agency (NIA) on Friday named eight persons involved in conspiracy to target the Musharraf family, Yasin Malik, Zakir Musa, Sanjay Pandey and Sajjad Lone (by name and alias) by conspiring to murder them. The NIA also named ‘organiser’ of the Pulwama attack which killed 40 soldiers in February 2019 and had caused a major setback to India’s military operations in J&K and Poonch in December 2001.

The federal agency had conducted a detailed investigation into the conspiracy case of 2001, and after completing the investigation, the agency had sought the sanction of the competent authority for prosecution of accused persons involved in the conspiracy.

“After a detailed examination, backed with scientific evidence, it is evident that the accused persons were instigating their criminal acts of terror, being motivated by political and religious interests and having been involved in activities contrary to the provisions of the UAPA. After a detailed investigation, the NIA has named eight persons involved in the conspiracy. The NIA has submitted a comprehensive investigation report to the competent authority for prosecution of the accused persons,” the spokesperson said.

FARMERS’ PROTEST

Power, urine, DAP supply and movement of grains severely impacted: Punjab Govt

A stream of peaceful protesters on Tuesday poured into New Delhi’s historic Ramlila Grounds in a show of defiance against the Centre’s controversial farm laws, creating a sea of green in the manmade lake that is a legacy of the Mughal era.

Union Minister Piyush Goyal has been assigned the charge of Ministry of Consumer Affairs, Food and Public Distribution which was earlier headed by Narendra Singh Tomar. In a statement, Goyal said that the farmers’ movement has now reached the capital and will continue to grow.

Piyush Goyal said that the farmers’ movement was a ‘well-organised’ one and the protesters were coming in large numbers. He also said that the farmers’ movement was not a protest against the Centre but against the government of the previous Centre.

The protest has turned violent with some protesters damaging infrastructure and roads, and setting fire to vehicles.

US’s new anti-missile system: India’s 2nd strikeback

Putin showed the world that India is willing to respond to challenges with its own capabilities by testing the IRDRAM anti-missile system.

The missile was launched on the outskirts of Delhi at around 02:30 IST on Saturday. The test was conducted at a range of 30-50 Mts, which is the maximum range of the IRDRAM. The missile successfully intercepted a target of 30-50 Mts.

The missile was launched on the eastern coast of India at around 02:30 IST on Saturday. The test was conducted at a range of 30-50 Mts, which is the maximum range of the IRDRAM. The missile successfully intercepted a target of 30-50 Mts.

The missile was launched on the eastern coast of India at around 02:30 IST on Saturday. The test was conducted at a range of 30-50 Mts, which is the maximum range of the IRDRAM. The missile successfully intercepted a target of 30-50 Mts.

SIT on illegal immigrants registers 370 FIRs: Haryana Home Minister

Haryana Home Minister Anil Vij on Friday said that the Special Investigation Team (SIT) constituted to check illegal immigration into the state has registered 370 FIRs in cases pertaining to illegal immigrants. Out of 370 FIRs, 257 people were arrested and another 73 FIRs were registered against smugglers.

Vij said the SIT has been operating at the state level which will monitor and investigate such cases to end illegal immigration in the state. The SIT is constituted to monitor and arrest illegal immigrants. The state police quota is also assigned to the SIT which is working with full zeal.

The SIT has reached abroad also and has arrested 301 people, including 257 persons who went abroad to work illegally and others who helped them in illegal immigration.

Younger patients prone to adverse clinical outcomes: Study

Widespread exposure was seen in a large study that found adverse clinical outcomes were more common in younger COVID-19 patients.

A meta-analysis of 66 observational studies found that younger COVID-19 patients were more likely to develop adverse clinical outcomes, including hospitalization, intubation, mechanical ventilation, and death, compared to older patients.

The study pooled data from 20,784 patients, of which 7,342 were in the younger group (age <60 years) and 13,442 were in the older group (age ≥60 years).

The relative risk of developing any adverse outcome was significantly higher in the younger group compared to the older group, with an odds ratio of 1.36 (95% CI: 1.20-1.55). The risk was highest for mortality, with an odds ratio of 2.05 (95% CI: 1.53-2.75).

The findings highlight the importance of focusing on younger COVID-19 patients, as they are more likely to experience severe outcomes, and suggest that interventions targeting younger populations may be necessary to mitigate the impact of the pandemic.
India, US likely to hold 2+2 talks in October

KUMAR CHILLAVARAPU

With 5.24 lakh of the 6.29 lakh Covid-19 cases in India occurring in the Kashmir division, the state government has sounded caution against re-opening schools and colleges. The health and safety of the students is not that simple as it is legislatively. The government should be given preference in this regard to ensure safety of the students.

Kerala Chief Minister Pinarayi Vijayan said in the state assembly that schools and colleges may not function at least for the next few months. “It is good to keep the institutions closed to avoid the risk of transmission of Covid-19. There are no reports coming from the outside, regarding the opening of schools and colleges in other states. But the teachers and students should ensure their safety by avoiding the risk of getting infected in the state,” he said.

Earlier, Pinarayi Vijayan had said the state was working on “a plan” for re-opening schools and colleges, on a case-by-case basis, with the help of deliberations with the expert committee on the subject.

Narrow escape for BJP national vice-prez as truck rams his car twice

Kochi: There was an attempt to stone-throw at the national vice-president of the Bharatiya Janata Party in front of his official residence in the state capital.

The incident took place on Friday as the vice-president of the BJP, Syed Shabir, was travelling in a car from his residence at Mavoor to his official residence in the state capital.

Shabir, who was accompanied by his security personnel, was not injured in the incident.

Pakistan in Azerbaijan

It seems that the internal problems of other nations make up the necessary ‘bind’ that keeps our fractured and restive neighbour going.

Shomprer Singh

Pakistan is a young democracy, and the last thing that has been going on is that it has chosen not to remain so. As a result, its political and social structures are still in a state of flux, making it difficult to predict how it will develop in the future. The government has been trying to address these issues by implementing various policies and reforms, but it has not been able to sustain them for long. The country is still facing many challenges, including economic instability, political instability, and security threats. The government has been working to improve the economy by diversifying the economy, promoting exports, and attracting foreign investment. However, the pace of progress is slow, and there are many challenges to overcome.

Early days yet

The Reserve Bank of India expects the economy to contract by 9.5% per cent this year. Is it being too optimistic?

The Monetary Policy Committee of the Reserve Bank of India has decided to keep interest rates unchanged for the time being and for a more accommodative stance, which could result in allowing banks to be more liberal on credit. The meeting at the stock exchanges celebrated by climbing, not mass strikes, which are still enough to disrupt the entire decision. The RBI, however, expects the economy to contract by 9.5% per cent in the 2020-21 fiscal, thanks to the Coronavirus pandemic and its subsequent lockdown. However, one must ask whether the抱紧 经济 乾旱 造成 半年多的 降水 情況, with several finance firms and ratings agencies predicting that India will have a double-digit economic contraction this year, thanks to the severe drop in economic activity in the first quarter. But could it avoid a no-deal Brexit for the Union of Nagorno-Karabakh? It is a question that needs to be answered.

Freedom of expression within limits

A significant aspect of democracy is that it demands the freedom of expression for a healthy democracy. The assets of democracy cannot be ascribed to the rights of freedom of expression, which are not only essential for the healthy functioning of democracy but are also the means through which the people can express their views and opinions. However, it is not the same in the rest of the world. In many countries, the people are not free to express their views and opinions. This is because the governments have changed forever thanks to the pandemic. It is something that has been going on for the last two years. The government has been trying to suppress the freedom of expression by introducing various laws and regulations. However, these laws have been challenged in the courts and the courts have ruled that these laws are unconstitutional. The three-Judge Bench held that the laws were unconstitutional and that the expression of the people was a fundamental right. The court ruled that the laws were unconstitutional and that the people had the right to express their views and opinions.

Together we can fight distress

The strategy being implemented for enabling good mental health enlivens sustainable psychological support to students, parents and teachers.

As a way to help worsen the problem of school dropouts, the Ministry of Human Resource Development has ramped up a program called Swabhiman, which provides financial assistance to students in need. The program has been extended to cover students from economically weaker sections, particularly those who have been adversely affected by the COVID-19 pandemic. The program aims to provide financial assistance to students to ensure they continue their education and do not lose their jobs.

In addition to the Swabhiman program, the Ministry of Human Resource Development has also launched the Swasth Mantri Samadhan program, which provides a platform for students to connect with health professionals and get free medical advice. The program is designed to address the mental health issues faced by students, particularly during the COVID-19 pandemic.

The program aims to provide students with free medical advice and support to address their mental health issues. The program is open to all students who are facing mental health issues and are in need of professional assistance.

China claims coronavirus broke out in world's various parts last year, it only reported 1st

China’s senior disease expert has said that the coronavirus could havebroken out in various parts of the world at the same time last year but was only the one to have reported it. Speaking at the World Health Organization (WHO) meeting in Geneva on Thursday, Dr. Mike Ryan, the executive director of its Health Emergencies Programme, said: “Our job is informed by data and evidence. We have put a lot of effort in trying to piece the puzzle of the origin of the virus. China also went that extra step of reporting the virus to the WHO, which is very significant.”

Ryan said Russia was one of the countries that notify the WHO “on the origin of the virus”. China also waited two weeks before notifying the WHO, the US, the United Kingdom, and Japan, he added.

China has agreed, at the G20 level, to probe the origins of the coronavirus, Hong Kong-based Associated Press chief correspondent Michael Collier said in a tweet.

Trump, Bar at odds over slow pace of Durham investigation

US President Donald Trump is increasingly at odds with Attorney General William Barr over the federal probe into the origins of the Trump campaign’s Russia investigation. The US president has long lashed out at Attorney General William Barr over the probe and its attempt to oust him.

Barr is under pressure from prominent Obama administration officials to act as part of his campaign against Joe Biden, who was serving as vice president at the time.

But a year and a half into the investigation, the US and the UK, with less than one month to the US election, have agreed to delay the release of a document that could shed light on the Justice Department’s investigation into the origins of the Trump campaign’s Russia investigation.

Spain’s king and PM visit Barcelona amid protests

King Felipe VI of Spain and Prime Minister Pedro Sanchez met with riot police in Barcelona on Friday to appeal for calm following a spate of protests in the region. The king and Sanchez visited the city to mark the third anniversary of the Catalan independence vote, which saw a vast majority of voters in favor of leaving Spain.

The visit comes as authorities in the north-eastern region are preparing for a potential general strike on Monday.

The protests were sparked by a court decision to keep a man detained on charges of separatism. The man, who was a member of the Catalan pro-independence party, was arrested in May.

The protesters said the arrest was part of a government crackdown on the independence movement.

Korean group must remove Berlin comfort women

British women’s advocacy group Berlin Comfort Women has called on the South Korean government to remove a statue of comfort women from Berlin. The statue, which was erected in 2014, commemorates the estimated 200,000 women who were forced into Japanese military brothels during World War II.

The group said the statue, which is located outside the Japanese embassy in Berlin, violated the Japanese government’s demand that Berlin remove it.

The group said the statue violated the rights of the women who were forced into the brothels. The group said the statue also violated the memory of the women who were forced into the brothels.

Europe’s Eastern Orthodox Church conference calls for an end to the war in Israel, as well as for peace in the Middle East.

Judge motions in delay to extend Florida’s voter registration

A federal judge on Friday denied a motion to extend the Florida voter registration deadline.

The judge ordered the state to extend the registration deadline to March 11.

The decision came after a federal judge ruled in favor of the state on a similar case earlier this month.

The judge ruled that the state had met its legal obligations and that the state should not be required to extend the registration deadline.

The judge also ruled that the state had met its legal obligations and that the state should not be required to extend the registration deadline.

Banks, experts hail RBI's growth framework

Relief to exporters: RBI's decision to lower risk weightage on home loans

New Delhi: RBI's decision to lower risk weightage on home loans is a welcome step, say experts. 

RBI decided to continue the system-based risk rationalization in the banking sector on Friday.

The Reserve Bank of India (RBI) Friday said it would continue the system-based risk rationalization in the banking sector.

According to the new risk weight norms, home loans for the loan-to-value (LTV) ratio of 75 per cent and below will be given a risk weight of 12.5 per cent compared to the current risk weight of 20 per cent.

Chunduru, MD & CEO, ICRA, said: “We welcome the RBI's decision of reducing risk weight for housing loans. This will help in easing the credit flow to the housing sector and will also help to increase the affordability of housing for the middle-class income groups. We also believe that this move will help in increasing the demand for housing and also help in the revival of the real estate sector.”

The move is expected to improve the risk profile of Indian banks.

Students should aspire for deepening, broadening their knowledge: K Kasturirangan

Delhi: Kasturirangan, former chairman of the Scientific Advisory Committee to the Prime Minister of India and the former vice-chancellor of IIT Madras, in his new book, "Quest for Knowledge: A Journey of Quest for Knowledge", has argued that students should aspire for deepening, broadening their knowledge.

"Students should not only aspire for becoming a master of their respective fields but also aspire for a broad and deep knowledge of other fields," Kasturirangan said.

He said, "The students should not only aspire for developing their expertise in their respective fields but also aim for becoming a master of other fields. This will enable them to develop new and innovative products and services.

Wearable solution to airborne viruses

New Delhi: At a time when the world is grappling with Covid-19 and variants, a wearable solution to airborne viruses that can be worn like a face mask has been developed.

The technology, called AirTamer, has been developed by scientists at the Indian Institute of Technology (IIT) Delhi.

The technology, which is based on a combination of air purification and air filtration, can remove 99.99% of airborne particles, including viruses.

SKY'S NOT THE LIMIT

National Geographic's show, Mega Icons Season 2, explores the journey of astronaut KALPANA CHAWLA through her father BANARASI LAL CHAWLA. He tells Sivon Sivewen how undying curiosity about the sky made her a pioneer and made some extraordinary life choices.

“Your daughter has become a scientist!” his friend laughs. Chawla, the first Indian origin woman to go into space, remembers how her father used to take her to see the stars in the sky. She used to tell her daughter that there were two kinds of people: those who looked up at the sky and those who looked down.

As Kalpana's father went on to share her journey, he recalled out Kalpana's touching reply, "My sister wrote a letter to her asking if she could decide a name, she promptly answered — Kalpana, "which implies that I was not great only from your work, but thoughts too!"

With every astronaut and a song was played for the launch. Kalpana's father adds proudly that the University has even put messages on the rocket itself in her name.

Twelve-time champion Rafael Nadal reached his 13th French Open final on Friday with a 6-3, 6-3, 7-6(7/0) win over Argentina's Diego Schwartzman, setting up a potential blockbuster title clash against Novak Djokovic. For 34-year-old Nadal, it was a 99th win at Roland Garros since his 2005 debut and put him just one victory away from equalling Roger Federer's all-time record of 20 Grand Slam titles.

"It was difficult until the end," Schwartzman said. "Rafael fought off two break points in the 14-minute opening game. The world number two then broke for 2-0 but Schwartzman retrieved it immediately.

It was a brief respite for the 5ft 7in (1.68m) player affectionately known as El Peque ("shorty"), as the 28-year-old was broken again in the fourth game.

The Argentine saved a couple of set points but dumped the third one in the net and the opener was Nadal’s after 65 minutes on court. Nadal was comfortably the stronger, breaking in the third and ninth games for a two sets lead.

"It was always going to be a tough match against Schwartzman who had shocked him in Rome last month. I played a couple of bad points in the third set but Diego is a very tough player. There are going to be a lot of close matches in the next few years," said Nadal in a 10th win in 11 matches against Schwartzman, who had lost both sets and 10 games to Nadal in the quarter-finals. "It was difficult until the end but it was a positive match for me."

Nadal fought off two break points in a marathon 14-minute opening game. The world number two then broke for 2-0 but Schwartzman retrieved it immediately. It was a brief respite for the 5ft 7in (1.68m) player affectionately known as El Peque ("shorty"), as the 28-year-old was broken again in the fourth game.
