Ready for any eventuality: India

In LS, Rajnath raps China for violating established rules

India is committed to peace but "it is also ready for any eventuality," was Defence Minister Rajnath Singh's stern message to China from the floor of Parliament on Tuesday floor of Parliament on Tuesday with regard to a massive build-up on the Line of Actual Control (LAC) in the eastern Ladakh. Repeatedly blaming China for attempted transgression of

Repeatedly blaming China for attempted transgression of LAC and aggressive behaviour, Singh said in the Lok Sabha that the country's forces are fully-prepared, stocked with arms, ammunition, food, and witter deathing.

are fully-prepared, stocked with arms, ammunition, food, and winter clothing.

Speaking about the prologed stand-off with China on the Ladakh border, the Defence Minister accused China of violating established rules and conventions laid down by 1993 and 1996 agreements between the two countries and "transgressing" the border.

While stating that the Indian Army is "battle-ready," Rajinath said the border issue could be resolved by talks and dialogue. He said that the onus is on Beijing which has "provided us" by "violent conduct" when talks were still on between the two sides.

The Defence Minister said in the middle of May China "attempted to transgress in the western sector, including Kongka La, Gogra, Galwan and North

Bank of Pangong Lake. This invited counter-measures from Indian side".

lian side". In his brief statement in the In his brief statement in the House, Rajnath said China has mobilised a large number of troops on the LAC and India too has made "suitable countermoves". He said he could not go into more details but assured that armed forces are fully prepared to protect the country's territorial integrity and sovereignty.

eignty. Rainath said the country is Rajnath said the country is facing the challenging situation in Ladakh and the entire House should make a unanimous resolution to strongly back the bravehearts at the borders protecting the country in a difficult situation. "Javamo ka hosla buland haim", he said amid thumping of desks by the members.

Congress MPs who want-the down the sizulation of the issue later walked out from the House when Speaker Om Birla reminded them of rule 370 saying "no question can be asked after Minister's statement."

The Defence Minister con-

after Minister's statement."
The Defence Minister constantly alluded to the "distrust" created by China by its actions on the ground while talks between the two sides on the military and diplomatic level were underway during the last few months.

He said China hai increased its mobilisation on the LAC since April and May, this year, and tried to "transgress" LAC.

Cong questions absence of PM from LS, demands LAC reality

The Congress on Tuesday questioned the absence of Prime Minister Namendra Modi in the Lok Sabha when Defence Minister Rajnath Singh made a statement on the India-China border standoff.

The Congress also wanted to know if the Chinese have encroached on Depsang Plains, Gogra, Pangong-Iso Lake till Finger 8, Y-junction in Bhutan, Lipulekh Pass in Uttarakhand and in Arunachal pulekh Pass in arakhand and in Arunachal

Uttarakhand and in Arunachal Pradesh. Former Congress presi-dent Rahul Gandhi, who is abroad currently accompany-ing his mother and interim

party chief Sonia Gandhi for a health check-up, attacked the Prime Minister for "misleadig" the country over Chines transgressions.

NCB has no inputs on drug nexus in Bollywood: Centre

PNS NEW DELHI/MIIMBAL

The Government on Tuesday said no actionable inputs were received by the Narcotics Control Bureau (NCB) revealing the alleged nexus between people in the film industry and

ing the alleged nexus between people in the film industry and drug traffickers.
This after veteran actress and Parliamentarian Jaya Bachchan alleged that a vicious attempt was underway to defame the film industry by linking it to drug abuse.
Jaya's charge invited a sharp reaction from actress Kangana Ranaut and strong backing from several Bollywood celebrities.
Replying to a written quess-

from several Bollywood clebrities.
Replying to a written question in the Lok Sabha, Union Minister of State for Home G Kishan Reddy said the NCB carries out searches, seizures, arrests and investigations continuously throughout the year on the actionable inputs developed on its own or received from other sources.
"During the period of Covid-19 lockdown, no such actionable inputs were received by the NCB revealing the nexus between people in the film industry and drug traffickers," he said.
Speaking in the Rajya

heusity and tule gain the Rajya Speaking in the Rajya Sabha, Jaya rebutted BJP MP and film actor Ravi Kishani's comments in the Lok Sabha about drug addiction in Bollywood. Jaya said the film industry was being "logged by social media and the Government's non-support". "Just because of a few peo-ple, you cannot tarnish the

Jaya Bachchan raps Ravi Kisan: *'Jis thaali* me khaate hain. usi me chhed karte hain'

Samajwadi Party MP Jaya Bachchan speaks in the Rajya Sabha during the ongoing Monsoon Session of Parliament on Tuesday PTI

whole industry... I was really embarrassed and ashamed that

whole industry... I was really embarrassed and ashamed that yesterday one of our members in the Lok Sabha, who is from the industry, spoke against the film industry. Jis thaali me khaate hain, usi me chhed karte hain, 'Jaya said.

Ravi Kishan, a popular actor of Bhoipuri and Hindi films, raised in Parliament the drug-related allegations that have emerged against the film industry in the Sushant Singh Raiput investigations. He alleged a "conspiracy" by Pakistan and China to destroy the country's younger citizens. Jaya further said such statements were meant to divernents were meant to divernent were meant to diverne the divernent were meant to diverne the divernent were meant t

ments were meant to divert attention from the state of the

economy and unemployment in the country.

economy and unemployment in the country. "The entertainment industry in our country provides direct employment every day to five lakh people and indirect employment to five million people.

At a time when the financial situation is in a depressing state and employment is at the worst level, in order to divert the attention of the people, we are being used to be flogged by social media and the Government's non-support. But people who have made their name in this film industry have called it a gutter. I completely disagree," the SP MP said.

Modi inaugurates ₹540 crore projects for poll-bound Bihar of the country by producing

In the run up to the Bihar Assembly elections, Prime Minister Narendra Modi on Tuesday inaugurated another set of infra structure projects worth ₹540 crore for the State through video conference in the presence of Chief Minister Nitish Kumar.

The projects include sew erage treatment plants at Beur and Karam-Leechak in Patna city, as well as water-related projects in Siwan and Chhapra under the "AMRUT" project: under Yojana

Apart from this, the PM laid foundation stones laid foundation stones for water supply projects in Munger and Jamalpur and River Front Development Scheme under Namami Gange in

Namami Gange in Muzaffarpur.

The Prime Minister said even during the times of corona, the work on various development projects progressed uninterrupted in Bihar.

Kumar and Deputy Chief Minister Sushil Modi assured that projects will be completed on time.

Cabinet approves AIIMS in Darbhanga

New Delhi: The Union Cabinet has approved establishment of a new All India Institute of Medical Sciences (AIIMS) at Bihar's a new All India Institute of Medical Sciences (Alima) at Diata barbhanga, an official statement said on Tuesday. The institute will come up under the Pradhan Mantri Swasthya Suraksha Yojana (PMSSY) at a total cost of ₹1,264 crore, it said.

India's Covid-19 cases cross 5 million marks

82.375 found +ve: 1.237 die on Tue: pandemic shows no sign of let-up

PNS NEW DELHI

India's Covid-19 caseload Icrossed 5 million marks on Tuesday as the pandemic showed no sign of plateauing out any sooner. Maharashtra breached a

out any sooner.

Maharashtra breached a landmark of 30,000 deaths on Tuesday, as all-time high 515 people succumbed to Covid-19, while 20,482 more people tested positive for the pandemic in various parts of the State. The number of new cases is nearly 4,000 lower than the State's highest single-day tally. India on Tuesday recorded 82,375 new cases and 1,237 deaths. There has been a general trend that due to the lag effect of reduced testing at the weekend, the first two days of the weekes show relatively fewer cases. This may explain slight-

cases. This may explain slightly subdued numbers on Monday (81,000 cases and Tuesday. Last week, India recorded more than 97,000

new cases twice in a single

day.
Each of the four worstaffected States — Maharashtra,
Andhra Pradesh, Tamil Nadu
and Karnataka — recorded and Karnataka — recorded fewer cases than their highest single-day spike. But Uttar Pradesh (6,841 cases), Delhi (4,261 cases) and West Bengal (3,237 cases) showed no sign of any weakening in the spread of the pandemic.

SC's interim stay on Bindas Bol for vilifying Muslims

The Supreme Court on Tuesday nrestrained Sudarshan TV from telecasting two episodes of 'Bindas Bol' programme, which are scheduled for Tuesday and Wednesday saying it prime facie appears to 'vilify' the Muslim community.

"At this stage, prima facie it does appear that the programme does vilify the Muslim community,' the SC said while staying the telecast of two episodes of the programme on alleged infiltration of Muslims into the bureaucracy." A three-judge bench headed by Justice DV Chandrachud which heard the plea against

which heard the plea against the serial said it would hear the matter on September 17.

90 more succumb to Covid-19 in Punjab Death count reaches 2,514 with fatality rate 2.97%; 2,481 fresh cases reported

PNS CHANDIGARH

A nother 90 COVID-19 pos-itive patients succumbed to the deadly contagion in Punjab on Tuesday, pushing the death count to 2,514. The State's fatality rate now stands at 2.97

fatality rate now stands at 2.97
per order.

Of the total 2.2, Punjabis 18
districts reported fatalities with
maximum 19 deaths recorded
in Ludhiana, taking the
COVID-19 death toll to 607 in
the district.

Witnessing more than
2,000 fresh cases in a single day
for the seventh successive day,
the State has recorded 2,481
people tested positive for the
virus, pushing the infection
tally to 84,482.

Nine districts — Ludhiana
with highest 409, followed by
261 in Jalandhar, 214 in
Amritsar, 204 in Patiala, 197 in

Gurdaspur, 154 in Hoshiarpur, 189 in Pathankot, 188 in Mohali and 120 in Bathinda — recorded cases in three figures and accounted for 78 percent of total cases reported in the last 24 hours.

and accounted for 78 percent of total cases reported in the last 24 hours.

Besides, 84 people were found to be infected with COVID-19 in Kapurthala, 81 in Muktsar, 67 in Sangrur, 62 in Faridkot, 48 in Nawanshahr, 43 each in Fazilka and Fatehgarh Sahib, 37 in Tarn Taran, 33 in Moga, 28 in Mansa, 11 in Barnala, seven in Ropar, and one in Ferozepur.

As per the Tiuesday's health bulletin, 53 duplicate deaths entiries, added in the tally of September 14, and nine cases belonging to other states, have been removed.

deaths reported from Ludhiana in the past 24 hours, 12 casu-

laties were reported from Jalandhar, 10 from Amritsar; eight deaths each were report-ed from Gurdaspur and Kapurthala; six in Hoshiarpur; five from Ferozepur; four each from Fatehgarh Sahib and

two each from Nawanshahr, Pathankot and Ropar; and one death each from Barnala, Bathinda, Faridkot, Sangrur and Tarn Taran.

A total of 1,815 patients — including 358 in Mohali, 252 in Ludhiana, 194 in Patiala, 140 in Gurdaspur, 132 in Amritsan, 99 in Bathinda, 73 in Bathinda, 73 in Kapurthala, 73 in Kapurthala, 73 in Fathankot, 71 in Mansa, 56 in Ropar, 55 in Tarn Taran, 46 in Ropar, 56 in Ropar, 57 in Romanshahr, 20 in Fatelgarh Sahib, and 13 in Faridkot — were discharged after recovering, taking the total number of recoveries to 60,814 (71.98 percent).

The State still has 22,154 recoveries to oo, perpercent).

The State still has 21,154

The state still has 21,154 active cases (25.04 percent), of which 481 are on oxygen sup-port, while 88 are critical and on ventilator support.

India walks out of SCO meet as Pak map shows J&K, Ladakh, Guj its part

Russia calls Pak action 'provocative'

PNS NEW DEI HI

PNS MEW DELHI

India on Tuesday walked out
of a meeting of the National
Security Advisors (NSA) of
the Shanghai Cooperation
Organisation (SCO) after
Pakistan presented a "fictitious" map of the country
showing Jammu & Kashmir,
Ladakh and Gujarat as its part.
The Ministry of External
Affairs said what Pakistan was
in "blatant disregard to host
Russia's advisory".
Making its position clear,
the Ministry said, "at the meeting of NSAs of member states
of the SCO, hosted by the

Chair of the SCO (Russia), the Pakistani NSA deliherately projected a fictitious map that Pakistan has recently been propagating.

The Ministry in a statement said, "This was in batatim disregard to the advisory by the host against it and in violation of the norms of the meeting.

of the norms of the meeting.

After consultation with the host, the Indian side left the meeting in protest at that juncture. Pakistan then went to the present a misleading view of this meeting.

India was represented by NSA Ajit Doval.

Sources said Russia termed.

FARM ORDINANCES ISSUE -

Capt seeks apology from Union Min Danve for misleading statement

Dunjab Chief Minister Capt Amarinder Singh on Tuesday demanded an uncon-ditional apology from the Union Minister Raosaheb Patil

ditional apology from the Union Minister Raosaheb Patil Danwe for "misleading" the nation on the farm ordinances issue from the floor of the House in a clear and complete breach of Parliamentary principles and propriety. Rejecting as "totally incorrect" Danwe's statement in the Lok Sabha on Monday about Punjab being on board the antifarmer ordinances, the Chief Minister said that the Union Minister of State for Consumer Affairs, Food and Public Distribution remarks were aimed at defaming the Congress and its Government in the State. Punjab Congress president Sunil Jakhar also slammed the Union Minister for "violating

Sunil Jakhar also slammed the Union Minister for "violating the sanctity of Parliament with the sanctity of Parliament with his false statement, on the issue in the House on Monday, and termed it an attempt to denigrate the Congress Government in Punjab with misleading information. The Chief Minister, in a

did the high-powered com-mittee make any suggestion about bringing these anti-farm ers ordinances, which the Centre introduced on the sly amid the pandemic and has now placed in the Parliament for enactment through false

pretensions.

"The Minister should apologize immediately and unequivocally for presenting false facts in the Lok Sabha, said Capt Amarinder, describing the statement in Lok Sabha as undemocratic and unethical, and a violation of the parlia-mentary principles.

The Chief Minister said

The Chief Minister said that the Punjab Government has consistently and persistently opposed any move to dilute the farmers' rights and interests, not only in the high-powered committee on agricultural reforms but in the state Assembly and on all public forums. "It is our state Assembly and on all pub-lic forums. "It is our Government which had initi-ated the resolution in the Vidhan Sabha rejecting the ordinances," he pointed out, adding that he personally had written twice to the Prime

aid that at no point gh-powered com-kee any suggestion ing these anti-farm-ing these anti-farm- would spell the death-knell of the farming community in

Punjab.

The report of the highpowered committee, of which

Punjab.

The report of the high-powered committee, of which Punjab was made a member weeks after it was constituted, nowhere suggested any ordinance or central law to be enacted by the Government of India, said the Chief Minister, emphatically rejecting any claim to the contrary.

"In fact, the focus of the report was largely on market reforms wherein the implementation of APMC Act 2013/APLM Act, 2017, had been emphasized. Similarly, adoption of Model Contract Farming Act or its variants depending upon the state requirements had been stressed upon in the draft report," said Capt Amarinder.

He pointed out that in its

Capt Amarinder.

He pointed out that in its response to the draft report, the Punjab Government had clearly stated that 86 percent of the states farmers are small holders

power in the market. They are illiterate or less educated and cannot be left at the mercy of market forces for determination of commodity prices, the state government had further said.

Pointing out that some states like Punjab are dependent on the market fee, the State Government had further underlined that "the market needs to be monitored or regulated to save the farmers from exploitative private trade". The farmers must receive reasonable prices for their produce able prices for their produce (MSP) which covers their cost of production and a fair level of profit for their living, it had commented.

The State Government's response further stated that "majority of the farmers are fearful of entering into contracts with large corporate houses...they feel that they may not be able to compete with them in case of any litigation."

Going further, Punjab Government had categorically and unambiguously stated that with a view to safeguard the interest of farmers and to ensure the food security in the country, "it is emphasized that The State Government's

system of minimum support price (MSP) and the assured procurement of crops by Government of India must continue," he said.

The government had gone ahead to recommend that other MSP crops, where full and assured procurement is not being undertaken by the Government of India such as cotton, maize, oilseeds and pulses, should be procured fully at MSP fixed by Government of India to concourage farmers to diversify encourage farmers to diversify away from paddy which is water intensive. Capt Amarinder pointed out that the State Government

had, in its written response also said that "the EC Act also said that "the EC Act must be continued for those crops in which India is defi-cient in order to prevent the exploitative action of the pri-vate sector by hoarding and black marketeering".

black marketeering."
The sharing pattern of most of schemes is 60:40 (Centre-State) and this needs to be changed to 90:10 for Punjab, as the state, while pioneering the green revolution in the country, played a major role in making the nation

self-reliant in foodgrain pro-duction, the Punjab Government had submitted, adding that it was now the Centre's turn to support the farmers.

PRESENTATION OF FARM

PRESENTATION OF FARM ORDINANCES IN PARILAMENT HAVE EXPOSED SAD FARCE, SAYS CAPT Punjab Chief Minister Capt Amarinder Singh on Tuesday said that the presentation of farm ordinances in the Parliament a day before by the Centre had totally exposed the farce of Shiromani Akali Dal's pretense of protecting the interests of the state's farmers. With the BIP-led NDA Government coing a head with laving the going ahead with laying the ordinances on the table of the ordinances on the table of the House on the very first day of the Parliament session, instead of accepting SAD's so-called plea to defer the same, the Akali charade on the issue had been laid bare, said the Chief

Minister.

The fact that Sukhbir had

From the House on stayed away from the House on Monday, when the ordinances were presented for legislation, showed that the entire drama of

enactment was played out by the SAD president to appease the farmer organizations, which have been up in arms against the ordinances, Capt Amarinder said. "There is dearly a conspiracy to undermine the farmer's interests and that of the states, which are constitutionally-mandated to be responsible for agriculture," said the Chief Minister, asking "why else would Sukhbir conveniently remain away from the Parliament on the opening day itself?"

SAD LEADERS MEET BJP PRESIDENT NADDA ON FARM BILLS Leaders of the Shiromani

FARM BILLS
Leaders of the Shiromani
Akali Dal (SAD) on Tuesday
met BJP national president J P
Nadda in Delhi and urged him
that the Centre address farmers'
concerns over three farm bills
and also sought that the proposed legislation be sent to a
Parliamentary committee. SAD
chief Sukhbir Singh Badal, Raiya
Sabha members Balwinder
Singh Bhunder, Naresh Gujral
and senior leader Prem Singh
Chandumajra met Nadda at
his residence in Delhi and discussed with him the issue of the

three farm bills that were tabled in Parliament on Monday had introlearn the Centre on Monday had introduced three farm bills in Lok
Sabha. These are The Farmer's
Produce Trade And Commerce
(Promotion And Facilitation)
Bill, The Farmers
(Empowerment and Protection)
Agreement on Price Assurance
and Farm Services Bill and The
Essential Commodities
(Amendment) Bill.
The SAD, which is part of

Essential Commodities (Amendment) Bill.

The SAD, which is part of the National Democratic Alliance (NDA), last week had appealed to the BIP-led Centre not to present the three farm ordinances for approval in Parliament until "all reservations" expressed by farmers are "duly addressed". Many farmers outfits in Punjab have been holding protests against the three farm ordinances promulgated by the Centre. Farmers have expressed apprehension that these three ordinances would pave the way for dismantling of the minimum support price system and they would be at the 'mercy' of big corporates. They have been ordinances.

Haryana CM resumes works, reviews progress of welfare schemes

PPP should be linked with HRMS: Khattar

PNS CHANDIGARH

A fter recovering from Covid-19 infection, Haryana Chief Minister Manohar Lal Khattar on Tuesday resumed his work by presiding over a high-level meeting of senior officers of various departments at his residence in Chandigarh.

In the meeting, he reviewed the progress of various concerned and programmes besides issuing necessary directions to the officers concerned.

Various decisions like planning a film city in Pinjore, hiring drones to check illegal mining, making Agri malls functional among others were also taken

making Agri mais functional among others were also taken in the meeting.
While reviewing the arrangement for the procurement of kharif crops in the State, Khattar directed that every farmer registered on the "Meri Fasal Mera Byora" portal should be asked to provide dates for bringing their produce to the mandi of their choice. Farmers should be asked whether they should be paid directly or through the arthias. He directed the officers to make adequate arrangements

make adequate arrangements for the purchase of farmers' produce in the mandis across

the State. It should be ensured that farmers do not face any inconvenience, he added. The Chief Minister also

The Chief Minister also directed that the Parivar Pehchan Patra (PPP) programme be linked with HRMS. He said that PPP is a unique initiative of the State Government under which each family in the State is being provided a unique identity.

vided a unique identity.

He said that PPP would ensure that people get the ben-

efit of various welfare schemes and programmes at their doorstep. He said that this would not only save their pre-

would not only save their pre-cious time but also ensure transparency in the service delivery.

The Chief Minister direct-ed to expedite the work of preparing property IDs in all Urban Local Bodies of the people in property related works. He also reviewed the

functioning of Haryana State Industrial and Infrastructure Development Corporation (HSIIDC) and Haryana Shehri Vikas Pradhikaran (HSVP) and directed to take steps to further enhance their receipts

Khattar directed to prepa Rhattar timected to prepare a plan to develop a film city at Pinjore. He said that Haryana is appropriate for film produc-tion as hundreds of beautiful locations are available in the

tion as locations are available State.

It may be recalled that Haryana Film Policy also envisages a Film City to be developed in public-private-partnership mode so that the people associated with the world of cinema can operate from a sin-gle place.

Punjab police busts another pro-Khalistan terror module, arrests two operators

PNS CHANDIGARH

Punjab Police on Tuesday claimed to have busted yet another pro-Khalistan terrorist module, with the arrest of two persons allegedly operating in connivance with five criminals, including a Khalistan Zindabad Force (KZE) operative currently languishing in Amritsar jail.

Director General of Police (DGP) Dinkar Gupta said that the Pakistan-backed module was busted on the basis of inputs about the nefarious

inputs about the nefarious designs of certain pro-

Khalistan elements trying to disturb peace and harmony in the State by launching terror

attacks. Gupta said that following the inputs, the Punjab Police had launched a drive to ensure thorough frisking and checking of all those entering the State from various parts of the country, thus leading to the arrest of Harjeet Singh alias Raju and Shamsher Singh alias Shera, both residents of Mianpur village in Tarn Taran district.

Six weapons (one 9 mm

Six weapons (one 9 mm pistol, four .32 calibre pistols and one .32 revolver), eight live

al mobile phones and an inter-net dongle were seized from the duo, who were nabbed at the duo, who were nabbed at the checkpost near Hotel lashan on Raipura-Sirhind road. During preliminary investigation, the accused revealed that they received four weapons from Burhanpur, Madhya Pradesh, and two were received from Safidon, Jind district of Haryana, said the DGP adding that duo is also wanted in an attempt to murder and Arms Act case registered in Police Station Sarai Amanat Khan, Station Sarai Amanat Khan, District Tarn Taran.

Over 90% of MSME units resume functioning in Punjab: Min

Of the total 2.6 lakhs Micro Of the total 2.6 lakhs Micro, Small and Medium Enterprises (MSMEs) in Punjab, over 90 percent — that is 2,34,072 units — involving 15.78 lakh workers, have resumed their operations and economic activity. "Owing to several key

initiatives taken by the Congress led Punjab Government, as many as 2,34,072 units have resumed their operations," said the state Industries Minister Sunder Sham Arora on Tuesday, while assuring all aggressive assistance from the State to

ious initiatives taken by the Government during COVID, Arora said that in order to give relief to the industries, PSIEC (Punjab Small Industries and Export Corporation Limited) had announced extension had announced extension in time period of Amnesty Scheme besides announcing an OTS (one time settlement) schemes of

Punjab State Industrial Development Corporation Limited (PSIDC) and Punjab Financial Corporation (PFC). The Ministers aid that power

The Minister said that power subsidy of Rs 2920 crore has also been provided to industrial units, besides Rs 525 crores have been spent on improvement of indus-trial infrastructure.

Dushvant Chautala who

Dushyant Chautala who also holds the portfolio of Public Works Department has expressed gratitude to Prime Minister, Narendra Modi for the approval of this project. He said that after the completion of this project, the vehicular congestion in Delhi will decline and the passengers going to Gurugram, Palwal-Faridabad will have direct access to better all facilities. After the formation of Kundli-Manesar-Palwal Expressowa and Kundli-Ghaziabad-Palwal Eastern Peripheral Way, there is an existing route via road to Gurugram, Palwal-Faridabad and onwards to Agra. Giving detailed information about the project, Chairman of Haryana

project, Chairman of Haryana Rail Infrastructure project, Chairman of Haryana Rail Infrastructure Development Corporation Limited and Additional Chief Secretary, Public Works Department, Arora said that along the Kundli-Manesar-

Department, Arora said that along the Kundli-Manesar-Palwal Expressway, a 50-meter strip has been laid towards Dehi and has been approved in Master Plan for NCR area. He said that there will be 19 new stations on this railway track, including 14 new and five existing stations. Among the new stations are New Pirthala, Silani, Sohna, Dhulawat, Chandla Dungerwas, Manesar, New Patti, Badas, Deverkhana, Badli, Mandothi, Jasaur Kheri, Kharkhoda Kirdi and Tarakpur. The HORC will have suitable connectivity to existing Palwal Station and proposed Pirthala Yard of Dedicated Freight Corridor (DFC). With the implementation

UT Covid patients also want removal of posters outside their houses

PNS CHANDIGARH

With the Punjab Government recently deciding not to affix the posters at the entrance of homes of Covid-19 patients in home isolation, the infected patients in Chandigarh have also put up the

same request with the UT Administration. The senior officers of UT Administration have been

receiving calls from representatives from various sectors to do away with putting up posters outside the houses of COVID patients under home isolation or quarantine to reduce the stigma surrounding the infected patients. The total case tally stood at 8592 in the city as on

recently announced to rescind the decision of putting posters outside the houses of COVID patients, we have also been stood at 8592 in the city as on Tuesday. There were 2991 active cases in Chandigarh and more than 1000 patients were in home isolation.

LS passes Essential Commodities (Amendment) Bill, 2020

Another Bill cleared for 30% cut in MPs' salaries

modities. It is a highly cen tralised law. Under the law

modities. It is a highly centralised law. Under the law, licences are not required for purchasing produces. Why does this government rely all the time on the ordinance route? What was the link between the ordinance and the pandemic, the Government should explain, added Chowdhury.

Consumer Affairs, Food and Public Distribution Minister Roasaheb Patil Danwe said: "The 1955 Act was brought at a time when we faced food scarcity, now we have surplus agriculture production. In order to reduce the losses, we should have food processing units, due to non availability of cold storages, farmers suffer losses. The proposed amendment will encourage competition and it will help farmers get fair price for their produces. The consumers will also benefit." he said.

Supporting the amendments, Bhartruhari Mahtab from BJD, said there was a need to remove many restrictions in trade of agricultural

Amid Opposition's reservations about the possible entry of corporate houses, the Lok Sabha on Tuesday passed amendments to the Essential Commodities Act Essential Commodities Act and a Bill mooting 30 per cent salary cuts for MPs in the wake of economic constraints due to the Covid-19 pandemic. Though the MPs supported the salary cut, a majority of them demanded the restoration of the MPLADS funds citing its need for the dues!

tion of the MPLADS funds citing its need for the devel-opment in their respective constituencies. BJP ally Akali Dal urged the Government to clear the doubts in the minds of farmthe Government to clear the doubts in the minds of farmers on many points mentioned in the amendments to the Essential Commodities Act. Akali Dal's Sukbbir Singh Badal questioned the manner in which the ordinance was brought without having any consultation with farmers' organisations. "The most affected are the farmers from Punjab. The farmers want clarification of their doubts; they fear that the multinationals will initially offer lucrative deals and then dominate the market," said Badal. Leader of Congress in Lok Sabha Adhir Ranjan Chowdhury said there are a lot of ambiguities in the amendments and this would open up the entry of big industries to enter into the

House nod to Bill for statutory status to aviation regulators

Violators to pay penalty up to ₹1 cr

PNS III NEW DELHI

Rajya Sabha on Tuesday Rassed "The Aircraft (Amendment) Bill, 2020 'providing for statutory backing to the Directorate General of Civil Aviation (DGCA), the Bureau of Civil Aviation Security (BCAS) and the Aircraft Accident Investigation Bureau (AAIB) and entailing increasing the fine for violations from ₹10 lakh to ₹1crore. The Bill was passed by a voice vote after an hour-long discussion. The Bill was passed by a voice vote after an hour-long discussion in the legislation had already been cleared by the Lok Sabha in March this year.

Under the new Act (after its implementation), any violation will attract heavy punishment, for example, violators will be punished up to two years in jail or fine up to ₹10 lakh or both. Carrying arms, ammunition, and explosives or other banned goods on board, and developing illegal construction around the airports will attract fines up to ₹10 lakhs to ₹1 crore.

Replying to the debate, Union Civil Aviation Minister Hardeep Singh Puri said the the Covernment in the last three years has recruited 1,000 air traffic controllers as against requirement of 3,500 such officials. Tindia is the third largest market globally after the United States and China, and

macy," he said. Earlier, Lok Sabha passed the bill reducing MPs' salary by 30%. "The Government has taken unprecedented mea-

1,920.81 1,920.81 1,920.81

the skies," he said.
Earlier, opposition parties had opposed the Bill, and Congress' Rajyasabha MP KC Venugopal raised concern over many vacancies in the aviation industry. He also pointed out to the near-misses of the air-craft in the skies for last many years.
Former Civil Aviation Minister Praful Patel said that airlines are financially stressed

Minister Praful Patel said that airlines are financially stressed due to COVID-19 and need support from the government. Stating the importance of civil aviation sector in the country, beard flights one time in a year. If this number goes up to 10-15 per cent, we would need a huge increase in the number of airports and aircraft!

Replying to issues raised by Congress member, Puri said Venugopal should look at the issue of privatisation in a historical context. The country's

es to tackle Covid-19. ₹20

India is growing rapidly in the aviation sector, in terms of passengers' growth and aircraft in the skies," he said.

vatised in 2006 under a previous political dispensation, and proceeds from the process have resulted in getting resources to develop airport infrastructure in the country, he noted. Since the privatisation of Mumbai and Delhi airports, the Airports Authority of India has received 729,000 crone, Puri said.

On the Congress charge of allotting six airports to one group, Puri said the Delhi and Mumbai airports account for 33 percent of air traffic and earnings. The six airports that were awarded in 2018 together account for only nine percent of traffic and earnings, he said.

cent of traffic and earnings, he said.

On Air India's privatisation, he said, "If I could help it, we would keep it, but with \$60,000 croe debt, the choice is not between privatisation and not privatisation. Some of my colleagues should realise that the choice is between privatisation and closing down."

However, majority of the MPs urged the Government to restore the MPLADS funds for the development of local areas. Bill brought in Rajya Sabha to give 'national importance' tag to three Jamnagar-based Ayurveda institutes

PNS III NEW DELHI

PNS NEW DELHI

A Bill that seeks to accord the kstatus of an institution of national importance to a Jamnagar-based cluster of three Ayurveda institutes — Institute of Post Graduate Teaching and Research in Ayurveda, Gulabkunwerba Ayurveda Mahavidyladya and Institute of Ayurveda Pharmaceutical Sciences was introduced in Rajya Sabha on Tuesday.

Approved by Lok Sabha in the last session, the Bill 'The Institute of Teaching and Research in Ayurveda Bill, 2020', was introduced by Union Health Minister Harsh Vardhan in Rajya Sabha on Tuesday here.

Moving the Bill for passage, Vardhan said this for the promotion of quality and excellence in education, research and training in

"Almost 80% of the fund is "Almost 80% of the fund is spent in rural areas; why are you taking away the funds meant to be spent on Scheduled Castes. Of the ₹2.69 lakh crore allocated during 2015-20 under the MPLAD

Avurveda and allied disci-

Ayurveda and allied disciplines.

"This is going to be the first institution in the country in the field of Ayurveda to be given the status of an institution of national importance. This is one of the oldest in the Government sector. 10 per cent of Ayurveda research publications are from this institute," he said.

The Institute of Post Graduate Teaching and Research in Ayurveda is the only centre, which is a WHO collaborating centre and is the only institution, where PG and research facility is available.

able.
"This is a first attempt to give such recognition to an Ayurveda institution, which has already attained an international stature," the

head, ₹2.52 lakh crore was spent, such is the efficiency," said Chowdhury, urging BJP MPs to pressurise the Government for the restora-tion of the MPLADS scheme.

3 States account for 48.8% of total active Covid cases in India

PNS III NEW DEI HI

Of the nearly 10 lakh active cases in the country, at least close to half (44.8 per cent) are concentrated in three States — Maharashtra, Kamataka and Andhra Pradesh while Uttar Pradesh, Tamil Nadu, Chhattisgarh, Odisha, Kerala and Telangana contribute close to a quarter (24.4 per cent) of the active cases. In contrast, there are 14 states and Union territories where the total number of active cases are less than 5,000 while 18 States and Union territories are reporting cases

ritories are reporting cases between 5,000-50,000, the gov-ernment said on Tuesday as the country's tally went past 49 lakh

lakh. India's Covid-19 tally surged to 4,930,236 on Tuesday after 83,809 new cases were reported in the last 24 hours, according to the Union health ministry.

The country also recorded 1,054 new fatalities due to the viral disease during the same period, taking its death toll to 80,776.

Rajesh Bhushan, Union Health Secretary said during a press conference here that there are 990,061 active cases and 38,59,399 patients have been discharged across the country. He added there are only four states, Maharashtra, Andhra Pradesh, in the country where the total num-ber of active cases is more than 50,000.

000. Bhushan also said the Bhushan also said the country's average positivity rate is 8.4% and that Maharashtra, the worst-hit state, has 21.4 per cent. Maharashtra, Karnataka, Andhra Pradesh, Uttar Pradesh and Tamil Nadu, he said account for 60 per cent of total active cases in the country.

from BJD, said there was a need to remove many restric-tions in trade of agricultural commodities. "This reform will improve agricultural pro-duction, the Government should have done away with restriction on exports. We are self sufficient in food grains, we can counter China's loan diplomacy with food diplosures to tackie Covid-17. BJP activists rally throws normal life out of gear in Kerala

Normal life was thrown out of rails by the ByTM (the youth brigade of the BIP) across Kerala on Tuesday as they took out processions and railles in district headquarters demanding the immediate resignation or sacking of higher Education Minister FI Javarian who are in the eyes of controversies for their association with gold smuggling scan and LIFE Mission corruption charges. Things are likely to turn for the worst on Wednesday when BIP's state president K Surendran will take out a procession to the Secretariat.

ATTACK ON NAVY MAN IN MUMBAI

released on bail

TN RAGHUNATHA III MUMBAI

Seven persons involved in Friday's assault on a retired petty Navy officer at Kandivli in north-Mumbai were re-arrested by the Samata Nagar police here on an added charge of trespass, but were released on bail against a personal bond of \$15,000 each.

7 activists re-arrested,

Seven persons involved in Prinday's assault on a retired petry Navy officer at Kandivili north-Mumbai were rearested by the Samata Nagar police here on an added charge of trespass, but were released on bail against a personal bond of \$715,000 each.

The seven Shiv Sainiks—Shiv Sainiks—Shiv Sena Shakha Pramukh Kamlesh Kadam and five of their associated Sanjay Manjire, Alaesh Belnekar, Pratap Sund Vera, Sunil Dessi and Rakesh Mulik who had been arrested and later released on bail on Saturday in connection with the incident—were re-arrested on Monday night, after the Samata Nagar

Maha HM orders probe into assault

In an apparent counter to the effort by the Opposition Bharatiya Inana paparent counter to the effort by the Opposition Bharatiya Inanata Party (BIP) to politicise the alleged assault on a retired Navy man at Kandivli by some ruling Shiv Sainiks, Maharashtra Home Minister Anil Deshmukh of the NCP on Tuesday ordered investigations against BIP MP Unmesh Patil for the alleged assault on an Army veteran Sonu Mahajani no 2016.

Taking to twitter on Tuesday, Deshmukh said: "In 2016 the BIP MLA and incumbent MP Shri Unmesh Patil and others had attacked retired Soldier Shri Sonu Mahajan. The then state BIP Government did not give justice to Shri Mahajan. The tree state BIP Government did not give justice to Shri Mahajan. The veceived several applications in this matter and have ordered investigation in this matter."

"The offence was committed in 2016 but due to the Sente BID."

The offence was committed in 2016 but due to the State BJP

The ottence was committed in 2016 but due to the State BJP Government protection to Shri Patil no FIR was filed. In 2019 on Hon'ble High Court directions a FIR was filed but no fur-ther legal action has been taken against Shri Patil and others," Deshmukh said in another tweet.

Deshmukh said in another tweet.

Maharashtra Congress general secretary and spokesperson
Sachin Sawant, who had on Sunday alleged that the BJP MP had
tried to kill Army veteran Mahajan during chief minister
Devendra Fadnavis tenure, slammed the previous BJP government for its failure to act against the BJP MP concerned.

demonstrators and police. On Monda the activists of the Mahila Morchcha ha shocked the police in the capital city by laying siege to the Secretariat. Hence the police came fully prepared on Tuesday morning to prevent untoward inci-dents of any kind.

But the BJYM which staged a rally in front of the Secretaria retrued to disperse despite the urging by police officers. "We will disperse only after Jaleel and Jayarajan submit their resignations or the chief minister sacks these ministers," retorted VV Rajesh, general secretary of the BJP who led the rally. The Police resorted to lathi charge, bursting of tear gas shells and water cannons.

Vijayan warns Opposition, alleges conspiracy to sabotage Govt's works KUMAR CHELLAPPAN III KOCHI

Chief Minister Pinarayi Vijayan on Tuesday warned those creating a raucous all over the State under the garb of agitations have only one intention and that is to facilitate the spread of Covid-19 pandemic across Kerala. Briefing the media, Vijayan came down heavily on the BIP and its frontal organisations which he alleged were trying to sabotage the good works his Government was doing to control the coronavirus.

strong action against those who try to spread the Covid-19 pandemic," said Vijayan while referring to the State-wide agitations unleashed by the BJP

Raj CM conducts corona awareness dialogue

Jaipur: Taking every person seriously the corona epidemic, wearing a mask essentially, keeping social distancing and following the health protocol completely, the ever increasing corona infection can be completely controlled. The greatest need of the hour is that awareness of the corona be given the shape of a social movement. This emerged prominently during the Corona Awareness. Dialogue on Tuesday at a Panchayat level through video conference with expert practitioners. In addition to regional TV channels, social medial platforms - Facebook, YouTube, this awareness dialogue was broadcast live through more than 8 thousand e-Mitra Plus centers and webcasts. Live broadcast of this program got millions of people from the state and other parts of the country. Members of the state cabinet, MPs, MLAs, officials of the administration and police of the state, principals of the medical college, CMHO, PMO and doctors, Gram Panchayat level public representatives and personnel also became part of this discussion. In this open platform awareness dialogue, Dr. Naresh Trehan, MD, Medanta Hospital, Gurugram of the country, Dr. SK Sarin, Director of ILBS, New Delhi, Dr. Devi Shetty, President, Narayana Hrudayalaya, Bangalore, effectively addressed the Panchayat level Gave useful information to the people of Corona for rescue.

Centre approves HORC project, new AIIMS hosp in Darbhanga

New Delhi-The Union Cabinet from Palwal and end at existing Haryana Orbital Rail Corridor (HORC) project and a new AllMShospital in Darbangha in poll-bound Bihar.

The HORC from Palwal to Sonipat via Sohna-Manesar-Kharkhauda will be implemented in a joint venture between the Railways and Haryana Government.

The 122-km project worth more than Rs.5617 crore will facilitate diversion of traffen or meant for Delhi and will behind eveloping multimodal logistics hubs in Haryana State subregion of NCR.

This ambitious project is expected to be completed in PNS

No dignity of labour

Govt coldly denies compensation to dead migrants saying it doesn't have data. Can it heartlessly ignore facts or credible media reports?

enjamin Disraeli once said, "There are three kinds of lies: lies, damned lies and statistics." Perhaps this is what the Government has internalised in dealing with a national crisis. Since it doesn't believe in any kind of data collection that has not been commissioned by it, it denies that there has been any migrant death during the pandemic-induced lockdown. It doesn't matter that its white lies are caught out by countless heart-breaking stories in the media of labourers turfed out of their city jobs overnight, forced to trudge back to their villages and without money, succumbing to hunger and illness on the way or even to destitution at their homes.

without relief or dole of any kind. This denial of reality by the Government is not only brutal in its insensitivity but also a shabby disowning of its responsibility in keeping a nation together in the middle of an unprecedented crisis. Worst, its inhuman response came on the floor of the Parliament where, to a question on whether families of those who had lost their lives while trying to reach home during the lockdown had been compensated, the Union Labour Ministry put out a clinical statement that since there was no data on migrant deaths, the "question does not arise" of relief and aid. Even if one were to assume that the concerned Minister, his office and bureaucrats had for some curious reason blacked themselves out from news about India's worst reverse migration, how does the Ministry explain its own admission that more than one crore migrants made their way back to their home States from various corners of the country? Can it blithely assume, therefore, that no hazard befell them, considering most were daily wage earners and had nothing to fall back upon? Hungry, sick and walking for days, were they in an endurance test on a reality show where their deaths could be easily dismissed as collateral damage? Is the figure not an indication of the jobs lost in the country's largely unorganised labour market? For once, Congress leader Rahul Gandhi reacted rightly, tweeting, "If you haven't counted, have the deaths not taken place?" Also, how can the Government discount the deaths recorded by its own Railway Ministry of the many migrants who died on Shramik trains that were organised much later to ferry them back home? Or were run over by trains as they fell asleep on tracks, exhausted and beaten? More than 1,400 road accidents killed 750 people, including 198 migrant workers, between March 25 and May 31.

Even if the Government doesn't believe in statistics, the world does. Especially, those that come from credible organisations of long standing and which are relied upon by pol-icy-makers themselves. The International Labour Organisation (ILD) and Asian Development Bank (ADB) have already listed that 41 lakh jobs were lost in the country during the pandemic. A World Bank report in April indicated that the livelihood of nearly 40 million internal migrants had been affected. Recently, the Centre for Monitoring India Economy (CMIE) said that five million salaried people had lost their jobs in July alone while that figure had peaked in April at 17.7 million unemployed. Further, 37.5 million students have been out of campus and are staring at a year without prospects. Without direct cash transfers, the credit-based stimulus packages, which address structural facets of the economy, have made little sense to the wage earners. A lot of them have sought refuge in the Mahatma Gardhi National Rural Employment Guarantee Act (MGNREGA), participating in schemes with a 100-day work assurance. Such is the plight that there has been a surge in enrolment with even degree holders (MA, BBA) and self-employed youth signing up for project work and digging as they have lost their jobs in the cities. About 14 crore people across the country have MGNREGA job cards. The Government will need a massive ₹2.8 lakh crore if each card holder can get a guaranteed 100 days of work this year. Still MGNRE-GA, in its present form, alone cannot take care of the returning migrants unless its scope is extended to include agricultural activities. The Centre did well by raising the allocation for this scheme but a chunk of this has gone in clearing arrears. Even this financial year began with pending wage and material liabilities of ₹16.045 crore. An allocation of ₹1 lakh crore for FY 2020-21 would mean that ₹84,000 crore is available for employment generation this year. Besides, even with the scheme receiving the highest allocation since it was abon mis year. Bestoes, even with the scheme receiving the nighest allocation since it was first rolled out, it accounts for just 0.47 per cent of the GDP. This is much lower than the World Bank's recommendation of 1.7 per cent for optimal functioning. The second chal-lenge is of uniform implementation as States with differing priorities and machineries are entrusted with it. With fund leakages and corruption at the level of local self-Government, the scheme has gone askew in many places. There has been a consistent demand for expanding the number of work days beyond the existing 100 days but the national average number of days employed per household in the last four years has been just 47. May be this is an opportune moment to align the scheme with economic imperatives. But more needs to be done. While individual States are already setting up job portals to list returnee workers with their skill sets and allocate them appropriate work zones, this ought to be pan-India so that labour-starved States can benefit too. Till we value the labourer, recovery will be a chimera, a smart India a paper town. Besides, *atmanirbharata* can truly take off when we value and respect fellow human beings and not deny their existence.

Equality in marriage

Going through courts will only harden extremist viewpoints on same-sex spouses. There needs to be a public debate

hen the Supreme Court struck down the penal provisions of Section 377 that criminalised all but vaginal intercourse, it effectively removed the legal persecution of homosexual relationships. Now a group of petitioners has approached the Supreme Court asking that it mandates that same-sex marriage be legalised in India. Surprisingly, for some in the LGBTQ community, this petition is being led by Right-wing agent provocateur Abhijit lyer-Mitra, who has identified himself as a homosexual for many years. Yet the Solicitor-General (SG) of India Tushar Mehta, arguing before the Division Bench, has toed the cultural line that our val-

ues will not allow us to recognise same-sex marriage.

Make no mistake, a same-sex marriage has been a contentious and highly debated issue for many years in many parts of the world. In Australia, the debate ran for years until a much-publicised direct referendum approved it and allowed lawmakers to legislate to that effect. This newspaper feels that same-sex marriages should ideally be first debated in the public sphere and then in Parliament because any changes to laws governing marriage would have to be effected in the legislature, not in courts. That will take a certain amount of time and that will allow for the hardest views against such a move to soften as happened in the US. Going through the courts will only harden the viewpoints of religious and social extremists of every hue. The signature of a judge does not do away with centuries of discrimination and hate, which are very often wrapped up in what we call "values." This is why the view of the SG is disappointing, and ideally he should have argued that this is something for Parliament to discuss and the time is right for the discussion to start. Anyone who understands the legislative process knows that such a major change will take time but unless a process is started, no change can ever take place. Is the time right for India to start discussing how to legalise same-sex marriage? Yes, it is. And we should have no pretence that our values do not allow such things. The law should not discriminate against same-sex marriages and the shared rights of partners. And like in most other nations where same-sex marriage is now legal, the happiest people are always the divorce lawyers, because same-sex marriage means same-sex divorce as well.

opanion 06

PLA's 'Peace Disease'

Battle experience cannot be bought and this could expose the Chinese chimera on the battlefield

BHOPINDER SINGH

one less than the Chinese leader X Chinese leader Xi Inginging himself has conceded that the ing military, the People's Mord's largest standing military, the People's Liberation Army (PLA), with more than 2.1 million active duty strength, is afflicted by the "Peace Disease." Since taking over the reins of the Chinese Communist Party (CCP) as the General Secretary and chairmanship of the Central Military Commission (CMC) in 2012, Xi has unleashed transformational investments and restructuring in the PLA in terms of doctrinal; and on-boarding of weapon platforms. Yet, he remains acutely conscious of the combat inexperience that besets a military force that has not been tested since 1979, where it came a cropper against a decidedly inferior. Vietnamese force. Importantly, the Vietnamese force. Importantly, the Vietnamese forces that had fought the Chinese in 1979 were still blood-soaked from fighting the American forces for nearly two decades, and had even worn out the supposedly better organised, trained and equipped military then. The essential mass of the Chinese PLA in 1979 had last seen faull theatre-level combat only in the early 1950s (Korean War) and soldiers, therefore, were raw and untested when they had taken on the Vietnamese. They were soon made to pay a price for lazily assuming that a larger force, better equipment and aggressive posturing could compensate for combat inexperience. It is this foreboding pertaining to the obvious inexperience of today's PLA that continues its optics of aggressive posturing intimidation and global expansionism.

There are other elements compounding the "Peace Disease" that are pertinent in questioning between the purpose initiated against the PLA Generals in the initial Xi years and elevating his own "young guard" of post-1979 vintage but the essentially of "unity of command" in a Chinese combat unit (at compa-

that its annual outgetary auto-cation (estimated at \$261-266 billion in 2019) towards its armed forces is almost four times that of India. There is debatable realism about the Chinese claims in cutting-edge military technologies (the military technologies (the Chengdu J-20 Stealth '5th gen

XI HAS UNLEASHED INVESTMENTS AND RESTRUCTURING IN THE PLA IN TERMS OF DOCTRINAL. STRATEGIC, TECHNOLOGICAL. **CULTURAL AND** ON-BOARDING OF WEAPON PLATFORMS. YET, HE IS CONSCIOUS OF THE COMBAT **INEXPERIENCE** THAT BESETS A MILITARY FORCE THAT HAS NOT BEEN TESTED **SINCE 1979**

eration fighter plane) or about the quality of training, restructuring, command systems and so on. Despite its claimed proficiency in indigenous weaponry, China has openly sought 5-00 and 5-400 anti-aircraft systems, SU-27 and SU-35 on and S-400 anti-aircraft systems, SU-27 for mRussia, among other platforms and technologies to "reverse engineer." But where the Chinese score over countries like India is in the way they have internalised "security" as an integral component of their national vision, international manoeuvres and strategic calculus for all policy decisions, be it internal or external. Whereas, beyond selective invoking of the "Indian soldier" whenever tensions looms, the Indian governance has diminished the role, relevance or priority on defence matters and only displays kneeigerk or politically competitive "investments" in the said domain. Ironically the mismanagement of India's domestic affairs by its political classes has ensured that the armed domain intonically the mismanagement of India's domestic affairs by its political classes has ensured that the armed forces have not suffered any "Peace Disease."

Battle experience is one of the most important features that determines the fate of forces, along with others like lethality of weapons, processes, leadership, numerical strength or even environmental factors like social, cultural or political moorings, lapans" "banzai" culture and motivation levels could compensate for material disadvan-

tages. The numerically far-superior and experienced Iraqi military (after the decade long Iran-Iraq war) got decimated within 100 hours by the superiority of American weapons, training and professionalism in the first Gulf War. At the same time, the same battle-experienced and obviously more professional American military has been forced to "pull out" of Afghanistan when faced by the rag-tag Taliban militia who neither have the matching weapony, training, nor the infrastructural wherewithal.

The Chinese awkwardness with the reciprocal stare-down

infrastructural wherewithal. The Chinese awkwardness with the reciprocal stare-down at Doklam, Galwan gallantry and recent operations of the Indian Army in occupying advantageous heights is reflective of the "Peace Disease" that has been sought to be compensated by sabre-rattling, deceit and troops/infrastructural build-up.

Lieutenant General He Lei of the PLA had famously remarked a couple of years ago that his biggest regret before retiring was that he never fought a war – his successors are even more distant from war experience, whereas, those on the other side may have other concerns and deficiencies, but "Peace Disease" is certainly "Peace Disease" is certainly concerns and deficiencies, but "Peace Disease" is certainly not one of them. Battle expe-rience cannot be bought and this could expose the Chinese chimera on the battlefield. (The writer, a military vet-eran, is a former Lt Governor of Andaman & Nicobar Islands)

I am Black, son of a Black, grandson and great-grand-son of a Black. I am proud and do not see myself as different from anyone.

LETTERS TO THE EDITOR

Where is the logic?

Sir — The recent statement by the Government in Parliament about not maintaining records or the non-availability of data about the actual number of deaths of migrant labourers and the total number of job losses is immature and illogical. On one side, the Government had proudly announced a package of \$20 lakh crore to meet the losses occurred due to the lockdown along with infinite advertisements about it. On the other hand, it has simply denied sharing the actual position of the migrant labourers. The working class, along with the tarmers, are regarded as the backbone of the economy and if they remain unemployed, then the GDP of the nation will never recover. The Government must the GDP of the nation will never recover. The Government must seriously consider the situation as the GDP is at an all-time low and unemployment has broken all previous records. It cannot disown labourers.

Navneet Seth Punjab

Sir — It is noteworthy that Janata Dal (United) MP

Crime graph shoots up in Goa

Onsidering the sudden spate of high-profile exposes, involving drugs, gambling and fake-currency notes in Goa, one is led to believe that crime is a perennial affair and not the consequence of the

is a perennial affair and not the consequence of the vagaries of the economic scene prevalent at any time of they war. Although reveiling in its fame as a highly sought after fourties destination, it would not be wrong to state here that Goa has also been much maligned by activities of riminal gangs and their nexus. Goa has frequently been in the news for gambling, sex and drugs. Crimas like rage, murder and gang wars are the inevitable consequences. Sadly, the Government has not done anything exceptional to dispen locitors of the State being a vice capital of the nation. While it is contended that Goa withingsed without given crime between March and May, when the lockdown was in force, it would immly that the policing during this gendroid was at its best. imply that the policing during this period was at its best,

Harivansh was re-elected as the

Harivansh was re-elected as the Deputy Chairperson of Rajya Sabha for the second consecutive term after defeating the Opposition's candidate, Rashtriya Janata Dal's Manoj Jha. It was been more than a year after the 17th Lok Sabha was constituted that the constitutionally mandated post has been filled.

US showing ominous signs

It would be a very big deal if the US started distributing a vaccine that has not been properly tested. Yet the signs are that this is just what is going to happen

GWYNNE DYER

Ine of the world's biggest pharmaceutical companies have ust promised not to apply for regulatory approval for any new COVID-19 vaccine before it has gone through all three phases of clinical study. Why would they do such a thing? You'd be surprised if brain surgeons got together and promised not to operate while drunk, or if the bus drivers' union publicly pledged that its members will not drive recklessly. They don't do that because operating sober and driving carefully are just part of the job. So is ensuring that new vaccines are safe and effective. Yet nine major players in the international pharmaceutics market—AstraZeneca (UK-Sweden), BioNTech (Germany), GlaxoSmithKline (UK), Johnson & Johnson (US), Merck (Germany), Moderna (US), Novaxa (US), Pitzer (US) and Sanofi (France)—all felt obliged to reassure the public that they won't cheat. What's up? Obviously, it's the perception that other players in the same market may indeed be cutting corners. We're not talking here about Russia and China, both of which have begun inoculating some key workers with vaccines that are still isted by the World Health Organisation (WHO) as being in clinical trials. No surprise here: Everybody knows that those regimes break the rules whenever they feel like it. Usually the Donald Trump Administration's actions are viewed with weary resignation by the rest of the world, but it would still be a very big deal if the US started distributing a vaccine that had not been properly tested. Yet the signs are that this is just what its going to happen. Last month at the Republican national convention, the US President told the delegates and the country. "We are developing life-saving therapies and will produce a vaccine before the end of the yea, or maybe even soone." On September 4, the US Government's Center for Disease Control and Prevention (CDC) told American health officials that "limited COVID-19 vaccine doses may be available by early November 2020."

More specifically, the CDC urged State authorities to consider "w

er "waiving requirements" and grant permits to McKesson Corporation so they can start distributing a vaccine by November You don't need a weatherman to know which way the wind blows The presidential election is on November 3, two days later: That's long enough for the glad news to get around and floating voters to be swayed in favour of Trump, but too short for any defects in the rushed vaccine to come to light. Donald Trump is going to be erate Americans from the curse of COVID in a little less than two erate Americans from the curse of COVID in a little less than two months. If the vaccine's miraculous properties subsequently fade, even if it turns out to kill large numbers of people, that won't matter. The votes will have been counted and Trump will be back in office for another four years. That, at least, is the scenario that is currently envisaged by the people around Trump.

It is a plausible one, especially if the race has tightened by then. Just 1,00,000 votes in three States, mostly from people who

had previously voted Democratic, put Trump in the White House in 2016. A miracle vaccine could certainly swing that many votes again.

in 2016. A miracle vaccine could certainly swing unar many voise again.

The nine pharmaceutical majors, who felt the need to issue a "historic pledge" to uphold scientific and ethical standards, were doubtless driven by this scenario. Even if there really has been an American breakthrough, they would still have to cope with the public's suspicion that Trump is cheating — and the mistrust that will also attach to any other early vaccines. It is possible that the vaccine or vaccines that Trump is about to unleash on the American public really do work and are safe. It would be a historic first in the development of vaccines — having a COVID vaccine ready for general use by next June or July would normally be seen as a remarkable achievement — but miracles do happen. The problem is that they don't happen often, and if the full testing regime is not followed, you don't know if this is one of those times. It's only because the AstraZenea(Oxford University vaccine was going through the full third phase of tests, involving tens of thousands of individuals and many months of testing, that they spotted a bad reaction requiring hospitalisation and paused the tests.

soptied a bad reaction requiring hospitalisation and paused the tests. Now they have resumed them again. The American miracle vaccine will only start third-stage tests at the same time that it is made generally available. Pauses like AstraZeneca/Oxford University's happen often in the development of a vaccine. And the pause was temporary because one person in the UK had a side effect but later it was deemed safe to continue with the testing. But even a vaccine. Among the property because the continue with the testing. But even a vaccine. Among the property had reaction can be a mose silter when these very low-frequency bad reaction can be a mass killer when tens of millions of people are being vaccinated, and these are not des-perately sick people willing to risk anything for a cure. They are people in good health, and you mustn't kill them. (Gwynne Dyer's new book is 'Growing Pains: The Future of Democracy and Work.')

Move the needle on cooling

After experiencing the catastrophic effects of climate change, it's high time for all nations to join hands in adopting low carbon pathways to restore the ozone layer

SHANMUGANATHAN K

SARASWAT

The zoone layer, the Achille's Heel of our Earth's atmosphere, is responsible for protecting our terrestrial and marine life. The layer, which is a highly reactive and made of trace gas, constitutes about three molecules for every 10 million molecules of air and absorbs bits of the sun's ultraviolet (UV) radiation that hits the Earth. However, decisive research in the early 1970s underlined signs of trouble in this vital blanket. In 1974, late Professor Sherwood Rowland and Professor Mario Molina at the University of California, Irvine, published an article in Nature elucidating the detrimental threats to the ozone layer from chlorofluorocarbon (CFC) gases.

article in Nature elucidating the 'detrimental threats to the scone layer from chlorofluorocarbon (CFC) gases.

It was found that CFC, which is commonly used in refrigerants for cooling applications and aerosols,was eating away at the ozone layer once it was released into the Earth's atmosphere. The situation got worse as the consumption of CFC exponentially increased in various business and industries due to its low cost and properties, namely non-inflammability and non-toxicity.

Beginning of the world's most successful emironmental agreement Eleven years after the findings of Professor Rowland and Professor Molina, a team of English scientists, too, learnt about the hinning of the ozone layer, which is popularly known as the 'Ozone Hole.' They realised that the CFCs had started to break down the ozone, leading to the entry of harmful UV rays into the Earth's surface. This had led to an increase in skin canneer cases among humans and was harming terrestrial and marine ecosystems, too, With the objective to preserve human health and protect the environment from the harmful effects of the depleted ozone layer, the Vienna Convention for the Protection of the Ozone Layer came into existence on March 22, 1985.

The convention provided the framework for

1985.
The convention provided the framework for the Montreal Protocol (MP), the most successful environmental agreement till date to achieve universal ratification. On September 16, 1987, the United Nations (UN) and 45 other countries signed the Montreal Protocol on Substances that Deplete the Ozone Layer. It aimed to preserve the protective sheld through worldwide control, reduction and phasing out of production and consumption of zone-depleting substances (ODS). Three decades ago the speech of a Ly-qua-old girl, Severn Cullis-Suzuki from Vancouver, Canada at the 1992 Earth Summit caught the attention of leaders of par-Cullis-Suzuki from Vancouver, Canada at the 1992 Earth Summit caught the attention of leaders of par-ties and the UN in strategising expeditious mea-sures for phasedown of ODS. "I am afraid to go out in the sun now because of the hole in our ozone. I am afraid to breath the air because I don't know what chemicals are in it. If you don't know how to fix it, please stop breaking it," said Cullis-Suzuki in her landmark speech.

fix it, please stop breaking it," said Cullis-Suzuki in her landmark speech.
In 1994, the UN General Assembly prodaimed September 16 as the International Day for the Preservation of the Ozone Layer, commemorating the date of the signing, in 1987, of the Montreal Protocol. Today, the Parties to the Montreal Protocol have phased out 98 per cent of their ODS, which saved an estimated two million people from skin cancer annually.
Refrigerants, the key determinants: The establishment of a regime for refrigerants started taking shape during the 18th century when the world embraced the technological advancement

IN 1994, THE UN GENERAL ASSEMBLY PROCLAIMED SEPTEMBER 16 AS THE INTERNATIONAL DAY FOR THE PRESERVATION PRESERVATION OF THE OZONE COMMEMORATING

SIGNING, IN 1987,
OF THE MONTREAL

PROTOCOL. TODAY, THE PARTIES MONTREAL PROTOCOL HAVE PHASED OUT 98 PER CENT OF THEIR ODS, WHICH SAVED AN ESTIMATED TWO MILLION PEOPLE FROM SKIN CANCER ANNUALLY

known as the vapour compression refrigerating system which later became the most successful commercial technology.

The unprecedented need for cooling resulted in the application of early adopted natural refrigerants (carbon dioxide, ammonia, subput dioxide, water and air). The first generation of refrigerants was gradually succeeded by the fluorochemicals, commonly known as Chlorofluorocarbons (FCC) and Hydrochlorofluorocarbons (FCC) with a soon in this light is the sign of refrigerants was hardly looked at by researchers from the environmental perspective.

Later, their detrimental impacts on the ozone layer led to usage of Hydrofluorocarbon (HFC) and Perfluorocarbons (PFC), which are not ozone depleting, but had global warming potential that can be thousands of times more potent than carbon dioxide in contributing to dimate change. During the early 2000s, the unprecedented adoption of HFC refrigerants in majority of applications led to the rise of greenhouse gas (GHG) emissions and the associated global warming effects.

Continuing the momentum:

Realising the colossal impact of the carbon footprints caused by HFC refrigerants, world leaders and the UN had convened at the capital of Rwanda for the 28th meeting of the Parties to the Montreal Protocol in October, 2016. The convention led to the formation of the Kigali Amendment, intending to reduce the emissions of GHGs in a move that could prevent up to 0.5° Celsius of global warming by the end of this century, while continuing to protect the coupse day a change of the carbon on the coupse of the carbon of

and the high global warming potential (GWP) HFC by the late 2040s to countermeasure global warming. Thus, swift adoption of low-GWP refrigerants can be well addressed by exploring environmental benefits as well as market readiness. However, while pushing the envelope, it is important to see the refrigerant transition from the perspective of market adaptability, maintaining the business-as-usual scenario. The overall environmental impact of the refrigerant can only be reduced by integrant greating refrigerants with low upfront costs, energy efficiency of overall refrigeration systems and safety aspects.

For instance, merely changing a refigerant in an existing refrigeration system without modifying it may reverse the desired exonomic and environmental benefits. To avoid such scenarios, the cooling industry has been putting its efforts

desired economic and environmental benefits To avoid such scenarios, the cooling industry has been putting its efforts into designing systems to ensure commercial viability of next-generation low-GWP refrigerants. However, the use of such new systems is very limited and primarily depends on end users who are inclined to the existing systems with commonly-used refrigerants due to their costs and alterady proven results.

This year, the theme of the Ozone layer protection, commemorating the success of the 1985 Vienna Convention for the Protection of the Ozone Layer. At the same time, the continuous release of GHG emissions into the atmosphere has resulted in the decade of 2010–2019 being the hottest-ever. After experiencing the caststrophic effects of climate change, it's high time for all nations to join hands in adopting low carbon pathways for our future generations. The deployment of usustainable energy options and the adoption of environment-friendly refrigerants in the cooling sector are expected to avoid upto 0.5° Celsius of global warming by 2100.

Cooling: India harbours16 per cent of the world's population but currently only around seven to nine per cent of its people have access to air-conditioners. Cooling is cross-sectoral, spanning wide thematic areas like space cooling, industry, transport, food security and so on. According to the 2018 International Energy Agency (IEA) report, Indias cooling industry is expected to grow exponentially by 2050. Recognising the accelerated growth of cooling needs in the future, India proactively introduced its strategic document, India Cooling Action Plan (ICAP) in March, 2019 to show its commitment to explore and adopt cut-integrating the cooling with less environmental impacts. To tackle this unprecedented growth, it is imperative for the Indian cooling industry to strategies accelerated methodologies by promoting indigenous research and development activities to practise the best energy-efficient technology options and adopt the next generation environmentally-friendly refrigerants in a business-as-usual scenario.

This can be well-supported by actions like ensuring the synergies among inter-ministerial actions, creation of a strong institutional framework to identify, certifying and financing innovative cooling technologies, fast-tracking the patenting procedures for new cooling technologies and effective implementation of existing cooling policies.

In the long-term on the demand side, the emphasis should be placed on factors and the proper desired in the surface of the cooling action from the cooling action in formatic cooling action in the manufactures and users adopting newly-developed cooling technologies and so on.

The death of a credible media with a backbone

Those in charge of publicity policies hardly realise that by attacking critics they are instigating an equally vitriolic counter-narrative

SIDHARTH MISHRA

The criticism of the present turmoil in the Indian media, particularly television, comes with the rebuttal of the critic being a Libtard. The next volley is about the media being sympathetic to the earlier regime too and why then no questions were asked for such sympathies. There is no denying the fact that many present-day vociferous flag-bearers, protesting the slant being brazenly projected in the media, were themselves guilty of enjoying undue access and patronage, blighting the line between honest journalism and patronised pen-push-

state of Indian television. It has state of Indian television. It has more to do with the market and the revenue models. This writer worked with The Pioneer at a time and in an era when it was seen as the only major Right of the Centre English daily. But to the credit of the editorial leadership of the newspaper, despite the slant, it never discouraged contrary opinion and gave prominent space to it.

More importantly, it held the ideological position, paying a commer-

contrary opinion and gave prominent space to it.

More importantly, it held the idological position, paying a commercial price as many Government agencies and departments worked overtime to demolish the revenue model of the newspaper. It indeed was a challenging task to be the paper of the Opposition and also being the paper of the Right of the Centre thought. The same cannot be said about the present-day votaries of the Right of the Centre ideology. It's more a case of being on the right side of the Government. Being honest to a tide ology demands a price, which these present-day pretenders did not pay then, nor are they paying now, as on both the occasions they were on the right side of the Government.

Then there is another issue.

Does being supportive of a political Does being supportive of a political thought make a media house mort-gage its right to question a Government of the same ideology? During the prime ministership of Atal Bihari Vajpayee, there was this instance of a border skirmish with Bangladesh in which a Border Security Force officer was killed. His corpse was returned in a most undignified manner. The images made one shudder and at the same time angry even as the Government talked of peace.

even as the Government tance uppeace.

The front-page editorial in The
Pioner said, "Bend, don't genuflect."
Now this was a startling criticism
coming from the newspaper known
for its ideological proximity to the
Government of the day. This must
have needed much courage on the
part of the editor, and a real large
heart on the part of the Government
to take the criticism in the right spirit.

it.

The current news trend followed by the media houses, of the Government never going wrong, should make the powers that be worry. This worry should be on two counts: First, the loss of credibility of

these media houses and anchors these media houses and anchors known to be sympathetic to the Government. Second, by giving no space to the Opposition, the main-stream media has pushed it into a sit-uation where it has launched its own agitprop vehicles, expressing dis-trust in the media houses, calling them vehicles of Government propa-ganda.

trust in the media nouses, caimly mem wehicles of Government propaganda.

Those in charge of the publicity policies of the Government, by unleashing a vendetta towards critics, realise little that they are instigating an equally vitriolic counter-narrative. With social media and technological advancements completely democratising the media space, a Government's image cannot be lynchpinned on mere whataboutery of prime-time anchors.

We live in times where troil armies are were-ready to provide their services at mud-slinging. It's just the question of who is hiring them. While it has taken more than half-acentury to create memes of Jawaharla Modi is being subjected to this obnoxious criticism in his lifetime. Nehru and several Prime Ministers Mehru and several Prime Ministers

after him were lucky that they were

after him were lucky that they were subjected to such criticism by erudite scholar-catronists like RK Laxman. They were at the same time fortunate that the space of social media did not exist then, which could have dragged them into the muck.

Today counter-narratives on Government claims make it to various social media platforms within moments of being released in the public domain. Dependence on fake and misrepresented faces has come to create an atmosphere of distrust, where ready acceptance of a sews, howsoever true, is not easy.

This situation has given rise to such an atmosphere that reason is the biggest casualty. When fake information becomes a marketable commodity, there would not be very many clients for evidence-based, well-reasoned information. Left stack the cases of the "infodemic," a term coinced by the World Health Organisation (WHO) on the surge of information regarding the COVID-19 pandemic. The contagion in fact has hit the media hardest both in matters of finances and credibility. The failure of journalists, both television and

newspaper, to go beyond the Government's briefings on the pandemic and its opinionated criticism has left the consumers of news absolutely chary. Nobody has a clear picture on where the virus is steringthe world.

If there is distrust for a product, there obviously would not be a market for it. The market searches for such products which can be easily consumed. So here is a case of a market looking for news products. In fact, the present situation reminds one of Italian dramatist, novelist, poet and short story writer Luigi Pirandellos early 20th century play titled, Six Characters in Search of an Author. The initial reception to the play from the audience was it being incomprehensible. It was only after Pirandello added a foreword to the play a few years later that it came to be better appreciated. The connoisseurs of news are today eagerly waiting for the foreword to the current incommensurable media scenario. (The writer is projessor-chairperson, Vivekananda School of Journalism and Mass Communication, VIPS, GGSIPU, Delhi)

DO NOT ISOLATE THE ELDERLY

A survey of British doctors has found that almost nine in 10 expect a second peak of the Coronavirus in the next six months. Data suggest the rate of viral transmission nationally is again lurching out of control. A national lockdown may be only weeks away. The Government must find a way to ensure that the elderly and vulnerable do not endure an autumn and winter of total isolation from their loved ones. (The Guardian editorial)

IRAN PLANNING TO AVENGE SOLEIMANI KILLING -

Trump: Retaliation will Iran warns US against be 1,000 times greater

Washington: President Donald Trump has warned Iran that any attack against the US would be retaliated with "1,000 times

any attack against communication of the retalisted with "1,000 times greater in magnitude" after media reports that Tehran is planning to avenge the killing of top general Qasem Soleimani in January.

The death of Gen Soleimani, head of Iran's elite Neuron of Gen Soleimani, head of Iran's elite near Baghdad's airport marks a major escalation in the standoff between Washington and Tehran, since US President Trump withdrew from the 2015 nuclear deal and imposed crippling sanctions.

2015 nuclear deal and imposed crippling sanctions.
Iran had vowed to seek revenge for Gen Soleimani's killing.
"Any attack by Iran, in any form, against the United States will be met with an attack on Iran that will be 1,000 times greater in magnitude!" Trump said in a tweet after news reports emerged that Iran is planning some kind of attack against the US.

"Iran may be planning an assassination or other attack, against the US in retaliation for the killing of terrorist leader Soleimani, which was carried out for his planning a future attack, murdering US Troops, and the death & suffering caused over so many years, Trump wrote.

In a news report based on unnamed intelligence sources, the Politico said "the Iranian government is weighing an assassination attempt against the American ambassador to South Africa Lana Marks.
"If carried out, it could dra-

sake of wilning a new term as president."

On Monday, the foreign ministry denied the report of an assassination plot as "baseless" and part of "repetitive and rotten methods to create an anti-Iranian atmosphere".

Relations between Washington and Tehran have been tense ever since the lsalmic revolution of 1979. They have deteriorated sharply since Trump unilaterally pulled out of a landmark international nuclear deal with Iran in May 2018 and reimposed crip-May 2018 and reimposed crip

Navalny posts hospital photo of himself, plans Russia return

Berlin: Russian opposition leader Alexei Navalny posted a picture of himself from his hospital bed in Germany on Tuesday, looking gaunt but looking wryly about his condition and saying that he was enjoying the ability to finally breathe on his own after being poisoned with a nerve agent. The Instagram post was the first image of the 44-year-old released since he was taken to Berlin's Charite hospital two days after falling ill on a domestic flight in Russia on Aug. 20.

two days after falling ill on a domestic flight in Russia on Aug. 20.

"Hi, this is Navalny," he wrote in the Russian-language post. Thave been missing you. I still can't do almost anything on my own, but yesterday I managed to breathe on my own for the entire day." Navalny had been kept in an induced coma for more than two weeks as he was treated with an antidote before hospital officials said on Sept. 7 that his condition had improved enough for him to be brought out of it.

On Monday, the hospital said he had been removed from mechanical ventilation and was able to leave his bed for "short periods of time." In the

photo, Navalny is being given a hug by his wife Yulia and is flanked by his two children as he sits upright in his bed in a hospital gown. His statement even had the ring of his well-known sarcastic humor. "just on my own, no extra help, I didn't even use the simplest valve in my throat," he said of being able to breathe without ventilation. "I liked it very much. It's a remarkable process that is underestimated by many. Strongly recommended."

Despite his recovery, doctors have said they cannot rule out long-term health issues associated with the poisoning. Navalny's spokeswoman, Kira Yarmysh, tweeted that once he had recovered, Navalny plans to return to Russia. "No other option has ever been considered," she wrote. Leonid Volkov, a top associate of Navalny, refused to give any details on his condition or his possible return when reached by The Associated Press on Tuesday. AP

No info on reported detentions in Taiwan. says Hong Kong

Hong Kong: Hong Kong leader Carrie Lam said Tuesday that Taiwan has not disclosed information about the reported detentions of five Hong Kongers who may have attempted to flee there by boat to escape possible prosecution at home under a tough new national security law for the work of the work

and haven't received any assistance requests from family," she said.

of US punitive actions.

The new advisory warned US citizens that China impos-

US issues sweeping new travel warning for China, Hong Kong

The US on Tuesday issued a sweeping new advisory warning against travel to mainland China and Hong Kong, citing the risk of "arbitrary detention" and "arbitrary enforcement of local laws." The advisory is likely to heighten tensions between the sides that have spiked since Beijing's imposition on Hong Kong of a strict new national security law in June that has already been met with a series of US punitive actions.

es "arbitrary detention and exit bans" to compel cooperation with investigations, pressure family members to return to China from abroad, influence civil disputes and 'gain bargaining leverage over foreign governments."

"US citizens travelling or residing in China or Hong Kong, may be detained without access to US consular services or information about their alleged crime. US citizens may be subjected to prolonged interrogations and extended detention without due process of law," the advisory said.

China successfully launches 9 satellites into orbit from ship

Beijing: China successfully launched on Tuesday a solid-propellant carrier rocket from a ship in the Yellow Sea, send-

a ship in the Yellow Sea, send-ing nine satellites into orbit in the second such sea-based alunch mission, the official media reported.

The Long March 11-HY2, the 10th member of the Long March 11 family blasted off at 9:22 am from the Debo 3, a self-propelled deck barge that was modified for the mission, China Daily reported.

The nine satellites belong to the Jilin-1 Gaofen 03-1 group.

The nine satellites belong to the Jilin-1 Gaofen 03-1 group. About 13 minutes later, after travelling 535 km, it has deployed nine Jilin 1 high-res-olution Earth-observation satellites, three to take videos and six to take photographs in sun-synchronous orbits, the report said. *PTI*

Germany plans to take in 1,500 refugees from Greek islands

AFP BERLIN

Gernany plans to take in 71,500 migrants currently taking shelter on Greek islands, government sources told AFP, in addition to around 150 unaccompanied minors from the burnt-out Moria camp.

Under a plan agreed by Chancellor Angela Merkel and Interior Minister Horst Seehofer, Berlin will take in migrants who have already secured refugee status, ging priority to families with chidren, the sources said.

Merkel's right-left coalising overnment is in talks over the plan, with her junior partner Social Democrats expect-

ing a deal by Wednesday.

After a fire laid waste to Greece's biggest refugee camp Moria last week, pressure has grown on Merkel's government to offer refuge to the 11,500 left homeless by the disaster.

aster.
While Berlin has voiced readiness to open its doors to more than the 150 minors

readiness to open its doors to more than the 150 minors, German media reported how-ever that Athens opposed Germany taking in more asy-lum seekers from Moria.

Doing so may incite more migrants to set fire to their shelter in Greece in the hopes they would then be offered refuge by Europe's biggest econ-omy, according to Bild daily.

Boat capsizes near Libya, 24 migrants presumed dead: UN

DIESUITIEU OEACI. UN
Cairo: The UN migration
agency said on Tuesday that a
boat carrying migrants bound
for Europe capsized in the
Mediterranean Sea off Libya,
leaving at least two dozen people drowned or missing and presumed dead, the latest shipwreck
off the North African country.
Safa Msehli, a spokesperson
for the International
Organisation for Migration, told
The Associated Press that Libya's
coast guard intercepted three
boats on Monday, and one of
them had capsized.

AP

Around the Globe

Baghdad: A roadside bombing targeted British diplomatic vehicles in Baghdad on Tuesday, the British Embassy and Iraqi officials said. There were no injuries but the attack is fueling concerns of armed groups outside of the state's control.

Washington: US President
Donald Trump said Tuesday he
would have "no problem" selling
advanced F-35 warplanes to the United Arab Emirates, despite objections from close ally Israel.
"I personally would have no
problem with it," he said on Fox
News. "I would have no problem
in selling them the F-35."

US import curbs on Chinese | Sensex, Nifty tick higher on global textile to benefit India: Icra

on some textile imports from Xinjiang in China is likely to augur well for the Indian textile exporters, according to a

On September 14, the US On September 14, the US imposed restrictions on the import of certain products originating from the Xinjiang Autonomous Region in China, citing concerns on illegal and inhumane forced labour in the region, rating agency Icra said in a report.

The agency said it expects this development to benefit domestic textile exporters. While there were speculations of a more broad-based ban on the products originative products originative services.

tions of a more broad-based ban on the products originat-ing from the region, the restric-tions have been limited to a few entities, for now, it said. Besides banning imports of other product categories, includ-ing hair products and comput-er parts, it also includes restric-tions on some entities from the er parts, it also includes restric-tions on some entities from the region involved in manufac-turing apparels and producing and processing cotton. Xinjiang is a major cotton-producing belt, which accounts for an estimated 80-85 per

cent of China's cotton output.
"While the immediate impact, in terms of the market

while the immediate impact, in terms of the market catered to by the identified entities, is not quantifiable, this development could have major repercussions for the global textile trade.

With China being the leading apparel exporter, accounting for more than 35 per cent of the global trade and more than three-fourths of China's cotton originating from the Xinjiang region, any extension of the ban to a wider base in China could trigger a material shift in global apparel trade in coming years, it can Ratings Senior VP and Group Head Jayanta Roy said.

Amid concerns on origination of the coronavirus from

Amid concerns on origi-nation of the coronavirus from China, there have already been reports of several internation-al buyers looking at diversify-ing their sourcing base across countries, the report opined. Several major apparel exporters from India have either already started receiving increased orders or are in active discussions with large interna-tional buyers, looking at increasing their sourcing from

India. The shift, which was previously expected to take place gradually over the medium term, could be expedited in the light of this recent development, the report added.

"While over the past few eyers, Vietnam and Bangladesh have been the key beneficiaries for a shift away from China, India also stands to gain from any such market opportunity which may arise, given its strong presence in the cotton-based apparels," Roy added.
Widening of the scope of the ban could, however, be practically challenging as the existing systems are not adequate to track the origin of the raw material.

Accordingly, cotton origi-

raw material.

Accordingly, cotton originating in the Xinjiang region could end up as yarn or fabric in another region/ country, which could be processed further to manufacture apparels.

Further, there could be

Further, there could be likely retaliatory actions by China, as seen over the past couple of years amid the ongoing US-China trade war, which could prevent widening of the scope of the ban, Icra report added.

PTI

Mumbai: Equity indices found firmer ground on Tuesday as investors poured money into banking and finance counters amid a positive trend in glob-al markets. The 30-share BSE Sensex

The 30-share BSE Senser overcame bouts of volatility to end 287.72 points or 0.74 per cent higher at 39,044.35. The broader NSE Nifty rose 81.75 points or 0.71 per cent to finish at 11,521.80. IndusInd Bank topped the gainers' chart on the Sensex, spurting 4.03 per cent, followed by Bharti Airtel, Axis Bank, Bajaj Finance, ICICI Bank, Sun Pharma, HDFC and Kotak Bank.

On the other hand, Titan.

On the other hand, Titan, Maruti, ITC, Asian Paints, M&M, HCL Tech and Bajaj Auto were among the laggards, shedding up to 1.20 per cent. Mid and small-cap stocks extended their gains as participants wagered on increased inflows into the segment following changes in asset classification norms for multi-cap mutual funds.

Global equities were buoyed by encouraging industrial output data from China, navirus-battered economy will shrink by 9 per cent this fiscal, and growth outlook remains highly vulnerable to either a prolonged outbreak of the pan-demic or a resurgence of prolonged outbreak of the pan-demic or a resurgence of PTI

16 paise lower at 73.64 against

Mumbai: The rupee pared early gains to settle 16 paise lower at 73.64 (provisional) against the US dollar on Tuesday even as domestic equity market traded in the positive

which also propelled yuan to a 16-month high. "Market breadth improved for the second consecutive day as several mid-cap stocks across diverse sectors posted handsome gains." The small-cap Index rose... 1.5 per cent today on the back of a stellar 5 per cent gain yesserday sending out a clear message that investors are looking at a more broad market rally after having witnessed a polarised market for a considerable length of time," said S Ranganathan, Head of Research at LKP Securities. Sector-wise, BSE telecom, healthcare, bankev, basic materials, finance, power and utilities rose up to 1.94 per cent, while realty closed lower. Broader BSE mid-cap and small-cap indices climbed a much as 1.44 per cent. On the macroeconomic front, the Asian Development Bank (ADB) said India's coronavirus-battered economy will, 33 and a low of 73.27 agai the greenback. ntestay even as domestic equivalent and the positive territory.

At the interbank forex market, the domestic unit witnessed high volatility. Ro opened on a strong note at 73.33, but lost ground during the day and finally closed at 73.48 gainst the US dollar, registering a fall of 16 paise over its previous close of 73.48. During the session, the local currency witnessed an intra-day high of 73.33 and a low of 73.37 against the greenback and the dollar index, which gauges the greenback's strength against a basket of six currencies, fell 0.16 per cent to 92.90.

Indian economy cues; banking, finance stocks in demand to shrink 9 pc in FY21: ADB

New Delhi: India's coron-avirus-battered economy will shrink by 9 per cent this fiscal the Asian Development Bank (ADB) predicted on Tuesday saying growth outlook ermains highly vulnerable to either a prolonged outbreak of the pan-demic or a resurgence of cases. This will be the first time in four decades that the Indian economic growth will contract. In its Asian Development Outlook (ADO) 2020 Update, ADB forceasts a strong recovery for the economy in FY2021, with gross domestic product (GDP) growing by 8 per cent as mobility and business activ-ities resume more widely. "India imposed strict lock-

as moninty and ousness activities resume more widely.

"India imposed strict lock-down measures to contain the spread of the pandemic and this has had a severe impact on economic activity," said ADB Chief Economist Yasuyuki

economic activity," said ADB Chief Economist Yasuyuki Sawada.

Sawada further noted that "it is crucial that containment measures, such as robust testing, tracking, and ensuring treatment capacities, are implemented consistently and effectively to stop the spread of COVID-19 and provide a sustainable platform for the economy's recovery for the next fisal year and beyond."

With lockdowns stalling private spending, ADB said GDP will shrink by 9 per cent in April 2021 to March 2021, sharply down from its June's forecast of (-) 4 per cent.

"The growth outlook remains highly vulnerable to either a prolonged outbreak or a resurgence of cases, with the country now having one of the highest number of COVID-19 cases globally," It said.

Other downside risks include increasing public and private debt levels that could affect technology and infrastructure investment, as well as rissing non-performing loans

rising non-performing loans

caused by the pandemic that could further weaken the financial sector and its ability to support economic growth. ADB joins a chorus of inter-

estimated the contraction at 14.8 per cent. India Ratings and Research expects contraction at 11.8 per cent, while Crisil estimates the contraction at 9 per cent. For the 2021-22 fiscal, S&P.

expects economic growth at 10

For the 2021-22 fiscal, 8xB expects economic growth at 10 per cent.

ADB said Government initiatives to address the pandemic, including the rural employment guarantee program and other social protection measures, will aid rural incomes protecting the vulnerable people, but private consumption may continue to suffer. Investment is also expected to contract as investors remain deterred by heightened risks and uncertainties. The fiscal deficit is expected to rise significantly in FY2020 as government revenues fall and expenditures rise. The Government also initiated reforms in response to the COVID-19 pandemic focusing on enhancing agriculture markets, upgrading industrial park infrastructure, and implementing the National Infrastructure Pipeline. Infrastructure Pipeline.

US tariffs on China ruled to be illegal by world trade body

Geneva: The World Trade Organization said Tuesday that Trump administration tariffs on Chinese goods totaling more than \$200 billion are illegal under the rules of the global trade body. The decision marks the first time the Geneva-based trade body has ruled against a series of tariffs that President Donald Trump's government has imposed on a number of countries, allies and rivals alike. Trump has repeatedly criticized the WTO, which oversees international disputes

edly criticized the WTO, which oversees international disputes on trade, for allegedly treating the U.S. Unfairly.

In its decision, the WTO ruled against the Trump administration's argument that China has engaged in practices harmful to U.S. Interests, on issues including intellectual property theft, technology transfer and innovation.

The ruling, in theory, would allow China to impose retalia-

The overall level of exam was easy as compared to the previous years, says **ANURAG TIWARI**

ET ANALYSIS

The NEET 2020 was conducted on September 13, 2020 from 2 to 5 pm. Over 15 lakh students had registered for the exam. The exam was overall easy.

Here is a detailed analysis of the paper.

- PHYSICS

 Difficulty level: Easy in comparison to previous years.
 About 30-40% questions directly based on the NCERT textbook.
 Easy calculations.
 Questions asked from the prescribed syllabus only.
 No controversial questions.

CHEMISTRY

- CHEMISTRY

 Difficulty level: Easy to moderate
 Physical Chemistry: 16 Questions
 Organic Chemistry: 13 Questions
 Inorganic Chemistry: 16 Questions
 All questions based on the NCERT
 extbook. Statements directly taken
 from the NECRT rextbooks.
 Straightfood assessing the second to
- Straightforward questions & easy to

- Not lengthy. Students should have completed the Chemistry part within 45 minutes. Enough time for revision.

 Barely a few calculations.

 An average student should have been able to attempt approximately 40 questions with ease. While others could have attempted 44 questions.

DIFFICULTY level was high in comparison to previous years

XI — 25 questions & XII — 18 questions

Two controversial questions with

ZOLLOGY

Difficulty level: Moderate with a few exceptions.

Multi-conceptual questions requiring incisive thinking and precision.

Some questions were tricky & lost in terminology.

BOTANY

ZOOLOGY

prowess.

Overall, the questions were quite thought provoking requiring alertness of mind and critical approach.

Comprehension, application & synthesis required to interpret the questions.

Detailed analysis: Physics: The Physics section was

Detailed analysis:
Physics: The Physics section was easy as compared to previous years' papers. About 30-40% of the questions were directly based on the NCERT textbook. Graphs, data as well as some statements were directly picked from the NCERT textbook. Calculations were comparatively easy. All the questions were from the prescribed NEET syllabus with absolutely no controversial questions. Mechanics dominated with 12 questions followed by Electricity with 9 questions and Modern Physics with eight questions. Overall, we can say, Physics was easy.
Chemistry: The Chemistry section was of easy to moderate difficulty level. All the questions were from ■ Iwo controversial questions with more than one correct answer
■ Two questions were beyond the NCERT textbooks.
■ Majority of questions were conceptual in nature with a few fact-based questions as well
■ Not at all lengthy.

the prescribed NEET syllabus and completely based on the NCERT text-books. In fact, statements were directly picked from the NCERT textbook. Questions were straightforward and easy to comprehend. A couple of terms beyond the NCERT domain.
 Two questions required linguistic

easy to comprehend.

There was one controversial question with more than one correct answer. Overall, the Chemistry section was not lengthy and students should have completed this part in 40-45 minutes. With minimalistic calculations, an average student should have been able to attempt a proximately 40 questions with ease, while others would have been able to attempt a minimum of 44 questions.

Botany: The Botany part was of high difficulty level in comparison to previous years. While 25 questions were tested from class XI syllabus. 18 questions were from class XI syllabus, 18 questions were from class XI syllabus, and based on the NCERT textbook, the prescribed syllabus and based on the NCERT textbook, two questions were within the prescribed syllabus, and based on the NCERT textbook, two questions were beyond the two questions were beyond the NCERT. The questions were concep-tual in nature and required great con-

ceptual and application-based under-standing. There were also a few fact-based questions. Plant Physiology dominated with 9 questions followed by Ecology and Genetics with 7 ques-tions each. Overall, the Botany part was not lengthy and should have been completed in the stipulated time neriod.

The gaming sector today has evolved beyond its nascent stages to transform into a broad field. The industry offers a series of career options, says ARVIND BALAKRISHNA

Online gaming is one of the largest segments within the entertainment industry. In India, the online gaming market currently stands at \$930 million and is projected to reach \$3.7 billion by

the online gaming market currently stands at \$930 million and is projected to reach \$3.7 billion by 2024. Several factors including the advancement of digital infrastructure, the proliferation of low-cost smartphones, and improved quality and engagement of gaming content are contributing to this market volume, reveals a report by Maple Capital Advisors.

According to the report — Gaming — India Story, India is now home to more than 400 gaming startups with mobile gaming parturing 85% share of the total online gaming market. The profound growth of India's gaming industry makes it amongst the most promising sources of employment. There are ample career opportunities available for both

freshers and experienced candidates across a wide variety of job roles. It is also a good time for gamers who want to turn their passion into a career.

Opportunities galore

The gaming sector today has evolved beyond its nascent stages to transform into a broad field. The core industry offers a series of career options such as game developer, game designer, game dester, and game managemer, scriptwriter, audio engineer, game tester, and game management. Additionally, there is a heightened demand for graphic designers, security engineers, product managers, operations personnel, supply chain managers, legal professionals, and marketing managers.

For gamers, large PC companagers.

agers.

For gamers, large PC companies, as well as small gaming startups, now organise large-scale gam-

ing tournaments wherein participants can win attractive cash rewards and gaming merchandise. The emergence of real-money skill gaming, too, has presented an earning opportunity for gaming

earning opportunity for gaming enthusiasts.

Pursuing a career in gaming While the arrival of online gaming in India can be dated back to 2000s, it was only in this decade when gaming became a part of the mainstream entertainment culture. Hence, the job prospects in the gaming sector were fairly restricted up until a few years ago. Today, however, pursuing a career in gaming can be highly rewarding and satisfactory. Moreover, many gaming companies allow many gaming companies allow employees to work on flexible hours and/or even work remote-

When it comes to qualifica-tions, most recruiters in the gam-

ing industry focus primarily on technical skills and applied knowledge over professional degrees. However, if ones to become a game developer, having an engineering degree is mandatory. For aspiring game designers, there are several diploma and certificate courses offered by premium institutes. The minimum eligibility required for applying for these courses is Class XII. Besides this, one should be well acquainted with digital tools such as Photoshop, Maya, Max, Substance Designer et. In terms of remuneration, freshers start with a modest salary, but experienced professionals can earn up to \$10.74 Lalks or even more. Analysing the future potential

SRM MCHRS signs MoU with NIS

PNS NEW DELHI

The SRM Medical College Hospital and Research Centre (SRM MCHRC), Kattankulathur and National Institute of Siddha

and National Institute of Siddha (NIS), Tambaram have signed a Memorandum of Understanding (MoU) by which the two will now able to achieve excellence in patient care, research and medical education. Present for the MoU signing were SRM MCHRC's Pro Vice Chancellor (Medical and Health Sciences) Dr 1t Col A Ravikumar, Dean (Medical) Dr A Sundaram, Medical Superintendent Dr K Thangaraj, Associate Dean (Research) Medical and Health

Sciences Dr M Balasubramanyan Director of National Institute of Siddha — Tambaram Dr R Meenakumari, Professor and Hospital Superintendent at NIS, Dr

Meenakumari, Professor and Hospital Superintendent at NIS, Dr Christian.

SRM MCHRC and NIS will henceforth jointly offer certified short and long term courses, conduct jointly sponsored research, academic and clinical activities, publish books and journals, develop reference materials, training methods and services, offer advisory/consultancy services.

It may be recalled that SRM MCHRC and NIS had joined togeth-er to battle COVID-19 through Allopathy and Siddha.

PNS NEW DELHI

S Ashish Garg, President, The Institute of Company Secretaries of India, has been unanimously elected as the President of the Council of Corporate Secretaries International Association, for the year 2021.

Corporate Secretaries International Association was established as an association was established as an association in the year 2010 in Geneva, Switzerlandand then again reconstituted as a company limited by guarantee in Hongkong in the year 2017, to facilitate, develop

New CSIA president appointed

and promote the profession of Corporate Secretaries and Governance Professionals and to assist in creation of such organisations in countries where it doesn't exist.

Governed by a Council of members and representatives from each national member organisation, CSIA has more than fourteen member countries from each catering to 100000 governance professionals across the globe. With the strengthening of the Governance Structure in the country and with its growth as an inclusive nation in the Global

Corporate Governance map, India Inc. has already made head-way in achieving its goal of becoming one of Global Corporate Leaders. Appointment

of CS Ashish Garg, as the President of CSIA, would bolster the ambit of this growth. A fellow member of the ICSI, a Post Graduate in Economics (MA.) and Commerce (M.Com.) and a Law Graduate (ILLB, from Vikram University, Ujjain, CS Ashish Garg holds almost over 19 years of experience with specialisation in Corporate Leaston in Corporate Leagle Counselling to Companies, Under his empirical anddynamic leadership and his pragmatic approach, CSIA is sure to accomplish its missionstatement.

Placement opportunities

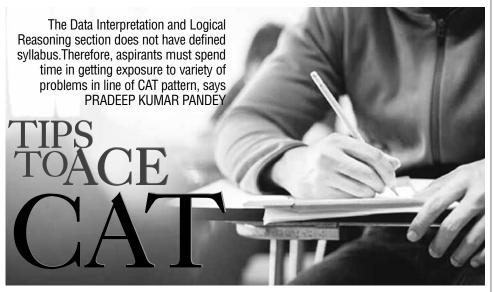

PNS NEW DELHI

With the Covid-19 VV pandemic cut-ting down jobs oppor-tunities, India's leading ting down jobs opportunities, India's leading training, and skill development institute ICA Edu Skills has switched over to the virtual placement drives to help students get employment. The institute has created a milestone by placing their more than 200 students in Accounts & Finance stream in the key IT

companies across the globe.

As the institute specialises in accounts, finance, taxation, and other job-oriented courses, they have got 206+students placed in the last four months (April-July 2020). But for all sectors combined, the placement record is over 5,000 in these four months.

The students bagged an average package of over ₹2-₹3 lakh per annum.

In the last three CATs, there was no sub-section in the name of DI and LR and majority of sets were amalgamation of DI and LR. So, practicing something off-beat and unconventional from quality material will provide a big boost to your preparation. The BUJLR section of last three CATs were medium to difficult level with quite a few easy and doable sets which one should have handpicked and scored decent marks. One has to be flexible in his strategy while attempting this section. Scanning the section intensely and prioritising the doable sets is the key to fetch a decent percentile score. Problem sets of DILR can be primarily divided into following types.

Type-I: Solo DI Sets:

Questions are designed on a data set based on Tables, Bar graphs, Line charts, Pie charts, Routes and network diagram, Triangular diagram, Scattered Graphs, Bubble graphs, Cob-web graphs et or the combination of two or more ways. Questions are more of calculation intensive name of n the last three CATs, there was

interpretation. Some elements of arithmetic like variations, ratios, percentages, averages, weighted mean, reverse weighted mean are also required in formulations and calculations. Students equipped with the requisite arithmetic skills and know the art of minimising the unnecessary calculations have an edge.

the unnecessary calculations have an edge. Type-II: Solo LR Sets: LR problem sets are based on Linear and circular arrangements, distributions, orders and sequenting, floor arrangements, binary logic and selections. Ability to comprehend questions followed by the correct and complete interpretation are the key attributes to succeed in concluding the sets. Sometimes the questions are framed in such a way that you mark an obvious looking answer which is often wrong. Beware of the language trap, if required revisit the restrictions to narrow down the possibilities, and again

down the possibilities, and again reinterpret and fine tune the skele-ton in progress made to reach the conclusions. Never select the sets just on the basis of familiarity. just on the basis of familiarity. Decision-making of doable sets are

One should scan DI/LR section and

identify the sets which seem to be the first choice. Student should attempt this section in two rounds of approximately 30 minutes

based upon complexity or number ariables in problem sets. Type-III: Topic Based DILR

Type-III: Topic Based DILR
Sets:

Test takers are familiar with
DILR sets based on the topics like
Cubes, Venn-Diagrams, RoundRobin & Single elimination
Tournaments, Maximisation and
Minimisations based on Venn-diagrams etc only because of some
sort of familiarity, Problem sets
from these topics could be a kind
of trap to woo the test takers.
Although questions are from
familiar area, there is need to read
the complete set with mindfulness
to gauge the exact difficulty level.
Type-IV: Mixture of DI and
R Sets

LR Sets:

A few sets were based on mix of DI and LR sets like Reasoning based DI, Maximisation -minimisation questions based on DI, Quant based reasoning based upon Linear and circular arrangements, distributions and selections. Test takers needs to practice the quality materials in order to get accustomed with new types of DILR sets.

Type-V: New Puzzle types:

MINDIT

Test takers have witnessed Test takers have witnessed several new puzzle types like Sudoku, matrix and grid, cryptography, coding-decoding, new type of quant-based reasoning in the recent past. Test makers used these problem sets as a kind of surprise elements to test on the spot thinking and ability to deal with various parameters and constraints. One needs to solve these sets with full concentration and absorb all the information given. Detailed reading and underabsorb all the information given. Detailed reading and under-standing of the set might take about 3-4 mins but once you find the set on the doable lines and are able to crack the set successfully, the investment would be a big dif-ferentiator.

the investment would be a big dif-ferentiator.

One should scan DI/LR sec-tion and identify the sets which seem to be the first choice. Student should attempt this section in two rounds of approximately 30 min-utes each. In the first round all the easily doable sets should be tar-geted. In the second, moderately difficult sets should be targeted. The time limit for each round could vary.

could vary. The writer is Academic Head, TIME, Delhi

'Fashion needs to reinvent now'

The present pandemic is changing the world rapidly especially the fashion industry. Hence, it is important to add creative concepts of practical use to curriculum, says MITHUN BHARDWAJ

CUrriculum, says MIT

Online classrooms present particular challenges for students seeking hands-on skills but creative solutions are on the horizon. While some of these changes may or may not be permanent, certain tectonic shifts in industries like fashion are inevitable. If ever there was a time for fashion to reinvent itself, it is now.

Myths versus reality: Expectations of impractical, uncomfortable work attire are floating away. People will consume fashion in a different way now; this means more personalisation for brands, relaxed fundamental clothing and the need for students to get closer to understand the pulse of the modern age customer.

While fast fashion is flying out of the shelf, durable and sustainable clothing is making its presence fell like never before; style will sure take a 360-degree turn in post COVID-19 world. So while the virus continues to flex its muscle, new curriculum should be added where they should be taught to create creative concepts of practical, cost-effective, affordable fashion in fullence customer's journey.

Improvisation will be key: Trends in the fashion industry changes very fast with new designs or patterns come every day in the market. Designers need to keep pacing with new styles and A1 algorithms can analyse designs through images to copying popular styles. The 3D virtual polything in the salvent of th

before. Making them learn these soft-wares will play an important part in the fashion education now more than ever. More tech apps are coming in which are using augmented reality and virtual reality to give a new con-sumer experience while shopping and these technologies should be inculcat-ed in the syllabus. They should learn how to fill skill gaps in the fashion industry, many fash-ion degrees offered by universities focus too much on the design and mar-

Mithun Bhardwai

keting aspects of fashion, failing to teach students the revenue aspect of it and how the brand will be scalable in terms of number. They should also be taught how to build brand which will be scalable in

build brand which will be scalable in terms of revenue.

Technology is crucial but will not replace craft: However, as important as digital technologies become, at the same time there will be a growing inter-est in traditional craftsmanship. As many consumers are going for local, crafted products instead of generic, mass-produced options.

nany consumers are going not rockar, carfied products instead of generic, mass-produced options. The kinds of skills that fashion students should be acquiring now and into the future have more to do with how they are thinking and using design, rather than skills specific to a certain technique or process. While there are platforms that allow students to construct patterns, drape and fit virtually, these will not entirely replace the need for hands-on training with the craftsman as we know it today. If anything, we may see the more traditional craftsman techniques being used in tandem with newer digital technologies and more hybrid learning models where students study through a combination of on-site and online education.

Businesses across the world have been ravaged by the disruptive disturbances caused by the novel Coronavirus pandemic. As physical meetings and gatherings are largely prohibited due to the virulent dissemination, going virtual via digital pathways will prove to the new all-embracive norm for the year 2020. This will bode a tremendous and perhaps an irreversible impact on businesses worldwide, as the optimisation of technology is set to change the way companies think and act.

Businesses that have crossed over to the digital side are constantly lepopartized by a plethora of cybersecurity attacks from threats such as malicious software, viruses, malwares, etc. developed by sinister hackers

and other cyber-criminals. These attackers and other cyber-criminals. These attackers can quickly invade a company's private space and steal or destroy data and assets worth millions of dollars. Therefore, building strong, robust and meticulous cybersecurity strategy and overarching cybersecurity architecture for the company is of the utmost essence under the present circumstances.

According to a report by Mordor Intelligence, the cybersecurity market stood at an impressive \$161.07 billion in 2019 and is projected to reach a whopping \$363.05

is projected to reach a whopping \$363.05 billion by 2025, growing at a CAGR of 14.5% between the period 2020-25. In the light of cybersecurity events and breaches occurring at an increasingly torrential pace, the market

each

for cybersecurity solutions is expected to rise further. According to a PWC- DSCI report, the cybersecurity segment in India too is slated to reach a value of over \$3 billion by the tear 2022, while surging at a CAGR of 16%.

Even in India, the demand for Even in India, the demand for cybersecurity personnel is expanding at an exponential rate as businesses brace to cope with the consistently rising number of cyberattacks. With businesses facing risk of losing valuable data assets from over 4,000 cyberattacks that occur daily, the Internet is

MANTED

interns!

fast turning into an ominous haunt. Unless companies allocate resources towards building state of the art cybersecurity solution architecture to thwart these imminent cyber breaches on a daily bas businesses stand to incur phenomenally sometimes irreversible damage.

The problem witnessed by Indian tech companies is the deficiency of optimally skilled expertise to tackle the vast surfeit of cyber threats that constantly loom in the periphery salvaging an opportunity to breach the internal systems of under-protected businesses. NASSCOM reported that India alone would need 1 million cybersecurity professionals. As per job portal Indeed, India exhibits the largest demand versus supply aga for skilled cybersecurity professionals with a 150% surge in professional postings with respect to cybersecurity professional postings with respect to cybersecurity job designations in the last couple of years. This is nothing short of a perilious ordeal for companies as such a want of cybersecurity skilled resources and appositely empowered cybersecurity system can be mercilessly exploited by hackers and cyber-fiends very easily.

The need for trained personnel in cyber security software solutions is extreme businesses. NASSCOM reported that India

security software solutions is extreme alongside the necessity for comprehensive

cybersecurity fortifications and innovation architecture that armours assets like firewalls, anti-virus programmes, cloud data backups, restricted access to company data and scrupilously practicing a policy for indepth monitoring and scrutiny of potential

depth monitoring and struwly or procure malware.

Companies also need to tap into the extensive possibilities offered by the remarkably novel tech tools like Artificial latelligence, Bij Dota and Machine learning to strengthen counter-threat configurations as revolutionary software impovations help provide suitable means and data required to determine the optimum solutions to the ornhiem.

New points-based immigration system opens

The UK Government has announced student and child student route to make immigration system user-friendly

he UK Immigration Minister Kevin Foster MP has Kevin Foster MP has announced that a Student route and Child Student route will open on October 5, 2020 to

will open on October 5, 2020 to the best and brightest Indian students as part of the Government's commitment to introduce a new points-based immigration certains certains.

points-based immigration system. He made the announcement on a visit to The University of Cardiff where he met with Indian students along with the CEO of Study Group Emma Lancaster. The group provides international student pathway programmes leading to undergraduate and postgraduate degree level study at the university and at leading universities across the UK. Following the welcome

Following the welcome announcements which mean Indian students will be able to progress onto their studies without returning home to apply for a new visa, the Minister and his civil service team held a roundtable discussion with the Study Group on issues relating to international students.

The Minister reassured his

commitment "to make our immi gration system much more user friendly and to work with busi-nesses and communities to make sure the system works for

eryone."
Speaking of the new student route which has positive implica-tions for Indian students choos-ing U.K. universities, the Government said: "International Government said: "International students play a key part in the government's agenda to unleash the UK's potential now that we have left the EU. They make important contributions economically, academically, and financially. "Launching the student route arty sends a clear message to

"Launching the student route early sends a clear message to the world we want the best and brightest to come to the UK to study at our globally renowned education institutions. "There will be no limit on the number of international students who can come to the UK. This will held to increase the total

will help to increase the total number of international students choosing to study in the UK higher education system each year to 600,000 by 2030, as set out in the International Education Strategy published in March

IN BRIEF -

SURVEY: POSITIVE CHANGE WITH NEP 2020

The Indian education system is ready to embrace a change if we go by the latest Brainly survey. The world's largest online learning platform for students, parents, and teachers, Brainly, students, parents, and reachers, oranny, surveyed its Indian user base on the National Education Policy (NEP) 2020. The findings, based on responses from 4,036 Brainly users belonging to various academic levels — indicate the students look forward to the policy. The intent is to prepare students by promoting value based education for real-world

based education for real-world challenges. The concept is already popular amongst the students as 66.8% are amongst the students as 66.8% are aware of the announcement. In fact, a majority of respondents believe the technology can play a role in learning at the school level. 65.6% of students think apps, satellite TV channels and online courses can help understand the subject better while only less than one-fifth could

In the survey, 60.3% of students preferred the idea of choosing subjects over hard streams like Arts, Science, etc over hard streams like Arts, Science, etc. as it gives them more flexibility to pursue their favourite subjects. Only one-fifth of the Brainly users (20.4%) would like to stick to the prevalent stream-based curriculum. However, a majority (58.7%) of students prefer to be taught in a

commonly accepted language as opposed to 24.8% who would like being taught in their mother tongue.
72.7% of students showed interest in 72.7% of students showed interest in learning contemporary subjects like Artificial Intelligence, Design Thinking, Organic Living, etc. at school level (middle and secondary stage). It is worth noting that the introduction to new-age subjects has been planned to make the

Subjects has been planned to make the students future-ready.

A whopping 87.7% of students expect it to bring a positive change and reduce the pressure for academic excellence.

This shows learners are willing to adopt a culture that is progressive and beyond

culture that is progressive and beyond booksh knowledge. Rajesh Bysani, CPO of Brainly said: "The learner wants to break-free from the learning model that has been rigid, rote, and focuses on grades! Instead, a more impactful education system is needed today that focuses on the overall development of students, ultimately, preparing them for all fletime. It wouldn't be wrong to say that today Brainly has built a global community that reflects built a global community that reflects having the word of the special properties of the special properties. It will be interesting to see how the new policy takes such learning methods forward."

TERM SYSTEM IN MBA PROGRAMME AT IIT ROORKEE

n an endeavour to revamp the curriculum in tune with requirements over time and achieve excellence, indian institute, has introduced term (Duarter) system in the two-year MBA programme wherein each year of the programme has been divided into four terms.

The objective is to drive excellence through the expansion of the knowledge base and encourage the promotion of research and of research and innovation. This initiative will put the institution in the league of premier B-schools in India such as IITs and IIMs wherein this programme structure. programme structure is running successfully.

"The term system will "The term system will allow students to explore a wider knowledge terrain through the introduction of diversified courses. It will be supplemented by practical components that will equip students with problem-solving, critical-thinking and decision-making skills," Professor Parida, Deputy Director, IIT Roorkee, said.

New German recruits make Blues debut in 3-1 away win against Brighton

AP BRIGHTON

A Chelsea team featuring just two of its slew of high-profile and expensive signings got off to a winning start in the English Premier League by beating Brighton 3-1. Timo Werner and Kai Havertz signed for a combined \$160 million - didn't manage to score at Amex Stadium, either, with Chelsea's goals coming from Jorginho, Recec James and Kurt Zouma.

James' was the most spec-

Chelsea's goals coming from Jorginho, Rece James and Kurt Zouma.

James' was the most spectacular and the most crucial, the right back's swerving pilledriver from 30 meters regaining the lead for Chelsea at 2-1 in the 56th minute, just two minutes after Brighton equalized through Leandro Trossard.

Zouma's deflected volley from a corner in the 66th then gave Chelsea some breathing space. 'I thought we were OK, Chelsea manager Frank Lampard said. 'I liked the work ethic and discipline of the team. "We have been together for four days. ... To expect everything to click on day one would have been difficult."

While Hawertz was fairly ineffective in his position on the right of midfield, fellow Germany international Werner - the lone striker - was more impressive and earned the penalty that was converted by lorginh to be break the deadlock in the 21st minute.

Brighton midfielder Steven Alzate lost possession in central unfidield as the bost stried to play

Brighton midfielder Steven
Alzate lost possession in central
midfield as the hosts tried to play
the ball out from the back,
Werner was played through and
was brought down by goalkeeper Mat Ryan, Jorginho sent
Ryan the wrong way.
Much-criticized goalkeeper
Kepa Arrizabalaga was handed
a start by Chelsea manager
Frank Lampard but his failure to
keep out Trossard's 54th-minute
shot from outside the area will
likely keep the scrutiny on him.

see POUr Inossaus systi-innius shot from outside the area will likely keep the scrutiny on him. Kepa seemed slow to get down as the ball squirmed beyond his outstretched right hand James quickly put Chelsea back in front with a stunning strike that flew into the roof of the net, and the right back sent in the corner that Zouna met with a volley that ricocheted in off Brighton defender Adam Webster's right foot. Of Chelsea's other offseason signings that combined to cost \$250 million, left back Ben Chilwell and playmaker Hakim Zlyech were injured and center only recently joining up with the squad.

arter only recently Joining up with the squad.

"The players are still work-ing each other out a little bit," Lampard said. "Today we weren't as fluid as we could be ... I want us to have a lot more movement up front than we did today."
