UP schools shut, social gathering restricted to 50 in closed space

Lucknow: The Uttar Pradesh Government on Sunday ordered the closure of all schools till April 30 and directed the imposition of a night curfew in the districts, which report 100 new infections in a day or have 500 active cases.

The Government ordered that not more than 100 people be allowed to assemble at an open space, and 50 in closed spaces.

The Centre's decision to ban the export of Remdesivir comes in the wake of reports of its shortage and hoarding resulting in inflated prices of the drug in black market.

India bans virus drug Remdesivir's export

PNS ■ NEW DELHI

Anticipating increase in the demand for Remdesivir injection in the coming days in the wake of a spike in Covid-19 cases, the Centre on Sunday took a string of measures from prohibition of the export of the anti-viral drug as well as that of Remdesivir Active Pharmaceutical Ingredients (API) with an aim to ensure sufficient availability in the domestic market.

The Government has also advised all domestic manufacturers of Remdesivir to display details of their stockists/distributors on their website.

Negative report must for travelling to Himachal from seven worst-hit States

Shimla: The Himachal Pradesh Government on Sunday made it mandatory for people coming from seven States which

have witnessed a spike in coronavirus cases to show a Covid-19 negative test report on entering the State.

Stay indoors to obviate Delhi lockdown: CM

STAFF REPORTER ■ NEW DELHI

With the national Capital recording whooping 10,774 fresh cases of Covid-19 on Sunday, Chief Minister Arvind Kejriwal termed the situation very worrisome and urged people not to step out of homes unless it is urgent.

The Chief Minister said the ongoing peak has surpassed the intensity of November 2020. He asked people to use face masks and sanitiser and maintain social distancing.

Kejriwal said, "Corona is rising rapidly in the entire country. In Delhi too, it has increased significantly in the past 10-15 days. It is the fourth wave in Delhi and it is very dangerous. It is spreading very fast so much so that it is beyond the understanding of many people."

Kejriwal terms situation serious

there is a rush to the hospitals and beds are unavailable for serious patients. "We need your cooperation. If your cooperation is received and situation of hospitals is under control, there will be no need to impose lockdown in Delhi. But, if beds in hospitals fall short, then lockdown may have to be imposed," he said.

"Lockdown should be imposed by any Government only when its hospital system has collapsed. I am not in favour of lockdown. I believe lockdown is not a solution to deal with Covid-19. It should be imposed if hospital system collapses," he said.

Opp seeks cancellation of CBSE, ICSE Board exams

X, XII exams scheduled from May 4

PNS ■ NEW DELHI

Weeks ahead of the CBSE and ICSE Board examinations, political parties have expressed serious concern over the Centre's go-ahead to conduct the examinations amid the corona pandemic.

ing number of Covid-19 cases across the country, party general secretary Priyanka Gandhi wrote to Education Minister Ramesh Pokhriyal Nishank seeking cancellation of the Government and the CBSE board will be held responsible if any exam centre becomes a hotspot with a large number of children becoming infected.

"In the light of the devastating corona second wave, conducting CBSE exams must be reconsidered. All stakeholders must be consulted before making sweeping decisions. On how many counts does GOI intend to play with the future of India's youth?" Rahul asked through social media platform.

CBI grills Deshmukh's 2 aides over ₹100 cr extortion order to Vaze

PNS ■ NEW DELHI

The CBI on Sunday questioned two personal assistants of former Maharashtra Home Minister Anil Deshmukh in connection with allegations of corruption levelled against him by former Mumbai Police Commissioner Param Bir Singh.

Following the High Court directive for a CBI probe into the issue, Deshmukh had to resign from his post within hours of the order.

Didi, Shah lock horns over election violence, deaths

Mamata terms deaths genocide, Shah raps her for asking supporters to gherao force

SAUGAR SENGUPTA ■ NADIA

West Bengal Chief Minister Mamata Banerjee on Sunday termed the death of four persons in Central forces firing at Sitalkuchi a "genocide" demanding the resignation of Home Minister Amit Shah, who hit back faulting her for "playing appeasement politics even with deaths."

Talking to the media men in Siliguri, Mamata, who put on a black cloth around her as a mark of protest against what she called a "pre-planned murder of innocent people", said, "This is genocide... I have seen the pictures... that they (central forces) had simply sprayed the bullets instead of shooting at foot and thigh only goes on to prove that they were firing to kill... how is it that all the victims bore injuries to their neck or chest... It is a

"Every death is sad but why is it that Mamata Didi has to play politics of appeasement with every death... in referring to the firing deaths on Saturday she forgot to mention the name of Ananda Barman a Rajbangshi worker who was a first-time voter and who was shot dead by the TMC goons in the same constituency... Is Didi not referring to him because he comes from Rajbangshi community... and does not fit into her bank politics," Shah said.

FIRMS FEAR ANOTHER EXODUS OF MIGRANTS
Coimbatore: With the second wave of Covid-19 sweeping across various parts of Tamil Nadu, some of the industrialists in the State are apprehensive of migrant workers leaving for their hometowns considering the health conditions.

Body blow to Pak ultras in J&K, 12 killed in 3 days

Eliminated Ansar chief had planned to attack Amarnath pilgrims

MOHIT KANDHARI ■ JAMMU

Pakistan-based terrorist outfits Lashkar-e-Taiba, Al-Badr, and Ansar Ghazwat-ul-Hind have suffered the worst blow this year so far with the elimination of one dozen terrorists in four back-to-back encounters in the South Kashmir districts of Shopian, Pulwama and Anantnag in the last 72 hours.

Among those killed in the Shopian gunfight early Sunday morning was one of the youngest terrorists identified as Faizal Gulzar Ganai.

Experts fear Kumbh can be Covid super-spreader

ARCHANA JYOTI ■ NEW DELHI

As tens of thousands of devotees get ready to take part in the Shahi Snan on Monday in the Ganga at Mahakumbh in Haridwar amid a raging Covid-19 pandemic, health experts fear that the mega event might turn into a super-spreader, adding to the country's massive caseload which is already breaking records each passing day.

They said that a dip in the water is not the problem but usually it has been seen that in such events where a large number of people congregate, social distancing norms are mostly overlooked while there are always chances of one person infected with the SARS-CoV-2 virus infecting many others.

which started on April 1 is expected to be attended by nearly 150 million visitors.

2 kids die, 150 shanties gutted in fire in Noida

PTI ■ NOIDA/LUCKNOW

A major fire broke out in a village in Uttar Pradesh's Noida on Sunday, leaving two children dead and around 150 shanties destroyed, police said.

Covid graph continues to rise 1,333 new cases, 8 deaths reported in State on Sun

PNS ■ DEHRADUN

The graph of Covid-19 cases has continued to rise in Uttarakhand with 1,333 new cases being reported on Sunday in the state. While eight patients of the disease died, 243 were reported to have recovered from it on the day. The total number of active Covid cases in the state is now 7,323 with a sample positivity rate of 3.57 per cent and recovery percentage of 89.96.

According to information provided by the health department, the total cumulative positive Covid cases reported in the state so far is 1,08,879 with 97,887 have been cured while a total of 1,760 patients have died in the state so far. The mortality rate in the state is currently 1.62 per cent. Of the positive cases reported on Sunday, 1,108 were from Dehradun district followed by 386 in Haridwar district and 122 in Nainital district. Among

the other districts, 104 cases were reported from Udham Singh Nagar, 49 from Pauri, 44 from Tehri, 11 from Almora, eight from Bageshwar, nine from Chamoli, seven from Champawat, five from Rudrapur, four from Uttarkashi and two from Pithoragarh. When it comes to the number of active cases, with 3,110 cases Dehradun district is at the top followed by Haridwar with 2,056 cases and Nainital with 754 cases. Among the other districts, there are 382 active cases in Udham Singh Nagar, 295 in Tehri, 286 in Pauri, 101 in Almora, 73 in Bageshwar, 43 in Chamoli, 46 in Champawat, 76 in Pithoragarh, 65 in Rudrapur and 36 in Uttarkashi.

Meanwhile, the vaccination campaign also continued in the state with 29,719 beneficiaries being vaccinated on Sunday. Dehradun district followed by 386 in Haridwar district and 122 in Nainital district. Among

ABAP chief tests positive for Covid-19

PNS ■ HARIDWAR

The head of the Akhil Bharatiya Akhada Parishad (ABAP) Mahant Narendra Giri tested positive for Covid-19 on Sunday. Giri turning out positive has raised the alarm bells since he interacts with a large number of people including top officials of the government and members of the religious fraternity on a daily basis. It is pertinent to mention here that due to health issues, he was admitted in a hospital on Saturday.

112,056 beneficiaries have been partially vaccinated while 181,150 have been fully vaccinated in the state so far.

Arrangement made for live telecast of Shahi Snan

PNS ■ DEHRADUN

Aspects of the biggest religious congregation in the world have been affected by the most serious pandemic affecting the world in the recent times- Covid-19. To overcome this using technology, the Uttarakhand government has arranged for the live telecast of the Kumb Mela in Haridwar.

With the assistance of the Doordarshan, the State's Information Department has made high tech arrangements for live telecast of the Shahi Snan. The Chaitra/Somwati Amavasya Shahi Snan will be telecast live from 9 AM to 4 PM on the Doordarshan national channel and OTT platforms.

The clear fee of cost. Along with this, broadcast will be available free of cost of the media. The live telecast channel will be available via download

from satellite GSat17 3820mhz SR 4.25. All media platforms can use this live feed free of cost. Along with this, arrangements have also been made to make the live streaming, video footage and still photography available to the

media through an STP server. The state government has also made arrangements for live broadcast of on LED screens at all district headquarters and major sites across the state.

Beauty queen treads 12 hours on treadmill

PNS ■ DEHRADUN

Doon's Akanksha Singh, who was the third runner up at Miss Asia 2017, completed her 12-hour non-stop treadmill walk/run on the weekend. She covered a total distance of 60 kilometres during her 12-hour challenge. She attempted this feat to support mental health awareness.

Akanksha stepped on the treadmill at 9 in the morning, walked and ran continuously for 12 hours before concluding the challenge at 9 in the evening. Behind attempting this feat, Akanksha gave credit to her sister and trainer Appeksha Pandir, who ardently trained her for this initiative. She also thanked her mother Santosh Pandir, father Bhanwar Singh Pandir, and brothers Anubhav and Prabhat Pandir for being a part of her support.

Sharing her experience about the 12-hour treadmill walk/run, Akanksha said, "It was an unreal 12-hour-long experience as it exceeded all my expectations. I was so excited and nervous at the same time and had so many emotions while on the treadmill. Along with my parents, so many people came forward to watch and support me via social media live platforms, which motivated me to push myself hard to complete this challenge."

Marriage registrations decline due to pandemic

PNS ■ DEHRADUN

Like the various aspects of life which were affected due to the Covid-19 pandemic, the number of registration for court marriages could not remain unaffected. The officials informed that owing to the fluctuating guidelines throughout the year considering the intensity of the covid contagion, weddings were not the priority of most of the people during the pandemic. According to them, many couples who got married in a traditional way last year probably did not prioritise registration for court marriages due to the pandemic, which possibly caused comparatively less registration in the district. Since all registrar offices across the dis-

trict were also closed for about two months due to the lockdown last year, it might have also contributed to the declined registrations last year during the pandemic. As informed by the sub-registrar of the Dehradun district, Arvind Kumar, when the pandemic had not hit the country in the year 2019, about 8,000 marriages were registered in the Dehradun district from

January to December. In the year 2020, about 5,870 marriages were registered across the district from January to December except for about two months when the State was under lockdown, informed Kumar. Comparing the marriage registration of both years, over 2,000 fewer marriages were registered in the year 2020. In the first three months of this year, the registrar offices

across the district have already registered over 2,200 marriage registrations which are quite normal in the initial months of every year, as per the officials. According to them, the number of registration for court marriages seems promising so far but it could change considering the intensity of the Covid-19 pandemic in the district in the forthcoming weeks.

Classes of college students to continue through offline and online mode

PNS ■ DEHRADUN

Students of private and government universities, colleges and institutes can continue their education through offline and online mode amid the scare of the covid-19 pandemic in Uttarakhand. The State minister of higher education, Dhan Singh Rawat informed this on Sunday while stating that the State Government took this decision so that students' education does not get affected due to the increasing Covid-19 positive cases in the State. He said that the students of science stream and practical subjects can continue their classes in their respective

education institutes while the students of non-practical subjects can receive education through online classes. Rawat said that the vice-chancellor of universities would supervise that students receive education through both modes without any hindrance and would report to the State administration every month.

Similarly, the principals of government colleges would present their reports to the State administration every month to supervise the online and offline classes at the college level across the State and would report to the administration every month too,

informed Rawat. The State minister of higher education said that he has ordered the chief secretary to issue all these instructions to ensure students receive education during the pandemic. Besides this, Rawat informed that 96 colleges out of 106 colleges in the State have been connected with 4G connectivity and the remaining colleges would be connected by April 30. According to him, the government has provided a total of 14 basic facilities in colleges and universities for students like computers, e-library, smart classes, e-board and modern pieces of equipment for laboratories.

No laxity to be tolerated in smart city works: CM

PNS ■ DEHRADUN

Chief minister Tirath Singh Rawat said that carelessness will not be tolerated in execution of works under the Dehradun smart city project. The CM said this after inspecting the ongoing works under the project at the Parade Ground and Paltan Bazaar on Sunday. While inspecting the works in the Paltan Bazaar, the CM directed the Dehradun Smart City Limited (DSSL) CEO and Dehradun district magistrate that works being undertaken by the construction agencies should be expedited.

It should also be ensured that the construction works do not cause any inconvenience to the businessmen and general public. All construction related works should be carried out in the night. To resolve the

problem of dust, water should be sprinkled at the site.

At Paltan Bazaar, the CM directed officials that along with the construction works, the sewerage and undergrounding of wires should be carried out simultaneously. Work should be carried out in the Paltan Bazaar with an aim to complete all of it by April 30, he said. Rawat stressed that there will be no compromise with the quality of work. Works related to electricity, sewerage, road construction and other aspects should be undertaken simultaneously, he said.

Strategic works in progress at Parade Ground the CM directed officials that all works under the smart city project should be completed within a set time frame. The completion of works should be ensured in a phased manner. MLA Khajan

Das and officials concerned were also present during the chief minister's inspection.

It is pertinent to mention here that though officially DSSL has been winning vari-

ous awards for different aspects, people in Dehradun have been complaining for months about the protracted time being taken to execute the works and the resulting incon-

venience being caused to the public. It remains to be seen whether the inspection and instructions of the CM have any effect on the execution of the project works.

Guest Column anakyapur

PRAVIR KRISHNA

Monday, March 8, 2021 is a Day Sarita Dhurvi can never forget in her life. This tribal artisan from an obscure village in Dindori district in Madhya Pradesh might as well echo words of famous English poet Lord Byron, "I woke up one morning and found myself famous!" Why? Although Sarita had been making Gond tribal paintings for years, and earning small change selling them to whoever cared to buy them, March 8 was when none less than the Prime Minister of India checked in as her customer! Yes! Narendra Modi, admired and actually bought a

When the PM came shopping!

painting of hers to adorn the walls of the most prestigious office of the people of India. If you meet her in person, you can feel that this sudden glory from the blue is still sinking into her mind.

And so it was for two other tribal women, quite like Sarita-Monisha, a Toda weaver from Tamil Nadu, whose Poothukali shawl won the PM's heart; and Rupali, a Santhal woman, whose hand-crafted, foldable mat of Madhurkali grass that grows in the 24 Paragana area of Bengal, impressed the PM as something truly ingenious, innovative and local. The PM promptly went vocal about them on Twitter and other media, causing wide ripples.

The lesson in the PM's thoughtful act is clear—there is a huge talent bank in the hinterland of India—the rural and, more particularly, the tribal lands. This India, these Indians and their amazing products need to be given the market attention that they deserve.

Such attention is due not because the artisans belong to underprivileged tribes, but because their products are excellent by any standards of excellence. And, TRIFED (Tribal Cooperative Marketing Development Federation of India) is enabling such market focus as a duty and a constitutional obligation.

TRIFED, as the business arm of the Ministry of Tribal

Affairs is mandated to address this obligation. To this end, TRIFED has promoted Tribes India, a rapidly growing chain of 131 showrooms across India that market a full and wholesome range of products of tribal artisans. These products include fabrics, paintings, handicraft, forest-sourced food and health products, exotic jewellery, utility-products, and a host of gift items in a wide

price-range. These showrooms are strategically located in airports, prime commercial districts in metros and large cities and other locations of high footfalls of potential buyers. The website of Tribes India carries the complete list of outlets.

TRIFED realised that shopping-culture is shifting from the showroom-mode to the online mode. To keep pace with this trend, it has set up an e-portal,

www.tribesindia.com. The object is to put tribal artisans and products on the platform of the global e-market. The intent is to achieve several goals at once. The demand for the products will expand exponentially; the middleman and his share will accrue to the tribal artisan; the artisan will move on from distress-price to best price; and all these together will result in strengthening tribal livelihoods

without removing them from their habitats. This implies tribal empowerment in the truest sense.

If the tribes turned underprivileged, a major reason for this was illiteracy. In today's world, literacy has an new avatar—e-literacy, the ability to sell online. The amazing opportunity online commerce offers is to democratise peoples, cutting across nationality, gender, and geographical location. The internet has provided new avenues to market linkage. This has put Sarita in remote Dindori at par with a merchant in Mumbai. Both can connect with equal ease to a buyer, say, in New York. It would be a sin to deprive the tribal artisans and producers of the opportunity online commerce offers. Our intention, therefore, is to go vocal about the local and buy tribal to make it global.

After he had done his shopping of tribal products online on the portal of Tribes India, the Prime Minister,

tweeted wonderful words of encouragement and shared his experience with his cabinet colleagues. Soon, we had celebrities visiting our portal and shopping. Whereas the portal earlier had a modest thousand visitors a day, the number soared to over thirty thousand over-night. What the Prime Minister of India did is what TRIFED would like to see every Chief Minister and every corporate leader doing: shop from outlets and on a e-portal of Tribes India, and then encourage all to do likewise. We call on all corporates for shopping for gifts, folders, fabrics, guided by a simple principle: tribal India, first! Overnight you can help us hugely expand our customer and market base. Tribes India is the one place where when you shop you do more than shopping; you discover a different, vibrant India and strengthen the livelihoods of thousands of Saritas, Monishas and Rupalis. This adds a new dimension to Corporate Social Responsibility. I am sure the captains of India Inc are listening.

(The writer is the managing director of TRIFED)

खुले हैं माँ शक्ति के द्वार आइए उत्तराखंड, लेने आशीष अपार

इस चैत्र नवरात्रि में देवभूमि उत्तराखंड आएँ और पावन मंदिरों में देवी के दर्शन के साथ-साथ प्रकृति की मनोरम छटा का भी आनंद लें।

मढ़वाल मण्डल

कालिका माता, बाीरोवाल, पीपी मण्डवाल
पीपी मण्डवाल जिले में स्थित कालिका माता मंदिर को माँ काली का उदभव माना जाता है। यहां हर 3 साल में शक्ति के मीलन में प्रसिद्ध मेला लगता है।

कुछ सावधानियाँ बरते

- बाहर निकले तो मास्क अवश्य पहने
- आपस में कम से कम 6 फुट की दूरी बनाए रखें
- कुछ भी छुएं तो साबुन से कम से कम 30 सेकंड तक हाथ धोएं

समस्त यात्रियों को नवरात्रि की मंगल कामनाएं

India should cherish peace process on LAC, says China

PNSPTI ■ NEW DELHI/BEIJING

With both sides unable to firm up a plan to withdraw from the flash-points during the latest round of talks, China on Sunday said India should cherish the current positive trend of de-escalation and peace on the Line of Actual Control (LAC) in Ladakh.

This statement came two days after the 11th round of Corps Commander-level talks on Friday at the Moldo border meeting point at the LAC in Ladakh failed to show any tangible movement forward. Both the sides, however, agreed to continue holding regular dialogue at the military and diplomatic levels to restore peace.

In the talks lasting more than 12 hours, China dilly dallied on pulling back troops from the friction points at Patrolling Points 15, 17 and 17A at the Hot Springs and Gogra, sources said.

The Indian delegation led by Leh-based Lt Corps chief Lt General P G K Menon reiterated the country's stand that disengagement from Hot Springs and Gogra will go a long way in bringing down tension at the LAC. The proposed pull back will ensure peace and stability in the region besides ensuring tranquility, the Indian team insisted.

China, however, did not give any commitment on a plan to disengage and continues to maintain large number of troops at the face-off sites. This led to concern in the Indian security establishment, sources said. The Chinese team was led by Major General Liu Lin.

Faced with the stalling tactics by China in Depsang valley where it advanced into Indian territory in 2013 and continued to remain there, the two Corps Commanders will meet again shortly to continue the momentum of dialogue.

they said.

In this backdrop, the Chinese military said on Sunday India should cherish the "current positive trend" of de-escalation and cooling down of tensions in the border area. A day after the 11th round of Corps Commander-level talks, the Indian army is a statement said on Saturday both sides held a detailed deliberation on the disengagement of troops in the remaining friction points of Hot Springs, Gogra and Depsang in eastern Ladakh.

Both the sides agreed to jointly maintain stability on the ground, avoid any new incidents and resolve the outstanding issues in an "expedient manner". There was no visible forward movement at the latest round of military talks between the two countries as the Chinese delegation came to the talks with a "premeditated mindset" and did not show any flexibility in moving forward on the disengagement process at the remaining friction points.

In its press release on the latest round of talks between two sides was held on April 9, China's People's Liberation Army (PLA) said India should cherish the de-escalation and cooling in the border area, in an apparent reference to the disengagement of troops from the most contentious area of the Pangong Lake in February.

Both the sides agreed to jointly maintain stability on the ground, avoid any new incidents

their leaders, continue their communication and dialogue and work towards a mutually acceptable resolution of the remaining issues at the earliest, it said.

"They also agreed to jointly maintain stability on the ground, avoid any new incidents and jointly maintain peace in the border areas," the statement said.

Army Chief General M M Narayan said last month the threat to India has only "abated" following the disengagement in the Pangong lake area, but it has not gone away altogether. He said China still maintained considerable number of troops in the "rear areas". It means the Chinese troops though pulled back from the eyeball to eyeball confrontation but continued to have heavy armour and troops close by thereby posing threat to Indian interests. Naravane also observed peace will be restored once these additional troops return to their barracks from the forward areas.

Not willing to take any chances, the Army in the last few months substantially bolstered its troop strength besides weaponry. Moreover, the troops remained deployed on the LAC throughout the harsh winter months when the temperature dipped to minus 30 degrees.

The standoff between the two armies started on May 5 last year when the troops from both the sides exchanged blows at the Pangong Tso. Soon, the face-offs commenced at some other places on the LAC.

The border saw massive troop build up by India and China after a bloody brawl on June 15 in the Galwan valley. Twenty Indian soldiers including the Commanding Officer were killed. At least 40 Chinese were also killed by China, which is yet to officially announce the number of casualties.

Traders' body asks Modi not to impose night curfew, lockdown

PNS ■ NEW DELHI

Confederation of All India Traders (CAIT) on Sunday urged Prime Minister Narendra Modi not to impose night curfew or lockdown amid rising Covid-19 in the country and instead adopt staggered working time for different sectors. In a letter to the Prime Minister, the traders' association said it would be more appropriate if alternate measures may be adopted at district levels all over the country.

"Instead of night curfew or lockdown which have not proved a worthy step so far to combat escalation of COVID-19, it would be more appropriate if alternate easy measures may be adopted at district levels and staggered working time for different sectors," said CAIT.

CAIT Secretary General Praveen Khandelwal said that a closer analysis of the COVID-19 statistics over the last one week have made it amply clear that night curfew and lockdown in different states have not brought the desired results of bringing down the cases. It suggested that working hours of different verticals of trade and commerce should be revised.

"We suggest that government offices, private offices and other all kinds of offices may work from 8 am to 2 pm and the markets and shops may be allowed to work from 11 am to 5 pm," said CAIT.

Best mango? Jury is out on social media

RAJESH KUMAR ■ NEW DELHI

Social media on Sunday debated which variety of mango-Alphonso, Dushehri, Langda, Malda or Totapari is the best. The hashtag #Alphonso has gone viral on Twitter and it was trending at 13 numbers with many tweeting which variety of the king of fruit is the best in the country.

It all started when a Twitter user claimed that 'Alphonso mangoes are the best, while responding to this tweet, a Twitter user wrote no mango can aspire to come even with sniffing distance of the Langda/Malda, no competition, Langda is King. One Twitter user wrote "Alphonso is the most overrated stuff" ever and that only "brand conscious babalo" have a taste for it.

Several people tweeted for Alphonso mango. Twitter user wrote "Alphonso is the most overrated stuff" ever and that only "brand conscious babalo" have a taste for it. Several people tweeted for Alphonso mango. Twitter user wrote "Alphonso is the most overrated stuff" ever and that only "brand conscious babalo" have a taste for it.

Another Twitter user tweeted "Dushehri, Malgova and Sappattai for me. A little known variety called Panjavarnam from my home town is also very good, but sadly not available freely out of that region. And yes, Alphonso is hella overrated". Another Twitter user wrote "One Twitter user tweeted 'Alphonso is overrated; Kesari is underrated'."

Dubbed the 'king of fruits' in India, mangoes have an almost cult fanbase in India. With its pulpy, juicy flesh wrapped around a delightful hardness, the fruit comes in many shapes, sizes, flavours and varieties across the states of India. A large variety of mangoes are grown across India. Maharashtra is famous for Alphonso mangoes, Uttar Pradesh is known for Dushehri. West Bengal is popular for growing Himsagar mangoes while Andhra Pradesh is known for the lighter coloured Safeda mangoes. Other popular varieties of mangoes in India include Chausa, Lengra, Kesar, Totapari, Neelam and much more. Another netizen wrote "Agree, Langra is just awesome... although I have developed a taste for Banganapalli in recent years. Alphonso has a bad hit rate, but the odd one can be brilliant".

According to the agriculture ministry, mango production is estimated to increase 4.24 per cent to 21.12 million tonnes in the crop year 2020-21 ending June. The output of mango, the 'king of fruits', stood at 20.26 million tonne during the 2019-20 crop year (July-June). The arrival of mangoes from southern and western India has started, while the season in the northern states like Uttar Pradesh will begin from mid-June onwards.

Modi pays tribute to social reformer Jyotirao Phule

PNS ■ NEW DELHI

Prime Minister Narendra Modi on Sunday paid tributes to noted social reformer Jyotirao Phule on his birth anniversary, and said his commitment to reforming the society will continue to inspire future generations.

In a tweet, Modi also hailed him as a great thinker, philosopher and writer and noted that he was committed to women's education and empowerment throughout his life.

Born in an extremely

backward caste in 1827 in Maharashtra, Phule fought against social discrimination and strove to promote education among the most deprived communities.

He and his wife, Savitribai Phule, are considered pioneers for their efforts to promote education among women.

Modi had recently suggested a "vaccination festival" from April 11 to April 14, birth anniversary of Dalit icon B.R. Ambedkar, to push inoculation against the coronavirus among the people eligible for the shots.

CBI to probe cheating, misappropriation of funds case against ex-MP KD Singh

PNS ■ NEW DELHI

The CBI has taken over a case of cheating and misappropriation of funds against former Rajya Sabha MP KD Singh from Uttar Pradesh Police following a reference from the State Government and further notification from the Centre for probe into the case by the Central agency.

The case was originally registered at Kotwali Kanpur Nagar police station in Kanpur as Crime No. 234/20 on a complaint from Pawan Kumar alleging cheating and misappropriation of funds invested by the complainant and other investors in Alchemist Infra Realty Ltd and Alchemist Infrastructure Ltd promoted by the former MP.

The investors were promised plots/villas/apart-

ments against their investments. However, they were never given the promised plots, flats, or villas. They were not even refunded the funds despite the plots or flats not being allotted to them.

Besides Singh, six directors of the two firms have also been booked in a case of cheating and criminal breach of trust.

The UP Government had requested a CBI probe through an order dated August 16, 2020. The Centre notified the probe by the CBI on April 1 this year following which the CBI re-registered the case on Friday.

Ex-CIC calls for making virtual hearing permanent feature of judicial system

PNS ■ NEW DELHI

Former Central Information Commissioner Shailesh Gandhi has called for making virtual hearing a permanent feature of the judicial system, stating that the achievements of a Supreme Court e-committee, which has been around since 2005, have been "inadequate".

He has made this suggestion in his submission to Justice DY Chandrachud, the Chairperson of the SC e-committee, saying the draft report placed by the committee in public domain lacks "any real evaluation of the effectiveness of the earlier efforts and recommendations".

Gandhi, who had set in motion paperless working in the Central Information Commission a decade back, said, "The Supreme Court E-Committee has been around since 2005 and it appears its real achievements are meagre".

Citing the findings of the Committee, Gandhi said the report mentions that a total of Rs. 639.41 crore plus Rs 1670 crore have been spent implementing. Information Technology based systems in courts.

of 309.41 crore for software and consultancy, it would mean Rs 2,000 crore for hardware. Assuming about 20,000 courts, this would mean an average expenditure of about Rs. 10 lakh per court for hardware. This should be more than adequate. Yet, most courts did not function effectively during the pandemic using virtual hearings," he said.

He said against an increase of four lakh pending cases before courts between 2005-19, just last year a year has seen an addition of 75 lakh cases to the pendency.

Gandhi said the Committee mentions setting up of "some Virtual Courts", whereas all courts should be effective virtual courts.

"In fact, I would submit that all courts should be prepared and mandated to allow lawyers and litigants to appear virtually or physically without any specific need to inform anyone or take permissions," he said.

Air purifiers in lifts, poorly ventilated spaces helpful in Covid spread: Study

PNS ■ NEW DELHI

Air purifiers in lifts (elevators) and other poorly ventilated confined spaces could actually increase the spread of airborne virus droplets, according to researchers who have called upon the health authorities to look for such places which might be turning out to be super spreaders for Coronavirus which is spreading like a raging fire.

When people infected with the Cov-SARS-2 virus, responsible for the current Covid-19 pandemic, sneeze, talk or simply breathe, they expel thousands of contaminated saliva droplets.

These droplets are now recognized as being the main way in which the virus spreads to other individuals and people are being advised to wear masks to curb contamination. Regularly airing indoor spaces to reduce the concentration of viral particles is also important.

Since the quality of air in a small space can quickly deteriorate even when there is just one person in that space (mainly because of the increased CO2 levels produced as we breathe

and found that the air purifier actually increases the spread of saliva droplets in the cabin.

"This is because the air intake integrated inside the purifier equipment induces flow circulation that can add to the transport of these droplets," explains Drikakis.

They also found that the risk of airborne virus transmission is lowest for low ventilation rates. This is due to reduced flow mixing inside the lift, says Dbock.

"The broader implications of the present findings are that health and safety authorities must revise guidelines accordingly by considering the flow circulation and droplet dispersion effects arising from air purifiers and sanitiser in confined spaces," say Drikakis and Dbock.

and found that the air purifier actually increases the spread of saliva droplets in the cabin.

They also found that the risk of airborne virus transmission is lowest for low ventilation rates. This is due to reduced flow mixing inside the lift, says Dbock.

Active Covid cases in India breach 11-L mark

PNS ■ NEW DELHI

The active Covid-19 cases in India crossed the 11 lakh mark for the first time after a steep climb of 15,227 in new infections on Saturday. The active caseload till now was at its lowest at 1,35,926 on February 12 and at its highest at 10,17,754 on September 18, 2020.

Amid an unprecedented burden on health infrastructure in 15 States and Delhi, which are witnessing an upward trajectory, authorities have started reserving more COVID hospitals and taking steps to procure more medical supplies, besides enhancing curbs on the movement of people.

The Centre announced a ban on export of Remdesivir, used in coronavirus treatment and by the Pharmaceutical and Biotech industries, to domestic manufacturers to display on their website details of their stockists and distributors.

India's COVID-19 tally of cases climbed to 1,35,58,805, and the death toll increased to 1,69,275 with 839 daily new fatalities, the highest since October 18, 2020, the data updated by Health Ministry on Sunday morning showed.

While the cumulative number of COVID-19 vaccine doses administered in the country has crossed 10 crore after 85 days, the 'Tika Utsav' or a special 'vaccination festival' was started till April 14.

"Anyone eligible for the vaccine should get the jab, and for this the society and administration have to make full efforts," Prime Minister Modi

said pitching for "zero vaccine waste" and urging the people to follow COVID-appropriate behaviour.

"This festival is, in a way, the beginning of another major war against corona. We have to lay special emphasis on personal hygiene as well as social hygiene," he said.

Five states — Maharashtra, Chhattisgarh, Karnataka, Uttar Pradesh and Kerala — cumulatively account for 70.82 per cent of India's active COVID-19 cases, while Maharashtra alone accounts for 48.57 per cent. The Union Health Ministry said.

Besides these states, Delhi, Tamil Nadu, Madhya Pradesh, Gujarat, Haryana, Rajasthan, Punjab, Telangana, Uttarakhand, Andhra Pradesh and West Bengal are displaying an upward graph in daily new cases.

Most of these states have reimposed restrictions, including the closure of schools, night curfew, weekend and local shutdowns, while ruling out a total lockdown, but as the latest wave of patients

continues to flood hospitals, there are some signs of a rethink.

Maharashtra Chief Minister Uddhav Thackeray and his Delhi counterpart Arvind Kejriwal have said that a lockdown will be the only option if the infections don't abate and the health system shows signs of lapsing. Kejriwal on Sunday said the COVID-19 situation in the national capital is "very serious".

The city recorded 10,774 fresh COVID-19 cases on Saturday, the highest single day spike so far, with 48 more fatalities. "The fourth wave is more dangerous than the previous wave," he told a press conference, and urged the people not to step out unless there is urgent work.

Speaking at an all-party meeting held virtually to discuss the COVID-19 situation in the State on Saturday, Maharashtra Chief Minister Uddhav Thackeray had indicated the imposition of a strict lockdown in the State if the alarming rise in COVID-19 cases.

Focus on micro containment zones to curb Covid march: Modi to K'taka CM

PNS ■ NEW DELHI

Prime Minister Narendra Modi on Sunday suggested to Karnataka Chief Minister S Yediyurappa on focusing on "micro containment zones" to contain the spread of Covid-19 infection in the State.

Karnataka has seen a surge in Covid-19 cases since the beginning of this month and is reporting nearly 7,000 fresh cases per day for the last couple of days.

The Chief Minister who spoke to the Prime Minister said that the latter also appreciated the state government's efforts to counter the second wave of Coronavirus pandemic.

"Spoke to Hon'ble Prime Minister Shri @narendramodiji and apprised him about the measures being taken in the state to mitigate second wave of pandemic. PM appreciated the Government's efforts and suggested to focus on micro containment zones to contain the spread of infection," Yediyurappa tweeted.

After the video conference with Modi, Yediyurappa on Thursday had announced a corona curfew between 10 PM to 5 AM in seven district centres of the state along with a strict lockdown in the State targeted to controlling the fast spread of COVID-19.

Until Saturday the total number of active cases in the

state stood at 61,653.

The Chief Minister also appealed to the people, those eligible to get vaccinated.

"Vaccine is the biggest weapon available to us in this battle against Covid-19. I urge all eligible citizens to get vaccinated and also encourage people around you to get vaccinated. Let us continue to stay protected by wearing masks and following social distance," he said in another tweet.

As suggested by the Prime Minister at Thursday's video-conferencing with various Chief Ministers, the State Government is organising vaccination drives from April 11-Jyotiba Phule's birthday till April 14- Ambedkar's birthday.

Enhance peacekeeping budget: Army chief to UN

PTI | DHAKA

Indian Army chief Gen MM Naravane on Sunday urged the United Nations to enhance the budget for its peacekeeping missions and emphasised the need to provide appropriate logistics and improved technological support for the blue helmet missions in view of the emerging challenges.

Gen Naravane, who is here on a five-day official tour, delivered a keynote address on "Changing Nature of Global Conflicts: Role of UN Peacekeepers" during the "Army Chiefs Conclave" hosted by the Bangladesh counterpart Gen Durrani Bhan, among others attended the conclave.

Senior diplomats, security strategists and police officers also attended the seminar. During the event, the Indian Army chief interacted with the senior officers of participating nations and military observers from the other nations.

Moment told the conclave that the nature of peacekeeping operations in recent periods transformed both in terms of scale and scope for what "peacekeeping missions today are more than ever before. The operations are no longer confined to the UN blue helmet missions, pointing out their emerging challenges. He said the

UN peacekeeping missions should run on a participatory basis.

The Bangladesh Army hosted the conclave coinciding with the celebration of the birth centenary of the country's "Father of the Nation" Bangabandhu Sheikh Mujibur Rahman and the golden jubilee of its 1971 independence.

Force commander of UN multidimensional integrated stabilisation mission in Mali Lieutenant General Dennis Gyllensperger, force commander of UN multidimensional integrated stabilisation mission in the Central African region Lieutenant General Siddi Daniel Traore and Bhutan Army's deputy chief of operation Brigadier General Durrani Bhan, among others attended the conclave.

Senior diplomats, security strategists and police officers also attended the seminar.

During the event, the Indian Army chief interacted with the senior officers of participating nations and military observers from the other nations.

Moment told the conclave that the nature of peacekeeping operations in recent periods transformed both in terms of scale and scope for what "peacekeeping missions today are more than ever before. The operations are no longer confined to the UN blue helmet missions, pointing out their emerging challenges. He said the

The changing situation further expanded the missions' responsibility

taking into account "other dimensions of peace, such as establishing rule of law, protection of human rights, protection of women and children, support to political process, managing elections, reintegration and socio-economic development," he said.

The conclave was held as part of a multilateral UN-mandated counter-terrorism exercise, Shantiy Orogosha (Front-runners of Peace) that commenced on April 14. Indian Army contingent of 30 personnel are participating along with the Royal Bhutan Army, Sri Lankan Army and Bangladesh Army in the exercise that will conclude on Monday.

Military observers from the US, UK, Turkey, Saudi Arabia, Kuwait and Singapore are also attending the exercise. The aim of the exercise is to strengthen the procedures and enhance interoperability amongst neighbouring countries to ensure robust peacekeeping operations in the region. The armies of the participating nations shared their valuable experiences and refined their drills and procedures in peacekeeping operations.

The visit of Gen Naravane, who is here at the invitation of his Bangladesh counterpart Gen Aziz Ahmed, comes at a time when the Indian Prime Minister Narendra Modi travelled to the neighbouring country.

EXPLOSIVE-LADEN SUV-HIRAN MURDER CASES

NIA arrests Vaze's associate Kazi, suspects he destroyed evidence

TN RAGHUNATHA ■ MUMBAI

In the fourth arrest in the twin explosive laden SUV planting and alleged Mansukh Hiran murder cases, the National Investigation Agency (NIA) on Sunday took Assistant Police Inspector (API) Riyazuddin Kazi, a close associate and colleague of incarcerated police officer Sachin Vaze, into custody.

Shortly after he was arrested on Sunday, Kazi was produced before a special NIA court, which remanded him to the custody of the agency till April 16. Kazi's arrest came after several rounds of questioning by the NIA over the past three weeks.

Kazi was directly working under Vaze, an API heading the investigation unit (CIU) of the Crime Branch-CID of Mumbai Police.

The NIA is looking into Kazi's role in the planning of a Gelatin sticks Laden Scorpion and a threatening letter inside the vehicle, in the vicinity of Mukesh Ambani's 27-storey residence "Antilia" on Carmichael Road in south Mumbai on February 25 and the subsequent alleged murder of Thane businessman Mansukh Hiran. Hiran's body was recovered from the marshy Reti-Bunder creek Mumbai in the neighbouring Thane district on March 5.

The NIA suspects that acting allegedly at the behest of Vaze, Kazi might have destroyed evidence in the case and procured fake vehicle number plates with forged alleged number plates.

Vaze had earlier this week created a sensation by making a written submission before the special NIA Court accusing Deshmukh and another Maharashtra Minister Anil Parab of asking him to indulge in extortion.

Vaze who was arrested on March 13 in connection with the gelatin sticks laden Scorpion recovery

case, was earlier booked under sections 120 (B) (criminal conspiracy) 286 (negligent conduct with respect to explosive substance), 465 (forgery) 473 (making or possessing counterfeit seal) and 506 -2 (criminal intimidation) of the Indian Penal Code (IPC) and 4 (a)(b)(i) of the Explosive Substances Act, 1908.

Vaze was subsequently booked under sections 16 (Punishment for Terror act) and 18 (Punishment for conspiracy etc) of the stringent Unlawful Activities Prevention Act (UAPA).

On its part, Maharashtra's Anti Terrorism - which initially investigated the circumstances leading to the alleged murder of Hiran -- had on March 21 arrested convicted Mumbai Police constable Vinayak B. Shinde (51) and a cricket bookie Nares R. Gaur (31) in connection with Hiran's alleged murder. The arrest of Shinde and Gaur came a day after the Union Home Ministry asking the National Investigation Agency (NIA) to take over the investigations into the murder of Hiran.

Shinde and Gaur are said to be accomplices of Vaze. Shinde is a dismissed policeman who has been convicted in the case involving the fake encounter of Ramnarayan Gupta alias Lakhnan Bhaiya. Bhaiya was killed in a fake encounter on November 11, 2006. In 2013, a Mumbai sessions court had awarded life sentences to 21 people, including Shinde and 12 other Mumbai Police personnel, convicted in the case.

Shinde has been accused of the murder of Hiran as the AS has revealed that Shinde was in regular touch with Vaze and helped the latter in his activities.

During the investigations that followed, the NIA seized from Shinde and Gaur two mobile, one iPhone, 7 SIM cards, a blank cover of SIM card, a note with 14 mobile numbers mentioned including 5 in the name of arrested-suspected cop and prime accused Sachin Vaze with 'Ok' written (for activation) beside them.

UP man held for announcing reward on priest's head

ANS ■ MEERUT

The Meerut police has arrested a youth for allegedly announcing a reward for killing a controversial priest of a temple in Ghaziabad's Dasna area.

The man, Danish Al, a resident of Meerut, had uploaded a video on a social media platform saying that anyone who beheads the controversial priest, will get a reward of Rs 51 lakh.

The priest, Yati Narsinghanand Saraswata, had issued a controversial statement against the Prophet, for which the Delhi Police booked him for hurting religious sentiments.

The statements were made at a press conference at Delhi Pradesh. Danish Al, he had been arrested on the video purportedly saying, "I will sell my property, jewellery, everything I have and will arrange Rs 51 lakh."

Though Danish did not name the priest, he was booked by him as the 'priest of the Dasna temple in Ghaziabad'. Meerut's Superintendent of Police (SP) Vineet Bhatnagar said, "We have arrested Danish Al. We have also seized the mobile phone through which he had made the controversial announcement."

World's richest Malayali, wife escape unhurt as their chopper crash-lands

KUMAR CHELLAPPAN ■ KOCHI

M A Yusuf Ali, the richest Malayali in the world, (net worth \$4.8 billion) and his wife had a miraculous escape from an air crash on Sunday morning at Kochi. The helicopter ferrying them to a hospital owned by Yusuf Ali made a force landing in the marshy area along the Kochi-Thiruvananthapuram National Highway.

There were five persons in the chopper including the Alis and all were brought out of the sleeky flying machine once the rotors came to a standstill.

The pilot and Ali suffered some minor injuries and were rushed to the Lakeshore Hospital for first-aid. All are safe and hearty, according to sources in the hospital. According to eye witnesses who watched the low flying chopper force landing in the

marshy stretch, there was heavy wind and rains when the incident happened.

An enquiry has been ordered into the incident.

Yusuf Ali who owns the Lulu Group business empire is a close friend of Chief Minister Pinarayi Vijayan and other top CPI(M) leaders in the country. The business tycoon enjoys cordial ties with leaders of all political parties, though the Marxists in the State visit the oil kingdoms in West Asia as the guests of Ali who have built a vast business empire in the Arab nations in Asia, Africa and Europe.

Yusuf Ali, who owns a fleet of executive jets and helicopters, had been awarded Abu Dhabi Prize, the country's highest civilian honour, on Friday by crown prince Sheikh Mohammed Bin Sayed Al Nahyan.

Navreh celebration in J&K from today

TN RAGHUNATHA ■ MUMBAI

Jammu: Sanjeevani Sharda Kendra, Bohri, Jammu in association with more than one hundred and twenty five Kashmiri Hindu organisations globally has formulated a three-day programme from 12 to 14 April, 2021 with the intention to celebrate Tyaga, Sankalp and Shaurya Divas and urge the Kashmiri Hindus to take a pledge for returning to their homeland on the auspicious occasion of Navreh.

The celebrations were expected to culminate with a virtual address by Sarsangchalak Rashtriya Swayamsevak Sangh, Dr Mohan Bhagwat. Now it is not clear whether Dr Bhagwat would be able to address the august gathering as he has been admitted in the hospital in Nagpur after he tested positive for Covid-19.

According to a press statement issued by the Sanjeevani Sharda Kendra, the Navreh celebrations will commence on 12th April, 2021 with the Tyaga (Sacrifice) Divas in the memory of the Shriya Bhat. The Indian history records the great contribution in saving Hindu culture by a Kashmiri Pandit Shriya Bhat, as early as the 15th century.

Shriya Bhat was able to cure a dreadful disease of Sultan Zainulab-Din-Und and was offered enormous wealth and property. But Shriya Bhat instead negotiated for the safety and security of Kashmiri Hindus and their religious places.

On April 13, Navreh (first day of New Year) is being celebrated as Navreh Sankalp Divas. Globally all Kashmiri Hindus shall take a solemn pledge.

On 14th April, 2021 the Shaurya Divas will be celebrated in the honour of the great 8th century King of Kashmir, Lalitaditya Muktapada for his valour and victory over Turks.

Sanjeevani Sharda Kendra has already released an audio and video of a song on Navreh Celebrations composed by Dr. Kuldeep Raina Sudeshi, written by Sunita Raina Pandit, sung by Lovely Chandra and Vishal Pandita and video edited by Pardeep Pandita.

Departmental probe against Param Bir

TN RAGHUNATHA ■ MUMBAI

Less than a fortnight after the Maharashtra High Court judicial probe under retired High Court Judge Kailash U Chandalvi into allegations of corruption against former State Home Minister Anil Deshmukh, the Maharashtra Government has ordered a departmental probe against Mumbai's former police commissioner Param Bir Singh.

"API Sachin Vaze never reported to any officer of the Crime Branch during his tenure of nine months from October 2019 to 12/03/2020. No officers of the Crime branch gaver any review/opinion/direction in the investigation handled by Sachin Vaze because he directly reported to the then Commissioner of Police," the report stated.

"As per oral orders of the then commissioner of police, the then joint commissioner of police (crime) transferred police inspector Vinayak Bhatnagar to the Crime Branch of Deshmukh to Unit 10 and Unit 1, respectively and Vaze was posted in-charge of CIU," the report stated.

"Vaze has not followed the rules and he directly and independently reported to the then CoP (Singh) and he investigated under his guidance... was following the guidelines of (Singh) about raid on illegal activities, whom to arrest or not, to call whom as witness and accused or sensitive crime," the report stated.

Vaze, who jumped on his own into the investigations involving the recovery of explosive laden SUV near industrialist Mukesh Ambani's skyscraper mansion in south Mumbai on February 25, took up points of the CIU in remands, bail, anticipatory bail pleas and other critical decisions, and if he required manpower for various investigations, it was given as per Singh's direction," the report stated.

As the in-charge of CIU, Vaze handled sensational cases like TRP rigging scam, the Anvay Nait suicide case and the death of her mother Komud Nait.

TN logs 6,618 fresh cases

KUMAR CHELLAPPAN ■ CHENNAI

With 6,618 new persons getting diagnosed with Covid-19 on Sunday, situation in Tamil Nadu has turned grave all over the State. The state saw 22 persons succumbing to the pandemic till 7 pm on Sunday.

On Saturday, 5,989 persons tested positive throughout the State while the death toll on the single day stood at 23.

Chennai has to bear the brunt as the Metropolis registered 2,124 new cases on Sunday while the number of new persons diagnosed with the pandemic on Saturday stood at 1,977. As on Sunday, Chengalpatt, the neighbouring district saw 631 new cases getting admitted to the hospital.

Dr C V Krishnaswamy, eminent physician, boldly stated that situation was critical and grave in both Tamil Nadu and Kerala. "The ever increasing number of Covid-19 patients in these States are matters of concern. Both the State administrations should discuss with the medical fraternity and evolve a mechanism to prevent the spread of this pandemic," said Dr Krishnaswamy.

He also cautioned the doctors and policy makers about the impact the disease could cause on youngsters. "You forgot all those who are above 60 years of age. Their good days are over. What of concern is the complaints from youth who were afflicted with Covid-19. Those who came out of the ordeal have started complaining about weakness, loss of memory and stamina. Many persons who had the harrowing experience of Covid-19 are likely to face a series of medical issues," said the doctor. Dr Rajeev, ayurvedic physician from Kerala, too echoed the concerns of Dr Krishnaswamy. "Many persons, especially youth, are complaining loss of memory and stamina after attack by the Covid virus. This is an issue which has to be studied in detail because it is becoming detrimental to the future of the country," said Dr Rajeev.

Maha CM meets Covid task force, asks to prepare SOPs for lockdown

TN RAGHUNATHA ■ MUMBAI

Amid great indications that it might go in for a full-fledged lockdown to break the chain of the rapid infections across Maharashtra, Chief Minister Uddhav Thackeray on Sunday met the members of the Covid Task Force, his Cabinet colleagues and senior bureaucrats to make full-fledged preparations for the proposed lockdown.

At the meeting, the chief minister discussed with those present about the need for increasing vaccination, setting up oxygen plants, increasing Covid-19 beds, increased availability of Remdesivir injections and ensuring early vaccination of health workers across the state. The chief minister said that he would make one more request to Prime Minister Narendra Modi to increase availability of vaccines to Maharashtra.

During the course of the meeting, the chief minister asked the Task Force members and senior bureaucrats to prepare what he called "all inclusive" Standard-Operating Procedures (SOPs) to be followed during the proposed lockdown. In the SOPs, the factors stemming from experiences the state government had gained from handling the Covid-19 in the state during the past one year.

Among other things, the chief minister asked the state administration to explore ways to bring Oxygen cylinders in big way from the states like Gujarat, Karnataka and Kerala. "The availability is abundant availability of Oxygen. At the meeting, the task force members stressed on the need for reducing the excessive use of Remdesivir injections by Covid-19 patients in the state. "Nine five per cent of Covid patients get well through the use of Oxygen. It is abundant availability of Oxygen. At the meeting, the task force members stressed on the need for reducing the excessive use of Remdesivir injections by Covid-19 patients in the state. PAPER WITH PASSION

Shot shortage

Amid a plethora of issues, from safety to availability, the second wave of pandemic has hit India hard

India seems to be back to square one where fighting the pandemic is concerned, with more than 70 vaccination centres in Mumbai having shut down after running out of the COVID doses. Other parts of the country, too, like Punjab, Rajasthan, Delhi and Uttar Pradesh, are facing a shortage of the coveted shots. And this shortage is being faced despite there being major vaccine hesitancy in the country and the inoculation drive still not open to all. How massive the shortage would become if the Government decides to vaccinate all citizens is anybody's guess. When the pandemic began over a year ago, India was faced with the harsh reality of a poor healthcare infrastructure, shortage of hospital beds, ventilators, healthcare professionals, sanitisers, drugs and the know-how regarding the handling of the contagion. However, to the Government's and India Inc's credit, our "jugaadu" spirit kicked in and we overcame all these shortages by manufacturing everything in India and even reached a point where we began exporting PPEs, sanitisers and so on. Even where the vaccine was concerned, we surprised the world by coming out with two vaccines; in fact, India began gifting or selling vaccines to countries around the world. All this was done parallel to our own ambitious countrywide vaccination drive. As the first wave of the outbreak seemed to subside, it gave the Centre's vaccine diplomacy a shot

in the arm. It looked like we had it all under control, till the second wave hit.

Now, it seems that we have not learnt any lessons from the first wave and prepared ourselves better to handle the inevitable second wave, which empirical evidence suggests is always worse than the first one. So not only are we again facing a bed and oxygen shortage, we are beginning to fall short of the vaccines as well. A political slugfest has broken out over the issue with Maharashtra alleging that the Centre was "discriminating" against the non-BJP ruled States and the Government, for its part, accusing the States of having a lackadaisical attitude. A hectic debate is also on within the country whether charity should begin at home and the Government should have ensured that all of its citizens were covered first before exporting the shots. After all, even the US, the leader of the free world, has banned all exports until it vaccinates its own citizens. Be that as it may, the fact that we were not prepared to handle the inevitable second wave is a collective failure: Of the healthcare system, the policy planners, the bureaucracy, the Centre, States and the people as a whole. To make matters worse, some European regulators are talking about a possible link between the AstraZeneca vaccine (available in India under the brand name Covishield) and some rare occurrences of blood clots. Though the Indian panel on 'adverse event following immunisation' is studying the safety of Covishield, it will be some time before it gives its verdict. So, for now, it remains to be seen how our ingenuity gets us out of this jam.

Deliverance

Uttarakhand has decided to free 51 shrines from the Govt's control and hand these back to the priests

In a politically sensitive development ahead of the Uttarakhand Assembly elections in February 2022, Chief Minister Tirath Singh Rawat-led BJP Government has overturned his predecessor Trivendra Singh Rawat's decision enabling the Government to take over the management of 51 prominent temples and shrines. Trivendra's argument had been that the new Act would help in the professional management of these shrines. The Act paved the way for setting up the Devasthanam Board, which was chaired by the Chief Minister. The Board was meant to control the management of renowned temples such as Badrinath, Kedarnath, Gangotri and Yamunotri; the annual pilgrimage to these temples is popularly called the Char Dham Yatra and is a money-spinner not only for the temples but also for allied businesses like the travel, hotel and tourism industries. In 2019, over three million people visited the four shrines, though 2020 was a damp squib owing to the COVID outbreak. Most worryingly for the seers, the Act had the provision to sack a priest found involved in any "wrongdoing". It had been a long-pending demand of these *teerth purohiths* (pilgrimage priests) that the Government roll back its decision as, they pointed out, they have been managing for generations the affairs of these temples, which were set up by their ancestors.

Now, though it can't be truthfully claimed that everything was hunky-dory at these religious establishments when their affairs were being managed by the respective *teerth purohiths*, there's also no denying the fact that the State Government's move must not have spawned from any idea of piouness or welfare for the pilgrims, who descend on the hill State from across the length and breadth of the country. It is true that the infrastructure at the halting places leading to these places of worship is in a dilapidated condition and excessive commercialisation there has massively added to the nature's burden, the result of which we all saw in the tragic Kedarnath flash floods of 2013. However, the Government didn't stir all along to ameliorate the pathetic conditions. We would suggest that rather than taking extreme positions, let the temple management remain with the *teerth purohiths* but, at the same time, the Government should keep an eye on them and the way they run the temple affairs and oversee the upkeep, facilities and amenities there.

Of Sri Lanka and the Andamans

The issues between Sri Lankan Tamils and the Sinhalese may be resolved if India concurs to transfer the former to the Andamans

PRAFULL GORADIA

Two communities not being able to coexist is a perennial problem in the Indian subcontinent. An old saying goes, "Ek myaan mein do talwarein nahi reh sakti", meaning two swords cannot fit into one scabbard. The problem began by being underscored in our own India, which was divided into Pakistan for Muslims and Hindustan for the rest. MA Jinnah argued that Hindus and Muslims were two separate nations and could not coexist. The first leader to push this two-nation thesis was Sir Syed Ahmad Khan of Aligarh fame.

Some UP Muslims believed their new country, Pakistan, was a new Medina. Muslims in the western wing despised eastern Bengalis as inferior, short and dark. Their economy was exploited from day one. Jinnah visited Dacca early in 1948 and peremptorily told university students that Urdu alone would be Pakistan's national language. Bengali, which they are proud of, was not in the reckoning. The two wings were daggers drawn from 1948; the clash came in 1971, in less than 24 years of the new Medina's birth. In December that year, they separated; Bangladesh was born.

Thus, India was divided into three. Now we hear that the people of Sindh wish to separate. This separatist movement is called "Jin Sindh". They are unable to exist under the yoke of the dominant Punjabis. Baluchistan is another unhappy province which was partly British India and partly the princely State of Kalat. It had an Embassy in Karachi until 1948 when Pakistan forcibly took it over. The Pathans of the North-West Frontier Province (NWFP) with their mad city, Peshawar, have always wished to unite with all Pathans in Afghanistan, though this demand is dormant now.

With Sri Lanka, it is an old problem. I visited my in-laws-to-be in Colombo in 1964 as they wanted to introduce me to their society in the city where they had lived and worked for 32 years. In the course of my four-day stay,

there arose the question of who would be the next managing director of the British Ceylon Corporation, a British firm similar to the one we had in Kanpur, the British India Corporation, until the early 1960s. My father-in-law said that one Ramaswamy, a local Tamil, was the ablest choice but was unlikely to get the promotion. The prize was likely to go to DM Pereira as he was a Sinhala. The existing Board of directors was largely British, headed by a distinguished gentleman called Singleton-Salmon. There was no partiality in the company but the emerging milieu in Colombo was such. Ramaswamy was likely to emigrate to Australia.

My father-in-law explained that the Sinhalese were an overwhelming majority, an easy-going, fun-loving Buddhist people. They were jealous of the Tamils who were serious at work, and more efficient. There had developed a wedge between the two groups as far back as then. Their differences were bound to explode sooner or later. The fact that the people of Tamil Nadu have a soft corner in their hearts for their Sri Lankan brethren is natural but

IF WE CAN OFFER A TRANSFER OF WILLING SRI LANKAN TAMILS TO THE ANDAMANS, INDIA'S ADVANTAGE WOULD BE POPULATING THE ANDAMAN ISLANDS, WHICH MAKES TAMILS' SURVIVAL SAFER, TAMIL NADU HAPPIER AND THE INDO-SRI LANKAN RELATIONS PERMANENTLY SUSPICION-FREE

that makes the Sinhalese suspect Indian intentions from time to time. When Rajiv Gandhi was India's Prime Minister and President JR Jayewardene headed Sri Lanka, we sent the IPKF military to help the Tamils. Instead of helping them, we only killed them and left the Sinhalese alone. This indicates that our Governments have mostly not understood Sri Lankan affairs.

Colombo's rulers smile at New Delhi and pretend to be friendly although they feel that the faraway yellow giant is less dangerous than the Indian giant, only 40 km to the north. They did appreciate the IPKF's help for some time; thereafter it became a distant memory. Lanka appears to have erred in owing China all the money for upgrading the Hambantota port as well as a highway from Colombo to Galle and further south. If Sri Lanka cannot repay the loan in time, these may be taken over as Chinese property. Yet Colombo would rather deal with Beijing than New Delhi. This mentality is likely to continue indefinitely until India takes a drastic step to relieve the Sinhalese of their Tamil

suspitions. From the Indian point of view, there is the fear, however remote, that one day the Chinese may convert Sri Lanka into a yellow colony.

What should New Delhi do? Consider whether we can offer a transfer of willing Sri Lankan Tamils to the Andaman Islands. They are a community of four million people, mainly in the Jaffna area in the northeast of Sri Lanka and some scattered across the east of the island. The Andamans occupy about 9,000 sq km with only about four lakh people. Not all Sri Lankan Tamils are likely to accept the transfer. For those willing, Sri Lanka should pay a total ₹2 lakh per head towards resettlement, convenience costs and compensation. This means several billion rupees for Sri Lanka to borrow or somehow fork out, but a small cost for solving their greatest problem. India's advantage would be populating the Andaman Islands, which makes Tamils' survival safer, Tamil Nadu happier and the Indo-Sri Lankan relations permanently suspicion-free.

LETTERS TO THE EDITOR

AMP UP VACCINE PRODUCTION

Sir — In a letter to Prime Minister Narendra Modi, Congress leader Rahul Gandhi has rightly questioned the Centre's decision to export COVID-19 vaccines. It seems that the export was also an oversight, like many other decisions of the NDA Government. It also cannot be denied that it was an effort to garner publicity at the cost of our own citizens.

The Government, before launching the world's largest vaccination drive should have calculated the domestic demand and supply. As several States are now alleging shortage of vaccines, it is time for the Centre to completely stop their export. India played the vaccine diplomacy card thinking that it was close to developing herd immunity. New Delhi wasn't granting or exporting vaccines to only the poor nations but also to the UK, Saudi Arabia and Canada. Despite India's stupendous efforts to vaccinate at a large scale, majority of the people are outside its purview. This is a situation when there exists an age criteria to get vaccinated. It's not hard to imagine the situation if this age limit is removed and everybody is allowed to get vaccinated.

The current situation might lead to an increase in the prices of vaccines or, if the pharmaceutical companies ramp up production without increasing the prices, the quality will definitely get compromised. The Centre and State Governments must give up politics and find an amicable solution to this problem which will likely aggravate in the coming days if viable answers are not explored and worked upon.

Bhagwan Thadani | Mumbai

NEED TO TAKE IT SERIOUSLY

Sir — It should be a cause of worry for New Delhi that the US Navy recently carried out a Freedom of Navigation Operation (FONOP) in India's Exclusive Economic Zone (EEZ) without its prior consent to challenge India's "excessive maritime claims. According to the statement issued by the Commander of the US' Seventh

Nix the corruption in Maharashtra

I refers to the editorial "Tightening the screws" (April 10). I fully concur with the editorial view that the Central Bureau of Investigation (CBI) and the National Investigation Agency (NIA) should work in tandem to unravel the Anil Deshmukh and Sachin Vaze maze. If tainted police officials and politicians can work hand-in-glove, then why not the sleuths? The revelations made by arrested police officer Vaze are disturbing. It shows

how rotten our whole system is and there is an open lot of public money. It seems that things like extortion, killings, transfer of honest officials, nepotism or using political influence to get Government contracts have become the order of the day in Maharashtra. Not only this, it can also not be denied that the links of corrupt police officials like Vaze and politicians like Deshmukh must be with Maoists or terrorists, else from where the gelatin sticks used in Antilla bomb scare case came?

Both the agencies must also focus their investigation on these lines. Corrupt politicians when in power at the State or the Centre give patronage to criminals and anti-social elements in a *quid pro quo* such that they may use them as and when required. Nothing could be more shameful for the Maharashtra Government than the recent happenings and the alleged involvement of Deshmukh in grave corruption. It must be investigated properly and the accused should not be spared.

Abhishek Singh | Varanasi

Fleet, the operation was conducted by guided-missile destroyer USS *John Paul Jones* on April 7 and is consistent with the international law. The Ministry of External Affairs responded that the Government's stated position on the UN convention on the Law of the Sea (UNCLOS) is that the Convention does not authorise other States to carry out operations in the EEZ. What is shocking is that it came at a time when India and the US are trying to strengthen their ties and working in close cooperation in Quad for and in open Indo-Pacific. US President Joe Biden's "tough talk" on China shows that Washington sees Beijing as its rival. However, the recent US misadventure can harm its good rapport with New Delhi.

TV Jayaprakash | Palakkad

The Coronaviruses cases as we have lowered our guard and are not following the guidelines. People must understand that it is necessary to break the chain of transmissions to curb the spread of the Coronavirus.

The vaccines are no panacea. Not following the appropriate COVID-19 behaviour is not just laxity but is a criminal act as it is a major reason for the surge. After the vaccination programme kickstarted, people felt they should not wear masks. Many people hang their masks around their neck, some keep it in their pocket and some do not use it at all. It is only after such gross negligence and laxity on the part of people that Coronaviruses cases have started increasing.

Jubel D'Cruz | Mumbai

NO REASON TO LOWER GUARD

BUILD RESILIENT INFRASTRUCTURE

This can give the impetus to meet climate commitments while making contributions to post-COVID recovery

RIYA RAHIMAN

Countries have been grappling with the impact of climate change and extreme events as they pose various risks to people, infrastructure, economies and future development. A significant proportion of the economic losses due to extreme events is attributed to the loss and damage to infrastructure systems, thereby stressing the need for integrating disaster and climate resilience for infrastructure development. In the case of the COVID-19 pandemic, we have witnessed an unprecedented impact on infrastructure sectors worldwide. Even though it has not led to direct damages to physical infrastructure, it led to interruptions in infrastructure services, with significant implications on economies. The outbreak is the latest reminder of the need to invest in resilient infrastructure. It exposed systemic risks across various sectors and underlying drivers such as poverty, poor health systems and limited social welfare schemes that perpetuated them. The risks cut across different sectors and strongly brought out the imperative to understand and address systemic and cascading dangers and fragilities.

As part of global recovery, infrastructure investments are being looked at as an indispensable part of stimulus packages aimed at restarting economic activities. Countries are expected to invest heavily in infrastructure sectors as an attempt to mitigate the impacts of the economic fallout as well as create employment and improve competitiveness simultaneously. While the health and economic implications take centre stage when planning for COVID-19 recovery, the urgency of the climate emergency cannot be ignored. The pandemic has clearly brought out the need to focus on managing systems risks for strengthening resilience, a lesson one must heed, to make headway against climate change as well. With countries submitting their national climate action plans as part of the Paris Agreement, this is a crucial year for climate action as well. It is vital that the post-COVID recovery and climate action plans complement each other.

Studies show that infrastructure construction and operations account for 70 per cent of global greenhouse gas emissions and the provision of quality infrastructure underpins the achievement of 92 per cent of targets across all Sustainable Development Goals (SDGs). The Sendai Framework for Disaster Risk Reduction (SFDRR) also highlights the role of resilient infrastructure as a cornerstone for sustainable development. The four specific targets relate to loss reduction in SFDRR, focus on cutting global disaster mortality, the number of affected people, economic loss and damage to infrastructure. However, the SFDRR target on reducing damage to critical infrastructure is an important prerequisite for achieving the three other targets on loss reduction. In view of this, infrastructure investments and policies to bolster economies should be leveraged as an opportunity to deliver on global commitments such as the Paris Agreement on Climate Change, SDGs and the SFDRR targets. Though some progress has been made on the SDGs and the SFDRR target, the overall action to meet them has not advanced at the required pace. The pandemic has further pushed back their progress. The COVID-19 recovery can be utilised as an opportunity to progress on these global goals and build a healthy, inclusive and climate-friendly future. Investing in disaster and climate-resilient infrastructure can provide the much-needed impetus in meeting global commitments while also making contributions to post-COVID recovery.

Quaking over Iran's phantom nuclear weapons

There are many countries that already had nukes when they signed the nuclear Non-Proliferation Treaty. They have obligations, too. How are they doing?

First, the good news. The US and Iran had talks in Vienna on Tuesday, and the nuclear deal they and all the other great powers signed in 2015, is coming back. It's not exactly back yet. After then US President Donald Trump unilaterally pulled out of the treaty in 2018 and re-imposed harsh sanctions on Iran, the Iranians retaliated by slowly deviating from their own commitments under the deal one baby step at a time. So now there has to be an agreement on a timetable for unwinding those steps as well as cancelling the US sanctions.

On a better run planet, the US special envoy for Iran, Rob Malloy, would just declare that all the US sanctions on Iran wrongly put in place by the discredited Trump Administration are

cancelled as of today. The Iranian delegation, led by Deputy Foreign Minister Abbas Araghchi, a veteran of the 2015 talks, would reply that Iran will immediately return to compliance with all the terms of the treaty and invite UN inspectors to verify that all its temporary deviations from treaty obligations over the past three years have been reversed. And we would all live happily ever after.

However, in the real world it is not so. The negotiators in Vienna are not even in the same hotel. All the countries that are still observing the treaty (China, France, Germany, Iran, Russia and the UK) are in one hotel, and the American mission is in another, with messages going back and forth between the two parties. Porcupines mate with less difficulty, but there

has already been some progress. The United States knows that, in order to get back into compliance, it's going to have to lift those sanctions that are inconsistent with the deal that was reached with Iran," said Rob Malloy. The Iranian Government's spokesman Ali Rabiei replied that he "saluted" Malloy's remarks. "We find this position realistic and promising," he added.

Two working groups have been set up that include American representatives, with the task of choreographing reciprocal moves by the US and Iran to return to the treaty and a target of full compliance by both sides within two months. Just in time for Iranian moderates to claim credit for ending the US sanctions a week or so before the June election.

So that's probably sorted, but what about all the countries that actually do have nuclear weapons? Iran originally got into trouble because it signed the Nuclear Non-Proliferation Treaty (NPT) in 1970 and later tried to get nuclear weapons anyway, but the countries that already had nukes when they signed the NPT have obligations, too. How are they doing? The NPT states that "nuclear-weapons States agree to...pursue nuclear disarmament aimed at the ultimate elimination of their nuclear arsenals." But it has been a long pursuit and 50 years later not one of them has actually managed to catch the damn thing.

The US has got turned around somehow and is pursuing in the wrong direction. It's in the midst of a trillion-dollar-plus "upgrade" of its nuclear forces, including a new generation of land-based intercontinental ballistic missiles (ICBMs) and new submarine-launched cruise missiles.

According to President Vladimir Putin, Russia has developed nuclear-powered cruise missiles and torpedoes with unlimited range, a hypersonic vehicle called Avangard to deliver nuclear weapons at a low level and ultra-high speed, and a new ultra-heavy ICBM called

'Sarmat' that is able to carry even more and bigger warheads (10-15) over a longer range (18,000 km.) There have also been reports of a new nuclear-powered drone torpedo that is capable of delivering a 100-megaton warhead (biggest ever tested was 50 megatons) over a range of 10,000 km. Then it would explode off an enemy's coast to create a tsunami wave 500 metres tall to inundate the coastal regions with highly radioactive water. But maybe this one is fiction.

Then there's Little Britain with its four submarines that carry nuclear-tipped missiles. Prime Minister Boris Johnson recently announced that he was increasing the number of warheads they carry from 180 to 240, but it doesn't really make much of a difference. Traditionally the UK's strategy is "no first use", which means Britain's retaliation would be on cities, not on empty silos. So you're just bouncing the rubble after the first few dozen warheads explode. That's probably why Johnson broke with tradition and said that Britain might use nuclear weapons in response to non-nuclear attacks, including even cyber attacks. One way to compensate for not really being very dangerous is to sound very reckless.

The big tent of the PPP decoded

Pragmatic centrism and the need to remain a bridge between Sindh's electorate and the political fruits of federalism may help explain why the PPP made a grab for the Senate

NADEEM PARACHA

The nutshell identity of the Pakistan Peoples Party (PPP) is still slotted on the left side of the conventional political divide. But over the decades and, especially after the end of the Cold War in 1991, the nature of this divide has continued to transform. According to Richard Gunther and Larry Diamond in the 2003 issue of the *Journal of Political Parties*, by the 1990s, the mainstream Right and Left of electoral politics had become the *status quo*, which began being challenged by new "anti-status quo" groups. Gunther and Diamond write that the roots of large electoral Right/Center-Right parties can be found in the 19th century, when they emerged as a reaction to monarchism or parties entirely driven by the aristocratic elite.

Ironically, this means that what evolved to become mainstream Right parties in the 20th century were originally on the Left in the 19th century because they represented the interests of the emerging middle classes that advocated capitalism, individualism and religious freedom and/or "classical liberalism."

Once such parties succeeded in becoming part of the new *status quo*, they began to be challenged by parties stressing the need to regulate capitalism through various variations of socialism. Therefore, the latter came to be understood as electoral outfits that were on the left of the established classical liberal parties, which were now slotted on the right side of the divide.

In his book *Sociologie Politique*, French sociologist M Duverger writes that, because of the challenges posed by socialist parties, some classical liberal parties appropriated religion to expand their appeal but remained rooted in the post-19th century secular political paradigm. The Conservative Party in Britain, the Republican Party in the US and the Christian Democratic parties in Europe can be seen as examples of this. The mainstream Left parties were quick to adopt the same. Eventually, large parties on both sides of the divide became what are called the "big tent" or "catch-all" parties.

These parties retain an ideological core, which can be Left or Right, but they position themselves toward the Centre of the spectrum, appearing moderate in their policy preferences. "Big tent" parties become platforms for varied political players as long as they have even a semblance of recognition of the party's core ideological purpose. However, it is pragmatism that becomes the overriding nature of "catch-all" parties.

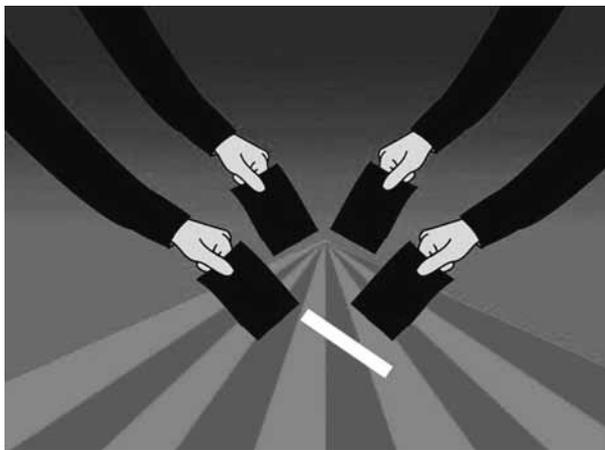

The PPP was formed in 1967. It was initially conceived by the Marxist intellectual JA Rahim as a vehicle for the charismatic politician ZA Bhutto. The 39-year-old Bhutto had been part of the Ayub Khan dictatorship but was ousted from the Cabinet in 1966. Bhutto positioned himself as the man who had "stood up to a dictator." This gained him traction with university and college students.

According to Rahim's analysis, the Ayub regime's economic policies had accelerated the radicalisation of Pakistan's bourgeoisie, widened the gap between the rich and the poor, and an organised socialist party was not only the need of the hour, but would also be able to fill the vacuum created after Ayub's inevitable departure.

IN PAKISTAN, BECAUSE OF CERTAIN OVERARCHING INTERNATIONAL ECONOMIC SHIFTS, THE MOOD WAS CLEARLY SHIFTING TO THE RIGHT. IN THE SECOND HALF OF BHUTTO'S TENURE, THE REGIME TRIED TO APPROPRIATE THIS MOOD AND, BY THE TIME THE GOVERNMENT FELL IN 1977, THE PARTY BELIEVED IT HAD OVERTAKEN THE FAR-RIGHT ISLAMIST GROUPS THAT WERE OPPOSING IT

The writer is a senior journalist and columnist. The views expressed are personal. Courtesy: Dawn

A reading of the PPP's Foundational Papers makes it clear that, right from the onset, its founders saw the PPP as a "big tent" party modelled on established Social Democratic parties of Europe. Rahim believed that the country's bourgeoisie had begun their march towards a revolutionary phase, just as the European middle classes had done in the 19th century. Yet, at the time, a majority of Pakistanis lived in rural areas and the process of industrialisation, though rapid during the Ayub era, was still concentrated in just a few urban centres.

When the party was launched, it exhibited three main groupings: On the Left were Marxist student leaders, socialist intellectuals, trade unionists and peasant leaders. On the Right were "progressive" landed elite and in the Centre were what became to be known as "Islamic socialists", or those who appropriated Islam as a welfareist and socialist doctrine, as opposed to a theological expression of politics (*la Jama'at-Islami*).

During the 1970 elections, the party's "big tent" tactics were a success, aiding it to attract the majority of middle and lower-middle class votes, and the votes of small farmers and peasants in (West) Pakistan's two largest provinces,

Punjab and Sindh. In December 1971, the party suddenly found itself in power after the acrimonious departure of East Pakistan. The party's Left wing was more assertive during Bhutto's first year in power. But this assertion was stalled when Bhutto began perceiving the party's radical Left as agents of anarchy with a juvenile understanding of Marxism.

According to Gunther and Diamond, in an effort to expand their electoral appeal to a wide variety of groups, the policy orientations of "big tent" parties were eclectic and shifted with the public mood. In Pakistan, because of certain overarching international economic shifts, the mood was clearly shifting to the Right. In the second half of Bhutto's tenure, the regime tried to appropriate this mood and, by the time the Government fell in 1977, the party believed it had upstaged the far-Right Islamist groups that were opposing it.

But it seems that the party did not go far enough and was toppled by an Islamist General. With its leader hanged in 1979, and in exile other major players either in or out of prison, the reins of the party fell in the hands of its lower-tier leadership. Bhutto's daughter Benazir was at the helm, but she

was under arrest. This was also when the party's leftist militant tendencies, which had been subdued by Bhutto, resurfaced. In 1986, however, fearing that the US would stall the party's return to power for being "too Left-wing", Benazir began to gradually push the party back towards the Centre.

This push continued through the 1990s, especially with the appearance of the Pakistani Muslim League-Nawaz (PML-N) as the "big tent" party of the Right. Under Asif Ali Zardari, the PPP has dug its heels deep in pragmatic centrism. Its electoral appeal in Punjab was neutralised by the PML-N and then the Pakistan Tehreek-e-Insaf (PTI). This has blocked its path to Islamabad as a ruling party.

The PPP continues to enjoy power and electoral traction in Sindh. But this traction is largely based on the fact that the Sindh speakers perceive the PPP as a bridge between them and the economic and political fruits of federalism. For this, the PPP needs to continue having a strong presence in federal institutions.

This is why it was important for Zardari to recently bag a majority in the Senate, even if he ended up upsetting his allies in the anti-Government Pakistan Democratic Movement.

Then it would explode off an enemy's coast to create a tsunami wave 500 metres tall to inundate the coastal regions with highly radioactive water. But maybe this one is fiction.

Myanmar forces kill 82 in single day

AP ■ YANGON

At least 82 people were killed in one day in a crackdown by Myanmar security forces on pro-democracy protesters, according to reports on Saturday from independent local media and an organisation that keeps track of casualties since the February coup.

Friday's death toll in Bago was the biggest one-day total for a single city since March 14, when just over 100 people were killed in Yangon, the country's biggest city. Bago is about 100 km (60 miles) northeast of Yangon. The Associated Press is unable to independently verify the number of deaths.

The death toll of 82 was a preliminary one compiled by the Assistance Association for Political Prisoners, which issues daily counts of casualties and arrests from the crackdown in the aftermath of the Feb. 1 coup that ousted the elected government of Aung San Suu Kyi.

Their tallies have generally been accepted as highly credible because cases are not added until they have been confirmed.

with the details published on their website.

In its Saturday report, the group said that it expected the number of dead in Bago to rise as more cases were verified.

The online news site Myanmar Now also reported that 82 people had been killed, citing an unnamed source involved with charity rescue work. Myanmar Now and other local media said the bodies had been collected by the military and dumped on the grounds of a Buddhist pagoda.

At least 70 protesters and

bystanders have been killed by security forces since the army's takeover, according to the Assistance Association for Political Prisoners.

The attack on Bago was the third in the past week involving the massive use of force to try to crush the persistent opposition to the ruling junta.

Attacks were launched Wednesday on hardcore opponents of military rule who had set up strongholds in the towns of Kalay and Taze in the country's north. In both places, at least 11 people — possibly

including some bystanders — were reported killed.

The security forces were accused of using heavy weapons in their attacks, including rocket-propelled grenades and mortars, though such allegations could not be independently confirmed by The Associated Press. Photos posted on social media from Bago appeared to show fragments of mortar shells.

Most protests in cities and town around the country are carried out by nonviolent

demonstrators who consider themselves part of a civil disobedience movement.

But as the police and military escalated the use of lethal force, a hardcore faction of protesters armed themselves with homemade weapons such as firebombs in the name of self-defense. In Kalay, activists dubbed themselves a "civil army" and some equipped themselves with rudimentary hunting rifles that are traditional in the remote area.

A report by Myanmar Now said residents of Tamu, a town in the same region as Kalay, used hunting rifles Saturday to ambush a military convoy, and claimed to kill three soldiers.

The junta has taken other measures as well to discourage resistance. It recently published a wanted list of 140 people active in the arts and journalism charged with spreading information that undermines the stability of the country and the rule of law. The penalty for the offense is up to three years' imprisonment.

Those on the list have been highly publicised in state media.

'Suspicious' blackout strikes Iran's Natanz nuclear site

Dubai: Iran's underground Natanz nuclear facility lost power Sunday just hours after starting up new advanced centrifuges capable of enriching uranium faster, the latest incident to strike the site amid negotiations over the tattered atomic accord with world powers.

As Iranian officials investigated the outage, many Israeli media outlets offered the similar assessment that a cyberattack darkened Natanz and damaged a facility that is home to sensitive centrifuges. While the reports offered no sourcing for the evaluation, Israeli media maintains a close relationship with the country's military and intelligence agencies.

If Israel caused the blackout, it further heightens the tensions between the two nations already engaged in a shadow conflict across the wider Middle East.

It also complicates efforts by the U.S. Israel's main security partner, to re-enter the atomic accord aimed at limiting Tehran's programme so it couldn't pursue a nuclear

This satellite photo from Planet Labs Inc. shows Iran's Natanz nuclear facility.

weapon if it chose. As news of the blackout emerged, U.S. Defense Secretary Lloyd Austin landed in Israel on Sunday for talks with Netanyahu and Israeli Defense Minister Benny Gantz. Power at Natanz had been cut across the facility comprised of above-ground workshops and underground enrichment halls, civilian

nuclear program spokesman Behrouz Kamalvandi told Iranian state television.

"We still do not know the reason for this electricity outage and have to look into it further," Kamalvandi said. "Fortunately, there was no casualty or damage, and there is no particular contamination or problem."

Asked by the state TV correspondent if it was a "technical defect or sabotage," Kamalvandi declined to comment. Malek Shariati Niasar, a Tehran-based lawyer who serves as spokesman for the Iranian parliament's energy committee, wrote on Twitter that the incident was "very suspicious," raising concerns about possible "sabotage and infiltration." He said lawmakers would investigate details of the incident as well. AP

GLOBE TROTTING

EX-B'DESH PM KHALEEDA TESTS COVID POSITIVE
Dhaka: Former Bangladesh Prime Minister Khaleda Zia tested positive for Covid-19 on Sunday, a year after she was released from jail temporarily amidst the pandemic, according to media reports.

RESCUERS FIND 4 DEAD FROM SPANISH IN ATLANTIC
Madrid: Spanish authorities said on Sunday that they had recovered the bodies of four migrants from a boat along with 19 survivors who had taken the treacherous route from West Africa to the Canary Islands. Spain's maritime rescue service said that its crews had responded to an alarm call by a fishing boat that had located the migrants in a flimsy craft unit for the high seas.

EQUADOR, PERU HEAD TO POLLS UNDER COVID WORNS
Lima, Peru: Ecuador and Peru chose new presidents Sunday under strict public health measures prompted by the coronavirus pandemic, which has recently strengthened in the neighboring South American nations. Ecuadorians face a runoff between a conservative businessman and a protégé of former leftist President Rafael Correa, while Peruvians have 18 options to pick from in the first round.

IRAN REPORTS HIGHEST DAILY DEATH TOLL OF 2021
Tehran: Iran on Sunday reported its highest single-day death toll from Covid-19 this year, bringing the country's total death toll to nearly 64,000, state TV reported. The 4,500 daily new deaths were recorded in 24 hours. Iran's deadliest day of the pandemic was in mid-Nov, when over 400 deaths were tallied.

20 HURT AS CHARIOT FALLS IN NEPAL
Kathmandu: Twenty people have sustained injuries after a chariot fell and clashes erupted during a religious festival in Nepal's Bhaktapur. "Bisket jatra", the chariot-pulling festival, started in Bhaktapur municipality, 16 km east of Kathmandu, on Saturday morning. Soon after the festival was declared open a chariot fell and clashes erupted.

UK: Shops, pubs gear up for easing of lockdown
London: Non-essential retail shops, including shopping malls, pubs and restaurants are gearing up to reopen their doors to customers from Monday, when England enters its next stage of Covid-19 lockdown restrictions being eased.

Indoor gyms, swimming pools, libraries, zoos and nail salons are also among the establishments now allowed to reopen, with pubs and restaurants required to strictly follow outdoor dining rules.

UK Prime Minister Boris Johnson had declared that he would be among the first people to order a pint of beer in a beer garden when the rules are relaxed. AP

Trump: The key to Republican success is more Trumpism

AP ■ PALM BEACH

Staking his claim to the Republican Party, former President Donald Trump is casting his populist politics and attack-dog politics as the key to future GOP success.

In a closed-door speech Saturday night to donors at his Mar-a-Lago resort, Trump also reinforced his commitment to the party's populist politics, prepared remarks obtained by The Associated Press.

His appearance came as Republican officials are trying to play down an internal feud over Trump's role in the party, which is in the midst of fundraising and his plans for 2024.

While Trump's advisers report he will emphasize party unity, he rarely sticks to script.

"The key to this triumphant future will be to build on the gains our amazing movement has made over the past four years," Trump told hundreds of leading Republican donors according to the prepared remarks.

"Under our leadership, we welcomed millions upon millions of new voters into the Republican coalition. We transformed the Republican Party into a party that truly fights for all Americans."

It was the final address of the Republican National Committee's weekend donor summit in Palm Beach. Most of the RNC's invitation-only gathering was held at a luxury hotel a few miles away; attendees were bused to Trump's club for his remarks.

Jordanian prince makes first public appearance since arrest

AP ■ JERUSALEM

Jordan's Prince Hamzah on Sunday made his first public appearance since he was placed under house arrest last week, attending a ceremony with King Abdullah II in what appeared to be an attempted show of unity on a major Jordanian holiday.

But it remained unclear whether the king and his popular half brother had put aside the differences that escalated last week into the most serious public rift in the ruling family in decades. Hamzah joined members of the Jordanian royal family marking the centenary of the establishment of the Emirate of Transjordan, a British protectorate that preceded the kingdom.

The royal palace released a photo and video with Abdullah, Hamzah, Crown Prince Hussein and other dignitaries at the grave of King Talal in Amman, Jordan's cap-

Iran calls blackout 'nuclear terrorism'

AP ■ DUBAI

Iran on Sunday described a blackout at its underground Natanz atomic facility an act of "nuclear terrorism," raising regional tensions.

Ali Akbar Salehi, the head of the Atomic Energy Organization of Iran, stopped short of directly blaming anyone for the incident. Details remained few about what happened early Sunday morning at the facility, which initially was described as a blackout caused by the electrical grid feeding the site.

Many Israeli media outlets offered the same assessment that a cyberattack darkened Natanz and damaged a facility that is home to sensitive centrifuges. While the reports offered no sourcing for the evaluation, Israeli media maintains a close relationship with the country's military and intelligence agencies.

If Israel caused the blackout, it further heightens tensions between the two nations, already engaged in a shadow conflict across the wider Middle East.

"To thwart the goals of this terrorist movement, the Islamic Republic of Iran will

continue to seriously improve nuclear technology on the one hand and to lift oppressive sanctions on the other hand," Salehi said, according to state TV.

He added: "While condemning this desperate move, the Islamic Republic of Iran emphasizes the need for a confrontation by the international body and the International Atomic Energy Agency against this nuclear terrorism."

Sunday's developments also complicate efforts by the U.S., Israel's main security partner, to re-enter the atomic accord aimed at limiting Tehran's programme so it can't pursue a nuclear weapon. As news of the blackout emerged, U.S. Defense Secretary Lloyd Austin landed Sunday in Israel for talks with Netanyahu and Israeli Defense Minister Benny Gantz.

Power at Natanz was cut across the facility, which is comprised of above-ground workshops and underground enrichment halls, civilian nuclear programme spokesman Behrouz Kamalvandi earlier told Iranian state TV.

This photo from the Royal Court twitter account, shows Jordan's King Abdullah II, centre, Prince Hamzah bin Al Hussein, second left, and others during a visit to the tomb of the late King Hussein, in Amman, Jordan on Sunday. AP

ital. It was the first time that Hamzah was seen in public since he was placed under a form of house arrest on April 3 following accusations that he was involved in a "malicious plot" to destabilise the kingdom.

In statements leaked to the media, Hamzah denied the accusations and accused the country's government of corruption and incompetence.

Abdullah subsequently said authorities had thwarted an attempt at sedition involving his half brother and some 18 suspects, while saying he was angry and in shock. Abdullah also suggested there was continued control over Hamzah's movements, saying the prince was "with his family at his palace, under my care."

Prince's death a 'huge void' for Queen: Andrew

PTI ■ LONDON

Britain's Queen Elizabeth II has described the death of her husband of 73 years, Prince Philip, as having left a "huge void in her life", their son Prince Andrew said on Sunday.

As he led a memorial service for his late father, the Duke of Edinburgh, who passed away aged 99 on Friday, Prince Andrew said his passing was a "terrible loss" and the family was grateful for all the messages of support and condolence.

"It's a great loss. We've lost almost the grandfather of the nation," Prince Andrew, also the Duke of York, told reporters.

"I feel very sorry and supportive of my mother, who's feeling while trying to promote body else. The Queen, as you would expect, is an incredibly stoic person and she described his passing as a miracle, and she's contemplating. She

Britain's Prince Edward, Sophie Countess of Wessex and their daughter Lady Louise Windsor, attend the Sunday service at the Royal Chapel of All Saints at Royal Lodge, Windsor, in England on Sunday. AP

described it as having left a huge void in her life. We as a family are rallying around to support her," he said, on being asked about his mother's emotions.

About his late father, he added: "He was a remarkable man. I loved him as a father. He was always somebody you could go to and he would always listen."

Chadians vote as Deby seeks to extend 3-decade presidency

AP ■ N'DJAMENA

Chadian President Idriss Deby Itno was widely expected to win re-election Sunday, extending his three-decade-long rule in this central African nation after three top opposition politicians chose not to take part in the vote.

Some polling stations closed early on Sunday, and the capital of N'Djamena, where streets are lined with giant portraits of Deby.

A constitutional referendum approved several years ago means he can now serve two more terms, potentially staying in power until 2033.

"I invite all Chadians to go to the polls to choose the candidate of their choice," the longtime president said after casting his ballot Sunday alongside his wife. "I have seen since yesterday that the boycott order has not been respected, so people must go out to perform their civic duties."

While running for a sixth time in this oil-producing country, Deby has campaigned on promises of building schools, paving roads and improving living conditions in this country that remains one of the least developed in the world. The top opposition candidate remaining in the race is Albert Pahimi Padacke, a one-time Deby ally who served as prime minister from 2016 to 2018.

Five other lesser known candidates are also taking part, including one that has publicly accused Deby's party — the Patriotic Salvation Movement, or MPS, of using state resources to campaign.

US-Philippines officials discuss concerns over China's ships

AP ■ ABOARD A US MILITARY AIRCRAFT

Defense Secretary Lloyd Austin on Saturday discussed with his Philippine counterpart China's recent positioning of "militia vessels" near the Philippines in the South China Sea.

Austin spoke by phone with Philippine Secretary of National Defence Delfin Lorenzana while Austin was flying from Washington to Manila to begin an international trip.

Pentagon press secretary John Kirby said Austin and Lorenzana also discussed the situation in the South China Sea and the recent massing of Chinese vessels at Whitsun Reef, which has drawn criticism from Manila.

OVER 2,000 YEARS ON Sanskrit remains popular in China: Chinese Professor

PTI ■ BEIJING

Sanskrit studies are flourishing in China, over 2,000 years after the ancient Indian language was brought to this country along with Buddhism, making a profound impact on Chinese monarchs and scholars over the centuries, according to a distinguished professor here.

Wang Bangwei, a well-known Chinese scholar in Sanskrit and Director of Sino-Indian Buddhist Studies, Institute of Oriental and Indian Studies at the Peking University, said Sanskrit which is the root of Indian culture continues to remain popular in China, contrary to its modest progress in modern India.

Wang said the Peking University is one of the oldest in China and this year marks

the completion of 100 years of teaching Sanskrit at the leading varsity. Wang credited 4th Century AD Indian scholar Kumarajiva for spreading Sanskrit in China.

Kumarajiva was instrumental in translating Buddhist sutras into Chinese language during his stay in China over 2,000 years ago, earning the royal title of "National Teacher of China." He was the first among numerous scholars who laid a firm foundation for civilisation links between the two countries.

Kumarajiva, hailing from a Kashmiri Brahmin family from the then Kucha Kingdom, spent about 23 years in China in the 4th century AD both as a prisoner and as a most revered scholar.

Sanskrit, its associated culture and its development was

kept alive by numerous Chinese scholars, like Fa Xian and Xuan Zang and others, who visited India, Wang said, while launching the Sanskrit learning application "Little Guru" of the Indian Embassy of Cultural Relations (ICCR) at the Indian Embassy here on Friday, along with Indian Ambassador, Vikram Misri.

Sanskrit teaching programme started at the Peking University a century ago but Sanskrit research and teaching in China has a history of over 2,000 years, Wang said.

When Buddhism came to China from India, Chinese Buddhist monks started translating Indian texts into Chinese. From that moment, Sanskrit study and research started. China has a long history of Sanskrit tradition, till that time outside of India,

China has the longest and strongest scholarship in the world," he said. Over 100 Chinese scholars studied in Nalanda University until it began to decline in 11th Century, Wang said.

"From that moment, a major language of India culture. More and more people in China are interested in Indian culture and Sanskrit is a good way to learn more about Indian culture," he said.

"While Buddhism declined in India, it became very strong in China and has become part of 'Chinese culture,'" he told PTI. Once the language became strong in China, the need to go to India

to learn it declined, he said.

"China gradually became centre of Buddhism in Asia. In India, Buddhism has declined and in China it grew," he said, adding that thanks to numerous scholars who visited India over the centuries, China has some rare Sanskrit scriptures brought by them, which may not be available in India.

Y.E. Shaoyun, Associate Prof of Sanskrit in Peking University, said the Sanskrit studies in China are booming. His department now has 10 scholars specialising in the language while 200 others studied as part of the subject for their graduate programme.

The job prospects of the Sanskrit learning students are also good as most of them pursue academic career in Buddhist studies, specially its history, he said.

Chinese vaccines' effectiveness low, says official

Beijing: In a rare admission of the weakness of Chinese coronavirus vaccines, the country's top disease control official says their effectiveness is low and the government is considering mixing them to get a boost.

"Chinese vaccines 'don't have very high protection rates,'" said the director of the China Centers for Disease Control, Gao Fu, at a conference on Saturday. Beijing has distributed hundreds of millions of doses abroad while trying to promote doubt about the effectiveness of the Pfizer-BioNTech vaccine made using the previously experimental messenger RNA, or mRNA, process.

"It's now under formal consideration whether we should use different vaccines from different technical lines for the immunization process," Gao said. AP

Pak scrambles to speed up vaccination

Islamabad: Pakistani authorities have scrambled to speed up vaccination and firm up non-pharmaceutical interventions to contain the spread of the coronavirus, amid a surge in the number of cases.

The country on Sunday recorded 5,050 new Covid-19 cases, taking the national infection tally to 721,018. The death toll jumped to 15,443 in the last 24 hours.

The National Command and Operation Centre (NCOCC), the national apex body to combat the coronavirus, in a meeting on Saturday decided to extend the existing non-pharmaceutical interventions (NPIs) such as markets closure and restrictions on transport till Monday, Dawn newspaper reported. PTI

SBI collects ₹300 cr from zero balance a/cs: Study

PTI NEW DELHI

Several banks, including State Bank of India (SBI), have been imposing excessive charges on certain services provided to poor persons having zero-balance or Basic Savings Bank Deposit Accounts (BSBDA), a study by the IIT-Bombay has revealed.

The study observed that the SBI's decision to levy a charge of ₹17.70 for every debit transaction beyond four by the BSBDA account holders cannot be considered as "reasonable". It highlighted that the imposition of service charges resulted in undue collections to the tune of over ₹300 crore from among nearly 12 crore BSBDA holders of SBI during the period 2015-20, of which the period 2018-19 alone saw a collection of ₹72 crore and the period 2019-20, Rs 158 crore, the study by IIT Bombay professor Ashish Das stated.

Levy of charges on BSBDA is guided by September 2013 RBI guidelines. As per the direction these accounts holders are allowed more than four withdrawals in a month, at the bank's discretion provided the bank does not charge for the same.

While defining the features of a BSBDA, the regulatory requirements made it appear clear that in addition to providing free banking services (that included four withdrawals per month), as long as the savings deposit account is a BSBDA, banks cannot impose any charge even for value-added banking services that a bank may like to offer at their discretion, the study said.

The RBI considers a withdrawal, beyond four a month, a "value-added service, it said. "We assess the deliction in SBI's duty towards the PMJDY when the BSBDA users were unduly (and against the extant regulations) forced to part with such high charges for their day-to-day (noncash) digital debit transactions that the bank allowed in a BSBDA," it said.

SBI, in breach of RBI regulations set forth as early as 2013, has been charging BSBDA holders for every debit transaction beyond four a month, it said, adding, the charges were as high as Rs 17.70 even for digital transactions like NEFT, IMPS, UPI, BHIM and debit cards for merchant payments.

"On the one hand, the country strongly promoted digital means of payments, while on the other hand, SBI discouraged these very people, who are the backbone of the economy, by charging an exploitative Rs 17.70 per digital transaction. This dwarfed the spirit of financial inclusion," it said.

The RBI's nonchalant attitude to superimpose its own regulations on non-profit banks to become unreasonable towards charges beyond four debits a month, it said.

Picking up the business started in the State are apprehensive of migrant workers leaving for their hometowns considering the health conditions. The industries recovered from the jolt of the first wave of coronavirus when over one lakh workers from both Coimbatore and Tirupur industries rushed back to their home towns in Bihar, Uttar Pradesh and Odisha by special trains.

Some industrialists fear another exodus of migrant workers

PTI COIMBATORE

With the second wave of Covid-19 sweeping across various parts of Tamil Nadu, some of the industrialists in the State are apprehensive of migrant workers leaving for their hometowns considering the health conditions.

The industries recovered from the jolt of the first wave of coronavirus when over one lakh workers from both Coimbatore and Tirupur industries rushed back to their home towns in Bihar, Uttar Pradesh and Odisha by special trains.

Coimbatore and Tirupur reported increased infection cases and a correct picture of workers returning would emerge only after another week, they said.

No worker left the city till Saturday from nearby Tirupur, a major hub of knitwear garments which has become a hotbed for the returnees hauled from the North, said sources in the Tirupur Exporters Association.

Several banks, including State Bank of India (SBI), have been imposing excessive charges on certain services provided to poor persons having zero-balance or Basic Savings Bank Deposit Accounts (BSBDA), a study by the IIT-Bombay has revealed.

The study observed that the SBI's decision to levy a charge of ₹17.70 for every debit transaction beyond four by the BSBDA account holders cannot be considered as "reasonable". It highlighted that the imposition of service charges resulted in undue collections to the tune of over ₹300 crore from among nearly 12 crore BSBDA holders of SBI during the period 2015-20, of which the period 2018-19 alone saw a collection of ₹72 crore and the period 2019-20, Rs 158 crore, the study by IIT Bombay professor Ashish Das stated.

Levy of charges on BSBDA is guided by September 2013 RBI guidelines. As per the direction these accounts holders are allowed more than four withdrawals in a month, at the bank's discretion provided the bank does not charge for the same.

CAIT urges PM for staggered working time for different sectors to control Covid-19

PTI NEW DELHI

Domestic traders' body CAIT on Sunday urged Prime Minister Narendra Modi not to impose night curfew or lockdown amid rising Covid-19 in the country and instead adopt staggered working time for different sectors.

In a communication to the prime minister, the Confederation of All India Traders (CAIT) said it would be more appropriate if alternate measures may be adopted at district levels all over the country.

"Instead of night curfew or lockdown which have not proved a worthy step so far to control the spread of COVID-19, it would be more appropriate if alternate easy measures

may be adopted at district levels and staggered working time for different sectors," it said. CAIT Secretary General Praveen Khandelwal said that a closer analysis of the COVID-19 statistics over the last one week have made it ampler clear that night curfew and lockdown in different states have not brought the desired results of bringing down the cases.

It suggested that working hours of different verticals of trade and commerce should be revised. "We suggest that government offices, private offices and other all kinds of offices may work from 8 am to 2 pm whereas the markets and shops may be allowed to work from 11 am to 5 pm," it said.

"This has raised hopes of a sustainable last mile delivery economy emerging for the industry - yet hyperlocal last mile small parcel deliveries remain essential as challenging as ever," it said.

"We continue to see emergence of end-to-end logistics contracts with Bajaj Electricals and Flipkart with Mahindra Logistics," it said, adding that the trend, while accelerating, will be service providers. Also gains clarity as emergence of multiple channels is increasing supply chain challenge risks.

Rise in Covid cases to delay demand recovery in global oil market

IANS MUMBAI

Fresh surge in Covid-19 cases, eventual lockdowns is likely to delay the demand recovery in the global oil market, said an ICGI Securities report.

It however, noted that with 'OPEC+' capping supply to ensure supply deficit, impact on oil prices is likely to be muted. "Fresh surge in Covid cases, consequent lockdowns and slow rollout of vaccines, especially in Europe, are likely to delay demand recovery to pre-Covid levels," the report said.

However, delay in demand recovery may delay gross margin recovery for refiners. The ICGI Securities report also noted that vaccine-driven recovery in global oil demand and permanent closure of refineries is estimated to boost global refinery utilisation to 77.8 per cent in CY21E from 77.3 per cent of 72.5 per cent in CY20E.

"We estimate global refinery utilisation to gradually rise from 79.1 per cent in CY22E to 80 per cent in CY26E. IEA estimates permanent closure of 3.6m b/d (barrels per day) of refining capacity, but believes 6m b/d is required to ensure global refinery utilisation is sustainably above 80 per cent."

It noted that in CY07-CY18, 16.5 million b/d of refining capacity was added globally, but 8 million b/d was shut implying net capacity addition of just 8.5 million b/d.

Capital, Tomorrow Capital have already signed up for the programme to contribute to the Indian startup growth story, it added. "Startups and emerging brands enrolled in the Amazon Launchpad programme can access guidance from these mentors through various ways. This includes one-to-one mentorship with chosen mentors over a three-month period, ongoing networking opportunities with a wider pool of industry experts, or knowledge sharing sessions between these experts and other Launchpad brands," the statement said.

This offers entrepreneurs a platform to engage, learn and showcase their startups to the industry's leading subject matter experts to help tackle strategic and functional challenges, it added. "The Amazon Mentor Connect programme is not limited to startups and emerging brand owners enrolled in the Amazon Launchpad programme, but will also be extended to the winners of the Amazon Sambhav Entrepreneurship challenge in the upcoming Amazon Sambhav summit," the statement said.

Amazon India Director currently showcases over 2 lakh products offered by more than 800 emerging brands across 30 different product categories. Popular sectors catered to by these brands include beauty and personal care, health and grooming, grocery and home products.

The second edition of 'Amazon Sambhav' will be held from April 15-18, 2021. "India has a large startup ecosystem that is key to disruptive innovation and accelerating India's progress towards an Aatmanirbhar Bharat. Most of these startups are led by first-time entrepreneurs who have the passion to drive a change, but don't have the experience to deal with the breadth of challenges they face along the way," Amazon India Director said.

Nobel laureate trashes theory of limited Govt intervention to uplift poor

PTI MUMBAI

Renowned economist and Nobel laureate Abhijit Vinayak Banerjee has trashed the ideology that calls for lesser or limited government interventions towards uplifting the poor.

He said his own research on the subject across diverse economies in Asia, Africa and Latin America in the past decade and more does not support this ideology, rather it proves that those who have benefited from public and non-governmental interventions wherein they were given free education and healthcare, made the poor lazy, saying there is no evidence whatsoever proving so.

He said his own research on the subject across diverse economies in Asia, Africa and Latin America in the past decade and more does not support this ideology, rather it proves that those who have benefited from public and non-governmental interventions wherein they were given free education and healthcare, made the poor lazy, saying there is no evidence whatsoever proving so.

Addressing the 20th foundation day of Bandhan Bank on Sunday, Banerjee said there is no need to launch a freebie programme anywhere to establish the ideology that getting freebies or getting free assets make the poor people lazy.

This ideology has been pushing successive governments to give less to the poor when it has an NGO, clearly established the impact of its work on the poor who have seen on average 25 per cent income growth helping them consume 18 per cent more.

This is a great data-driven lesson, gained from his randomised control trials, in fighting poverty over a long period, Banerjee said, adding the first lesson in this is that when the poor become better off, they become more creative in generating more wealth and leading better lives in their own villages.

Data from my randomised control trials clearly showed that they're those people who benefited from public/non-governmental schemes, income increasing by 25 per cent leading to an 18 per cent jump in consumption he said.

While calling for more globalisation and free trade, he however admitted that fight against corruption in India, Mumbai, Chennai and Kolkata, respectively. After petrol stayed at record levels for a considerable period and were steady for past 24 days, OMCs went on price cut for the first time this year on two consecutive days - March 24 and 25.

Oil marketing companies (OMC) kept petrol and diesel prices unchanged for the 12th straight day across the four metro cities on Sunday. In the national capital, petrol was sold for ₹90.56 per litre.

Fuel prices unchanged for 12th straight day

IANS NEW DELHI

Oil marketing companies (OMC) kept petrol and diesel prices unchanged for the 12th straight day across the four metro cities on Sunday.

In the national capital, petrol was sold for ₹90.56 per litre. Prices of the fuel in Mumbai, Chennai and Kolkata were at ₹96.98, ₹92.58 and ₹90.77 per litre respectively, same as the previous levels.

Petrol and diesel prices fell by 22 paise and 23 paise per litre, respectively, on March 30 in wake of the global softening of oil prices. The OMCs have decided to pause price revision as they want to watch the crude oil price movement that has now dropped below the \$63-per-barrel mark.

In tandem with petrol prices, diesel was sold at unchanged levels of ₹87.87, Rs 87.96, ₹85.88 and ₹85.75 per litre in Delhi, Mumbai, Chennai and Kolkata, respectively.

DoT likely to issue guidelines for telecom PLI within week

PTI NEW DELHI

The Department of Telecommunications (DoT) is likely to issue guidelines on implementation of production-linked incentive (PLI) schemes for manufacturers in the sector and start inviting applications for the same in about a week, according to government officials.

Telecom gear makers firms such as Ericsson and Nokia are keen to expand their operations in India, and global companies like Samsung, Cisco, Ciena and Foxconn have shown interest to set up manufacturing bases in the country for domestic and networking products for telecom and export markets.

Telecom PLI has already been approved by the government. The DoT is ready with guidelines to implement it, and will start inviting applications for the same in about a week, it should be published on the DoT website within a week, the official, who did not wish to be named, told PTI.

The DoT notified the PLI scheme for telecom and networking products on February 24, 2021, with a financial outlay of Rs 12,195 crore, over five years.

The scheme for telecom gear manufacturing in India which is expected to encourage production of equipment worth Rs 2.44 lakh crore and create direct and indirect employment for about 40,000 people.

The investor can earn incentive for incremental sales up to 20 times the committed investment enabling them to reach global scales and utilise their unused capacity and ramp up production.

S KOREAN MOBILE CARRIERS TIPPED FOR ROBUST Q1 EARNINGS

PTI NEW DELHI

Seoul: South Korean wireless carriers are estimated to have logged robust earnings in the first quarter on the back of sharp growth in 5G users and their non-telecom businesses, a poll showed on Sunday.

The combined operating profits of the country's three major mobile carriers - SK Telecom Co., KT Corp. and LG Uplus Corp. - are expected to have reached 966.5 billion won (₹863.3 million) in the January-March period, up 6.8 per cent from the previous year, according to the poll by global brokerage houses by Yonhap Infomax, the financial arm of Yonhap News Agency. SK Telecom, the biggest of the three in terms of mobile users, is estimated to have posted an operating profit of 393.5 billion won for the first quarter up 12.42 percent on-year, while its revenue probably rose 8.57 percent on-year to 4.74 trillion won. Telecom giant KT is expected to have logged 386.3 billion won in operating profit, up 0.84 percent on-year, while the operating profit of LG Uplus is estimated to have risen 9.51 percent to 240.7 billion won.

A GLIMMER OF HOPE

Advanced AI-driven surveillance systems, when used efficiently, have the potential to bring safety back into society, says ABHISHEK KUMAR

A secure city is arguably the sign of an attractive and prosperous place, where all residents and visitors live, work and travel in peace, knowing that they are safe. Though this concept seems dream-like, it is steadily evolving, thanks to the futuristic vision of some state-of-the-art surveillance players. These players are working towards creating real-time, dynamic and proactive AI-based video surveillance systems. It brings us closer to the dream of walking down the street feeling secure while being productive. There are a lot of ways that these systems can make a difference in our lives but the following are some major areas where surveillance systems can truly be a game-changer, especially in India.

Safety of residents
 Until recent times, whenever we thought of security, our mind would go to a person standing guard at a police post or the entrance of a building. In this regard, it's not impossible for human errors, omissions and negligence to seep in sometimes. This scenario leaves a chink in the armour, doesn't it? We have faith in our compatriots, but being solely dependent on them can be unwise. We need technological interventions for their support. Hence, an automated surveillance system comes into play. The right surveillance system can monitor visitors in a residential area so that there is a clear record of anyone entering and leaving. It can keep a sharp eye on people to ensure they're safe, and it can also detect other major incidents like break-ins, thefts and violence. Such systems raise an alert with the security personnel in real-time, thereby leading to quick response.

To ensure personal liberty of under-trials
 We are aware that a person is presumed innocent until proven guilty. So, in order to set a good precedent, we must begin with digitising our

police stations and courthouses to the extent possible. The highly-publicised double murder of a father and son by police personnel at a Tuticorin police station highlights the need for these surveillance systems. NCRB data states that there were over 1,700 custodial deaths between 2001 and 2018. There were 452 custodial deaths between 2014 and 2018, in which no police officers were held responsible. Surveillance systems are everywhere across India and deploying them across our courthouses and police stations will bring greater confidence of people in our institutions. Also, ideally, the video footage should not be stored locally and will be streamed directly to the police headquarters so that tampering is averted.

Women's security
 Women's security should be more than just a priority. Going back to a

gut-wrenching incident back in 2017, where a 25-year-old woman at the Pune Infosys campus was raped and strangled to death in her office by a security guard — demonstrates the horrendous threat that women face daily. In this case, the culprit was caught but what about the others that get away with their crimes? Should we not prevent such dreadful incidences from repeating over and over again?

Bengaluru City has announced that it will be setting up 16,000 CCTV cameras for women's safety but workplaces also need to follow suit. They need to step up security measures for women in the workplace so that they can follow their dreams without the constant fear looming over them.

Traffic management
 Traffic monitoring and management have grown to a whole new level

due to the latest surveillance technology. Commuters can now monitor the news to get the latest traffic reports before heading out to work. CCTV cameras have been installed on busy roads, atop traffic signals and at busy intersections. Cameras are used for monitoring traffic, recording the pattern data, overall observing traffic and to issue challans. However, this infrastructure is largely restricted to the metropolitan cities.

India has the highest accident mortality and theft rate. Deploying traffic cameras across smaller cities would urge drivers to exercise caution and discourage violations. Transport authorities can also use them to monitor vehicle flow in case of road closures or accidents. They do so by issuing automated tickets for moving violations by simply picking up the offender's number plate information.

To stop terrorism

Sadly, India is no stranger to terrorism. There have been numerous attacks in our country in the past and we've recently honored the 12th anniversary of the infamous Mumbai attacks in 2008, where 171 people lost their lives and 239 were injured. These horrific instances have demonstrated to us the need for high-tech surveillance. With the latest technology, modern surveillance systems are equipped with features such as facial recognition. It can be linked to government and police records to identify known criminals and suspicious individuals. When installed at various junctures around cities, it could identify and inform authorities of a wanted individual or threat well in advance without stirring up mass panic.

After going through the aforementioned points, it becomes plain to see that surveillance is no longer a choice but a need in today's world. So that our children could play safely outside, women could walk freely or sit in their office alone, and the only people approaching them are the ones who want to offer help. Advanced AI-driven surveillance systems give us a glimmer of hope. And when used efficiently, they have the potential to bring safety back into society.

WEBBED

THE DISCIPLE

Self-doubt, sacrifice and struggle converge into an existential crisis for a devoted classical vocalist as the mastery he strives for remains elusive. Starring Aditya Modak, Arun David and Sumitra Bhavne, it releases on Netflix on April 30.

SEXIFY

To build an innovative sex app and win a tech competition, a sexually inexperienced student and her friends must explore the daunting world of intimacy. Starring Aleksandra Skrabka, Maria Sobocinska and Sandra Drzymalska, it releases on Netflix on April 28.

THINGS HEARD AND SEEN

A young woman discovers that both her husband and their new home harbour sinister secrets after they leave Manhattan for small-town life. Starring Amanda Seyfried, James Norton and Natalia Dyer, it releases on Netflix on April 29.

We have witnessed a steep rise in maternal deaths during the COVID-19 pandemic. This crisis has shown us that we must strengthen health systems to cope with emergencies without impacting essential services," says Executive Director, Population Foundation of India, Poonam Muttreja.

Besides the overall burden of COVID-19 cases in India, the indirect effects of the pandemic are cause for concern, especially in the case of already vulnerable communities. Women and children have been disproportionately affected, with studies registering a significant increase in the numbers of stillbirths and maternal deaths compared to pre-COVID periods. A recent review in The Lancet, of studies on maternal and child health outcomes, has confirmed that the impact of the COVID-19-associated lockdowns has been devastating for mothers and newborns. Low- and middle-income countries (LMICs) have been worst affected.

Clinics and public health facilities being inaccessible to many during pandemic-induced lockdowns cut off thousands from essential health services. The United Nations has estimated that this may have caused an additional 2,20,000 child deaths and 11,000 maternal deaths in South Asia alone. These numbers are likely to increase with India potentially accounting for the largest proportions. In India, the number of women who received all four antenatal check-ups during the pandemic also dropped by 51 per cent and the number of institutional deliveries were down by 79 per cent. The demand for family planning services satisfied by modern methods fell by 67 per cent.

National Safe Motherhood Day is celebrated on April 17 every year, on Kasturba Gandhi's birth anniversary. This year, the focus must be on ensuring access to quality family planning services and reproductive health services for all.

A robust family planning programme is an important way of curbing preventable deaths. "More accessible and equitable family planning services that offers a wider choice of contraceptive

A cause for concern

Prior to National Safe Motherhood Day, public health expert Poonam Muttreja says that the focus needs to be widened to include morbidity as an important aspect of maternal health

methods to couples are a simple, low-cost intervention that can reduce maternal and child mortality by preventing early pregnancies and unwanted pregnancies at a later age," says Poonam.

"At Population Foundation of India, we have engaged with policymakers, donors, NGOs and communities to consistently raise the discourse on the need for informed decision making on women's health. We promote effective and gender-sensitive health and development strategies and policies. We have constantly emphasised the importance of planned families, birth spacing and delayed marriage as strategies to improve maternal health," she adds.

Gender inequality, gender-based violence and lack of agency continue to

impact women's ability to access maternal and antenatal health services. In India, regressive gender norms continue to result in a preference for sons, leading to frequent pregnancies. Further social norms around child and early marriages also impact maternal and child health.

While the full impact of the pandemic on the public health system will not be clear for some time, COVID-19 has underscored that stronger maternal and child care systems are a critical requirement of health system strengthening going forward.

The foundation has been working at the national, state and community level to change perceptions around gender family planning, adolescent sexuality and reproductive health.

No competition between actors: Pratik Gandhi

He became a pan-India sensation almost overnight, with his portrayal of Harshad Mehta in last year's popular series *Scam 1992: The Harshad Mehta Story*, and has now planted his feet in Bollywood. With the spotlight firmly on him, actor Pratik Gandhi says he does not believe in competition among contemporaries.

"There can't be competition between actors. Had it been products, there would have been competition. If I was a biscuit or a soap, there would be competition," Pratik said.

He added, "I am a human being. How can two people, looking so different but both distinct types of acting, be compared? I don't take the pressure that your next thing has to be bigger than the previous one."

Gujarati actor Pratik first made his mark on stage and his name was included in *Litana Book Of Records* for a monologue he performed in three languages, in the play *Mohan No Masalo*. He would tell us the *Scam 1992: The Harshad Mehta Story* success has been a progression of his steady rise as an actor, and it has opened up opportunities.

"I won't convert this as excitement where people are giving me different opportunities now. They are open to work with me in different subjects — which is very exciting for me as an actor, and I am just looking forward to playing another character. So yeah, I don't think that much. My theatre background is helping me here," Pratik said.

He insists fame and success are peripheral products. "I don't think about all these things (fame and success) because they are peripheral byproducts. I am getting much love from the audience — all across, and across all age groups. I don't think

about it much. It is the character that worked for them," he said, about his *Scam 1992* success.

Before starting in the OTT show, Pratik was also seen in the Hindi film *Loveyatri*, but he admits Hansal Mehta's web series was a game changer for him.

"It is an absolute gamechanger. It changed a lot of things for me personally and professionally. More so, it has changed the way people look at me now," he said.

He finds all the love coming his way satisfying and describes it as "a very overwhelming feeling."

"It has something that I have been waiting for, over the last 16 years," he concluded.

TRENDBLAZER

TAAPSEE'S MANTRA: SUIT UP, SMILE UP, SHOW UP

Actor **TAAPSEE PANNU** shared a mantra in life that she follows.

"Suit up... smile up... show up," she wrote as caption on Instagram, with a picture where she is dressed in burnt orange pants paired with a white shirt and a blazer.

The actor is currently busy shooting for *Shabash Mithu*, based on the life of Indian women's ODI cricket team captain Mithali Dorai Raj.

She also has *Loop Lapeta*, *Hasen Dilruba* and *Rashmi Rocket* coming up.

fairtalk

AAHANA KUMRA

"I know as an actress, I have the power to influence people, and I want to do it in the right direction. Films can have an enormous impact on society, especially young minds. So, I never want to be associated with a project that will showcase women in a poor light. It's important and a high time to have conversations around women's rights and safety."

dailytalk

RASHMIKA MANDANNA

"Since I am just a beginner in the field of acting, as a person I am curious how it is going to pan out when I do different things. For me, every film I choose, I do a different character because, for me, I wouldn't want to watch myself do the same content twice. I like to keep surprising myself — 'am I really doing this?' 'am I craving to do better work in any language.'"

SCARY TO HAVE A BABY IN PANDEMIC: JONES

Actor **FELICITY JONES** said that it was an intense experience giving birth to a baby during the pandemic.

"I made banana bread three times and burnt it each time. I had a baby in the first one. It seems ages ago now in the really scary lockdown when we were all advised to wash our groceries and we didn't know what was going to happen. It was pretty intense, but having kids is intense anyway. The pandemic just added a little extra," she said.

She added: "To have a baby in an apocalyptic moment is pretty scary."

EDUCATION: A POWERFUL WEAPON

While there are schemes like *Beti Bachao Beti Padhao* that aim to educate girls but continuous awareness and persistent effort are needed to enable them to benefit at the ground level, says RAMA SHARMA

There are several powerful women, who have shattered the patriarchal norms and have shown the rest of the world what women can do if they have equal rights. Chhavi Rajawat is one such name that has done exactly that and more. India's first woman sarpanch with an MBA degree, Chhavi was the sarpanch of her village Soda in Malpura block, Tonk district in Rajasthan. She had left her lucrative corporate job to serve as a sarpanch. Her arduous work for the community has not just touched lives but has led the way for several girls and women who have seen their hearts on serving the community.

One such life that Chhavi has inspired is that of 25-year-old Radha Rajawat. A resident of Lalwara village in Niwai block of Tonk district in Rajasthan, Radha has not only educated herself but made a huge difference in the lives of girls in and around her village by fighting for their rights to education. Her journey, however, has been a tough one. She had to put up a fight against her parents first and then, against the entire Rajput community of her village to reach where she is today.

"Initially, we were against her idea of pursuing education after Class 8th as that would have meant sending her outside the village," shared her parents, who had to eventually give up in front of their daughter's perseverance. Their support was faced by the opposition not just from their extended families but from the Rajput community as well. The pressure forced Radha's parents to withdraw their support, but Radha was adamant. She put up a brave fight against everyone, worked as a laborer, and managed to complete Class 12 with a good score of 70 per cent.

Radha's journey had started while she was still in Class 8th. Under the Sakshar Bharat Mission — a centrally sponsored nationwide literacy scheme of

the Indian Department for School Education and Literacy (DSEL), Radha was selected as a child reporter. This provided her a platform to raise issues concerning her village and panchayat through newspapers. Slowly, she started mobilising the villagers.

In 2013, she led the girls and women from the panchayat to address the issue of corruption. "Led by Radha, the group submitted memorandum not only to the District Collector but also to the Chief Minister requesting solution of the challenge of negligence and corruption at the panchayat level," informed

Poonam Rajawat, a member of Kishori Manch — an adolescent group run by a local non-profit organisation in the region.

One of the most important transformations that Radha brought to this panchayat was setting up a school till Class 12. Her persistent efforts to address the concerns of thousands of girls who had to give up education due to lack of a higher secondary school in their village led to this impact. The girls of the village, now, do not have to compromise on their dreams of completing school education.

Not just for girls, she soon started working towards the

education of the entire village. "In 2014, as a panchayat motivator, she took the initiative to educate 1,800 illiterate people of the village and encouraged them to sit for the examinations," said Panchayat Assistant, Hemraj Singh.

Shashi Kanwar, who was tutored by Radha, shared that there wasn't a single educated woman in the village. "It is a result of her hard work and efforts of the other adolescent girls associated with her that today, nearly 70 per cent of women in the village are literate." As far as the education of adolescent girls is concerned,

prior to 2013, only 30 per cent of girls in Lalwara panchayat were educated, while today, more than 80 per cent are linked with mainstream education. Not only this, 30 to 40 per cent of the girls are stepping out of the village boundary to pursue their dream of higher education.

"Overwhelmed by Radha's zeal to work for the better future of her community, she was requested by the girls, women and other responsible people of the village to contest the panchayat elections," said Maina Rana, a colleague of Radha's. She obliged their

request and contested the election but couldn't win. She, however, continued to support the winner, Devalal Gurjar, who is also her colleague, to serve the community with sincerity.

Babulal Sharma, a local teacher, said, "Radha has tried to raise social issues, problems and challenges not only at the panchayat level but also at the district and state level from time to time. It is the result of her dedication towards the society that she had the opportunity to meet the former Vice President of India, Hamid Ansari. Taking note of her confidence and her ability to lead the youth, local political groups had also offered her to join them. Radha, a true social worker, showed her will to rise above politics and work for all the sections of society."

Her life, however, is not only occupied with social responsibilities but is equally dedicated to her family. "I am a cancer patient. Radha, as responsible as she is, has taken the entire charge into her hands. Along with pursuing further education, she is working in a private firm. Currently, I am receiving free treatment with the help of Dr Prahlad Dhakad, a Senior Doctor working in Jaipuria Hospital. It is because of her that I am able to get this free treatment. I was completely against her education but now I realise my mistake and understood the importance of girls' education," said Radha's father.

Her struggle and passion for social awareness is an outstanding example of women's empowerment. While there are schemes like *Beti Bachao Beti Padhao* that aim to educate girls but continuous awareness and persistent effort are needed to enable them to benefit at the ground level. For women to become self-reliant and courageous, they should have equal rights and opportunities to educate themselves.

LEARN AND UNLEARN

One should give up self-conceit and accept changes if one wants to do better in life, says RAJYOGI BRAHMAKUMAR NIKUNJJI

There is hardly any human being in the world who is not inclined to improve himself. Of course, some aspire for improvement in their relationship with whom they have to live and work, whereas others work for improvement in their economic status. Some want to improve or enhance their personality, whereas others are more concerned about their spiritual progress. In any case, the will to make some progress is basic and normal and the efforts to improve are a sign of life. And, the volition, under-lying all efforts of man to bring about improvement is mainly one's aspiration to be happier. If one ponders over this question of attainment of true happiness, one would come to the conclusion that man's happiness ultimately depends upon his behaviour or his reaction to the external stimuli and his ways of thinking which, in turn, depends upon his inner urges, his tendencies and the training he had. So, in order to have any other kind of improvement, man has to bring about improvement in his outlook, habits, mannerism and ways. For this, he has to pick up and learn certain things and unlearn others. If man's process of learning (or unlearning wrong things) stops and his effort to put into practice what he has learned already ceases or his capacity and will to make efforts are exhausted, his improvement and progress also come to a halt.

Not many are aware of the fact that the path to progress is paved with some obstacles which are mostly of man's own making. One of these is man's pride and arrogance about his own knowledge. It is easy to teach him who has no pride in his own intelligence. But he who regards himself as perfectly wise would say to others, "There is nothing that I do not know." It is difficult to offer correction to such a man, or he assumes air in such a manner that people would stutter in his presence; he loses temper sooner than anyone would start informing him on any subject. So, if one wants to improve and, for that purpose, is inclined to accept some changes, one should give up self-conceit because it precludes the possibility of learning good things of life and unlearning wrong things.

Another major hurdle in man's path to progress is his attachment to worldly objects, his lust for sensual pleasures, his sense of deep involvement, and his attachment to his body. Little does man realise that, at this age-end of iron age, when a man has lost his morals, the worldly things are devoid of their original essence. One who wishes spiritual improvement should know that the present unrighteous world has no substance. Is the bark of a sugar cane worth anything when the juice has been squeezed out of it? So has the world lost all its sap and truth because it has become debased. This body of ours is assailed by several different diseases and is made of debased matter. So one who aspires for self-improvement should push out attachment to objects of senses or thirst for these, with only one determined effort, as otherwise, it would mean that one has lost or is losing one's precious life over a mere trifle.

Knowing all this, one should get rid of body consciousness. The first step for this is to withdraw one's attachment from 'religion' of the body, which robs one's life of its essence, and to devote one's mind and body and possessions towards the welfare of the world. This will bring in man qualities such as service, dedication, sacrifice, meekness, fellow-feeling, tolerance, and hundred-and-one other noble traits of high character. It will quicken his efforts for self-improvement.

Whether working from home or office, toiling away for long hours without breaks and physical activity can begin to damage your body, vitality and even without tell-tale signs.

It is important to achieve a healthy work-life balance in order to live a fulfilled life. But there are moments in life when you have to finish certain deadlines and cannot avoid spending a lot of time on your desk," says Beenu Rajpoot, noted film-maker and a Fit India Champion.

The fitness expert has these suggestions for those busy hours that will not only nourish your body and mind, but also increase overall productivity:

Between emails, meetings and calls, try to take a stroll every for a few minutes to reset your body and brain. A little bit of movement during those long sitting hours can go a long way to ensure that your body and joints do not become too stiff by sitting.

Check your breath during intervals. Take a few long breaths engaging your diaphragms to ensure that your body is getting enough oxygen. Learn some *Pranayama* techniques to recreate yourself quickly so that you can maintain a constant energy level throughout the long span of desk sitting.

Remember to do a few neck and shoulder stretches while on your desk to avoid neck pain or back pain later. It will also help in keeping your posture upright. Add useful stretches from your yoga class to these intervals.

Choose the appropriate ergonomic chair and table in order to maintain a good posture while sitting for long hours. Some of the important factors

Keep your body, mind active

Working long hours can damage your vitality even without tell-tale signs

to be considered are — shape of the chair, its height, height of the table, lumbar support in the chair, among others. Ensure that your chair has some kind of lumbar support. Lumbar support will protect your lumbar spine from pressures of excessive flexion during long sitting hours. It is also important to choose a chair where you can adjust the height of the chair so that you can adjust its height vis-a-vis your table. It will be good for your mid-upper back and shoulders. Often people who ignore this advice can develop health conditions like scoliosis and rounded shoulders.

Keep drinking water during a long shift. It's quite common that people under pressure keep suppressing their thirst unconsciously that makes them dehydrated. Remember to keep sipping the water every hour or so to keep your body rich in fluids that will improve the circulation and will keep your blood pressure in check, apart from many other benefits of drinking water.

Decorate your space nicely and keep it clean, organised and minimal. Avoid too much physical clutter affects

the states of your mind, too. Practice the yogic principle of *Aparigraha* or minimalism to keep your space, physical as well as mental, free.

Ensure that you are getting some sun during the day. It will not only enrich your Vitamin D levels but also give a big

boost to your immune system. It is very common among the big cities in India that people don't get enough Vitamin D as they are not exposed to the sunlight often. Lack of exposure to the sunlight leads to Vitamin D deficiency that is often linked to other health issues.

Gives your eyes some rest in between after every half an hour or so by doing a simple yoga technique of palming. Rub your palms together and just cover your eyes with your warm palms. Your eyes will feel energised immediately. —JANS

Invest in your dreams. Grind now. Shine later.
—Unknown

TREATING SLEEP APNEA MAY REDUCE DEMENTIA

Older adults who received positive airway pressure therapy prescribed for obstructive sleep apnea may be less likely to develop Alzheimer's disease and other kinds of dementia, new research suggests.

Obstructive sleep apnea (OSA) is a condition in which the upper airway collapses repeatedly throughout the night, preventing normal breathing during sleep.

OSA is associated with a variety of other neurological and cardiovascular conditions, and many older adults are at high risk for OSA.

"We found a significant association between positive airway pressure use and lower risk of Alzheimer's and other types of dementia over three years, suggesting that positive airway pressure may be protective against dementia risk in people with OSA," said lead author Gailit Levi Dunitz, Assistant Professor at the University of Michigan.

CHILDHOOD DIET LINKED TO LESS ANXIETY LATER

Exercise and a healthy diet in childhood leads to adults with bigger brains and lower levels of anxiety, a new study suggests.

The most-sound study determined that early-life exercise generally reduced anxious behaviors in adults. It also led to an increase in adult muscle and brain mass.

"During the COVID-19 lockdowns, particularly in the early months, kids got very little exercise. For many without access to a park or a backyard, school was their only source of physical activity," said researcher Marcell Cadney from the University of California - Riverside. "It is important we find solutions for these kids, possibly including extra attention as they grow into adults," Cadney added.

The researchers determined that early-life exercise generally reduced anxious behaviours in adults. It also led to an increase in adult muscle and brain mass. When fed "Western" style diets high in fat and sugar, the mice not only became fatter, but also grew into adults that preferred unhealthy foods.

OBESITY LINKED TO HEAVY PERIODS

adies, here is one more reason to reduce your body weight. Obesity is linked to greater menstrual blood loss, which may result from increased inflammation in the womb lining, delaying its repair, according to a study conducted both on women and mice.

The study led by researchers from the University of Edinburgh in Scotland, UK, found a weak but statistically significant association between increasing body mass index (BMI) and more heavy periods in women.

In the mouse study, the team found that after shedding their womb lining, the mice on a high-fat diet showed delayed repair of the remaining womb lining in comparison to mice on a normal diet.

Further examination of womb lining from the mice indicated that inflammatory factors were also higher in mice with greater body weight. The findings are detailed in the *Journal of Endocrinology*.

'JUMPING' GENES CAN PREVENT BLOOD CANCER

Scientists have found that Transposons, also known as jumping genes, can protect against certain blood cancers and help develop new therapeutic targets.

Transposons are DNA sequences that can move, or jump, from one location in the genome to another when activated. These "jumping" genes are a source of genetic mutations responsible for a number of human diseases. The findings, published in the journal *Nature Genetics*, can help predict how patients will respond to cancer therapies and find new therapeutic targets for acute myeloid leukemia (AML) — the deadliest type of blood cancer in adults and children.

"Our initial finding was a surprise because it's been long thought that activated transposons promote cancer development by generating genetic mutations. We found it was the opposite for blood cancers, and that decreased L1 activity was associated with worse clinical outcomes and therapy resistance in patients," said Jian Xu, Associate Professor in the CRI.

NEW DRUG CAN STOP TUMOURS FROM GROWING

Scientists have found that an oral drug can be effective in stopping tumours from growing. The team from the University of Colorado Cancer Center found that slowing down NLRP3 can reduce inflammation and curb tumour growth and progression.

"NLRP3 is a member of a larger family that is involved in sensing danger signals," said Carlo Marchetti, from the varsity's School of Medicine.

It is a receptor that surveils the intercellular compartment of a cell, looking for danger molecules or pathogens.

"When NLRP3 recognises these signals, it leads to the activation of caspase-1, a protein involved in the processing and maturation of interleukin-1-beta into its biological active form, causing an intense inflammatory response. We found that in melanoma, this process is dysregulated, resulting in tumour growth," Marchetti said.

Rana, Tripathi power KKR to 187

Picture credits: IPLT20.com

PTI ■ CHENNAI

Opener Nitish Rana (80) and Rahul Tripathi (53) hit fluent half-centuries to propel Kolkata Knight Riders to a challenging 187 for six against Sunrisers Hyderabad in their Indian Premier League match, here on Sunday.

SRH's Rashid Khan (2/24) was yet again at his best, asking tough questions to the batsmen but most of his bowling colleagues proved ineffective on a batting-friendly wicket.

Dinesh Karthik (22 not out of 9 balls) provided a late flourish to KKR innings but they could gather only 42 runs in the last five overs.

Left-handed opener Rana struck the ball hard and clean to provide his side a confident start after they were asked to take first strike.

His strokes on the off-side —

NITISH RANA LAST SIX INNINGS IN IPL

0	1	RR
81	53	DC
0	1	KKIP
87	61	CSK
0	1	RCB
80	56	SRH

provided the breakthrough when he deceived Gill with a wrong'un to find the stumps.

Rana though kept going strong, completing his half-century with a six off Vijay Shankar after surviving an LBW appeal off Rashid. He got the decision overturned, taking the DRS call. Rana's six-hitting continued after getting his fifty as he punished Natarajan and Sandeep again.

His colleague at the other end Rahul Tripathi also stroked confidently and fluently. He smashed a massive six off Bhuvneshwar and then followed it up with a cheeky four in the third-man region.

He completed his fifty with another boundary off Bhuvneshwar but was dismissed by Natarajan soon after when he top-edged a ball. Rashid too sent back dangerous Andre Russell (5) back.

Mohammed Nabi (2/32) got rid of Rana and Eoin Morgan (2) off successive balls in the 18th

Big-hitters galore

RR, Punjab Kings aim for winning start to IPL campaign

KEY PLAYERS

- BEN STOKES**
English all-rounder will have an extra responsibility with the ball this time in absence of Archer.
- CHRIS GAYLE**
He will be the X-factor in Kings line-up. Gayle's power hitting can take PBKS to big total.

PTI ■ MUMBAI

Another batch of big-hitters is on the cards when KL Rahul's Punjab Kings take on the Sanju Samson-led Rajasthan Royals, two line-ups dotted with expansive stroke-makers and in pursuit of a winning start to their IPL campaigns here on Monday.

Rajasthan will be banking heavily on their swashbuckling all-rounder Ben Stokes. Stokes will be keen to get some runs under his belt and so will be the likes of Englishman Jos Buttler and newly-appointed skipper Samson, who is a mine-field of talent.

The Royals could opt to open with the highly-rated Yashasvi Jaiswal and Buttler. While Samson, who would be itching to prove a point, and Stokes would then form strong middle-order.

If the four fire on all cylinders, they can pummel any attack into submission and Punjab would be no exception on the Wankhede track, which is usually batting-friendly.

Royals also have several other options at their disposal, including all-rounders Shivam Dube, Shreyas Gopal, Rahul Tewatia, Riyan Parag and Liam Livingstone.

Gopal, Tewatia and Parag, all bow leg-spin, so it would be interesting to see whether the Royals opt to go in with two leg-spinners. Tewatia and Dube have the abil-

Matches	21
Rajasthan Royals	12
Punjab Kings	9

LAST YEAR'S MATCHES

- Rajasthan Royals defeated Punjab Kings by 4 wickets at Sharjah
- Rajasthan Royals beat Punjab Kings by 7 wickets at Abu Dhabi

1922

Punjab Kings Skipper Lokesh Rahul who scored 1922 runs at an average of 54.91 in 42 innings of as many matches, needs 78 runs to become only second batsman after Shaun Marsh (2477 runs) to score over 2000 runs for Punjab Kings in IPL.

ity to whack the ball outside the park and look to be certainties in the playing XI.

With star pacer Jofra Archer missing due to injury, the pace attack will have to be led by Rajasthan's newest recruit — South African all-rounder Chris Morris, who will be eager to justify his huge price tag of Rs 16.25 crore.

RR will have to get their combination right as only four foreigners can make the playing XI.

So, it will be interesting to see whether Royals opt for left-arm pacer Mustafizur Rahman or go in with either Jaydev Unadkat, Kartik Tyagi or Chetan Sakariya.

Unadkat, with his experience, might get the nod.

On the other hand, Punjab boast of some hard-hitters like Rahul (670 runs in 2020 season), Mayank Agarwal (424 runs) and Chris Gayle.

Rahul and Agarwal formed a lethal opening combination in 2020 and would continue to open.

They also have the likes of Englishman Dawid Malan, one of the finest T20 batsmen currently, hard-hitting Tamil Nadu batsman M Shahrulkh Khan, and West Indian Nicholas Pooran.

For them too, it would be all about getting the combination right.

Shahrulkh could get the nod ahead of others like Deepak Hooda and Sarfaraz Khan, and could play the role of a finisher.

Dhawan impressed by Pant's calmness on captaincy debut

PTI ■ MUMBAI

Delhi Capitals experienced Opener Shikhar Dhawan was mighty impressed with Rishabh Pant's leadership qualities, saying the youngster led the team in a calm and composed manner in his first match as captain and will get better with time.

Pant was thrust into captaincy after regular skipper Shreyas Iyer sustained a shoulder injury during the recent ODI series against England and was ruled out of the tournament.

The 23-year-old wicketkeeper-batsman made a memorable start to his captaincy stint as he led DC to a convincing seven-wicket win over three-time champions Chennai Super Kings in their opening match of the IPL 2021 here on Saturday.

"He (Rishabh Pant) did quite well. First of all, glad that he won the toss. It was a bit of a sticky wicket, so it was good for us to bat sec-

ond. He kept his calm and kept on motivating the boys", Dhawan said during the post-match press conference.

"He made good changes as well. It was his first match (as captain), so I am sure it is only going to get refined from here. He has just

started and with experience, I am sure, he is only going to get better.

"The best thing about Rishabh Pant is that he stays calm. His presence of mind is quite there, which is very very good.

Asked if he gives his advice to Pant as a senior player, Dhawan said: "...Of course, I give my advice to him. The youngsters, whenever they come to me to ask for batting tips or mindset things, I always share my knowledge with them."

Dhawan smashed a 54-ball 85 studded with 10 fours and two maximums and alongwith Prithvi Shaw (72) shared a 138-run opening stand as Delhi chased down 189 with eight balls to spare.

Asked about his sweep shots against the pacers, Dhawan said: "I started practising it at the nets and then introduced it in the game. We have to play according to the field set. I knew Chennai keeps square leg and fine leg inside the 30-yard circle and keep covers behind for me.

Missing Jofra is big blow: Sangakkara

PTI ■ MUMBAI

Star pacer Jofra Archer's absence because of injury is a "big blow" to Rajasthan Royals but their new Director of Cricket Kumar Sangakkara is confident that the team's young Indian fast bowlers will rise to the challenge in this year's Indian Premier League.

Archer, who played with a hand injury during the India series, is currently recuperating from a surgery and the duration of his availability during the later part is still not clear.

"Sanju and I will both agree that it's a big blow for us. Jofra is a very vital part of our make-up and not to have him is unfortunately the reality of it. We have to work around it and plan contingencies," Sangakkara told PTI during a virtual press conference on Sunday ahead of the clash against Punjab Kings here on Monday.

The former Sri Lankan captain is, however, hopeful that Archer will be available at some point and "play his part in the IPL."

The weak link for Royals, over the years, has been their Indian pace attack where the most experienced name Jaydev Unadkat hasn't exactly set the stage on fire.

Apart from Unadkat, they have his left-arm back-up Chetan Sakariya and the immensely talented Kartik Tyagi.

terday (Delhi Capitals vs Chennai Super Kings) as well," said Sangakkara, who has played a number of seasons in the IPL.

"Most of the wickets are good for batting. So, you have to be quite skillful. We have Kartik Tyagi, who did pretty well last season in patches and this year we have new additions (pacer) Kuldeep Yadav (Jr) and Chetan Sakariya," he stated.

For Sangakkara, it is imperative that these youngsters are prepared to understand match situations and bowl accordingly.

"It's about keeping them focussed on what their job is and get them trained and prepared to execute different deliveries, scenarios and match plans for the opposition but at the same time, giving them confidence about their own strengths."

The Royals skipper Sanju Samson has gone slightly off the radar as far as the national team is concerned after having failed to grab even a single opportunity. However, Sangakkara believes that both the captain and Rahul Tewatia, who recently was in

India squad for the T20 series against England, could be national team regulars if they can trust their abilities a bit more.

"Pressure is always there. Whether it is Sanju or Rahul, reality is they will tell you that expectations and pressures will always be there. Everyone has various coping mechanisms to deal with it, focus is to stay in the moment," he said.

"It is very important to have those grand ambitions of playing regular international cricket, and both Sanju and Rahul are very capable of not just being regulars but great, outstanding performers at the international stage."

The eloquent former glove-man wants each of his 11 players to be "problem solvers," who can think on their feet and help the skipper.

"...That really helps the skipper Sanju a lot on the field when people are thinking themselves as to what's going on (match situation), and it also builds a lot of trust within the unit," he added.
