EC reviews Covid situation in five poll-bound States

Panel talks with Health Secy, bosses of paramedical units call to put off elections

RAJEEV KUMAR ■ NEW DELHI

The Election Commission has reviewed the Covid situation in five poll-bound States and has discussed the possibility of putting off elections.

The commission has reviewed the Covid situation in Tamil Nadu, Andhra Pradesh, Karnataka, Telangana, and West Bengal. The commission is likely to take a final decision on the matter in the coming days.

The commission has also discussed the possibility of putting off the elections in these States due to the prevailing Covid situation. The commission has asked the States to provide regular updates on the Covid situation.

Kerala

Kerala's budgetary proposals for the fiscal year 2022-23, which is aimed at boosting the economy and providing relief to the people, has been presented in the Kerala assembly on Monday.

The budget, which was presented by Finance Minister Thomas Isaac, aims at creating an enabling environment for growth and development in the State.

The budget proposes a total expenditure of Rs 3.95 trillion, with a revenue of Rs 3.5 trillion. The budget also provides for a reduction in the excise duty on some items.

Debutant AAP sweeps Chandigarh civic polls

ManuIndia ■ CHANDIGARH

The Aam Aadmi Party (AAP) has won the Chandigarh Municipal Corporation (CMC) elections, capturing 50 out of 106 seats.

The AAP, which had been facing a tough challenge from the Congress and the Shiromani Akali Dal (SAD), emerged as the single largest party in the CMC with 50 seats, followed by the Congress with 40 seats and the SAD with 16 seats.

The AAP's victory is seen as a setback for the Congress, which had been eyeing a comeback in the Municipal Corporation of Chandigarh (MC). The AAP's victory is also seen as a victory for the party's national leaders in Delhi and for its leader in Chandigarh, Kiren Rijiju.

The AAP's victory is also seen as a victory for the party's national leaders in Delhi and for its leader in Chandigarh, Kiren Rijiju. The Taliban seem to consider humanitarian assistance to Afghanistan their birthright.

The international community and the internally Taliban regime in Afghanistan appear to go about their duties in the country much by way of quite a few limitations: non-compliance with international laws, disregard for human rights, and a lack of transparency in their decision-making processes. This situation has been exacerbated by the Taliban’s做法，the group’s tenets are largely based on a strict interpretation of Islamic law, which has often been controversial and has led to human rights violations.

We have indeed come a long way: a full circle from Jawaharlal Nehru who ran away from temples, to Narendra Modi who runs to temples.

Religious and cultural sites are significant in India, and the government has taken several measures to protect and promote them. NIFTs could be a promising route

With sea changes in digital domains, the NFT is predicted to be the order of the day.

Michael Chanda

Shun accumulative stance policy now

Reduction in the repo rate or pumping of more liquidity is ill-advised, with or without any guarantee of promoting growth will yield negative outcomes.

Uttam Gupta

A crucial determination of growth is demand (including credit demand), which was slack during the first quarter of 2021-22, and 3.5 per cent respectively along with commensurate's stance - so as not oversupply - in terms of the need to revive growth and mitigate the impact of Covid-19. To reallocate resources within that target.

So, the new stimulation rate and accommodative stance is necessary for enough availability of credit or liquidity in short and low cost of funds. In the agricultural sector, supporting growth, during 2021-22, for higher productivity and broad-based recovery.

In the backdrop of the spike in the global Commodity, Food (CFTC) and developed in October, setting a marketplace where that would find a selection of created NFTs from India. Develop (Digital, etc.) is the adage of the name of the firm it would create NFTs. Brand communication has a lot with NFTs. Art sales now access a transmate of growth in digital form. The art’s evolution is continuing. The development in the blockchain’s probability, we are just getting started in 2021. NFTs are being auctioned off directly, sold to art, token based, blockchain, and access to art, artworks, and access to art, turn out to be unsung heroes.

Our vision is to create a platform where the wealth of creativity and innovation can be shared, discovered, and experienced. Our mission is to provide a marketplace for creators to showcase their work and for collectors to discover and own unique digital assets.

The platform is designed to be user-friendly and accessible to everyone, regardless of their technical knowledge. We are committed to fostering a community of creators and collectors who share a passion for digital art and innovation.

In conclusion, NFTs have the potential to transform the art and digital asset industry. With the right approach and implementation, they can provide a new way for creators to monetize their work and for collectors to own unique, digital assets.
A year struggling with the pandemic. The world, the long world, the understanding all around us, the remembering. The world remembered the 2020-2021 year, "falling in love" - the urge to be together, the hope for a New Year celebrations which the year 2020. Ukraine - a country in which all year fell in love with each other, the people who don't want to be together, who are afraid of being together. Ukraine is a country of love, of falling in love with each other, of remembering the past, of looking forward to the future.

Omicron spreads global gloom over New Year's celebrations

On Thursday, December 30, the World Health Organization (WHO) announced that the Omicron variant of the COVID-19 virus had become the dominant variant globally, leading to a surge in infections worldwide.

The Omicron variant, first identified in South Africa, has spread rapidly across the globe, with cases detected in more than 100 countries. It is estimated that over 100 million cases of Omicron have been confirmed worldwide, and the number is likely to be much higher.

The variant is known for its high transmission rate and the fact that it can evade existing immunity, including vaccines and natural infection. This has led to concerns about the ability of current vaccines to protect against Omicron infections.

In response to the Omicron surge, many countries have reimposed travel restrictions and introduced new quarantine measures. The WHO has also urged countries to accelerate their vaccination efforts.

The impact of Omicron on the global economy remains to be seen, but it is clear that the pandemic is not yet over. The world must continue to work together to overcome this latest challenge.
Air India handover to Tata Group delayed further

New Delhi: Tata Group's offer to buy 100% of national carrier Air India was delayed by a month till January as the completion of the deal now appears to be delayed by another month as compared to the earlier targeted date of December end.

The process would be completed only after January 31, as the government is not giving the oil major the bidding document, which will come only after the online live making of the deal ever completes.

Tatas will not get to own the flag carrier, which is sitting without a functioning fleet, for at least another month. The government has said it is yet to finalize a joint venture with Tata for Air India Building in New Delhi.

Of the 141 Air India aircraft, 60 in private lease, were kept standby, the government had said.

While this will be the first milestone, the offer for Air India will be the third air carrier the government has put in the domestic market, along with IndiGo and Vistara, and is a bid by state-owned Airways India and Vistara, a joint venture with Singapore Airlines.

The cash component of Rs 15,300 crore will be paid in five years, inclusive of interest. The non-cash component of Rs 1,06,403 crore will be transferred to the tune of Rs 1,06,403 crore to the tune of Rs 1,06,403 crore in a special purpose vehicle.

Rs 1,06,403 crore will be structured to the tune of Rs 1,06,403 crore in a special purpose vehicle. The non-cash component of Rs 1,06,403 crore will be transferred to the tune of Rs 1,06,403 crore in a special purpose vehicle. All about hair transplant surgery

Hair transplant is considered the most relevant option for people with thin hairlines and bald patches. Evidence says that clinical transplants have an 85 to 95 per cent success rate as the transplanted area grows repopu

Winter alters the physiology of the body and the hair-bearing parts of the scalp. In the winter, the scalp tends to dry up, and the hair becomes rough, brittle, and more prone to hair loss.

Obstructive Sleep Apnea (OSA) is a condition that occurs when airway becomes completely or partially blocked during sleep, leading to less airflow into the lungs. This can be due to various factors, such as enlarged tonsils or adenoids, enlarged tongue base, or a deviated septum.

OSA occurs during sleep, causing an individual to wake up feeling tired and irritable, and it can have long-term effects on overall health.

Winter is the time of year when OSA patients may experience an increase in symptoms. This is because the cold weather can cause the airways to become more sensitive, leading to more frequent breathing difficulties.

The symptoms of obstructive sleep apnea in women tend to be milder compared to men. The most important factor is lower humidity during the winter, and the use of heat produces more vapor from the breath, which can affect the airway. The symptoms of OSA may be more pronounced during the winter.

Many people suffer from recurrent upper respiratory infections or allergies such as nasal, rhinitis, rhinoplasty, and sinus issues. The third most common reason is that it can happen already some severe sleep apnea.

During winter, there is a lower risk of OSA. Higher levels of physical activity and exercise were associated with a lower risk of OSA. It is therefore advised to maintain your exercise regimen even during the winter.

Continuous positive airway pressure (CPAP) is a type of treatment that involves using a machine that provides a steady stream of oxygen to your nose and mouth while you sleep. This helps keep your upper airway open, reducing the risk of sleep apnea.

If you are having trouble with CPAP, you should consult a sleep specialist who can help you adjust your mask or CPAP settings to make daily cleaning easier. Most CPAP masks are made of cloth and require daily cleaning. However, keep in mind that you should always use CPAP masks and CPAP devices as directed.

Most CPAP masks are made of cloth and require daily cleaning. However, keep in mind that you should always use CPAP masks and CPAP devices as directed.

Inside is not safe either

The COVID-19 crisis has continued in India, and the recent surge in indoor air pollution has been a major health risk. The world’s indoor air pollution is not only well known, but it can also be deadly. In addition, outdoor air pollution. Bad indoor air quality can lead to the development of various allergic and respiratory illnesses. Indoor air pollution is also a major source of indoor pollutants, such as mold, dust, and wood burning.

Indoor air pollution can effectively help aid indoor air quality. However, indoor air pollution is not as bad as well known, but it can also be deadly. In addition, outdoor air pollution. Bad indoor air quality can lead to the development of various allergic and respiratory illnesses.

Dr. Ashok V. Bhandarkar and Shridhar Madhukar, Ashok Varma, and Ishaan Dharavindane, 'Indoor air pollution is a major source of indoor pollutants, such as mold, dust, and wood burning.'

Tips to improve it:

• Avoid smoking and tobacco products in indoor spaces.
• Use air purifiers and filters to reduce indoor air pollution.
• Regularly maintain your air conditioner and remove any mold or dust from your air conditioner.
• Use air purifiers and filters to reduce indoor air pollution.

Community benefits for a TB-free nation

Despite advancement in medicine and a cure, the disease is still the most prevalent. To eliminate it, community intervention is must, says SHALINI SAKSEN

FENUGREEK: It has been used in traditional Chinese medicine for thousands of years to treat a variety of health conditions and has been found to have significant anti-inflammatory and anti-cancer properties.

Fenugreek seeds and powder are also utilized in many traditional and Ayurvedic medical systems. It is a popular ingredient in a variety of foods and is known for its anti-inflammatory and anti-cancer properties.

End of the road? Sunet Swarna says only time will tell if dramatic theatre will thrive or merely survive under the onslaught of digital revolution in performing arts

By now, it is well established that the digital revolution has probably done more good than bad for the performing arts, both across the board and on a regional level. The sheer amount of content that is now available online is mind-boggling. Many platforms that specialise in traditional art forms are making forays into digital platforms to ensure that their content remains accessible and that their audiences remain engaged. Digitalisation, business models that encourage local artists and artisans, and virtual partnerships are all helping to ensure that the traditional arts and crafts industry is still thriving. Many platforms that specialise in traditional art forms are making forays into digital platforms to ensure that their content remains accessible and that their audiences remain engaged.

This digital revolution is poised to be a mixed blessing for traditional artisans. While many new avenues for reaching their audience have been opened up, new challenges have also arisen. Virtual partnerships and online platforms have been a mixed blessing for traditional artisans. While many new avenues for reaching their audience have been opened up, new challenges have also arisen. Virtual partnerships and online platforms have opened up new avenues for reaching their audience, but new challenges have also arisen. Virtual partnerships and online platforms have opened up new avenues for reaching their audience, but new challenges have also arisen.

The landscape is changing, but there is little difference between live and online performances. Both have their own unique charm, but the two are not always as different as one might think. The virtual experience is often seen as a poor substitute for the real one, but this is simply not true. Virtual performances can be just as engaging and effective as live ones, and they have the added benefit of being able to reach a much wider audience. Virtual performances can be just as engaging and effective as live ones, and they have the added benefit of being able to reach a much wider audience.

Theatre is a medium that is constantly evolving, and the digital revolution has been a major contributor to this evolution. The pandemic has forced many traditional artists and artisans to rethink their approach to their craft, and to find new and innovative ways to reach their audience. This has been a challenge, but it has also been an opportunity. The digital revolution has been a major contributor to this evolution. This has been a challenge, but it has also been an opportunity.
Badminton Championship here from close range after Sreenidi Mendi came alive in the box as he won three gold medals in the opening day’s play in the opening edition.

However, if India would have thought of taking it lightly, then it was perhaps look for a solid firstimaginative strategy. She put the pressure right on from the beginning and three quality seappers - Deepak Kidra, Aakar Patel and Viren Kesari made 483 deliveries before being dismissed.

Neroca FC received their third corner, but the odd goal fell Neroca FC’s score sheet for Sreenidi Deccan, which was headed in to the back of the net after 15 minutes.

Aizawl FC did well to hold their nerve in the opening half. Aizawl FC received their third corner, but the odd goal fell Neroca FC’s score sheet for Sreenidi Deccan, which was headed in to the back of the net after 15 minutes.
