Covid-19 IN INDIA

TOTAL CASES: 2,43,60,610 (+3,14,381)
DEATHS: 2,65,976 (+3,623)
RECOVERED: 2,04,08,080 (+3,34,607)
ACTIVE: 36,76,436
MAHA: 52,69,292 (+42,582)
K'TAKA: 20,88,488 (+35,297)
KERALA: 20,50,890 (+39,955)
UP: 15,80,980 (+17,745)
DELHI: 13,72,475 (+10,489)

CAPSULE

MONSOON TO MAKE EARLY ARRIVAL OVER KERALA

New Delhi: The southwest monsoon is likely to arrive over Kerala on May 31, a day earlier than its normal onset date, the India Meteorological Department (IMD) said on Friday. The normal onset date of monsoon over Kerala is June 1.

NO DECISION ON PENDING CLASS XII EXAMS: CBSE

New Delhi: The CBSE said on Friday that it has not taken any decision yet on Class XII board exams even as a section of students and parents have been demanding cancellation of exams in view of the Covid-19 pandemic situation.

BSF RECOVERS AK-47 RIFLE DROPPED BY PAK DRONE

Jammu/New Delhi: The BSF on Friday recovered an AK-47 rifle, a pistol and some ammunition dropped by a Pakistani drone from the border belt of Samba district in Jammu & Kashmir, officials said. The drone is suspected to have flown back into the Pakistani territory after it dropped the consignment, officials said.

Goa still gasps for oxygen, 13 deaths raise toll to 75

PNS ■ NEW DELHI

The horror at the Goa Medical College and Hospital (GMCH), the State's largest Covid-19 facility continued as oxygen shortage killed 13 more Covid-19 patients in the dark hours (between 1 am and 6 am) of Friday, taking the tally to 75 in the last four days.

As per the State Government statistics, 26 patients died at the GMCH during the wee hours of Tuesday, followed by 21 on Wednesday, 15 on Thursday, and 13 on Friday (total 75).

Even as hospitals in Goa see a surge in Covid-19 cases, the scenes at crematoriums in the coastal State are equally grim as bodies continue to

line up for last rites. Goa's coronavirus caseload rose to 1,32,585 after 2,455 patients tested positive for the infection on Friday.

According to a resident doctor of GMCH wards, pressure in the central pipeline started falling around 1 am on Thursday, and three patients in his ward succumbed to the fluctuations, despite their attempts to revive them.

"Relatives called us frantically saying patients were gasping for breath and their saturation levels (SPO2) had dropped to 40-50," the resident doctor said, adding, on the night of Wednesday-Thursday, there was a drop in oxygen pressure at least five to six times.

They drank, danced while enemy crept in

PNS ■ PANJIM

When the first Covid-19 waves swept through the country last year, Goa remained largely unaffected. Of course, tourism, the main source of livelihood, took a serious hit, but Goans were able to keep both infection and fatality at the low end of the scale on a national basis.

The Goans threw caution into the sea and celebrated Christmas and New Year as if corona were a long forgotten tale of horror. Few wore masks or took any precaution as they drank and danced and kept alive the spirit of Goa.

But the recklessness of the past few months has now come to haunt Goans. The State with just around 1.5 million population sparsely scattered settled along the Arabian Sea has emerged as one of the worst

affected places in India in terms of positivity rate. Only Rajasthan and Sikkim are ahead of Goa's positivity rate of around 40-50 per cent over the week.

Goa now has a fatality rate of 1.5 per cent which is much higher than the national average of 1.2 per cent, and for every 100 confirmed cases, 25 are currently infected.

The situation is so grim that Goa's total death count more than doubled from 964 to 1,937 in just three weeks. Nearly ten per cent of the current casualties are those who were suffocated to death for want of oxygen.

Goa tourism bears brunt

RAJESH KUMAR ■ NEW DELHI

With a drastic fall in the arrival of domestic and international tourists due to Covid-19, Goa tourism has taken a big knock.

The State's restaurants, pubs and beaches are deserted due to the imposition of night curfew, ban on international flights, curtailed domestic flights, restriction on visitors and an unrelenting spike in Covid-19 cases and deaths.

Nearly 2,100 of the total registered 3,500 hotels have downed their shutters, 5-star hotels have slashed their rates by nearly 50-60 with a meagre occupancy rate of 5-10 per cent, which is a drastic drop from a high of 80 per cent occupancy in March this year.

Footfall in casinos is paltry, and phones of car/bike rental companies have fallen silent.

Top officials said visitors from other States are not coming as the Government has made it mandatory to carry a negative Covid-19 test report or a vaccination for visitors from other States. Over two dozen film and TV serial makers and their units that moved from Mumbai and Chennai recently shifted their shootings to Goa, now returning back as the shooting for permission has been withdrawn due to a spike in Covid cases.

Patia crematorium to be ready by May 25

BMC Commissioner visits site

PNS ■ BHUBANESWAR

Taking note of the rising number of bodies and pressure on the Satya Nagar crematorium, Bhubaneswar Municipal Commissioner (BMC) Sanjay Kumar Singh on Friday visited the upcoming crematorium site at Patia to take stock of the construction works.

He instructed the officials to make the new crematorium ready for operation from May 25 to help city residents perform the last rites of their deceased ones without problem.

The Commissioner said the Patia crematorium is an LPG crematorium, which would greatly help in cremation

of bodies much faster than the traditional one. This crematorium has been designated for

cremation of deceased Covid-19 patients.

Meanwhile, the lone electric burner at Satya Nagar that had been lying defunct since August last week, has been repaired and is in use. The burden on the crematorium has increased due to the restrictions on funeral at the Puri Swargadham.

In a similar development, a crematorium at Bharatpur would become operational in a couple of days.

Low pressure over Bay: Cyclone likely next week

PNS ■ BHUBANESWAR

The India Meteorological Department (IMD) on Friday predicted formation of a low pressure area in atmosphere over the Bay of Bengal which can develop into a tropical cyclonic storm (cyclogenesis) next week between May 21 and 27.

IMD sources said that the ECMWF and NCEP GFS models are indicating likely formation of a low pressure system over the Bay of Bengal during the period

"NCEP GFS is showing its intensification and cyclogenesis over east central and adjoining northeast Bay of Bengal towards the latter part of week," the IMD said. There is also a 'Low' probability (1% to 33%) existing for cyclogenesis over east central and adjoining northeast Bay of Bengal.

State forms expert panel on black fungus

PNS ■ BHUBANESWAR

The State Government seems to be serious on identification of black fungus disease as it has spread panic among both medical fraternity and Covid patients across the country.

Following the detection of black fungus symptoms in a Covid patient in Bhubaneswar, the State Government on Friday formed a seven-member medical expert committee to suggest guidelines for the patients and further analysis of the cases.

The committee would be headed by the SCB Microbiology Department HoD with medicine, ENT and chest experts as members.

The Government also asked medical college hospitals to form expert teams at their levels and let the Government know about black fungus patients, if any.

Innumerable bodies float

RAMESH K SINGH ■ VARANASI

It all started with the recovery of a handful of bodies from rivers across Uttar Pradesh. The small count increased to hundreds and now it is estimated that thousands of bodies were recovered and then buried in the sand across the State and the river highlighting the devastation corona has unleashed on the rural parts of the State. The people living along the rivers like the Ganga and the Yamuna recount that not a day passes when they do not come across 10-12 bodies floating in the river.

"If you take the full stretch of the Ganga which is around 1,100 kms, then thousands of bodies have been found in last fortnight either floating or buried in the sands across the two main rivers," Sanjay Dutta, a volunteer of Bondhu Mahal Samiti, a philanthropic organisation, said. The organisation is helping Covid positive people and their family members and even cremating unwanted bodies, he said in Kanpur.

Swiss to give India key to Anil Ambani treasure trove

Swiss court agrees to share with Indian Govt details of bank accounts of wife Tina, 2 sons also

PNS ■ NEW DELHI

In more troubles for the debt-ridden industrialist Anil Ambani, Swiss Federal Court has agreed to share information with the Indian authorities about the bank accounts of him, his wife Tina Ambani, and their two children Jai Anmol, and Jai Anshul, according to the Swiss media.

Swiss newspaper *Gotham City* on May 12 reported that Indian Finance Ministry's Foreign Tax and Research Division filed a petition in the Swiss Federal Court for getting details of the bank accounts

operated by Anil Ambani. According to *Gotham City*, the court's order came on April 29. The newspaper confirmed from the registrar's office that the order directed to banks named Anil, Tina, Jai Anmol, and Jai Anshul Ambanis, though the order available in the public domain shows only A, B, C, D due to privacy issues. *Gotham City's* reporter Francois Pilet reported that the court registrar's office

allowed him to see the actual names. "As court reporters, we are allowed to see the names of the parties in every decision on the Swiss Supreme Court," he explained to news portal News Laundry.

Another international investigative portal Global Investigative Review (GIR) on Friday reported in detail about the Swiss court's direction to banks to disclose the details of bank accounts of Anil Ambani and their family. According to Swiss media reports, earlier an Indian whistle-blower approached the Swiss courts seeking Anil Ambani family's bank accounts. Later the Indian Government too filed the petition, they said.

Recently, in a case filed by Chinese banking consortium, Anil Ambani deposited in a London court that he has no money and is living with brother Mukesh Ambani's help.

INSIDIOUS BLACK FUNGUS

PNS ■ NEW DELHI

It appears that Covid-19 is not the only calamity that India may have to deal with in the coming days. There are people who are still trying to deal with the chaos, destruction and death that the second wave of Covid-19 has brought. The next punch comes to hit the country is black fungus or mucormycosis. The rising number of black fungus patients, especially in Maharashtra where 111 patients, all Covid-19 survivors, are undergoing treatment according to the Brihanmumbai Municipal Corporation, is a cause of worry.

Mucormycosis, also referred to as zygomycosis, is a serious but rare fungal infection caused by a group of molds called mucormycetes. These molds live throughout the environment. When someone breathes in these spores, infection in the sinus or lung can occur. It primarily affects people who have health problems or take medicines that lower the body's ability to fight germs and sickness. It is affecting Covid patients more because of prolonged administration of steroids and subsequent immunocompromised state.

Dr Monalisa Sahu, Consultant Infectious Diseases, Yashoda Hospitals, Hyderabad shares dos and don'ts to follow to prevent black fungus.

DOS:	DON'TS:
<p>1) Keep high index of suspicion of mucormycosis in the below mentioned group of patients, as they are at high risk of developing the disease:</p> <ul style="list-style-type: none"> • The Covid-19 patients with uncontrolled diabetes and diabetic ketoacidosis • Those who have received high dose of intravenous or oral steroids for prolonged period or those who have received immunomodulators <p>2) Patients with Covid-19, active/recovering/post-discharge: These symptoms should be immediately intimated to the treating doctor</p> <ul style="list-style-type: none"> • Rhino-orbito-cerebral mucormycosis: <p>• Nasal blockage or congestion Blackish or</p>	<p>• bloody nasal discharge Facial pain, numbness or swelling Headache Pain in the eyes and orbit Toothache, loosening of tooth or jaw involvement Blurring or double vision with pain Tingling sensation on face Fever, and blackish skin lesions</p> <p>• Pulmonary mucormycosis:</p> <p>• Fever Cough Chest pain Blood in sputum after cough Worsening respiratory symptoms</p> <p>3) Diabetic patients with Covid should target strict glycemic/glucose control, as uncontrolled diabetes itself is a risk factor for mucormycosis</p> <p>4) Patients should monitor their blood glucose post Covid discharge from hospital, and more so in diabetics</p>
<p>• The most common type of mucormycosis is rhino-orbito-cerebral mucormycosis, comprising around 70-75% of the cases, pulmonary mucormycosis seen in 15-20% of the cases and rarely gastrointestinal mucormycosis has also been detected</p> <p>• The cases of Mucormycosis have been presenting as early as 8-10 days after detection of</p>	<p>• disease require aggressive management, including extensive surgical debridement of the involved tissue along with intravenous antifungals followed by oral antifungals for a period of at least six weeks to three months</p> <p>• The antifungals being used to manage the disease include liposomal Amphotericin B, isavuconazole, posaconazole and Amphotericin B deoxycholate</p>

State's records 12,390 Covid cases, 22 deaths

• Highest new +ves in Khordha again at 2,201
• Total death toll surges to 2,273

PNS ■ BHUBANESWAR

The State reported an all-time high of 12,390 Covid-19 positive cases in all 30 districts and the State pool on Friday, with which the total tally increased to 58,8,687.

Information and Public Relations Department said.

And on the day, the State registered a record 22 Covid deaths, with which the total toll surged to 2,273. Angul district recorded three deaths, Khordha four including two from Bhubaneswar, two each from Kalhandi, Kendrapada, Rayagada and Sundargarh and one each in Ganjam, Gajapati, Boudh, Cuttack, Balangir and Kandhamal.

As for the new positive cases, Khordha district once again registered the day's maximum at 2,201 followed by

Sundargarh with 882, Cuttack 719, Sambalpur 677, Angul 532, Bargarh 507, Mayurbhanj 480, Puri 469, Balangir 461, Jharsuguda 413, Bhadrak 412, Nabarangpur 362, Ganjam 387, Baleswar 340, Nayagarh 301, Jagatsinghpur 259, Koraput 246, Boudh 228, Kalahandi 210, Keonjhar 208, Nuapada 204, Rayagada 187, Subarnapur 178, Kendrapada 137 and Malkangiri 103.

Besides, 352 cases were reported from the State pool. Currently, the active cases in the State stood at 1,04,016 and the cumulative samples tested were 1,07,69,312.

988 new Covid cases in BBSR

BHUBANESWAR: State capital city Bhubaneswar on Friday recorded 988 new positive cases, with which its total tally rose to 59,163. Out of the new cases, 822 were local contacts and 166 were reported from quarantine centres.

The local contacts included 51 cases from Old Town, 50 from Patia, 49 from Nayapalli, 23 from Rasulgarh, 21 from Saheed Nagar and 55 each from Shastri Nagar, Unit-3 and Unit-9.

Currently, the active cases in the city stood at 11,418. On Friday, two cases of death were reported in the city. Till now, 289 persons have succumbed to the disease.

On the day, 777 persons recovered, taking the total recoveries to 47,435 in the city.

On Akshaya Tritiya eve

CM announces transfer of ₹920 cr to 42L farmers' a/c

'Kalia Yojana to alleviate their debt burden'

PNS ■ BHUBANESWAR

While congratulating farmers on the eve of agrarian festival Akshaya Tritiya to be observed on Saturday, Chief Minister Naveen Patnaik on Friday announced transfer of Rs 920 crore to the accounts of 42 lakh farmers in the State under the Kalia Yojana for Kharif season 2021.

Patnaik hoped that with the Kalia Yojana help, all small, marginal and landless farmers would utilise the amount for agriculture and to revive their life and livelihoods.

Patnaik said the Kalia scheme is the best in the country and it has brought smiles in the faces of farmers. It has also

helped alleviate the debt burden of farmers, he said. He described the farmers as "our pride and glory" and

said there is no comparison of the sacrifices of the farmers for the country and the society.

Patnaik reiterated his commitment for the wellbeing of the farmers. "Farmers in my State, stay well. May their income increase and his family prosper! I will continue to work for them," he said.

"As we are passing through a difficult period of Covid-19's second wave, the Government has announced lockdown, but there is no lockdown for agricultural operation. Farmers can start cultivation taking care of Covid guidelines," he said.

Patnaik wished that this year would be good for the farmers' all-round development with favourable climate conditions and bumper crops.

State recommends mask for kids above 2 years

As per Indian Academy of Paediatrics' advice

PNS ■ BHUBANESWAR

With many children getting affected by Covid-19, all those above two years have been advised to wear masks.

The Indian Academy of Paediatrics has advised for use of masks by children before stepping out of their houses and parents are asked to ensure it.

Newer symptoms such as diarrhoea, vomiting, stomach pain, etc., in addition to the earlier symptoms of cold, cough, fever, loss of smell and taste, poor feeding in infants and any other medically-indicated conditions in children, pregnant and lactating women and adolescents may be considered for suspecting Covid-19.

Persons belonging to any age including children having any symptoms of Covid-19 must go for testing, isolation

and medical advice as per the World Health Organisation's (WHO) guidelines.

With many children getting affected during the second wave of the pandemic, the Odisha Department of Health & Family Welfare has advised the Department of Women & Child Development to issue a fresh advisory while including several important points.

ACS, Health & Family Welfare Pradipta Kumar Mohapatra has issued the directive in this regard while advising the Principal Secretary of Department of Women and Children to incorporate the above advisory in view of children being affected due to the

second wave of Covid.

Mohapatra has pointed out that the Union Ministry of Health & family Welfare has issued a protocol of management of Covid-19 for the paediatric age group, which is needed to be adopted and implemented.

Seamless delivery of med essentials by BPIA

PNS ■ BHUBANESWAR

Everyday, the country's airports are transporting medical essentials and equipment across the nation to strengthen the fight against Covid-19. The Biju Patnaik International Airport (BPIA) in Bhubaneswar and its stakeholders have also been playing an active role by facilitating seamless transportation of medical equipment and materials 24x7.

A total 669 boxes (20.53 MT) of Covid vaccines have been transported through various airlines till May 9 through the Biju Patnaik Airport. To overcome the oxygen crisis of the country, a total of 156 empty oxygen tankers, 526 oxygen concentrators and 140 oxygen cylinders were transported by 75 Indian Air Force aircrafts like C17, C130J, AN 32 from April 23 to May 11.

As many as 41 pieces of oxygen concentrators were transported through various airlines also. Transportation of

3,500 pieces of 10 litre seamless cylinders and 1,520 pieces of 46.7 litre seamless cylinders are in pipeline and the consignment is expected within a week from foreign countries.

Besides, the Bhubaneswar airport is also following all the Covid-19 related guidelines and protocols as per the instructions of Central and State Governments to ensure a safe journey for passengers.

The airport staffs are making continuous requests to all the passengers, stakeholders, visitors, employees etc. to always follow Covid

appropriate behaviour and maintain staggered timing to minimise crowding. To create awareness regarding Covid appropriate behaviour, ensuring safety of passengers, the airport is also displaying instructions through several electronic and permanent displays at the terminal.

The airport has also organised Covid vaccination camp for employees of AAI and other stakeholders in collaboration and with support from the Government of Odisha, taking all safety measures into consideration.

No 2nd Covishield dose if gap less than 12 weeks

PNS ■ BHUBANESWAR

A day after the Centre increased the time interval between two doses of Covishield vaccine to 12-16 weeks from 6-8 weeks, the Odisha Government on Friday announced that the revised gap would be followed in the State with effective from May 14 midnight.

The Health and Family Welfare Department has written a letter to all district Collectors, Municipal Commissioners, Chief District Medical Officers (CDMOs) and Public Health Officers (PHOs) to ensure this.

Accordingly, no online or on-site appointment would be allowed for the second dose of Covishield if the gap period is less than 84 days (12 weeks), the depart-

ment said.

Appointments already booked online for the second dose are not being cancelled by COWIN. Beneficiaries may be advised through suitable IEC that they should reschedule their appointments. However, if a pre-booked beneficiary chooses to take the second dose of the vaccine even if the time interval is less than 84 days, the COWIN system would allow vaccination of such beneficiaries, the letter stated.

The department further stressed that as the load of beneficiaries due for the second dose of the vaccine at the district level would be minimal, priority would be given to vaccinate the first-dose Covishield beneficiaries such as frontline workers and people aged 45 years and above.

N'kanan closure extended

PNS ■ BHUBANESWAR

The authorities of the Nandankanan Zoological Park (NZP) and the State Botanical Garden on the city outskirts have further extended the closure of the two facilities in view of the surging Covid-19 cases.

"Closure of Nandankanan Zoo and State Botanical Garden has been extended until further orders as a precautionary measure against the deadly virus," said the Deputy Director of the zoo on Friday.

Earlier, the authorities had closed the zoo and the botanical garden for visitors with effect from May 1 till May 15.

During the closure period, sanitisation drive will be carried out at the zoo to prevent transmission of the virus.

'Auction Odisha's bauxite mines on priority basis'

The State can also auction abundant bauxite reserves which have the potential to garner ₹5,000 crore

PNS ■ BHUBANESWAR

Odisha alone has the potential for multi-fold growth in bauxite production from current 12-13 million tonnes to over 50 million tonnes per annum to meet the domestic bauxite requirement of the nation and curb imports.

The State can also auction abundant bauxite reserves which have the potential to garner Rs 5,000 crore for the exchequer and 10,000 liveli-

hood opportunities for every mine auctioned.

Odisha can take a cue from the success stories of mineral-rich developing countries like Guinea in West Africa or even developed countries like Australia. Their concerted efforts to unlock their mineral power saw large-scale economic development and global dominance in the world's supply chain. Successful auction of bauxite mines will further attract huge investments in the State wherein fresh investments of over Rs 2 lakh crore are envisaged in aluminum sector to meet the growing demand.

This will ensure optimum utilisation of domestic natural resource, saving precious foreign exchange, generate huge local employment opportunities and yield rich socio-economic dividends for the State. Highlighting Odisha's bauxite importance

in charting India's aluminum dream, geologist and former Executive Director, Nalco, and ex-advisor, Ministry of Mines RC Mohanty said, "Per capita consumption of aluminum in India is about 2.5 kg, compared to the world average of about 11 kg and China's 24 kg, while many developing countries have already reached 8 kg. Our ambitious economic growth would surely increase this to 7 kg to 8 kg., matching other developing nations. This will push aluminum requirement from present levels of 4 million tonnes to 12 million tonnes per annum, which will require an increase in bauxite mining from current levels of 24 million tonnes to at least 72 million tonnes."

The import of bauxite, one of India's most abundant ores, has caused an estimated forex loss of over 571 million dollars in the last six years alone. It is a matter of great

concern that despite its relevance and recognition as one of the 12 champion industries, no metallurgical grade bauxite mines has been successfully auctioned in the last six years since the inception of MMDR Act 2015. Planned new investment of over Rs 50,000 crore in the aluminum sector has been put on hold due to this bureaucratic chokehold. For India to achieve its manufacturing vision, a rapid growth in bauxite production from the current 20-22 million tonnes to 72 million tonnes per year is needed to meet the growing domestic requirement.

The catalyser in this growth trajectory will be how India taps its vast deposits of bauxite. Despite one of the world's largest deposits, the possible key to fast-track India's development is being ignored, as a bauxite mining is yet to be prioritized.

Kumar takes IDCO charge

PNS ■ BHUBANESWAR

Senior IAS officer Dr Krishan Kumar has taken charge of the CMD of the Odisha Industrial Infrastructure Development Corporation (IDCO). Dr Kumar harped on the 5T charter of the State

Government and directed the officials to prepare an action plan accordingly.

Known for his tech-savvy approach, Dr Kumar advised to send any complaints to him by email so that it would have his personal attention and facilitate early resolution.

Liquor home delivery opposed by MONNA

PNS ■ BHUBANESWAR

As Odisha is reeling under a peak Covid-19 crisis, the State Government's decision to allow home delivery of IMFL and country liquor is absolutely anti-people as it would further escalate the Covid problem, said Milita Odisha Nisha Nibarana Abhijan (MONNA) president Padma Charan Nayak in a Press release on Friday.

Nayak said, "The Odisha Government is facing a herculean task to arrange required number of vaccines for its citizens. So far, a major portion of the population has not received jobs. People are adopting all measures to boost the immunity level of their family members. Now, the Government's move to make liquor home delivery will make the situation worse."

It's now renamed XIM University

The university authorities said they are deeply thankful to Governor, Chief Minister, MLAs and people of Odisha

PNS ■ BHUBANESWAR

In March 2021, the Xavier University, Odisha (Amendment) Bill 2021 was passed in the State Assembly renaming the Xavier University as 'XIM University'. This Bill has now received the consent of the Governor and has been

published as a Gazette notification. With this, the Xavier University has been renamed as XIM University.

The university authorities said they are deeply thankful to the Governor, the Chief Minister, the MLAs and the people of Odisha along with all stakeholders for this.

This renaming also helps in integrating both campuses of the university into a single legal entity with a shared structure, process, and procedure for better governance and administration of the university. Students will get more career prospects all over the world with the XIM brand name certificate, said a university release on Friday.

Nalco supports Angul, K'put Covid care facilities

PNS ■ BHUBANESWAR

The National Aluminium Company Limited (Nalco) is now supporting the 70-bed Covid Centre at the Saheed Laxman Naik Medical College, Koraput, to make it fully operational. Besides, it is also supporting the 66-bed Covid healthcare facility at the ESI Hospital, Banarpal, Angul by bearing the cost of the total operation and maintenance of the facility. The company would provide a safety net to the people residing in Angul and Koraput districts, where its operating units are located. Furthermore, the Nalco has also consented to strengthen the supply of oxygen by providing DG sets to the State Government for uninterrupted

power supply in oxygen units.

The company has developed infrastructure in the 200-bed Covid Hospital in Nabarangpur apart from running the two exclusive Covid Centres at its hospitals at Angul and Damanjodi.

Nalco CMD Sridhar Patra said, "As a responsible corporate citizen, Nalco collective has always stood with the people of Odisha in difficult times."

To strengthen the vaccination drive in the State, the Nalco has provided a refrigerated truck having a capacity 25,70,000 vaccine doses for safe transportation of vaccines across the State. It has also extended support to the State Health Department for procurement of a ventilator ambulances at a cost of Rs 1.16 crore.

GPS tracking of ambulances for better Covid mgmt

PNS ■ BHUBANESWAR

Putting technology to use for better Covid management and quick transfer of patients to the dedicated Covid Hospitals (DCHs) and Covid Care Centres (CCCs), the Bhubaneswar Municipal Corporation (BMC) has started GPS tracking of the emergency vehicles.

While the authorities have a fleet of 64 ambulances under the Covid management programme, 40 has already become GPS-enabled and the rest would be fitted with the tracking devices very soon. The Bhubaneswar Smart City Ltd (BSCL) is looking after the technological up-gradation part of the ambulances.

When a patient is referred for shifting to a DCH or a CCC after due tele-consultation at

BMC Covid care 24x7 Helpline "1929", operating from Smart City office, the BMC allocates an available bed in one of the hospitals or CCCs. An ambulance is alerted to pick the patient from his/her residence. These ambulances are now fitted with onboard GPS units for real time tracking. This provides an estimated time of arrival of the ambulance to the patient's residence just like one knows the location of a taxi when he books through various Apps on mobile phones providing taxi rental services.

Out of the 64 ambulances,

three each are with the three respective BMC administrative zones. This number will be increased by seven in each zone making availability of 10 ambulances at each zone.

In fact, presently there is an ORS officer, an ASO and a DEO to coordinate the ambulance availability at the zone level.

The rest 34 ambulances are at the Capital Hospital under a Central Ambulance Control Room. It is coordinated by an OAS officer. The other supporting staffs include an AYUSH doctor, an ASO and a DEO for the coordination activities. The supporting staffs work in three shifts for the ambulances at the Capital Hospital.

Save rivers from reckless dumping of Covid bodies

SARVESH KUMAR SHAHI

Recently, shocking news have been reported from north to south corners of the country about the dumping of human bodies, affected with Covid-19, into the rivers. In the second wave of the pandemic, people are dying in large numbers in villages and people out of fear are not helping one another. In such a scenario, they are dumping their dead into the rivers.

Bodies were spotted by the villagers in the Ganga and Yamuna rivers in Bihar and Uttar Pradesh, the States where we perform thousands of rituals near rivers and we worship them for their sacredness. On May 11, several bodies wrapped in plastic bags were seen floating in Gazipur and Hamirpur districts of Uttar Pradesh. Similar cases were found in Bihar's Buxar district. The

biggest fear among locals is that these bodies can be eaten by stray dogs and birds which will further spread corona virus. Now, instead of taking action on people causing these malafide acts, the State authorities are playing blame game against each other.

Moving to the west, act of dumping bodies in Narmada river is reported in Gujarat and in Madhya Pradesh also. During the Spanish Flu in 1918, India witnessed similar scenes of bodies floating in the river Narmada. That pandemic had killed around 13.88 million people in India.

In south, the garbage dumping activities in river have been a major issue reported in recent times.

These kinds of incidents are showing that the condition of health infrastructure in India has not been changed much since colonial era. Crematoriums and burial

grounds are running out of space. Funeral pyres are being lit in car parking lots and along pavements. Charging high amount of fees by the ambulance drivers and shortage of beds in the hospitals are a common sight. Images of people scrambling for funerals and burials have flooded the world media. More than 250,000 people have died so far in the pandemic that began more than a year ago. Poverty is one reason for the bodies flowing in the Ganges because it costs a lot to burn bodies. Also, the civic nature of humans has been a major concern. For that a mass-scale awareness campaign is required to curb the menace.

The major specific legislation which provides for the prevention of water pollution and to take care and maintain the water bodies is the Water Prevention and Control of Pollution Act,

1974. It also aims for promotion for restoration of water bodies. For better implementation of the Act, the Central Pollution Control Board and the State Pollution Control Board have been established by the Central and the State Governments. Under the Act, the board has the power to encourage and conduct research and investigation with a view of promoting, the prevention of contamination of water in a significant manner and also to advise the Central Government for the matters relating to environmental issues and for the prevention and control of water pollution.

The second major central legislation is the Indian Penal Code, 1860 where Section 277 lays down the provision to punish person who commits an offence of fouling of a public reservoir or a public spring voluntarily. He shall be

liable to be punished with imprisonment of three months or with a fine of Rs 500 or with both.

Apart from this, under the Wildlife Protection Act of 1972, robust protection is accorded only to river stretches passing through national parks and sanctuaries. Some States though do have provisions in their revenue laws or rules to protect rivers, Sections 29 and 35(6) of the Wildlife Protection Act prohibit the destruction of wildlife, including aquatic habitat and vegetation, and the diversion of the flow of a water body into or outside such areas.

These prime legislations derive their power from the Constitution of India, 1950 where Article 21, 48 and 51 (g) are given a liberal interpretation by the judiciary to include the right to clean water and environment under

its ambit. In the famous case of Narmada Bachao Andolan Vs. The State of India, [2000] 10 S.C.C. 664, the Supreme Court, held that the right to clean water is a fundamental right under Article 21 of the Indian Constitution.

Over the past few years, courts in India came out with several orders declaring rivers and lakes as entities granting them rights equivalent to a living person. In Salim v. State of Uttarakhand, (2017) SCC OnLine Utt 367 para 19, the High Court declared that "the Rivers Ganga and Yamuna, all their tributaries, streams, every natural water flowing with flow continuously or intermittently of these rivers, are declared as juristic/legal persons/living entities having the status of a legal person with all corresponding rights, duties and liabilities of a living person in order to preserve and con-

serve river Ganga and Yamuna."

Similarly, in Lalit Miglani vs State Of Uttarakhand, 2017 SCC OnLine Utt 392, the court stated that "Rivers and Lakes have intrinsic right not to be polluted. Polluting and damaging the rivers, lakes, water bodies, will be legally equivalent to harming, hurting and causing injury to person. They have a right to exist, persist, maintain, sustain and regenerate their own vital ecology system. The rivers are not just water bodies. These are scientifically and biologically living".

These orders may not be able to immediately control the destruction or exploitation of rivers but they could transform the legislative approach to nature and reduce the current domination of developmental projects over the protection of nature,

So, on the legal front, despite numerous legislations at State and central level, civic bodies seem to be helpless to check dumping bodies into the river polluting the life existing under river, and existing laws seem to be inadequate.

Thus, it is much expected to take immediate action on the issue of dumping bodies and take appropriate legal measures for prohibiting the same. It is suggested that increased police patrolling activities will definitely help to ensure further bodies are not dumped in the river. Formation of a Judicial Committee is much needed to inquire about the collapsed health infrastructure system in the country.

'Basic amenities of rural Odisha ignored in corona'

NHRC seeks report from CS on petition by rights activist

PNS ■ BHUBANESWAR

The National Human Rights Commission (NHRC) has directed the Chief Secretary of Odisha to look into the matter personally and act on health, chronic malnutrition and other allied issues of the rural areas of the State which are being neglected due to the ongoing corona pandemic and submit a report before the commission.

The direction of the NHRC came while disposing of a five-year-old petition filed by human rights activist and

Supreme Court lawyer Radhakanta Tripathy. In his initial petition, Tripathy had pointed out that due to lack of medical care and State apathy more than 500 tribal villagers of Bolangir were dying of illness and chronic malnutrition. They are deprived of the basic amenities which violate their basic human rights, he had complained.

Citing examples of such problems, Tripathy had stated that a three months old son of Jagannath Deheria, a resident of Gabharasa village in Bolangir, who was suffering from a condition wherein his limbs were getting thinner while his head and belly were increasing in size. He also stated that, the doctors could not diagnose what the victim's son was suffering from and the vil-

lage lacks the basic facilities. There are other people, mostly children who are suffering from chronic ailments and have no medical facilities.

On the basis of the petition, the NHRC had issued a notice to the Collector cum District Magistrate of Bolangir to submit a report. However, the Collector failed to submit the report in time.

Looking at the gravity of the issue, the NHRC directed to the Chief Secretary of Odisha to file a report on important issues related to rural areas like if every village/hamlet has access to the clean, safe, hygienic water and measures taken by the State Government to provide the same and if every village/hamlet has access to the primary healthcare centre.

Set up Covid hospital in Paradip: Sarkhel to Pradhan

PNS ■ PARADIP

Realising the seriousness of the Corona situation in Paradip in particular and Jagatsinghpur in general, local leader Arindam (Bapi) Sarkhel and his organisation Paradip Ersama Industrial Development Council (PEIDC) launched six free ambulances for Covid patients on Wednesday.

Besides, a control room has been set up with experienced doctors for giving free consultation to Covid patients. The facility will be available for all patients in Paradip Municipality, Kujang, Rahama, Tirtol and Erasama block areas. People can avail it by call-

ing on 9937138624 and 9556959684, PEIDC said in a statement. Besides, Sarkhel praised Union Minister Dharmendra Pradhan for his role in the fight against Covid-19 pandemic and urged him for setting up of a Covid Hospital at Paradip like he did recently in Madhya Pradesh and upgraded facilities at a private hospital in Bargarh. The hospital will cater to the need of the people of Jagatsinghpur and Kendrapada districts, he said.

Briefs

FOOD PROVIDED TO BEGGARS, DESTITUTE IN BBSR

Bhubaneswar: A team of Congress leader Rajiv Pattanaik is distributing food packets to beggars, destitute, mentally-retarded people and labourers in Bhubaneswar since the lockdown began. The team is also distributing masks and sanitisers to these people and making them aware about the life-threatening coronavirus and advising them to follow strictly the Covid-19 guidelines.

EID A LOW-KEY AFFAIR IN BRAHMAPUR

Brahmapur: In view of the Covid pandemic, the celebration of holy Eid-ul-Fitr remained a low-key affair in Brahmapur city. Instead of mass prayers in mosques, people of the Muslim community offered prayers at their homes. "And even in houses, we all maintained social distancing," said BJD youth wing vice-president SA Khallil. "It is our responsibility to keep corona at bay; and for that, we should follow Covid guidelines," he added.

NOBLE CAUSE HELPS B'PUR COVID PATIENTS

Brahmapur: The Noble Cause Group has joined hands with the Berhampur Municipal Corporation (BeMC) to help Covid patients. The organisation is providing oximeters, sanitisers and masks besides packed food to around 150 people at medical and the old bus-stand. On the International Nurse Day, sanitisers, laundry shampoo and masks were distributed among nurses at the Janana Hospital and the MKCG Hospital. A spokesman of the organisation said they are also trying to arrange oxygen cylinders for the needy patients at their doorsteps and a panel of doctors is serving round the clock providing online consultancy and prescribing medicines.

HAL ANNOUNCES 10-DAY SHUTDOWN

Koraput: The Hindustan Aeronautics Limited (HAL) Koraput Division announced a complete shutdown from May 15 to 23; and additionally, as May 14 being Eid holiday, this date also added. For these days, the employees will be out of work as a Covid precautionary step, said a company official. The employees have been asked to work additional three and a half hours per shift for next few days after the shutdown period to adjust the lost working hours.

Marriage stalled as groom found +ve

PNS ■ BALESWAR

A marriage, which was to be solemnised in Baliaipal, was stalled at the nick of time as the groom was detected corona positive.

The groom, who was working in Haryana, returned to his village and he was lodged in a Covid Care Centre for 14 days. Although he was asymptomatic, the sample collected came out positive on the day prior to wedding. The local Anganwadi Worker and ASHA Worker informed the family members of the groom asking to defer the marriage, but they were reluctant and wanted to go ahead stating that all preparations had been made for marriage. The health worker informed the matter to the local health authorities and the officials after visiting the house of the groom could convince them against the move. And the marriage was postponed, said reports.

Mumbai W Odisha forum provides O2 to Khariar

AJIT PANDA ■ NUAPADA

The Juhar Foundation, Mumbai (JFM), a civil society forum consisting of people of western Odisha living in Mumbai, has provided 10 oxygen cylinders to the Mukta Bichar Manch (MBM) at Khariar of Nuapada district for use of patients suffering from Covid-19.

MBM members along with a few journalists were present when the consignment arrived at Khariar.

"Paschim Odisha Parivar (POP), Mumbai, of which I am the founding father, in conjunction with Juhar Foundation, Mumbai took up the cause of distribution of oxygen cylinders in western Odisha districts to mitigate the Covid-19 difficulties. They provided ten oxygen cylinders to Khariar," said MBM convener Shrikant Chatterjee. "We will make a protocol for the use of the cylinders in agreement with POP and JFM," he added.

"Welcome initiative; we convey our thanks to JFM and POP. At present, there are 25 oxygen concentrators and 25 oxygen cylinders at the Khariar CHC out of which 18 OCs and 17 cylinders are in Covid Care Centre at Badi of Khariar block and rest are in Sub-Divisional Hospital, Khariar. The Oxygen Bank supported by JFM will further strengthen the oxygen reserve of Khariar region," added Prof Dr Panindam Deo.

Chatterjee further informed that in view of the ongoing crisis due to Covid-19, the Odisha Community of Japan (OCJ) has offered to extend a helping hand to Nuapada in close collaboration with the MBM. "They are sending ten oxygen concentrators," he said. "The Marwari Yuba Manch of Khariar is also providing oxygen support. However, I have learnt that there is a shortage of oxygen regulators and hand gloves in our CHC," informed Deo.

48 B'pur jail inmates Covid +ve

PNS ■ BRAHMAPUR

With the Covid-19 situation worsening, as many as 48 under-trial prisoners (UTPs) lodged at the Berhampur Circle Jail here have contracted the virus. The jail authorities informed that swab samples of 84 UTPs had been sent for RT-PCR test two days ago and reports of 48 have come out

positive. Meanwhile, a 100-bed Covid Care Centre has been set up in the jail premises for the inmates, said jail Superintendent Garib Chandra Sahu. Currently, a total of 927 prisoners are lodged in the jail, he added. Earlier in the first phase of the pandemic, several inmates of the jail had tested positive for the virus.

62-yr-old who cremates bodies as mission

In 11 years, he has cremated 10,000

UBACHAK MOHANTY ■ BALESWAR

At a time when most of the people are staying indoors due to Covid fear, a 62-year-old man of Baleswar town has been conducting cremation of corona deceased's bodies.

He is exposing himself to the risk of infection but his spirits to serve society at this critical juncture are high. He is Arun Kumar Kar, a resident of Aradbazar. Since 2010 he has been selflessly engaging him to cremate the bodies. For his noble gesture, he is very well known in the locality. In last 11 years, he has helped cremations of about 10,000 bodies. Kar had a photo studio

near Baleswar railway station and he had established himself as a professional in the field too. However, after winding up his studio for some reasons, he started doing social works, including helping relatives cremate bodies. Be it summer, winter or rainy season and whether it is day or night, Kar will be ready to help others in the matter.

In fact, a local committee of the Nayabazar area had formed a committee to renovate a cremation ground near Nuniajodi. The committee comprising over 30 members developed the ground with Rs 35 lakh and named it as Mukti Dwar. Ever since, Kar has not looked back. The trust board makes all arrangements to perform last rites in the ground and charges Rs 2,000. Kar is supervising and doing the cremation of bodies. Meanwhile, the district administration has identified Mukti Dwar as the only cremation ground for the bodies attributed to Covid.

OLM coordinator critically injured in attack

PNS ■ KENDRAPADA

Some miscreants on Wednesday attacked Odisha Livelihood Mission (OLM) Rajnagar block coordinator Rashmi Ranjan Dash with sharp weapons and injured him critically.

He is struggling for life in a Bhubaneswar based private hospital. His wife Swagatika Pati has lodged a complaint at the Rajnagar police station and the police have started an investigation by detaining suspected persons.

Rajnagar police station IIC Tapan Nayak said that in the FIR, Dash's wife alleged that while they were sleeping on Wednesday night, five to seven miscreants came to their house

and knocked their gate. When her husband opened the grill, the miscreants swooped down on him. Pati said her husband had disclosed her that one Manorama Mahunta had hired goons to attack him to settle an old score.

S'garh volunteers bury Covid body left for hrs

As kin, villagers show reluctance

MALAY RAY ■ SUNDARGARH

Josh Kujur (52), a resident of Deogaon of Subdega block of Sundargarh district, was working as an engineer in Angul-Rengali Odisha Hydro Project. He was found Covid positive four days ago. Since he was asymptomatic, he had remained in home isolation in his home at Rengali but he had become critical on Tuesday afternoon. When his oxygen level dropped, he was taken to Covid centre of Angul but he died on his way to hospital. After his death, family members brought his body to Deogaon. Family members of

Kujur had anticipated that the near and dear and fellow villagers would join the cremation of the body. But fearing possible transmission of virus, nobody turned up.

The body could not be taken to the graveyard for hours. Finding no other alternative, the relatives of Kujur contacted some youths of Sundargarh who are cremating bodies of Covid patients. Sidhanta Panda, Sisir Behera, Kamlesh Nathani, Bijay Hota and Deben Sahu, immediately left for Deogaon. They reached there at 1 am at night and after wearing PPE kits and putting the body inside a coffin, they took it on their shoulder and buried the same in a land there as per tradition of Christian community.

J'pore residents shy away from Covid test

NISHAN PATTANAİK ■ JEYPORE

Even as the second Covid wave rages across the State, owing to social stigma in Jeypore, the people are increasingly avoiding corona test and rather, preferring to self-medicate them at home when they find symptoms of the disease in them. If sources are to be believed, most households in Jeypore town have people showing symptoms akin to Covid-19 but are hesitant to get them tested. Instead, they are self-medicating by consuming commonly prescribed medicines from the local chemists. Many are even reluctant to go to hospitals for the fear of contacting the virus. All this is reportedly fuelling the virus spread as most cases go undetected. Jeypore town has nearly 205 streets across 28 wards

AIUEA, BUEA demand arrest of SU V-C

SAMBALPUR: The controversy over Dinabandhu Mishra's suicide on April 20 is not now confined to Sambalpur or Odisha only. The All India University Employees' Association (AIUEA) and the Bihar University Employees' Association (BUEA) have not only expressed grave concern but also urged Chief Minister Naveen Patnaik to take strong action against the Vice-Chancellor of Sambalpur University (SU) who is solely responsible for self-immolation of Mishra. One of the office bearers of the AIUEA Birabhadrapa S Uppin and general secretary of BUEA Raghavendra Kumar Singh in their letters to the Chief Minister wrote that Odisha has always set examples in the matter of law taking its own course. PNS

33 Ashram School kids test +ve

PNS ■ NUAPADA

As many as 33 students of two Ashram Schools in Khariar block of Nuapada district have tested positive for Covid-19.

As per reports, 22 students of the Kaunya Bal Niketan at Gadramunda and 11 of the Nava Prabhata Ashram School have been found infected with the virus. They all have been kept in isolation separately in the premises of the schools.

District Collector Swadha Dev Singh said special arrangements have been made to provide treatment to the children.

Child marriage foiled; minor girl rescued

PNS ■ PARALAKHEMUNDI

The Child Protection Unit here on Wednesday foiled a child marriage at Parichagaon area under Gumma block of Gajapati district.

On a tip-off, a team of officials and Sakhi members raided the spot and rescued a minor girl. They verified the age from the birth certificate of the victim girl and found it to be below the marriageable age of 18 years. They sensitized the villagers against child marriage. They discussed various laws

and penalties involved in child marriage. Those present on the occasion include Bhagyalaxmi Nayak, member of child protection unit Jayaprakash Badtya, CWC chairman Pramod Kumar Roul, member Alaka Sahu, ICDS supervisor Rajeswari Patra, Prava from Childline, besides Anganwadi workers and ASHAs.

12 Covid patients' death on June 5

BJP lodges complaint against Keonjhar DM

PNS ■ KEONJHAR

On Thursday, a State level team of BJP visited the Covid Hospital situated at Ranki in Keonjhar and inquired about the death of 12 Covid patients on May 5.

The team included State spokespersons Satyabrata Panda, Dillip Mohanty, State executive member Murli Manohar Sharma, Keonjhar district president Sabuja Anshuman Mahanta and State executive member Radhakanta Mahanta. The team also inquired about various aspects relating to the cause of the death. They also inquired about the death of another patient who died on the same day before reaching the hospital. The team learned that the district administration was trying to hide facts. The hurried

removal of the manager in-charge of the hospital was a proof of it. They collected information from the victims' families, some eyewitnesses and hospital authorities. It learned that a young man who made a video of the death of corona patients viral was detained by the police. The hospital has been built from the DMF fund under the Prime Minister's Mineral Khanija Kalyana Yojana

Married woman raped, accused held

JAJPUR: A 43-year-old man was arrested on Friday on the charge of raping a 45-year-old married woman on Thursday night at a village under the Bari police station in Jajpur district.

The woman had gone out of her house to attend to nature's call when she was allegedly raped by Bichitrananda Rout. On Friday, the woman filed an FIR in the police station that she was raped by the accused. Acting on the FIR, police arrested the accused, said Bari police station IIC Ajay Kumar Jena.

Police booked the accused under Section 376 (rape) of IPC. The woman was taken to the Government hospital at Bari, where doctors conducted her medical examination. The accused was produced in court. The court rejected his bail application and remanded him to jail custody. PNS

₹20,667 cr transferred to 9.5 crore farmers

PNS ■ NEW DELHI

Prime Minister Narendra Modi released the eighth instalment of the financial benefit under the Pradhan Mantri Kisan Samman Nidhi (PM-KISAN) scheme via video conferencing on Friday. As part of this instalment, a total of ₹20,667 crore was transferred to more than 9.5 crore farmers across the country, including those from West Bengal. This is the highest amount paid by the Government under the scheme in a single instalment and for the first time, the scheme has reached farmers of West Bengal as about 7.03 lakh of them got their first instalment of ₹2,000 each. The scheme was not implemented till now in West Bengal as the State Government and the Centre were at loggerheads over various issues, including verified data of farmers.

As part of this scheme, the Government is working towards encouraging farmers to take up alternative forms of farming such as organic farming. These crop require less investment. They are good for health and for the soil too. It also sells for a higher amount," he said. All farmers, especially from Punjab, are satisfied with the scheme. I have seen many videos of farmers expressing their confidence on social media," PM Modi said.

The PM also interacted

PM-KISAN scheme

with the beneficiaries of the scheme after releasing the amount. Talking to a farmer from Andhra Pradesh, who turned a piece of barren land into suitable land for organic farming, the PM said, "You have set an example for others. Your self confidence speaks for your ability and experience." The farmer from the southern state told PM Modi that she grows three crops on her land throughout the year.

Talking to a farmer from Meghalaya who has set up a business model for organic farming, PM Modi said as many as 10,000 Farmer Producer Organisation (FPO) were being set up in the country and small farmers were also getting associated with them. "Your confidence in what you do makes your model a sought-after one," the PM told the farmer.

Union agriculture minister Narendra Singh Tomar was also present at the event. "West Bengal has joined the scheme with more than 7 lakh farmers of the state getting the benefit today," he said. Soon after winning the just-concluded West Bengal assembly elections, Chief Minister Mamata Banerjee had shot off a letter to the Central Government demanding release of ₹18,000 arrears to each eligible farmer from the State.

The scheme, launched in 2019, was a National Democratic Alliance (NDA) flagship project that aimed at providing financial support to the farmers of the country. Under the scheme, ₹6,000 is transferred to the beneficiaries' bank accounts per year. This amount is paid in quarterly instalments of ₹2,000 each. Until now, ₹1.15 lakh crore has been transferred to farmer families under the scheme, a Government release issued on Thursday claimed.

Militant who killed Assam Rifles jawan in 2017 arrested in ambush, says NIA

PNS ■ NEW DELHI

The National Investigation Agency (NIA) on Friday said it has arrested a self-styled lieutenant of People's Liberation Army/ Revolutionary People's Front (PLA/RPF) in ambush. He was involved in the killing of an Assam Rifles personnel in Manipur in 2017.

The agency on Thursday arrested Mayanglambam Siromani, 32 of Kakching Khunou Angom Leikai under Waikhong police station of Kachhing district of Manipur.

The case was initially registered on November 15, 2017 at Chakpikarong police station in Chandel district relating to an ambush on Road Opening Party of 4th Assam Rifle at Chamol-Sajik Tampak Road in the district resulting in the killing of one Assam Rifles personnel and severe injury to another soldier. Two terrorists were also killed in the encounter.

The NIA had re-registered the case on March 29 in 2018 under various Sections of the IPC, Arms Act, Explosives Act and Unlawful Activities (Prevention) Act and took over the investigation.

During the NIA investigation, it was revealed that Siromani was involved in the conspiracy for the attack on the road opening party of Assam Rifles. Based on the evidence, he was charge-sheeted while absconding. Further, he was declared a proclaimed offender and a cash reward of Rs 2 lakh was announced for information leading to his apprehension.

Plea in SC seeks probe into bodies in Ganga

PIANS ■ NEW DELHI

A plea has been moved in the Supreme Court to constitute a special investigation team (SIT) to conduct the investigation into over 100 corpses, found floating in the Ganga river in Bihar's Buxar, and Uttar Pradesh's Ghazipur and Unnao districts, amid the ongoing second wave of Covid-19 pandemic.

The plea, filed by lawyers Pradeep Yadav and Vishal Thakre, urged the top court to issue direction the State Government concerned to conduct post-mortem of the dead bodies.

"The act of the states is inhuman as they failed to provide facilities for decent burial/cremation of dead bodies and to keep a check on pollu-

The petitioners emphasised that the recovery of decomposed bodies from the river is a matter of serious concern

tion of the holy river, Ganga, by such indecent act either of individuals or of authorities," the petition said.

The petitioners emphasised that the recovery of decomposed bodies from the river is a matter of serious concern, noting that the river was a source of water for many areas, and if these bodies were of Covid-19 patients, then there is

a possibility of spread of infection through water in the villages of both Bihar and Uttar Pradesh.

The petitioners also cited the Pt Parmanand Katara case, wherein the apex court had held that the right to dignity and fair treatment under Article 21 of the Constitution, was not only available to a person during lifetime, but also to the body after death.

The plea also alleged that in the present case, the state has also failed to monitor the crematoriums, which exorbitantly charged people for last rites during the pandemic.

The petitioners have claimed that the state governments, till date have not taken any effective measure to purify the water, and this was a violation of Article 21.

Modi directs States to take tough action against O2 hoarders

PIANS ■ NEW DELHI

Prime Minister Narendra Modi on Friday directed all the States to take strict action against hoarders of concentrated oxygen cylinders.

The Prime Minister's direction came when he was addressing the nation after launching the eighth instalment of financial benefits worth Rs 19,000 crore under the Pradhan Mantri Kisan Samman Nidhi (PM-KISAN) scheme to benefit more than 9.5 crore farmers that includes first-time beneficiaries in West Bengal.

The Prime Minister expressed dissatisfaction against these hoarders for their indulgence in such acts at a time when even Indian Armed forces comprising all its three divisions-- the Indian Army, the Indian Navy, and the Indian Air Force -- have been engaged to serve the human being amid Covid-19 crisis.

"Our three armed forces are trying to serve the needy and oxygen trains are continuously dispatching oxygen cylinders amid the Covid crisis. But there are a number of people who are involved in hoarding of oxygen. States should take strict action against such people," Modi said.

Despite the acute shortage of concentrated oxygen in various states, several people have been caught hoarding the supply of the life-saving gas.

Meanwhile, the Prime Minister also warned the people residing in villages to be very alert and follow all Covid-19 measures without fail to avoid the spread of the deadly disease.

Modi appealed to the villagers as well as those united with Gram Panchayats to spread awareness among others in the village to use "mask, take seriously to each symptom of Covid, go for Covid test, follow precautions until Covid report comes negative, and administer the vaccine".

"People's participation is essential to defeat Covid-19," Modi said.

The cumulative number of Covid-19 vaccine doses administered in the country is nearly 18 crore (17.93 Crore), said the Union Health Ministry's latest report received on Friday morning.

It said that the Covid-19 vaccination drive has successfully completed 118 days wherein 17.89 Crore doses have been administered to the identified beneficiaries through collaborative efforts of all states and UTs. India is the fastest country globally to reach the 17 crore target in 114 days. USA took 115 days and China took 119 days to administer the same amount of doses.

Indian scientists discover better combo alternative to Remdesivir

PNS ■ NEW DELHI

At a time when people are desperately hankering for Remdesivir injections, paying exorbitant prices in black market too, a team of Indian scientists have found a combination of easily available drug— Sofosbuvir in combination with Ledipasvir and Daclatasvir as better drug than Remdesivir and potential therapeutic agents for the coronavirus.

They had investigated 61 antiviral drugs and found that unlike Remdesivir whose route of administration is intravenous, Daclatasvir and Ledipasvir, are orally administered. Combinations of Ledipasvir and Daclatasvir with Sofosbuvir are clinically approved, said the scientists in a study published in the Current Science journal.

"The combined score suggests that these combinations have superior anti-SARS-CoV-

2 potential than Remdesivir and other investigational drugs," said the scientists from Biochemical Sciences Division, CSIR-National Chemical Laboratory, India Academy of Scientific and Innovative Research (AcSIR), Pandit Bhagwat Dayal Sharma Post Graduate Institute of Medical Sciences, and INTOX Private Limited, Pune who worked on the efficacy of drug repurposing for treating Covid-19.

"Our analysis suggested Sofosbuvir in combination with Ledipasvir and Daclatasvir as potential therapeutic agents for SARS-CoV-2. The combined score suggests that these combinations have superior anti-SARS-CoV-2 potential than Remdesivir and other investigational drugs," they said.

They said the present work provides a rationale-based approach to select drugs

with possible anti-SARS-CoV-2 activity for further clinical evaluation. With the shortage of Remdesivir, the combination can be used to save the lives of severe Covid-19 patients.

"Drug repurposing has been utilized as the most preferred therapeutic intervention for Covid-19 mitigation due to its necessity and feasibility. To prioritize the therapeutic regime against COVID-19, we used 61 antiviral drugs and their combinations," said the paper.

Selected molecules were subjected to virtual screening against — human angiotensin-converting enzyme 2 receptor-binding domain (hACE-2) which serves as an anchor for virus attachment and entry, SARS-CoV-2 RNA dependent RNA polymerase (RdRp) responsible for viral RNA replication, and SARS-CoV-2 main protease (MPro) needed

The findings provide a scientific rationale for applying Ledipasvir and Daclatasvir in combination with Sofosbuvir for Covid-19 management

for viral polyprotein slab proteolytic processing.

"Based on docking score, pharmacodynamic and pharmacokinetic parameters, combinations of Daclatasvir, Elbasvir, Indinavir, Ledipasvir, Paritaprevir, and Rilpivirine were analysed further. Our analysis suggested Sofosbuvir in combination with Ledipasvir and Daclatasvir as potential therapeutic agents for SARS-CoV-2," it added.

The team said that the findings provide a scientific rationale for applying Ledipasvir and Daclatasvir in combination with Sofosbuvir for Covid-19 management.

"Recent initial clinical trial data from Iran with Ledipasvir and Daclatasvir in combination with Sofosbuvir against Covid-19 are encouraging. Based on our analysis and available pre-clinical and clinical data, we recommend prioritization and aggressive perusal of clinical evaluation of these drug combinations," it further said.

Onset of southwest monsoon over Kerala likely on May 31

PNS ■ NEW DELHI

The onset of southwest monsoon over Kerala is likely to be on May 31, a day before the normal date of June 1, with a model error of ± 4 days. As a well-marked low pressure area over Lakshadweep area & adjoining southeast Arabian sea is all set to develop into a cyclonic storm along the west coast in the next 24 hours. According to the India Meteorological Department (IMD), Tauktae, (meaning gecko (named by Myanmar) once formed, is likely to intensify into a 'very severe cyclonic storm' with wind speed of 150 to 160 kmph gusting to 175 kmph on May 17. This will be the first cyclone of this year.

The red alert has been sounded in Kerala for several districts for Friday and Saturday. Kerala Chief Minister tweeted, "Red Alert! 14 May - Thiruvananthapuram, Kollam,

Pathanamthitta, 15 May - Malappuram, Kozhikode, Wayanad, Kannur, Kasargod. Follow guidelines issued by @KeralaSDMA."

"This year, the onset of the southwest monsoon over Kerala is likely to be on 31st May with a model error of plus/minus 4 days," the IMD said. In the Indian monsoon region, initial monsoon rains are experienced over south Andaman Sea and the monsoon winds then advance north-westwards across the Bay of Bengal.

The normal onset date of the monsoon over Kerala is June 1. Earlier the IMD has stated that monsoon is likely to make its onset over the Indian subcontinent at its normal date of June 1.

The IMD's operational forecasts of the date of monsoon onset over Kerala during the past 16 years (2005-2020) were proved to be correct except in 2015.

According to the IMD, it is

very likely to intensify into a cyclonic storm during the next 24 hours and is also expected to intensify further during the subsequent 24 hours. Tauktae is likely to move north north-eastwards initially for some more time and then move north-north westwards and reach the Gujarat coast by May 18 morning. The depression over Lakshadweep area has moved north-north-eastwards with a speed of about 19 kmph and is now centred over Lakshadweep about 30 km south southwest of Amini Divi, 320 km west-southwest of Kannur (Kerala), 1120 km south southeast of Veraval (Gujarat) at about 11.30 am on May 14.

After the cyclonic warning the National Disaster Response Force has deployed several teams on ground. At least 24 teams are pre-deployed and 29 teams are on standby for Gujarat, Kerala, Karnataka, Tamil Nadu and Maharashtra, NDRF DG, SN Pradhan said.

Congress urges Palestinians, Israel to cease hostilities immediately

PIANS ■ NEW DELHI

The Congress on Friday raised concern over the spiralling violence in the Palestinian territories and Israel and urged an immediate cessation of hostilities.

In a statement, Congress leader Anand Sharma said that the spiralling violence in East Jerusalem, Gaza and Israel, coinciding with the festival of Eid, is distressing and a matter of grave concern for the world.

He also said that the Palestinian peoples' right to pray at Al Aqsa mosque without any restriction must always be respected and not violated.

"The orchestrated incidents in Jerusalem were outrageous and triggered tensions and violence," he said.

Noting that people of both Palestine and Israel "have a right to live with dignity in a secure environment, Sharma said that the escalation of conflict, air attacks on Gaza and the rocket attacks by Hamas have resulted in tragic loss of innocent human lives, especially the children and elderly and also injuries to many civilians.

20 civil servants appointed to joint secretary-level posts

PIANS ■ NEW DELHI

In a major bureaucratic reshuffle, 20 civil servants were on Friday appointed to joint secretary-level posts.

A 2002 batch Indian Administrative Service (IAS) officer, D. Senthil Pandiyan, was appointed as Joint Secretary in the Ministry of AYUSH for a tenure of five years, replacing Indian Forest Service (IFS) officer Roshan Jaggi, a 1988-batch J&K cadre officer.

Nirupama Kotru, a 1992 batch Indian Revenue Service (IRS) officer, was appointed as Joint Secretary and Financial Advisor in the Ministry of Coal for an overall tenure of five years in place of Reena Sinha Puri, a 1987-batch IRS officer.

Bhaskar Verma, a 1995-batch Indian Civil Accounts Service (ICAS) officer, has been appointed as the Member Secretary, National Monuments Authority (NMA), Ministry of Culture, for five years replacing Navneet Soni.

The Appointments Committee of the Cabinet, chaired by Prime Minister Narendra Modi, approved the appointments that include the names of Lily Pandeya for the Joint Secretary's post in the

Ministry of Culture; Mayank Tewari for the same post in the Department of Defence; Nazli Jafri Shayin in the Ministry of Defence (Finance); Indra Murthy in the Ministry of Earth Sciences; Bhuvnesh Kumar in the Ministry of Electronics and Information Technology; and Patibandla Ashok Babu in the Department of Health and Family Welfare.

Manisha Sinha, Ashish Vachhan and Sandhya Bhullar were appointed as Joint Secretaries in the Department of Economic Affairs.

Jeetendra Singh has been appointed as Joint Secretary in the Department of Heavy Industry; Sumant Singh in the Department of Home Affairs; Sanjiv Shankar in the Ministry of Information and Broadcasting; Manoj Kumar in the Department of Investment and Public Asset Management; and Sonmoni Borah in the Department of Land Resources.

Indian Ordnance Factories Service (IOFS) officer Veena Tamta Bhatia has been appointed as the Additional Central Provident Fund Commissioner (HQ), EPFO, under the Ministry of Labour and Employment.

Goyal discusses steps to raise Covid vaccine production

PIANS ■ NEW DELHI

Commerce and industry Minister Piyush Goyal on Friday had a virtual meeting with United States Trade Representative (USTR) Katherine Chi Tai.

The meeting focused on increasing vaccine availability in an inclusive and equitable manner to combat the Global pandemic caused by Covid-19.

The proposal of India on waiver of certain TRIPS provisions to increase global vaccine production in order to take on the challenge of vaccinating the poorest of the poor and save lives was also discussed.

Goyal thanked the USTR for the US announcing its support for India's proposal.

The minister mentioned the supply chains for the vaccine manufacturers must be kept open and unbridled as the entire world is in dire need of vaccines.

Vaccine supply likely to increase sharply by June

PNS ■ NEW DELHI

Come June and supply of Covid-19 vaccines is likely to increase sharply, helping India get close to 300 crore doses in the seven-month period ending December, government officials said on Friday even as it announced of supplying nearly 192 lakh Covid-19 vaccines to the states and the Union Territories (UTs) in the next fortnight from May 16 to 31, 2021. This will include 162.5 lakh of Covishield and 29.49 lakh of Covaxin.

Estimates chalked out by officials suggested that the tentative supply figures in May (8.8 crore doses) could almost double by June (15.81 crore doses) and quadruple by August (36.6 crore doses). In December alone, 65 crore doses might be available, over a seven-fold jump from the May numbers, they said.

Meanwhile, officials from the Union Health Ministry said that Union Health Minister Harsh Vardhan will hold a meeting with Health Ministers of four states for Covid-19 vaccination and management on May 15. In addition, a total quantum of more than 4.39 crore doses was also available for direct procurement by the

States as well as private hospitals in the month of May 2021.

A total of 17,92,98,584 vaccine doses have been administered through 26,02,435 sessions, according to the provisional report till 7 am. These include 96,18,127 healthcare workers (HCWs) who have taken the first dose and 66,04,549 HCWs who have taken the second dose, 1,43,22,390 FLWs who have received the first dose, 81,16,153 FLWs who have received the second dose and 39,26,334 beneficiaries in the 18-45 years age group who have taken the first dose.

Besides, 5,66,09,783 and 85,39,763 beneficiaries aged 45 to 60 years have been administered the first and second dose respectively, while 5,42,42,792 and 1,73,18,693 beneficiaries of more than 60 years old have taken the first and second dose.

The ministry said 4,40,706 beneficiaries in the age group of 18-44 years have received their first dose of COVID vaccine in the last 24 hours and cumulatively 39,26,334 across 32 states and UTs since the start of phase-3 of vaccination drive.

More than 20 lakh vaccination doses were administered in a span of 24 hours. As on Day-118 of the vaccination drive (May 13), 20,27,162 vaccine doses were given. Across 18,624 sessions, 10,34,304 beneficiaries were vaccinated for the first dose and 9,92,858 beneficiaries received their second dose of vaccine.

The Ministry also said that a national tracking platform will be established soon to determine the impact of the jabs against Covid-19 and the breakthrough infections that are likely to occur among those with complete and partial immunisation.

Kazakhstan extends humanitarian aid to India

PIANS ■ NEW DELHI

In accordance with instructions from President Kassym-Jomart Tokayev and guided by the principles of strategic partnership between the two states, the Kazakhstan Government has provided humanitarian assistance to India during this serious epidemiological situation of Covid-19.

The first of the two Kazakh aircraft with the cargo landed at the Indra Gandhi International Airport in New Delhi in the morning on May 14 with the second one expected to arrive several hours later.

This humanitarian aid, weighing around 40 tons, includes medical masks, respirators, protective suits and portable artificial lung ventilation devices from Kazakh manufacturers in the healthcare sector. This aid was officially handed over at the airport by Ambassador of Kazakhstan to India Nurlan Zhalgasbayev to Director, Eurasian Department of the Ministry of External Affairs, Bandaru Wilsonbabu.

On May 4, President Tokayev, in a telegram to Prime Minister Narendra Modi, expressed "deep solidarity with the Indian nation over the devastating Covid-19 surge in this country", and on May 7, instructed his government to provide and dispatch the necessary assistance to the Indian authorities.

BSF finds guns dropped by Pak drone in Samba

PNS ■ JAMMU

A day after the Armies of India and Pakistan exchanged packets of sweets and demonstrated that the bonhomie was prevailing along the Line of Control as not a single incident of ceasefire violation was reported since February 24, the Indian border guards deployed along the International border on Friday claimed they have recovered a consignment of arms and ammunition dropped by a Pakistani drone in the Samba sector. The arms consignment was dropped approximately 250 metres inside the Indian territory.

BSF officials also claimed the consignment was recovered from the same area where BSF had earlier detected a cross border tunnel in the month of November 2020. The tunnel was used by the Pak rangers to push armed terrorists inside the Indian territory.

Recently a Pakistani

intruder was also shot dead by the BSF troops in the same area on May 5. Last year on June 20, 2020

BSF troops had also neutralized a Pak Hexacopter in Samba/Kathua area and recovered a huge quantity of Arms/Ammunition & explosives. According to a statement released by the BSF spokesman in Jammu, "As per input, on 14 May 2021, troops of BSF carried out a search operation in the general area of Samba sector. At about 12.15 hrs, BSF troops recovered a wrapped item with a yellow colour polythene bag in a field. The wrapped packet contained 01 AK-47, 01 Pistol, 01 Mag, 15 rounds of 9 mm, 01 wooden frame (used to attach payload with drone) & wrapping material".

BSFspokesman said, "IG BSF Jammu N S Jamwal congratulated the alert BSF troops for this big achievement which again foiled the nefarious motive of Pakistan and said that BSF is ever alert and vigilant on International Border 24x7 to thwart away the nefarious designs of Pakistan".

Be impartial, prompt, Didi writes to PM on O2 plants

SAUGAR SENGUPTA ■ KOLKATA

Continuing to drop letter bombs on the PMO one after the other, Bengal Chief Minister Mamata Banerjee on Friday wrote to Prime Minister Narendra Modi wondering why the Centre was not living up to its promises on corona specific equipment.

The Chief Minister wrote another letter to the Prime Minister requesting him to be evenhanded in allotting PSA plants (Pressure Swing Adsorption) plants — needed to generate oxygen — to the States, particularly Bengal.

Complaining that the Centre had promised 70 such plants for Bengal whereas it had only been allotted four in the first phase, Banerjee wrote, "We were told we shall get 70 PSA plants, now we are told that we shall get four in the first phase with no clarity on the remaining plants."

This is her fifth letter to the Prime Minister in the past two weeks.

She also complained in her letter, as to how "...Priorities are being fixed and re-fixed, imple-

menting agencies are being settled and unsettled, quota for West Bengal is being downwardly revised and further downwardly revised every day," adding there was lack of clarity about whether the State would get the remaining plants.

The Prime Minister's Office had earlier approved allocation of funds from PM-CARES for installation of 551 PSA plants in across the country. Out of these Bengal was to get 70.

Mamata further wrote in her letter requesting the Prime Minister "to kindly get the priorities, implementing agencies, and quota fixed, justly, fairly and quickly" as "our own supplementary PSA-installation plans by State agencies... are getting disturbed because of the indecisiveness at Delhi."

Pandemic issues apart, the Chief Minister also hit out at the Centre for making unnecessary delay over the transfer of PM Kisan Sanman Nidhi funds to the Bengal farmers.

Mamata attacked the Prime Minister on a day when the Centre transferred its first install-

ment of ₹2,000 to more than 7.5 lakh eligible farmers on Friday. In an open letter to the farmers the Chief Minister said that the first installment of the PM-Kisan fund was in fact a result of her continuous fight to get the central funds for Bengal farmers.

The Prime Minister on Friday released the eighth installment of over ₹20,000 crore to more than 9.5 crore farmers. About 41 lakh Bengal farmers had applied for the scheme.

In an open letter to farmers, Banerjee said "You all were supposed to get ₹18,000, but have received a very small amount. Even this sum would not have been transferred had we not fought for it. We will continue this fight till you get the entire allocation."

Her Trinamool Congress also hit out at the Centre for releasing only ₹2,000 for each farmer whereas the Prime Minister had promised Rs 18,000 after the elections. "The PM spoke of ₹18,000 and here he has given only ₹2,000... where is the rest?" asked senior party MP Saugato Roy.

Several leaders' phones tapped during Fadnavis regime, alleges Cong

TN RAGHUNATHA ■ MUMBAI

Maharashtra Pradesh Congress Committee (MPCC) president Nana Patole on Friday created a sensation in the State political circles by alleging that during the previous Devendra Fadnavis Government telephones of several leaders belonging to the Congress, NCP, Shiv Sena and BJP, and also some IAS and IPS officers, between 2016 and 2017 were tapped.

Talking to media persons here, Patole charged that he had received information from a private television channel that his telephone was being tapped between 2016 and 2017 when the BJP-led saffron alliance Government ruled the state.

"In the name of busting a narcotics gang, the phones of mine as well as Amzad Khan were tapped during the Devendra Fadnavis Government using false names. I urge the Maha Vikas Aghadi (MVA) government to conduct a high-level inquiry into the phone tapping indulged in by the previous BJP-led Government and bring the culprits behind it to book," Patole said.

The MPCC president also alleged that apart from his phones, the phones of Congress, NCP, Shiv Sena and BP leaders, and also some IAS and IPS officers were also being tapped. "In my case, the previous BJP government tried to link me to drug trafficking gangs and also project in an objectionable manner. While tapping my telephone, the people involved were using a fake name and address."

Patole demanded to know if requisite permission was taken from the authorities concerned before tapping my telephone. "What was the purpose of tapping my telephone? Keeping an individual under surveillance without requisite permission is an offence and invasion into the privacy of the individual concerned," the Congress leader said.

UP records 15,747 new Covid cases, 312 deaths

Lucknow: Uttar Pradesh on Friday recorded 15,747 fresh Covid-19 cases that took the infection count to 15,96,628, while 312 more fatalities pushed the death toll to 16,958, officials said.

In the past 13 days, the number of active cases in the state has come down by over 1.17 lakh. On April 30, there were about 3.10 lakh active cases and the number currently stands at 1,93,815, said Additional Chief Secretary, Health, Amit Mohan Prasad.

As many as 1,57,257 patients are in home isolation, he said. While the state reported 15,747 fresh cases the previous day, 26,174 Covid-19 patients recovered from the disease. So far, 13,85,855 patients have recovered in Uttar

Pradesh and the recovery rate stands at 86.8 per cent, Prasad said.

Among the fresh deaths, a maximum of 21 were reported from the state capital Lucknow, 20 from Kanpur, 16 from Bahraich, 15 from Meerut, 14 from Chandauli, 13 from Jhansi, 12 from Varanasi, 10 each from Gautam Buddha Nagar, Hardoi and Mathura, a health bulletin issued here said.

Among the fresh cases, 1,464 were reported from Meerut, 900 from Lucknow, 718 from Gautam Buddha Nagar, 587 from Varanasi, 567 from Gorakhpur, it said. So far, over 4.41 crore samples have been tested for COVID-19 in the state, including more than 2.63 lakh tested on Wednesday, he said.

Centre rushes team to J&K to study reasons for high Covid-19 mortality

MOHIT KANDHARI ■ JAMMU

In the wake of the grim Covid-19 situation in Jammu & Kashmir, the Central Government has rushed a team of experts to study the reasons behind high mortality rate.

The region has witnessed more than 800 deaths in the last one month. The positivity rate is also hovering around 10 percent while the active positive cases stood at over 52,000.

MoS PMO Dr Jitendra Singh, who is regularly tracking the Covid-19 management efforts on Friday tweeted, "Central team of experts deputed to visit GMC and other health institutions in Jammu in view of COVID surge. Local authorities are advised to frankly point out constraints

frankly by them without mincing words, so that Centre can optimally step in to assist them".

On ground zero the Union Territory administration is racing against time to recruit doctors, nurses and other paramedics to utilise their services in the overall management of Covid-19 patients.

Meanwhile, there was no let up in the increasing number of deaths. On Friday 60 more patients succumbed to the virus while 3027 new cases were detected taking the tally of active positive cases to 52,001. The positivity rate dropped down marginally to 9.59 across J&K.

The National Health Mission, UT of J&K Friday released some statistics in order to spread awareness about the importance of vac-

ination.

According to the analysis of Covid mortality in J&K UT between 15 Apr-12 May, the twitter handle of NHM said, 1-93% of Covid +ve critical cases who died in this period were unvaccinated, 7% were partially vaccinated.

"46% of deaths occurred within 3 days of testing +ve thus indicating that they were well into late stages of infection before they got tested".

patients not to remain in a denial mode NHM advocated the need for early testing so that treatment could start early.

Referring to self medication as another reason behind the high mortality rate, NHM data revealed, "49.37% of total deaths were those who arrived just <=3 days before in the hospital".

Kerala extends lockdown till May 23

KUMAR CHELLAPPAN ■ KOCHI

Since the nine-day long total lockdown in Kerala which is in force since May 9 has failed to bring down the number of Covid-19 patients, the administration has decided to extend the lockdown to May 23.

The lockdown declared on May 7 was for nine days which would have ended on May 16.

The move to extend the lockdown was announced by Chief Minister Pinarayi Vijayan in his daily press briefing on Friday.

Vijayan said that the total lockdown would be in force till May 23. Four districts have been brought under triple lock down measures. These are the districts of Thiruvananthapuram, Ernakulam, Thrissur and Malappuram. The decision to have triple lock down in these districts was in the backdrop of unabated hike in the number of Covid-19 cases.

On Friday, the State diagnosed

34, 694 new persons with Covid-19 while 93 patients succumbed to the pandemic.

The Test Positivity Rate in the State as on Friday was 26.41.

The Chief Minister asked the people in the State to be extra cautious as the India Meteorological Department has warned of heavy downpours, rains and high sea waves along the Kerala coast as a consequence of the low pressure developed in the Arabian Sea in the West Coast.

The failure of the administration to accommodate Covid-19 patients in First Line Treatment Centres came out in the open in southern Kerala as nearly 50 patients afflicted with the pandemic set up a temporary shed along the paddy fields in Thiruvalla as covid shelter.

An embarrassed administration hushed up the issue by shifting the patients to the nearest FLTC but not before many people were seen running helter-skelter in this predominantly rural area.

288 more die in Tamil Nadu

KUMAR CHELLAPPAN ■ CHENNAI

Tamil Nadu is all set to extend the lockdown period with more stringent measures as all measures to check the transmission of Covid-19 have come a cropper. There is no worthwhile change in the number of daily cases reported across the State as the second wave is causing havoc everywhere.

On Friday, the pandemic claimed 288 lives across the State while 31, 892 new persons were diagnosed with Covid-19. The Directorate of Public Health and Preventive Medicine said in its release that there were 1.95 lakh active Covid-19 patients in the State undergoing treatment in various hospitals.

More than 1.53 lakh persons were subjected to RT-PCR tests on Friday. The death toll in Tamil Nadu till date crossed the 17,000 on Friday. A meeting convened by Chief Minister Muthuvel Karunanidhi Stalin which was attended among others by legislature party leaders of all political parties with representation in the House decided unanimously to support whatever

measures the Government takes to control the transmission and spread of the pandemic in the State.

The leaders of all political parties who took part in the deliberations assured the Government that they would not hold any public meetings or demonstrations anywhere in the State till the pandemic subsides. A high power committee was constituted with medical professionals, policy makers and leaders of various political parties to chalk out ways and means to control the spread of Covid-19.

In a camaraderie which is quite unusual in Tamil Nadu, the political leaders authorised the Chief Minister to take decisions which he feels apt and suitable to check the Covid-19.

Meanwhile, Sterilite Copper, owned by the Vedanta Group, has started despatching tanker trucks filled with medical oxygen to various government owned hospitals in the State. A company representative said that from May 15, the plant at Thoothukudi would be able to produce 35 tonne medical grade oxygen per day and this would be gradually hiked.

Steps taken to increase number of Covid-19 beds: Puducherry L-G

PTI ■ KARAIKAL

Puducherry Lieutenant Governor Dr Tamilisai Soundarajan has said steps were underway to increase the number of beds for Covid patients in Karaikal district of the Union Territory.

Speaking to reporters after holding a review meeting here with the District Collector Arjun Sharma, the Lieutenant Governor said considering the rise in the number of Covid cases in Karaikal, the Government has taken steps to increase the number of beds in hospitals.

In addition, privatemedical colleges have been asked to raise the bed capacity and appoint more doctors, she said. Stating that the district has adequate supply of oxygen, she thanked the fishermen who donated 40 oxygen cylinders in their boats for the benefit of patients in the government Karaikal hospital.

The Lieutenant Governor pointed out that it had been observed that late referrals for treatment at hospitals were often the reason for Covid deaths and asked the people to seek proper medical attention in the early stage itself.

She said the district administration would consider increasing the number of Covid care centres and alternative medicine centres. When her attention was drawn to volunteers who are involved in burying the Covid victims in the district, the Lieutenant Governor said she would initiate an inquiry as to why government staff were not involved in the activity and why it had been entirely left to volunteers.

She appealed to the people to cooperate with the government by staying indoors and thereby stop the spread of Covid. Health Secretary Arun and other officials were present at the review meeting.

With no let up in coronavirus surge, lockdown extended by 7 days in Mizoram

Aizawl: The total lockdown imposed in Aizawl and other district headquarters from May 10 has been extended for another 7 days to flatten the Covid-19 transmission curve.

The government order issued on Friday said that the existing complete lockdown, which was scheduled to be lifted on May 17 (4 am) has been extended till 4 am of May 24.

"As Covid-19 positive cases continue to surge inspite of the stringent measures taken, the competent authority has decided to continue with the total lockdown with an anticipation of flattening the curve of the disease transmission thereby preventing probable overburdening of healthcare facilities," the order said.

The second corona wave continues to trouble the northeastern State. Mizoram on Friday reported 201 Covid-19 cases, pushing the state's tally to 8,377.

A total of 90 people were discharged in the state during the day.

The number of active cases now stands at 2,060, while 6,294 people have recovered from the infection. At least 23 people have succumbed to the infection in Mizoram so far. The Government order said that people residing in the state capital and other district headquarters/towns shall strictly confine to indoors and not venture outside without permission.

53,249 patients discharged in Maha

TN RAGHUNATHA ■ MUMBAI

In some relief to the health authorities in Maharashtra, the daily Covid-19 deaths dropped to 695 in the State on Friday, while the infections came down to 39,923.

A day after daily deaths jumped from 816 to 850 and the infections dropped from 46,781 to 42,582, Maharashtra logged 695 deaths and 39,923 new cases.

With 695 new deaths, the total number of deaths in the state climbed from 78,857 to 79,552. Similarly, with 39,923 new infections, the total number of cases climbed from 52,69,292 to 53,09,215.

As 53,249 patients were discharged from the hospitals across the State after full recovery, the total number of people discharged from the hospitals since the second week of March last year went up from 46,54,731 to 47,07,980. The recovery rate in the state went up from 88.34 per cent to 88.68 per cent.

The total "active cases" in the state dropped from 5,33,294 to 5,19,254. The fatality rate in the state stood static at 1.5 per cent.

With 62 fresh deaths, the Covid-19 toll in Mumbai increased from 14,040 to 14,102, while the infected cases went up by a relatively low 1660 to trigger a jump in the infections from 6,83,185 to 6,84,845.

The situation in Pune improved a bit as the "active cases", which had come below one lakh mark early this week, improved once again as the "active cases" dropped from 1,01,181 to 96,028.

Nagpur with 4096 active cases stood second in the state, followed by Mumbai (35,843), Thane (31,526), Ahmednagar (27,573), Satara (21,927), Solapur (21,232), Nashik (18923), Beed (18806), Chandrapur (15,701), Jalgaon (11,193), Latur (10237), Aurangabad (8716), Jalna (7072), Parbhani (7060), Osmanabad (6453) and Buldhana (6090).

Of the 3,06,02, 140 samples sent to various laboratories across the state so far, 53,09,215 have tested positive (17.35 per cent) for Covid-19 until Friday.

Currently, 34, 82, 425 people are in home quarantine while 28,312 people are in institutional quarantine.

AP records 22,018 new cases, 96 deaths

Amaravati: Andhra Pradesh reported more than 20,000 fresh cases of coronavirus for the fourth consecutive day on Friday, while 19,177 patients had recovered and another 96 succumbed to the infection.

The latest bulletin said 22,018 positive cases turned out from 89,087 tests in the 24 hours ending 9 am today, taking the infection count to 13,88,803.

The number of active cases increased to 2,03,787 after a total of 11,75,843 recoveries and 9,173 deaths.

The overall infection positivity rate climbed to 7.81 per cent after 1.77 crore tests while the case fatality rate remained stable at 0.66 per cent.

The recovery rate was 84.6 per cent and the active case ratio was about 15 per cent. East Godavari district reported the highest 3,432 fresh cases in 24 hours, followed by Chittoor 2,708, Anantapuramu 2,213 and Visakhapatnam 2,200.

While Srikakulam reported the lowest 695 and Vizianagaram 899, seven other districts added between 1,000 and 1,800 new cases each. PTI

PAPER WITH PASSION

High and dry

Herd immunity is one thing; India needs to do a lot more to protect its people from the pandemic

The COVID-19 vaccination drive in India appears to be wafting in the air with a mind of its own. Never an easy task, what with a billion people to be vaccinated in time to avoid a third surge of the virus, the exercise is taking time even to take off. Whether it is owing to gigantic nature of the task at hand or the scattered nature of the vaccination management plan, one is not sure. The bare facts of the case, if the pandemic is to be brought under control at the very least by the end of this year, are before us. Scientists believe a minimum of 70 per cent of the population needs to be vaccinated for the herd immunity to set in. In India, that means the immunity can be achieved if nearly 94 crore people receive both doses of the vaccine. At two doses each, that calls for 188-odd crore doses. That is a tall order. Even if one were to scale down the vaccination to one dose under the assumption that it is better to give at least half protection to all than complete protection to only a few, even then, just under a 100 crore doses are needed. Where to get the doses from? How long will it take to acquire them? How long will it take to complete the vaccination process? If, at the end, it is only one dose that is given, an identical task stares at the country for giving the second dose.

Bear in mind that all this is for vaccinating only 70 per cent of the population. That means just about a third of the population will be left high and dry unless they largely constitute children who are yet to come under the purview of vaccination. The Serum Institute of India has said it will be in a position to produce 10 crore doses a month after July. One can assume that Bharat Biotech can produce anywhere between five and six crore doses a month after July. Zydus Cadila and Dr Reddy's Labs will be able to pitch in with three-odd crore doses a month. That can stretch the total figure of available doses per month close to 20 crore by August 2021 or thereabouts. That leaves five months till December to complete the task of giving around 100 crore doses. There are reports that are not so confident; they contend that the task may actually take over two or even three years. In any case, assuming the exercise ends by December, a population of 94-odd crore will receive one effective dose or half of them will get two doses each, as the case may be. The result is there for all to see: It is simply impossible to achieve herd immunity before the end of 2021 unless 188 crore doses are available at once and an unprecedented, organised, synchronised, national campaign is undertaken to complete the process in five months. The question to the Centre goes abegging: Where is the plan?

Hogwash

Amid the raging contagion, a handful of politicians are providing comic relief to citizens, albeit unintentionally

Chandler Muriel Bing of the *Friends* fame said in the series: "I'm not great at advice. But can I interest you in a sarcastic comment?" Something similar in the nature of an emotion has ostensibly stirred Uttarakhand's former Chief Minister Trivendra Singh Rawat. The BJP leader, no less adept at stoking controversy as the incumbent Tirath Singh Rawat, has now taken to bat for the accursed Novel Coronavirus because, as it would appear, everybody is only hurling doses of vituperation at the poor pathogen. Choosing to look at it "from a philosophical angle", Rawat said that the virus is a "living organism which has a right to live". In the same vein, he warned the human species that despite considering ourselves to be the most intelligent on the planet and out to eliminate the virus, the killer is sensible enough to keep mutating itself. Slipping into some sense midway, he also clarified, to his credit, that people need to outpace the virus to stay safe. So far, so good! By that logic, do we need to go and offer ourselves to a tiger just because it has a life and the right to life? If the virus has the right to live, as an organism, all of us don't?

And, as most of us would agree, the new-age politicians are nothing less than pernicious viruses. But do they really need to open their trap and prove it? As the old saying goes, it is better to keep your mouth shut and let the world think that you are a fool, rather than open it and remove all doubts! The unusual observation, as must have been the desired outcome of the former Chief Minister, went viral at a time when the entire country is battling a killer second wave of COVID-19. A Twitter user sarcastically said: "This virus organism should be given shelter in the Central Vista." Another said: "Shri Rawat should invite the virus home, feed it well and stay with it for at least 14 days." All done and dusted, the statement just goes on to show how devoid of empathy are our political leaders who, in spite of seeing the mass scale of devastation in terms of life, employment and business opportunities, can't keep themselves away from courting a headline-worth-of controversy. As Chandler said, one more time: "Handle? I can handle it. Handle is my middle name. Well, actually it's the middle part of my first name."

The endgame in Afghanistan

There's a host of implications emanating from the withdrawal of American troops from that country, and India needs to watch out

HIRANMAY KARLEKAR

The latest available estimates of the number of people, mostly school-girls, killed in three blasts in front of a co-educational school in Kabul on May 8, vary from at least 60 (BBC) to over 85 (CNN). The figure may rise further by the time this column is published. The diabolical intent to kill as many as possible is clear from the fact that a car bomb was first detonated and two improvised explosive devices followed as the girls rushed out of the school in panic.

Two questions arise. Who is behind this ghastly crime? What are its implications? As to the first, no one has claimed responsibility. The Afghan Government has blamed the Taliban, which has denied involvement and condemned the strike. This leaves one with the Islamic State, which has staged terror attack in Kabul and elsewhere in Afghanistan and which retains its ability to strike despite losing a great deal of territory over the months.

The Taliban are the more likely culprits. There is no reason why one should believe them, particularly when the May 8 blasts have to be seen in the background of the surge in their attacks and terror strikes following President Joe Biden's announcement that all American troops will leave Afghanistan by September 11. They know they will not win an election and they do not believe in democracy. They want to control Afghanistan by force and establish the *Sharia* rule.

Will they be able to do it? What will happen if they do? The answer to the first would depend on the fighting qualities of the Afghan National Security and Defence Forces (ANDSF), the support they continue to receive from the US and its NATO allies. As to the first, despite serious problems of desertion and unwillingness to enlist, the Afghan National Army (ANA), the land warfare arm of the ANDSF, has emerged a battle-hardened force capable of confronting the Taliban and

other terrorist organisations it faces. Its commando and special forces units have been particularly successful.

Against this, the harsh fact is that the Taliban have expanded their control over huge tracts of Afghanistan's countryside and some cities, besides inflicting a number of heavy defeats on the Afghan troops. At least some of the reverses the latter suffered the beginning of 2020 are attributable to the Trump administration's atrocious policies. These included asking the Government forces early in 2020 to go on the defensive in the interest of its peace negotiations with the Taliban, and arm-twisting it into agreeing to the Taliban demand of releasing 5,000 of their fighters in Afghan jails as a pre-condition for talks. Many of the released fighters have gone back to combat despite the Taliban's promise that they would not do so.

The Taliban, however, began gaining ground even before the Trump Administration's policies and pressures hampered the ANDSF's operations. Also, while the capabilities of the Afghan troops have improved, a big question mark hangs

AS THE DIVERSION TO KANDAHAR OF THE INDIAN AIRLINES HIJACKED FLIGHT IC-814 IN DECEMBER 1999 SHOWED, THE TALIBAN WERE ACTIVELY PROMOTING TERRORISM AGAINST IT BY JAISH-E-MOHAMMED AND LASHKAR-E-TAIBA. DO WE HAVE A COHERENT POLICY TO MEET THE CHALLENGE?

against the future availability of effective air support, which has played an important role in many of the ANA's successful operations. According to one estimate, 80 to 90 per cent of the air support to it is now provided by the fledgling Afghan Air Force (AAF).

The AAF, however, has been supported by the massive air power of the US. Also, international contractors, now doing the bulk of the maintenance work on its planes and helicopters, will depart with the American troops. This will seriously affect its operational capabilities. This underlines the importance of continued American aid. On July 7, 2012, Hillary Clinton, then US Secretary of State, announced in Kabul that President Obama had designated Afghanistan as a major non-NATO ally of the US. The questions are: How much and of what kind?

Apart from military hardware, there is a need for funds. Countering a blend of insurgency and terrorism is a very expensive business. The US has provided over \$86 billion as security assistance to Afghanistan between financial years 2002 and 2019. Since 2014, it has been providing between five and six

billion dollars per year to fund the ANDSF. How much and what form of assistance will Washington provide Afghanistan after the withdrawal of its troops?

Clearly, the military outcome in Afghanistan hangs in the balance. So does the fate of Afghanistan. All indications are that the Taliban have every intention to re-impose the medieval, authoritarian theocratic system that had reduced Afghanistan to a cleric-administered prison. As Ahmed Rashid wrote in *Taliban: Islam, Oil and the New Great Game in Central Asia*, edicts of the Taliban's Department of Promotion of Virtue and Prevention of Vice "had changed the lifestyles of Kabul's once easy-going population and forced Afghan women to disappear from public view".

India needs to watch out. As the diversion to Kandahar of the Indian Airlines hijacked Flight IC-814 in December 1999 showed, the Taliban were actively promoting terrorism against it by Jaish-e-Mohammed and Lashkar-e-Taiba. Do we have a coherent policy to meet the challenge? (The author is Consulting Editor, *The Pioneer*. The views expressed are personal.)

LETTERS TO THE EDITOR

THE OXYGEN CRISIS IN GOA

Sir — An oxygen crisis in the Goa Medical College and Hospital (GMCH), the State's largest COVID facility, has led to the death of over 74 patients in the span of four days due to daily disruptions in oxygen supply. Just two days after 26 patients lost their lives at the GMCH within hours, the State Government told the Bombay High Court Bench in Goa that 15 more patients had succumbed.

The Bench was informed of 13 more deaths from the same hospital. The spate of deaths due to the lack of oxygen is causing a serious concern for the COVID-19 patients in Goa's hospitals. However, the Pramod Sawant Government and the hospital both told the court that all the deaths could not be attributed to the disruption in oxygen supply.

The issue relating to oxygen shortage is so severe that the court had ordered the State Government to drop everything and ensure that there are no deaths for "at least one night". The relatives of the patients did raise an alarm after the oxygen pressure began to drop overnight. But it was several hours before anyone was able to fix the problem and ensure a steady supply of oxygen. It was a simple case of utter negligence on the part of the health department and the Government.

BE CAUTIOUS, BUT NOT SCARED

Sir — The recrudescence of COVID-19 in the form of the second wave has claimed many lives since mid-March 2021. Cold, cough, breathlessness and fever have been experienced from time immemorial. Cold triggers fever and cough triggers breathlessness if curative measures are not taken in time; it is a known fact.

Fever appears in many forms like flu, malaria, typhoid, encephalitis (brain fever), monkey fever, and so on. The said fevers have not given an undertaking that they would not appear since Corona has been appearing on a grand scale. But since Corona made an appearance, we have hardly heard of the fevers experienced ear-

Open up the barred humanity

The suggestion of the Supreme Court about placing convicts under house arrest is worth considering. If one may add, the release of political prisoners on bail or parole too merits consideration. Political and civil rights activists are often incarcerated for speaking out the truth to power or rebelling against the "system". Dissent is now a crime punishable with imprisonment!

It is a matter of immense significance in terms of human rights that the undertrials make up nearly 70 per cent of the total inmates in Indian prisons. Many of them do not have access to legal counsel or remedy. Pre-trial imprisonment in itself is punishment. As they say, the process

is the punishment in India. It is a logical premise that the undertrials could be convicted or acquitted. Eventually, be it conviction or acquittal, they cannot be kept in a place where they run greater risk of contracting Coronavirus. They must be spared the 'capital punishment' by the virus!

It is common knowledge that many of India's prisons are congested and have more inmates than they can accommodate and, as such, they remain the hotspots for the contagion. Needless to say, the prison conditions are conducive to the spread of the contagion. When prisons are crammed full of inmates, it is next to impossible to maintain physical distancing. The incorporation of decongesting prisons into the pandemic response is a much-needed measure. Prisoners also share the right to health with those outside prisons for anyone to be dismissive of their greater in-house susceptibility to contract the virus. The non-violent and low-risk offenders pose no significant risk to public safety. Releasing them is a containment measure that has a health benefit by reducing the risk of transmission and an uplifting humanitarian gesture.

G David Milton | Tamil Nadu

lier. If a patient with cold, cough or fever approaches a doctor, they do not treat the patient without subjecting her/him to a COVID test. Have all other fevers lost ground to Corona? If all other fevers are treated like COVID, the fatalities are bound to occur due to wrong diagnosis and wrong administration of medicines.

Whether malaria, typhoid and flu have not at all revisited after Corona first broke out in March 2020, the other normal ailments are still very much a reality. This aspect must be looked into by the Government, scientists and doctors.

KV Seetharamaiah | Hassan

PAY ATTENTION TO RURAL INDIA, TOO

Sir — This refers to the news report, 'Dozens of bodies found buried in sand near Ganga in Unnao', May 14. When COVID-19 first hit India, the biggest fear among both the

policymakers and public experts was that the pandemic would travel to India's Hindi heartland — primarily across the rural belt of Uttar Pradesh (UP) and Bihar.

Given the size of the two States, the density of population, the abysmal healthcare infrastructure and the manner in which the virus could quickly transmit in these regions, this fear was legitimate. There was never any cogent explanation as to why this was the case, but this did not deter speculative, and clearly misplaced, theories about the innate immunity of those in rural India. The tragic sight of the bodies floating in the Ganga confirms that the numbers of reported COVID fatalities are much higher than the official figures.

SOUNDBITE

The situation is extremely fragile as there are also constraints in lifting 100 MT of allocated oxygen from Bumpur and Kalinganagar in the east.

Rajasthan Chief Minister — Ashok Gehlot

It will take time, but with great firmness, both defensively and offensively, we will achieve our goal to restore peace to the State of Israel.

Israeli Prime Minister — Benjamin Netanyahu

So thankful to all the love put into making me feel special on my birthday. (But) without family you are nothing.

Actor — Sunny Leone

My quarantine period is still not over. Otherwise, I am doing much better. Requesting everyone not to spread misleading stories/information without the whole context.

Cricketer — Wriddhiman Saha

#breakthechain COVID is not our friend. It's our enemy. Our focus is only & only to keep it as far away from us as possible.

Actor — Vindu Dara Singh

FIRST COLUMN

HEALTHCARE POLICY NEEDS A BOOSTER

The disparity among the masses makes the downtrodden people more vulnerable

ISHANEE SHARMA

Will the untoward dissemination of Coronavirus in India, the economic prosperity and healthcare developments were often considered complementary to each other. During the COVID pandemic, empirical corroborations show the gap between the two has not narrowed down, resulting in lopsided development. Every year, the Union and State Governments while appropriating their annual finances accord utmost priority toward superficial sectors or ancilliary enterprises ie insurance sector and proffer marginal policy attention to our medical and health care sectors. It is appalling that since Independence, the percentage-based monetary allocation in healthcare development had never exceeded two per cent of the overall financial allocations. Consequently, it results in a displeasing growth of certain sectors accompanied by social disparity caused by the whopping expenses incurred by the majority of our population in meeting the basic medicinal requirements at private hospitals. This disparity makes the downtrodden masses vulnerable in the spheres of human resource development, in seeking adequate health care benefits from the State. Ergo, the plunder bund-like insurance companies exploit them at their own whims and fancies, which in turn eclipses the

economic development and ultimately takes lives of thousands of people in our country due to inadequate healthcare infrastructure. This pandemic has inadvertently helped our economy in highlighting the existing infrastructure lacunae in the medical and healthcare industry. Due to the glaring deficiency of an adequate infrastructure and sufficient human resource in the public hospitals, the most sought-after health care schemes such as Ayushman Bharat have also failed to meet the legitimate medicinal demands of the masses during the times of the pandemic. A report published in a leading daily newspaper highlights that barely 10 per cent of the Ayushman Bharat cardholders could take the benefit of this centrally sponsored scheme.

We have witnessed that ICUs, ventilators, availability of RT-PCR facilities, oxygen cylinders, cardiac monitors for operation theatres, electrocardiogram machines, adequacy of beds available, vaccines, ancillary medicines and steroids, vertical transport facilities, staff and most importantly sufficient number of doctors were also inadequate in most of the healthcare institutions. Scarcity of testing facilities and vaccines erodes the utility of rural and government hospitals and bulldozes the poor patients to hasten to distant places for availing urgent treatment. It can be said that the genesis of this problem accentuated in the year 1991 when our country adopted the LPG (Liberalisation, Privatisation, Globalisation) policy. Since then the government allowed the private sector to take a lead in the health care industry and thereby the state in a gradual manner withdrew from its responsibilities for providing adequate health care means to the masses. This stunted public sector spending on medical services, resulting in excessive reliance upon the private sector in seeking health care benefits. The government needs to realize the fact that the private sector operates in a profit-centric manner and they will not take necessary initiatives to reach the masses at the grass root level. Presently in the rural areas, there are only 0.6 doctors per 1,000 population. A pure mercenary approach in the medicinal industry and inception of users' charges in healthcare sectors have placed the people at a disadvantage. Equilibrium in appropriating budgetary allocation between other sectors of our economy and the healthcare sector is a very crucial policy decision, which our country urgently needs to address for saving the lives of thousands of people who are dying due to the pandemic. Earmarking adequate precedence to the health care sector has also become non-negotiable in the present scenario.

Time to embrace the biological revolution

It is an inevitable, irreversible fact. Also, it hides within itself the potential of biological research and its unique opportunities for humanity

BKP SINHA

While ushering in the era of the biological revolution one cannot fail to notice that one of the biggest ironies in biology is that microbes, which are the oldest self-replicating organisms on earth and which were among the last to be discovered, have largely been ignored. This is evident from the present crisis of the Coronavirus, which has devastated half of the world and has brought it almost to the brink of disaster, partly because of the late discovery of microbes and techniques of genome sequencing.

The lack of attention to micro-organisms is largely due to our observational bias. We tend to ignore what we cannot see. This predisposition allowed us to make great progress in astronomy observing visible objects billions of miles away from us, long before we could appreciate the role of bacteria and viruses on this planet. Life on earth is much more than there are plants. Our inherent knowledge gaps about viruses & microorganisms have brought us to the present-day crisis.

Hence, biological revolution is inevitable. The following facts expose us to the ongoing revolutionary and unprecedented biological research and its unique opportunities.

Microbes have evolved into a complex nanomachine even capable of splitting water via energy from the sun, billions of years ahead, than terrestrial plants. There is only one existing prokaryotic type of bacteria capable of producing oxygen without the sun — the cyano bacteria. We have yet to discover its mechanism.

If one happens to look to the list of noble laureates in the last decade one cannot fail to notice that most of the noble prizes even for physics and chemistry have gone for their study on solving the biological riddle. Several aspects of the mystery of biology are still to be unravelled. Dr Siddhartha Mukherjee of New York University observed that though cancer research started earlier than space travel, cancer is still an unconquerable 'emperor of maladies'. It is no surprise that MIT, an institution known for engineering and technology has changed its focus to molecular biology and some of its faculty members have even won noble prizes for their research on cell biology.

Dr Bruce H Lipton of Wisconsin University and subsequently at Stanford University, USA, in his ground-breaking work, has discovered how cell mechanisms receive and process information in the cell through the critical cell membrane. The cell membrane through its receptor and integral protein that serves as an antenna sends signals from the outside environment. The implication of this research will radically change our understanding of life. It shows that genes and DNA are controlled by signals from outside through the cell membrane. This research in cell biology and quantum physics is being hailed as a breakthrough showing that behaviour can be

WE ALL NEED FRESH WATER TO SURVIVE BUT IT IS ONLY FIVE PER CENT OF THE TOTAL WATER VOLUME OF THE EARTH. MOST OF IT IS IN ICE SHEETS AND THE SOIL. HENCE, WATER PURIFICATION IS CRITICAL FOR HUMAN SURVIVAL. THIS DISCOVERY WILL USE CELL PROTEINS OF THE CELL MEMBRANE TO PURIFY WATER

The writer is an advisor to Amity School of Natural Resources and Sustainable Development, Uttar Pradesh. The views expressed are personal.

changed as we train our thinking. Thoughts and minds' energy directly influence how the physical brain controls the body's physiology. Mental 'energy' can activate or inhibit the cells' function to produce proteins.

Biologists in collaboration with biochemists, biophysicists are working hard to cutting-edge research on most of the areas of the burning issues to meet the demands of the growing population that consumes more and more transportable forms of stored energy. Scientists are turning to alternative sources of renewable energy like solar, hydro, wind and tide. But our energy needs are still not being met because of their intermittent supply and time difference between their production and demand. The alternative renewable energies are getting cheaper, better all the time. However, we are yet to find a way to store these energies ineffective, cheap, reliable ways, without much creation of waste.

If biologists can devise a battery that allows overcoming intermittency problems inherent in solar, wind, and other renewable sources, we could use clean and abundant sources to meet all our energy needs.

The battery converts chemical energy to electrical energy by moving electrons from one metal to another. Electrons are tiny negatively charged particles. The copper-zinc plates form positive and neg-

ative poles. It conducts the electric current. It can go as long as all the electrons get transferred. Thus, a battery is an energy transportation device. When the battery is discharged, we use electricity to charge.

Dr Angela Belcher, materials scientist at MIT, is evolving viruses into variants that could organize non-biological materials such as gallium arsenide and silicon for semiconductors. Her experiment gave her confidence to build new tools to build batteries. She found that metals and metal oxides worked particularly well. Viruses do not have cell walls or any structural elements. It is a protein capsule with DNA / RNA. She found that viruses-building elements could be used to make electrodes that can open a door to clean and efficient, new way for making batteries. Her next step is a virus-based state of art battery, but could this battery take the form of a dashboard, seat cover, door panel? Nobody knows.

Until recently, it was undisputed that cell membrane itself is a medium for exchange of water from cells and outside. Dr Peter Agre, molecular biologist at John Hopkin's Institute, in 1980 while purifying Rh protein from red blood cell membranes to identify it made a discovery that the membrane has Rh protein that works as a gate and alters a particular substance vehicle with a pass to allow entry into the cell. These proteins are known as aquaporins.

Starting with a large volume of the red blood cells, he separated the cell membrane from the rest of its content. Next, he carefully isolated Rh protein from other present proteins. We all need fresh water to survive but it is only five per cent of the total water volume of the earth. Most of it is in ice sheets and the soil.

Hence, water purification is critical for human survival. This discovery will use cell proteins of the cell membrane to purify water. We now know the whole family of aquaporin found in virtually all organisms on earth. A particular amino acid occupies a particular pattern of location and pattern.

Contrary to the theory by a famous economist, Thomas Robert Malthus, the world would be engulfed by war, famine and pestilence, but the convergence of biology and engineering is giving us great hope that we can avoid the gloomy future. How to bring together researchers from the fields of science for a collaborative effort in bioengineering by encouraging national investment in fundamental research that motivates scientists to work in interdisciplinary areas.

For all this to happen we must have convergence-minded policies and international collaboration in the field of biology, where scientists and technologists can work on a platform to defer the sixth mass extinction of Holocene or Anthropocene.

POINTCOUNTERPOINT

AS PER TV REPORTS, MY NUMBER WAS FALSELY GIVEN AS BELONGING TO SOME AMJAD KHAN, OSTENSIBLY TO LINK ME WITH DRUG TRAFFICKING.

— MAHARASHTRA CONGRESS PRESIDENT NANA PATOLE

ONE PARTY SHOULD NOT TAP THE PHONES OF THE OTHER PARTY OR LEADERS. THE MATTER SHOULD BE INVESTIGATED BY A COMMITTEE OF RETIRED JUDGES.

— BJP LEADER SUDHIR MUNGANTIWAR

The nation needs to come up with a transparent vaccine policy

We, as one nation, one people, need to come together. If all of us don't care for each other in this hour of crisis, who will?

It was national technology day on May 11 (the day is celebrated to mark 1998 Pokharan nuclear tests) and the irony is Indian science has managed to break an atom and unleash its power but an atomic size virus seems insurmountable. The statement could well be turned around-to, in this battle of humans' vs virus, policy makers ignored science.

KUMARDEEP BANERJEE

A month into one of the darkest periods of modern Indian history things look tattered and dishevelled with citizens in queues even for performing last rites of their loving. Early celebrations, political compulsions of a democratic society, vibrant regional sensitivities, one can attribute a ton of reasons to the current level of pandemic devastation, yet what is lacking is sound backing and knowledge of a science-led bunch of

(The writer is a policy analyst. The views expressed are personal.)

experts leading the fight against pandemic. It may not be an exaggeration if one assumes India's second wave COVID battle is being fought in courts, national and local administrative offices. Each one in their desperation or compulsion to make the right announcement is giving a siloed decision, often over-reaching each other's territory, therefore creating an unwarranted bottleneck at a critical time. Examples have been quoted of differences between Delhi and Mumbai and will continue to be a case study for any future pandemic management, but what it showed was any governance has to start right at the colony cluster level. The biggest bunch of caregivers/administrators/counsellors are right in the neighborhood and therefore healthcare and civic infrastructure has to be upgraded

at the mohalla level. Tossing a few social media posts with glossy pictures of infrastructure fail to impress when a person urgently needs to breathe. Running to courts to intervene is allowing the judiciary to walk into executive's core responsibilities while presenting a united face to any calamity/war or crisis is one of the basic rules of public administration. One does not start to

gain brownie points before the unconnected and potentially dangerous parties during a crisis situation. It is shocking to see central, state, local administrations if not judiciary, creating opposing guidelines for Covid management or trying to control surge with delays.

Second, it is important for those at the top to understand that the pandemic is a blunt reminder of the gross neglect

of rationale domain experts in policy making and governance. India still is governed by bureaucrats, who by training are generalists with no special domain knowledge for handling new world challenges and therefore solutions. Political leaders of any hue would always cater to their constituencies and come up with the most populist schemes, which may or may not impact lives and livelihoods in the long term. An example, free food distribution, while at a humanitarian level it is a noble move yet ensuring a continuous supply of government subsidized ration is the only long-term solution. If the 'one nation one ration card' had been operationalised in major parts of India, along with various schemes for migrants and those out of the social net, tons of public sector human resources such as

police could have been better utilized for enforcing other Covid appropriate protocols. If a few scientists, epidemiologists, doctors had been permanently co opted in a steering committee for Covid management in national and State governments (if not local) the permanent tag of India facing worst Covid wave in the world could have been avoided.

Finally, the truth no matter however harsh or shaming if told honestly and with compassion, always benefits the orator. The government has been avoiding queries on vaccination supply and distribution. All domain experts have been suggesting vaccination being the only long-term solution for protecting a large chunk of population and avoiding mass graves. The government had nearly eight months to be prepared for the current onslaught and has

been blessed with one of the largest vaccine manufacturing sites in the world, along with a home grown vaccine. It therefore cuts a very sorry figure when despite all the wealth and a team to push India to the next lever of growth, only about 10 per cent of the population has been vaccinated while a sizeable chunk of India, even in most impacted districts of Delhi and Mumbai, are battling it for *qjab* in the arm. The current vaccine distribution policy of the government is opaque and needs clarity along with an almost daily update on the pipeline for next few months. Estimates suggest nearly one per cent of the India population would be willing to pay for vaccines. Government must prioritise COVID3 management by securing nearly 1.5 billion vaccines for India in the next few months.

Oli sworn in as Nepal Prime Minister again

PTI ■ KATHMANDU

K.P. Sharma Oli, heading a minority Government, was sworn in as Nepal's Prime Minister on Friday, four days after the embattled leader lost a crucial vote of confidence in Parliament.

President Bidya Devi Bhandari administered the oath of office and secrecy to Oli as the prime minister at a scaled-down ceremony at Shital Niwas, the presidential palace.

The 69-year-old Chairman of the Communist Party of Nepal - (Unified Marxist-Leninist) was reappointed as prime minister by the president in his capacity as leader of the largest political party in Nepal's House of Representatives.

Oli will head a minority government as he does not enjoy a majority in Parliament after losing the vote of confidence on Monday. He was reappointed to the post on Thursday night as the Opposition parties failed to secure majority seats in Parliament to form a new government.

Oli will now have to take a vote of confidence at the House within 30 days, failing which, an attempt to form a government under Article 76 (5) of the Constitution would be initiated by the President.

The ministers of Oli's Cabinet were also sworn in during the ceremony.

During the oath-taking ceremony, Prime Minister Oli and Deputy Prime Minister Ishwar Pokharel did not mention the word God though President Bhandari had mentioned it.

"I will take oath in the name of the country and the people," Oli said, while President Bhandari had mentioned "God, country and the people."

All the Ministers and ministers of state from the old Cabinet have been included in the new Cabinet.

Pradeep Gyawali has been reappointed as Foreign Minister while Ram Bahadur Thapa and Bishnu Poudyal were appointed as ministers for Home and Finance. The oath-taking ceremony was kept brief keeping in mind the raging

Palestinians flee as Israeli artillery pounds Gaza

Gaza Health Ministry says toll from fighting has risen to 119, including 31 kids & 19 women

AP ■ GAZA CITY, GAZA STRIP

Palestinians grabbed their children and belongings and fled neighborhoods on the outskirts of Gaza City on Friday as Israel unleashed a heavy barrage of tank fire and airstrikes, killing a family of 6 in their home. Israel said it was clearing a network of militant tunnels ahead of a possible ground invasion.

Israel has massed troops along the border and called up 9,000 reservists as fighting intensifies with the Islamic militant group Hamas, which controls the Gaza Strip. Palestinian militants have fired some 1,800 rockets, and the Israeli military has launched more than 600 airstrikes, toppling at least three high-rise apartment buildings, and has shelled some areas with tanks stationed near the frontier.

As Israel and Hamas plunged closer to all-out war despite international efforts at a cease-fire, communal violence in Israel erupted for a fourth night. Jewish and Arab mobs clashed in the flashpoint town of Lod, even after Israel dispatched additional security forces.

The Gaza Health Ministry says the toll from the fighting has risen to 119 killed, including 31 children and 19 women, with 830 wounded. The Hamas and Islamic Jihad militant groups have confirmed 20 deaths in their ranks, though Israel says that number is much higher. Seven people have been killed in Israel, including a 6-year-old boy and a soldier.

Before dawn Friday, Israeli tanks and warplanes carried

A Palestinian relative mourns over the bodies of four young brothers from the Tanani family who were found under the rubble of a destroyed house following Israeli airstrikes in Beit Lahia, northern Gaza Strip on Friday

out an intense barrage on the northern end of the Gaza Strip. In the darkness, Houda Ouda and her extended family ran frantically inside their home in the town of Beit Hanoun, trying to find shelter as the earth shook for two and half hours, Ouda recalled.

"We even did not dare to look from the window to know what is being hit," she said. When daylight came, she saw the swath of destruction outside: streets cratered, buildings crushed, their facades torn off, an olive tree burned bare, dust and powdered concrete covering everything.

Rafat Tanani, his pregnant

wife and four children, aged 7 and under, were killed after an Israeli warplane reduced their four-story apartment building to rubble in the neighboring town of Beit Lahia, residents said. Four strikes hit the building at 11 p.m., just before the family was going to sleep, Rafat's brother Fadi said. The building's owner and his wife were also killed.

Thousands of Muslims led by activists from an Islamic political party demonstrated in Bangladesh's capital on Friday to denounce attacks by Israel against Palestinians.

After the end of Eid al-Fitr prayers at Dhaka's main Baitul Mokarram Mosque, activists from the Islamic Andolan Bangladesh, or Islamic Movement Bangladesh, began protesting and were joined by thousands of others.

Muslim-majority Bangladesh celebrated the key festival of Eid al-Fitr in a subdued manner after the government urged people to avoid large gatherings. Authorities arranged prayers in phases at the Baitul Mokarram Mosque, where devotees maintained distancing to avoid spreading the coronavirus.

Afterward, protesters crowded together outside, carrying signs reading "Boycott terrorist state Israel" and chanting "Down with Israel."

The current eruption of violence between Israelis and Palestinians began a month ago in Jerusalem. Israel regards all of Jerusalem as its capital, while the Palestinians want east Jerusalem, which includes sites sacred to Jews, Christians and Muslims, to be the capital of a future Palestinian state.

Seven Palestinians dead in West Bank amid violence

Jerusalem: The number of Palestinians killed in the West Bank has risen to seven. The Israeli army says one was killed after attempting to stab a soldier. Palestinian health officials confirmed that death and said

six other Palestinians were killed by Israeli army fire in the occupied West Bank. The health ministry said five were killed in stone-throwing clashes with Israeli forces in several locations.

Thousands of B'deshi Muslims rally against Israel

AP ■ DHAKA

GLOBE TROTTER

PORTUGAL OPENS DOOR TO BRITISH TOURISTS

Lisbon: British tourists can return to Portugal from next Monday, ending days of uncertainty over whether thousands of UK vacation bookings for Portuguese destinations would be allowed. British visitors will be admitted on nonessential travel from May 17, the Portuguese foreign ministry said in a statement Friday. British travelers will need to show on arrival a negative PCR test for Covid-19 taken in the previous 72 hours.

EX-ARMY GREEN BERET GETS 15 YEARS FOR ESPIONAGE

Falls Church (US): A former Army Green Beret who admitted divulging military secrets to Russia over a 15-year period was sentenced to more than 15 years in prison Friday on espionage charges. The sentence of 15 years and 8 months imposed on Peter Dzubinski Debbins, 46, of Gainesville, Virginia, by U.S. District Judge Claude Hilton was largely in line with the 17-year term sought by prosecutors. Defense lawyers sought a 5-year term. Debbs' lawyer, David Benowitz, argued that Debbs caused minimal damage.

Afghan police say Kabul mosque bombing kills 12

AP ■ KABUL

A bomb ripped through a mosque in northern Kabul during Friday prayers, killing 12 worshippers, and wounding 15, Afghan police said.

No one immediately claimed responsibility for the bombing, the latest in a surge in violence as U.S. and NATO troops have begun their final withdrawal from the country, after 20 years of war.

According to Afghan police spokesman, Ferdaws Faramarz, the bomb exploded as prayers had begun. The mosque's imam, Mofii Noman, was among the dead, the spokesman said and added that the initial police investigation suggests the imam may have been the target.

Taliban spokesman Zabihullah Mujahid denied any insurgent connection to the mosque attack, condemning it and accusing Afghanistan's intelligence agency of being behind the explosion.

Both the Taliban and government routinely blame each other for attacks. The attackers are rarely identified, and the public is seldom informed of the results of investigations into the many attacks in the capital.

One worshipper, Muhibullah Sahebzada, said he had just stepped into the building when the explosion went off. Stunned, he heard the sound of screams, including those of children, as smoke

The mother of the mosque's imam, Mofii Noman, cries inside a car near the mosque after a bomb explosion in Shakar Dara district of Kabul on Friday

filled the mosque. Sahebzada said he saw several bodies on the floor, and at least one child was among the wounded. It appeared the explosive device had been hidden inside the pulpit at the front of the mosque, he added.

"I was afraid of a second explosion so I came immediately to my home," he said. An image circulating on social media shows three bodies lying on the floor of the mosque.

The explosion comes on the second day of a three-day cease-fire announced by the Taliban for the Muslim holiday this week of Eid al-Fitr, which follows the fasting month of Ramadan. The Afghan government has also said it would abide by a truce during the hol-

UN envoy asks Thai leader's aid in ending crisis in Myanmar

Bangkok: The United Nations' special envoy on Myanmar met with Thailand's prime minister on Friday as she continues efforts to end violence in Myanmar sparked by a military takeover in February.

The envoy, Christine Schraner Burgener, told Prayuth Chan-ocha in Bangkok that she hopes Thailand will find ways to work with Myanmar's military to ease the unrest, the prime minister's office said in a statement.

The Army's seizure of power has been opposed by a broad cross-section of Myanmar's population.

Myanmar frees Japanese journalist as gesture to Tokyo

Tokyo: An arrested Japanese reporter returned home Friday after being released by Myanmar's ruling junta in what it called a gesture of friendship to Japan.

Japanese Foreign Minister Toshimitsu Motegi said Yuki Kigazumi was released after efforts by Japanese diplomats and others. The reporter boarded a plane at Yangon's airport and landed in Japan on Friday night.

Kitazumi, a freelance journalist and former reporter for Japan's Nikkei business news, said in brief comments at the airport that he learned of his release the night before and was told to pack his bag in 10 minutes.

Irish health system targeted in 'serious' ransomware attack

AP ■ LONDON

Ireland's health service shut down its IT systems on Friday after being targeted in a ransomware attack by what it called "international criminals."

Appointments and elective surgeries were canceled at several hospitals and Deputy Prime Minister Leo Varadkar said the disruption could last for days.

"There's lots we don't know but it appears to be a ransomware attack by international criminals," Varadkar said. "The problem could run through the weekend and into next week, unfortunately."

Ransomware attacks are typically carried out by criminal hackers who scramble data, paralyzing victims' networks, and demand a large payment to decrypt it. Varadkar called the attack "very serious."

the health service is extremely busy doing lots of other things," he said. "It's going to be a very difficult time for the health service."

Health Service Executive CEO Paul Reid told broadcaster RTE that health bosses had "taken a precautionary measure to shut down a lot of our major systems to protect them."

"We are at the very early stages of fully understanding the threats, the impact and trying to contain it," he said.

The health service said appointments for coronavirus vaccinations were not affected. Varadkar said emergency services, ambulance services, GP systems and pharmacy systems also were unaffected, but said there would be "major problems" for radiology services, radiation oncology, elective surgeries and obstetrics and gynaecology appointments.

"It's coming at a time when

UK, US scientists call for fuller probe into Covid Wuhan lab leak theory

London: A group of leading UK and US scientists, including Indian-origin Cambridge University immunology and infectious disease expert Ravindra Gupta, on Friday called for more investigation to determine the origin of the Covid-19 pandemic, including the theory of an accidental release from a lab in the central Chinese city of Wuhan.

In a letter published in the journal 'Science', the experts from world leading universities such as Harvard, Stanford and MIT said knowing how Covid-19 emerged is critical for informing global strategies to mitigate the risk of future outbreaks.

They caution that hypotheses about both natural and laboratory spillovers must be taken seriously until there is sufficient data.

Fully vaccinated can drop the masks, skip social distancing

AP ■ WASHINGTON

In a major step toward returning to pre-pandemic life, the Centers for Disease Control and Prevention has eased mask-wearing guidance for fully vaccinated people, allowing them to stop wearing masks outdoors in crowds and in most indoor settings.

"Today is a great day for America," President Joe Biden said Thursday during a Rose Garden address heralding the new guidance, an event where he and his staff went without masks.

Hours earlier in the Oval Office, where Biden was meeting with vaccinated Republican lawmakers, he led the group in removing their masks when the guidance was announced.

Biden to meet DACA recipients in immigration overhaul push

AP ■ WASHINGTON

As a candidate, President Joe Biden promised to protect those often described as "dreamers," brought to the US illegally as children, and their families by reinstating an Obama-era policy that protected them from deportation.

Biden is scheduled to meet Friday with six immigrants who benefited from the programme.

The Oval Office meeting comes as Biden looks to press Congress to pass legislation codifying the Deferred Action for Childhood Arrivals programme that then-President Barack Obama instituted by executive action in 2012, providing limited protections for immigrants brought to the US illegally as children.

Hopeful for early call on TRIPS waiver: Com Secy

PTI ■ NEW DELHI
India on Friday expressed hope for an early decision in the WTO on a proposal of India and South Africa for a temporary waiver of certain intellectual property rights provisions in the TRIPS agreement to deal with the Covid-19 pandemic.
In October 2020, India and South Africa submitted a proposal suggesting a waiver for all World Trade Organization (WTO) members on the implementation of certain provisions of the TRIPS Agreement in relation to the prevention, containment or treatment of Covid-19.
The agreement on Trade-Related Aspects of Intellectual Property Rights or TRIPS came

into effect in January 1995. It is a multilateral agreement on intellectual property (IP) rights such as copyright, industrial designs, patents and protection of undisclosed information or trade secrets.
Commerce Secretary Anup Wadhawan said the proposal had received support from several countries.
“I am hopeful that an early outcome will be achieved on this,” he told reporters.
The move would help in scaling up the production of vaccines and other essential products to deal with the coronavirus, he added.

Exports jump to USD 30.63 bn in April; trade deficit at USD 15.1 bn

PTI ■ NEW DELHI
India's exports in April jumped nearly three-fold to USD 30.63 billion from USD 10.36 billion in the same month last year, according to government data released on Friday.
Imports too rose to USD 45.72 billion last month as against USD 17.12 billion in April 2020, the data showed.
Trade deficit widened to USD 15.10 billion as against USD 6.76 billion in April 2020.
Exports in April last year had plunged by a record 60.28 per cent due to the Covid-19 pandemic induced lockdown.
In March this year, exports grew by 60.29 per cent to USD 34.45 billion.
Due to the low base effect, exports in April 2021 recorded a growth rate of 195.72 per

cent.
Oil imports stood at USD 10.8 billion as compared to USD 4.66 billion in the corresponding month last year.
Major export commodities which have recorded positive

Benchmarks end flat in see-saw trade; log weekly losses

PTI ■ MUMBAI
The BSE Sensex eked out marginal gains on Friday after two sessions of deep declines as investors scooped up Asian Paints, RIL and FMCG stocks amid a rebounding trend in overseas markets.
A recovering rupee also propped up the market, though the COVID-19 situation and pace of vaccination weighed on investor sentiment, traders said.
The BSE benchmark

swung between gains and losses during the session, before finally finishing 41.75 points or 0.09 per cent higher at 48,732.55. However, the broader NSE Nifty slipped 18.70 points or 0.13 per cent to 14,677.80. Asian Paints was the top performer among the Sensex components, rallying 8.51 per cent, after the company on Wednesday reported an 81.13 per cent jump in consolidated net profit to Rs 869.89 crore for the March quarter.

Rates for RoDTEP likely to be announced in 2 weeks: DGFT

PTI ■ NEW DELHI
Rates for the tax refund scheme for exporters - Remission of Duties and Taxes on Exported Products (RoDTEP) - are expected to be announced in the coming two weeks, a senior official said on Friday.
Director General of Foreign Trade (DGFT) Amit Yadav said it is working with the finance ministry on the scheme.
Last year, the government approved the RoDTEP scheme for reimbursement of taxes and duties to exporters, with a view to give a boost to the country's outbound shipments. The scheme was implemented for all goods, with effect from January 1.
“My sense is that in the coming two weeks, we would be in a position to have an announcement of the rates for RoDTEP,” he said at a PHDC-Cl webinar.
Apex exporters' body the Federation of Indian Export

Organisations (FIEO) has time and again asked the government to announce the rates for different sectors under the scheme as delay would have implications for future exports.
The rates have to be notified by the Department of Commerce, which would be based on the recommendation of a committee chaired by G K Pillai, former commerce and home secretary.
Yadav said due to the COVID-19 pandemic, there has been an impact on both tax collections and expenditure and there is also the challenge of revenue.
On the Merchandise Export from India Scheme (MEIS), the DGFT said it is working with the Department of Revenue on the issue.
“We have proposed to the revenue department that if the MEIS scrips can be issued, which can be encashable a year after... Something (on these lines) we are working on,” he said.

Forex reserves up by USD 1.444 billion to USD 589.465 billion

PTI ■ MUMBAI
The country's foreign exchange reserves increased by USD 1.444 billion to USD 589.465 billion in the week ended May 7, 2021, RBI data showed.
In the previous week ended April 30, 2021, the reserves had risen by USD 3.913 billion to USD 588.02 billion. The reserves had touched a lifetime high of USD 590.185 billion in the week ended January 29, 2021.
During the reporting week ended May 7, 2021, the increase in reserves was on account of a rise in foreign currency assets (FCA), a major component of the overall reserves.
FCA rose by USD 434 million to USD 546.493 billion in the reporting week, the Reserve Bank of India's (RBI) weekly data showed.
Expressed in dollar terms,

the foreign currency assets include the effect of appreciation or depreciation of non-US units like the euro, pound and yen held in the foreign exchange reserves.
Gold reserves surged by USD 1.016 billion to USD 36.48 billion in the reporting week, the data showed.
The special drawing rights (SDRs) with the International Monetary Fund (IMF) were down by USD 4 million to USD 1.503 billion. The country's reserve position with the IMF declined by USD 1 million to USD 4.989 billion in the reporting week, the data showed.

Govt to provide liquidity to exporters by fast customs, duty drawback refunds

IANS ■ NEW DELHI
In an attempt to ensure liquidity for exporters in the difficult period of Covid pandemic, the government has decided to credit all customs refunds and duty drawback claims, made by them upto May 14, by the end of the month.
The Central Board of Indirect Taxes and Customs (CBIC) has launched a special refund and duty drawback between May 15 and May 31.
Under this drive, efforts will be made by customs officials for priority disposal of all pending Customs refunds, IGST refunds and Customs duty drawback claims pending as on May 14 this year.
In an instructional circular issued to all Principal Chief Commissioners, Chief Commissioners and Commissioners of Customs and Central taxes, the CBIC has instructed officials to close-

ly monitor performance of the special refund and duty drawback drive on a daily basis and, wherever required, suitably guide the officers concerned to maximise the disposal.

Reliance Jio announces free talk time offer for JioPhone users for pandemic

PTI ■ NEW DELHI
Reliance Jio on Friday said it is working with Reliance Foundation to provide 300 free minutes of outgoing calls per month, which amounts to 10 minutes per day, for the entire period of the pandemic.
The scheme will be available to JioPhone users who have not been able to recharge due to the ongoing pandemic, the company said in a statement.
Reliance Jio is the first company to announce free talk time for users in the second wave of pandemic wherein many states have imposed lockdowns or lockdown-like restrictions as a desperate measure to restrict the spread of the virus.

Fuel prices rise sharply again after day's break

IANS ■ NEW DELHI
Maintaining its rising trend, fuel prices increased again on Friday just after a day of pause with state-owned fuel retailers hiking rates of petrol and diesel by 29 paise and 34 paise per litre respectively in the national capital.
In Delhi, petrol now costs ₹92.34 per litre and diesel is priced at ₹82.95 per litre up from yesterday's level of Rs 92.05 and ₹82.61 a litre respectively in the national capital.
Across the country as well the petrol and diesel prices increased on Friday but its quantum varied depending on the level of local levies in

India needs its own crypto unicorns: Experts

IANS ■ NEW DELHI
Assets Council (BACC) members, the stakeholders said that consultation and dissemination of information between the government and the industry participants is crucial to determining the most appropriate regulatory framework and supporting innovation.
“There are over 1.5 crore Indians holding over Rs 1,500 crore worth crypto-assets. India is no longer a niche market, but a rapidly growing finance market. Despite the growth in crypto adoption, India is behind in terms of both regulations as well as number of successful crypto startups,” said Nischal Shetty, CEO WazirX.
Smart and sensible crypto regulation, leading cryptocurrency players in the country on Friday urged the government against the ban and sought engagement to build consensus on crypto regulation.
The government earlier indicated that it would take a ‘calibrated approach’ towards digital assets and formulating a Bill on cryptocurrencies. A final decision is yet to be taken.
At a webinar organised by the Internet and Mobile Association of India (IAMAI) and its Blockchain and Crypto

respective states.
In Mumbai, petrol now comes for around ₹98.65 a litre and diesel for ₹90.11 a litre according to a price notification from oil marketing companies.
Petrol prices in some states including Rajasthan, Madhya Pradesh and in some places in Maharashtra have breached the ₹100 per litre mark while premium petrol has been hovering above that level for some time now.
Fuel prices have now increased on four of the last five days rising continuously from Monday to Wednesday, pausing on Thursday and again rising on Friday. Prior to holding back auto fuel prices on Saturday and Sunday, its pump rates had also increased sharply on previous four days as well.
Petrol prices have increased by ₹1.79 a litre Delhi in May in the eight increases so far. Similarly, diesel prices have risen by ₹ 2.22 per litre in capital this month.

Yes Bank to sell property of E Commerce Magnum Solution for recovery of ₹345 cr

PTI ■ NEW DELHI
Yes Bank has invited bids for sale of immovable assets of a borrower, E Commerce Magnum Solution Ltd, to recover dues of over ₹345 crore.
In an e-auction sale notice, Yes Bank said it took physical possession of the immovable properties mortgaged to it on August 29, 2020 pursuant to a demand notice issued to the borrower and mortgagor in January 2020.
The e-auction will take place under the Securitisation and Reconstruction of Financial Assets and

Enforcement of Security Interest (SARFAESI) Act.
The auction is with regard to One Hughes project at Chowpaty, Mumbai of E Commerce Magnum Solution Ltd, Yes Bank said.
The bank has set the reserve price for the auction at Rs 270 crore.
“The properties will not be sold below the reserve price set by the AO (authorised officer),” it said.
The properties in possession by the bank will be sold by way of e-auction on June 15, 2021 for recovery of ₹ 345.32 crore as on April 27, 2021, Yes Bank said in the notice.0

SHORTCIRCUITS

JACQUELINE FERNANDEZ

Stay strong, stay safe, stay healthy. Help others when you can. Spread love and kindness always. We are all battling the pandemic in our own ways, let's be understanding and sympathize with all. Let's be there for one another. Keep sharing your stories of kindness with us and help us spread love and unity.

SHARAD KELKAR

I chose the project *Deja Vu* very carefully and wisely. It is not a big budget film where a lot of money is riding on me, because the content is very good. I believe that the film will be appreciated because of the way we shot it and I have full faith in the director Abhijeet Warang. I am not feeling any kind of pressure.

KAUSHAL KISHORE

There's a lot of difference between film music and independent songs. There are no boundaries while you're working on an independent song. That's why it's called that. You're not bound by a script, in fact, it's the other way around. The storyline is made depending on your lyrics.

SANJANA SANGHI

It is my honour to be joining hands with Save The Children, a century-old Global Child Rights Organisation in our mission to #ProtectAMillion. Together we will be providing support in the form of oxygen, essential medicine, psycho-social support to the most vulnerable communities.

JENNIFER LOPEZ

All of my albums are very special to me, but *This Is Me...* Then is my favorite album I've ever done so far. I know a lot of you have heard me say that before, so in honor of my #JLovers helping it re-enter the album charts again after 19 years, here is a little throwback of the album.

CAUSE

RACE AGAINST TIME... AND DEATH

When the city was being swept away under the onslaught of the second wave of COVID-19, it was volunteer groups which came to the rescue. CHAHAK MITTAL finds out some stories of resilience, faith and patience

8.45 am: I wake up with a jolt and reach out for my phone and open a WhatsApp group I've pinned on top these days. My immediate concern is if Mr Pathak had found a ventilator bed for his mother in North Delhi, a request that came in late last night. I had sent two verified leads, post which I slept, guiltily. To my heart's relief, the 33-year-old man had met his requirement through the contact. I scroll further and the task for the day seems ready. My friend's father, Mr Ramnarayan in Bengaluru, has been prescribed Tocilizumab and his daughter is frantically searching for the medicine as the hospital has run out of supplies.

9.00 am: In another group, a request lands for oxygen concentrator in Delhi and I tweet it right away, mentioning between asterisks that 'the patient is just 27' and also, forwarding the message to other groups. I am looking for leads for the respective cases by cross-messaging and shifting between social media platforms.

2.00 pm: While I have received 10 contacts for the concentrator, my call log indicates 38 other calls already made in a hunt for the Tocilizumab. I dial the 10 contacts and much to my disappointment, only one gives hope.

5.30 pm: I have lost track of the number of calls I have made today, perhaps 60-70. I even memorise a few numbers now which are being shared over and over again but to no avail. I have found two leads for the Tocilizumab. While one says it will be available tomorrow evening, the other requires full payment before delivery. Leaving this decision on the patient's family, I pass on a verified lead for the concentrator to the Delhi patient.

8.45 pm: I have failed to arrange the medicine for the Bengaluru man despite making desperate calls. I am exhausted and begin to imagine and feel pity for the plight of his daughter. While the concentrator will be delivered by

tomorrow morning, my mind is still not at ease.

Next day, 11.00 am: The concentrator has been delivered without any hassle. The 27-year-old patient's family is thankful. I shed a tear of relief! My focus is back on finding more sources for the Tocilizumab while 20 other requests pile up in my notifications box.

3.00 pm: I learn that Mr Ramnarayan will never need Tocilizumab, or any other medicine now. The search is over. A hope has been killed. Another pyre is being set up. I don't know the man but the grief of his death consumes me, leaves me agitated and helpless like never before. Was an advance and a hefty payment for a medicine more important than a life?

3.30 pm: I feel like quitting but another request for an oxygen bed in the city makes me recollect my thoughts, which do not agree on giving up on another life battling hard. As the second wave racked every nerve of the country in April, this

timeline with few variations became the routine for many people along with juggling WFH. While the demands for resources may have lessened with the falling number of cases this month, the incidents which the volunteers share haunt them and give a detailed insight into the insides of a relief group formed due to the necessity that emerged out of the current pandemic.

THE BEGINNING

For Abu Sufiyan, founder of *Purani Dilli Walo Ki Baatein*, it began when some symptoms started to show among a few of his team members in early April, who were then asked to quarantine and work

trators, cylinders and refillers, ventilator beds, other life-saving medicines like the Tocilizumab and even meals for those who stayed alone and couldn't cook. The demands for ICU home setup followed soon after when people realised how hospitals were now too crowded, understaffed and unequipped. We started preparing lists of verified contacts for the respective needs and put them out as a consolidated information."

Journalist Aditya Raj Kaul, who has been closely and endlessly working with over 500 volunteers, during the second wave to arrange required supplies for COVID-19 patients, said that an extremely dire situation like this demands every one of us to act responsibly. He said that the current struggle of finding oxygen supplies reminded him of his grandmother's demise in 2003 due to the unavailability of oxygen support in time. "It had stayed with me," he added, "and that's how I started from one WhatsApp group to another and because of my good following on Twitter, I would amplify SOS calls and tag several accounts which could be connected to the cases. That's how it grew after people personally started reaching out to me and I could help out more people from places like Jodhpur, areas of Jharkhand, UP and Jammu. In the initial days, we used to get more than 300-500 requests a day, which were different from those 1,000s we received on WhatsApp groups."

group in the city, Manasa R, pointed out at how suppliers seemed to have run out of stock in most scenarios, due to which the meaning of 'a verified contact' changed each day. She said, "From hospitals to officials, they stopped attending the calls when the cases surged. The lines were either busy or unavailable or they'd hang up. Out of 200 calls, two would respond only in the negative. The most unique challenge was the process of verification. After we added a supplier's contact to the database, who could help us find an oxygen cylinder, the supplier would later run out of stock and stop answering calls. And we had to start finding new suppliers from a scratch."

Aeshal Fatima, class 12th student and Delhi-based volunteer, part of nine such groups on WhatsApp, pointed towards the non-functioning of Google spreadsheets, which had been circulated majorly around social media. "No matter how many times I updated the sheet with a verified lead, the contact soon would go out of reach or the resources they had available got exhausted since hospitals were running out of oxygen on an hourly basis," said she. While finding the supplies was a major issue, their reasonability and affordability became a concern soon after. Pointing towards the challenge that unfolded — unreasonable prices of oxygen cylinders or concentrators due to the high demand, she said, "This is the worst thing someone could do to the one who's already suffering. And the sadder part is that in such a life-and-death situation, one has no choice but to give in, no matter the cost."

DEPLETING RESOURCES, COMMON CHALLENGES AND EVOLVING STRATEGIES

While the information was being verified and shared through personal handles and social media toolkits, due to the rising number of cases and demands, they soon fell short. Abu added, "After a few hours of creating a list of available resources, they would exhaust and hence, would be of no use to people whom it reached by the end of the day. This became one of the major challenges and hence, we started to mention the date and time when a resource was verified for use and a disclaimer for its limited availability."

Chennai-based independent journalist and part of a volunteer

that we were unable to help save her," he shared. On her second day as a volunteer, Aeshal came across a request on one of the groups she was part of for an oxygen cylinder in Lucknow. She said, "I sent a few leads and went to sleep with guilt and fear within. I woke up to see that the patient had found the cylinder and was relieved to hear this. That was the first time when I was really motivated to help out as many people as I can during these tough times and I made sure I dedicated myself to it also given the obligation one feels after coming across a request."

While there were stories of victory and demise coming in, there were also certain cases where the already broken-down healthcare system meant that non-Covid patients had a tough time getting relief. Abu shared, "In one of the most unusual cases during those days, we came across a case of my friend's house help's daughter, who had fallen from the stairs and suffered a severe injury on head. Due to the unavailability of beds in hospitals, they were struggling to find a doctor and a bed for her. It took seven hospitals that night, all at different places, to get tests and MRI scans done. She was finally admitted to the eighth hospital."

On the other hand, there are also stories of resilience, faith and patience which passed the test of time and emerged. Manasa shared how her cousin was unable to find a bed for her younger brother for over eight days, "the longest a case took to close," due to which she began losing hope. "I cried in relief when a combination of luck, perseverance and a personal contact" of the family worked in helping the patient. When she shared the story with other volunteers in the group, who were not involved in the case, they listened patiently, celebrated with her as though the patient was one of their own. "Well, everything is significant — a person being saved, a person dying, a person not receiving the resources on time, a person actually managing to find a resource. We, as volunteers, although, are quite careful about our boundaries with patients and their kin, in a time like this, we are all invested in each of them in some way or the other," she added.

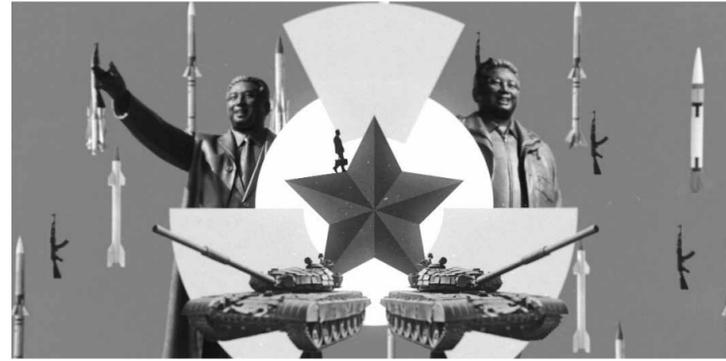

HAUNTING STORIES OF VICTORY AND DEMISE

It was 2 am when Kaul received a request from Bengaluru for a 26-year-old girl, whose parents were unable to find a hospital bed. Kaul and his team started working on the case right away, got the girl admitted to a hospital, however, to their disappointment, the girl passed away the same night at 4.30. "One of the volunteers, closely associated with the case, broke down and couldn't come to terms with the fact

Kim Jong Un has a decision to make: Maintain his brutal family legacy or become a legitimate leader, a dilemma that could ultimately destroy the Kim dynasty. As North Korea faces a critical crossroads, *North Korea: Inside The Mind Of A Dictator* chronicles the life and reign of Kim Jong Un as the young and unpredictable leader attempts to turn around his nation's fortunes.

An in-depth portrait

North Korea: Inside The Mind Of A Dictator takes viewers on a journey through Kim Jong Un's past and present to understand the man and the myth who holds North Korea's uncertain future in his hands

the following:
 - A rare interview with Kim Dong Chul, the longest-held American in North Korea, who was imprisoned for spying for the CIA.
 - The story of Kim Jong Un's aunt and uncle who cared for him as a teenager before escaping to the United States.
 - US Ambassador John Bolton's critiques of Trump's negotiations with North Korea at the summit in Hanoi, insight on the breakdown in peace talks and Kim's subsequent wrath.

- An interview with Lee Young Guk, a bodyguard to Kim Jong Un's father, Kim Jong Il, who spent significant time with Kim Jong Un as a child.
 - To understand Kim's leadership decisions over the past three years, including his encounters with President Donald Trump and his plans for the "hermit kingdom," experts, journalists and government officials unravel the inner workings of his mind and his tumultuous past as he works to determine his legacy.

The two-hour special delves into the complex family dynamics of the Kim dynasty at the heart of North Korea's history and operations, and offers key insight on his school days in Europe, the failed Hanoi summit and North Korea's growing arsenal of nuclear weapons.

The special also takes a deep dive into the psychology and history of the elusive supreme leader in order to better understand his all-encompassing dynastic power and struggle to keep a grip on control while navigating an uncertain future. From his isolated childhood to the fleeting freedom he experienced in his teenage years to his attempts at diplomacy under the pressure of crippling sanctions, the series pulls back the curtain on a dictator torn between the old ways he grew up with and the encroaching modern world.

The film takes viewers on a journey through Kim Jong Un's past and present to understand the man and the myth who holds North Korea's uncertain future in his hands. *North Korea: Inside The Mind Of A Dictator* is produced for National Geographic by 72 Films. Mark Raphael and David Glover are executive producers for 72 Films and Carolyn Payne is executive producer for National Geographic. (It premieres today at 9 pm as a part of SPOTLIGHT on National Geographic.)

Rakul Preet Singh is a self-made actor. In a little over seven years since her Bollywood debut in the 2014 film *Yaariyan*, she has worked her way through the uphill task of dealing with the tag of an outsider, and is today one of the busiest actors in the Hindi film industry.

She attributes her success to her ability to not be cowed down or be scared of losing stardom. "I am not the kind of person who lives in fear. I came with nothing and I always see the brighter side. I got an opportunity to live my dream and here I am. Ultimately it boils down to when people start appreciating your work. That one smile that you bring on someone's face or when they come and say 'we loved that film of yours'. That is what we all work for, after all," she said.

At 30, Rakul is highly sought-after in Bollywood, and has a long list of films lined up for release over the next few months. Currently, she awaits the release of the OTT film *Sardar Ka*

In demand

Less than a decade after her debut in Bollywood, RAKUL PREET SINGH is a highly sought-after actor with several films lined up for release

Grandson, co-starring Arjun Kapoor. She also has *Mayday* coming up with Amitabh Bachchan and the film's actor-director Ajay Devgn. In *Attack*, she shares screen space with John Abraham. She also has *Thank God with Ajay Devgn and Sidharth Malhotra*, *Kamal Haasan's Indian 2* and the Ayushmann Khurrana-starrer *Doctor G* in the works.

"There is so much love from the audience and the content is thought is to just keep working in different settings with the hope to entertain," she added.

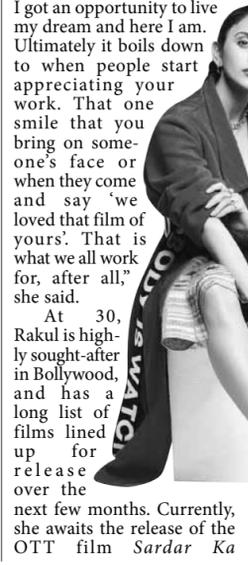

Rakul made her acting debut in the 2009 Kannada film *Gilli*, and her Telugu debut in *Keratum* the same year. A year later, she made her Tamil debut in *Thadaiyara Thaakka*.

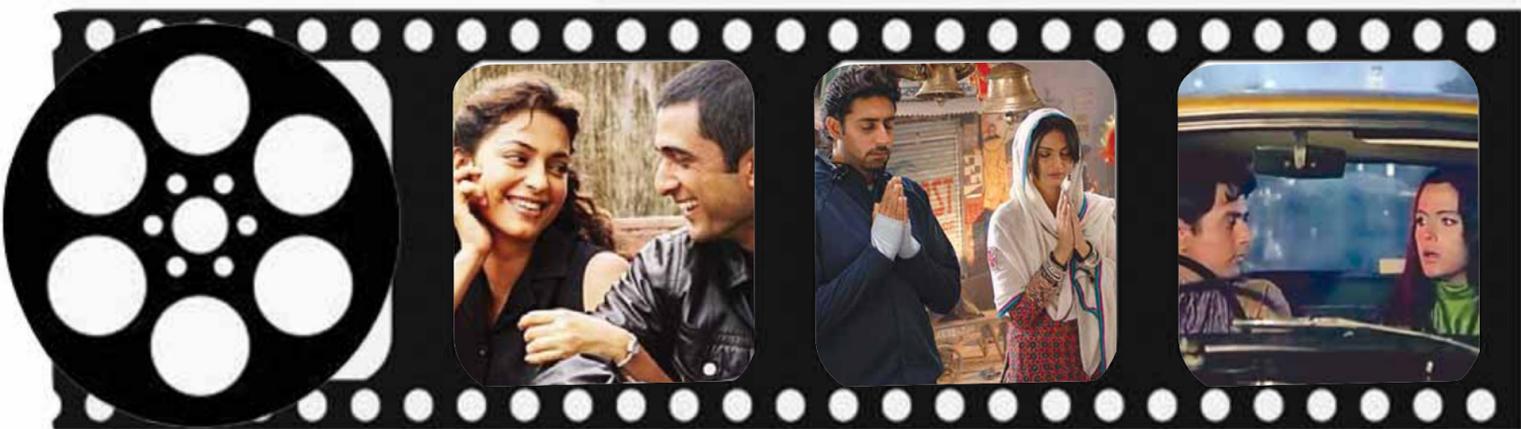

In Bollywood, many consider the 2019 comedy hit *De De Pyaar De*, co-starring Devgn and Tabu, her coming-of-age role. She has also been seen in *Marjaavan* and *Aiyaari*.

Ask her what is important — script or the character — Rakul replies that she believes in the theory of "permutation and combination."

"Sometimes you choose a film because you love the story and you want to be a part of the message promoted by the film or the entire premise of the film itself. And then there are times when you go by your character and the script. The rest of the times, it depends on the director and other actors involved with the project. It is subjective to each prospective film," she said.

Talking about *Sardar Ka Grandson* slated for release on May 18 on Netflix, Rakul explained what made her choose this project, "It was the pure emotion of the film that made this a no-brainer. While I cannot tell you all about it for obvious reasons, the story depicts a grandson who is willing to go to any extent to fulfill his grandmother's wish." —JANS

BEHIND THE SONGS

Singer SUNIDHI CHAUHAN, who recently released her latest single *Ye Ranjishain* after almost two decades, shares some unknown trivia about five of her favourite tracks.

By TEAM VIVA

There is always an untold story behind every song. While some of those stories do come to fore in some way or the other, most of them remain a secret behind the scenes, well away from the spotlight. Singer Sunidhi Chauhan, who recently released her latest single *Ye Ranjishain* after almost two decades, shares some unknown trivia about five of her favourite songs.

HUI HUI MAIN MAST FROM MAST (1999)

Not many people know this but I had no voice to sing this song in the studio on the day of the recording. Just three days before the scheduled recording, I had lost my voice and my doctor told me if I really wanted to make use of this opportunity, I would have to keep my mouth shut right up to the moment when I have the microphone in front of me at the studio. "If you speak at all during the next three days, you will lose your voice. If you really want it that bad, you better keep mum. Sing straight on the mic, on the day of the recording," he said. I was crushed to hear that, especially since I am someone who believes in practising and rehearsing almost to the point of exhaustion. However, for a change, I followed my doctor's instructions and went with his gut feeling. I was really scared, couldn't imagine what I would sound like with a bad throat. Eventually it all turned out for the best. My doctor's instincts were spot on and my voice was back to its usual element and we successfully recorded the song.

AAJ SOCHA TO AANSOO BHAR AAYE FROM HANSTE ZAKHM (1973)

My second all-time favourite song is *Aaj Socha To Aansoo Bhar Aaye* by Lata Mangeshkar, and composed by Madan Mohan ji. Each time I hear that song, I get transported to another place. I can't help but get lost in Lata ji's voice and the emotions she brought to life in that song. While I am not a sad person, I haven't had anything to be sad about in a long while, I cannot help but relate to this song so much. My eyes start welling up as soon as I hear Lata ji's voice in this song.

DIL MEIN JAAGI DHADKAN AISE FROM SUR (2002)

There is no way I could ever forget this song; obviously because of its composition. Much gratitude to MM Keeravani sir who gave me this beautiful song. A little story behind this song is that the *mukhda* was to be sung in one breath and I couldn't help but wonder whether it would be physically possible for me to do so because it had too many lines. But to Keeravani sir wanted it to be in one breath and he said that he knew I could do this. He told me that he believed in me and I should just take my time to practise as much as I need. I took about 45 minutes to an hour, maybe more. I lost track of time but when I got

'Rehna Tu is my all time favourite. It's a masterpiece. The melody and the lyrics, it just takes me to a place where I don't want to come back from'

on the mic, somehow nailed it. I couldn't believe I had managed to sing that *mukhda* in one breath. It is one memory which stands out, it really was a crazy time.

REHNA TU FROM DELHI-6 (2009)

Rehna Tu is my all time favourite by AR Rahman sir and Prasoon Joshi. They have created a masterpiece. The melody and the lyrics, it just takes me to a place where I don't want to come back from. And I must have heard it a

zillion times already but that feeling never wanes...

LE CHALE FROM MY BROTHER NIKHIL (2005)

I have to mention *Le Chale* here. When Viveck Philip, who composed this song, and (Onir) Anirban, who is the director of the film, approached me to sing this song, right off the bat I was in love with it. I was head over heels for the melody. Let me share a story behind this song, which not many, in fact, nobody knows. I was kind of chok-

ing while singing this track in the studio. I tried to not make it too obvious because I knew that if I stopped singing I would start crying. It was really tough keeping my emotions in check while singing this one. And mind you, this was before I got to know about the context of this song in the film. It was purely magical, what that melody was doing to me. Those notes were driving me crazy and I could feel myself choking again and again. Nobody knows this, not even Anirban or Viveck... Well I think they will get to know this now.

'Difficult yet beautiful journey'

Actor ABHISHEK BANERJEE auditioned for his character in *Pataal Lok* half-heartedly because he feared rejection as he was the casting director of the series

It's almost a year since the world witnessed actor Abhishek Banerjee delivering a splendid performance in the crime-thriller series *Paatal Lok*. Having starred in comic roles prior to the project, Abhishek showed the fans how versatile he could be when taking on roles in another genre. He has now shared his experience from the time when he was shooting for the eponymous series.

"Sudip (Sharma) sir went to watch *Stree* in theatre one day and he called me the next day saying that he wanted me to try for the character Vishal Tyagi (Hathoda Tyagi). He said, 'He saw a maniac in my eyes'. It was a shocker as I didn't expect that. I stared at myself in the mirror looking for the maniac in me. Initially, I didn't find the role exciting, Tyagi didn't have many dialogues, even the screen time was less compared to other characters! I was half-hearted about attempting the audition plus I was the casting director too so didn't want to be in an embarrassing situation where I get to hear the news of my own rejection from the team," he said.

"However, Karnesh (Sharma) sir and Sudip sir were both convinced that I could do a good job with it. They were not liking the other options I presented to them for Hathoda's role! Finally after a long internal duel, I gathered courage and gave the audition. I gave it my all but still was nervous when I finally sent them the test. Next morning Karnesh sir called, I picked it up anxiously. I was told that they really like my audition and I am on board for the part. Phew! That was such a relief. But it was only the beginning of a difficult yet beautiful journey."

The series went on to receive a lot of praise as it opened to strong critical acclaim. Abhishek, for his portrayal of Hathoda Tyagi, also received a lot of appreciation. His role in the series truly helped him break free of the comedy persona onscreen.

His recently released anthology film, *Ajeeb Daastaans*, was again a successful outing. With each new project, he keeps proving his mettle. He now has five projects in line with quite a few more in developing stages. Abhishek will next be seen in *Rashmi Rocket*, *Bhediya*, *Aankh Micholi*, *Dostana 2* and *Helmet*.

Divyanka's adventure mode on

Actor Divyanka Tripathi, who is currently shooting in Cape Town for the stunt-based reality show *Khatron Ke Khiladi 11*, says that it was tough leaving her husband, actor Vivek Dahiya, at home.

"This is the first time after our marriage in 2016 that Vivek and I would be by ourselves for an extended period of time. We have gotten emotional many times. Last week, we had been preparing ourselves for the day when I would leave for Cape Town. Leaving him and going makes me very sad," she said.

The actor also added that the family members of all contestants were reluctant in letting them travel overseas amidst the pandemic. "During these uncertain times, it's understandably tough for family members to let us go. In all honesty, I think they are the biggest *Khatron Ke Khiladi*," Divyanka said.

However, a part of her was overjoyed at being given a chance to engage with something adventurous again.

"I am excited that I am going to do something that was long due. Before coming to Mumbai, I used to get a lot of chances to participate in adventurous activities. I used to participate in a lot of adventure camps when I was a kid. I used to be away from home for 10-day or 50 day-camps, so I was in the habit of staying alone. And in the 15 years since I came to Mumbai, I have never had a chance to travel and be by myself so I have not touched that aspect of my personality in a long while. But I have to say that the next few weeks would be somewhat bittersweet as I have to stay away from Vivek to make use of an eagerly awaited opportunity," she added.

On the deadly second wave of COVID-19, Divyanka expressed, "It is a tough time for the industry, but it is not just limited to our industry. Across professions, just about everyone is going through a tough time. But it is a bit easy for us actors, since we are no strangers to this lifestyle. When we are working, our schedules are erratic, we work rigorously and for extended hours. But when we don't have work, like, between

shows we work on ourselves at home."

"These times are a reminder that more than work, life is important. I would urge everyone to follow social distancing norms and to stay safe. During this time, mental health is important, and it is important to stay in touch with your loved ones at all times. Those of us who are lucky to not be affected by the pandemic, we should try to be healthy mentally and keep indulging in activities at home to keep ourselves engaged," she signed off.

—IANS

Abominable is a computer-animated adventure film which follows a teenage girl named Yi, who encounters a young Yeti on the roof of her apartment building in Shanghai. She names him Everest and embarks on an epic quest to reunite the magical creature with his family at the highest point on earth along with her mischievous friends Jin and Peng (played by Albert Tsai). But the trio of friends will have to stay one-step ahead of Burnish, a wealthy man intent on capturing a Yeti, and zoologist Dr Zara to help Everest get home. Actor Albert Tsai shares about his experience of working on the film and more. Excerpts:

How did you get involved?

As soon as I read the script and the character description of Peng, I just fell in love with him, so I decided to audition for the role. I was really excited to be part of a film that was portraying Chinese culture, with a modern Chinese family, which we haven't had, ever, really. The last major film was *Mulan*, which was about ancient times.

How did animator and director Jill Culton pitch Peng to you?

Just that he's a fun-loving, energetic kid. He is always intended to be the younger character and almost comic relief, but with more depth than that. He is also the optimistic one of the group. He's always playing, and when other people are about to give up, he really wants to continue the journey. He has a ton of fun on this adventure with Everest. Peng is the only one, along with Everest, who seems to be taking this journey more like a vacation. When the others are considering the next step, he's over there having a thumb war with Everest.

Love the unknown

Actor ALBERT TSAI says that it is human nature to be drawn to what hasn't been confirmed or discovered yet. By TEAM VIVA

I don't know if he was quite the basketball aficionado that he became.

What is it about the Yeti creatures that we're so obsessed with?

I think it's just part of our obsession with mythical creatures. We love the unknown, and what we haven't confirmed or discovered yet. Also, what's really exciting is, we bring a different version of the Yeti into the film, as opposed to sticking to the normal depiction, which is more gorilla-like, abominable snowman who is mean and scary. We bring a cuter, more innocent version. He's got these powers, which aren't normally part of the Yeti mythology, so it's really fun. Jill [Culton] said she wanted to base Everest off of her experience with her dogs, which is why he sort of has dog-like qualities. But he also has his own emotions and he's quite intelligent.

Was it fascinating to see the film come to life step by step?

That was one of my favorite parts of this entire experience. It was fascinating for me to see how a scene could go from basic storyboards and sketches to animation and layout. It started out as very rough 3D animation and it got finer and finer, with lighting and effects and all that, until finally it's

What did you want to bring to the role?

I did try to really infuse some of my personality into Peng. A lot of his body language and movements were sort of inspired by what I did in the recording booth because they had a camera on us when we were recording the audio, just to see what we would do. Being a TV actor, I did the movements along with the lines, which was natural for me and that they imported onto Peng.

Did Peng change at all as the film evolved?

He stayed more consistent through the various stages of production. I feel like he was always going to be the younger member of the group, the comedic heart. I think there were slight personality changes...

what you see at the movies. The scenes I saw a lot of were Everest and Yi's escape from the city, and the blueberry sequence. I tracked those two from the beginning and it was exciting for me to see how they were animated.

You're usually on your own in the recording booth. What sort of challenge was that as an actor?

It was definitely very different than what I am used to. A lot of times in the recording sessions, we would do a certain line several times, changing the nuance, and then we'd move on to the next one. It had a sequential approach, and we could play around with it a lot more. Jill was so collaborative, along with the whole team, and nothing had been set in stone yet, so we were able to ad lib a bit and improv here and there. The few recording sessions we did do together as a cast were a lot of fun, too, because that was more like traditional acting.

You're a big fan of animated film. Any favorites?

I really love *The Lion King*. I think that was the first animated movie I watched, so it was special for me. And it was a little like *Abominable*, since it was nature-focused. A favorite *DreamWorks* movie of mine? I love *Shrek* and *Kung Fu Panda* too, those were really funny.

You're a producer these days, what prompted that?

I've always been fascinated by what happens behind the scenes and how a team of cast, writers, producers and directors put together a TV show, so I've always wanted to get into that side of things. I've been trying to do that, and it's where I see myself in the future.

(The film premieres on May 16 at 9 pm on Sony PIX.)

shortpasses

TURKISH F1 CANCELLED

PARIS: The Turkish Grand Prix, which was only drafted onto the F1 calendar as a replacement for the cancelled Canada GP two weeks ago, was itself axed on Friday. F1 chiefs, forced into another change due to Covid-19 protocols, announced that they will instead return to the sport's safe haven of Austria.

NEYMAR TO MISS FINAL

PARIS: Neymar will not play for PSG in next week's French Cup final against Monaco after a booking in Wednesday's semi-final saw the Brazilian incur a suspension.

LAPORTE CAN PLAY FOR SPAIN

LAUSANNE: Manchester City defender Aymeric Laporte has been approved to play for Spain instead of France at Euro 2020

ALAPHILIPPE TO SKIP OLYMPICS

PARIS: Cycling's road race world champion Julian Alaphilippe said on Friday he will not take part in the Tokyo Olympics. The French rider said the decision was a personal choice.

IRFAN, 4 OTHERS RETURN -VE

NEW DELHI: Olympic-bound race walker K T Irfan and four other elite track-and-field athletes have returned negative for Covid-19 in a confirmatory second test conducted at SAI Centre of Excellence in Bengaluru.

PHILLIPS, MITCHELL GET NZ DEAL

WELLINGTON: White ball batsman Glenn Phillips and allrounder Daryl Mitchell have been included for the first time on New Zealand Cricket's list of centrally contracted players. But Test spinner Ajaz Patel has been dropped from the 20-strong list.

ALVES, SILVA BACK FOR BRAZIL

SAO PAULO: Veteran defenders Dani Alves and Thiago Silva were brought back into the Brazil squad for next month's World Cup qualifiers against Ecuador and Paraguay.

SHOOTERS DOING DRY FIRING

NEW DELHI: In quarantine till May 19, India's Olympic-bound shooters are keeping themselves busy with dry firing in their hotel rooms at Zagreb before they hit the range next week.

JAPAN EXPAND COVID EMERGENCY

TOKYO: Japan expanded a coronavirus state of emergency on Friday, just 10 weeks before the Olympics, as campaigners submitted a petition with more than 350,000 signatures calling for the Games to be scrapped.

BILES RETURNING TO COMPETITION

INDIANAPOLIS: Reigning Olympic gymnastics champion Simone Biles will return to competition for the first time in more than 18 months at the US Classic next week. Agencies

Raman's sacking bring CAC under scanner

PTI ■ NEW DELHI

Former opener WV Raman's unceremonious ouster from the Indian women's team head coach's position has opened a can of worms with both the Madan Lal-headed Cricket Advisory Committee and Neetu David-led selection panel coming under the scanner of BCCI big-wigs.

Raman, who successfully coached the women's team to T20 World Cup final in Australia and is widely acknowledged as one of the best Indian coaches, was removed by Lal and Naik's CAC, which reinstated Ramesh Powar, who was removed from the same post in 2018.

IS LAI'S COMMITTEE ILLEGAL?

"Maddi paaji (Madan Lal) celebrated his 70th birthday on March 20. The BCCI, in its appeal to Supreme Court against some of the reforms, doesn't ask for roll-back of age-cap of 70 years. So how come Madan Lal was allowed to sit in CAC meeting?" a senior member asked.

While the BCCI has no intention of using its veto to over-rule Lal and Naik, the board's top officials are unable to wrap their heads around as to what led to recommendation of Raman's removal.

DID RAMAN & NEETU HAVE A FALL-OUT?

It has been confirmed from multiple sources that Raman had red-flagged the kind of squad that David, Arati Vaidya, Renu Margrate, Mithu Mukherjee and V Kalpana picked for the South Africa series, for which teen batting sensation Shafali Verma was not picked for the ODIs and senior pacer Shikha Pandey was inexplicably dropped.

"Do you know what kind of logic was given for dropping Shikha and Shafali? It is beyond comprehension," a peeved senior official said.

The selectors said that Pandey was unfit because she hasn't worked hard on training during lockdown and was "overweight".

"But when they were asked to prove their point, they couldn't simply do it," the official alleged.

Prathyusha gave 60 odd runs in 8 overs in one of the games. "How did Monica get selected over Shikha Pandey?" is a question that is being asked.

While the majority believe that the stylish southpaw of yester-years has been hard done by, there are a few critics who feel that there were some loose ends from his side too.

"Some girls complained that he will at times switch himself off during training sessions. Also some girls felt under-appreciated. Someone like Rajeshwari Gayakwad was not even once praised despite she being the best bowler during the series," a member from the anti-Raman camp said.

Another allegation against Raman is that he unwittingly gave gloveswoman Nuzhat Parween a debut cap without knowing that she has already played both ODIs and T20Is for India.

In the case of Shafali, her fielding was questioned and put forth as the reason for her non-selection in the ODI team.

"If Raman had a counter-question that if Shafali's fielding is a problem for 50-over cricket, then it is bigger problem in T20 format where it is more important. Then how is she being selected in T20 format," the official asked.

The selection of leg-spinner C Prathyusha and left arm seamer Monica Patel has also been questioned as they didn't look ready for the rigours of International cricket.

Prathyusha gave 60 odd runs in 8 overs in one of the games. "How did Monica get selected over Shikha Pandey?" is a question that is being asked.

COUNTER POINTS AGAINST RAMAN

While the majority believe that the stylish southpaw of yester-years has been hard done by, there are a few critics who feel that there were some loose ends from his side too.

"Some girls complained that he will at times switch himself off during training sessions. Also some girls felt under-appreciated. Someone like Rajeshwari Gayakwad was not even once praised despite she being the best bowler during the series," a member from the anti-Raman camp said.

Another allegation against Raman is that he unwittingly gave gloveswoman Nuzhat Parween a debut cap without knowing that she has already played both ODIs and T20Is for India.

There's 'prima donna culture' in women's team: Raman writes to Ganguly, Dravid

New Delhi: Ousted Indian women's coach WV Raman has written to BCCI president Sourav Ganguly, alleging that there is a "prima donna culture" in the national team and it needs to change.

In the mail that has also been marked to National Cricket Academy head Rahul Dravid, Raman has also offered to present a roadmap for women's cricket in the country, if asked.

"As far as I know, Raman has said that he has always 'believed in team being placed above everybody else, and insisted that no individual can really be a prima donna,' a source privy to Raman's mail said. The stylish former left-hander's crisp letter to the two former captains is sure to ruffle a few feathers given that it has always been the coaches who have either stepped aside or sacked following fallouts with players, most notably ODI captain Mithali Raj.

While Raman's letter didn't name anyone, it is understood that he has spoken extensively about the star culture that prevails in the team, which he said is probably doing more harm than good.

It is learnt that Raman has written about certain individuals who need to place the team above self. "Raman has asked Dada (Ganguly) that if a past accomplished performer feels constrained by this culture, then he (Ganguly) as a former India captain, should take a call on this matter, whether the coach is asking for too much," the source added.

Raman, it is learnt, is dismayed by allegations that he is not proactive as a coach. "In case the president and secretary want to hear his opinion on allegations about his work ethic, he can explain."

The letter has been copied to Dravid because Raman sincerely believes that he can contribute towards building a roadmap for Indian women's cricket. PTI

Paine clarifies on India comments after being slammed

PTI ■ MELBOURNE

Australia captain Tim Paine on Friday stood by his comments that his team indeed got distracted by India's "sideshow" but clarified that he didn't ever intend to use it as an excuse for their home Test series defeat in January.

A day after receiving online flak from Indian fans for his "side show" comments on Indian team, Paine clarified himself while chatting with Adam Gilchrist in a podcast.

"I was asked a number of things, and one of those was talking about the challenges of playing against India. One of

them is the distraction they can create," Paine said in the *Gilly and Goss* podcast on Friday.

"There was a lot of talk that they weren't going to Brisbane. They're always changing gloves and bringing out physios and all that can get on your nerves. Just said that was one of the things that probably distracted me and took my eye of the ball at times."

The 36-year-old Paine had said that his team was distracted by the Indian team's "niggling" during the epoch-making Test series early this year

which the visitors rallied to win. Soon Paine was trolled on Twitter by Indian fans.

"I did say that they simply outplayed us and that they deserved to win but they left that one out. The Indian fans have been slamming me on social media. They say that I'm making excuses again but it's all good fun," Paine said.

"I certainly wasn't making any excuses. I was asked about some of the challenges of the summer, and I said that was one of them for me," he added.

Hussey recovers from Covid, Saha +ve again

New Delhi: Chennai Super Kings batting coach Michael Hussey has recovered from Covid-19, paving the way for his return to Australia on Sunday but Sunrisers Hyderabad's Wriddhiman Saha has received conflicting results in two coronavirus tests, prolonging his isolation.

Saha, who has been named in India's squad for the World Test Championship final and the subsequent Test series against England, is hoping to join the squad's bio-bubble in Mumbai on May 25. His inclusion is subject to fitness.

"Hussey has returned with negative RT-PCR results and has recovered well. We haven't yet decided when he is going to fly back and which route he will take — Maldives or Australia," CSK CEO Kashi Viswanathan said on Friday.

In case of Saha, he will continue to be in quarantine after one of his two tests came positive.

"My quarantine period is still not over. Out of the two tests done, I was negative and other one came as positive. Otherwise I am doing much better. Requesting everyone not to spread misleading stories/information without whole context," the wicketkeeper-batsman posted on Twitter. PTI

We haven't yet decided when he is going to fly back and which route he will take — Maldives or Australia," CSK CEO Kashi Viswanathan said on Friday.

In case of Saha, he will continue to be in quarantine after one of his two tests came positive.

"My quarantine period is still not over. Out of the two tests done, I was negative and other one came as positive. Otherwise I am doing much better. Requesting everyone not to spread misleading stories/information without whole context," the wicketkeeper-batsman posted on Twitter. PTI

Bond played major role in shaping Bumrah's career

PTI ■ MUMBAI

India's star pacer Jasprit Bumrah has said that former New Zealand speedster Shane Bond, who is currently the bowling coach of Mumbai Indians, has played a major role in shaping his career.

The Mumbai Indians fast bowler, who will lead India's attack in the upcoming World Test Championship final against New Zealand, expressed his views in a video shared by his IPL franchise.

"I always try to talk to him even when I am not here and with the Indian team. So, it's been a good journey, and hopefully, every year I keep learning something new and try to add new things to my bowling."

"He has played a major role in that. It's been a great relationship so far, and hopefully, this continues for many many years to come," Bumrah said.

He said he was always fascinated by how Bond bowled in his playing days and tries speaking to the MI bowling coach even when he is in India duty.

"I met him (Bond) for the first time

he used to operate," the India pacer said. Bumrah, who has so far played 19 Tests, said that Bond assisted him a lot in broadening his horizon which in turn helped him blossom as a cricketer.

"When I met him over here, it was a good experience. He helped me a lot to open my mind to different things that I could try on the cricket field. So that was very good and that relationship has only gotten better each and every year," added the Gujarat pacer.

Bond, on his part, termed Bumrah as the best death bowler in the world. Seasoned New Zealand left-arm pacer Trent Boult also had words of praise for his compatriot, saying that Bond was a "tremendous thinker of the game and a pretty good tactician."

"He has been here for a long time, he knows what he is doing and he puts in a lot of work into making sure that the bowlers are well equipped and have got enough information to make some decisions on the day. Yeah, really enjoy working with him," said Boult, who has played 71 Tests.

Dortmund rout Leipzig in German Cup final

AFP ■ BERLIN

Jadon Sancho and Erling Braut Haaland both netted twice on Thursday as Borussia Dortmund won the German Cup with an emphatic 4-1 win over RB Leipzig to spoil Julian Nagelsmann's hopes of leaving with a title.

Dortmund turned on the style at Olympic Stadium, converting all of their three first-half shots on target to sweep Leipzig aside as Sancho netted twice either side of a superb Haaland goal.

"I am very happy that I could score two goals and set up one for Haaland," Sancho told ARD.

The England winger could have claimed a hat-trick late on after rounding Leipzig goalkeeper Peter Gulacsi, but failed to get his shot away.

Spain midfielder Dani Olmo pulled a goal back for Leipzig, before Haaland grabbed his second in the dying stages despite slipping as he connected.

Dortmund lifted the German Cup for the fifth time in the club's history.

"It's unbelievable, I am proud of the morale the team has shown in the last few weeks," said captain Marco Reus as Dortmund have also recently got back into the Champions League places.

Real trim Atleti's lead

Granada: Real Madrid kept the pressure on Atletico Madrid by thrashing Granada 4-1 on Thursday to reduce the gap to two points at the top of La Liga, with two games left to play.

A draw or defeat for Real Madrid would have given Atletico the chance to win the title on Sunday by beating Osasuna but goals from Modric, Rodrygo, Alvaro Odriozola and Benzema secured a comfortable victory at Los Carmenes.

Atletico could still be crowned champions this weekend if they overcome Osasuna

and Real fail to win away at Athletic Bilbao.

Even third-placed Barcelona are still in the running but they need an incredible swing of results if they are to overturn a four-point deficit. AFP

Reds end OT hoodoo

AFP ■ MANCHESTER

Liverpool kept their chances of a place in next season's Champions League in their own hands with a thrilling 4-2 victory over Manchester United at Old Trafford on Thursday.

Jürgen Klopp's men still need to win their remaining three games over the next 10 days to guarantee their place in the Champions League for a fifth consecutive season, but cleared the biggest hurdle in their path with a first victory away to United since 2014.

Roberto Firmino scored twice either side of half-time after Diogo Jota cancelled out Bruno Fernandes' early opener for the home side.

Marcus Rashford's strike set up a grandstand finish, but Mohamed Salah secured a vital win in the final minute as Liverpool moved up to fifth in the table.

"We are still in the game, still in the race. That is all we could do tonight," said Klopp.

"It was necessary. Without this result we don't have to talk about it."

The clash between English football's two most successful clubs had been postponed 11 days ago as United fans stormed the pitch and clashed with police amid protests against the club's owners.

A peaceful protest took place before kick-off as supporters again voiced their anger at the Glazer family.

बैकलॉग रिक्त पदों के विरुद्ध 2850 कम्प्युनिटी हेल्थ ऑफिसर की भर्ती

क्रमांक / एन.एच.एम. / HWC / 2021 / 8274 मोपाल दिनांक- 13 / 05 / 2021

राष्ट्रीय स्वास्थ्य मिशन मध्य प्रदेश द्वारा बैकलॉग रिक्त पदों के विरुद्ध संबंधित वर्गों के उम्मीदवारों से 6 माह के सर्टिफिकेट इन कम्प्युनिटी हेल्थ प्रशिक्षण कार्यक्रम में चयन हेतु मध्य प्रदेश राज्य के मूल निवासी अभ्यर्थियों से आवेदन आमंत्रित किये जाते हैं। चयनित उम्मीदवारों को उक्त प्रशिक्षण सफलता पूर्वक पूर्ण करने के पश्चात् ग्रामीण क्षेत्रों में स्थित उपस्वास्थ्य केन्द्र स्तरीय संस्थाओं पर कम्प्युनिटी हेल्थ ऑफिसर के पद पर सौंपा नियुक्ति दी जायेगी।
