DELHI: 13,72,475 (+10,489)

CAPSULE

MONSOON TO MAKE EARLY ARRIVAL OVER KERALA

New Delhi: The southwest monsoon is likely to arrive over Kerala on May 31, a day earlier than its normal onset date, the India Meteorological Department (IMD) said on Friday. The normal onset date of monsoon over Kerala is June 1.

NO DECISION ON PENDING CLASS XII EXAMS: CBSE

New Delhi: The CBSE said on Friday that it has not taken any decision yet on Class XII board exams even as a section of students and parents have been demanding cancellation of exams in view of the Covid-19 pandemic situation.

Goa still gasps for oxygen, 13 deaths raise toll to 75

Taking death toll to 75 in the last four days

PNS ■ NEW DELHI

The horror at the Goa Medical College and Hospital (GMCH), the State's largest Covid-19 facility continued as oxygen shortage killed 13 more Covid-19 patients in the dark hours (between 1 am and 6 am) of Friday, taking the tally to 75 in the last four days.

As per the State Government statistics, 26 patients died at the GMCH during the wee hours of Tuesday, followed by 21 on Wednesday, 15 on Thursday, and 13 on Friday (total 75).

Even as hospitals in Goa see a surge in Covid-19 cases, the scenes at crematoriums in the coastal State are equally grim as bodies continue to line up for last rites. Goa's coronavirus caseload rose to 1,32,585 after 2,455 patients tested positive for the infection on Friday.

According to a resident doctor of GMCH wards, pressure in the central pipeline started falling around 1 am on

Thursday, and three patients in his ward succumbed to the fluctuations, despite their attempts to revive them.

"Relatives called us frantically saying patients were gasping for breath and their saturation levels (SPO2) had dropped to 40-50," the resident doctor said, adding, on the night of Wednesday-Thursday, there was a drop in oxygen pressure at least five to six times.

A three-member panel has been formed under the chairmanship of Indian Institute of Technology-Goa director Dr BK Mishra. The committee will find out whether the oxygen supplied to the medical facility was adequate and check the efficiency of the supply chain. The panel will also examine how oxygen was administered in the hospital and suggest ways for its improvement.

The committee has been asked to complete the probe in three days.

The State Government has told the High Court that there were "logistic issues" related to supply of medical oxygen to patients.

Chief Minister Pramod Sawant said the gap between

the "availability of medical oxygen and its supply to Covid-19 wards" at the hospital "might have caused some issues for the patients".

He, however, claimed that there was no shortage of oxygen. Sawant's claim was contradictory to State Health Minister Vishwajit Rane, who had admitted that there was a shortage of oxygen at the hospital as of Monday.

Goa Congress is set to file a criminal case claiming "cold-blooded murder by the Chief Minister and Health Minister". The party has slammed the

"...clear-cut admission by Goa's BJP Government before the High Court of Bombay at Goa that 41 deaths occurred due to shortage of oxygen..."

On Thursday, the Goa Bench of the Bombay High Court said it was informed that some patients may have died because of "logistical issues". The Goa Government had told the HC on Thursday that during the process of attaching the oxygen manifold there was some interruption, which results in a fall of pressure in the supply lines of oxygen to patients.

Swiss to give India key to Anil Ambani treasure trove

Swiss court agrees to share with Indian Govt details of bank accounts of wife Tina, 2 sons also

PNS ■ NEW DELHI

In more troubles for the debt-ridden industrialist Anil Ambani, Swiss Federal Court has agreed to share information with the Indian authorities about the bank accounts of him, his wife Tina Ambani, and their two children Jai Anmol, and Jai Anshul, according to the Swiss media.

Swiss newspaper *Gotham City* on May 12 reported that Indian Finance Ministry's Foreign Tax and Research Division filed a petition in the Swiss Federal Court for getting details of the bank accounts operated by Anil Ambani.

According to *Gotham City*, the court's order came on April 29. The newspaper confirmed from the registrar's office that the order directed to banks named Anil, Tina, Jai Anmol, and Jai Anshul Ambanis, though the order available in the public domain shows only A, B, C, D due to privacy issues. *Gotham City's* reporter Francois Pilet reported that the court registrar's office allowed him to see the actual names. "As court reporters, we are allowed to see the names of the parties in every decision on the Swiss Supreme Court," he explained to news portal News Laundry.

Another international investigative portal Global Investigative Review (GIR) on Friday reported in detail about the Swiss court's direction to banks to disclose the details of bank accounts of Anil Ambani and their family. According to Swiss media reports, earlier an Indian whistle-blower approached the Swiss courts seeking Anil Ambani family's bank accounts. Later the Indian Government too filed the petition, they said.

Recently, in a case filed by Chinese banking consortium, Anil Ambani deposited in a London court that he has no money and is living with brother Mukesh Ambani's help.

Last year, the London court asked younger Ambani to pay 770 million dollars to Chinese banks for non-payment of loans of 14 billion dollars. The loan was taken for installation of Chinese equipment in telecom and power sector during 2008 to 2014.

INSIDIOUS BLACK FUNGUS

PNS ■ NEW DELHI

It appears that Covid-19 is not the only calamity that India may have to deal with in the coming days. There are people who are still trying to deal with the chaos, destruction and death that the second wave of Covid-19 has brought. The next punch comes to hit the country is black fungus or mucormycosis. The rising number of black fungus patients, especially in Maharashtra where 111 patients, all Covid-19 survivors, are undergoing treatment according to the Brihanmumbai Municipal Corporation, is a cause of worry. Mucormycosis, also referred to as zygomycosis, is a serious but rare fungal infection caused by a group of molds called mucormycetes. These molds live throughout the environment. When someone breathes in these spores, infection in the sinus or lung can occur. It primarily affects people who have health problems or take medicines that lower the body's ability to fight germs and sickness. It is affecting Covid patients more because of prolonged administration of steroids and subsequent immunocompromised state.

Dr Monalisa Sahu, Consultant Infectious Diseases, Yashoda Hospitals, Hyderabad shares dos and don'ts to follow to prevent black fungus.

DOS:

- 1) Keep high index of suspicion of mucormycosis in the below mentioned group of patients, as they are at high risk of developing the disease:
 - ☞ The Covid-19 patients with uncontrolled diabetes and diabetic ketoacidosis
 - ☞ Those who have received high dose of intravenous or oral steroids for prolonged period or those who have received immunomodulators
- 2) Patients with Covid-19, active/recovering/post-discharge: **These symptoms should be immediately intimated to the treating doctor**
 - ☞ **Rhino-orbital-cerebral mucormycosis:**
 - ☞ Nasal blockage or congestion
 - ☞ Blackish or bloody nasal discharge
 - ☞ Facial pain, numbness or swelling
 - ☞ Headache
 - ☞ Pain in the eyes and orbit
 - ☞ Toothache, loosening of tooth or jaw involvement
 - ☞ Blurring or double vision with pain
 - ☞ Tingling sensation on face
 - ☞ Fever, and blackish skin lesions
 - ☞ **Pulmonary mucormycosis:**
 - ☞ Fever
 - ☞ Cough
 - ☞ Chest pain
 - ☞ Blood in sputum after cough
 - ☞ Worsening respiratory symptoms
- 3) Diabetic patients with Covid should target strict glycemic/glucose control, as uncontrolled diabetes itself is a risk factor for mucormycosis
- 4) Patients should monitor their blood glucose post Covid discharge from hospital, and more so in diabetics

DON'TS:

- ☞ Don't neglect the signs and symptoms mentioned above which gives a clue to early diagnosis
- ☞ Don't hesitate to approach your doctor with the above signs and symptoms, thinking it to be a mild bacterial sinusitis, and the suspicion of fungal infection should be high on the cards
- ☞ The treatment of the mucormycosis requires aggressive management and don't hesitate to undergo the aggressive management or lose the crucial window period of early diagnosis and treatment, as early suspicion, early diagnosis and aggressive management are the keys to success in the management of this disease
- 5) For the hospitals, treating centres and physicians: Use of clean and sterile water for humidifiers during oxygen therapy is very essential to prevent mucormycosis
- 6) Judicious use of steroids, avoiding high doses and for prolonged durations needs to be considered. Judicious use of antibiotics and antifungals is very essential to avoid the surge of mucormycosis cases

WHAT DO YOU DO IF YOU GET BLACK FUNGUS?

- ☞ The most common type of mucormycosis is rhino-orbital-cerebral mucormycosis, comprising around 70-75% of the cases, pulmonary mucormycosis seen in 15-20% of the cases and rarely gastrointestinal mucormycosis has also been detected
- ☞ The cases of Mucormycosis have been presenting as early as 8-10 days after detection of Covid-19 in a few cases, to as late as about 60 days after Covid detection, the most crucial period being two-six weeks after detection of Covid
- ☞ Cases of Mucormycosis are to be treated as fungal emergencies (Medical and surgical emergency)
- ☞ All of the presentations of the disease require aggressive management, including extensive surgical debridement of the involved tissue along with intravenous antifungals followed by oral antifungals for a period of at least six weeks to three months
- ☞ The antifungals being used to manage the disease include liposomal Amphotericin B, isavuconazole, posaconazole and Amphotericin B deoxycholate

18-44 vaccination drive kicks off in Jharkhand CM inaugurates vaccination programme, appeals people to come forward

Chief Minister Hemant Soren, Health Minister Banna Gupta along with young beneficiaries show victory sign during the first day of 18+ vaccination drive at a vaccination centre in Ranchi on Friday

PNS ■ RANCHI

Chief Minister Hemant Soren formally inaugurated the free vaccination programme for beneficiaries of over 18 years of age here on Friday. On the occasion, he said that in this era of corona epidemic, Covid-19 vaccine is like a protective shield for people.

"By taking this vaccine, we can protect ourselves and our family. The people of the State are requested to get the vaccine. Now the vaccination programme for youth has started. Ensuring free vaccination of all the youth of the State is a special priority of the government. I hope that through vaccination people would come forward to keep the State and the country safe," he said.

The CM said the coronavirus is constantly changing its form. It is constantly engulfing people, but there is no need to be discouraged by it. This epidemic has to be fought for a long time, so keep the spirits up.

"With the cooperation and participation of all, we will surely be able to win the battle against Corona," he said urging the people of the State to cooperate in Health Safety Week, which will help in breaking the

GOVERNMENT HAS TARGETED TO VACCINATE EVERY YOUTH OF THE STATE THROUGH THIS VACCINATION PROGRAMME. HE APPEALED TO THE PEOPLE TO GET THE VACCINATION DONE

corona chain.

On this occasion, Health Minister Banna Gupta said that under the leadership of Chief Minister Hemant Soren, the Government is fighting the war against coronavirus with full force. To overcome whatever challenges are being faced in this regard, not only the shortcomings are being removed, but the resources are also being increased.

The Government has targeted to vaccinate every youth of the State through this vaccination programme. He appealed to the people to get the vaccination done.

On this occasion, Development Commissioner-cum-Additional Chief Secretary Health Department Arun Kumar Singh, Principal Secretary to Chief Minister Rajiv Arun Ekka and Secretary, Urban Development and Housing Department Vinay Kumar Choubey, besides Deputy Commissioner of Ranchi, Senior Superintendent of Police, Deputy Development Commissioner and other officials were present, including the sub-divisional officers.

PM, Opp leader, CJI to meet on May 24 to pick CBI chief

Post is lying vacant for more than 3 months

J GOPIKRISHNAN ■ NEW DELHI

pioneer exclusive

The three-member high-level selection committee comprising Prime Minister Narendra Modi, Opposition leader Adhir Ranjan Chowdhury, and Chief Justice of India NV Ramana will at last sit together on May 24 to decide the next CBI Director. The post is vacant for more than three months.

The shortlisted names are from the 1984 to 1986 batch IPS officers, including BSF DG Rakesh Asthana and NIA

Chief YC Modi. According to highly-placed officials, more than 13 names are shortlisted and their resumes are already sent to the selection committee members for perusal.

Senior police officers like ITBP chief SS Deshwal, CISF chief Subodh Jaiswal, Kerala DGP Loknath Behera, Gujarat ACB chief Keshav Kumar and Uttar Pradesh DGP HC Awasthy are also short-listed for the post.

According to sources, the

Government may bring the name of some non-controversial officers as surprise as it did the last time by making RK Shukla CBI Director in January 2019 after the removal of Alok Verma.

Some officials said the Government may also consider officers from 1986 batch as all officers from 1984 batch are retiring from service in May, June and July. CBI Director is selected for two years.

The Modi Government is already facing a case filed by noted lawyer Prashant Bhushan in Supreme Court for not appointing CBI Director on time.

Drop in fresh cases, deaths in State 3,776 fresh cases, 76 deaths in 24 hours

PNS ■ RANCHI

Jharkhand on Friday recorded a steady drop in the number of fresh cases and also registered a fall in the number of deaths as compared to the figures of last few days.

As per a bulletin released by the National Health Mission (NHM), Jharkhand reported at least 7,112 Covid recoveries against 3,776 fresh cases on Friday, causing a fall in the active caseload.

As many as 45,056 State residents were battling the viral infection by the end of Friday, the bulletin further stated. The active caseload has dropped from over 60,000 to 45,056 in the past fortnight. While the active caseload

of Covid-19 dropped near the 45,000-mark on Friday, the State witnessed a fall in casualties, figures compiled by the health department highlighted.

At least 76 Covid patients, including 28 from Ranchi and 8 from Bokaro, died during treatment on the day, taking the Covid toll in the State up at 4,366, NHM data highlighted. East Singhbhum also reported 7 Covid fatalities on Friday. As per Government data, Jharkhand has a Covid mortality rate of 1.40 per cent, which is higher than the national average of 1.10 per cent.

The active caseload also dropped significantly in Ranchi and East Singhbhum, two of the worst-affected districts in terms of caseload and fatalities. At least 2,267 Covid patients recovered in Ranchi on Friday against 494 fresh cases, bringing the active

caseload here down to 11,918. However, the 28 casualties on Friday took the Covid toll in Ranchi to 1,374 on the day.

As per NHM data, East Singhbhum reported 968 Covid recoveries against 957 fresh cases on the day and the active caseload there dropped to 4,463. The seven deaths reported in the district on the day took the Covid toll there to 882. As per Government data, Ranchi and East Singhbhum jointly account for almost 50 per cent of the active cases in Jharkhand.

East Singhbhum reported the highest spike in Covid cases on the day among Jharkhand districts. At least 957 people were found infected in Palamu on Friday while 968 patients recovered there. Bokaro reported 162 Covid cases against 328 recoveries, while Dhanbad reported 143

A 20-year-old student smiles while she is administered first jab of Covid vaccine at a Government facility in Ranchi on Friday

cases against 155 recoveries.

The State on Friday tested swab samples of 49,596 residents and less than 10 per cent of them were found infected. As per Government data, over 3.1 lakh State residents have been infected by the mysterious virus so far and more than 83 per cent of them have recovered.

The growth rate of Covid cases in Jharkhand was 1.35 per

cent against the national average of 1.09 per cent, while the doubling rate in the State was 51.54 days against the national average of 64.20 days, highlighted the NHM bulletin.

The State administered the first dose of vaccine against Covid-19 to 45,493 residents on the day, while the second jab was administered to more than 9,000 beneficiaries, stated a separate report from NHM.

FIGHTING CORONAVIRUS

Early indication of downward trends

Positivity rate and admissions on the decline at TMH

PNS ■ JAMSHEDPUR

Spread of Covid-19 cases has started showing some signs of improvement in the city. Going by the trends, it seems that the second wave has reached its peak and has started to decline.

During a telephonic media interaction, Dr Rajan Choudhry, advisor, and former general manager, medical services, Tata Steel made the above observation. He said that going by different parameters the situation is showing signs of improvement.

He went on to inform that the Covid-19 positivity rate has reduced from 32.84 last week to 32.17 this week. While in the previous weeks the rate of positivity was 48.93. The admissions have reduced to 123 in the last three days. The hos-

pital has witnessed a total of 66,658 admissions so far.

The deaths at the hospital

have also reduced to 40 in the last three days with 13 deaths per day while the figure in the

last week was 18-19 deaths per day.

Dr Choudhry informed

that 230 health staff members have been hit by the virus comprising 58 doctors and 94 nurses.

He said that the hospital has started a new vaccination centre at Fasy Auditorium in Loyola School for 18 years to 44 years. He noted that even after vaccination, one must continue to follow Covid-19 appropriate behaviour including wearing of mask, hand sanitisation, social distancing and avoid crowded places. The hospital is operating 595 Covid beds out of these 450 beds at TMH and 150 at GT hostel 4.

“We need to be careful in the coming days as the downward trends should continue for the next two weeks. We should continue to avoid crowding, wear masks and follow social distancing. This will

reduce the chances of spread of the virus. If we remain serious about the protocols the virus will further reduce significantly,” he noted.

The advisor also said that TMH is also focusing on the post Covid19 care clinic at its OPD. Sensing the need of those patients who recovered from coronavirus, the hospital will focus on post Covid care for the next three months.

He said that they have witnessed post Covid-19 ailments in patients who have recovered. “Lethargy, joint pains, difficulty in breathing, itching and other skin related diseases are some ailments found in the patients post the recovery. We have decided to continue to provide a consultant to such patients who want further treatment. It will be a paid service,” said the advisor.

IN PALAMU VILLAGE

Eight deaths in a week send alarm bells ringing

PNS ■ DALTONGANJ

Eight deaths barely five kilometers away from Daltonganj at Sua Koriya in little over a week has caused enough alarm and worry in the district administration.

BJP MLA Alok Chourasia broke this news to the DC Shashi Ranjan on May 13 night.

Taking immediate note of this DC Shashi Ranjan directed the civil surgeon Palamu Anil Kumar Srivastav to rush medical team in Sua Koriya to ascertain the verity of death, number of death, its duration and cause of the death.

Ranjan said the matter is serious and has to be found out by all means.

He said he was told of 'many deaths' taking place in the Chhaterpur subdivision as well where DC said the Chhaterpur SDO has put on job the PDS dealers and others like mukhiyas to keep a close count on death and its real cause.

Former MLA of Daltonganj KN Tripathi said that four deaths here at Sua Koriya are stated to have been due to fever while one death was of a long running paralytic stroke and three other deaths are under the cloud of uncertainty.

Tripathi said deaths are occurring and there is a great and urgent need to tackle the situation without getting into any panic.

Civil surgeon AK Srivastav said he has directed the medical officer in charge Dr Seema to personally investigate the alleged spate of deaths and its causes besides taking down covid testing facility here at Sua Koriya.

Former MLA of Daltonganj KN Tripathi said that four deaths here at Sua Koriya are stated to have been due to fever while one death was of a long running paralytic stroke and three other deaths are under the cloud of uncertainty

Ranjan said that on May 13 everyone was unsettled to know about 932 people going covid positive in one day only.

However he said we breathed in calm when we learnt that these 932 cases of positive results in one day were in fact of the pending test reports of days together.

On Thursday 1,400 tests were conducted out of which 66 had tested positive. He said our civil surgeon has also spurred his officials to go all out for the testing.

Good gathering of people in the age group of 18 - 44 was witnessed today at the vaccination sites for the jobs, said the civil surgeon.

The people in line followed the protocol of social distancing which was a good sign of more and more awareness coming among the public, said the civil surgeon.

Sources said the functioning of the community health centre Panki leaves much to be desired as here laxity in duty, absenteeism are the most visible things which none here bothers for.

Primitive Birhor child dies in absence of medical facilities

SHAILESH SHARMA ■ HAZARIBAG

An 18-month-old child died in the absence of medical facilities at Kandsaar primitive Birhor Tanda (village) in Katkamsandi block of the district, alleged villagers. The child was suffering from cold, cough and fever. After the death of the child the BDO and CO of Katkamsandi block visited the Birhor Tanda.

The father of 18 months old child Raj Kumar Birhor said that his son Ranjeet Birhor was suffering from cold and fever. He further said that he had gone to the block hospital but no one took care of his child. The child

slept on Wednesday night but early in the morning he did not wake up.

Raj Kumar further said that there is no medical or vaccination camp organized by the health department. He said that they did not get the free food for the last two months. Due to non-availability of food they are not having the food properly, he said.

Katkamsandi BDO Renu Kumari, Circle officer Anil Kumar with Mukhiya Ram Kumar reached the Tanda and took stock of the situation. On the order of BDO and CO the medical officer of block Dr Subhash Chandra Sharma

reached there with a medical team and checked the health of every birhor in the tanda. The medical team also distributed free medicines to the birhors.

On the issue of food grains and other items the BDO talked to the marketing officer. The birhor said that they are facing a food crisis due to lockdown in the State.

When birhor child death information was given to agriculture minister of State Badal, the minister met with the minister Rameshwar Oraon in his residential office and requested him to supply the food grains and other free facilities to all the Birhor families.

Youth show interest in vaccination

PNS ■ DHANBAD

Youth of coal city show interest in fighting corona in coal capital by taking the first dose of vaccine as vaccination for 18+ starts here at 34 different sites across the district.

Interestingly, all slots at all 34 locations where vaccinations are to be held for today and tomorrow have been booked in advance.

The district administration has a target to vaccinate 4,930 persons of aforementioned ages on the first day and equal numbers on the second day on May 15.

At one of the vaccination centres located at the Labour office 151 persons had taken vaccines by 12.30 pm on day one informed one of the team

THE DISTRICT ADMINISTRATION HAS A TARGET TO VACCINATE 4,930 PERSONS OF AFOREMENTIONED AGES ON THE FIRST DAY AND EQUAL NUMBERS ON THE SECOND DAY ON MAY 15

members of the vaccination team. This is one of the eight vaccination centres in Dhanbad block.

College student Shyam Pandey who took his first dose at the aforementioned centre said, “I was eagerly waiting for the vaccination and as the registrations opened I grabbed the opportunity of getting vaccinated.”

Jharia block has seven vaccination centres followed by

other rural locations.

District Congress president Brajendra Prasad Singh who was present at this centre along with his party members said, the drive is open for 18to44 years of age and all eligible for taking vaccine must break the it to break chain of corona in Jharkhand. Singh said, Congress party has also set up a committee to monitor the vaccination drive.

TSAF announces Champions League 2021

PNS ■ JAMSHEDPUR

Tata Steel Adventure Foundation (TSAF) is organising the TSAF Champions League 2021 to promote fitness and well-being of people adhering to a stay-at-home routine. Beginning from May 17, the 50-day team-based competitive fitness program will encourage individuals to participate in fitness routines and challenges.

Curated by TSAF mountaineering experts with over twenty years of experience, this transformational journey will help participants take their fitness to the next level with the correct guidance and motivation.

DC orders setting up check posts in border areas of Bokaro

Bermo: In order to reduce the increasing impact of corona infection, the state government has also imposed restrictions on certain activities by extending Health Health Week up to 06:00 hrs on May 27, 2021.

In the light of the said order, Deputy Commissioner Rajesh Singh has ordered to monitor the movement of persons from border areas of other states in the district and for compliance of prescribed SOP guidelines and the directive for making check posts in Bermasia has been issued today on 14 May 2021.

He directed the District Nazrat Deputy Collector Vivek Kumar Suman that by con-

structing check posts and barricading at all the above mentioned places, necessary facilities like electricity, ensuring proper arrangement of table chairs for the seating of officials, personnel etc. will be ensured.

Besides, the District Transport Officer-cum-Nodal Officer will ensure that all necessary works related to the said check post are carried out under his supervision.

Deputation of 24x7 supervisors personnel in the check post will ensure compliance of the said order in letter and spirit. Singh directed the Block Development Officers Chas and Chandankiyari that by

constructing check posts at the places to be constructed under their jurisdiction, they will ensure compliance of the said order in letter and spirit, by deputation of 24x7 supervisors, personnel in the said check post. Besides, the Sub-Divisional Officer Chas Shashiprakash Singh has been directed to supervise the said check post from his level as well.

The DC has also asked SP, Chandan Kumar Jha to implement the instructions of the State Government, that all the above check posts will ensure adequate deputation of 24x7 police force for maintenance and monitoring of law and order.

PNS

BSL begins tele-consultations for Covid patients

PNS ■ BOKARO

Bokaro Steel Plant (BSL) is providing Tele-Consultancy service to its employees and their dependents, who are either Covid positive or have symptoms of Covid-19.

Employees desirous of availing this facility can apply for the same through Covid-19 service required on <http://pers-shris.sailbsl.in> by selecting the Service for Tele-Consultancy, informed an official.

Employees wishing to use this facility should also feed into their Covid-19 symptoms system parameters to assist us in delivering better services, he said.

“BSL management is working tirelessly on all fronts to assist those in need during the

Covid-19 pandemic. Our endeavour to fight against the pandemic continues. We are closely working with the Government of India and the states to address the demand and save precious human lives,” officials said.

In a statement by BSL, Mani Kant Dhan, Chief of

West Bengal (28.41 MT), Punjab (475.30 MT), Maharashtra (19.13 MT), Andhra Pradesh (54.78 MT), and Madhya Pradesh (764.00 MT),” Dhan added.

According to the requirements, supplies of LMO are still available during the ongoing Covid-19 second wave. Previously, we were producing 50 MT of LMO per day, which was used for steel production and oxygen enrichment in blast furnaces, as well as some general purposes such as lancing and gas cutting, he explained.

“Now that we have ramped up production, we are producing 150 T of LMO every day in collaboration with INOX Air Pvt. Ltd. at BSL and supplying the entire requirement,” he added.

BY SINDHUJAA KUMAR

SERVING OUR DEEPER TRUTHS

ported by values; individualism not grounded in community care. Let's peel back these masks we've ended up wearing, so we can serve our deeper truths, and create a beautiful and wholesome world.

Harmony means creating a life in which every aspect of our being gets its attention, contributing and adding value to every other aspect – where our physical reality and spiritual reality enhance each other, work and play balance each other, mind and heart align. Harmonizing our lives is to balance the giving and the receiving; the simplicity and the grandeur; creating as much as consuming.

The most commonplace example is in our habits of consuming feeds, news, social media, shows, email and such technology. Technology, like almost all other things, is a good servant but a bad master. When we let it take over our life, which happens almost unconsciously today, it disconnects us from our own inner selves.

Here's a simple practice that can have profound results:

EXPLOITATIVE AND GREEDY CAPITALISM IS TAPPING OUR LIFE FORCE. SO IS GUILT FOR LIVING WELL. CONNECTING TO OUR DEEPER TRUTH AND MINDFULNESS ARE THE MOST POWERFUL VEHICLES FOR RESTORING OUR VITALITY

create before you consume. What if instead of doom scrolling, you take time each day to tune into yourself, and create your life from your soul? I once heard someone say: Art worth making is truth scraped from your marrow. What if you could cut down on some mindless consumption time, to delve into your deeper dimensions, and tap into that well of power inside, to heal yourself and heal the world? Find the nuggets of wisdom and beauty within, and then pass it onto the rest of the world? What if you have a hidden poem, a joyous song, a life-changing tale, a world-turning invention or a heart-pacifying revelation – inside you – just waiting for your

attention? The world needs it. What if, instead of spending time buying those unnecessary new clothes, you spent time crafting a healthy body and strong mind that fit your soul, and make you radiant inside out? What if you forgo that extra car and spend that money on shelter for the poor? What if you replace that head-spinningly expensive watch or handbag with toys for children at the nearest orphanage?

The alternative consumption we need to commit to is not necessarily a form of belt-tightening or loss of pleasure. On the contrary, it is about finding deeper pleasure.

There are a lot of downsides to the affluent American

lifestyle' that we've held up as a model to which all societies should aspire to. We're so caught up in the work-and-spend cycle, the need for ostentation, and the insecurity it generates, which can be life-long. This has a toll on our mental health, as well as on societal wellbeing. The consumer culture has today hit a roadblock due to the pandemic, and maybe, we should let it rest there. Rethink the 'ideal life' a bit. And tap into more lasting, sincere and satisfying forms of connection with ourselves and others.

The Dark Side of Minimalism
We can sometimes use

beautiful concepts to reinforce ugly lies about righteousness and identity. We may fall into the trap of frugality to keep abundance at bay, and austerity as a form of self-punishment, or as a standard for judging others.

Can you imagine the world and its people without their wild colour, vibrant diversity and glorious grandeur? Just like simplicity, grandeur has a place in our lives. There are some days, playful ways, seasons, reasons – for the opulence to flow. Why? Because our spirits are free, our souls are infinite, abundance is a cosmic energy – and when the call of our soul directs us to it, we must go tango with it.

Elizabeth Gilbert best explains this in one of her talks. Have you ever just watched a bird someday, flitting around cheerfully, minding its own business? How does it make you feel, watching its free spirit? It does not try to save the world. But just by being itself, just by singing its own sweet song, it can put a smile on our faces, it can make our day, it can make the world a better

place. All it does is follow its own nature. Just by doing this, the bird unconsciously participates in a symbiotic ecosystem, and does much for the environment and the planet. Not to mention how happy it makes us feel. Similarly, we best serve the world when we tune into our own true nature and live our calling from there, instead of veering vertiginously with external forces.

We each have a unique spiritual orientation, as personal as our fingerprint. We each have a dominant theme in this incarnation, a purpose to fulfil, a role to play. Based on this, we bring our own special energy combination of simplicity and grandeur to life. We can find this combination when we lead from our hearts, instead of head-tripping with the rat race. We each have these incredibly intricate mosaics for describing our individual differences. For each individual, there is a unique karmic predicament, a unique dharmic possibility. We have our own journey, an independent path that does not belong to anyone but us. The answer is to live

consciously, led by our inner guidance than what the world is preaching to us.

That's why this article is not about minimalism, nor capitalism. It is about finding YOUR deeper truth. It's about learning not to be exhibitionistic, only because it will lift you in the eyes of people going through a spell of shallow mindedness. It's also not about making a monk out of yourself because there's one fraction of people who condemn you to guilt for enjoying certain things. This is about listening to your heart for your own melody of harmony, your own balance of simplicity and grandeur. This intersection is different for each one of us, at different times in our lives. These differences are what make the world beautiful and delightful. We need to celebrate ourselves for our personhood, while also caring for each other as a society.

Exploitative and greedy capitalism is tapping our life force. So is guilt for living well. Connecting to our deeper truth and mindfulness are the most powerful vehicles for restoring our vitality.

Soren inaugurates PSA plant

Cardiac ambulances in Sahebganj

CM Hemant Soren alongwith Health Minister Banna Gupta inaugurating the newly constructed PSA plant at Sahibganj Sadar Hospital through video conferencing at the Chief Minister's Residential Office in Ranchi on Friday

PNS ■ RANCHI

Chief Minister Hemant Soren on Friday inaugurated a newly commissioned oxygen plant at Sadar hospital of Sahebganj district. The plant

based on Pressure Swing Absorption (PSA) technology will cater to the need of oxygen for the patients suffering from Covid 19.

Sahebganj Sadar hospital has a total of 50 beds with oxy-

gen support. But, with the PSA plant the hospital can supply oxygen to other districts and hospitals on the demand basis. The PSA plant can generate 5000 litres of oxygen per hour.

The Chief minister, who

inaugurated the plant through video conferencing, said that the government and people of Jharkhand are determined to fight against Covid -19.

The CM said that his government is committed to the improvement of health infrastructure as well as treatment of Covid 19 patients. He informed that the vaccination drive for people aged between 18 and 44 years too has been started from Friday adding that initially across Jharkhand 496 vaccination centres have been set-up for this purpose. So far, all 24 districts have been allotted 179800 vials of the vaccine.

In Sahebganj three vaccination centres have been notified. Sahebganj has a RTPCR lab, two cardiac ambulances besides PSA that will benefit other districts also.

These two ambulances were procured from aspirational district funds for which the process was started in January. CM also launched cardiac ambulance service besides inaugurated oxygen pipeline for Rajmahal hospital.

The CM directed the district administration to launch

a special vaccination drive for public representatives and their family members so that people are encouraged to take vaccines.

"In the rural area there is misconception about vaccination and Covid 19 test so people avoid vaccination and Covid 19 test. But the government is watchful about the situation and we will certainly eliminate the virus. I urge all of you to take a vaccine for your own safety," Soren said.

He directed the DC of Sahebganj to ensure people follow social distancing norms at the village market because if social distancing norms are not followed it will only increase the chance of mass infection.

The CM said that while the government is gradually increasing health infrastructure the government is very watchful to stop proliferation of Covid 19 in rural areas of Jharkhand.

"I am in touch with DCs of districts, officials, public representatives, public representatives and MPs and they have tendered quite a valuable suggestion on how to control the virus," he said.

'Ensure uninterrupted power supply to Covid hospitals'

PNS ■ RANCHI

The Jharkhand government has instructed the energy department to ensure uninterrupted power supply across the State and categorically directed the department that oxygen plants and hospitals must get a smooth supply of the power.

The direction has been given in the wake of a number of incidents across the country where sudden disruption of power supply at hospitals threatened life of patients and production of oxygen was also disrupted.

Three days back the frequent power cut in the Gumla Sadar Hospital threatened the life of patients as oxygen supply got disrupted.

Even the union ministry of power on March 12 had issued a directive to all State governments to ensure power supply to medical installations on priority basis. The union ministry directed the energy secretary and managing directors of power DISCOMs to personally monitor the power supply situation.

The Managing Director of Jharkhand Bijli Vitran Nigam Limited (JBVNL), Avinash Kumar held a marathon meeting with officials of JBVNL and ancillary units on Thursday in this regard.

Kumar said that the energy department has to play a major role in the fight against Covid 19 by ensuring that medical installations, civilians and others get uninterrupted power supply.

He said that engineers will have to ensure that oxygen refill and production units get sufficient power as these are the essential services. In fact, a special control has been set-up for real time monitoring of power supply at medical colleges, Sadar hospitals, Covid care

centres, private hospitals, nursing homes, intensive care units and oxygen generation plants. The control room functions round the clock, where staff and engineers send real-time updates of power supply to the headquarters.

Officials of all power distribution circles of Jharkhand were asked to prominently circulate contact numbers of control rooms so that people can inform about power cuts.

In the meeting the decision was taken to purchase 40 power transformers as the back-up during emergency period. 20 transformers of five MBA capacity and another 20 transformers of 10 MBA capacity will be purchased.

Kumar said that engineers and officials of the department will have to ensure that there is no power cut and if there is any power cut due to technical snags the same is repaired quickly.

On Thursday evening a large part of Ranchi witnessed a power cut due to fault in Hatia-Argora supply line. The fault could be corrected around 8 pm.

Badal launches vax drive in Deoghar

PNS ■ RANCHI

The State Agriculture Minister, Badal launched Covid vaccination at Deoghar Sadar Hospital on Friday. He also inspected various wards of the hospital on the occasion.

Badal also visited the Registration Center at the old Sadar Hospital, where he met the people standing in the long line for vaccination and directed the Sub-Divisional Officer, Dinesh Yadav and the In-charge Dr Rajeev for quick diagnosis of their problems.

The Agriculture Minister said that there should not be any kind of inefficiency in vaccination and treatment. This system should be ensured that people should not face any kind of problem, he added.

In view of the situation of 86-year-old old woman Lakshmi Sinha and her son waiting for vaccination, the Minister himself called the doctor and nurse and got her vaccinated there.

During his visit Badal said that there has been awareness in such an old woman for vaccination. "It is an inspiration for people who have confusion in mind. Initially there was a delay in registration for vaccination", he added.

"Due to a server glitch in the first day in the morning, a small number of people have had problems in registration, which has been fixed later. Control of the epidemic will be achieved with the untiring efforts of the doctors, nurses, a well-organized system of administration, the cooperation of media brothers and social workers," said Badal.

He also said that adequate arrangements for oxygen and beds have been made in the district. "Remedivir injection is sufficient to suit the requirement. There is an appeal to the people that vaccination

must be done and the Government should strictly follow the rules of Safety Week applicable to protect Covid-19, in the interest of themselves and their family," he added.

In the end, the Minister reached the Covid-19 control room in the District Congress office and took stock of the information and gave proper directions to the Vaccination Publicity Committee.

It may be mentioned here that the Jharkhand Pradesh Congress Committee (JPCC) constituted a committee to supervise the vaccination programme which started on Friday across the State in which

The Agriculture Minister said that there should not be any kind of inefficiency in vaccination and treatment. This system should be ensured that people should not face any kind of problem, he added

people from 18 to 45 years of age can get vaccine. Some party senior leaders and MLAs have been entrusted to supervise the programme and Badal is Convener of the committee.

The committee will work to provide vaccines to maximum people of the State so that the infection could be controlled. The committee was constituted on the instruction of All India Congress Committee (AICC). The AICC has appealed to all the party leaders to carry out a massive public awareness campaign regarding Covid vaccination and help people to get vaccinated.

FJCCI seeks ban on e-com of non-essential services

PNS ■ RANCHI

Federation of Jharkhand Chamber of Commerce and Industries (FJCCI) has demanded from the Chief Minister and the Chief Secretary to restrict the supply of non-essential items from e-commerce during ongoing Health Protection Week in the State.

FJCCI president, Praveen Jain Chhabra said that from the initial phase of the global pandemic Covid-19 to control the pandemic last year, with adequate availability of food grains to the people, GST has been kept off for a period of more than about six months. "At a time when local merchants are not being allowed to sell non-essential materials, allowing e-commerce platforms to do so would create a trade imbalance. The traders' body realises that this is the initial and experimental phase of business operations during the pandemic with more challenges to deal with, during this time the e-commerce platform in the State is allowed to trade non-essen-

A view of FJCCI Building in Ranchi

Pioneer photo

tial commodities is unfair," he added.

Through letters to the Chief Minister and the Chief Secretary, the FJCCI president appealed to the State Government that by closing shops, the local businessman has to bear his shop rent, salary of employees, electricity bill, holding tax and other fixed expenses. It was urged that during the Health Protection Week the State Government should

issue guidelines to e-commerce companies to ban the trade of non-essential items during the Health Protection Week.

FJCCI General Secretary, Rahul Maru said that even during the lockdown last year, the trade of non-essential items on e-commerce was banned by the State Government, due to which the traders were able to get their business back on track when the shops normally opened in the market.

The traders' body realises that this is the initial and experimental phase of business operations during the pandemic with more challenges to deal with

Currently, if the business of non-essential services from e-commerce continues, today traders will deal with the challenges of Covid, but when the markets open normally, they will not have any customers available for purchase, he added.

In view of the problems arising due to the increasing proliferation of Covid in the State, FJCCI wrote a letter to the Commissioner of Commercial Taxes. It was also suggested that departmental officers should also be directed not to issue any pre-determined orders related to assessment proceedings, appeals, revisions and others. FJCCI's GST sub-committee Chairman, Jyoti Poddar said that many dealers, businessmen, lawyers, including department officials have suffered due to transmission of Covid across the Country, including Jharkhand. All buildings, multiplexes, offices and commercial establishments are also closed due to the epidemic. In such a situation dealers are unable to file the required documents.

INBRIEF

OVER 50% ECR EMPLOYEES VACCINATED

East Central Railway Administration is fully alert to the health of its employees in this difficult phase of Covid-19. General Manager Lalit Chandra Trivedi, in a virtual meeting with the Heads of Departments and Divisional Railway Managers in the past, had instructed to take special precautions regarding the health of the railwaymen and to take necessary steps in this regard. The GM emphasized on priority vaccination of railwaymen to protect against Covid-19. The programme of vaccination is being carried out as a campaign on ECR, as a result of which vaccination has been provided to about 51 per cent of the railway personnel eligible for vaccination till May 13, 2021 at the headquarters of East Central Railway and all the five divisions and factories. Under the vaccination campaign, up to May 14, out of 81,635 employees of ECR, 40,661 employees were given this vaccine in various railway hospitals. Among them, out of 2564 officers / employees working in the headquarters, 1248 railway workers were given Covid vaccination. A large vaccination campaign is also being conducted in the mandals.

100TH O2 EXPRESS PASSES THROUGH ECR STATIONS

Accelerating the efforts of Indian Railways to run Oxygen Express trains in various states of the country, East Central Railway has been instrumental in strengthening the joint war against Covid and providing relief to Covid patients and their families by transporting liquid medical oxygen. From April 19 till now, 100 trains have run through Pandit Deen Dayal Upadhyay Jn, Gaya, Daltonganj, Tori and other stations of East Central Railway to various states of the country. Of these, 49 loaded oxygen expresses reached Varanasi, Lucknow, Delhi and other cities of North India. Increased oxygen availability at these sites helped in the treatment of corona patients.

MAN DIES FROM SNAKE BITE IN GIRIDIH

In a tragic incident, a 60-year-old man died after he was bitten by a snake in Adwara area of Giridih district in Jharkhand. What was shocking was that the relatives of the victim took him to several tantriks instead of a hospital for treatment after the snakebite. The incident seems to be another case of superstition taking away an innocent life. The incident took place on Friday afternoon, when a snake bit the man at the village of Bagodar police station area. The name of the deceased is Ramdhan Mahato. Even after Mahato's death, the relatives again sought the help of a tantrik to try to revive the victim.

Civilians get free Covid treatment at Army hospital

50 out of 90 patients recovered and discharged till date

PNS ■ RANCHI

The health infrastructure of Jharkhand reeling under intense pressure of Covid-19 pandemic due to surge in cases in April got a boost last month after 23 division of Indian Army in Ranchi started a 50-beds special Covid care centre at its military hospital Namkum in Ranchi. Till date 90 civilian patients have taken admission in the hospital out of which around 50 patients have been

Army Hospital at Namkum near Ranchi

Pioneer photo

discharged from hospital after recovery from disease. Civilians are getting free treatment at the hospital.

The opening up of the army hospital was a great relief

for people fighting the pandemic, as the army opened its hospital for civilians. The 50 bed hospital at Army Hospital Namkum is oxygen supported and admission is carried out in the hospital on the basis of district administration intervention.

Officer Covid Cell Army Hospital Namkum Colonel SN Panda said, "The admission in the hospital is done on the intervention of district administration. The State Government has appointed a nodal officer who coordinates with State government hospitals and 104 services in admission of patients at hospitals." Panda further said,

Covid surge hits air travel, drop in no. of passengers from Ranchi

Railway too witnessing drop in number of travellers

ROSHAN KUMAR ■ RANCHI

Country's second wave of Covid 19 has cast a cloud over the aviation sector, which is barely recovering from the harsh lockdown of 2020. Domestic passenger traffic has been rising every month since airlines returned to the skies in June. However, in the first week of May, fewer Indians flew than the week before with maximum passengers postponing their travel plans.

Like other Airports, the Birsa Munda International Airport in Ranchi too is witnessing a fall of passengers. Birsa Munda International

Airport director Vinod Sharma said, "Like other airports across the State, the Birsa Munda International Airport too is witnessing a fall of passengers in the past few weeks. There has been a decline of fifty per cent both in number of passengers and flight operations from Airport."

Sharma said, "On an average daily basis the footfall of passengers at Birsa Munda Airport was around 5000 which included both passengers reaching Ranchi from other cities to those leaving from Ranchi airport, but the number has declined to around 2000 passengers." "Further 19 flights used to fly from Birsa

Birsa Munda airport in Ranchi

Pioneer photo

Munda Airport on normal days which have reduced to 9 flights a day," added Sharma. This decline is across all airline services having its operation from Birsa Munda International Airport.

On Thursday 15 flights from Ranchi Airport were cancelled due to fewer passengers.

On Thursday only eight flights had its operation from Ranchi Airport. This trend has been witnessing for the past week. Based on figures available from the Airport, in the month of March 1774 flights took off from Ranchi Airport to differ-

ent cities in India which reduced to 1596 flights taking off in April.

Even passengers are scared of using air services. Anand Kishore, a technocrat, said, "In first week of May, I had some assignment in Mumbai, but I postponed the work due to the surge of Covid 19 in Maharashtra."

On the other hand, there has been a huge drop in the number of rail passengers in Ranchi Rail Division. According to the figures received from the division, only 50 percent of berths are occupied in Hatia-Patna Islampur special train, while only 30 percent passengers are traveling in the incoming train. In Ranchi-Howrah special train, 25 percent berths are occupied from the sides, 27

percent in Kriya Yoga Express, 30 percent in Rajdhani Express. Most of the reserved berths are going empty. At the same time, 25 percent of berths are occupied in Dumka Intercity Special train. The drop in rail passengers is also affecting revenue collection of railways.

Currently Hatia-Yeshwantpur Special train running between Ranchi and Bangalore is running with full occupancy as a large number of passengers are returning from Bangalore Karnataka to their home town in fear of possible lockdown in Southern state. Similarly, the LTT special train for Mumbai has 35 per cent occupancy, but the train from Mumbai to Ranchi is running with 100 per cent occupancy as migrant laborers are returning in large numbers.

₹20,667 cr transferred to 9.5 crore farmers

PNS ■ NEW DELHI

Prime Minister Narendra Modi released the eighth instalment of the financial benefit under the Pradhan Mantri Kisan Samman Nidhi (PM-KISAN) scheme via video conferencing on Friday. As part of this instalment, a total of ₹20,667 crore was transferred to more than 9.5 crore farmers across the country, including those from West Bengal. This is the highest amount paid by the Government under the scheme in a single instalment and for the first time, the scheme has reached farmers of West Bengal as about 7.03 lakh of them got their first instalment of ₹2,000 each. The scheme was not implemented till now in West Bengal as the State Government and the Centre were at loggerheads over various issues, including verified data of farmers. As part of this scheme, the Government is working towards encouraging farmers to take up alternative forms of farming such as organic farming. These crop require less investment. They are good for health and for the soil too. It also sells for a higher amount," he said. All farmers, especially from Punjab, are satisfied with the scheme. I have seen many videos of farmers expressing their satisfaction on social media," PM Modi said. The PM also interacted

with the beneficiaries of the scheme after releasing the amount. Talking to a farmer from Andhra Pradesh, who turned a piece of barren land into suitable land for organic farming, the PM said, "You have set an example for others. Your self confidence speaks for your ability and experience." The farmer from the southern state told PM Modi that she grows three crops on her land throughout the year. Talking to a farmer from Meghalaya who has set up a business model for organic farming, PM Modi said as many as 10,000 Farmer Producer Organisation (FPO) were being set up in the country and small farmers were also getting associated with them. "Your confidence in what you do makes your model a sought-after one," the PM told the farmer. Talking to a farmer from Meghalaya who has set up a business model for organic farming, PM Modi said as many as 10,000 Farmer Producer Organisation (FPO) were being set up in the country and small farmers were also getting associated with them.

Militant who killed Assam Rifles jawan in 2017 arrested in ambush, says NIA

PNS ■ NEW DELHI

The National Investigation Agency (NIA) on Friday said it has arrested a self-styled lieutenant of People's Liberation Army/ Revolutionary People's Front (PLA/RPF) in ambush. He was involved in the killing of an Assam Rifles personnel in Manipur in 2017. The agency on Thursday arrested Mayanglambam Siromani, 32 of Kakching Khunou Angom Leikai under Waikhong police station of Kakching district of Manipur. The case was initially registered on November 15, 2017 at Chakpikarong police station in Chandel district relating to an ambush on Road Opening Party of 4th Assam Rifle at Chamol-Sajik Tampak Road in the district resulting in the killing of one Assam Rifles personnel and severe injury to another soldier. Two terrorists were also killed in the encounter. The NIA had re-registered the case on March 29 in 2018 under various Sections of the IPC, Arms Act, Explosives Act and Unlawful Activities (Prevention) Act and took over the investigation. During the NIA investigation, it was revealed that Siromani was involved in the conspiracy for the attack on the road opening party of Assam Rifles. Based on the evidence, he was charge-sheeted while absconding. Further, he was declared a proclaimed offender and a cash reward of Rs 2 lakh was announced for information leading to his apprehension.

Plea in SC seeks probe into bodies in Ganga

ANS ■ NEW DELHI

A plea has been moved in the Supreme Court to constitute a special investigation team (SIT) to conduct the investigation into over 100 corpses, found floating in the Ganga river in Bihar's Buxar, and Uttar Pradesh's Ghazipur and Unnao districts, amid the ongoing second wave of Covid-19 pandemic. The plea, filed by lawyers Pradeep Yadav and Vishal Thakre, urged the top court to issue direction the State Government concerned to conduct post-mortem of the dead bodies. "The act of the states is inhuman as they failed to provide facilities for decent burial/cremation of dead bodies and to keep a check on pollu-

The petitioners emphasised that the recovery of decomposed bodies from the river is a matter of serious concern

tion of the holy river, Ganga, by such indecent act either of individuals or of authorities," the petition said. The petitioners emphasised that the recovery of decomposed bodies from the river is a matter of serious concern, noting that the river was a source of water for many areas, and if these bodies were of Covid-19 patients, then there is

a possibility of spread of infection through water in the villages of both Bihar and Uttar Pradesh. The petitioners also cited the Pt Parmanand Katara case, wherein the apex court had held that the right to dignity and fair treatment under Article 21 of the Constitution, was not only available to a person during lifetime, but also to the body after death. The plea also alleged that in the present case, the state has also failed to monitor the crematoriums, which exorbitantly charged people for last rites during the pandemic. The petitioners have claimed that the state governments, till date have not taken any effective measure to purify the water, and this was a violation of Article 21.

Indian scientists discover better combo alternative to Remdesivir

PNS ■ NEW DELHI

At a time when people are desperately hankering for Remdesivir injections, paying exorbitant prices in black market too, a team of Indian scientists have found a combination of easily available drug—Sofosbuvir in combination with Ledipasvir and Daclatasvir as better drug than Remdesivir and potential therapeutic agents for the coronavirus. They had investigated 61 antiviral drugs and found that unlike Remdesivir whose route of administration is intravenous, Daclatasvir and Ledipasvir, are orally administered. Combinations of Ledipasvir and Daclatasvir with Sofosbuvir are clinically approved, said the scientists in a study published in the Current Science journal. "The combined score suggests that these combinations have superior anti-SARS-CoV-

2 potential than Remdesivir and other investigational drugs," said the scientists from Biochemical Sciences Division, CSIR-National Chemical Laboratory, India Academy of Scientific and Innovative Research (AcSIR), Pandit Bhagwat Dayal Sharma Post Graduate Institute of Medical Sciences, and INTOX Private Limited, Pune who worked on the efficacy of drug repurposing for treating Covid-19. "Our analysis suggested Sofosbuvir in combination with Ledipasvir and Daclatasvir as potential therapeutic agents for SARS-CoV-2. The combined score suggests that these combinations have superior anti-SARS-CoV-2 potential than Remdesivir and other investigational drugs," they said. They said the present work provides a rationale-based approach to select drugs

with possible anti-SARS-CoV-2 activity for further clinical evaluation. With the shortage of Remdesivir, the combination can be used to save the lives of severe Covid-19 patients. "Drug repurposing has been utilized as the most preferred therapeutic intervention for Covid-19 mitigation due to its necessity and feasibility. To prioritize the therapeutic regime against COVID-19, we used 61 antiviral drugs and their combinations," said the paper. Selected molecules were subjected to virtual screening against — human angiotensin-converting enzyme 2 receptor-binding domain (hACE-2) which serves as an anchor for virus attachment and entry, SARS-CoV-2 RNA dependent RNA polymerase (RdRp) responsible for viral RNA replication, and SARS-CoV-2 main protease (MPro) needed

The findings provide a scientific rationale for applying Ledipasvir and Daclatasvir in combination with Sofosbuvir for Covid-19 management

for viral polypeptide slab proteolytic processing. "Based on docking score, pharmacodynamic and pharmacokinetic parameters, combinations of Daclatasvir, Elbasvir, Indinavir, Ledipasvir, Paritaprevir, and Rilpivirine were analysed further. Our analysis suggested Sofosbuvir in combination with Ledipasvir and Daclatasvir as potential therapeutic agents for SARS-CoV-2," it added. The team said that the findings provide a scientific rationale for applying Ledipasvir and Daclatasvir in combination with Sofosbuvir for Covid-19 management. "Recent initial clinical trial data from Iran with Ledipasvir and Daclatasvir in combination with Sofosbuvir against Covid-19 are encouraging. Based on our analysis and available pre-clinical and clinical data, we recommend prioritization and aggressive perusal of clinical evaluation of these drug combinations," it further said.

Onset of southwest monsoon over Kerala likely on May 31

PNS ■ NEW DELHI

The onset of southwest monsoon over Kerala is likely to be on May 31, a day before the normal date of June 1, with a model error of ± 4 days. As a well-marked low pressure area over Lakshadweep area & adjoining southeast Arabian sea is all set to develop into a cyclonic storm along the west coast in the next 24 hours. According to the India Meteorological Department (IMD), Tauktae, (meaning gecko (named by Myanmar) once formed, is likely to intensify into a 'very severe cyclonic storm' with wind speed of 150 to 160 kmph gusting to 175 kmph on May 17. This will be the first cyclone of this year. The red alert has been sounded in Kerala for several districts for Friday and Saturday. Kerala Chief Minister tweeted, "Red Alert! 14 May - Thiruvananthapuram, Kollam,

Pathanamthitta, 15 May - Malappuram, Kozhikode, Wayanad, Kannur, Kasargod. Follow guidelines issued by @KeralaSDMA." "This year, the onset of the southwest monsoon over Kerala is likely to be on 31st May with a model error of plus/minus 4 days," the IMD said. In the Indian monsoon region, initial monsoon rains are experienced over south Andaman Sea and the monsoon winds then advance north-westwards across the Bay of Bengal. The normal onset date of the monsoon over Kerala is June 1. Earlier the IMD has stated that monsoon is likely to make its onset over the Indian subcontinent at its normal date of June 1. The IMD's operational forecasts of the date of monsoon onset over Kerala during the past 16 years (2005-2020) were proved to be correct except in 2015. According to the IMD, it is

very likely to intensify into a cyclonic storm during the next 24 hours and is also expected to intensify further during the subsequent 24 hours. Tauktae is likely to move north-north-eastwards initially for some more time and then move north-north westwards and reach the Gujarat coast by May 18 morning. The depression over Lakshadweep area has moved north-north-eastwards with a speed of about 19 kmph and is now centred over Lakshadweep about 30 km south southwest of Amini Divi, 320 km west-southwest of Kannur (Kerala), 1120 km south southeast of Veraval (Gujarat) at about 11.30 am on May 14. After the cyclonic warning the National Disaster Response Force has deployed several teams on ground. At least 24 teams are pre-deployed and 29 teams are on standby for Gujarat, Kerala, Karnataka, Tamil Nadu and Maharashtra, NDRF DG, SN Pradhan said.

Congress urges Palestinians, Israel to cease hostilities immediately

ANS ■ NEW DELHI

The Congress on Friday raised concern over the spiralling violence in the Palestinian territories and Israel and urged an immediate cessation of hostilities. In a statement, Congress leader Anand Sharma said that the spiralling violence in East Jerusalem, Gaza and Israel, coinciding with the festival of Eid, is distressing and a matter of grave concern for the world. He also said that the Palestinian peoples' right to pray at Al Asqa mosque without any restriction must always be respected and not violated. "The orchestrated incidents in Jerusalem were outrageous and triggered tensions and violence," he said. Noting that people of both Palestine and Israel "have a right to live with dignity in a secure environment, Sharma said that the escalation of conflict, air attacks on Gaza and the rocket attacks by Hamas have resulted in tragic loss of innocent human lives, especially the children and elderly and also injuries to many civilians.

20 civil servants appointed to joint secretary-level posts

ANS ■ NEW DELHI

In a major bureaucratic reshuffle, 20 civil servants were on Friday appointed to joint secretary-level posts. A 2002 batch Indian Administrative Service (IAS) officer, D. Senthil Pandiyan, was appointed as Joint Secretary in the Ministry of AYUSH for a tenure of five years, replacing Indian Forest Service (IFS) officer Roshan Jaggi, a 1988-batch J&K cadre officer. Nirupama Kotru, a 1992 batch Indian Revenue Service (IRS) officer, was appointed as Joint Secretary and Financial Advisor in the Ministry of Coal for an overall tenure of five years in place of Reena Sinha Puri, a 1987-batch IRS officer. Bhaskar Verma, a 1995-batch Indian Civil Accounts Service (ICAS) officer, has been appointed as the Member Secretary, National Monuments Authority (NMA), Ministry of Culture, for five years replacing Navneet Soni. The Appointments Committee of the Cabinet, chaired by Prime Minister Narendra Modi, approved the appointments that include the names of Lily Pandeya for the Joint Secretary's post in the

Ministry of Culture; Mayank Tewari for the same post in the Department of Defence; Nazli Jafri Shayin in the Ministry of Defence (Finance); Indira Murthy in the Ministry of Earth Sciences; Bhuvnesh Kumar in the Ministry of Electronics and Information Technology; and Patibandla Ashok Babu in the Department of Health and Family Welfare. Manisha Sinha, Ashish Vachhan and Sandhya Bhullar were appointed as Joint Secretaries in the Department of Economic Affairs. Jeetendra Singh has been appointed as Joint Secretary in the Department of Heavy Industry; Sumant Singh in the Department of Home Affairs; Sanjiv Shankar in the Ministry of Information and Broadcasting; Manoj Kumar in the Department of Investment and Public Asset Management; and Sonmoni Borah in the Department of Land Resources. Indian Ordnance Factories Service (IOFS) officer Veena Tamta Bhatia has been appointed as the Additional Central Provident Fund Commissioner (HQ), EPFO, under the Ministry of Labour and Employment.

Goyal discusses steps to raise Covid vaccine production

ANS ■ NEW DELHI

Commerce and industry Minister Piyush Goyal on Friday had a virtual meeting with United States Trade Representative (USTR) Katherine Chi Tai. The meeting focused on increasing vaccine availability in an inclusive and equitable manner to combat the Global pandemic caused by Covid-19. The proposal of India on waiver of certain TRIPS provisions to increase global vaccine production in order to take on the challenge of vaccinating the poorest of the poor and save lives was also discussed. Goyal thanked the USTR for the US announcing its support for India's proposal. The minister mentioned the supply chains for the vaccine manufacturers must be kept open and unbridled as the entire world is in dire need of vaccines.

Vaccine supply likely to increase sharply by June

PNS ■ NEW DELHI

Come June and supply of Covid-19 vaccines is likely to increase sharply, helping India get close to 300 crore doses in the seven-month period ending December, government officials said on Friday even as it announced of supplying nearly 192 lakh Covid-19 vaccines to the states and the Union Territories (UTs) in the next fortnight from May 16 to 31, 2021. This will include 162.5 lakh of Covishield and 29.49 lakh of Covaxin. Estimates chalked out by officials suggested that the tentative supply figures in May (8.8 crore doses) could almost double by June (15.81 crore doses) and quadruple by August (36.6 crore doses). In December alone, 65 crore doses might be available, over a seven-fold jump from the May numbers, they said. Meanwhile, officials from the Union Health Ministry said that Union Health Minister Harsh Vardhan will hold a meeting with Health Ministers of four states for Covid-19 vaccination and management on May 15. In addition, a total quantum of more than 4.39 crore doses was also available for direct procurement by the

States as well as private hospitals in the month of May 2021. A total of 17,92,98,584 vaccine doses have been administered through 26,02,435 sessions, according to the provisional report till 7 am. These include 96,18,127 healthcare workers (HCWs) who have taken the first dose and 66,04,549 HCWs who have taken the second dose, 1,43,22,390 FLWs who have received the first dose, 81,16,153 FLWs who have received the second dose and 39,26,334 beneficiaries in the 18-45 years age group who have taken the first dose. Besides, 5,66,09,783 and 85,39,763 beneficiaries aged 45 to 60 years have been administered the first and second dose respectively, while 5,42,42,792 and 1,73,18,693 beneficiaries of more than 60 years old have taken the first and second dose.

The ministry said 4,40,706 beneficiaries in the age group of 18-44 years have received their first dose of COVID vaccine in the last 24 hours and cumulatively 39,26,334 across 32 states and UTs since the start of phase-3 of vaccination drive. More than 20 lakh vaccination doses were administered in a span of 24 hours. As on Day-118 of the vaccination drive (May 13), 20,27,162 vaccine doses were given. Across 18,624 sessions, 10,34,304 beneficiaries were vaccinated for the first dose and 9,92,858 beneficiaries received their second dose of vaccine. The Ministry also said that a national tracking platform will be established soon to determine the impact of the jabs against Covid-19 and the breakthrough infections that are likely to occur among those with complete and partial immunisation.

Modi directs States to take tough action against O2 hoarders

ANS ■ NEW DELHI

Prime Minister Narendra Modi on Friday directed all the States to take strict action against hoarders of concentrated oxygen cylinders. The Prime Minister's direction came when he was addressing the nation after launching the eighth instalment of financial benefits worth Rs 19,000 crore under the Pradhan Mantri Kisan Samman Nidhi (PM-KISAN) scheme to benefit more than 9.5 crore farmers that includes first-time beneficiaries in West Bengal. The Prime Minister expressed dissatisfaction against these hoarders for their indulgence in such acts at a time when even Indian Armed forces comprising all its three divisions-- the Indian Army, the Indian Navy, and the Indian Air Force -- have been engaged to serve the human being amid Covid-19 crisis. "Our three armed forces are trying to serve the needy and oxygen trains are continuously dispatching oxygen cylinders amid the Covid crisis. But there are a number of people who are involved in hoarding of oxygen. States should take strict action against such people," Modi said. Despite the acute shortage of concentrated oxygen in various states, several people have been caught hoarding the supply of the life-saving gas. Meanwhile, the Prime Minister also warned the people residing in villages to be very alert and follow all Covid-19 measures without fail to avoid the spread of the deadly disease.

Modi appealed to the villagers as well as those united with Gram Panchayats to spread awareness among others in the village to use "mask, take seriously to each symptom of Covid, go for Covid test, follow precautions until Covid report comes negative, and administer the vaccine". "People's participation is essential to defeat Covid-19," Modi said. The cumulative number of Covid-19 vaccine doses administered in the country is nearly 18 crore (17.93 Crore), said the Union Health Ministry's latest report received on Friday morning. It said that the Covid-19 vaccination drive has successfully completed 118 days wherein 17.89 Crore doses have been administered to the identified beneficiaries through collaborative efforts of all states and UTs. India is the fastest country globally to reach the 17 crore target in 114 days. USA took 115 days and China took 119 days to administer the same amount of doses.

Kazakhstan extends humanitarian aid to India

ANS ■ NEW DELHI

In accordance with instructions from President Kassym-Jomart Tokayev and guided by the principles of strategic partnership between the two states, the Kazakhstan Government has provided humanitarian assistance to India during this serious epidemiological situation of Covid-19. The first of the two Kazakh aircraft with the cargo landed at the Indira Gandhi International Airport in New Delhi in the morning on May 14 with the second one expected to arrive several hours later. This humanitarian aid, weighing around 40 tons, includes medical masks, respirators, protective suits and portable artificial lung ventilation devices from Kazakh manufacturers in the healthcare sector. This aid was officially handed over at the airport by Ambassador of Kazakhstan to India Nurlan Zhalgasbayev to Director, Eurasian Department of the Ministry of External Affairs, Bandaru Wilsonbabu. On May 4, President Tokayev, in a telegram to Prime Minister Narendra Modi, expressed "deep solidarity with the Indian nation over the devastating Covid-19 surge in this country", and on May 7, instructed his government to provide and dispatch the necessary assistance to the Indian authorities.

BSF finds guns dropped by Pak drone in Samba

PNS ■ JAMMU

A day after the Armies of India and Pakistan exchanged packets of sweets and demonstrated that the bonhomie was prevailing along the Line of Control as not a single incident of cease-fire violation was reported since February 24, the Indian border guards deployed along the International border on Friday claimed they have recovered a consignment of arms and ammunition dropped by a Pakistani drone in the Samba sector. The arms consignment was dropped approximately 250 metres inside the Indian territory.

BSF officials also claimed the consignment was recovered from the same area where BSF had earlier detected a cross border tunnel in the month of November 2020. The tunnel was used by the Pak rangers to push armed terrorists inside the Indian territory.

Recently a Pakistani

intruder was also shot dead by the BSF troops in the same area on May 5.

Last year on June 20, 2020

BSF troops had also neutralized a Pak Hexacopter in Samba/Kathua area and recovered a huge quantity of Arms/Ammunition & explosives. According to a statement released by the BSF spokesman in Jammu, "As per input, on 14 May 2021, troops of BSF carried out a search operation in the general area of Samba sector. At about 12.15 hrs, BSF troops recovered a wrapped item with a yellow colour polythene bag in a field. The wrapped packet contained 01 AK -47, 01 Pistol, 01 Mag, 15 rounds of 9 mm, 01 wooden frame (used to attach payload with drone) & wrapping material".

BSFspokesman said, "IG BSF Jammu N S Jamwal congratulated the alert BSF troops for this big achievement which again foiled the nefarious motive of Pakistan and said that BSF is ever alert and vigilant on International Border 24x7 to thwart away the nefarious designs of Pakistan".

Be impartial, prompt, Didi writes to PM on O2 plants

SAUGAR SENGUPTA ■ KOLKATA

Continuing to drop letter bombs on the PMO one after the other, Bengal Chief Minister Mamata Banerjee on Friday wrote to Prime Minister Narendra Modi wondering why the Centre was not living up to its promises on corona specific equipment.

The Chief Minister wrote another letter to the Prime Minister requesting him to be evenhanded in allotting PSA plants (Pressure Swing Adsorption) plants — needed to generate oxygen — to the States, particularly Bengal.

Complaining that the Centre had promised 70 such plants for Bengal whereas it had only been allotted four in the first phase, Banerjee wrote, "We were told we shall get 70 PSA plants, now we are told that we shall get four in the first phase with no clarity on the remaining plants."

This is her fifth letter to the Prime Minister in the past two weeks.

She also complained in her letter, as to how "...Priorities are being fixed and re-fixed, imple-

menting agencies are being settled and unsettled, quota for West Bengal is being downwardly revised and further downwardly revised every day," adding there was lack of clarity about whether the State would get the remaining plants.

The Prime Minister's Office had earlier approved allocation of funds from PM-CARES for installation of 551 PSA plants in across the country. Out of these Bengal was to get 70.

Mamata further wrote in her letter requesting the Prime Minister "to kindly get the priorities, implementing agencies, and quota fixed, justly, fairly and quickly" as "our own supplementary PSA-installation plans by State agencies... are getting disturbed because of the indecisiveness at Delhi."

Pandemic issues apart, the Chief Minister also hit out at the Centre for making unnecessary delay over the transfer of PM Kisan Sanman Nidhi funds to the Bengal farmers.

Mamata attacked the Prime Minister on a day when the Centre transferred its first install-

ment of ₹2,000 to more than 7.5 lakh eligible farmers on Friday. In an open letter to the farmers the Chief Minister said that the first installment of the PM-Kisan fund was in fact a result of her continuous fight to get the central funds for Bengal farmers.

The Prime Minister on Friday released the eighth installment of over ₹20,000 crore to more than 9.5 crore farmers. About 41 lakh Bengal farmers had applied for the scheme.

In an open letter to farmers, Banerjee said "You all were supposed to get ₹18,000, but have received a very small amount. Even this sum would not have been transferred had we not fought for it. We will continue this fight till you get the entire allocation."

Her Trinamool Congress also hit out at the Centre for releasing only ₹2,000 for each farmers whereas the Prime Minister had promised Rs 18,000 after the elections. "The PM spoke of ₹18,000 and here he has given only ₹2,000... where is the rest?" asked senior party MP Saugato Roy.

Several leaders' phones tapped during Fadnavis regime, alleges Cong

TN RAGHUNATHA ■ MUMBAI

Maharashtra Pradesh Congress Committee (MPCC) president Nana Patole on Friday created a sensation in the State political circles by alleging that during the previous Devendra Fadnavis Government telephones of several leaders belonging to the Congress, NCP, Shiv Sena and BJP, and also some IAS and IPS officers, between 2016 and 2017 were tapped.

Talking to media persons here, Patole charged that he had received information from a private television channel that his telephone was being tapped between 2016 and 2017 when the BJP-led saffron alliance Government ruled the state.

"In the name of busting a narcotics gang, the phones of mine as well as Amzad Khan were tapped during the Devendra Fadnavis Government using false names. I urge the Maha Vikas Aghadi (MVA) government to conduct a high-level inquiry into the phone tapping indulged in by the previous BJP-led Government and bring the culprits behind it to book," Patole said.

The MPCC president also alleged that apart from his phones, the phones of Congress, NCP, Shiv Sena and BP leaders, and also some IAS and IPS officers were also being tapped. "In my case, the previous BJP government tried to link me to drug trafficking gangs and also project in an objectionable manner. While tapping my telephone, the people involved were using a fake name and address".

Patole demanded to know if requisite permission was taken from the authorities concerned before tapping my telephone. "What was the purpose of tapping my telephone? Keeping an individual under surveillance without requisite permission is an offence and invasion into the privacy of the individual concerned," the Congress leader said.

UP records 15,747 new Covid cases, 312 deaths

Lucknow: Uttar Pradesh on Friday recorded 15,747 fresh Covid-19 cases that took the infection count to 15,96,628, while 312 more fatalities pushed the death toll to 16,958, officials said.

In the past 13 days, the number of active cases in the state has come down by over 1.17 lakh. On April 30, there were about 3.10 lakh active cases and the number currently stands at 1,93,815, said Additional Chief Secretary, Health, Amit Mohan Prasad.

As many as 1,57,257 patients are in home isolation, he said. While the state reported 15,747 fresh cases the previous day, 26,174 Covid-19 patients recovered from the disease. So far, 13,85,855 patients have recovered in Uttar

Pradesh and the recovery rate stands at 86.8 per cent, Prasad said.

Among the fresh deaths, a maximum of 21 were reported from the state capital Lucknow, 20 from Kanpur, 16 from Bagraich, 15 from Meerut, 14 from Chandauli, 13 from Jhansi, 12 from Varanasi, 10 each from Gautam Buddha Nagar, Hardoi and Mathura, a health bulletin issued here said.

Among the fresh cases, 1,464 were reported from Meerut, 900 from Lucknow, 718 from Gautam Buddha Nagar, 587 from Varanasi, 567 from Gorakhpur, it said. So far, over 4.41 crore samples have been tested for COVID-19 in the state, including more than 2.63 lakh tested on Wednesday, he said.

Centre rushes team to J&K to study reasons for high Covid-19 mortality

MOHIT KANDHARI ■ JAMMU

In the wake of the grim Covid-19 situation in Jammu & Kashmir, the Central Government has rushed a team of experts to study the reasons behind high mortality rate.

The region has witnessed more than 800 deaths in the last one month. The positivity rate is also hovering around 10 percent while the active positive cases stood at over 52,000.

MoS PMO Dr Jitendra Singh, who is regularly tracking the Covid-19 management efforts on Friday tweeted, "Central team of experts deputed to visit GMC and other health institutions in Jammu in view of COVID surge. Local authorities are advised to frankly point out constraints

faced by them without mincing words, so that Centre can optimally step in to assist them".

On ground zero the Union Territory administration is racing against time to recruit doctors, nurses and other paramedics to utilise their services in the overall management of Covid-19 patients.

Meanwhile, there was no let up in the increasing number of deaths. On Friday 60 more patients succumbed to the virus while 3027 new cases were detected taking the tally of active positive cases to 52,001. The positivity rate dropped down marginally to 9.59 across J&K.

The National Health Mission, UT of J&K Friday released some statistics in order to spread awareness about the importance of vac-

cination.

According to the analysis of Covid mortality in J&K UT between 15 Apr-12 May, the twitter handle of NHM said, 1-93% of Covid +ve critical cases who died in this period were unvaccinated, 7% were partially vaccinated.

"46% of deaths occurred within 3 days of testing +ve thus indicating that they were well into late stages of infection before they got tested".

patients not to remain in a denial mode NHM advocated the need for early testing so that treatment could start early.

Referring to self medication as another reason behind the high mortality rate, NHM data revealed, "49.37% of total deaths were those who arrived just <=3 days before in the hospital".

Kerala extends lockdown till May 23

KUMAR CHELLAPPAN ■ KOCHI

Since the nine-day long total lockdown in Kerala which is in force since May 9 has failed to bring down the number of Covid-19 patients, the administration has decided to extend the lockdown to May 23.

The lock down declared on May 7 was for nine days which would have ended on May 16.

The move to extend the lockdown was announced by Chief Minister Pinarayi Vijayan in his daily press briefing on Friday.

Vijayan said that the total lockdown would be in force till May 23. Four districts have been brought under triple lock down measures. These are the districts of Thiruvananthapuram, Ernakulam, Thrissur and Malappuram. The decision to have triple lock down in these districts was in the backdrop of unabated hike in the number of Covid-19 cases.

On Friday, the State diagnosed

34, 694 new persons with Covid-19 while 93 patients succumbed to the pandemic.

The Test Positivity Rate in the State as on Friday was 26.41.

The Chief Minister asked the people in the State to be extra cautious as the India Meteorological Department has warned of heavy downpours, rains and high sea waves along the Kerala coast as a consequence of the low pressure developed in the Arabian Sea in the West Coast.

The failure of the administration to accommodate Covid-19 patients in First Line Treatment Centres came out in the open in southern Kerala as nearly 50 patients afflicted with the pandemic set up a temporary shed along the paddy fields in Thiruvalla as covid shelter.

An embarrassed administration hushed up the issue by shifting the patients to the nearest FLTC but not before many people were seen running helter-skelter in this predominantly rural area.

288 more die in Tamil Nadu

KUMAR CHELLAPPAN ■ CHENNAI

Tamil Nadu is all set to extend the lockdown period with more stringent measures as all measures to check the transmission of Covid-19 have come a cropper. There is no worthwhile change in the number of daily cases reported across the State as the second wave is causing havoc everywhere.

On Friday, the pandemic claimed 288 lives across the State while 31, 892 new persons were diagnosed with Covid-19. The Directorate of Public Health and Preventive Medicine said in its release that there were 1.95 lakh active Covid-19 patients in the State undergoing treatment in various hospitals.

More than 1.53 lakh persons were subjected to RT-PCR tests on Friday. The death toll in Tamil Nadu till date crossed the 17,000 on Friday. A meeting convened by Chief Minister Muthuvel Karunanidhi Stalin which was attended among others by legislature party leaders of all political parties with representation in the House decided unanimously to support whatever

measures the Government takes to control the transmission and spread of the pandemic in the State.

The leaders of all political parties who took part in the deliberations assured the Government that they would not hold any public meetings or demonstrations anywhere in the State till the pandemic subsides. A high power committee was constituted with medical professionals, policy makers and leaders of various political parties to chalk out ways and means to control the spread of Covid-19.

In a camaraderie which is quite unusual in Tamil Nadu, the political leaders authorised the Chief Minister to take decisions which he feels apt and suitable to check the Covid-19.

Meanwhile, Sterlite Copper, owned by the Vedanta Group, has started despatching tanker trucks filled with medical oxygen to various government owned hospitals in the State. A company representative said that from May 15, the plant at Thoothukudi would be able to produce 35 tonne medical grade oxygen per day and this would be gradually hiked.

Steps taken to increase number of Covid-19 beds: Puducherry L-G

PTI ■ KARAIKAL

Puducherry Lieutenant Governor Dr Tamilisai Soundarajan has said steps were underway to increase the number of beds for Covid patients in Karaikal district of the Union Territory.

Speaking to reporters after holding a review meeting here with the District Collector Arjun Sharma, the Lieutenant Governor said considering the rise in the number of Covid cases in Karaikal, the Government has taken steps to increase the number of beds in hospitals.

In addition, privatemedical colleges have been asked to raise the bed capacity and appoint more doctors, she said. Stating that the district has adequate supply of oxygen, she thanked the fishermen who donated 40 oxygen cylinders in their boats for the benefit of patients in the government Karaikal hospital.

The Lieutenant Governor pointed out that it had been observed that late referrals for treatment at hospitals were often the reason for Covid deaths and asked the people to seek proper medical attention in the early stage itself.

She said the district administration would consider increasing the number of Covid care centres and alternative medicine centres. When her attention was drawn to volunteers who are involved in burying the Covid victims in the district, the Lieutenant Governor said she would initiate an inquiry as to why government staff were not involved in the activity and why it had been entirely left to volunteers.

She appealed to the people to cooperate with the government by staying indoors and thereby stop the spread of Covid. Health Secretary Arun and other officials were present at the review meeting.

With no let up in coronavirus surge, lockdown extended by 7 days in Mizoram

Aizawl: The total lockdown imposed in Aizawl and other district headquarters from May 10 has been extended for another 7 days to flatten the Covid-19 transmission curve.

The government order issued on Friday said that the existing complete lockdown, which was scheduled to be lifted on May 17 (4 am) has been extended till 4 am of May 24.

"As Covid-19 positive cases continue to surge inspite of the stringent measures taken, the competent authority has decided to continue with the total lockdown with an anticipation of flattening the curve of the disease transmission thereby preventing probable overburdening of healthcare facilities," the order said.

The second corona wave continues to trouble the northeastern State. Mizoram on Friday reported 201 Covid-19 cases, pushing the state's tally to 8,377.

A total of 90 people were discharged in the state during the day.

The number of active cases now stands at 2,060, while 6,294 people have recovered from the infection. At least 23 people have succumbed to the infection in Mizoram so far. The Government order said that people residing in the state capital and other district headquarters/towns shall strictly confine to indoors and not venture outside without permission.

Assam Minister orders probe into death of 18 elephants

Guwahati: Assam Forest Minister Parimal Suklabaidya on Friday visited Bamuni Pahar in Nagaon district, where 18 elephants died a day ago presumably due to lightning, and ordered an inquiry into the incident.

A panel, headed by Deputy Conservator of Forest K K Deori with seven veterinarians as members, has been instituted to carry out the inquiry, and file a preliminary report within three days and a detailed account in the next 15 days, an

official release stated.

Suklabaidya, who assessed the situation at Bamuni Pahar in Kothiatuli forest range along with top officials, said "no visible sign of any struggle" was found at the site and an initial probe into the incident suggested that the pachyderms were struck by lightning.

The exact cause of death, however, will be clear following the arrival of the post mortem report, and submission of details by the committee, the Minister said.

PAPER WITH PASSION

High and dry

Herd immunity is one thing; India needs to do a lot more to protect its people from the pandemic

The COVID-19 vaccination drive in India appears to be wafting in the air with a mind of its own. Never an easy task, what with a billion people to be vaccinated in time to avoid a third surge of the virus, the exercise is taking time even to take off. Whether it is owing to gigantic nature of the task at hand or the scattered nature of the vaccination management plan, one is not sure. The bare facts of the case, if the pandemic is to be brought under control at the very least by the end of this year, are before us. Scientists believe a minimum of 70 per cent of the population needs to be vaccinated for the herd immunity to set in. In India, that means the immunity can be achieved if nearly 94 crore people receive both doses of the vaccine. At two doses each, that calls for 188-odd crore doses. That is a tall order. Even if one were to scale down the vaccination to one dose under the assumption that it is better to give at least half protection to all than complete protection to only a few, even then, just under a 100 crore doses are needed. Where to get the doses from? How long will it take to acquire them? How long will it take to complete the vaccination process? If, at the end, it is only one dose that is given, an identical task stares at the country for giving the second dose.

Bear in mind that all this is for vaccinating only 70 per cent of the population. That means just about a third of the population will be left high and dry unless they largely constitute children who are yet to come under the purview of vaccination. The Serum Institute of India has said it will be in a position to produce 10 crore doses a month after July. One can assume that Bharat Biotech can produce anywhere between five and six crore doses a month after July. Zydus Cadila and Dr Reddy's Labs will be able to pitch in with three-odd crore doses a month. That can stretch the total figure of available doses per month close to 20 crore by August 2021 or thereabouts. That leaves five months till December to complete the task of giving around 100 crore doses. There are reports that are not so confident; they contend that the task may actually take over two or even three years. In any case, assuming the exercise ends by December, a population of 94-odd crore will receive one effective dose or half of them will get two doses each, as the case may be. The result is there for all to see: It is simply impossible to achieve herd immunity before the end of 2021 unless 188 crore doses are available at once and an unprecedented, organised, synchronised, national campaign is undertaken to complete the process in five months. The question to the Centre goes abegging: Where is the plan?

Hogwash

Amid the raging contagion, a handful of politicians are providing comic relief to citizens, albeit unintentionally

Chandler Muriel Bing of the *Friends* fame said in the series: "I'm not great at advice. But can I interest you in a sarcastic comment?" Something similar in the nature of an emotion has ostensibly stirred Uttarakhand's former Chief Minister Trivendra Singh Rawat. The BJP leader, no less adept at stoking controversy as the incumbent Tirath Singh Rawat, has now taken to bat for the accursed Novel Coronavirus because, as it would appear, everybody is only hurling doses of vituperation at the poor pathogen. Choosing to look at it "from a philosophical angle", Rawat said that the virus is a "living organism which has a right to live". In the same vein, he warned the human species that despite considering ourselves to be the most intelligent on the planet and out to eliminate the virus, the killer is sensible enough to keep mutating itself. Slipping into some sense midway, he also clarified, to his credit, that people need to outpace the virus to stay safe. So far, so good! By that logic, do we need to go and offer ourselves to a tiger just because it has a life and the right to life? If the virus has the right to live, as an organism, all of us don't?

And, as most of us would agree, the new-age politicians are nothing less than pernicious viruses. But do they really need to open their trap and prove it? As the old saying goes, it is better to keep your mouth shut and let the world think that you are a fool, rather than open it and remove all doubts! The unusual observation, as must have been the desired outcome of the former Chief Minister, went viral at a time when the entire country is battling a killer second wave of COVID-19. A Twitter user sarcastically said: "This virus organism should be given shelter in the Central Vista." Another said: "Shri Rawat should invite the virus home, feed it well and stay with it for at least 14 days." All done and dusted, the statement just goes on to show how devoid of empathy are our political leaders who, in spite of seeing the mass scale of devastation in terms of life, employment and business opportunities, can't keep themselves away from courting a headline-worth-of controversy. As Chandler said, one more time: "Handle? I can handle it. Handle is my middle name. Well, actually it's the middle part of my first name."

The endgame in Afghanistan

There's a host of implications emanating from the withdrawal of American troops from that country, and India needs to watch out

The latest available estimates of the number of people, mostly school-girls, killed in three blasts in front of a co-educational school in Kabul on May 8, vary from at least 60 (*BBC*) to over 85 (*CNN*). The figure may rise further by the time this column is published. The diabolical intent to kill as many as possible is clear from the fact that a car bomb was first detonated and two improvised explosive devices followed as the girls rushed out of the school in panic.

Two questions arise. Who is behind this ghastly crime? What are its implications? As to the first, no one has claimed responsibility. The Afghan Government has blamed the Taliban, which has denied involvement and condemned the strike. This leaves one with the Islamic State, which has staged terror attack in Kabul and elsewhere in Afghanistan and which retains its ability to strike despite losing a great deal of territory over the months.

The Taliban are the more likely culprits. There is no reason why one should believe them, particularly when the May 8 blasts have to be seen in the background of the surge in their attacks and terror strikes following President Joe Biden's announcement that all American troops will leave Afghanistan by September 11. They know they will not win an election and they do not believe in democracy. They want to control Afghanistan by force and establish the *Sharia* rule.

Will they be able to do it? What will happen if they do? The answer to the first would depend on the fighting qualities of the Afghan National Security and Defence Forces (ANDSF), the support they continue to receive from the US and its NATO allies. As to the first, despite serious problems of desertion and unwillingness to enlist, the Afghan National Army (ANA), the land warfare arm of the ANDSF, has emerged a battle-hardened force capable of confronting the Taliban and

other terrorist organisations it faces. Its commando and special forces units have been particularly successful.

Against this, the harsh fact is that the Taliban have expanded their control over huge tracts of Afghanistan's countryside and some cities, besides inflicting a number of heavy defeats on the Afghan troops. At least some of the reverses the latter suffered the beginning of 2020 are attributable to the Trump administration's atrocious policies. These included asking the Government forces early in 2020 to go on the defensive in the interest of its peace negotiations with the Taliban, and arm-twisting it into agreeing to the Taliban demand of releasing 5,000 of their fighters in Afghan jails as a precondition for talks. Many of the released fighters have gone back to combat despite the Taliban's promise that they would not do so.

The Taliban, however, began gaining ground even before the Trump Administration's policies and pressures hampered the ANDSF's operations. Also, while the capabilities of the Afghan troops have improved, a big question mark hangs

AS THE DIVERSION TO KANDAHAR OF THE INDIAN AIRLINES HIJACKED FLIGHT IC-814 IN DECEMBER 1999 SHOWED, THE TALIBAN WERE ACTIVELY PROMOTING TERRORISM AGAINST IT BY JAISH-E-MOHAMMED AND LASHKAR-E-TAIBA. DO WE HAVE A COHERENT POLICY TO MEET THE CHALLENGE?

against the future availability of effective air support, which has played an important role in many of the ANA's successful operations. According to one estimate, 80 to 90 per cent of the air support to it is now provided by the fledgling Afghan Air Force (AAF).

The AAF, however, has been supported by the massive air power of the US. Also, international contractors, now doing the bulk of the maintenance work on its planes and helicopters, will depart with the American troops. This will seriously affect its operational capabilities. This underlines the importance of continued American aid. On July 7, 2012, Hillary Clinton, then US Secretary of State, announced in Kabul that President Obama had designated Afghanistan as a major non-NATO ally of the US. The questions are: How much and of what kind?

Apart from military hardware, there is a need for funds. Countering a blend of insurgency and terrorism is a very expressive business. The US has provided over \$86 billion as security assistance to Afghanistan between financial years 2002 and 2019. Since 2014, it has been providing between five and six

billion dollars per year to fund the ANDSF. How much and what form of assistance will Washington provide Afghanistan after the withdrawal of its troops?

Clearly, the military outcome in Afghanistan hangs in the balance. So does the fate of Afghanistan. All indications are that the Taliban have every intention to re-impose the medieval, authoritarian theocratic system that had reduced Afghanistan to a cleric-administered prison. As Ahmed Rashid wrote in *Taliban: Islam, Oil and the New Great Game in Central Asia*, edicts of the Taliban's Department of Promotion of Virtue and Prevention of Vice "had changed the lifestyles of Kabul's once easy-going population and forced Afghan women to disappear from public view".

India needs to watch out. As the diversion to Kandahar of the Indian Airlines hijacked Flight IC-814 in December 1999 showed, the Taliban were actively promoting terrorism against it by Jaish-e-Mohammed and Lashkar-e-Taiba. Do we have a coherent policy to meet the challenge?

(The author is Consulting Editor, *The Pioneer*. The views expressed are personal.)

LETTERS TO THE EDITOR

THE OXYGEN CRISIS IN GOA

Sir — An oxygen crisis in the Goa Medical College and Hospital (GMCH), the State's largest COVID facility, has led to the death of over 74 patients in the span of four days due to daily disruptions in oxygen supply. Just two days after 26 patients lost their lives at the GMCH within hours, the State Government told the Bombay High Court Bench in Goa that 15 more patients had succumbed.

The Bench was informed of 13 more deaths from the same hospital. The spate of deaths due to the lack of oxygen is causing a serious concern for the COVID-19 patients in Goa's hospitals. However, the Pramod Sawant Government and the hospital both told the court that all the deaths could not be attributed to the disruption in oxygen supply.

The issue relating to oxygen shortage is so severe that the court had ordered the State Government to drop everything and ensure that there are no deaths for "at least one night". The relatives of the patients did raise an alarm after the oxygen pressure began to drop overnight. But it was several hours before anyone was able to fix the problem and ensure a steady supply of oxygen. It was a simple case of utter negligence on the part of the health department and the Government.

BE CAUTIOUS, BUT NOT SCARED

Sir — The recrudescence of COVID-19 in the form of the second wave has claimed many lives since mid-March 2021. Cold, cough, breathlessness and fever have been experienced from time immemorial. Cold triggers fever and cough triggers breathlessness if curative measures are not taken in time; it is a known fact.

Fever appears in many forms like flu, malaria, typhoid, encephalitis (brain fever), monkey fever, and so on. The said fevers have not given an undertaking that they would not appear since Corona has been appearing on a grand scale. But since Corona made an appearance, we have hardly heard of the fevers experienced ear-

Open up the barred humanity

The suggestion of the Supreme Court about placing convicts under house arrest is worth considering. If one may add, the release of political prisoners on bail or parole too merits consideration. Political and civil rights activists are often incarcerated for speaking out the truth to power or rebelling against the "system". Dissent is now a crime punishable with imprisonment!

It is a matter of immense significance in terms of human rights that the undertrials make up nearly 70 per cent of the total inmates in Indian prisons. Many of them do not have access to legal counsel or remedy. Pre-trial imprisonment in itself is punishment. As they say, the process

lier. If a patient with cold, cough or fever approaches a doctor, they do not treat the patient without subjecting her/him to a COVID test. Have all other fevers lost ground to Corona? If all other fevers are treated like COVID, the fatalities are bound to occur due to wrong diagnosis and wrong administration of medicines.

Whether malaria, typhoid and flu have not at all revisited after Corona first broke out in March 2020, the other normal ailments are still very much a reality. This aspect must be looked into by the Government, scientists and doctors.

KV Seetharamaiah | Hassan

PAY ATTENTION TO RURAL INDIA, TOO

Sir — This refers to the news report, *'Dozens of bodies found buried in sand near Ganga in Unnao'*, May 14. When COVID-19 first hit India, the biggest fear among both the

is the punishment in India. It is a logical premise that the undertrials could be convicted or acquitted. Eventually, be it conviction or acquittal, they cannot be kept in a place where they run greater risk of contracting Coronavirus. They must be spared the 'capital punishment' by the virus!

It is common knowledge that many of India's prisons are congested and have more inmates than they can accommodate and, as such, they remain the hotspots for the contagion. Needless to say, the prison conditions are conducive to the spread of the contagion. When prisons are crammed full of inmates, it is next to impossible to maintain physical distancing. The incorporation of decongesting prisons into the pandemic response is a much-needed measure. Prisoners also share the right to health with those outside prisons for anyone to be dismissive of their greater in-house susceptibility to contract the virus. The non-violent and low-risk offenders pose no significant risk to public safety. Releasing them is a containment measure that has a health benefit by reducing the risk of transmission and an uplifting humanitarian gesture.

G David Milton | Tamil Nadu

policymakers and public experts was that the pandemic would travel to India's Hindi heartland — primarily across the rural belt of Uttar Pradesh (UP) and Bihar.

Given the size of the two States, the density of population, the abysmal healthcare infrastructure and the manner in which the virus could quickly transmit in these regions, this fear was legitimate. There was never any cogent explanation as to why this was the case, but this did not deter speculative, and clearly misplaced, theories about the innate immunity of those in rural India.

The tragic sight of the bodies floating in the Ganga confirms that the numbers of reported COVID fatalities are much higher than the official figures.

FIRST COLUMN

HEALTHCARE POLICY NEEDS A BOOSTER

ISHANEE SHARMA

Until the untoward dissemination of Coronavirus in India, the economic prosperity and healthcare developments were often considered complementary to each other. During the COVID pandemic, empirical corroborations show the gap between the two has not narrowed down, resulting in lopsided development. Every year, the Union and State Governments while appropriating their annual finances accord utmost priority toward superficial sectors or ancilliary enterprises ie insurance sector and proffer marginal policy attention to our medical and health care sectors. It is appalling that since Independence, the percentage-based monetary allocation in healthcare development had never exceeded two per cent of the overall financial allocations. Consequently, it results in a displeasing growth of certain sectors accompanied by social disparity caused by the whopping expenses incurred by the majority of our population in meeting the basic medicinal requirements at private hospitals. This disparity makes the downtrodden masses vulnerable in the spheres of human resource development, in seeking adequate health care benefits from the State. Ergo, the plunder bund-like insurance companies exploit them at their own whims and fancies, which in turn eclipses the

economic development and ultimately takes lives of thousands of people in our country due to inadequate healthcare infrastructure. This pandemic has inadvertently helped our economy in highlighting the existing infrastructure lacunae in the medical and healthcare industry. Due to the glaring deficiency of an adequate infrastructure and sufficient human resource in the public hospitals, the most sought-after health care schemes such as Ayushman Bharat have also failed to meet the legitimate medicinal demands of the masses during the times of the pandemic. A report published in a leading daily newspaper highlights that barely 10 per cent of the Ayushman Bharat cardholders could take the benefit of this centrally sponsored scheme.

We have witnessed that ICUs, ventilators, availability of RT-PCR facilities, oxygen cylinders, cardiac monitors for operation theatres, electrocardiogram machines, adequacy of beds available, vaccines, ancillary medicines and steroids, vertical transport facilities, staff and most importantly sufficient number of doctors were also inadequate in most of the healthcare institutions. Scarcity of testing facilities and vaccines erodes the utility of rural and government hospitals and bulldozes the poor patients to hasten to distant places for availing urgent treatment. It can be said that the genesis of this problem accentuated in the year 1991 when our country adopted the LPG (Liberalisation, Privatisation, Globalisation) policy. Since then the government allowed the private sector to take a lead in the health care industry and thereby the state in a gradual manner withdrew from its responsibilities for providing adequate health care means to the masses. This stunted public sector spending on medical services, resulting in excessive reliance upon the private sector in seeking health care benefits. The government needs to realize the fact that the private sector operates in a profit-centric manner and they will not take necessary initiatives to reach the masses at the grass root level. Presently in the rural areas, there are only 0.6 doctors per 1,000 population. A pure mercenary approach in the medicinal industry and inception of users' charges in healthcare sectors have placed the people at a disadvantage. Equilibrium in appropriating budgetary allocation between other sectors of our economy and the healthcare sector is a very crucial policy decision, which our country urgently needs to address for saving the lives of thousands of people who are dying due to the pandemic. Earmarking adequate precedence to the health care sector has also become non-negotiable in the present scenario.

Time to embrace the biological revolution

It is an inevitable, irreversible fact. Also, it hides within itself the potential of biological research and its unique opportunities for humanity

While ushering in the era of the biological revolution one cannot fail to notice that one of the biggest ironies in biology is that microbes, which are the oldest self-replicating organisms on earth and which were among the last to be discovered, have largely been ignored. This is evident from the present crisis of the Coronavirus, which has devastated half of the world and has brought it almost to the brink of disaster, partly because of the late discovery of microbes and techniques of genome sequencing.

The lack of attention to micro-organisms is largely due to our observational bias. We tend to ignore what we cannot see. This predisposition allowed us to make great progress in astronomy observing visible objects billions of miles away from us, long before we could appreciate the role of bacteria and viruses on this planet. Life on earth is much more than there are plants. Our inherent knowledge gaps about viruses & microorganisms have brought us to the present-day crisis.

Hence, biological revolution is inevitable. The following facts expose us to the ongoing revolutionary and unprecedented biological research and its unique opportunities.

Microbes have evolved into a complex nanomachine even capable of splitting water via energy from the sun, billions of years ahead, than terrestrial plants. There is only one existing prokaryotic type of bacteria capable of producing oxygen without the sun — the cyano bacteria. We have yet to discover its mechanism.

If one happens to look to the list of noble laureates in the last decade one cannot fail to notice that most of the noble prizes even for physics and chemistry have gone for their study on solving the biological riddle. Several aspects of the mystery of biology are still to be unravelled. Dr Siddhartha Mukherjee of New York University observed that though cancer research started earlier than space travel, cancer is still an unconquerable 'emperor of maladies'. It is no surprise that MIT, an institution known for engineering and technology has changed its focus to molecular biology and some of its faculty members have even won noble prizes for their research on cell biology.

Dr Bruce H Lipton of Wisconsin University and subsequently at Stanford University, USA, in his ground-breaking work, has discovered how cell mechanisms receive and process information in the cell through the critical cell membrane. The cell membrane through its receptor and integral protein that serves as an antenna sends signals from the outside environment. The implication of this research will radically change our understanding of life. It shows that genes and DNA are controlled by signals from outside through the cell membrane. This research in cell biology and quantum physics is being hailed as a breakthrough showing that behaviour can be

WE ALL NEED FRESH WATER TO SURVIVE BUT IT IS ONLY FIVE PER CENT OF THE TOTAL WATER VOLUME OF THE EARTH. MOST OF IT IS IN ICE SHEETS AND THE SOIL. HENCE, WATER PURIFICATION IS CRITICAL FOR HUMAN SURVIVAL. THIS DISCOVERY WILL USE CELL PROTEINS OF THE CELL MEMBRANE TO PURIFY WATER

The writer is an advisor to Amity School of Natural Resources and Sustainable Development, Uttar Pradesh. The views expressed are personal.

changed as we train our thinking. Thoughts and minds' energy directly influence how the physical brain controls the body's physiology. Mental 'energy' can activate or inhibit the cells' function to produce proteins.

Biologists in collaboration with biochemists, biophysicists are working hard to cutting-edge research on most of the areas of the burning issues to meet the demands of the growing population that consumes more and more transportable forms of stored energy. Scientists are turning to alternative sources of renewable energy like solar, hydro, wind and tide. But our energy needs are still not being met because of their intermittent supply and time difference between their production and demand. The alternative renewable energies are getting cheaper, better all the time. However, we are yet to find a way to store these energies ineffective, cheap, reliable ways, without much creation of waste.

If biologists can devise a battery that allows overcoming intermittency problems inherent in solar, wind, and other renewable sources, we could use clean and abundant sources to meet all our energy needs.

The battery converts chemical energy to electrical energy by moving electrons from one metal to another. Electrons are tiny negatively charged particles. The copper-zinc plates form positive and neg-

ative poles. It conducts the electric current. It can go as long as all the electrons get transferred. Thus, a battery is an energy transportation device. When the battery is discharged, we use electricity to charge.

Dr Angela Belcher, materials scientist at MIT, is evolving viruses into variants that could organize non-biological materials such as gallium arsenide and silicon for semiconductors. Her experiment gave her confidence to build new tools to build batteries. She found that metals and metal oxides worked particularly well. Viruses do not have cell walls or any structural elements. It is a protein capsule with DNA / RNA. She found that viruses-building elements could be used to make electrodes that can open a door to clean and efficient, new way for making batteries. Her next step is a virus-based state of art battery, but could this battery take the form of a dashboard, seat cover, door panel? Nobody knows.

Until recently, it was undisputed that cell membrane itself is a medium for exchange of water from cells and outside. Dr Peter Agre, molecular biologist at John Hopkin's Institute, in 1980 while purifying Rh protein from red blood cell membranes to identify it made a discovery that the membrane has Rh protein that works as a gate and alters a particular substance vehicle with a pass to allow entry into the cell. These proteins are known as aquaporins.

Starting with a large volume of the red blood cells, he separated the cell membrane from the rest of its content. Next, he carefully isolated Rh protein from other present proteins. We all need fresh water to survive but it is only five per cent of the total water volume of the earth. Most of it is in ice sheets and the soil.

Hence, water purification is critical for human survival. This discovery will use cell proteins of the cell membrane to purify water. We now know the whole family of aquaporin found in virtually all organisms on earth. A particular amino acid occupies a particular pattern of location and pattern.

Contrary to the theory by a famous economist, Thomas Robert Malthus, the world would be engulfed by war, famine and pestilence, but the convergence of biology and engineering is giving us great hope that we can avoid the gloomy future. How to bring together researchers from the fields of science for a collaborative effort in bioengineering by encouraging national investment in fundamental research that motivates scientists to work in interdisciplinary areas.

For all this to happen we must have convergence-minded policies and international collaboration in the field of biology, where scientists and technologists can work on a platform to defer the sixth mass extinction of Holocene or Anthropocene.

POINTCOUNTERPOINT

AS PER TV REPORTS, MY NUMBER WAS FALSELY GIVEN AS BELONGING TO SOME AMJAD KHAN, OSTENSIBLY TO LINK ME WITH DRUG TRAFFICKING. — MAHARASHTRA CONGRESS PRESIDENT NANA PATOLE

ONE PARTY SHOULD NOT TAP THE PHONES OF THE OTHER PARTY OR LEADERS. THE MATTER SHOULD BE INVESTIGATED BY A COMMITTEE OF RETIRED JUDGES. — BJP LEADER SUDHIR MUNGANTIWAR

The nation needs to come up with a transparent vaccine policy

We, as one nation, one people, need to come together. If all of us don't care for each other in this hour of crisis, who will?

KUMARDEEP BANERJEE

(The writer is a policy analyst. The views expressed are personal.)

experts leading the fight against pandemic. It may not be an exaggeration if one assumes India's second wave COVID battle is being fought in courts, national and local administrative offices. Each one in their desperation or compulsion to make the right announcement is giving a siloed decision, often overreaching each other's territory, therefore creating an unwarranted bottleneck at a critical time. Examples have been quoted of differences between Delhi and Mumbai and will continue to be a case study for any future pandemic management, but what it showed was any governance has to start right at the colony cluster level. The biggest bunch of caregivers/administrators/counsellors are right in the neighborhood and therefore healthcare and civic infrastructure has to be upgraded

at the mohalla level. Tossing a few social media posts with glossy pictures of infrastructure fail to impress when a person urgently needs to breathe. Running to courts to intervene is allowing the judiciary to walk into executive's core responsibilities while presenting a united face to any calamity/war or crisis is one of the basic rules of public administration. One does not start to

gain brownie points before the unconnected and potentially dangerous parties during a crisis situation. It is shocking to see central, state, local administrations if not judiciary, creating opposing guidelines for Covid management or trying to control surge with delays.

Second, it is important for those at the top to understand that the pandemic is a blunt reminder of the gross neglect

of rationale domain experts in policy making and governance. India still is governed by bureaucrats, who by training are generalists with no special domain knowledge for handling new world challenges and therefore solutions. Political leaders of any hue would always cater to their constituencies and come up with the most populist schemes, which may or may not impact lives and livelihoods in the long term. An example, free food distribution, while at a humanitarian level it is a noble move yet ensuring a continuous supply of government subsidized ration is the only long-term solution. If the 'one nation one ration card' had been operationalised in major parts of India, along with various schemes for migrants and those out of the social net, tons of public sector human resources such as

police could have been better utilized for enforcing other Covid appropriate protocols. If a few scientists, epidemiologists, doctors had been permanently co opted in a steering committee for Covid management in national and State governments (if not local) the permanent tag of India facing worst Covid wave in the world could have been avoided.

Finally, the truth no matter however harsh or shaming if told honestly and with compassion, always benefits the orator. The government has been avoiding queries on vaccination supply and distribution. All domain experts have been suggesting vaccination being the only long-term solution for protecting a large chunk of population and avoiding mass graves. The government had nearly eight months to be prepared for the current onslaught and has

been blessed with one of the largest vaccine manufacturing sites in the world, along with a home grown vaccine. It therefore cuts a very sorry figure when despite all the wealth and a team to push India to the next lever of growth, only about 10 per cent of the population has been vaccinated while a sizeable chunk of India, even in most impacted districts of Delhi and Mumbai, are battling it for *qab* in the arm. The current vaccine distribution policy of the government is opaque and needs clarity along with an almost daily update on the pipeline for next few months. Estimates suggest nearly one per cent of the India population would be willing to pay for vaccines. Government must prioritise COVID3 management by securing nearly 1.5 billion vaccines for India in the next few months.

Oli sworn in as Nepal Prime Minister again

PTI ■ KATHMANDU

KP Sharma Oli, heading a minority Government, was sworn in as Nepal's Prime Minister on Friday, four days after the embattled leader lost a crucial vote of confidence in Parliament.

President Bidya Devi Bhandari administered the oath of office and secrecy to Oli as the prime minister at a scaled-down ceremony at Shital Niwas, the presidential palace.

The 69-year-old Chairman of the Communist Party of Nepal - (Unified Marxist-Leninist) was reappointed as prime minister by the president in his capacity as leader of the largest political party in Nepal's House of Representatives.

Oli will head a minority government as he does not enjoy a majority in Parliament after losing the vote of confidence on Monday. He was reappointed to the post on Thursday night as the Opposition parties failed to secure majority seats in Parliament to form a new government.

Oli will now have to take a vote of confidence at the House within 30 days, failing which, an attempt to form a government under Article 76 (5) of the Constitution would be initiated by the President.

The ministers of Oli's Cabinet were also sworn in during the ceremony.

During the oath-taking ceremony, Prime Minister Oli and Deputy Prime Minister Ishwar Pokharel did not mention the word God though President Bhandari had mentioned it.

"I will take oath in the name of the country and the people," Oli said, while President Bhandari had mentioned "God, country and the people."

All the Ministers and ministers of state from the old Cabinet have been included in the new Cabinet.

Pradeep Gyawali has been reappointed as Foreign Minister while Ram Bahadur Thapa and Bishnu Poudyal were appointed as ministers for Home and Finance. The oath-taking ceremony was kept brief keeping in mind the raging

COVID-19 pandemic in the country.

Vice President Nanda Bahadur Pun and Supreme Court Chief Justice Cholendra Shumsher Rana were among the distinguished personalities who attended the ceremony.

There are 22 ministers and three ministers of state in the new Cabinet.

Oli previously served as prime minister from October 11, 2015 to August 3, 2016 and again from February 15, 2018 to May 13, 2021.

Earlier, the President had asked the Opposition parties to come up with the support of majority lawmakers to form a new government by 9 pm on Thursday after Oli lost the vote of confidence in the House on Monday.

Palestinians flee as Israeli artillery pounds Gaza

Gaza Health Ministry says toll from fighting has risen to 119, including 31 kids & 19 women

AP ■ GAZA CITY, GAZA STRIP

Palestinians grabbed their children and belongings and fled neighborhoods on the outskirts of Gaza City on Friday as Israel unleashed a heavy barrage of tank fire and airstrikes, killing a family of 6 in their home. Israel said it was clearing a network of militant tunnels ahead of a possible ground invasion.

Israel has massed troops along the border and called up 9,000 reservists as fighting intensifies with the Islamic militant group Hamas, which controls the Gaza Strip. Palestinian militants have fired some 1,800 rockets, and the Israeli military has launched more than 600 airstrikes, toppling at least three high-rise apartment buildings, and has shelled some areas with tanks stationed near the frontier.

As Israel and Hamas plunged closer to all-out war despite international efforts at a cease-fire, communal violence in Israel erupted for a fourth night. Jewish and Arab mobs clashed in the flashpoint town of Lod, even after Israel dispatched additional security forces.

The Gaza Health Ministry says the toll from the fighting has risen to 119 killed, including 31 children and 19 women, with 830 wounded. The Hamas and Islamic Jihad militant groups have confirmed 20 deaths in their ranks, though Israel says that number is much higher. Seven people have been killed in Israel, including a 6-year-old boy and a soldier.

Before dawn Friday, Israeli tanks and warplanes carried

A Palestinian relative mourns over the bodies of four young brothers from the Tanani family who were found under the rubble of a destroyed house following Israeli airstrikes in Beit Lahia, northern Gaza Strip on Friday

AP

out an intense barrage on the northern end of the Gaza Strip. In the darkness, Houda Ouda and her extended family ran frantically inside their home in the town of Beit Hanoun, trying to find shelter as the earth shook for two and half hours, Ouda recalled.

"We even did not dare to look from the window to know what is being hit," she said. When daylight came, she saw the swath of destruction outside: streets cratered, buildings crushed, their facades torn off, an olive tree burned bare, dust and powdered concrete covering everything.

Rafat Tanani, his pregnant

wife and four children, aged 7 and under, were killed after an Israeli warplane reduced their four-story apartment building to rubble in the neighboring town of Beit Lahia, residents said. Four strikes hit the building at 11 p.m., just before the family was going to sleep, Rafat's brother Fadi said. The building's owner and his wife were also killed.

Merkel slams anti-Israel protests

AP ■ BERLIN

Chancellor Angela Merkel's spokesman says Germany won't tolerate anti-Semitic demonstrations amid tensions in the Middle East.

Anti-Israel protests in several cities this week have drawn concern and condemnation, particularly a protest outside a synagogue in Gelsenkirchen.

A video showed dozens of protesters waving Palestinian and Turkish flags and yelling epithets about Jews.

Merkel spokesman Steffen Seibert said Friday that "anyone who uses such protests to scream their hatred of Jews is abusing the right to demonstrate."

He added that "our democracy will not tolerate anti-Semitic demonstrations."

Palestinian attacker killed at post: Israel

AP ■ JERUSALEM

Israel's Army says a soldier has shot and killed a Palestinian who tried to ram his car into a military post in the occupied West Bank, then got out and attempted to stab the soldier.

The incident took place on Friday north of the city of Ramallah in the occupied West Bank. The Palestinian health ministry confirmed the death, but no other details were immediately available.

Rights groups have complained about past shootings of Palestinians by the Israeli military under questionable circumstances.

Seven Palestinians dead in West Bank amid violence

Jerusalem: The number of Palestinians killed in the West Bank has risen to seven. The Israeli army says one was killed after attempting to stab a soldier. Palestinian health officials confirmed that death and said

six other Palestinians were killed by Israeli army fire in the occupied West Bank. The health ministry said five were killed in stone-throwing clashes with Israeli forces in several locations.

AP

Thousands of B'deshi Muslims rally against Israel

AP ■ DHAKA

Thousands of Muslims led by activists from an Islamic political party demonstrated in Bangladesh's capital on Friday to denounce attacks by Israel against Palestinians.

After the end of Eid al-Fitr prayers at Dhaka's main Baitul Mokarram Mosque, activists from the Islamic Andolan Bangladesh, or Islamic Movement Bangladesh, began protesting and were joined by thousands of others.

Muslim-majority Bangladesh celebrated the key festival of Eid al-Fitr in a subdued manner after the government urged people to avoid large gatherings. Authorities

arranged prayers in phases at the Baitul Mokarram Mosque, where devotees maintained distancing to avoid spreading the coronavirus.

Afterward, protesters crowded together outside, carrying signs reading "Boycott terrorist state Israel" and chanting "Down with Israel."

The current eruption of violence between Israelis and Palestinians began a month ago in Jerusalem. Israel regards all of Jerusalem as its capital, while the Palestinians want east Jerusalem, which includes sites sacred to Jews, Christians and Muslims, to be the capital of a future Palestinian state.

Afghan police say Kabul mosque bombing kills 12

AP ■ KABUL

A bomb ripped through a mosque in northern Kabul during Friday prayers, killing 12 worshippers, and wounding 15, Afghan police said.

No one immediately claimed responsibility for the bombing, the latest in a surge in violence as U.S. and NATO troops have begun their final withdrawal from the country, after 20 years of war.

According to Afghan police spokesman, Ferdaws Faramarz, the bomb exploded as prayers had begun. The mosque's imam, Mofiti Noman, was among the dead, the spokesman said and added that the initial police investigation suggests the imam may have been the target.

Taliban spokesman Zabihullah Mujahid denied any insurgent connection to the mosque attack, condemning it and accusing Afghanistan's intelligence agency of being behind the explosion.

Both the Taliban and government routinely blame each other for attacks. The attackers are rarely identified, and the public is seldom informed of the results of investigations into the many attacks in the capital.

One worshipper, Muhibullah Sahebzada, said he had just stepped into the building when the explosion went off. Stunned, he heard the sound of screams, including those of children, as smoke

The mother of the mosque's imam, Mofiti Noman, cries inside a car near the mosque after a bomb explosion in Shakar Dara district of Kabul on Friday

AP

filled the mosque.

Sahebzada said he saw several bodies on the floor, and at least one child was among the wounded. It appeared the explosive device had been hidden inside the pulpit at the front of the mosque, he added.

"I was afraid of a second explosion so I came immediately to my home" he said.

An image circulating on social media shows three bodies lying on the floor of the mosque.

The explosion comes on the second day of a three-day cease-fire announced by the Taliban for the Muslim holiday this week of Eid al-Fitr, which follows the fasting month of Ramadan. The Afghan government has also said it would abide by a truce during the hol-

iday.

So far, many of the attacks in Kabul have been claimed by the Islamic State group's local affiliate, though the Taliban and government routinely trade blame.

Last week, a powerful car bombing attack in Kabul killed over 90 people, many of them students leaving a girls' school. The Taliban denied involvement and condemned the attack.

Earlier this week, U.S. troops left southern Kandahar Air Base, where some NATO forces still remain. At the war's peak, more than 30,000 U.S. troops were stationed in Kandahar, the Taliban heartland. The base in Kandahar was the second largest U.S. base in Afghanistan, after Bagram north of Kabul.

Myanmar frees Japanese journalist as gesture to Tokyo

Tokyo: An arrested Japanese reporter returned home Friday after being released by Myanmar's ruling junta in what it called a gesture of friendship to Japan.

Japanese Foreign Minister Toshimitsu Motegi said Yuki Kigazumi was released after efforts by Japanese diplomats and others. The reporter boarded a plane at Yangon's airport and landed in Japan on Friday night.

Kitazumi, a freelance journalist and former reporter for Japan's Nikkei business news, said in brief comments at the airport that he learned of his release the night before and was told to pack his bag in 10 minutes.

House GOP elects Trump defender Elise Stefanik to No. 3 post

AP ■ WASHINGTON

Republicans vaulted Rep. Elise Stefanik into the ranks of House leadership Friday, electing an ardent Donald Trump defender in hopes of calming their searing civil war over the deposed Rep. Liz Cheney's unrelenting combat with the former president.

Stefanik, R-N.Y., a moderate turned Trump loyalist who's given voice to many of his false claims about election fraud, was elected as expected to the No. 3 post that Cheney, R-Wyo., held for over two years.

Backed by Trump and the House's top two Republicans, Stefanik defeated challenger Rep. Chip Roy, R-Texas, by

Rep. Elise Stefanik, R-N.Y., arrives as House GOP members hold an election for a new chair of the House Republican Conference to replace Rep. Liz Cheney, R-Wyo. at the Capitol in Washington on Friday

AP

134-46 in a secret ballot vote conducted behind closed doors. A member of the conservative House Freedom Caucus, Roy was a prohibitive

long shot whose candidacy seemed a signal to GOP leaders that hard-right Republicans expect a robust voice moving forward.

Irish health system targeted in 'serious' ransomware attack

AP ■ LONDON

Ireland's health service shut down its IT systems on Friday after being targeted in a ransomware attack by what it called "international criminals."

Appointments and elective surgeries were canceled at several hospitals and Deputy Prime Minister Leo Varadkar said the disruption could last for days.

"There's lots we don't know but it appears to be a ransomware attack by international criminals," Varadkar said. "The problem could run through the weekend and into next week, unfortunately."

Ransomware attacks are typically carried out by criminal hackers who scramble data, paralyzing victims' networks, and demand a large payment to decrypt it. Varadkar called the attack "very serious."

"It's coming at a time when

the health service is extremely busy doing lots of other things," he said. "It's going to be a very difficult time for the health service."

Health Service Executive CEO Paul Reid told broadcaster RTE that health bosses had "taken a precautionary measure to shut down a lot of our major systems to protect them."

"We are at the very early stages of fully understanding the threats, the impact and trying to contain it," he said.

The health service said appointments for coronavirus vaccinations were not affected. Varadkar said emergency services, ambulance services, GP systems and pharmacy systems also were unaffected, but said there would be "major problems" for radiology services, radiation oncology, elective surgeries and obstetrics and gynaecology appointments.

UK, US scientists call for fuller probe into Covid Wuhan lab leak theory

London: A group of leading UK and US scientists, including Indian-origin Cambridge University immunology and infectious disease expert Ravindra Gupta, on Friday called for more investigation to determine the origin of the Covid-19 pandemic, including the theory of an accidental release from a lab in the central Chinese city of Wuhan.

In a letter published in the journal 'Science', the experts from world leading universities such as Harvard, Stanford and MIT said knowing how Covid-19 emerged is critical for informing global strategies to mitigate the risk of future outbreaks.

They caution that hypotheses about both natural and laboratory spillovers must be taken seriously until there is sufficient data.

Fully vaccinated can drop the masks, skip social distancing

AP ■ WASHINGTON

In a major step toward returning to pre-pandemic life, the Centers for Disease Control and Prevention has eased mask-wearing guidance for fully vaccinated people, allowing them to stop wearing masks outdoors in crowds and in most indoor settings.

"Today is a great day for America," President Joe Biden said Thursday during a Rose Garden address heralding the new guidance, an event where he and his staff went without masks.

Hours earlier in the Oval Office, where Biden was meeting with vaccinated Republican lawmakers, he led the group in removing their masks when the guidance was announced.

Biden to meet DACA recipients in immigration overhaul push

AP ■ WASHINGTON

As a candidate, President Joe Biden promised to protect those often described as "dreamers," brought to the US illegally as children, and their families by reinstating an Obama-era policy that protected them from deportation.

Biden is scheduled to meet Friday with six immigrants who benefited from the programme.

The Oval Office meeting comes as Biden looks to press Congress to pass legislation codifying the Deferred Action for Childhood Arrivals programme that then-President Barack Obama instituted by executive action in 2012, providing limited protections for immigrants brought to the US illegally as children.

Hopeful for early call on TRIPS waiver: Com Secy

PTI ■ NEW DELHI

India on Friday expressed hope for an early decision in the WTO on a proposal of India and South Africa for a temporary waiver of certain intellectual property rights provisions in the TRIPS agreement to deal with the Covid-19 pandemic.

In October 2020, India and South Africa submitted a proposal suggesting a waiver for all World Trade Organization (WTO) members on the implementation of certain provisions of the TRIPS Agreement in relation to the prevention, containment or treatment of Covid-19.

The agreement on Trade-Related Aspects of Intellectual Property Rights or TRIPS came

into effect in January 1995. It is a multilateral agreement on intellectual property (IP) rights such as copyright, industrial designs, patents and protection of undisclosed information or trade secrets.

Commerce Secretary Anup Wadhawan said the proposal had received support from several countries.

“I am hopeful that in an early timeframe, some decision will be reached at the WTO...I am hopeful that an early outcome will be achieved on this,” he told reporters.

The move would help in scaling up the production of vaccines and other essential products to deal with the coronavirus, he added.

Exports jump to USD 30.63 bn in April; trade deficit at USD 15.1 bn

PTI ■ NEW DELHI

India's exports in April jumped nearly three-fold to USD 30.63 billion from USD 10.36 billion in the same month last year, according to government data released on Friday.

Imports too rose to USD 45.72 billion last month as against USD 17.12 billion in April 2020, the data showed.

Trade deficit widened to USD 15.10 billion as against USD 6.76 billion in April 2020.

Exports in April last year had plunged by a record 60.28 per cent due to the Covid-19 pandemic induced lockdown.

In March this year, exports grew by 60.29 per cent to USD 34.45 billion.

Due to the low base effect, exports in April 2021 recorded a growth rate of 195.72 per

cent.

Oil imports stood at USD 10.8 billion as compared to USD 4.66 billion in the corresponding month last year.

Major export commodities which have recorded positive

growth in April include gems and jewellery, jute, carpet, handicrafts, leather, electronic goods, oil meals, cashew, engineering, petroleum products, marine products and chemicals.

Benchmarks end flat in see-saw trade; log weekly losses

PTI ■ MUMBAI

The BSE Sensex eked out marginal gains on Friday after two sessions of deep declines as investors scooped up Asian Paints, RIL and FMCG stocks amid a rebounding trend in overseas markets.

A recovering rupee also propped up the market, though the COVID-19 situation and pace of vaccination weighed on investor sentiment, traders said.

The BSE benchmark

swung between gains and losses during the session, before finally finishing 41.75 points or 0.09 per cent higher at 48,732.55. However, the broader NSE Nifty slipped 18.70 points or 0.13 per cent to 14,677.80. Asian Paints was the top performer among the Sensex components, rallying 8.51 per cent, after the company on Wednesday reported an 81.13 per cent jump in consolidated net profit to Rs 869.89 crore for the March quarter.

Rates for RoDTEP likely to be announced in 2 weeks: DGFT

PTI ■ NEW DELHI

Rates for the tax refund scheme for exporters - Remission of Duties and Taxes on Exported Products (RoDTEP) - are expected to be announced in the coming two weeks, a senior official said on Friday.

Director General of Foreign Trade (DGFT) Amit Yadav said it is working with the finance ministry on the scheme.

Last year, the government approved the RoDTEP scheme for reimbursement of taxes and duties to exporters, with a view to give a boost to the country's outbound shipments. The scheme was implemented for all goods, with effect from January 1.

“My sense is that in the coming two weeks, we would be in a position to have an announcement of the rates for RoDTEP,” he said at a PHDC-Cl webinar.

Apex exporters' body the Federation of Indian Export

Organisations (FIEO) has time and again asked the government to announce the rates for different sectors under the scheme as delay would have implications for future exports.

The rates have to be notified by the Department of Commerce, which would be based on the recommendation of a committee chaired by G K Pillai, former commerce and home secretary.

Yadav said due to the COVID-19 pandemic, there has been an impact on both tax collections and expenditure and there is also the challenge of revenue.

On the Merchandise Export from India Scheme (MEIS), the DGFT said it is working with the Department of Revenue on the issue.

“We have proposed to the revenue department that if the MEIS scrips

can be issued, which can be encashable a year after... Something

(on these lines) we are working on,” he said.

Forex reserves up by USD 1.444 billion to USD 589.465 billion

PTI ■ MUMBAI

The country's foreign exchange reserves increased by USD 1.444 billion to USD 589.465 billion in the week ended May 7, 2021, RBI data showed.

In the previous week ended April 30, 2021, the reserves had risen by USD 3.913 billion to USD 588.02 billion. The reserves had touched a lifetime high of USD 590.185 billion in the week ended January 29, 2021.

During the reporting week ended May 7, 2021, the increase in reserves was on account of a rise in foreign currency assets (FCA), a major component of the overall reserves.

FCA rose by USD 434 million to USD 546.493 billion in the reporting week, the Reserve Bank of India's (RBI) weekly data showed.

Expressed in dollar terms,

the foreign currency assets include the effect of appreciation or depreciation of non-US units like the euro, pound and yen held in the foreign exchange reserves.

Gold reserves surged by USD 1.016 billion to USD 36.48 billion in the reporting week, the data showed.

The special drawing rights (SDRs) with the International Monetary Fund (IMF) were down by USD 4 million to USD 1.503 billion. The country's reserve position with the IMF declined by USD 1 million to USD 4.989 billion in the reporting week, the data showed.

Govt to provide liquidity to exporters by fast customs, duty drawback refunds

ANS ■ NEW DELHI

In an attempt to ensure liquidity for exporters in the difficult period of Covid pandemic, the government has decided to credit all customs refunds and duty drawback claims, made by them upto May 14, by the end of the month.

The Central Board of Indirect Taxes and Customs (CBIC) has launched a special refund and duty drawback between May 15 and May 31.

Under this drive, efforts will be made by customs officials for priority disposal of all pending Customs refunds, IGST refunds and Customs duty drawback claims pending as on May 14 this year.

In an instructional circular issued to all Principal Chief Commissioners, Chief Commissioners and Commissioners of Customs and Central taxes, the CBIC has instructed officials to close-

ly monitor performance of the special refund and duty drawback drive on a daily basis and, wherever required, suitably guide the officers concerned to maximise the disposal.

Reliance Jio announces free talk time offer for JioPhone users for pandemic

PTI ■ NEW DELHI

Reliance Jio on Friday said it is working with Reliance Foundation to provide 300 free minutes of outgoing calls per month, which amounts to 10 minutes per day, for the entire period of the pandemic.

The scheme will be available to JioPhone users who have not been able to recharge due to the ongoing pandemic, the company said in a statement.

Reliance Jio is the first company to announce free talk time for users in the second wave of pandemic wherein many states have imposed lockdowns or lockdown-like restrictions as a desperate measure to restrict the spread of the virus.

Fuel prices rise sharply again after day's break

ANS ■ NEW DELHI

Maintaining its rising trend, fuel prices increased again on Friday just after a day of pause with state-owned fuel retailers hiking rates of petrol and diesel by 29 paise and 34 paise per litre respectively in the national capital.

In Delhi, petrol now costs ₹92.34 per litre and diesel is priced at ₹82.95 per litre up from yesterday's level of Rs 92.05 and ₹82.61 a litre respectively in the national Capital.

Across the country as well the petrol and diesel prices increased on Friday but its quantum varied depending on the level of local levies in

respective states.

In Mumbai, petrol now comes for around ₹98.65 a litre and diesel for ₹90.11 a litre according to a price notification from oil marketing companies

Petrol prices in some states including Rajasthan, Madhya Pradesh and in some places in Maharashtra have breached the ₹100 per litre mark while premium petrol has been hovering above that level for some time now.

Fuel prices have now increased on four of the last five days rising continuously from Monday to Wednesday, pausing on Thursday and again rising on Friday. Prior to holding back auto fuel prices on Saturday and Sunday, its pump rates had also increased sharply on previous four days as well.

Petrol prices have increased by ₹1.79 a litre Delhi in May in the eight increases so far. Similarly, diesel prices have risen by ₹ 2.22 per litre in capital this month.

India needs its own crypto unicorns: Experts

ANS ■ NEW DELHI

Stressing that India needs smart and sensible crypto regulation, leading cryptocurrency players in the country on Friday urged the government against the ban and sought engagement to build consensus on crypto regulation.

The government earlier indicated that it would take a 'calibrated approach' towards digital assets and formulating a Bill on cryptocurrencies. A final decision is yet to be taken.

At a webinar organised by the Internet and Mobile Association of India (IAMAI) and its Blockchain and Crypto

Assets Council (BACC) members, the stakeholders said that consultation and dissemination of information between the government and the industry participants is crucial to determining the most appropriate regulatory framework and supporting innovation. “There are over 1.5 crore Indians holding over Rs 1,500 crore worth crypto-assets. India is no longer a niche market, but a rapidly growing finance market. Despite the growth in crypto adoption, India is behind in terms of both regulations as well as number of successful crypto startups,” said Nischal Shetty, CEO WazirX.

Yes Bank to sell property of E Commerce Magnum Solution for recovery of ₹345 cr

PTI ■ NEW DELHI

Yes Bank has invited bids for sale of immovable assets of a borrower, E Commerce Magnum Solution Ltd, to recover dues of over ₹345 crore.

In an e-auction sale notice, Yes Bank said it took physical possession of the immovable properties mortgaged to it on August 29, 2020 pursuant to a demand notice issued to the borrower and mortgagor in January 2020.

The e-auction will take place under the Securitisation and Reconstruction of Financial Assets and

Enforcement of Security Interest (Sarfasi) Act.

The auction is with regard to One Hughes project at Chowpatty, Mumbai of E Commerce Magnum Solution Ltd, Yes Bank said.

The bank has set the reserve price for the auction at Rs 270 crore.

“The properties will not be sold below the reserve price set by the AO (authorised officer),” it said.

The properties in possession by the bank will be sold by way of e-auction on June 15, 2021 for recovery of ₹ 345.32 crore as on April 27, 2021, Yes Bank said in the notice.0

Metro RPF conducting 'No mask- No metro' campaign inside a running metro to spread the message of Covid Awareness

CANCELLATION/REDUCTION IN FREQUENCY OF SPECIAL TRAINS

It is notified for the information of passengers that due to low occupancy and other operational reasons Railways have decided to cancel and reduce the frequency of following special trains, as per the details given below:-

CANCELLATION OF TRAINS	
Train No. & Name	Date from Cancellation
04740 Bikaner Jn.-Delhi Sarai Rohilla Superfast Special	15.05.2021 to till further advice
04739 Delhi Sarai Rohilla-Bikaner Jn. Superfast Special	16.05.2021 to till further advice
02463 Delhi Sarai Rohilla-Jodhpur Jn. Express Special	19.05.2021 to till further advice

"SERVING CUSTOMERS WITH A SMILE"

BEHIND THE SONGS

Singer **SUNIDHI CHAUHAN**, who recently released her latest single *Ye Ranjishein* after almost two decades, shares some unknown trivia about five of her favourite tracks.

By **TEAM VIVA**

There is always an untold story behind every song. While some of those stories do come to fore in some way or the other, most of them remain a secret behind the scenes, well away from the spotlight. Singer Sunidhi Chauhan, who recently released her latest single *Ye Ranjishein* after almost two decades, shares some unknown trivia about five of her favourite songs.

HUI HUI MAIN MAST FROM **MAST** (1999)

Not many people know this but I had no voice to sing this song in the studio on the day of the recording. Just three days before the scheduled recording, I had lost my voice and my doctor told me if I really wanted to make use of this opportunity, I would have to keep my mouth shut right up to the moment when I have the microphone in front of me at the studio. "If you speak at all during the next three days, you will lose your voice. If you really want it that bad, you better keep mum. Sing straight on the mic, on the day of the recording," he said. I was crushed to hear that, especially since I am someone who believes in practising and rehearsing almost to the point of exhaustion. However, for a change, I followed my doctor's instructions and went with his gut feeling. I was really scared, couldn't imagine what I would sound like with a bad throat. Eventually it all turned out for the best. My doctor's instincts were spot on and my voice was back to its usual element and we successfully recorded the song.

AAJ SOCHA TO AANSOO BHAR AAYE FROM **HANSTE ZAKHM** (1973)

My second all-time favourite song is *Aaj Socha To Aansoo Bhar Aaye* by Lata Mangeskar, and composed by Madan Mohan ji. Each time I hear that song, I get transported to another place. I can't help but get lost in Lata ji's voice and the emotions she brought to life in that song. While I am not a sad person, I haven't had anything to be sad about in a long while, I cannot help but relate to this song so much. My eyes start welling up as soon as I hear Lata ji's voice in this song.

DIL MEIN JAAGI DHADKAN AISE FROM **SUR** (2002)

There is no way I could ever forget this song; obviously because of its composition. Much gratitude to MM Keeravani sir who gave me this beautiful song. A little story behind this song is that the *mukhda* was to be sung in one breath and I couldn't help but wonder whether it would be physically possible for me to do so because it had too many lines. But Keeravani sir wanted it to be in one breath and he said that he knew I could do this. He told me that he believed in me and I should just take my time to practise as much as I need. I took about 45 minutes to an hour, maybe more. I lost track of time but when I got

'Rehna Tu is my all time favourite. It's a masterpiece. The melody and the lyrics, it just takes me to a place where I don't want to come back from'

on the mic, somehow nailed it. I couldn't believe I had managed to sing that *mukhda* in one breath. It is one memory which stands out, it really was a crazy time.

REHNA TU FROM **DELHI-6** (2009)

Rehna Tu is my all time favourite by AR Rahman sir and Praseoon Joshi. They have created a masterpiece. The melody and the lyrics, it just takes me to a place where I don't want to come back from. And I must have heard it a

zillion times already but that feeling never wanes...

LE CHALE FROM **MY BROTHER NIKHIL** (2005)

I have to mention *Le Chale* here. When Viveck Philip, who composed this song, and (Onir) Anirban, who is the director of the film, approached me to sing this song, right off the bat I was in love with it. I was head over heels for the melody. Let me share a story behind this song, which not many, in fact, nobody knows. I was kind of chok-

ing while singing this track in the studio. I tried to not make it too obvious because I knew that if I stopped singing I would start crying. It was really tough keeping my emotions in check while singing this one. And mind you, this was before I got know about the context of this song in the film. It was purely magical, what that melody was doing to me. Those notes were driving me crazy and I could feel myself choking again and again. Nobody knows this, not even Anirban or Viveck... Well I think they will get to know this now.

'Difficult yet beautiful journey'

Actor **ABHISHEK BANERJEE** auditioned for his character in *Pataal Lok* half-heartedly because he feared rejection as he was the casting director of the series

It's almost a year since the world witnessed actor Abhishek Banerjee delivering a splendid performance in the crime-thriller series *Paatal Lok*. Having starred in comic roles prior to the project, Abhishek showed the fans how versatile he could be when taking on roles in another genre. He has now shared his experience from the time when he was shooting for the eponymous series.

"Sudip (Sharma) sir went to watch *Stree* in theatre one day and he called me the next day saying that he wanted me to try for the character Vishal Tyagi (Hathoda Tyagi). He said, 'He saw a maniac in my eyes'. It was a shocker as I didn't expect that. I stared at myself in the mirror looking for the maniac in me. Initially, I didn't find the role exciting, Tyagi didn't have many dialogues, even the screen time was less compared to other characters! I was half-hearted about attempting the audition plus I was the casting director too so didn't want to be in an embarrassing situation where I get to hear the news of my own rejection from the team," he said.

"However, Karnesh (Sharma) sir and Sudip sir were both convinced that I could do a good job with it. They were not liking the other options I presented to them for Hathoda's role! Finally after a long internal duel, I gathered courage and gave the audition. I gave it my all but still was nervous when I finally sent them the test. Next morning Karnesh sir called, I picked it up anxiously. I was told that they really like my audition and I am on board for the part. Phew! That was such a relief. But it was only the beginning of a difficult yet beautiful journey."

The series went on to receive a lot of praise as it opened to strong critical acclaim. Abhishek, for his portrayal of Hathoda Tyagi, also received a lot of appreciation. His role in the series truly helped him break free of the comedy persona onscreen.

His recently released anthology film, *Ajeeb Daastaans*, was again a successful outing. With each new project, he keeps proving his mettle. He now has five projects in line with quite a few more in developing stages. Abhishek will next be seen in *Rashmi Rocket*, *Bhediya*, *Aankh Micholi*, *Dostana 2* and *Helmet*.

Divyanka's adventure mode on

Actor Divyanka Tripathi, who is currently shooting in Cape Town for the stunt-based reality show *Khatron Ke Khiladi 11*, says that it was tough leaving her husband, actor Vivek Dahiya, at home.

"This is the first time after our marriage in 2016 that Vivek and I would be by ourselves for an extended period of time. We have gotten emotional many times. Last week, we had been preparing ourselves for the day when I would leave for Cape Town. Leaving him and going makes me very sad," she said.

The actor also added that the family members of all contestants were reluctant in letting them travel overseas amidst the pandemic. "During these uncertain times, it's understandably tough for family members to let us go. In all honesty, I think they are the biggest *Khatron Ke Khiladi*," Divyanka said.

However, a part of her was overjoyed at being given a chance to engage with something adventurous again.

"I am excited that I am going to do something that was long due. Before coming to Mumbai, I used to get a lot of chances to participate in adventurous activities. I used to participate in a lot of adventure camps when I was a kid. I used to be away from home for 10-day or 50 day-camps, so I was in the habit of staying alone. And in the 15 years since I came to Mumbai, I have never had a chance to travel and be by myself so I have not touched that aspect of my personality in a long while. But I have to say that the next few weeks would be somewhat bittersweet as I have to stay away from Vivek to make use of an eagerly awaited opportunity," she added.

On the deadly second wave of COVID-19, Divyanka expressed, "It is a tough time for the industry, but it is not just limited to our industry. Across professions, just about everyone is going through a tough time. But it is a bit easy for us actors, since we are no strangers to this lifestyle. When we are working, our schedules are erratic, we work rigorously and for extended hours. But when we don't have work, like, between

shows we work on ourselves at home."

"These times are a reminder that more than work, life is important. I would urge everyone to follow social distancing norms and to stay safe. During this time, mental health is important, and it is important to stay in touch with your loved ones at all times. Those of us who are lucky to not be affected by the pandemic, we should try to be healthy mentally and keep indulging in activities at home to keep ourselves engaged," she signed off.

—IANS

Love the unknown

Actor **ALBERT TSAI** says that it is human nature to be drawn to what hasn't been confirmed or discovered yet. By **TEAM VIVA**

I don't know if he was quite the basketball aficionado that he became.

What is it about the Yeti creatures that we're so obsessed with?

I think it's just part of our obsession with mythical creatures. We love the unknown, and what we haven't confirmed or discovered yet. Also, what's really exciting is, we bring a different version of the Yeti into the film, as opposed to sticking to the normal depiction, which is more gorilla-like, abominable snowman who is mean and scary. We bring a cuter, more innocent version. He's got these powers, which aren't normally part of the Yeti mythology, so it's really fun. Jill [Culton] said she wanted to base Everest off of her experience with her dogs, which is why he sort of has dog-like qualities. But he also has his own emotions and he's quite intelligent.

Was it fascinating to see the film come to life step by step?

That was one of my favorite parts of this entire experience. It was fascinating for me to see how a scene could go from basic storyboards and sketches to animation and layout. It started out as very rough 3D animation and it got finer and finer, with lighting and effects and all that, until finally it's

What did you want to bring to the role?

I did try to really infuse some of my personality into Peng. A lot of his body language and movements were sort of inspired by what I did in the recording booth because they had a camera on us when we were recording the audio, just to see what we would do. Being a TV actor, I did the movements along with the lines, which was natural for me and that they imported onto Peng.

Did Peng change at all as the film evolved?

He stayed more consistent through the various stages of production. I feel like he was always going to be the younger member of the group, the comedic heart. I think there were slight personality changes...

Abominable is a computer-animated adventure film which follows a teenage girl named Yi, who encounters a young Yeti on the roof of her apartment building in Shanghai. She names him Everest and embarks on an epic quest to reunite the magical creature with his family at the highest point on earth along with her mischievous friends Jin and Peng (played by Albert Tsai). But the trio of friends will have to stay one-step ahead of Burnish, a wealthy man intent on capturing a Yeti, and zoologist Dr Zara to help Everest get home. Actor Albert Tsai shares about his experience of working on the film and more. Excerpts:

How did you get involved?

As soon as I read the script and the character description of Peng, I just fell in love with him, so I decided to audition for the role. I was really excited to be part of a film that was portraying Chinese culture, with a modern Chinese family, which we haven't had, ever, really. The last major film was *Mulan*, which was about ancient times.

How did animator and director Jill Culton pitch Peng to you?

Just that he's a fun-loving, energetic kid. He is always intended to be the younger character and almost comic relief, but with more depth than that. He is also the optimistic one of the group. He's always playing, and when other people are about to give up, he really wants to continue the journey. He has a ton of fun on this adventure with Everest. Peng is the only one, along with Everest, who seems to be taking this journey more like a vacation. When the others are considering the next step, he's over there having a thumb war with Everest.

Raman’s sacking bring CAC under scanner

PTI ■ NEW DELHI

Former opener WV Raman’s unceremonious ouster from the Indian women’s team head coach’s position has opened a can of worms with both the Madan Lal-headed Cricket Advisory Committee and Neetu David-led selection panel coming under the scanner of BCCI big-wigs.

Raman, who successfully coached the women’s team to T20 World Cup final in Australia and is widely acknowledged as one of the best Indian coaches, was removed by Lal and Naik’s CAC, which reinstated Ramesh Powar, who was removed from the same post in 2018.

IS LAI’S COMMITTEE ILLEGAL?

“Maddi paaji (Madan Lal) celebrated his 70th birthday on March 20. The BCCI, in its appeal to Supreme Court against some of the reforms, doesn’t ask for roll-back of age-cap of 70 years. So how come Madan Lal was allowed to sit in CAC meeting?” a senior member asked.

While the BCCI has no intention of using its veto to over-rule Lal and Naik, the board’s top officials are unable to wrap their heads around as to what led to recommendation of Raman’s removal.

DID RAMAN & NEETU HAVE A FALL-OUT?

It has been confirmed from multiple sources that Raman had red-flagged the kind of squad that David, Arati Vaidya, Renu Margrate, Mithu Mukherjee and V Kalpana picked for the South Africa series, for which teen batting sensation Shafali Verma was not picked for the ODIs and senior pacer Shikha Pandey was inexplicably dropped.

“Do you know what kind of logic was given for dropping Shikha and Shafali? It is beyond comprehension,” a peeved senior official said.

The selectors said that Pandey was unfit because she hasn’t worked hard on training during lockdown and was “overweight”.

“But when they were asked to prove their point, they couldn’t simply do it,” the official alleged.

In the case of Shafali, her fielding was questioned and put forth as the reason for her non-selection in the ODI team.

“If Raman had a counter-question that if Shafali’s fielding is a problem for 50-over cricket, then it is bigger problem in T20 format where it is more important. Then how is she being selected in T20 format,” the official asked.

The selection of leg-spinner C Prathyusha and left arm seamer Monica Patel has also been questioned as they didn’t look ready for the rigours of International cricket.

Prathyusha gave 60 odd runs in 8 overs in one of the games.

“How did Monica get selected over Shikha Pandey?” is a question that is being asked.

COUNTER POINTS AGAINST RAMAN

While the majority believe that the stylish southpaw of yester-years has been hard done by, there are a few critics who feel that there were some loose ends from his side too.

“Some girls complained that he will at times switch himself off during training sessions. Also some girls felt under-appreciated.

Someone like Rajeshwari Gayakwad was not even once praised despite she being the best bowler during the series,” a member from the anti-Raman camp said.

There’s ‘prima donna culture’ in women’s team: Raman writes to Ganguly, Dravid

New Delhi: Ousted Indian women’s coach WV Raman has written to BCCI president Sourav Ganguly, alleging that there is a “prima donna culture” in the national team and it needs to change.

In the mail that has also been marked to National Cricket Academy head Rahul Dravid, Raman has also offered to present a roadmap for women’s cricket in the country, if asked.

“As far as I know, Raman has said that he has always ‘believed in team being placed above everybody else, and insisted that no individual can really be a prima donna,” a source privy to Raman’s mail said.

The stylish former left-hander’s crisp letter to the two former captains is sure to ruffle a few feathers given that it has always been the coaches who have either stepped aside or sacked following fallout with players, most notably ODI captain Mithali Raj.

While Raman’s letter didn’t

name anyone, it is understood that he has spoken extensively about the star culture that prevails in the team, which he said is probably doing more harm than good.

It is learnt that Raman has written about certain individuals who need to place the team above self.

“Raman has asked Dada (Ganguly) that if a past accomplished performer feels constrained by this culture, then he (Ganguly) as a former India captain, should take a call on this matter, whether the coach is asking for too much,” the source added.

Raman, it is learnt, is dismayed by allegations that he is not proactive as a coach. “In case the president and secretary want to hear his opinion on allegations about his work ethic, he can explain.”

The letter has been copied to Dravid because Raman sincerely believes that he can contribute towards building a roadmap for Indian women’s cricket.

ber from the anti-Raman camp said.

Another allegation against Raman is that he unwittingly gave

gloveswoman Nuzhat Parween a debut cap without knowing that she has already played both ODIs and T20Is for India.

Paine clarifies on India comments after being slammed

PTI ■ MELBOURNE

Australia captain Tim Paine on Friday stood by his comments that his team indeed got distracted by India’s “sideshow” but clarified that he didn’t ever intend to use it as an excuse for their home Test series defeat in January.

A day after receiving online flak from Indian fans for his “side show” comments on Indian team, Paine clarified himself while chatting with Adam Gilchrist in a podcast.

“I was asked a number of

things, and one of those was talking about the challenges of playing against India. One of

them is the distraction they can create,” Paine said in the *Gilly and Goss* podcast on Friday.

“There was a lot of talk that they weren’t going to Brisbane. They’re always changing gloves and bringing out physios and all that can get on your nerves. Just said that was one of the things that probably distracted me and took my eye of the ball at times.”

The 36-year-old Paine had said that his team was distracted by the Indian team’s “niggling” during the epoch-making Test series early this year

which the visitors rallied to win.

Soon Paine was trolled on Twitter by Indian fans.

“I did say that they simply outplayed us and that they deserved to win but they left that one out. The Indian fans have been slamming me on social media. They say that I’m making excuses again but it’s all good fun,” Paine said.

“I certainly wasn’t making any excuses. I was asked about some of the challenges of the summer, and I said that was one of them for me,” he added.

Bond played major role in shaping Bumrah’s career

PTI ■ MUMBAI

India’s star pacer Jasprit Bumrah has said that former New Zealand speedster Shane Bond, who is currently the bowling coach of Mumbai Indians, has played a major role in shaping his career.

The Mumbai Indians fast bowler, who will lead India’s attack in the upcoming World Test Championship final against New Zealand, expressed his views in a video shared by his IPL franchise.

“I always try to talk to him even when I am not here and with the Indian team. So, it’s been a good journey, and hopefully, every year I keep learning something new and try to add new things to my bowling.

“He has played a major role in that. It’s been a great relationship so far, and hopefully, this continues for many many years to come,” Bumrah said.

He said he was always fascinated by how Bond bowled in his playing days and tries speaking to the MI bowling coach even when he is on India duty.

“I met him (Bond) for the first time

in 2015. As a child, I had seen him bowl and was always very fascinated by how he used to bowl for New Zealand, and how

he used to operate,” the India pacer said.

Bumrah, who has so far played 19 Tests, said that Bond assisted him a lot in broadening his horizon which in turn helped him blossom as a cricketer.

“When I met him over here, it was a good experience. He helped me a lot to open my mind to different things that I could try on the cricket field. So that was very good and that relationship has only gotten better each and every year,” added the Gujarat pacer.

Bond, on his part, termed Bumrah as the best death bowler in the world.

Seasoned New Zealand left-arm pacer Trent Boult also had words of praise for his compatriot, saying that Bond was a “tremendous thinker of the game and a pretty good tactician.”

“He has been here for a long time, he knows what he is doing and he puts in a lot of work into making sure that the bowlers are well equipped and have got enough information to make some decisions on the day. Yeah, really enjoy working with him,” said Boult, who has played 71 Tests.

Real trim Atleti’s lead

Granada: Real Madrid kept the pressure on Atletico Madrid by thrashing Granada 4-1 on Thursday to reduce the gap to two points at the top of La Liga, with two games left to play.

A draw or defeat for Real Madrid would have given Atletico the chance to win the title on Sunday by beating Osasuna but goals from Modric, Rodrygo, Alvaro Odriozola and Benzema secured a comfortable victory at Los Carmenes.

Atletico could still be crowned champions this week-end if they overcome Osasuna

and Real fail to win away at Athletic Bilbao.

Even third-placed Barcelona are still in the running but they need an incredible swing of results if they are to overturn a four-point deficit.

Dortmund rout Leipzig in German Cup final

AFP ■ BERLIN

Jadon Sancho and Erling Braut Haaland both netted twice on Thursday as Borussia Dortmund won the German Cup with an emphatic 4-1 win over RB Leipzig to spoil Julian Nagelsmann’s hopes of leaving with a title.

Dortmund turned on the style at Olympic Stadium, converting all of their three first-half shots on target to sweep Leipzig aside as Sancho netted twice either side of a superb Haaland goal.

“I am very happy that I could score two goals and set up one for Haaland,” Sancho told ARD.

The England winger could have claimed a hat-trick late on after rounding Leipzig goalkeeper Peter Gulacsi, but failed to get his shot away.

Spain midfielder Dani Olmo pulled a goal back for Leipzig, before Haaland grabbed his second in the dying stages despite slipping as he connected.

Dortmund lifted the German Cup for the fifth time in the club’s history.

“It’s unbelievable, I am proud of the morale the team has shown in the last few weeks,” said captain Marco Reus as Dortmund have also recently got back into the Champions League places.

AFP ■ MANCHESTER

Liverpool kept their chances of a place in next season’s Champions League in their own hands with a thrilling 4-2 victory over Manchester United at Old Trafford on Thursday.

Jürgen Klopp’s men still need to win their remaining three games over the next 10 days to guarantee their place in the Champions League for a fifth consecutive season, but cleared the biggest hurdle in their path with a first victory away to United since 2014.

Roberto Firmino scored twice either side of half-time after Diogo Jota cancelled out Bruno Fernandes’s early opener for the home side.

‘Hardik needs to bowl for place in playing XI’

New Delhi: Former India selector Sarandeep Singh has backed the current committee’s call to ignore Hardik Pandya from the Test squad and said the all-rounder doesn’t fit into the playing XI even in the shorter formats if he can’t bowl his quota of overs.

After undergoing a back surgery in 2019, Hardik has not bowled regularly since his comeback and not being able to offer his all-round skills cost him a place in the Indian Test squad for the UK tour.

Sarandeep, whose tenure ended with the historic tour of Australia earlier this year, was also surprised that a rare talent like Prithvi Shaw did not even make the standbys for the England tour.

“The selectors’ decision to ignore Hardik for Tests is understandable. He has not been able bowl regularly after his surgery. I feel he has to bowl 10 overs in ODIs and four in T20s to be part of the playing XI even in shorter formats. He can’t just play as a batsman,” Sarandeep, a former India spinner, said.

“If Hardik doesn’t bowl, it disturbs the balance of the side hugely. You have to play an extra bowler because of that and someone like Surykumar Yadav has to miss out. As we saw in the ODI series against England and Australia, we can’t play with five bowling options.

“Then team now has other all-rounders in Washington Sundar, Axar Patel, Jaddu is back, Shardul Thakur can also be an all-rounder, he has shown that. They all can do the job if Hardik can’t bowl.”

Talking about Shaw not being picked for the UK tour, Sarandeep said it is way too early to sideline a batsman like him.

“He has the potential to do what Sehwaag did for India. You can’t sideline him so early in his career. He has scored tons of runs in domestic cricket after being dropped post Australia tour. He has corrected his technical flaws also and look how he played in the IPL.

“You have to back a talent like Shaw for that matter.”

PTI

Nadal ends losing streak against Alex

AP ■ ROME

Rafael Nadal ended a run of three straight losses to Alexander Zverev with a convincing 6-3, 6-4 win over the German on Friday to reach the Italian Open semifinals.

Zverev had beaten Nadal in straight sets at the same stage in Madrid a week ago but their latest meeting went the Spaniard’s way from the start.

Aiming for a record-extending 10th Rome title, Nadal raced to a 4-0 lead in the first set and saved all eight break points he faced in the second.

“I played more solid than Madrid. Conditions are different,” Nadal said, alluding to the fact that the high-altitude of the Spanish capital allowed Zverev to dominate more with his serve. “Here are little bit more normal conditions. I was able to control a little bit more.”

It was a stark contrast from Nadal’s long three-set comeback win over Denis Shapovalov a day earlier, when the Spaniard saved two match points.

Nadal’s semifinal opponent will be big-serving American Reilly Opelka, who reached his first Masters semifinal with a 7-5, 7-6 (2) win over Argentine qualifier Federico Delbonis.

In the women’s tournament, 2019 Rome champion Karolina Pliskova rallied past 2017 French Open winner Jelena Ostapenko 4-6, 7-5, 7-6 (1) to set up a semifinal against Petra Martić. Martić eliminated Jessica Pegula 7-5, 6-4 for her biggest result since recently hiring former French Open champion Francesca Schiavone as her coach.

The only real moment of concern for Nadal came when he

Roger Federer in action during a training session prior to the start of Geneva Open tournament on Friday

AP

tripped over the service line while running down a drop shot when he was serving for the first set.

The crowd of about 2,500 let out a collective gasp as Nadal tumbled onto the clay and rolled over onto his back wincing in apparent pain.

After putting Nadal’s reply away for an easy winner — the Spaniard still managed to get the ball over the net — Zverev hopped over the net to check on the 20-time Grand Slam champion.

Nadal got up, though, dusted himself off and served out the set with his back and even headband still covered in clay.

“Some lines are higher than the rest of court, so when you touch the line it’s dangerous,” Nadal said.

Zverev, the 2017 Rome champion and winner of the trophy in Madrid last weekend, had numerous opportunities to recover from an early break in the second set but Nadal stepped up his game each time and closed it out on his first match point with a perfectly executed serve-and-volley.
