**Curfew extended till May-end**

*Restrictions, timings remain unchanged during curfew across the State*

**VIJAYAWADA:** Medical and Health Principal Secretary Anil Singhal said on Tuesday that the Andhra Pradesh government has decided to extend the black fungus treatment under the Arogyasri scheme, Singhal said, adding that the state government has decided to extend the black fungus treatment under the Arogyasri scheme, Singhal said, adding that the state government has received reports of deaths from the black fungus treatment that resulted in the death of several patients in hospitals. The government has decided to extend the treatment to the people who have been hospitalised for black fungus treatment under the Arogyasri scheme.

**MAMATA CAMPS AT CBI OFFICE FOR 6 HOURS AS 2 MINISTERS ARRESTED**

A CBI office in Kolkata today saw an unusual sight. Two West Bengal Ministers, with a string of serious allegations, were arrested by the agency on Tuesday. The two Ministers, who are implicated in a multi-crore chit fund scam, are now in CBI custody. The agency had earlier conducted raids at their residences and offices in connection with the case.

**APOLLO, DR REDDY'S ANNOUNCE COVID VACCINE**

A company official of Apollo and Dr Reddy's announced on Tuesday that they would start vaccinating people against Covid-19 from May 17 at Apollo facilities in Hyderabad on a priority basis. The company, which has already started conducting trials for the vaccine, said that it would begin the vaccination drive in the next few days.

Police playing crucial role in supply of oxygen: DGP

Chief Minister directed officials to ensure unhindered transport of liquid medical oxygen to hospitals. The Medical Corps has also decided to operate green channels to help hospitals.
6-step Aadalhaar verification process exposed trivials of PDS benefits

Sud Srikanth

Field surveys and interviews in four Integrated Tribal Development Agency (ITDA) areas of Mahabubnagar; especially in Radhakrishna Colony (Devanahalli), Devanahalli Colony and Devanahalli Colony (Pattadakal) areas revealed that thousands of tribal families have not been able to access the ration cards on account of biometric mismatch and verification issues as a result of a six-step verification process which has been entrenched into biometric gone wrong. As many as 10 million citizens are being targeted by way of this wording.

Vijayawada Centre

The three centre government departments, social welfare, health and local administration conduct a field visit in villages where biometric surveys are not reaching and telephonic interviews with people from four ATRDA areas out of 44 of the PCP.
**Renovation of Peddapuram oxygen plant at brisk pace**

The renovation of the oxygen plant—located in Peddapuram which was non-functional over the past few years—has begun in a brisk pace. The AP Government has sanctioned Rs 7.5 crore to renovate the plant. The plant was a state-owned plant, and a private plant has been taken over by the state government. The plant has been sanctioned an amount of Rs 7.5 crore, and the work is expected to be completed in the next two months.

**100-bed Covid centre opened**

Minister for Education ad interim,祝贺s the inauguration of an 80-bed Covid centre established at the Government Hospital at Khammam on Monday. The Covid centre has been set up to provide medical care to patients in the district. The centre will provide all types of medical care including oxygen support, and it will be operational 24 hours a day.

**18 more health centres sanctioned: Sucharita Rao**

A total of 18 more new health centres were sanctioned at Nellore, Eluru, Nandyal, Kuppam, Tirupati, Pedapalli, and Nellore. The Minister for Health and Family Welfare, Sucharita Rao, inspected the facilities for the new health centres and said that the work on the construction of the centres will begin soon.

**Villagers take initiative to set up Covid-19 Care Centre**

A team of villagers in the area has taken the initiative to set up a Covid-19 Care Centre. The team is led by a local doctor, and they have been working tirelessly to ensure that the centre is operational. The centre will provide medical care to patients in the area and will be operational 24 hours a day.

**Delta variant**

The Delta variant has been identified in the area, and the authorities are taking necessary steps to ensure that the spread of the virus is controlled. The authorities have advised the villagers to take all necessary precautions to prevent the spread of the virus.

**Black fungus case detected in Tenali**

The outbreak of black fungus in Tenali has led to the closure of two hospitals in the area. The black fungus case has raised concerns in the district, and the authorities are taking necessary steps to prevent the spread of the fungus.

**Health officials order to stop distribution of Ayurvedic drugs for coronavirus**

The health officials have ordered the distribution of Ayurvedic drugs for coronavirus to be stopped immediately. The distribution of the drugs was done without proper testing, and the authorities have advised the drug manufacturers to stop the distribution immediately.

**SP alerts police personnel over increasing coronavirus threat**

As the number of Covid-19 cases continues to rise, the SP has advised the police personnel to take all necessary precautions to prevent the spread of the virus. The SP has also instructed the police personnel to ensure that they are wearing masks and following all necessary protocols to prevent the spread of the virus.

**No impact of partial lockdown to contain coronavirus pandemic**

Despite the imposition of partial lockdowns since the last few weeks, the total number of cases in the state has continued to rise. However, the health officials have said that the lockdown has not had any significant impact on the spread of the virus. The authorities are taking all necessary steps to ensure that the lockdown is effective in controlling the spread of the virus.

**Black fungus**

The black fungus case has been confirmed in a woman from Srikakulam who was diagnosed with black fungus earlier this month. The patient has recovered from the disease and has been discharged from the hospital.

**Avirulent drugs**

The health officials have ordered the distribution of Avirulent drugs for coronavirus to be stopped immediately. The distribution of the drugs was done without proper testing, and the authorities have advised the drug manufacturers to stop the distribution immediately.
The second Pinjari ghat would be opened to public, in order to provide more avenues for people of all age groups to take part in various sports activities. It would be constructed near Tundla, Rani, Moradabad, 400 meters from the main road, and near the crossing of the Moradabad-Muradnagar road, which is considered to be a major road in the region. The second Pinjari ghat would be constructed in the shape of a wave, and would be constructed using a special type of concrete that would be resistant to all kinds of weather conditions. The ghat would be equipped with a number of facilities, such as a swimming pool, a gym, and a children’s playground. It would be designed to provide a safe and enjoyable environment for all age groups, and would be constructed in such a way that it would blend in with the surrounding landscapes. The construction of the second Pinjari ghat would be completed within six months, and it would be opened to the public for free. The construction cost of the ghat would be approximately Rs. 20 crores.
Stop the cruelty
The Hazaras, for decades at the receiving end, are still facing torture in Afghanistan

Afganistan, a country where war and bloodshed never ended, is once again in the news. To be sure, this does not happen for the same reason. As the US troops start withdrawal from Afghanistan, the Hazaras have once again become the receiving end in the Afghan society. They have faced discrimination but this time it was drummatically and inhumanely as the attack young targeted soldiers. A bomb attack on Kabul’s Sayed-ul-Shuhada High School killed over 60 people; most of the victims were young girls. It is not clear which group was behind the attack. But whatever group did it, knew that it had the tacit backing of the major- ity in the society.

The Taliban have all along held the Hazaras as their heretics. Their Deobandi and Salafi belief system finds fault with the Hazaras religious practices and beliefs. The Hazaras are nine per cent of the Afghan population. They are considered the descendents of Changi Khan, who settled in Afghanistan.

Till the 19th century, they were being traded as slaves. Many radical groups still have the same notation about the Hazaras. a “rebel- human” group that has no right place in this society. During the reign of Amir Abdur Rahman, they were attacked in the desert in a battle near the Bamiyan valley, and this information is still being used to perform mental tasks. With the checks and balances provided by the US presence no longer in the picture, the Hazaras are once again being targeted by the Taliban as they have always had an entrenched relation. They supported Taliban when they attacked Hazaras in Mazar-i-Sharif. Many Hazaras live in the border in Pakistan but they aren’t safe either. According to a 2019 report by Pakistan’s National Commission for Human Rights, at least 509 Hazaras have been murdered since 2013. In the Kite Namai, Hazara was a friend who had to go through. In Afghanistan current state, not much can be done for them. It is making efforts to promote reconciliation. By all possibilities, Hazaras may be left to fend for themselves.

PAPER WITH PASSION

Ready, go?
Are we on the right path to addressing the pandemic? Do we have the right people on our right side?

Contrary to what the critics may say, we have a nation that is strong enough to accommodate all the viewpoints...
In an increasingly globalised world, there is greater civilisational, social and ethnic self-consciousness. The world is becoming more plural and multi-cultural. Once the national boundaries of the Cold War are gone, the world is becoming less unipolar and multi-kinetic towards a multi-polar order that may evolve. A few carefully engineered communal riots will neutralise this trend. A few carefully engineered communal riots will neutralise this trend. A few carefully engineered communal riots will neutralise this trend. A few carefully engineered communal riots will neutralise this trend.

A ‘Art’ attack against Covid

We say only medicines are the perfect cure. The heart needs emotions more than it needs medicines. Covid-19 alone has already, in this pandemic, offered us a chance to think differently. Covid-19 attacked the global art community, wherein fine art forms, digital art, street art, etc., have found a new expression.

If so much of Indian art was nothing more than a means to an end, then today it is a mission. The Indian art community has decided to join forces in raising funds to help 50 NGOs doing critical work at the grassroots level, which is particularly important given the current state of affairs. The art community is using its collective voice to raise awareness and provide much-needed support and daily sustenance to those in need.

HOMESTYLE

With small yet powerful roles in films like Dear Zindagi, Hichki, Sky Is Pink, in the murk, the Nepali-born Bhumi Pednekar has made critics sit up and take notice. He’s cultivated a fanbase of his own with his roles in Mismatched and Ludo. Rohit Saraf talks to The Pioneer’s SHIKHA DUGGAL about being called India’s newest crush, handling the overwhelming feelings of stardom, and his projects.

ROHIT SARAF — MORE THAN JUST A CUTE FACE

Actor Albert Tsai says that it is human nature to be drawn to what hasn’t been confirmed or discovered. By The Pioneer

What is it about the Yeti creatures that we’re so obsessed with?

I think it’s just part of our obsession with mystery and unexplained. We love the unknown, and what we haven’t explained or discovered yet. So, what, really, is anyone’s guess? The idea of the Yeti is the idea of something that’s going to the extreme depths of imagination and fantasy. We bring a creature, a mysterious, Yeti creature to life. These powers, which are part of the mythology of the Yeti, is really built upon this idea of mystery and the unknown.

How do you animate and direct all of the creatures?

In the real world, you don’t get to do that. You’re always playing, and when you’re working with an animatronic creature, you have to be in sync with the actors, and go through this whole process of photographing the actor, animating it, and then going back and forth to get the exact shots you want.

What did you want to bring to the role?

I really tried to learn as much as I could about the Yeti creatures. I was able to get into the role and understand these creatures, and bring them to life in a way that’s unique. This is a very unique story, and I think the audience is really going to enjoy it.

What was your favorite part of this film?

I think it’s just the whole idea of mystery and what’s really exciting is, we bring a creature, a mythical creature to life, and you have to think about the mechanics of getting that creature to come to life. It’s a very unique experience, and I think the audience is really going to enjoy it.

If you could have a superpower, what would it be?

I think I’d probably want to be able to fly. I think that would be pretty cool. It’s a very unique experience, and I think the audience is really going to enjoy it.

What did you do to prepare for the role?

I really tried to learn as much as I could about the Yeti creatures. I was able to get into the role and understand these creatures, and bring them to life in a way that’s unique. This is a very unique story, and I think the audience is really going to enjoy it.

What was your favorite part of this film?

Modric to lead Croatia

NEW DELHI: India fast bowler Ishant Sharma on Monday said his team would not go to the lengths of going on strike on the eve of the World Test Championship (WTC) final after a stop-over at Maldives due to a COVID-19 positive test, which left for their UK tour. The Test players arrived in London on June 18-22, four days after the Test series against New Zealand. The team was to have left for the UK on June 14, but the New Zealand cricket board had deferred the start of the second half of the championship to June 27 to ensure the squad had adequate time to prepare. Photographers clicked pictures of the players as they arrived at Auckland airport before his departure. Ishant said they had got out there and made sure they were safe and wanted to send some messages for that. A majority of the New Zealand Test players arrived in Auckland on Monday for the two-match series against England with both teams’ squad having to隔离 at the managed isolation and quarantine facilities in Auckland. Ishant was among the few who came back to India after defeating England in the World Test Championship final where New Zealand had lifted the trophy for the first time. Ishant is expected to make a comeback in the Ranji Trophy in the domestic season.

There's no surprise': Clarke on after a stop-over at Maldives due to a COVID-19 positive test, which left for their UK tour. The Test players arrived in London on June 18-22, four days after the Test series against New Zealand. The team was to have left for the UK on June 14, but the New Zealand cricket board had deferred the start of the second half of the championship to June 27 to ensure the squad had adequate time to prepare. Photographers clicked pictures of the players as they arrived at Auckland airport before his departure. Ishant said they had got out there and made sure they were safe and wanted to send some messages for that. A majority of the New Zealand Test players arrived in Auckland on Monday for the two-match series against England with both teams’ squad having to isolate at the managed isolation and quarantine facilities in Auckland. Ishant was among the few who came back to India after defeating England in the World Test Championship final where New Zealand had lifted the trophy for the first time. Ishant is expected to make a comeback in the Ranji Trophy in the domestic season.

According to industry sources, it is learnt that the producer will turn actor with the Telugu remake of Hindi hit film *Vivah*. It is likely to star *Uppena* girl Krithi Shetty as the film’s leading lady.

For his tryst with production, actor-comedian Srinivas Reddy, who is known for many films alongside Bellamkonda Sai Sreenivas, is part of the lead cast in the film billed to be a wholesome entertainer. On Monday, the makers of the film have released the first look of the iconic Chiru playing three roles. Achut Rama Rao is producing the film which is being helmed by Abhilash Reddy. Kannada star Deekshith Shetty and Vennela Ramarao are part of the lead cast in the film.

The poster promises that Srinivas Reddy is hearing-impaired, Deekshith Shetty is visually impaired, and the romantic lead is vocally challenged. The poster also hints that the film’s first schedule will be wrapped up by the end of May.

"A new generation of films have been drastically impacted due to the pandemic, making our job even more challenging. However, we have found unique ways to overcome the challenges and produce content that is both relatable and entertaining," Srinivas Reddy said.

The web series is set in the backdrop of an Engineering college and follows four friends who are engineering students who stay in a hostel. Their room (which is numbered 54) has got a unique feature. Everyone stays in the room ends up developing a special bond with someone from the subsequent batch. What kind of game are they playing in the hostel room face? How do they overcome them? That is the story of the web series. Written in the style of Vennila Kabadi Kuzhu, this web series will be aimed at everyone, especially college students.

Speaking about Room No. 54, Tharun Bhascker said, "This is an interesting story. Newcomer Srinivas Reddy is an old-fashioned storywriter, and we are looking forward to his take on the theme.

The upcoming untitled drama is being backed by Bellamkonda Suresh to the film's leading lady.

According to Tharun Bhascker, the story is believed to be "deeper and more emotional" than "Ee Nagaraniki Emaindi".

The web series is set to stream on ZEE5 from May 21.

**THARUN BHASCER’S ROOM NO. 54 TO STREAM FROM MAY 21**

ZEE5, the only OTT platform that has been catering to the Telugu patrons with original web series, digital releases, films and more.

Last year, the biggest political thriller Chakravarty, the universal sports drama Monagallu, and the much-hyped sports drama Chadarangam, were released. A digital releases, films and more.

This year, ZEE5 is back with a new web series, Room No. 54, which is being directed by Tharun Bhascker, who directed the National Award-winning film Nenu Saakshatvam and the music for Yuvarani Jordan. The web series, which will exclusively stream on ZEE5 from May 21.
