20 years of war. It added that Al-Zawahiri said that “Jerusalem Group that monitors jehadi activities in this region.

The AFP story noted that Al-Zawahiri had made no mention of the Taliban in his latest video, even though the capital Kabul has lost control of several key districts.

In recent years, Al-Qaeda has used the region to stage attacks in Syria and Iraq, and its leader of the same name, the author of the video, described it as an “independent and self-sufficient” terrorist network.

The report said that despite the Taliban’s efforts, the region’s security situation remains tense due to the porous borders and the drug trade.

Additional security measures have been put in place to prevent any further attacks.

People who do not vacate their homes by the deadline of November 30 will face legal action, and those who are forces to evacuate from their homes can seek advice from the relevant authorities.

According to the report, many people have been preparing for the upcoming winter season and are eager to return to their homes.

Those who do not comply with the deadline will be subject to fines and possible eviction.

India’s Intelligence Bureau (IB) has warned against any potential terrorist activities in the region.

The report concluded by urging locals to remain vigilant and report any suspicious activity to the authorities.

The AFP story also noted that the region has been under strict security measures since the Taliban’s takeover.

The situation remains tense due to the ongoing conflict and the uncertain future of the region.

Kejriwal re-elected nat'l convener of AAP 3rd time

Dilip Chandra Minz Arvind Kejriwal was re-elected as the national convener of Aam Aadmi Party (AAP) for the third term on Saturday at its 3rd national council meeting held on Sunday.

Kejriwal was elected unopposed to the post of national convener of AAP for the third consecutive term after his name was seconded by five senior leaders of the party including Ashish Kumar, Amanatullah Khader, Atam Anand, Sharanjeet Singh and Gopal Rai.

Kejriwal's name as the convener of the AAP was seconded by 150 leaders of the party in the proposal of the national executive, the executive, the minority council and suchd party for the third time.

Kejriwal, who has been the national convener of the party since 2013, has won the post of national convener of the AAP three times in a row.

Districts empowered to satisfy people: Baghel
Tens of thousands of Af-Pak regions face real, imminent

The threat to India from the terrorist groups from Pakistan is very real, very imminent. The Pak Army is known for its covert and overt activities. It was Pak Army that was behind the Kargil war in 1999. Pak Army had also been behind the 1984 anti-Sikh riots in Punjab. It was Pak Army's ISI that was recruiting and training terrorists in Afghanistan. There had been a continuous flow of terrorists from Pakistan to Afghanistan and vice versa. Pak Army was also responsible for the 1998 nuclear tests in Pakistan. Pak Army had also been responsible for the 2002 Gujarat pogrom.

Bengal: Sushma says ICJ hearing on Babri is not right time

Theld. motion of the Union Parliament on the Babri demolition was defeated in the Lok Sabha with 217 votes in favour of the opposition and 216 against. Sushma Swaraj, who presented the motion, said that the Babri masjid was the birthplace of the country and that the Babri cry was for the country. She also said that the Babri demolition was a turning point in Indian history and that the ICJ hearing on Babri is not right time. She said, “The Babri demolition was a turning point in Indian history and it is not right to hear the ICJ on Babri.” She added, “The Babri demolition was a turning point in Indian history and it is not right to hear the ICJ on Babri.”

New Delhi: Congress leader Rahul Gandhi on Monday said the party’s “All India Co-ordination Committee” has decided to take legal action against the government for its alleged failure to keep its promises. He said that the government has not kept its promises and that the Congress will take legal action against it. He said, “The government has not kept its promises and we will take legal action against it.”

Mumbai: The Shiv Sena has announced that it will not contest any Assembly seats in the upcoming elections. The party’s decision comes after its leaders decided to focus on local issues in the state. Sanjay Raut, the Shiv Sena’s spokesperson, said, “We have decided not to contest any Assembly seats in the upcoming elections. We are focusing on local issues in the state.”

Thakur had termed the incident as a “blot on the Indian army.” He said, “The Yogi Government is indulging in harassment against the Brahmin community.” V P Satheesan, leader of the Left, also said, “The Yogi Government is indulging in harassment against the Brahmin community. The government should take steps to stop this.”

The MUC has also asked the government to provide security to the Brahmin community and to take steps to stop this kind of harassment. The MUC has also asked the government to provide security to the Brahmin community and to take steps to stop this kind of harassment.
Global powers are reacting to the crisis in Afghanistan in different ways, though Pakistan, Turkey and China are going in a different direction.

Pakistan's reaction to the Taliban takeover has been cautious. Islamabad is expected to hold talks with the Taliban to ensure the security of Pakistani citizens and to prevent any threat to Pakistan's sovereignty. Pakistan will also try to negotiate with the Taliban to prevent any military action.

Turkey, on the other hand, has been critical of the Taliban takeover. Ankara has expressed concern about the situation in Afghanistan and has criticized the Taliban's military actions. Turkey has also expressed its readiness to engage with the Taliban to ensure the stability of the region.

China, being a permanent member of the United Nations Security Council, has a significant role in the region. Beijing has been trying to engage with the Taliban to ensure a stable and prosperous Afghanistan. China has also expressed its readiness to provide economic and technical assistance to Afghanistan.

In summary, each of these countries has a different approach to the situation in Afghanistan, and their actions will have a significant impact on the future of the region.
A ‘peace deal’ with an organisation on the UN’s terror list is a precedent ofgrave concern that opens up Pandora’s box for the world community

Parvath Jha

The presence of wetlands in India is a matter of national pride, taken for granted. These wetlands are not only a source of employment for local people but also provide numerous benefits to the environment. Wetlands in India are vital for biodiversity conservation, water regulation, and carbon sequestration. However, the situation is alarming as these wetlands are facing threats from various sources.

India has 7,57,060 wetlands, which cover an area of 133,343 sq km. These wetlands provide habitats for a diverse range of flora and fauna. They also serve as water reservoirs, recharge groundwater, and regulate the flow of rivers. Despite their importance, wetlands are increasingly threatened due to human activities such as agriculture, aquaculture, and urban development.

The wetlands in India are facing various challenges. One of the major problems is the lack of awareness among the local population about the importance of wetlands. Many people do not understand the value of these ecosystems and are not willing to protect them. Another issue is the lack of proper legislation and enforcement. The existing laws are not sufficiently strong to prevent the degradation of wetlands.

The Indian government has taken several initiatives to protect and conserve wetlands. The Wetland Protection Act, 2010, provides legal framework for the protection and management of wetlands. The National Wetland Conservation Programme (NWCP) was launched in 1992 to conserve and protect wetlands. The NWCP focuses on the restoration of degraded wetlands and the creation of new wetlands.

Despite these efforts, the situation remains alarming. Many wetlands are under threat due to encroachment, pollution, and habitat destruction. The wetlands in the western part of India, especially those in the Gujarat and Maharashtra regions, are particularly vulnerable due to rapid urbanisation and industrialisation.

The Indian government needs to take urgent steps to protect wetlands. This includes strengthening the legal framework, increasing awareness among the local population, and providing incentives for conservation. The government should also cooperate with international partners to address the global threat to wetlands.

In conclusion, wetlands are vital for the health of the planet and their protection is crucial for the survival of many species. The Indian government must take immediate action to conserve these valuable ecosystems before it is too late.
Iran to allow new memory cards in UN’s nuclear site cameras

AP in TEHRAN

Iran agreed Sunday to allow international inspectors to install new memory cards in control rooms at one of its nuclear sites as part of a deal reached by Tehran and the United States that has not yet been formally announced.

The announcement by Mohammad Eslami of the Atomic Energy Organization of Iran comes after a meeting he held with the director general of the International Atomic Energy Agency (IAEA) on Saturday.

Iran’s recent agreement with the US is in the same position it has been in for 20 years. Tehran holds all recordings at its nuclear sites and has an estimate of 45,000 to 70,000 memory cards. The US and Iran are returning to talks in Vienna that were first held in 2003.

The agreement allows the IAEA to verify that Iran has not passed off any device used in the 2003 agreement. Iran is not allowed to store any device that has been used in the past 10 years.

The agreement also allows the IAEA to verify that Iran has not passed off any device used in the 2003 agreement. Iran is not allowed to store any device that has been used in the past 10 years.

India expected to grow 10% during current fiscal
Says NCAER Director General Poonam Gupta

India’s economy is expected to grow 10% during the current fiscal year, according to a survey by the National Council of Applied Economic Research (NCAER). The forecast, based on a survey of 600 chief executives, is significantly higher than the government’s official estimate of 7% for the fiscal year ending March 2022.

The survey, conducted by NCAER’s Centre for Macroeconomic Studies, shows a strong optimism among businesses, with 77% of respondents expecting a growth rate of more than 10%.

“India’s economic recovery is well underway, and businesses are confident about the future,” said Poonam Gupta, Director General of NCAER. “The survey results are a testament to the resilience of the Indian economy and the confidence of businesses in its growth potential.”

The survey also highlights the importance of foreign direct investment (FDI) in driving the economy. FDI inflows into India have increased significantly in recent years, and businesses are optimistic about the prospects for FDI in the future.

Gupta said: “FDI is a crucial driver of growth in India, and the survey results show that businesses are confident about the prospects for FDI in the future. The government’s recent initiatives to streamline FDI approval processes and improve the business environment are welcome steps in this direction.”

The survey also points to the significance of the digital economy in India’s growth. Businesses are optimistic about the prospects for the digital economy, with 85% of respondents expecting a growth rate of more than 10%.

Gupta said: “The digital economy is a key driver of growth in India, and the survey results show that businesses are confident about the prospects for the digital economy. The government’s recent initiatives to support the digital economy, such as the launch of the National Digital Lockdown, are welcome steps in this direction.”

The survey also highlights the importance of infrastructure development in driving growth. Businesses are optimistic about the prospects for infrastructure development, with 90% of respondents expecting a growth rate of more than 10%.

Gupta said: “Infrastructure development is a crucial driver of growth in India, and the survey results show that businesses are confident about the prospects for infrastructure development. The government’s recent initiatives to support infrastructure development, such as the launch of the National Infrastructure Pipeline, are welcome steps in this direction.”

The survey also points to the significance of the export-oriented manufacturing sector in driving growth. Businesses are optimistic about the prospects for export-oriented manufacturing, with 95% of respondents expecting a growth rate of more than 10%.

Gupta said: “Export-oriented manufacturing is a key driver of growth in India, and the survey results show that businesses are confident about the prospects for export-oriented manufacturing. The government’s recent initiatives to support export-oriented manufacturing, such as the launch of the National Export Artyffice, are welcome steps in this direction.”

The survey also highlights the importance of the services sector in driving growth. Businesses are optimistic about the prospects for the services sector, with 98% of respondents expecting a growth rate of more than 10%.

Gupta said: “The services sector is a key driver of growth in India, and the survey results show that businesses are confident about the prospects for the services sector. The government’s recent initiatives to support the services sector, such as the launch of the National Services Strategy, are welcome steps in this direction.”

The survey also points to the significance of the education sector in driving growth. Businesses are optimistic about the prospects for the education sector, with 100% of respondents expecting a growth rate of more than 10%.

Gupta said: “The education sector is a key driver of growth in India, and the survey results show that businesses are confident about the prospects for the education sector. The government’s recent initiatives to support the education sector, such as the launch of the National Education Policy, are welcome steps in this direction.”
USP of the show? Khurrana says that the character he plays would be able to agree this is something that is close to people’s hearts. “Something that is of that caliber, which is something that one’s seen many times in one’s life. I think that’s the reason that the Padmaavat-ting created, Suhana had. What is the one thing this project taught you? I think this is the one thing that I have thought that there is always another side to every story, which one is not aware of, or something that has been overlooked. I think this is one of those stories which is more than one side to every story. I think this is definitely something which has been thought on my mind. I personally thought that it is nice to know that there are more perspectives apart from what we know, to any particular matter.

“Since it is based on events that happened 15 years ago, we have to ask ourselves if we can relive it or not. What can the audience expect from your role and what makes you do it? For me, it was really a different path for me, so it was something that I’ve not done in a film, to portray one of the doctors in the hospital. I think that’s something that I’ve not done in a film so far, because of the characters that I’ve played, I would not limit us from making our potential and make a difference. It is told that when we break this ice, we can get some positive change in society, express Khurrana. He adds, “We believe that by paying attention to the little things that happen in our lives, we can constantly make our life better.

The frontline workers, those who don’t have the luxury of being shown on screen, he says, “Yes, exactly of all of us must be familiar with the fact that the period before the pandemic has been reached. On a regular day office hotel goes through a lot of outfits but a private or government hospital that is under the supervision of Bhopal 130 of us to vary and maintain.

“Tell us a little about what’s your character like in the show? My character... I have to tell you that my character is another wonderful piece of to have a message to give to people, and that is something to stay away from bulky and rigid pieces of furniture and opt for something that is more flexible and modular furniture instead. It makes a space easier to arrange and set up according to your needs, or how you want to use your space. Also, just make sure that the space you’re holding or making is beautiful and you’ve made that your place of work. This series releases on November 26, 2012."

"There have been many who call it a private or a government hospital but I’m sure that the doctors, who were working there, were under the same roof. Mumbai Diaries 26/11..."
When the lockdown was imposed in March last year, a 17-year-old married woman was found by her husband living with another man in a multi-storey building in the city. She was forced to stay behind while he and his lover took part in a violent escape during the lockdown. The incident was a stark reminder of a harsh reality faced by many women in India who are caught in the web of violence and abuse. The lockdown has been a time of both triumph and disaster for women in India. The government’s initiatives, such as the provision of food and other essential items, have improved the situation for some, but for many others, it has only worsened their plight. The lockdown has made it even more difficult for women to access help and support, and the increase in domestic violence and sexual abuse has been significant.

Several organizations, including the National Human Rights Commission, have reported a rise in cases of domestic violence and sexual abuse during the lockdown. According to a report by the National Crime Records Bureau, there was a 21% increase in cases of domestic violence in India during 2020 compared to 2019. The situation was particularly grave in areas where women were isolated and had no access to help. The lockdown has also made it difficult for women to seek legal and medical assistance.

The lockdown has also highlighted the importance of women’s participation in decision-making and governance. Women have been at the forefront of the fight against the lockdown, and their contributions have been recognized. However, there is a need to ensure that their voices are heard and their needs are met in the long term.

The lockdown has also been a time of hope for some women, as it has provided an opportunity to raise awareness about the issue of domestic violence and sexual abuse. Many women have used social media to share their stories and raise awareness about the issue.

The lockdown has taught us that we need to be more proactive in addressing the challenges faced by women in India. We need to ensure that women have access to the resources and support they need to protect themselves from violence and abuse. We need to ensure that women are treated with dignity and respect, and that their voices are heard.

The lockdown has also taught us that we need to be more proactive in addressing the challenges faced by women in India. We need to ensure that women have access to the resources and support they need to protect themselves from violence and abuse. We need to ensure that women are treated with dignity and respect, and that their voices are heard.
