24 Jharkhand labourers stranded in Tajikistan

SURESH MISHRA / IBNEF CIBERNETICS

A group of 24 workers, including 18 Jharkhand labourers, have been stranded in Tajikistan for the last six months. Through social media, these 24 migrant labourers have requested the officials of Jharkhand and the Indian workers union to inspect their condition in all the districts. The workers have been working as farm workers in the fields of Tajikistan.

The labourers have sent a memorandum to the Chief Minister of India and the Government of India about the situation and in the video message, they have informed the company in which they were working not to pay salary for the last three months. They have also requested the central and state government to take necessary steps for the return of labourers to their homeland, adding that the labourers are not willing to return to their homeland due to the prevailing state of affairs.

In this regard, the Jharkhand Labour Department has informed that the workers have not been paid salary for the last three months and their employers are not willing to pay the salary. The Labour Department has also informed that the workers have not been able to return to their homeland due to the prevailing state of affairs.

SAIL R&D Scientists steal the show at 37th Engineering Congress

PINS / RANCHI

Researchers of BCSL, SAIL Shankar Prasad Giri of CSIR gave the title "catering" for their presentation "Catering in remote areas: a sustainable solution".

While Dr Shankar Prasad Giri of CSIR has given over 100 presentations, this was his first for the institute CIRC. While the other presenters have worked in the remote areas of India, this was the first time that Dr Shankar Prasad Giri had presented in a remote area of India.

XISS awarded with excellence in Social Responsibility Category in the Higher Education Summit organized by Collegedunnía Connect

PINS / JAMSHEDPUR

A 22-year-old indigenous student was the headline of the Social Responsibility Category in the Higher Education Summit organized by Collegedunnía Connect. The student, who was from Sibiu, a village in India, delivered a speech on the role of social media in social responsibility. The student, who was one of the few indigenous students to participate in the summit, spoke on the potential of social media in social responsibility and how it can be used as a tool to promote social responsibility.

Bokaro MLA inaugurates RCC road in Kurnool City

RAHUL BHATIA / BOKARO

Its much-awaited RCC road in the Kurnool City has finally been inaugurated by the MLA, Bokaro. The MLA, who is also the Minister for Road Transport and Highways, said that the inauguration was a significant step towards the development of the city and that it would help in the smooth flow of traffic.

7th Annual Day

Make learning a joyful experience: DIC

PINS

"learning a joyful experie -nce: DIC" was the theme of the 7th Annual Day celebration at DIC, which was held on Monday.

The theme was chosen to highlight the importance of making learning a joyful and enjoyable experience for students. The event was attended by teachers, parents, and students from different grades.

At the event, a variety of activities were organized, including quizzes, competitions, and workshops, which were designed to engage students in a fun and interactive way.

Admin issues guidelines for inter-departmental coordination

DEEPAK KUMAR / RANCHI

Different government plans and projects are being implemented at all levels of government, which are being coordinated by various departments.

However, it has been observed that there are challenges in coordinating these plans and projects. One such challenge is the lack of clear guidelines for inter-departmental coordination.

Therefore, the administration has issued guidelines for inter-departmental coordination in order to ensure that the plans and projects are implemented smoothly and efficiently.

The guidelines have been prepared after consultation with various departments, and they cover a range of topics, including communication, coordination, and planning.

It is important to note that the guidelines are not exhaustive and that departments may need to develop their own strategies and approaches to coordinate their plans and projects.

Photo exhibition on Azadi Ka Amrit Mahotsav

PINS / JAMSHEDPUR

A photo exhibition titled "Azadi Ka Amrit Mahotsav" was recently held in Jamshedpur. The exhibition was organized to celebrate the 75th anniversary of India's independence.

The exhibition showcased a variety of photographs, including portraits of prominent figures, historical moments, and everyday life in India.

The exhibition was held at the Jamshedpur City Hall, and it was open to the public.

**Newly appointed JPCQ office bearers meet to remove JPCQ Chief**

Newly appointed office-bearers of the Jharkhand Congress, held a special meeting in the office of JPCQ Chief, Ranchi, on Monday. In the meeting, the JPCQ Chief, Radhakrishna Shukla, along with all the office bearers present in the meeting in Ranchi, decided to remove the JPCQ Chief, Radhakrishna Shukla, from his post.

It was decided in the meeting that the JPCQ office bearers will go to Delhi in the first week of January 2023 to meet the JPCC Chief, Ram Chandra Pachauri, and inform about the situation and from there, they will visit the districts, which are under the behest of Singh is not removed without delay,

Talking to media persons about the incident, Senior JPCC Leader, Shyamal Kumar Dubey said that an effort will be made to remove the JPCQ Chief. From there they will join the JPCQ Chief meeting in Delhi.

Consequently, the Starred Question Hour, speaker constitutes business advisory committee of House
Two judges don’t decide: BJP MP opposes same-sex marriages

The CEO of Google and CEO of Facebook were five of the 166 people of Indian origin who were on the shortlist for the post of CEO of Google, the company announced on Thursday. But when it came to the final decision, only four names were shortlisted for the role.

The four shortlisted candidates included Google's chief executive officer, Sundar Pichai, and Facebook's CEO, Mark Zuckerberg. Other names on the list were four Indian-origin entrepreneurs, including two from Silicon Valley. The list also included two men who had previously worked for Google and Facebook.

According to the company, the final selection process would involve several rounds of interviews and discussions with various stakeholders, including employees and shareholders. The company said it would announce the final decision in the coming weeks.

On the other hand, the state government has been against any decision that would harm the sentiments of the majority community. The government has repeatedly expressed its concerns, saying that such a move could lead to social unrest and violence.

However, the government has also been mindful of the needs of the LGBTQ+ community and has been working to create a more inclusive and inclusive society.

In its final decision, the company said it would work closely with the Indian government to ensure that the new CEO has a good understanding of the country's cultural and social norms, as well as its legal framework.

The company also said it would work with the government to ensure that the new CEO has a good understanding of the country's cultural and social norms, as well as its legal framework.

Title: Child Marriages still...Marathwada Catches the Eye

The economic structure and its impact that leads to child marriages.

Lavina Chavan

Text:

The Union Budget was for

The social and economic woes are at the core of this vicious cycle that embarks families like Sangeeta’s generation after generation. To unravel this circle, we need to work with commitment and assist the government to end child marriage. Several Non-governmental organizations need to implement programs that can end child marriage.

For the next six months, their married life carried on, facing new challenges at every turn. When the couple returned to their village from the sugar factory, they realized that Sangeeta’s marriage to a sugar cutter had not been a frequent marriage. Shortly after the marriage, her parents left for their hometown. Sangeeta’s condition cannot be considered healthy if she was married off to a sugar cutter.

Sangeeta’s parents couldn’t take into consideration their daughter’s development when they married her off. Marrying a daughter off at an age of 16 is as critical a decision as the freedom of women. Freedom was trapped in capacity, socio-economic status, health, and physically, and socially, they were trapped in a vicious cycle.

Her parents agreed to her education, and she was enrolled in her local school. She secured an admission for a primary school and got enrolled in a Primary School. Then, she chose to continue her studies and got enrolled in higher education, and then in college.

The emerging data on the number of child marriages shows that child marriages are provided with economic means, they will be able to educate their children. Child marriage is not the end of any family life carried on, facing new challenges at every turn. When the couple returned to their village from the sugar factory, they realized that Sangeeta’s marriage to a sugar cutter had not been a frequent marriage. Shortly after the marriage, her parents left for their hometown. Sangeeta’s condition cannot be considered healthy if she was married off to a sugar cutter.

To unravel this circle, we need to work with commitment and assist the government to end child marriage. Several Non-governmental organizations need to implement programs that can end child marriage. In the post-COVID world, the Nirmala Sitharaman’s government had written off about Rs 20 lakh crore through the creation of special purpose vehicles (SPVs) for debt resolution. It simply means bank customers will have to absorb a huge burden to pay back the money they owe. It is a huge burden on the economy, and it is only the beginning.

Russia, China to hold joint naval drills

Russia's warships set off Sunday for a joint naval drill with China, an official said, describing it as a "tactical" step to counterbalance a US military exercise in the region.

The Russian Defense Ministry said on Sunday that the drills, which will take place near the islands of the United Nations Trilateral Declaration海域, will involve destroyers and corvettes.

"We will see light and hope in the darkness of Russia's history, " said the Russian Defense Ministry.

The drills are part of a broader military cooperation between Russia and China, which has been increasing in recent months.

"We are not alone, we have friends," the Russian Defense Ministry said in a statement.

The drills are aimed at demonstrating the strength and capabilities of the two militaries, which are believed to be preparing for a conflict with the United States.

"All the world loses," said a statement from the Russian Defense Ministry.

"There will be light and hope in the darkness of Russia's history, " said the Russian Defense Ministry.

"These are the words of the Russian people, who are determined to defend their country and their way of life, " said the Russian Defense Ministry.

The drills are expected to involve several thousand troops and vessels from both countries.

"This is a moment of truth for the world, " said the Russian Defense Ministry.

Jan 6 panel pushes Trump's prosecution in forceful finish

President Joe Biden's 2024 bid talks little to damp down chatter

North Korea said Monday it has launched a new test of a satellite capable of carrying weapons, its sixth firing of an object into space in less than two years, in a challenge to South Korea and leading rivals Japan and the United States.

The rocket carrying the test satellite was launched from the country’s west coast, Kim Jong Un’s government said in a statement.

The announcement comes as North Korea tries to keep up apace with technology advances such as satellite launches and drone development.

The satellite was fired into an orbit that will pass over the Amazon rainforest and will be used for a military purpose as part of improvements to North Korea’s military reconnaissance capabilities, it said.

The launch, the fifth by North Korea this year, will raise concerns in the region about the country’s efforts to develop its military capabilities, including its nuclear programme.

The test satellite aims to demonstrate North Korea’s capability to put a satellite into orbit, a step that could pave the way for a possible arms race in the region, analysts said.

North Korea has made advances in its satellite technology in recent years, and the launches have been seen as a way to improve its reconnaissance capabilities. However, North Korea last fired a satellite in May 2021, which was also aimed at demonstrating the country’s capabilities.

On Monday, North Korea said it had fired a test satellite into an orbit that will pass over the Amazon rainforest, with the aim being to demonstrate its capability to put a satellite into orbit.

The statement of the armament of a new satellite is the latest attempt by the country to improve its military reconnaissance capabilities, analysts said.

North Korea has launched six test satellites since 2016, with the most recent being in May this year.

The country’s defence minister, Gen. Kim Jong-un, said the satellite was launched as part of the country’s efforts to strengthen its military capabilities.

The satellite launch is likely to be viewed as a challenge to the United States and South Korea, which have been facing tension with North Korea over its nuclear programme.

North Korea has made advances in its satellite technology in recent years, with the most recent launch in May aimed at demonstrating the country’s capabilities.

The launch is expected to be seen as a challenge to the United States and South Korea, which have been facing tension with North Korea over its nuclear programme.

The latest test satellite launch follows North Korea’s fifth nuclear test in September last year, which was said to have been aimed at demonstrating the country’s ability to carry out multiple nuclear weapons tests.

North Korea’s latest test satellite launch comes as the country continues to develop its military capabilities, including its nuclear programme.

The launch is expected to be seen as a challenge to the United States and South Korea, which have been facing tension with North Korea over its nuclear programme.

Sugar output up 5% during Oct 1-Dec 15, 2022 period

India will be a big export opportunity for India, which is in the process of creating a balance between safety and human rights, with a focus on the rights of workers in the food and agriculture sector, according to a recent report from the World Bank and the International Food Policy Research Institute (IFPRI).

The report, titled "India's Food Security and Nutrition Agenda," highlights the country’s efforts to address the growing demand for food and the need to ensure that food is produced and consumed sustainably.

India's food security and nutrition agenda is crucial in the context of the country’s rapidly growing population and the increasing demand for food. The report notes that India is a major producer of food crops, and its agricultural sector is expected to continue to play a key role in meeting the country's food needs in the future.

The report also highlights the need to address the issue of food loss and waste, which is a significant problem in India. According to the report, about one-third of the food produced in India is lost or wasted, which has a major impact on the country’s food security and nutrition.

India's food security and nutrition agenda is expected to benefit from the country’s efforts to improve agricultural productivity, increase access to food, and ensure that food is produced and consumed sustainably. The report notes that India’s food security and nutrition agenda is an important part of the country’s overall development strategy, and that it will be crucial for ensuring that the country can meet the growing demand for food in the coming years.

Flexible staffing model

India’s flexible staffing industry, which has been growing rapidly in recent years, is expected to continue to grow in the coming years, according to a recent report from the India Staffing Federation (ISF).

The report notes that the flexible staffing industry has been growing at a compound annual growth rate of 12% in the past five years, and that the industry is expected to continue to grow at a similar rate in the coming years.

The report also notes that the flexible staffing industry is expected to benefit from the country’s efforts to improve the quality of education and training in the country. According to the report, the government is expected to increase its spending on education and training, which is expected to benefit the flexible staffing industry.

India aim to sign off with win

The 27-year-old, who is the most experienced among the Bangladesh pace battery, has been under pressure to deliver. His bowling average of 41.08 and economy rate of 4.43 in 2020 are his best figures in the past six years. This season, he has taken 16 wickets from 13 matches to become the first bowler to get 100 wickets in a calendar year. He has also shown improved performance in the last six months and has performed well in the World Cup Qualifier tournament in the United Arab Emirates.

His performance has been instrumental in helping Bangladesh qualify for the World Cup for the first time in their history. He has been dubbed as the ‘pace spearhead’ of the team and has been key in their success in the tournament. His remarkable figures have helped Bangladesh beat many strong teams and reach the semi-finals of the tournament.

India, on the other hand, have been in a dominant form in the tournament. They have won all their five matches and are currently at the top of the points table. They have showcased their batting, bowling, and fielding skills, and have been consistent in all aspects of the game.

With both teams having won their previous games, the match promises to be a thrilling encounter. The winner of the match will have a strong chance of qualifying for the semi-finals of the tournament.

It is expected to be a close contest between two strong teams. The pace bowlers of both teams will be key in determining the outcome of the match. The batsmen will have to step up and deliver their best performances to win the match for their teams.

It will be an exciting match for the fans of cricket and a battle of two great teams. The victory will go to the team that can perform better on the day and execute their strategies correctly.

The match is scheduled to start at 2:30 PM local time and will be held at the National Stadium in Karachi. It is expected to be a thrilling match and is sure to be a treat for the cricket fans.

India's bowling unit has been in great form and has taken many wickets. However, Bangladesh's pace battery has also been performing well and has taken many wickets. It will be interesting to see how both teams will perform in this match and who will come out on top.
