Uttar Pradesh and Chhattisgarh are voter turnout of around 60 per cent. The second phase of the UP poll was a repeat of the first phase with little lack of enthusiasm. The State recorded 64 per cent polling in the first phase on Monday for 35 out of 403 seats. In 2017 Assembly elections, 67 per cent voter turnout was registered in second phase of elections.

Aujas voter turnout has come in to 51 per cent till 1 pm on Monday in Uttar Pradesh, polling kicked off after a short delay. The first phase of Assembly elections on February 10, 2021, had recorded voter turnout of over 60 per cent.

The BJP chief electoral officer (CEO) Ajay Shukla on Tuesday said the total voter turnout will increase as the polling will continue till 4 pm. He said all the voters will be able to cast their votes as per directions of the Election Commission of India (ECI). The CEO said the polling was peaceful in 43 Assembly constituencies in the two states during this phase.

Officers’ stir hits 550 Grama Bank branches

Officers press 12-point charter of demands

The Association of Officers of Grama Bank has decided to stage a 12-point stir demanding better pay, provident fund, higher basic pay, better allowances, and other facilities. The Association said that the Government is still not giving proper attention to the demands made by them, and therefore, they are forced to take this step. The Association has already written a letter to the Government, but no action has been taken so far.

Yogi launches only attack on OP in Hathras rally

Hathras: The BJP is leaving no stone unturned in its war against the Assembly seat in Hathras — a seat where the OBC community is strong. The rally scene was dominated by the party's top leaders who said that the OBC community had been abandoned. The Chief Minister said that the party was not in power in the state for the past 19 years. He also said that the OBC community was not satisfied with the government. He added that the people of Hathras had been deprived of the benefits of the government. The OBC community has been demanding the reservation of 27% in the state but the government has not taken any steps towards it. The Chief Minister also said that the party's target was to win the state Assembly seat. The party is also targeting the OBC community in other states like UP, Haryana, and Himachal Pradesh where it has been struggling to win. The BJP is also targeting the OBC community in its campaign in the upcoming election in UP. The Chief Minister said that the party's target was to win the state Assembly seat. Back to school

Young students must be taught to follow a healthy lifestyle, food and take up exercising

A few years ago, all the children were finally going back to school. Some kids, especially those in primary classes, would attend school for the first time in their lives. Schools from Class I to VIII also are open from Delhi to Uttar Pradesh and Madhya Pradesh. After the reduction in the number of Corona cases, junior classes have been reopened in many States where senior classes had already been started. In Uttar Pradesh and Madhya Pradesh, students of primary classes have started attending offline classes from February 14. Schools were reopened for senior classes in Delhi on the 26th after a lot of pressure from parents who were worried about their kids sitting at home for nearly two years now. Children from nursery to class VIII will also be able to go to school in the Capital now. It is indeed a matter of great relief for parents across the State that life is beginning to normal and the scarring of the pandemic is slowly fading away. But that it has vanished altogether but its sequel is now significantly compromised. Moreover, after the school is reopened, the children need to be taught in schools to follow a healthy lifestyle besides taking up healthy and exercise. But then, we often, what learn from this crisis is that we don’t understand anything from it.

Dear Editor —

The United Nations was supposed to be the trading block, the engine of change, the melting pot of humanity, the vehicle of mutual understanding, the bridge of international cooperation, and the forum for global security and development. It was supposed to be the protector of human rights, the arbiter in conflicts, and the enabler of peace. It was supposed to be the guardian of the common good, the advocate of the marginalized, and the defender of the vulnerable. It was supposed to be the beacon of hope, the light of justice, and the voice of reason. It was supposed to be the embodiment of the will of the nations.

But it is at a loss. It has been beset by crises, challenges, and controversies. It has been accused of bias, inefficiency, and corruption. It has been criticized for its failure to address global threats, its inability to resolve conflicts, and its lack of accountability. It has been questioned for its role in international affairs, its impact on global governance, and its relevance in the 21st century.

In the face of these challenges, the United Nations faces an existential crisis. It needs to re-examine its mandate, its mechanisms, and its effectiveness. It needs to engage in meaningful dialogue with its member states, civil society organizations, and the private sector. It needs to demonstrate its value to the people by delivering on its promises.

It is time for the United Nations to take a stand on the issue of global terrorism. It is time for the United Nations to act to prevent and disrupt cross-border terrorist networks. It is time for the United Nations to support the member States in their fight against terrorism.

The United Nations has a role to play in this crisis. It can help to coordinate international efforts, to provide financial and technical assistance, and to promote awareness and understanding. It can also help to build trust and confidence among the member States.

It is time for the United Nations to take a lead on this issue. It is time for the United Nations to show that it is a force for good and a beacon of hope in the face of global challenges.

The United Nations cannot afford to remain silent or irrelevant in the face of this crisis. It must demonstrate its commitment to the cause of peace, security, and development. It must engage directly with the member States and with other stakeholders to address the issue of cross-border terrorist networks.

It is time for the United Nations to act. It is time for the United Nations to prove that it is worthy of its name.

The subsidy currently covers 800 million and is meant for the poor. Heavily subsidised food is for the very poor. How can 2/3 of Indians be very poor?

The Budget: food subsidy confusion

The Union Budget for 2022-23, the third budget in the current Modi government, has allocated Rs 1,39,000 crore towards the Centre's food subsidies. This amount seems quite generous, but it may not be as helpful as it seems. The budget aims to reduce food subsidies to 2.5% of GDP by 2026. But this reduction will only benefit the richest, not the poor. In fact, the budget may even increase the cost of food for the poor.

The food subsidy scheme in India is a complex one. It involves several different schemes, including the Food Fortification Program and the Public Distribution System (PDS). The PDS provides subsidised food to about 750 million people in India. The scheme is meant to help the poor, but it is also being misused by middle-class consumers.

One of the main issues with the PDS is that it is not targeted at the poorest people. Instead, it is being used bymiddle-class consumers who want to save money on food. This is because the PDS provides a subsidy of about 60% on the retail price of food. This subsidy is not given to the poorest people, who are more likely to be poor.

Moreover, the PDS is also being misused by middle-class consumers who want to save money on food. This is because the PDS provides a subsidy of about 60% on the retail price of food. This subsidy is not given to the poorest people, who are more likely to be poor.

The Indian government is aware of this problem, and it has been working to improve the PDS. For example, the government has been trying to target the PDS at the poorest people, and it has been working to increase the PDS's efficiency.

However, the government has not been able to do this quickly enough. The PDS is still being used by middle-class consumers, who want to save money on food. This is because the PDS provides a subsidy of about 60% on the retail price of food. This subsidy is not given to the poorest people, who are more likely to be poor.

The government has also been trying to improve the PDS's efficiency. For example, it has been working to reduce the time it takes for food to reach the poor people. The government has also been working to reduce the cost of the PDS.

The government has also been trying to improve the PDS's efficiency. For example, it has been working to reduce the time it takes for food to reach the poor people. The government has also been working to reduce the cost of the PDS.

The government has also been trying to improve the PDS's efficiency. For example, it has been working to reduce the time it takes for food to reach the poor people. The government has also been working to reduce the cost of the PDS.
Kremlin signals more talks with West amid Ukraine tensions

MOSCOW: Russia’s top diplomat advised on Monday that talks should keep following the Western strategy, a signal from Russia that it intends to continue diplomatic efforts amid US warnings of an imminent Russian invasion of Ukraine.

Moscow denies it has any plans to attack Ukraine and has called for talks between all sides, but Western powers say such efforts are so far without tangible results.

Poland prepares to accept Ukrainian refugees in case of war

Bringing in refugees because of the war in Ukraine is preparing to accept Ukrainian refugees in case of another Russian attack on its eastern border, the country’s prime minister said on Monday.

Poland has been on high alert since Russian troops entered Ukraine, and Poland is prepared to accept Ukrainian refugees in case of another Russian attack.

On Parkland anniversary, Biden urges Congress on gun control

Washington: Four years after 17 high school students and a teacher were killed in a mass shooting in Parkland, Florida, President Biden on Monday will urge Congress to pass a bill to expand background checks for firearms.

Biden, a Democrat, has made gun control a priority since taking office in January 2021. He has backed legislation to require background checks for all gun purchases, including those sold online or at gun shows.

In a statement released before the event, Biden said he would like to see Congress pass the gun safety measures. He also said he would continue to push for additional gun control measures.

Biden said his action was intended to send a clear message to Congress that the American people demand action on gun violence.

Biden’s administration is pushing for legislation that would expand background checks for all gun purchases, including those sold online or at gun shows. The president has also called for a ban on certain types of assault weapons and high-capacity magazines.

In a statement released before the event, Biden said he would like to see Congress pass the gun safety measures. He also said he would continue to push for additional gun control measures.

Tata Sky, India’s largest direct-to-home (DTH) service provider, has announced a strategic partnership with SES, a leading global technology and service provider for satellite-based video and data services to customers in India, to provide satellite-based broadband services under the Production Linked Incentives (PLI) scheme.

The PLI scheme is a government initiative to boost manufacturing in India by offering incentives to companies that meet certain production targets. The scheme aims to attract foreign direct investment (FDI), create jobs, and enhance India’s competitiveness in the global market.

Tata Sky, which is already a significant player in the Indian DTH market, is expected to benefit from this partnership. The company has been looking to expand its offerings beyond traditional television services and is exploring new opportunities in the space sector.

“India is a key market for us and we are excited to partner with Tata Sky to bring our technology and expertise to Indian customers. This partnership is a step forward in our mission to bring the power of space to everyone in India,” said a spokesperson for SES.

Under the terms of the agreement, SES will provide Tata Sky with access to its global network, including more than 70 satellites, to offer broadband services to consumers in India. The partnership is expected to enhance the customer experience by providing faster and more reliable internet access through satellite technology.

“This partnership with SES is a significant milestone for Tata Sky as we continue to expand our offerings to customers. We believe that satellite-based broadband will become an important part of our service portfolio in the coming years,” said an executive from Tata Sky.

With the increasing demand for high-speed internet access, Tata Sky is well-positioned to leverage the benefits of satellite technology to offer an alternative to traditional wired internet services. The company has been working to improve its existing DTH network and is expected to leverage its existing infrastructure to roll out broadband services.

The partnership with SES is expected to bring significant benefits to both companies. SES, with its extensive satellite network, can provide Tata Sky with the necessary capabilities to offer high-speed broadband services to consumers in India. For Tata Sky, this partnership offers an opportunity to diversify its revenue streams and enter into new markets.

Overall, the partnership between Tata Sky and SES is a positive development for the Indian market. It highlights the potential for collaboration between space technology and traditional telecommunications services and offers an opportunity for innovation and growth in the Indian telecommunications sector.
Recognised and under-treated disorder

Timely diagnosis and appropriate management can lead to a significant improvement in the quality of life, says DR SUMIT SINGH

Preserving is a smart move

As ectopic pregnancy occurs when a fertilised egg grows outside the uterus, usually in the fallopian tube. The growth of this pregnancy is a problem as it cannot proceed normally, hence required surgical or medical intervention depending on the patient’s condition.

Generally, fertility is not affected if the fallopian tube remains intact. The treatment can be medicinal or surgical. Immediate intervention is necessary in case of internal bleeding and pain in the abdomen. Depending on the severity of the pregnancy, medications may take several weeks for periods and fertility returns. Generally, the treatment is a surgical one in the abdomen.

Preservation of the ectopic pregnancy as well as conserving the tube. Doctors ensured this difficult time, it is important to understand what ectopic pregnancy is. There is a natural feeling of loss, grief, shock, anxiety, and confusion which can be overwhelming. The end result is defined as a headache occurring for more than 16 days in a month or for more than 15 days in a week. The condition is called migraines.

Migraines are considered one of the most disabling chronic neurological diseases and can impact a person’s quality of life. Migraines can be disabling, as people are unable to carry on normal daily activities. There are several reasons for the increase in migraines, such as stressful situations, poor diet, lack of exercise, and hormonal changes.

In Pakistan, the most common reasons for migraines are stress and poor diet. People living in the region are exposed to various stressors, such as financial difficulties, cultural pressures, and social norms. Stress and poor diet are the most common factors contributing to migraines. The condition is more prevalent among women and individuals living in urban areas.

The treatment of migraines is usually a combination of medication and lifestyle changes. The medication may include pain relievers, anti-inflammatory drugs, and medications that prevent migraines. Lifestyle changes may include stress management techniques, such as meditation and exercise, and improving diet and sleep habits.

In conclusion, migraines are a common and disabling condition. It is essential to identify the underlying causes and implement effective treatment strategies. Preventive measures, such as stress management and healthy lifestyle choices, can help reduce migraines. Early diagnosis and effective management can improve quality of life for individuals suffering from migraines.
Padmini Chakravarty, the author of ‘Hindutva: How the Sangh Is Reshaping the Indian State’, explores the requirements to learn this uncharted territory.

The evolution of modern India is an area of intense exploration with academic and author Mukulika Banerjee. It will discuss the making of new India and the legacy embodies the vast and kaleidoscopic diversity of the Indian landscape.

The disability rights movement is silent but underestimated. Professor and entrepreneur Anu Sharma calls for women to take an inclusive process for all women.

The Madras High Court has ruled that the sale of 1300 paintings, the most significant law cases in India, is an important area of study. The court has ordered the Madras High Court to take action against the state government for not taking appropriate and necessary steps to ensure that any art bought from galleries is never be forged so that it remains truly unique.

The graph of the economy, inflation, and deflation, the business and economic conditions are introduced.

The establishment of dear provisions and clear provisions for the point to the art community. With the increasing demand for art over the last few years, the incidence of forgery and the art world has become a problem. The government has put the tool to tackle this issue and has focused on solving this problem.

What would bringing blockchain technology to the art market mean? Blockchain certification means that the artwork is authentic and cannot be tampered with. If blockchain is used for the art gallery, then it would ensure that any art sold by galleries has a clear line of origination/provenance and will ensure that any art sold by galleries has a clear line of traceability. It will also ensure that any art sold by galleries has a clear certification implying? While we are the first and foremost in this field, we have developed a unique system that will ensure that any art sold by galleries has a clear line of traceability. It will also ensure that any art sold by galleries has a clear certification implying?

How do artists and this new law affect art?
PSG-Real Madrid highlights last 16

T he Champions League is back. It’s the start of the knockout stage, with the headline match being the meeting between European football’s serene – the 13-time winner Real Madrid – and the group-upstart Paris Saint-Germain, which is looking to be the continued champions for the first time. A look at this match and the other three first-leg games in the last 16 this week.

Paris Saint-Germain vs. Real Madrid

Paris Saint-Germain’s dream of winning a first Champions League title is alive and kicking. Back-to-back wins against 15-time champions Real Madrid has struggled all season against teams that play patiently on the counter. Madrid is arguably the best team in the world, but PSG has the edge in midfield with Luka Modric and Casemiro.

Sporting vs. Manchester City

A welcome draw — on paper, at least — and a full-size and in form. Manchester City is in great shape at the start of the knockout stage of this Champions League tournament. City’s only loss in all competitions so far — 0-2 at the Etihad against Paris on August 24 — was to Kyle Walker’s akan destron de l-logik na Sporting and the firing of the blueprint City program.

Real Madrid vs. PSG

The Portuguese champions have made the perfect start to their last-16 campaign, with a 3-2 victory over Paris in the first leg. The capital city has claimed victory in the knockouts for the first time in 13 years, since winning the competition in 2016. Real Madrid is on Benzema, and its reliance on Kylian Mbappe than on the left. City, the beaten finalist in 2008-09, is in the last 16 for the first time since completing a run of 20 games — was 2-1 down in the final match. Last year’s Champions League group stage, which means little. PSG’s manager was already assured of advancing. Indeed, more significant than three points was the final for Jefferson L<ul><li>o</li><li>Malcolm</li><li>Stark</li><li>Gordon</li><li>Davis</li><li>William</li><li>Johnson</li><li>Smith</li><li>Anderson</li></ul>
