Bihar liquor law comes under SC scanner

**Turkish airlines former chairman appointed CEO, MD of Air India**

New Delhi: Former Turkish Airlines president and former political science researcher has been appointed as the Chairman, Managing Director of Air India Limited under the Ministry of Civil Aviation.

The appointment comes after the Reserve Bank of India and the Ministry of Civil Aviation avoided the appointment of this individual on various grounds.

This individual was in the board of directors of the Reserve Bank of India (RBI) and was involved in various regulatory matters. He was also a member of the Committee of Directors of Banks (CDB)

The government has been in talks with various individuals for the appointment of the CEO and MD of Air India Limited.

CJI Bhushan Pandey resigns

The Supreme Court of India on Friday approved the resignation of CJI Bhushan Pandey and three other judges of the top court.

The CJI had submitted his resignation on Saturday after the Supreme Court Collegium had recommended his withdrawal from office.

The collegium had recommended the withdrawal of CJI Bhushan Pandey's name from the court's registry on the basis of his health issues.

The Supreme Court on Friday approved the resignation of three other judges of the top court, including the Chief Justice of the Gauhati High Court, the Chief Justice of the Patna High Court and the Chief Justice of the Allahabad High Court.

The Supreme Court said that the judges who submitted their resignations have expressed their willingness to retire from the service of the court.

**Irrigation department to focus on water conservation in 2022-23**

The irrigation department has unveiled its water conservation strategy for the upcoming financial year of 2022-23.

The department has identified several regions where water conservation is essential and has outlined specific initiatives to achieve this goal.

The department has also emphasized the need for stakeholders to work together to ensure the success of the water conservation efforts.

**India’s digital economy to continue to grow in 2022**

India’s digital economy is expected to continue to grow in 2022, driven by increased digital adoption and investments in technology.

The Indian government has been focusing on initiatives to promote the digital economy, including the Atmanirbhar Bharat campaign and the National Digital India programme.

These initiatives are expected to drive growth in various sectors of the digital economy, including e-commerce, fintech, and online services.

**Reduction in rural distress and poverty in India**

The Indian government has been working to reduce rural distress and poverty in the country.

Various schemes and initiatives have been launched to address these issues, including the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) and the Pradhan Mantri Jan Dhan Yojana.

These schemes have been effective in providing employment opportunities and financial inclusion to millions of rural households.

The government has set targets to further reduce rural poverty and distress in the upcoming years.

**Growing demand for renewable energy in India**

The demand for renewable energy in India is expected to grow significantly in the coming years.

The government has set ambitious targets for renewable energy capacity addition, including 450 GW of renewable energy by 2030.

Various initiatives, such as the National Solar Mission and the Wind Power Policy, have been launched to achieve these targets.

These initiatives are expected to drive investments in renewable energy and create new job opportunities in the sector.

**India’s tourism sector in recovery**

India’s tourism sector is gradually recovering from the impact of the COVID-19 pandemic.

Various measures have been taken by the government to revive the sector, including the waiving of visa fees for several countries and the promotion of domestic tourism.

These efforts have helped to revive the tourism industry, with an increase in domestic travel and a promising outlook for the foreign tourist arrivals in the near future.

Yogi launches only attack on Opat in Hathras rally

**Hathras:** The BJP is leaving no stone unturned in its Assembly seat of Hathras. Yogi Adityanath, during his visit to Opat village, launched a personal attack against Opat. Opat, an MP from the Bahraich constituency, is a congress MLA from Hathras assembly seat. 

Speaking to the media, he said, “We are fighting against the injustice, and the law is against those who are corrupt in Hathras. The BJP is ruling this state under the leadership of Yogi, and we are following the law to prevent corruption.”

**CBI files case against railway engineer, 7 others in 2 scam**

The CBI on Thursday filed a charge sheet against an engineer and seven others for alleged corruption in a railway project in Karnataka.

The engineer and others were arrested in May last year after a CBI raid at their residence in Mangaluru, where huge quantities of gold, jewellery, and other items were found. The CBI said the engineer had been working as an intermediary in the project.

The engineer was arrested for fraudulently making a claim for a project that was notional, the CBI said.

Uniformity
The need is to promote secularism among the citizenry without State interference
T he Kamalapa Kihuru controversy has triggered a spate of petitions in courts. One of the many questions that have been raised is whether the State should impose a common dress code for all registered and recognised schools and colleges in the country. He believes the code alone can preserve the secular charac-
ter of educational institutions. It is his understanding that students insisting on attend-
ing classes wearing accessories citing essential religious practices can erode that char-
acter. The right to wear these two items can also buttress the mores of custom, culturalism and fundamentalism. The petitioner submitted that educational insti-
tutions are secular public places and are meant to impart knowledge and wisdom, employ-
ing their own methods of teaching. So, he argues, State interference is not essential.

The problem revolves around the phrase, “being secular”. It is smudged by polit-
ics of recent years that its meaning is no more clear. In the context of the holy Kihuru, Devakumar Kamalapa Kihuru is in the middle of a storm for his “secular” action. The threats. The children now must be taught in schools to follow a healthy lifestyle besides taking up exercise and healthy food. But then, we often, what learn from this crisis that we don’t warn anything from it.

Way back in 1986, India had prepared a draft document on the comprehensive

Dear Sir,

I am writing this letter to express my gratitude to you for your thoughtful words and kind gestures towards me. You have been a significant figure in my life, and your support has been invaluable.

I know you are a busy person, but I felt it was important to reach out to you. I wanted to thank you for your encouragement and for being a role model to me. Your wisdom and experience have been a great source of inspiration.

I have had the privilege of learning from you during our conversations, and I have been able to apply what I have learned in various aspects of my life. Your guidance has helped me navigate challenging situations and make important decisions.

I would like to express my gratitude for your unwavering support and for being a constant source of encouragement. Your presence in my life has been a true blessing.

Once again, thank you for everything. I wish you all the best in your future endeavors.

With warmest regards,

[Your Name]

[End of Letter]
Guinea-Bissau is a cocaine transit point, apart from being one of the poorest African nations

according to a report by the Global Initiative Against Transnational Organized Crime, intended mainly to "achieve control of the region's illegal drug trade and promote regional cooperation." (The writer is a policy expert.)

"We are unable to communicate with national representatives in the UN or in the region, and we are unable to negotiate with the United Nations."

The next year, 2021-22, the government expected the FCI to purchase 27.5 lakh tons of rice, 3 lakh tons of wheat, and 1.53 lakh tons of pulses at the minimum support price (MSP) (33 per cent of the total requirement of 10.3 lakh tons). Against this, the FCI actually gave ₹212.01 lakh, the balance was used to lend to PCDA due to NSSF. For 2021-22, the government had budgeted ₹321.61 lakh, but the amount spent was ₹212.01 lakh. Against this, she has finally given ₹79.60 lakh as per MSP given in the budget for 2022-23. During these two years, the whole issue price (of rice) was higher than the MSP which was met through either loaning instead of buying from the MSP (from 2020-21) or making additional provisions through supplementary expenditure (2021-22). This was made possible because of the very generous fiscal deficit (8.9 per cent of GDP or about ₹6,500 crore in 2020-21 and 6.9 per cent of GDP or ₹3,900 crore in 2021-22) in line with this trend. However, from 2022-23, there is no chance to worry as with 8 per cent of GDP or less, the amount of the MSP will have to be even above the MSP (due to the very low budget deficit). It is important to note that the food security is impacted much more when the budget deficit is high than 5 per cent. Moreover, the budget deficit should be at a modest level.

The writer is a policy expert.

The dialogue can be prolonged if it is perceived that the government is not willing to make any concessions.

The point about Parlos is particularly important. Since he has declared himself an anti- guerrilla, the government should not make any concessions.

ULFA-TGOU

The Budget's food subsidy component

The subsidy currently covers 800 million and is meant for the poor. Heavily subsidised food is for the very poor. How can 2/3 of Indians be very poor?

In the Union Budget for 2022-23, the oil ministry has allocated Rs 9,790 crore less than the actual outlay of Rs 10,510 crore for 2021-22.)

This year's budget has allocated more than twice as much for the food subsidy component. The total allocation was ₹8,430 crore for 2021-22, 45 per cent of which was for the food subsidy. In the budget for 2022-23, the total allocation was ₹7,414 crore, of which ₹5,345 crore was for the food subsidy. The total outlay for the food subsidy was ₹6,045 crore.

The government expects the FCI to spend ₹3,525 crore on the food subsidy for 2021-22, and to spend ₹3,525 crore on the food subsidy for 2022-23. The cost of procurement of food has increased from ₹3,525 crore in 2021-22 to ₹3,525 crore in 2022-23, and to ₹3,525 crore in 2022-23. The cost of procurement of food has increased from ₹3,525 crore in 2021-22 to ₹3,525 crore in 2022-23, and to ₹3,525 crore in 2022-23.

So, what can the government do to make food subsidized?

In the Economic Survey for 2022-23, the Chief Economic Advisory (CEA) Committee has proposed an increase in the issue price for any of the food subsidy and an increase in the issue price for any of the food subsidy. The government is expected to increase the price of food (for the poor, especially subsidized food ( ₹21-3/2 per kg) should be not only for the very poor but also for other food poor is also very poor.

Moreover, the government should be able to limit the amount of food subsidy to about ₹1,000 crores annually. If it does not, there will be a public debate on the issue of food subsidy and the issue of food subsidy will be a major issue for the upcoming election.

All put together, the government should be able to limit the amount of food subsidy to about ₹1,000 crores annually. If it does not, there will be a public debate on the issue of food subsidy and the issue of food subsidy will be a major issue for the upcoming election.

The budget deficit should be at a modest level. If it is not, the food subsidy will be a major issue for the upcoming election.
Kremlin signals more talks with West amid Ukraine tensions

Moscow: Russia's top diplomat appeared to be ready to ease tensions with the West on Monday, saying that Moscow would be ready to talk about different topics at the expense of military drills and other military exercises.

Speaking at a meeting with Putin, Russia's top diplomat advised NATO to honor its promise to the West that it won't allow Ukraine to join the military bloc. Putin said that there is a chance to reach agreement on Moscow's security demands, a signal from the West that it was looking for an understanding with Russia.

However, the U.S. and its allies remain skeptical about Russia's intentions and are not ready to ease their military deployments in Europe. They have also questioned whether there is still a chance to reach an agreement.

On Parkland anniversary, Biden urges Congress on gun control

Washington: Four years after a shooting at Marjory Stoneman Douglas High School in Parkland, Florida, President Joe Biden on Monday took a broad view of the gun violence at schools, saying that there is a chance to reach an agreement on Moscow's security demands. A signal from the West that it was looking for an understanding with Russia.

The Biden administration has been calling for a ban on assault weapons and high-capacity magazines, but the U.S. Congress has yet to take action on these issues.

Biden has also called for a universal background check for gun purchases, which would require a check of the National Instant Criminal Background Check System to be conducted before a purchase. The administration has also been calling for an end to the so-called “buyback” programs, which have been used in the past to reduce the number of firearms on the streets.

On Monday, Biden said that there is a chance to reach an agreement on Moscow's security demands. A signal from the West that it was looking for an understanding with Russia.

Biden said that he was calling for a ban on assault weapons and high-capacity magazines, and for a universal background check for gun purchases.

Meanwhile, the U.S. House of Representatives has passed a bill that would expand background checks to all firearm purchases, including those that are made at gun shows and online.

The bill would also require gun dealers to report sales to the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) within 24 hours, which would allow the government to better track the movement of firearms.

The Biden administration has been calling for a ban on assault weapons and high-capacity magazines, but the U.S. Congress has yet to take action on these issues.

Biden has also called for a universal background check for gun purchases, which would require a check of the National Instant Criminal Background Check System to be conducted before a purchase. The administration has also been calling for an end to the so-called “buyback” programs, which have been used in the past to reduce the number of firearms on the streets.

On Monday, Biden said that there is a chance to reach an agreement on Moscow's security demands. A signal from the West that it was looking for an understanding with Russia.

**Preserving is a smart move**

A stye is an acute infection of the eyelid, usually occurring on the edge of the eyelid. It can be painful and cause redness, swelling, and pus in the affected area. Depending on the severity of the problem, some treatments may require more than one visit. In some cases, antibiotic or steroid eye drops may be prescribed to help treat an infection.

**BEETROOT:**

As a superfood, beetroot is a powerhouse of nutrients. It is high in fiber, vitamins, and minerals, and is known for its antioxidant and anti-inflammatory properties. Beetroot is also rich in nitrates, which can help improve blood flow and lower blood pressure.**

**What is convergence insufficiency?**

Convergence insufficiency is an eye condition where people have trouble maintaining healthy eyesight. This can happen when trying to focus on something close, such as reading or using a computer. Convergence insufficiency can cause eye strain, headaches, and sensitivity to light and sound.

**What is the best treatment for convergence insufficiency?**

The best treatment for convergence insufficiency depends on the severity of the condition. It may involve exercises that help strengthen the eye muscles, or it may require the use of prism glasses or other visual devices. In some cases, treatment may be needed for a short period of time, while in others, it may be needed for several weeks or months.

**Screening for convergence insufficiency**

Screening for convergence insufficiency is important because it can help identify people who may be at risk for developing vision problems. It can also help to determine the severity of the condition and the appropriate treatment options.

**Convergence insufficiency is a common problem for children**

Many children are likely to have convergence insufficiency at some point in their lives. It is estimated that up to 90% of children have some degree of convergence insufficiency, and this can increase as they grow older. Convergence insufficiency can interfere with learning and other daily activities, so it is important to identify and treat it early.

**What are the symptoms of convergence insufficiency?**

Symptoms of convergence insufficiency may include:

- Sore, red, irritated or watery eyes
- Stinging, burning, itching, or irritation
- Blurred vision
- Difficulty in focusing on a single object
- Headaches
- Sensitivity to light
- Sensitivity to sound
- Decreased ability to read
- Decreased ability to drive or operate machinery

**What are the causes of convergence insufficiency?**

There are several possible causes of convergence insufficiency, including:

- genetics
- physical trauma to the eye
- neurological injury
- brain injury
- eye surgery
- exposure to bright lights
- exposure to loud noises
- exposure to chemical irritants
- exposure to long hours of screen time
- exposure to poor lighting conditions

**How is convergence insufficiency diagnosed?**

Convergence insufficiency is usually diagnosed through a comprehensive eye exam. This may include:

- Vision testing
- Eye movement testing
- Eye muscle testing
- Eye pressure testing
- Visual field testing

**How is convergence insufficiency treated?**

The treatment for convergence insufficiency may include:

- Vision therapy
- Eye exercises
- Prism lenses
- Glasses
- Surgery
- Programmed eye exercises
- Drug therapy
- Alternative treatments

**What is the prognosis for convergence insufficiency?**

The prognosis for convergence insufficiency varies depending on the severity of the condition and its underlying cause. In general, with proper treatment, most people with convergence insufficiency can achieve good vision and improve their quality of life.

**What should patients do to improve their vision?**

Patients with convergence insufficiency should:

- Wear appropriate corrective lenses
- Use eye exercises regularly
- Avoid excessive screen time
- Maintain a healthy diet
- Stay physically active
- Get regular eye exams

**Convergence insufficiency and children**

Convergence insufficiency is a common problem for children and can affect their ability to see certain objects clearly. It can cause vision problems, headaches, and other symptoms, and it is important to identify and treat it early.

**What are the symptoms of convergence insufficiency in children?**

Symptoms of convergence insufficiency in children may include:

- Sore, red, irritated or watery eyes
- Stinging, burning, itching, or irritation
- Blurred vision
- Difficulty in focusing on a single object
- Headaches
- Sensitivity to light
- Sensitivity to sound
- Decreased ability to read
- Decreased ability to drive or operate machinery

**What are the causes of convergence insufficiency in children?**

There are several possible causes of convergence insufficiency in children, including:

**What is the prognosis for convergence insufficiency in children?**

The prognosis for convergence insufficiency in children varies depending on the severity of the condition and its underlying cause. In general, with proper treatment, most children with convergence insufficiency can achieve good vision and improve their quality of life.

**What should parents do to improve their children’s vision?**

Parents of children with convergence insufficiency should:

- Wear appropriate corrective lenses
- Use eye exercises regularly
- Avoid excessive screen time
- Maintain a healthy diet
- Stay physically active
- Get regular eye exams
LOVE IS IN THE AIR

PRADIT TAA CHAKRAVARTY’s intriguing canvases with seven characters and a little canine companion, celebrate the emotion. By UMA NAIR

Padma Chakravarty, the well-known artist, Sunanda Mukherjee and Jogin Kaviraj, pick up the mantle of innovative and stimulating powers from his two Kabin Banerjee, the celebrated and renowned art critic, celebrates Valentine’s Day in a novel, intriguing, and engaging work with seven characters and a little canine companion that tells the tales of various responsibilities that come with love. Be it a teapot or an animal, the artist’s vision of the canine is an animal that can cross the borders of a dish and a bottle.

Love is in the Air. One can look at the characters—that seven people and the little dog—that tell all the tales of various responsibilities that come with love. Be it a teapot or an animal, the artist’s vision of the canine is an animal that can cross the borders of a dish and a bottle.

Light and Tagore

The painting of an antique casket and a landlocked landscape is captured in one’s imagination. The landlocked landscape is a reference to the political and economic dilemma that India faces today. The artist, Solar Banerjee, has used in its similes and analogues (the vehicles and qualities of sense perception) a mix of the painting of the landscape and the metaphor of the landscape. The🚦

Dear reader,

I am deep diving into some of the sessions at the Hindutva: How the Sangh is Shaping Indian Democracy conference, held in New Delhi in February 2023. The conference, organized by the Indian Institute of Public Affairs and the Hindustan Times, brought together scholars, activists, and policymakers to discuss the role of the Rashtriya Swayamsevak Sangh (RSS) and its paramilitary organizations in shaping Indian democracy. The conference aimed to provide a comprehensive overview of the Sangh’s ideology and its impact on Indian politics.

One of the sessions that stood out to me was a conversation with writer, journalist, and academic Atal Bihari Vajpayee. The conversation was part of a series of interviews conducted by the Hindustan Times and published in their book And Bharat Vavrapur. As a former Prime Minister of India, Vajpayee shared his insights on the political landscape and the challenges that India faces today. He spoke about the importance of national security and the need for a strong and stable government. He also discussed the role of the media in shaping public opinion and the importance of free speech.

Another session that caught my attention was a conversation with filmmaker Subramanyan and Jogen Chowdhury, who discussed their experiences of working on a solo show for the Indian art market. The conversation was part of a series of interviews conducted by the Hindustan Times and published in their book Art Market: How to Navigate, 2013-2016. The artists shared their perspectives on the art market and the challenges that they faced in navigating it.

The Hindustan Times is a leading newspaper in India, and its coverage of the arts and culture is widely respected. The conference and the book are valuable resources for anyone interested in understanding the role of art and culture in shaping Indian society.

Michele Poonawala

Michele Poonawala will be selling her latest work at the annual art fair in a solo-exhibition at The Uppereast Gallery. The exhibition will include five works inspired and inspired by the vibrant culture of the city of Mumbai. The exhibition will run from February 10th to March 10th at The Uppereast Gallery. Visitors are encouraged to attend and experience the vibrant culture and creativity of the city firsthand.
PSG-Real Madrid highlights last 16

WAG 

The Champions League is back. It is the start of the most exciting stage, with the headline match being the second-leg between European football’s aristocracy – the Paris Saint-Germain and Real Madrid – which is looking to be continued in France. It will be a look at that match and the three other matches in the same group stage that were completed in the last 16 stage of the competition.

PARIS-SAINT-GERMAIN VS. REAL MADRID

Paris Saint-Germain’s dream of reaching the Champions League final in 2018 was ended by Real Madrid in the round of 16. Now the French giants are looking to avenge that defeat and progress to the quarter-finals for the first time since 2018. Real Madrid, on the other hand, are aiming to make history by becoming the first team to reach the Champions League final three times in a row.

SPORTING VS. MARSEILLE

A welcome draw – or so it at first seemed – as Marseille took on Sporting Lisbon in the Champions League. Marseille were looking to secure their first European win of the season, while Sporting were aiming to maintain their momentum after a successful start to the campaign.

SUNDERLAND VS. BAYERN MUNICH

The importance of captaining a team that has the advantage of being able to score in the first-half, with a 1-0 lead, is well illustrated by the match between Sunderland and Bayern Munich. The Germans were able to secure their first goal in the opening stages, which set the tone for the rest of the match.

Indian cricket:

India seek to sort out batting and fielding woes against NZ

Gautam Gambhir

Cricket is on the opening game of the tournament. India will have to target to win their first match against New Zealand. Meanwhile, the other teams will also have to take the initiative if they want to keep pace with the Indian team. The Indian team is looking to win their first match of the tournament against New Zealand.

Franchises cautious while going for U-19 stars

Harshad Ostwal

Franchises are cautious while looking for U-19 stars. They have to ensure that they get the right player to fit into their team. The U-19 talent pool is vast and it will be a challenge for the franchises to get the right player.

PSG-Real Madrid highlights last 16

Don’t think Kohli going through lean patch: Rathour

Rahul Rathour

Rahul Rathour said in a media interaction after the match, "Kohli is not batting well in the last few months, but he is still the best batsman in the world. He has been part of nine ODIs and scored a century in each of them. He has been consistent in all formats of the game and has played well in all three formats.
