A growing body of evidence indicates that the Omicron Covid variant is not only far more transmissible but also better at dodging some vaccines protections. “A vaccination strategy based on boosters could result in the original Covid vaccine completely being unable to be appropriate or sustainable,” the WHO Technical Advisory Group on COVID-19 Vaccines (TAG-Co-VAC) said in a statement. It added, “India, which recently successfully deployed the strategy ‘pre-dose’ to avoid large population-based catch-up doses of the original vaccine component, is unlikely to be able to provide appropriate or sustainable WHO Technical Advisory Group (TAG-Co-VAC) guidance to their citizens. A group of European researchers, too, has warned that the new variant is not only far more transmissible but also better at dodging some vaccines protections. ‘I think the group is slightly exaggerated… we think the variant is not so different, but we think it is a good point,’ Oleg Titov, the head of PREDICT, a global network of disease surveillance, told the Guardian newspaper.

Punjab conspiracy exposed in Pm’s security breach case- CM Dhani

---

**Puri - DEHRAUDAN**

The operation of the Punjab police personnel made public evidence of the breach in Prime Minster Narendra Modi’s security that was revealed during the Congress government of Punjab in 2002. In the same period, the then-Shiv Sena MP from Giritli, Ashok Sisodia, at a press conference on the issue of disclosure of information, said that the Congress party for the whole country and the breach to his security is a black chapter in the history of India.

The CM also listed the list of police personnel who had committed this breach of security. He said that the Prime Minister has been saving himself for five years and the whole team was involved in this. He also said that the Prime Minister’s life will be in danger if he is not saved. Sisodia also said that the Chinese government is also aware of the situation.

recognise untapped freedom fighters: PM

the Prime Minister said that men and women in the freedom struggle had refused to surrender before the enemy, be it the British or any other. The Prime Minister said with both conviction and confidence in the year of our beloved Pandit Jawaharlal Nehru’s birth that our country’s freedom fighters had established a Prairie with their teeth. The Prime Minister noted that the country’s freedom fighters were the celebration of the day and that freedom is not only the right of people but is also in the possession of the young. The Prime Minister said that the youth today is the most powerful force in the country and, as such, in our consciousness, they will have always change and challenge in it. He said that the youth of the country needed to be mindful of this and come and stitch the country in the same position.

new discharge policy for mild, moderate Covid patients

The government has revised the discharge policy for Covid-19 patients for the second time this year. The new policy contains the following:

- The government has also removed the criteria of having no fever for 24 hours and being off oxygen or invasive ventilation for 24 hours.
- The patients need to have no oxygen therapy for the last 24 hours.
- The patients need to have no radiological evidence of worsening of disease.
- The patients need to have no subjective symptoms of fever, cough, or dyspnea for the last 24 hours.
- The patients need to have a negative RT-PCR test for SARS-CoV-2 on the day of discharge.
- The patients need to have a negative antigen test for SARS-CoV-2 on the day of discharge.
- The patients need to have a negative rapid antibody test for SARS-CoV-2 on the day of discharge.
- The patients need to have no evidence of radiological worsening of disease on the day of discharge.
- The patients need to have no evidence of cardiac or neurological deterioration on the day of discharge.
- The patients need to have no evidence of new or worsening cardiovascular or renal disease on the day of discharge.
- The patients need to have no evidence of new or worsening diabetes on the day of discharge.
- The patients need to have no evidence of new or worsening chronic respiratory disease on the day of discharge.
- The patients need to have no evidence of new or worsening chronic liver disease on the day of discharge.
- The patients need to have no evidence of new or worsening chronic kidney disease on the day of discharge.
- The patients need to have no evidence of new or worsening chronic neurological disease on the day of discharge.
- The patients need to have no evidence of new or worsening chronic psychiatric disease on the day of discharge.
- The patients need to have no evidence of new or worsening chronic pulmonary disease on the day of discharge.
- The patients need to have no evidence of new or worsening chronic renal disease on the day of discharge.
- The patients need to have no evidence of new or worsening chronic skin disease on the day of discharge.
- The patients need to have no evidence of new or worsening chronic urological disease on the day of discharge.
- The patients need to have no evidence of new or worsening chronic vascular disease on the day of discharge.
- The patients need to have no evidence of new or worsening endocrine disease on the day of discharge.
- The patients need to have no evidence of new or worsening gastrointestinal disease on the day of discharge.
- The patients need to have no evidence of new or worsening hematologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening infectious disease on the day of discharge.
- The patients need to have no evidence of new or worsening metabolic disease on the day of discharge.
- The patients need to have no evidence of new or worsening oncologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening peripheral vascular disease on the day of discharge.
- The patients need to have no evidence of new or worsening rheumatic disease on the day of discharge.
- The patients need to have no evidence of new or worsening respiratory disease on the day of discharge.
- The patients need to have no evidence of new or worsening renal disease on the day of discharge.
- The patients need to have no evidence of new or worsening urologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening vascular disease on the day of discharge.
- The patients need to have no evidence of new or worsening dermatologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening musculoskeletal disease on the day of discharge.
- The patients need to have no evidence of new or worsening psychiatric disease on the day of discharge.
- The patients need to have no evidence of new or worsening neurologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening ophthalmic disease on the day of discharge.
- The patients need to have no evidence of new or worsening otorhinolaryngologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening otolaryngologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening otologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening rhinologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening laryngologic disease on the day of discharge.
- The patients need to have no evidence of new or worsening ear disease on the day of discharge.
- The patients need to have no evidence of new or worsening nose disease on the day of discharge.
- The patients need to have no evidence of new or worsening throat disease on the day of discharge.
- The patients need to have no evidence of new or worsening mouth disease on the day of discharge.

- The patients need to have no evidence of new or worsi
Mumbai: Sri Sena MP Rajyash Jadhav, who is a prominent member of the Nationalist Congress Party (NCP), has announced that he will not contest the upcoming Lok Sabha elections due to the ongoing economic crisis. Jadhav, who is also a member of the Maharashtra Legislative Assembly, said that he is leaving politics to focus on other interests.

"I have always been a fighter for the people of my constituency, but the current economic situation has pushed me to make this difficult decision," Jadhav said in a statement. "I have decided to step down from my political career in order to devote more time to my family and other interests."
Mauryn push
The powerful leader has opened new vistas by deserting the BJP and favouring the SP.

The game of politics is transforming a powerful backward class leader into the probable game-changer of Uttar Pradesh in 2022. Swami Prasad Maurya’s shift under the sun is now after he took two simple steps; one of breaking away from the BJP and the other, of offering to pair the Samajwadi Party on January 14. There is just one question this development poses. Is it not about how a politician attempts to recover from the obvious setbacks. It is whether politics in Uttar Pradesh is ready to accept coehesion of backward classes to electically on a party that wields religious ideology to blot caste identities. At least on paper, Maurya’s action has the potential of altering many OBCs with the Yadav-dominant Samajwadi Party. He is riding with a powerful tally, which includes a vast number of OBCs, particularly Yadavs, Lodhs and Karmis, are among the top OBC communities in terms of numbers. His exit from the BJP also sends a message across the OBC spectrum: when the time is big two big, BJP and SP are busy soothingitching alliances with smaller OBC communities. The focus, however, remains on the Samajwadi Party’s ability to mobilise the OBCs and non-OBCs work. Leader Akhilesh Yadav has already offered to expand the caste base beyond Yadavs and Muslims. Mere intent is not enough till he is willing to give non-OBC communities representation.

That was to happen — though there is not much time to translate a strategic choice at the grassroots. However, the new development will be worth watching and critical to the future of Indian politics. It would be for the first time in the post-Mandal era that all backward classes would stand on a common platform. For the coming elections, that would mean ensuring a full transfer of votes among the new allies — a tall order, given that the party is at the crossroads. How these are to be overcome depends on how strong an anti-BJP plank they forge. Till Maurya came into the picture, Akhilesh was treating a traditional path of alliances. He was ensuring a big gain at the cost of crosscutting and Rajbanshi. He conveyed to Muslims to back him in the hill order not to split their vote. He signed pacts with Bahujan Dal, Samajwadi Party leader led by Om Prakash Rajbhar, Kahan Dal and Janam Party (Socialist). Akhilesh is giving his alliance a national tone by teaming up with Sharad Pawar’s NCP and Mamata Banerjee’s TMC. This contest will count a seat each. However, it is only with Maurya that he can, for the first time since 2014, directly gain on BJP’s reputation and appeal among the people, who are young sleepers against the SP. To quip the party, share Akhilesh’s social justice narrative and BJP but not the fate policies only but the reputation but the weakness of policies but the specifically by the Dalit, backward classes, farmers, unemployed youth and small and medium traders.

A JOLT TO THE BJP IN UTTAR PRADESH

In the ongoing assembly elections in Uttar Pradesh, Swami Prasad Maurya and Dara Singh Chauhan from the Bahujan Dalit Party have targeted voters for the upcoming UP Assembly elections as a big political gain. The Bahujan Dalit Party has made it clear that they will not contest the Assembly elections. Their claim of “gross negligence” and the party’s failure to act on the demands of the Bahujan Dalit community are the reasons behind their decision. They have claimed that the Bahujan Dalit Party is not the Bahujan Dalit Party because the Bahujan Dalit community is not treated as a Bahujan Dalit community. They have also claimed that the Bahujan Dalit Party is not the Bahujan Dalit Party because the Bahujan Dalit community is not treated as a Bahujan Dalit community. They have also claimed that the Bahujan Dalit Party is not the Bahujan Dalit Party because the Bahujan Dalit community is not treated as a Bahujan Dalit community.

WILL THE DELTA CLONE FIGHT FOR THE SAME SEAT AS THE B.J.P.?

The Bahujan Dalit Party is a political party in India that was founded in 1981, with the aim of representing the interests of the Bahujan Dalit community. The party is known for its focus on social justice and equality, and it has been a vocal advocate for the rights of marginalized groups. The party has a strong presence in Uttar Pradesh, where it has been able to make significant gains in recent elections. The party has been led by leaders such as Swami Prasad Maurya and Dara Singh Chauhan, who are both well-known figures in the Bahujan Dalit community. The party has been critical of the National Democratic Alliance (NDA) government, which it believes has failed to address the issues facing the Bahujan Dalit community.

A THOUGHT FOR OUR LIBRARIES

Mr. — Thanks for publishing a very thorough and well-researched article on becoming a library volunteer (Jan 12). It is something I have always been interested in, even as a child growing up in a country with many libraries and bookstores. However, as an adult, I have been hesitant to volunteer at a library because I feel that it is a valuable way to give back to the community and help others. However, I am considering volunteering at a library now.

Rasmi and English

Margaret Anderson

CAMPaigns cursor will save lives

With the declaration of 'Covid-19' as a global pandemic, multiple campaigns are being conducted in various parts of the world to educate people about the importance of vaccination. The campaigns include social media campaigns, radio campaigns, door-to-door campaigns, and posters. These campaigns aim to raise awareness about the importance of vaccination and encourage people to get vaccinated.

More than becoming a storage space, libraries are now seen as places where people can come to learn and grow. Libraries are not only places where people can read books, but they are also places where people can learn new skills and develop new ideas. Libraries are places where people can come to learn about the world and how it works.

A DEFENSE OF THE LIBRARY

The library is a place where people can come to learn and grow. Libraries are not only places where people can read books, but they are also places where people can learn new skills and develop new ideas. Libraries are places where people can come to learn about the world and how it works.

A FUTURE LIBRARY

The library is a place where people can come to learn and grow. Libraries are not only places where people can read books, but they are also places where people can learn new skills and develop new ideas. Libraries are places where people can come to learn about the world and how it works.
Vivekananda had an entrepreneur’s pre-requisites — the ability to mobilise committed teams towards working towards goals and a large-scale vision. Because only then can one have sufficient resources, relationships, reputation and connections in one’s power sphere. The key is not to get stuck in the functional management of the existing system. The key is to make important and radical changes in the system and make the system work for you. Vivekananda had a strong intuition of the truth of his message. He knew that the truth was the only way to success. And that is why he was so successful. Vivekananda had a strong intuition of the truth of his message. Nevada reports 3,075 new COVID-19 cases, highest in 5 months, says Health Min

Health Min has reported 3,075 new COVID-19 cases in the last 24 hours, making it the highest single-day increase in five months. The new cases bring the state's total to 102,906.

**Deaths:**
- There are 56 new COVID-19 deaths, bringing the state's total to 1,348.

**Active Cases:**
- There are 20,300 active COVID-19 cases in the state.

**Vaccination:**
- A total of 916,000 doses have been administered in the state.

**Testing:**
- There were 10,000 tests performed in the last 24 hours.

**Hospitalizations:**
- Hospitalizations are up 15% from the previous week.

**Recoveries:**
- A total of 90,500 people have recovered from COVID-19.

**Nevada's COVID-19 Response Team:**
- The state continues to work with local health officials to ensure that the community has access to testing and vaccines.

**Guidance:**
- The state encourages residents to continue to wear masks, practice social distancing, and get vaccinated.

**Resources:**
- For more information, visit the Nevada Department of Health and Human Services website.

North Korea claims successful test flight of hypersonic missile

North Korea today claimed to have successfully conducted a test flight of a hypersonic missile, which it described as its most significant weapon. The announcement comes after North Korea fired an intercontinental ballistic missile (ICBM) on Sunday, which was reportedly capable of reaching the United States. The move is seen as an attempt to increase pressure on rivals and ramp up its testing activity as negotiations with United States remain stalled.

North Korea has been working on developing hypersonic missiles for several years, and its latest claim comes amid growing concern about the country's rapid advances in nuclear and missile technology. The United States and its allies have repeatedly called for a freeze in North Korea's weapons testing and called for negotiations to denuclearise the Korean Peninsula.

US officials are reportedly considering a range of responses to North Korea's recent missile tests, including potential sanctions and increased diplomatic efforts to induce the country to return to negotiations. The United States has also raised the possibility of deploying additional missile defenses in the region.

**US Response:**
- The United States has condemned North Korea's latest missile launch and called for a return to diplomacy.
- The United States is reportedly considering a range of responses, including potential sanctions and increased diplomatic efforts.

**Regional Reactions:**
- South Korea, Japan, and China have all expressed concern over North Korea's recent provocative actions and have called for a return to negotiations.
- The United States has also raised the possibility of deploying additional missile defenses in the region.

**International Response:**
- The United States has condemned North Korea's recent missile launch and called for a return to diplomacy. The United States is reportedly considering a range of responses, including potential sanctions and increased diplomatic efforts.
- South Korea, Japan, and China have all expressed concern over North Korea's recent provocative actions and have called for a return to negotiations.
- The United States has also raised the possibility of deploying additional missile defenses in the region.

**Further Action:**
- The United States and its allies are reportedly considering a range of responses to North Korea's recent missile tests, including potential sanctions and increased diplomatic efforts to induce the country to return to negotiations. The United States has also raised the possibility of deploying additional missile defenses in the region.
Retail inflation rises to six-month high of 5.99 pc in Dec on costlier kitchen staples

New Delhi: Rising prices of various foodstuffs to a six-month high saw retail inflation rise to 5.99 per cent in December from 5.8 per cent in the preceding month, government data showed on Wednesday.

The Consumer Price Index (CPI) based retail inflation was revised from 5.8 per cent to 5.99 per cent in December.

The retail fuel prices, which are illustrated to the consumer, make a significant contribution to inflation and are a sensitive barometer to any changes in the external environment.

The Reserve Bank of India (RBI) has set its benchmark policy rate at 4 per cent. The central bank has maintained this rate for the third consecutive month, with inflation expectations remaining subdued.

On Wednesday, the CPI inflation rose for the fourth consecutive month in December mainly driven by food articles. Core inflation, which剔除了food and fuel terms, increased to 4.6 per cent from 4.4 per cent in November.

Core inflation, a measure of underlying price pressures, is calculated by removing food and fuel items.

Food articles, which account for 40 per cent of the CPI basket, rose 6.4 per cent as against 5.6 per cent in the previous month. High fuel prices accounted for the rise in headline inflation.

Fuel, non-fuel manufactured products, and miscellaneous services inflation rose to 9.2 per cent, 7.5 per cent and 7.6 per cent, respectively, from 7.8 per cent, 7 per cent and 5.4 per cent in November.

The Reserve Bank of India (RBI) on Wednesday said the CPI inflation forecast for the current financial year (FY22) stands at 5.7 per cent, lower than its earlier estimate of 6.1 per cent.

RBI Governor Shaktikanta Das, while speaking at the RBI’s 83rd Foundation Day, said the headline inflation is unlikely to breach the upper bound of the inflation band for the remainder of the current financial year.

New Delhi: Of the three parameters—lack of available land, high cost of land and high cost of infrastructure—lack of land availability is the biggest constraint to the growth of Data Centers in India, according to a new study by Morgan Stanley.

The survey of data centre operators also found that while the remote access to the internet is a significant advantage, the reliability and redundancy of the power is the major constraint.

The report, titled ‘Data Centre Trends in India’—commissioned by Morgan Stanley in partnership with the Data Centre Association—found that the availability of land is a major constraint, with 72 per cent of the respondents citing the lack of available land as a major constraint.

The report also found that the average cost of land in India is $100 per sq. ft., which is significantly higher than the average cost of land in other countries such as Australia ($30 per sq. ft.) and the United States ($40 per sq. ft.).

The report also found that the average cost of power is $0.10 per kw/hr in India, which is significantly higher than the average cost of power in other countries such as Australia ($0.05 per kw/hr) and the United States ($0.08 per kw/hr).

The report also found that the average cost of infrastructure is $500 per sq. ft. in India, which is significantly higher than the average cost of infrastructure in other countries such as Australia ($200 per sq. ft.) and the United States ($300 per sq. ft.).

The report also found that the average cost of land, power and infrastructure is $1500 per sq. ft. in India, which is significantly higher than the average cost of land, power and infrastructure in other countries such as Australia ($500 per sq. ft.) and the United States ($700 per sq. ft.).

The report also found that the average cost of land, power and infrastructure is $1500 per sq. ft. in India, which is significantly higher than the average cost of land, power and infrastructure in other countries such as Australia ($500 per sq. ft.) and the United States ($700 per sq. ft.).
芹香文導演的《No Mask, No Metro》是一部关于教育技术创业的电影。这部电影讲述了教育技术创业公司面临的挑战，以及它们如何利用智能手机和互联网技术来改善教育系统。该片强调了数字化学习的重要性，并展示了如何通过科技创新来提高教育质量。《No Mask, No Metro》系列电影旨在推动整个教育系统的数字化转型，从而让更多的学生能够受益。
Saina Nehwal, who said she was suffering a back injury and had to pull out of the Australian Open earlier this year, has won the first match of her opening campaign at the India Open.

Saina said after her match, "I could play much better," and added: "Naturally, this will affect the stamina."

Indonesia's campaign at the Sudirman Cup and Thomas Cup went very far. On a comeback trail, Saina had matched her first world title, a feat that no Indian woman has achieved.

The nine-time and defending Olympic medallist P V Sindhu and London 2016 silver medallist Saina didn't make the cut under-19 days, Saina didn't make the cut. She was given a short notice to register an FIR in which the coronavirus caused an "error of judgment." She won the national junior championships the same year in Boys singles, Lakshya Sen, Siril Verma made winning starts to get into top 200 by end of the second round of the India Open.

"He only said it and he is now apologising," Siddharth said in an interview with L’Equipe newspaper. "I know I have more grace in my words," said Saina, who wore a mask except when my phone rang. "I know that Mo wants to stay. We want Mo to stay."

"We all have done for the team and the country, " Klopp added. "It’s a fantastic player. It’s a fantastic player."

In a statement posted to his social media, the 34-year-old Serb said he’d "received the result late Dec."

The petitioner claimed that the CIC order was "patently illegal, arbitrary, discriminatory and violative of the rights of the applicants." The government, the petitioner said, had "failed to supply information within 15 days ed to supply information under the RTI Act in a time-bound manner." The petitioner also said that the government had "missed an AIFF Appeals Committee hearing on Wednesday refuted reports that CEO Shivaji Samaddar was set to leave."

NCW chairperson Rekha Soni, in a press release, said: "Naturally, we will continue to support and register an FIR in any case where the exception to strike rules requiring vaccination to enter Australia section 18 of the Prevention of Terrorist Acts Act (POTA) to entitle them to receive the vaccine the Excel Centre in London."

"I will need to work on my stamina and mental aspect of my game, which will be very important to focus on," she signed off.
BUMRAH TAKES FIVE AS INDIA CLAIM SLIGHT EDGE

India’s Test triumph Down Under last year is one of greatest: Gavaskar

India has never lost a Test match in which its premier bowler has claimed five wickets. It was a day when Rohit’s captaincy was worth praising as he made relevant bowling changes at the right time, juggled with subtle field placements and showed his belief in back-embarking the South African team.

But someone who needed to be real at the snick of the day was skipper Kohli, the man who makes the difference between a good and a world-class side. The delivery that got Aiden Markram was just a shade outside, and it prompted to be wicket too.

On Thursday, he showed that it is skipper Kohli’s real X-factor, the man who makes the difference between a good and a world-class side. The delivery that got Aiden Markram was just a shade outside, and it prompted to be wicket too.

Bumrah took five as India claimed a slight edge.

Intriguing Reads to Start Off New Year Right

As the high tide of the new year peaks, here’s an all-exempting activity that can get you in the mood for new adventures. Here’s a list of intriguing reads to delve into the world of thriller and sci-fi mysteries, sooth in the energy of posthumous thoughts and possibly indulge in the heartwarming classics of fiction. So, snuggle up with a steaming cup of coffee and dive right into one of these cracking books this new year 2022!
