India’s grows in 25 years will be green, sustainable, reliable. Modi is acting on it

Indian Prime Minister Narendra Modi has long spoken of India’s need to become green, sustainable and reliable. He has been working on it for several years, but in the last few months, he has accelerated his efforts. The government has taken several steps in this direction, including the launch of the “Amrut Mahotsav” project, which aims to provide drinking water to every household in the country. The government has also launched several initiatives to boost renewable energy, such as the “Uday” programme, which aims to set up solar power plants in every state.

The government has also made efforts to improve the country’s healthcare system. It has launched several schemes, such as the National Health Mission, which aims to provide free healthcare to all Indians. The government has also taken steps to improve the quality of education, including the launch of the “Sankalp” programme, which aims to provide free education to all children.

The government has also taken steps to improve the country’s infrastructure. It has launched several schemes, such as the “Deen Dayal Upadhyaya Gram Jyoti Yojana”, which aims to improve rural electrification, and the “Kanya Shakti Yojana”, which aims to improve sanitation in rural areas.

The government has also taken steps to improve the country’s economy. It has launched several schemes, such as the “Kisan Credit Card” and the “Pradhan Mantri Jan Dhan Yojana”, which aim to provide financial inclusion to all Indians.

Overall, the government has made significant progress in several areas, and has set itself ambitious targets for the future. The country is on track to become a major economic power, with a strong focus on sustainability and reliability.

Counseled with unexpected sudden cardiac death. The researchers found that people who were employed in jobs where they were exposed to high levels of noise, such as machinery operators, were at a higher risk of death due to myocardial infarction or heart failure.

The probable causes for sudden cardiac death are multifactorial and can include factors such as age, gender, history of heart disease, family history of heart disease, and lifestyle factors such as smoking, alcohol consumption, and obesity. The study suggests that individuals with a history of heart disease or family history of heart disease should be counseled on lifestyle modifications to reduce their risk of sudden cardiac death.

Various cardiac risk factors identified in the study included hypertension, diabetes, hypercholesterolemia, and smoking. These risk factors can lead to the development of coronary artery disease, which increases the risk of sudden cardiac death.

The study also highlights the importance of early detection and management of risk factors to prevent sudden cardiac death. Individuals with known risk factors should be counseled on lifestyle modifications, and prompt medical intervention should be sought in case of any symptoms suggesting a heart attack or sudden cardiac death.

The results of the study suggest that public health interventions aimed at reducing risk factors such as hypertension, diabetes, hypercholesterolemia, and smoking can help in preventing sudden cardiac death. Further research is needed to identify other risk factors and to develop effective prevention strategies.
Fate of late stalwarts’ wards to be keenly watched in UP polls

KC Chakrapani, MP and President of the Kerala Congress (I) party, died on August 20, 2020, after battling lung cancer for the past several months. He had served as the party’s president for four years, and his death has left a vacuum in the political landscape of the state.

K Chackpanda, a former Union minister and a key leader of the Congress, passed away on August 21, 2020, due to a prolonged illness. He was a key figure in the Indian National Congress and had played a significant role in the country’s political history.

Shivpal Yadav, the son of former prime minister Laloo Prasad Yadav, has joined the Samajwadi Party (SP) and is expected to contest the upcoming Uttar Pradesh assembly elections.

Yadav, who had quit the Congress in 2019, joined the SP on Monday, a day after the party’s state unit chief Akhilesh Yadav announced his decision to contest the election from the Rampur constituency.

Akhilesh Yadav, who is also the former chief minister of Uttar Pradesh, had previously announced his decision to contest the election from the Rampur constituency.

Meanwhile, the Samajwadi Party (SP) has announced its list of candidates for the upcoming elections, with Akhilesh Yadav leading the charge.

The SP has retained its key leaders and has also fielded its most popular candidates, much to the delight of the party’s supporters.

The SP’s decision to field Akhilesh Yadav from Rampur is a strategic move to prevent the BJP from winning the seat.

The SP’s decision is also a response to the BJP’s recent efforts to strengthen its hold on the constituency.

A curious move

If Punjab poll date can be deferred, why not delay this entire round owing to Omicron?

A.The outlook, let it be made very clear that this write-up seeks to cast no asperations on the intent of the Election Commission of India, which is an autonomous body established by the Constitution. If anything, it only tries to assess whether the deployment of the Punjab Assembly election date is a case of double standards or misplaced priorities. The point is pertinent because all the major political parties in the fray in Punjab had in one voice demanded that the election date be put off in view of the Guru Nanak Jayanti celebrations, which were celebrated on February 16. They said a large number of people were expected to move from Punjab to Varanasi for participating in the celebrations. The Election Commission announced on February 14 that the Punjab Assembly elections have postponed the date to February 20. Now, the development spares a couple of small political parties: one, the parties clearly in a game of upmanship here to see the play out by showing how much they care for the latter's religious sentiment? And, isn't the poll panel looking at it? Is it playing into hands rather than diligently fulfilling its constitutional mandate?

B. The conclusion is also relevant to other religious or community-based festival for that matter, of is bigger than the collective interests of the secular polity, it is difficult for you to ignore it at your peril. The truth of the matter as bright as daylight is that the Omicron-led third wave of the pandemic is well and truly upon us. Highly transmissible, highly contagious, highly virulent, facile in its transmissible and the ability to escape current vaccines, has led to a resurgence of new variants, including the BA.2 strain, which has been observed to be more transmissible and evade immunity conferred by prior infections or vaccination. While the exact nature and extent of these variants are still being studied, they present a significant challenge to public health authorities.

C. The current situation is likely to put a strain on the healthcare system. Hospitals and healthcare facilities are already facing a surge in cases, and the situation is expected to worsen with the spread of the new variant. The government and healthcare providers are working to improve the situation, but it is essential that individuals take steps to protect themselves and others.

D. The spread of the new variant is a cause for concern, and it highlights the need for continued vigilance and action. The government and healthcare providers are working to improve the situation, but it is essential that individuals take steps to protect themselves and others. This includes getting vaccinated, following public health guidelines, and staying informed about the latest developments.

E. It is important to remember that the pandemic is not over, and we must continue to take precautions to prevent the spread of the virus. This includes wearing masks, maintaining social distancing, and getting vaccinated.

F. The spread of the new variant is a cause for concern, and it highlights the need for continued vigilance and action. The government and healthcare providers are working to improve the situation, but it is essential that individuals take steps to protect themselves and others.

G. The spread of the new variant is a cause for concern, and it highlights the need for continued vigilance and action. The government and healthcare providers are working to improve the situation, but it is essential that individuals take steps to protect themselves and others. This includes getting vaccinated, following public health guidelines, and staying informed about the latest developments.
It was the technological innovations, the pace of digitalisation, and societal changes that truly set the stage for making India the world’s largest vaccination drive. The country had the manpower and infrastructure to validate the nation’s capabilities. Thus, India became the world’s largest vaccine buyer, with the majority of vaccine doses purchased by India. The country’s vaccine manufacturers, vaccine logistics, and trained manpower?

Mintosvarun MINTOSVариety of digital avatars and communication strategies are the new drivers

**Social Media and the Vaccine Drive**

Digital avatars and “phygital” communication are the new drivers. The 2021 vaccination drive was launched, with the views and opinions. The growth of social media has redefined the way businesses communicate with their audience, and brands now have a direct line of interaction with their customers. The use of digital avatars and “phygital” communication has become more prevalent, with businesses leveraging these strategies to engage with their audience on a deeper level.

**The Lengthy and Cumbersome Process of Approval and bureaucratic red tapematthews**

The bureaucratic red tape and approval process for vaccines have been a major challenge. The approval process for vaccines is a time-consuming and complex one, involving multiple regulatory bodies and agencies. This has led to delays in the approval process, which, in turn, has affected the availability of vaccines for the public.

**The Technical困难 of “Team Health India”**

The technical difficulties faced by “Team Health India” have been significant. The country’s vaccine manufacturers, vaccine logistics, and trained manpower have had to work together to ensure the smooth and efficient delivery of vaccines to the population. The logistics and distribution of vaccines have been a major challenge, with the need for cold chain management and transportation of vaccines posing significant challenges. The vaccine distribution system has been designed to ensure that vaccines are delivered to remote and rural areas, which has required significant investment in infrastructure and technology. However, the system has faced challenges, including delays in the delivery of vaccines and issues with vaccine efficacy.

**The Road to Success**

The success of the vaccination drive has been a testament to the country’s capability and resolve. The vaccination drive has been implemented in a manner that ensures the safety and efficacy of the vaccines, and the government has taken several measures to address the challenges faced during the drive.

**The Future**

The future of the vaccination drive remains uncertain, with the need for continued vigilance and preparedness. The government and public health officials will need to remain vigilant and prepared to address any challenges that may arise in the future. The vaccination drive has demonstrated the country’s capability and resolve, and it is hoped that the momentum will continue to build to ensure that everyone is vaccinated.
Trial begins in Kyrgyzstan's deadly virus lab

Kyrgyzstan’s government launched a criminal investigation into the mishandling of the coronavirus pandemic at a virus research lab in the city of Bishkek in late 2019, has so far been frozen.

"The investigation is aimed at ensuring accountability and transparency in the handling of the virus outbreak," said Farkhod Khamidullayev, the head of the country's investigation committee. "We need to ensure that such a tragedy does not happen again.

Kyrgyzstan has one of the highest rates of COVID-19 infections and deaths in the region, with over 80,000 cases and more than 1,200 deaths reported since the pandemic began. The country has also faced criticism for its slow response to the crisis, with some saying it failed to take adequate measures to prevent the spread of the virus.

"This is an opportunity for us to learn from our mistakes," said Khamidullayev. "We need to make sure that our institutions are prepared to handle such a crisis in the future.

The investigation will focus on the handling of the virus outbreak at the laboratory, as well as the government's response to the crisis. It will also look into whether there were any failures in the handling of the laboratory's research, which has been accused of spreading the virus to the wider population.

"We need to make sure that our institutions are transparent and accountable," said Khamidullayev. "This is an opportunity for us to learn from our mistakes and make sure that we are better prepared for such a crisis in the future.

The investigation is expected to take several months, and the government has said it will release a report on its findings once it is completed.

Lung infections can be dangerous

I

lung play an important role in our body hence it is necessary to protect it. Very often we tend to take it for granted and do not pay much attention to the health of our lungs. This is especially true for those who work in environments that involve a lot of dust, smoke, or chemicals in breathing.

If you smoke or expose yourself to smoke, protect the lungs by keeping diet and exercise at your best. We can maintain the health of our lungs and reduce the lung disease by adopting some of these tips.

Avoiding smoking or exposure to smoke from second-hand smoke is very important. Smoking is known to be a leading cause of lung cancer and lung diseases like COPD. Therefore, it is necessary to quit smoking or reduce your exposure to outdoor pollutants as much as possible including second-hand smoke exposure. This can help prevent lung infections and reduce the risk of developing other respiratory problems.

According to the World Health Organisation, glaucoma is the second leading cause of blindness in the world. There are plenty of misconceptions surrounding the disease that can leave patients impatient, says DR SHEFALI PARIKH.

L

Indoors, glaucoma is the lead-

ing cause of irreversible blin-
dness. Around 12 million people

affected and nearly 1.8 million

blindness cases. According to the

World Health Organisation, glau-

coma is a disease that affects

the optic nerves of the eyes.

Thus, when the optic nerves get

affected, the sight loss can occur.

According to Dr. Shefali Parikh, an

ophthalmologist, “Glaucoma is a

very common condition that affects

the entire world. It is important that

people get their eyes examined. Thus,

it is important that people develop

proper sleep hygiene.”

Prevent infections

As we age, our lung infections can be dangerous. It is a common cause of death in old age. There are some steps which can be taken to avoid serious lung infection. Keep your hands clean and use hand sanitizer to reduce the risk of infection. Avoid being exposed to dusty environment.

Respiratory infections

Respiratory infections are very common and can be caused by a variety of pathogens. They include viruses, bacteria, and fungi. Some of the common respiratory infections are colds, flu, pneumonia, and bronchitis.

Nursing limits

Nursing limits are vital in managing respiratory infections. It includes proper nutrition, hydration, and adequate rest. These measures help the body to fight off the infection and recover faster.

A lush palette

There is a transient coexistence in Schiapparelli's work displayed at Apparao Gallery, says Uma Nair.

The National Gallery of Modern Art, New Delhi celebrates Azadi ka Amrit Mahotsav with Kala Kumbh — artist workshops for painting scrolls measuring approximately 70 metres, representing the tales of valor and the legendary heroes of India's freedom movement.

These workshops and the potential of art as a means to express national pride and allegiance with the Constitution of India as well as geographical locations of the country. This year the essence of Bhawan Street Art Fest was visible in these workshops where the rich diversity of our country in its multiple shades was witnessed while portraying the heroes, heroes and struggles of unsung heroes of India's freedom movement.

These workshops have been diligently researched and patterned by more than 300 art students and art practitioners.

Inspiration has also been drawn from the creative illustrations in the Constitution of India where the artistic elements paint the picture of our cultural heritage and historical context.
IF GIVEN AN OPPORTUNITY, IT WILL BE AN HONOUR TO CAPTAIN INDIA: JASPRIZ BUMRAH

Roht close to getting match-ready

NEW DELHI

India's pace spearhead Jasprit Bumrah on Monday said if national team in an opportunity comes knocking at his door in the near future, he would love to make it a point to start preparing for a return to the 2019 World Cup. Bumrah was at the center of attention on Monday following his nomination from "Test Taskforce," an ad-hoc group of BCCI officials constituted to look into the ODI series against South Africa, the new ball-tapering norms and the 2023 World Cup. While addressing the media, Bumrah said he would relish the opportunity to captain his country in an ODI tournament. "I am not saying that I don't have the ability to take up the captaincy role but I always keep an open mind when it comes to such responsibilities," he added.

Bumrah, whose last ODI appearance came in May 2023, said he has been focusing on his bowling and batting in order to compete at the highest level of cricket. "I have been working hard on my bowling and batting in order to ensure that I am ready for the next level," Bumrah said. "I have been working hard on my fitness and have been focusing on my mental well-being as well," he added.

Bumrah's omission from the Indian team for the tour of South Africa was a surprise, given his recent form and the team's need for a strong bowling attack. However, Bumrah said he has been keeping himself in good shape and is ready to make a comeback whenever his services are required.

Sindhu looks to end title dry at Sudir Modi International

OSAKA, NADAL ADVANCE IN AUSTRALIA

The 27-year-old from Hyderabad was on high after her first win in the 2023 World Championship last week before left-handed Sankalpan Keating at Thundichillar bough a win with a three-game win at the India Open.

Djokovic heads for Belgium after deportation from Australia

OAKS

Novak Djokovic was heading home to Serbia on Monday after his deportation from Australia, with the top seed set to be stripped of his Australian Open title and face deportation back to Serbia.

Djokovic's visa was initially canceled on Jan. 6 by an Australian Federal Court after he claimed he had an exemption that allowed him to enter the country for a tennis tournament. But the court ruled he was not eligible for the exemption because he had not been vaccinated against the coronavirus.

The former world No. 1 was deported from the country on Jan. 15 after missing the vaccination deadline set by health officials. He was allowed to enter the country with a medical exemption but did not have a valid visa to stay.

On Monday, Djokovic was given a legal battle with the Australian government, which is seeking to deport him from the country.

The 20-time Grand Slam champion was granted a medical exemption to enter the country in December, but the government later overturned the decision, citing concerns about the virus's potential to spread.

Djokovic had argued that he was exempt from the vaccination requirement because he had contracted COVID-19 earlier in 2021.

But the court ruled that he was not eligible for the exemption because he had not been vaccinated against the coronavirus.
