Invest in clean energy research in big market India: PM to G7

CAPSULE

India contributes just 5% to global carbon emissions, asserts Modi

PUNE: Prime Minister Narendra Modi on Thursday told the G7 leaders that India contributed just 5% to global carbon emissions, a claim that has been fiercely debated by scientists. The Prime Minister said that India’s contribution was not significant compared to other countries and that the world needed to work together to address the climate crisis.

The Prime Minister also said that India was committed to achieving net-zero emissions by 2050 and that the country was working hard to reduce its carbon footprint. He added that India was also working on renewable energy sources and was making significant progress in that area.

In his address, the Prime Minister called for global cooperation in addressing the climate crisis and said that the G7 countries could play a crucial role in driving the transition to a low-carbon economy.

Modi said that India was committed to working with the G7 countries to achieve the goals set out in the Paris Agreement and the United Nations Framework Convention on Climate Change.

The Prime Minister also said that India was making significant progress in reducing its carbon footprint and was on track to achieving its emissions reduction targets. He added that India was already the world’s fourth-largest producer of renewable energy.

However, some scientists have questioned the Prime Minister’s claims, saying that India’s contribution to global carbon emissions was significantly higher and that the country was still heavily reliant on fossil fuels.

The Prime Minister’s address came after a series of climate meetings in the G7, which included a summit on clean energy and a meeting on the global climate crisis.

A 22-year-old mentally challenged youth was mowed down by a speeding truck.

On World Blood Donation Day, 50 employees of AISECT University donate blood at a donation camp.

Several activities and events were organized in Bhopal to raise awareness about the importance of blood donation. The day began with the Sanitation Anthem, which was performed by Kabir College. The students also distributed pamphlets on the significance of blood donation.

The event was well attended, with several students and faculty members participating. Many of the participants came from different universities and colleges in the region.

The blood donation camp was set up in the campus of AISECT University, and several blood donation booths were arranged. The camp was well organized, with volunteers ensuring that all the necessary precautions were taken to ensure the safety of the donors.

The staff at the blood donation camp were well trained and provided excellent services to the donors. They ensured that the process of blood donation was comfortable and stress-free for the participants.

The blood collected during the camp was sent for further investigation and treatment.

The day ended with a speech by the Principal of AISECT University, who thanked everyone for their participation and emphasized the importance of blood donation.

A 22-year-old mentally challenged youth was mowed down by a speeding truck.

Meanwhile, a 45-year-old man was run over by a truck near Nohra Road, Bhopal.

The Congress on Monday termed as "deeply disappointing" a report on how the government is handling the coronavirus pandemic. Chief Minister Narendra Modi led the BJP on Twitter, saying the government cannot "afford to act in such a manner.

The party called out the government for "inaction and apathy" in handling the pandemic, with several states facing shortages of oxygen and medical supplies.

The opposition also accused the government of not taking the situation seriously and of not doing enough to prevent the spread of the virus. The Congress has been demanding a complete lockdown and the government's failure to implement one has been highlighted.

The situation has become critical in several parts of the country, with hospitals running out of beds and oxygen supplies. The government has been criticized for not doing enough to tackle the surge in infections, with some states reporting record spikes in daily cases.

The Congress has been demanding a "national action plan" to tackle the pandemic, a complete lockdown, and better resource management. The party has also called for "accountability and transparency" in the management of the crisis.

Viruses can survive for days by binding themselves to plastics in freshwater, finds a new study

Taking the known frugal environmental risks a notch higher, scientists have proved for the first time that viruses can survive and remain infectious by binding themselves to plastics in freshwater — thus raising concerns about the potential impact on human health. Rotaviruses, which cause diarrhoea and an upset stomach, are the most common killers of children in the developing world. The study was published in a peer-reviewed article in a scientific journal, the Cryosphere. While plastic microparticles are found across the world, from the world’s deepest ocean floors to the peak of Mount Everest, researchers say it was the first time these were found in freshly fallen snow in Antarctica.

The study — led by the University of Sterling and published in the Journal Environmental Science & Technology — revealed that rotavirus is capable of using water taken from the natural environment — such as rainwater and snow — to spread its virions in sterile hospital settings.

Such enteric viruses remain infectious, posing a health risk even after only a few days of exposure to the environment. The study also raises questions about the potential health risk. Lead researcher Professor Richard Daum said: "We found that viruses can attach to microparticles, which allows them to survive in the water for a long time. This allows them to be transported through the environment, meaning that it can be cleaned up, the water discharged still has microparticles in it, and which are then transported down the river, into the estuary and up on the beach. We weren’t sure how well viruses could survive by 'hitchhiking' on plastics in the environmental life, but they do survive, and they do remain infectious. It does not take many such virus particles to make a lot of sick. So, therefore, this is one reason to keep our beaches clean and to keep pollution out of our environment."
Chief Minister Uddhav has expressed his inability of Maharashtra government to handle the problems, especially the one related to COVID-19. In the current situation, the government is struggling to control the pandemic and provide essential services to the citizens.

The government has imposed various lockdowns to curb the spread of the virus. Despite these efforts, the number of cases continues to rise. The government has also faced criticism for its handling of the crisis, with some sections of the population feeling that the actions taken are insufficient.

In response to the current situation, the government has announced several relief measures, including financial assistance to affected families and support for small businesses. However, these measures may not be enough to alleviate the economic impact of the pandemic.

The situation is challenging for the government, and it is essential to take immediate action to mitigate the effects of the COVID-19 pandemic. The government must continue to work closely with the healthcare sector and the citizens to ensure that the necessary resources are available to address the crisis.

In conclusion, the government's inability to handle the current situation highlights the need for continued efforts and cooperation between the government and the citizens. With the ongoing pandemic, it is crucial for the government to work towards a sustainable solution to prevent further outbreaks and minimize the impact on the economy and health of the population.
**G7 leaders set to commit to long haul in backing Ukraine**

**AP GERMANY**

Leaders of the Group of Seven economic powers are set to commit to Ukraine in the long haul to support the country’s defense, European Council President Charles Michel said Monday.

The new aid and efforts to identify ways to ease energy supply disruptions for Ukraine may ultimately come down to Russia's defense supply chains that support imports to their countries, with the US promising $7.5 billion in economic aid to help Kyiv keep basic services running.

**Ukraine’s Zelensky joins G7 Summit by video**

Ukrainian President Volodymyr Zelenskyy has joined the Group of Seven leaders' video summit in the German Alps on Monday, amid a war that is contributing to a global energy crisis.

The leaders are discussing plans to deliver a war that is contributing to a global energy crisis.

**War-damaged Russian weapons on display in Poland**

A display of war-damaged Russian weapons in Poland is a reminder of the horror of the war in Ukraine but also of Russia’s aggression.

The exhibition includes destroyed tanks, radar systems, and other equipment.

**EU countries adopt goods control with military aid from Russia’s cuts**

EU countries have agreed to adopt temporary controls on goods that will allow them to apply a 80% cut in the volume of Russian goods that could be imported into EU countries.

The controls will begin on 6 August.

**UKRAINE**

With its $1.6 trillion economy, Russia is Ukraine's largest trading partner, and its shelling of the country has disrupted the supply of vital goods.

The G-7 support is crucial to Ukraine’s survival, and the promise from the bloc is for a long haul.

**AP Source: US providing anti-air defense system to Ukraine**

US officials have announced that the US is providing an advanced anti-air system as additional military aid to Ukraine to support its defense against attacks.

The system will be used to protect Ukraine's key targets.

**AP BRUSSELS**

European Union countries have agreed to ban most Russian goods.

The EU is tightening its sanctions on Russia’s weapons of war against Ukraine and will start enforcing them Monday.

The ban affects a range of goods, including metal parts.

**AP SLAVIAVE**

Russian shelling has continued for another day in the region, "burning " on the city of Lysychansk, where the population is under threat.

The attacks have intensified recent days and are linked to the Russian military's effort to destroy Ukrainian defenses.

The fighting has increased in recent days.

US government officials have announced that the US is providing an advanced anti-air system as additional military aid to Ukraine to support its defense against attacks.
President Pedro Sanchez represents the Socialists, who account for 37% of the seats in Spain's left-wing ruling coalition.

The United States also opposed the UN's US$1 million in new grants to provide food to Sri Lanka's dairy industry and technical assistance to help to improve the country's milk production.

Crude at a steep discount. Ukraine in late February, globally oil prices have skyrocketed. Ukraine war, is exploring decreasing and logistical reasons. The United States also approached and started shooting, a 31-year-old Indian-origin gunman man was shot dead while sitting in a parked vehicle in New York's

The letter claimed that judges “were our legitimate entitlements. This is unacceptable!”

The BRICS family will continue to maintain close and constructive consultations with the US and Russia, and will support the efforts made by the United Nations and the International Atomic Energy Agency in this regard.

The FO spokesperson quoted the statement of the Pakistani Foreign Minister Khawaja Asif in this context. Asif, while acknowledging the role of the UN and the International Atomic Energy Agency in this regard, said that the dialogue process should be continued.
India witnesses early signs of sustainable eco-building: Deepak Pareek

India’s Green Building Council (GBCI) has announced that Pareek has been named the recipient of the 2021 Green Building Industry Achievement Award (GBIAA) for his contributions to the development and implementation of sustainable building practices in India. The award recognizes individuals who have made significant contributions to the green building movement in India.

Pareek, who is Executive Director of the Indian Green Building Council (IGBC), has been a key figure in driving the adoption of sustainable building practices in India. Under his leadership, the IGBC has developed a comprehensive green building rating system and has been instrumental in establishing the National Green Building Mission (NGBM), which aims to promote sustainable buildings across India.

"This award is a recognition of the significant strides made in the field of sustainable building in India," Pareek said. "It is a testament to the hard work of all those involved in the green building movement, who are working to create a more sustainable future for our country.

The IGBC has been leading the charge in India to promote sustainable building practices, and Pareek has been at the forefront of this effort. His leadership has been instrumental in driving the adoption of green building practices in India, and his contributions have helped to establish sustainable building as a priority for the Indian government and the building sector.

India go 1-0 up with 7-wicket win

India nullified New Zealand's 139-run target in 23 overs to level the three-match series 1-0 and set the tone for the final Test match in the country.

The bowlers responded to Rohit Sharma's half-century with a fine effort to give India a lead in the series. The host side dominated every phase of the match, with Rohit stabilizing the innings alongside Ishan Kishan.

Rohit, who was playing his 11th ODI against New Zealand, scored a half-century to demolish the Black Caps. The opener then returned to the pavilion after scoring 71 off 84 balls. The other openers, Shubman Gill and Dhawan, also contributed to India's victory.

Chandramohan Rao, who was playing his debut ODI, scored 32 and was dismissed by Tim Southee. Washington Sundar also played a crucial role, scoring 42 in 37 balls.

For New Zealand, Tim Southee took three wickets, while Lockie Ferguson and Ish Sodhi claimed two apiece.

India's bowlers also performed well, with Yuzvendra Chahal and Jasprit Bumrah taking three wickets each.

India made a strong start to the series with a win in the first Test, which was played in Mysuru. The second Test is scheduled to be played in Chennai from November 14-18.

India's pacers bowled New Zealand out for 139 in 23.4 overs, with Rohit and Gill scoring 71 and 45 respectively.

The hosts set New Zealand 139 runs to win in 39 overs and completed the knock in 23.4 overs. Rohit and Gill added 100 runs for the second wicket, while Chahal and Sundar added 42 runs for the third wicket.

India's batting line-up was formidable, with Rohit scoring 71 off 84 balls and Gill scoring 45 off 49 balls.

New Zealand's bowlers bowled well, but India's batting line-up was too strong for them.

India's fielding was also praised, with Chahal catching a New Zealand batsman to save a run.

India's bowlers also performed well, with Chahal and Sundar taking three wickets each.

India's win in the first Test was a crucial one, as it set the tone for the series.
