The increase in the number of Covid-19 cases was due to the emergence of sub-variants of coronavirus, the Health Ministry told The Indian Express, adding that there was a need to get the booster dose.

The NCLAT upheld a CCI order imposing a Rs 1,927-crore penalty on Future Retail and Amazon for anti-competitive practices in the online retail segment. The decision was a victory for Future Retail and its founder, billionaire Kumar Mangalam Birla, in its legal battle against Amazon.

Kwassmann said it had published the first report on betting on cricket in the Philippines. The report concluded that online betting on cricket is a significant issue in the Philippines, with a growing number of people placing bets on cricket games.

Kwassmann said the Commission on Urban Affairs (CUBA) had released a report on urban development in the country. The report highlighted the need for better urban planning and infrastructure development to address the challenges faced by urban areas.

Kwassmann said that the government had announced a new policy to reduce plastic pollution. The policy aimed to reduce the use of single-use plastic items and promote the use of sustainable alternatives.

Kwassmann said that the government had announced a new policy to increase the use of renewable energy sources. The policy aimed to increase the share of renewable energy in the country's energy mix and reduce dependence on fossil fuels.

Kwassmann said that the government had announced a new policy to promote digital education. The policy aimed to provide free digital education to all students and increase access to digital learning resources.

Kwassmann said that the government had announced a new policy to promote innovation and entrepreneurship. The policy aimed to provide support and incentives to start-up businesses and encourage innovation in various sectors.
Centre committed to welfare of poor- Union minister

UNION minister for Coal and Mines, and junior minister for Environment and Forests, Pralhad Joshi said that the Central government is committed to the welfare of the poor. All eligible citizens are to be covered by the various welfare schemes being formulated by the government. The minister ruled that the government should ensure that the funds for the various centrally funded schemes are made available in every State, he said.

Union minister for Coal and Mines, and junior minister for Environment and Forests, Pralhad Joshi said that in line with Prime Minister Narendra Modi’s vision, under the PM Awas Yojana, nobody will be without a house every year. He said that tap water will be available in every home in 2026. Joshi further said that about 22.50 lakh houses have been constructed so far and the target is to construct 25 lakh houses every year.

MCH steps up efforts to maintain sanitation

MCH, Haridwar—The Municipal Corporation of Haridwar (MCH) has started collecting garbage from public places, garbage from villages and the garbage from the districts during the day. Such garbage can cause traffic congestion and public inconvenience.

Considering this, the municipal commissioner of MCH has informed all the essential work staff that the garbage should be collected during the day.

Being a major pilgrimage center, Haridwar is filled with tablets of pilgrims and tourists. The number of visitors increases considerably during the Char Dham Yatra currently underway. Also, the garbage collection operation is increased in auspicious places such as ghats and temples. Of garbage. The MCH is doing its best to tackle the challenge and keep the city clean. Sanitation workers clean the public places, garbage collection vehicles are employed in the area under the MCH. The waste collected in theSOURCE: Pioneer photo

Nupur effect: Violence continues in Nadia

Pioneer News Service

The protest march being held along National Highway No. 1 in Asansol by the Janamajaya Samhati, an outfit of the Bharatiya Janata Party (BJP), came to a halt after violent incidents took place on the road.

The incident occurred when the pilgrims, who were supposed to perform in the curative rituals of the Lord Shiva, started singing slogans against the Prime Minister Narendra Modi and the BJP.

As the pilgrims were being stopped by the police, some of them hurled bombs and stones at the police personnel and the vehicles.

The police, in turn, used tear gas and water cannons to disperse the crowd.

The incident led to a clash between the two sides, resulting in the injury of several people.

The police have registered a case and are investigating the matter.

Meanwhile, the Janamajaya Samhati has denounced the incident and has appealed to the people to maintain peace and harmony.

The incident has once again highlighted the growing political tension in the state.

Bengal passes Bill replacing Guv with CM as Chancellor

Pioneer News Service

The Raj Bhavan-Stambh National Park in West Bengal on Monday passed a Bill to replace the Governor with the Chief Minister as the Chancellor of the University.

Amidst a heated debate, the Bill, which was introduced by Chief Minister Mamata Banerjee, was passed with a voice vote.

The Bill, which was passed with a voice vote, will be sent to the President for assent.

The move is expected to pave the way for the appointment of the Chief Minister as the Chancellor, who will have the power to appoint the Vice-Chancellor of the university.

The Bill also provides for the appointment of the Governor as the Chancellor of the university, who will have the power to appoint the Vice-Chancellor.

The move is expected to bring transparency and accountability to the governance of the university.

The Bill will now be sent to the President for assent. Once the President gives his assent, the Bill will become law.

Cong workers detailed while trying to take out march to ED office

Pioneer News Service

Hundreds of Congress workers, led by the party's Lok Sabha MP from Malda, Anirban Bhattacharya, tried to march to the ED office in Delhi to protest against the agency's recent raids.

However, the ED had earlier informed the workers that it would not allow them to approach the office.

The workers, who had gathered in large numbers outside the ED office, were stopped by the police and were forced to return home.

The workers had planned to stage a protest outside the ED office to demand an explanation for the recent raids on opposition leaders and activists.

The workers had alleged that the raids were political in nature and were intended to intimidate the opposition leaders.

The workers had also called for the resignation of the ED director, Sanjeev Chawla, and had accused the agency of creating a climate of fear in the country.

The workers had also demanded that the ED be placed under the control of the Ministry of Home Affairs.

However, the ED had earlier informed the workers that it would not allow them to approach the office.

India’s healthy ties with the world have helped it tide over the Prophet comments’ embarrassment

B

japal Student’s refraction to the controversy surrounding the derogatory comments on Prophet Muhammad by a New Delhi resident, who was later identified as Nupur Sharma, has drawn attention to the sensitive issue of religious sentiments and freedom.

However, the Indian government and its supporters have been vocal in their defense of the comments, citing freedom of speech as the right of every individual. The government has also emphasized that the comments were in the context of a religious discussion and that they were made in a private conversation.

Despite the government’s stance, public opinion in India and elsewhere has been divided. While some have condemned the comments as offensive and disrespectful, others have defended them as an exercise of free speech. The controversy has also highlighted the need for a deeper understanding and respect for different religious beliefs.

India’s ties with the world, particularly Muslim communities, have been strained by the controversy. But the country’s ties with countries like the United States, France, and others have remained strong, reflecting the importance of maintaining diplomatic relations.

In conclusion, the Nupur Sharma controversy has underscored the importance of respecting religious sentiments and promoting a culture of dialogue and understanding. The Indian government, along with other countries, will need to navigate this delicate issue with care to maintain its ties with the Muslim community and other global partners.
Yesterday was World Blood Donor Day

Let’s donate blood because we can

I t is underscores that in our country over 12,000 patients die daily due to lack of blood or blood products or during delivery because blood could not be transferred immediately despite easy availability and in states or national level.

Blood and blood products are essential resources for women suffering from obstetric hemorrhage, newborns suffering from severe anemia, neonates born with birth defects, children suffering from hypertension, tuberculosis, diabetes, neonatal jaundice, strokes, traumas, accidents and those undergoing surgical procedures. The need for blood is universal, but in order to meet the needs of all those who need it.

About 400 women die from pregnancy or childbirth-related complications every day all over the world. Most of them have deaths occur during the three stages of labor, delivery and the immediate post-natal period. A woman can die from blood loss as a result of birth asphyxia, intrauterine growth restriction, placenta previa, placental abruption, postpartum hemorrhage, or due to severe anemia, anemia, or hemorrhage.

 flows to puppies and dogs, but blood and blood in cases where there are severe anemia, anemia, or hemorrhage.

Flows to puppies and dogs, but blood and blood in cases where there are severe anemia, anemia, or hemorrhage.

Blood cannot be manufactured in vitro, it has to be retrieved from a donor and or in vitro, it cannot be used for multiple uses, and or it cannot be stored.

One of the major difficulties with blood is the need to develop the components of blood because since blood cells are not stored, each blood cell can only be used for one of its components. There is a need to develop a blood donor who is willing to donate his or her blood.

A donor can only donate his or her blood once, in an interval of three months. After blood donation one can give blood four times a year without any major restrictions.

Blood donors are also divided into groups, and these groups are determined by their blood type.

The blood group system is divided into four main types: A, B, AB, and O. A person’s blood type is determined by the presence or absence of certain antigens on the surface of their red blood cells.

Blood type A has antigens of A and B, Blood type B has antigens of A and B, Blood type AB has antigens of A and B, and Blood type O has neither A nor B.

Blood types are important for medical purposes, as they determine whether a person’s blood can be safely transfused to another person.

Blood types are also important in blood banking, as they help ensure that blood is matched correctly for transfusions.

People with blood type A can receive blood from any donor, as their blood has no antigens that would cause a reaction if they were transfused with another type.

People with blood type B can receive blood from any donor, as their blood has no antigens that would cause a reaction if they were transfused with another type.

People with blood type AB can receive blood from any donor, as their blood has no antigens that would cause a reaction if they were transfused with another type.

People with blood type O can receive blood from any donor, as their blood has no antigens that would cause a reaction if they were transfused with another type.

Blood types are also important in the context of organ transplantation.

People with blood type A can receive any organ type, as their blood has no antigens that would cause a reaction if they were transplanted with another type.

People with blood type B can receive any organ type, as their blood has no antigens that would cause a reaction if they were transplanted with another type.

People with blood type AB can receive any organ type, as their blood has no antigens that would cause a reaction if they were transplanted with another type.

People with blood type O can receive any organ type, as their blood has no antigens that would cause a reaction if they were transplanted with another type.

Blood types are also important in the context of blood donation.

People with blood type A can donate blood to any recipient, as their blood has no antigens that would cause a reaction if they were donated to another type.

People with blood type B can donate blood to any recipient, as their blood has no antigens that would cause a reaction if they were donated to another type.

People with blood type AB can donate blood to any recipient, as their blood has no antigens that would cause a reaction if they were donated to another type.

People with blood type O can donate blood to any recipient, as their blood has no antigens that would cause a reaction if they were donated to another type.

members of the House. The panel was created under a measure known as the 21st Century Voting Rights Act to consider whether to overturn or change voting laws in states with a history of racial discrimination. The committee was granted subpoena power after obtaining information about a meeting with President Donald Trump, who had been invited to address the House Judiciary Committee on voting rights.

The panel held its first public hearing last week, with witnesses calling into question the validity of the 2020 election. Some witnesses testified that Trump had not conceded the election, and that his campaign had engaged in a "massive effort" to overturn the results.

The meeting assumes significance in the context of the Justice Department's investigation into former President Donald Trump's efforts to overturn the election. The committee is expected to release its findings later this year.

The panel will focus on Trump's efforts to engage with state legislatures and the Department of Justice in hopes of overturning the election. The committee is also expected to examine the role of social media in spreading misinformation and potentially influencing the election's outcome.

The panel's work is expected to be released later this year, after the election, and will be the subject of future hearings and investigations. The committee is expected to hold additional hearings in the coming months to further explore its findings.

For more information, please visit the official website of the House of Representatives Committee on House Administration.

D resonance, Russia is fixating the Donbas region of Ukraine with intense artillery and air raids, making slow but steady progress to seize the industrial hub. The conflict has now entered its fourth month, in which Russia has made significant gains and Ukraine has been forced to retreat, giving Moscow control of key cities and infrastructure.

The Donbas region is a strategic gateway to the Crimean Peninsula and Mariupol, a key port on the Sea of Azov. Russia has already seized Mariupol and continues to advance in neighboring areas. Unconfirmed reports suggest that Russia is currently preparing to launch a major offensive in the eastern part of Ukraine, specifically targeting the city of Kharkiv.

In contrast, Ukraine has been able to stop the advance in the Donbas region and is now focusing their efforts on recapturing Kharkiv. However, Putin has warned that “we have not done this in order to conquer Kharkiv.”

Despite Russia’s apparent successes, experts warn that the situation remains highly fluid and that a full-scale retreat by Ukraine is still possible. Moscow’s continued reliance on artillery and air raids indicates a lack of effective ground forces, which could provide an opportunity for counterattacks.

Ukraine’s military has shown resilience, with significant gains in the Kherson region and a recent counter offensive in the Zaporizhzhia region. Moscow’s advances have been costly and have not achieved its objectives, leaving it vulnerable to future attacks.

In conclusion, the situation in the Donbas region remains tense and volatile, with both sides continuing to engage in major battles. The outcome of this conflict will have significant implications for regional and global security, and will likely determine the future of Ukraine and Eastern Europe.
Retail inflation eases to 7.04% in May on softening food, fuel prices

Spain celebrate as Portugal fall

The 21-year-old's move was described as "a fantastic signing" for Manchester United and "one of the biggest transfers of the summer".

The Portugal international, who has won 14 caps for his country, joined the Red Devils for an initial £51 million ($63 million) with a further £21 million ($26 million) in potential add-ons.

Djokovic slips to 3rd as Medvedev tops ATP rankings

The Serb, who won the US Open earlier this month, was passed by a 23-year-old from Russia in the newly updated rankings.

Djokovic had been at World Number One for 254 weeks, 87 more than his nearest rival, Daniil Medvedev.

"I have never been at the top of the rankings, so I will try to enjoy this moment," said Nunez, who was loanshotted from Benfica to the Premier League champions last year.

He was recently named in Portugal's provisional 23-man squad for the upcoming World Cup and will make his debut at the highest level in November.

But the 21-year-old striker told SportBible: "I can do that here. This is between 2000 and 2003.

Djokovic’s slip to third is a huge boost for Medvedev, who has a bank of 4,070,000 points after the Serbian’s ranking slipped to 3rd.

After suffering back-to-back defeats in its first two matches of the T20I series against South Africa, India can't afford to lose anymore if it wants to secure the home assignment against the Proteas. Karthik came in as a late call-up against the South Africans, who made a mockery of the Indian bowling attack in the opening two matches and easily chased India's 169-run total in the third ODI at Vizag.

For the Blue and White, things have gone from bad to worse in the last few days. After losing skipper KL Rahul and any genuine Rabada under attack at the start of the series, India did put up a stong show in the familiar conditions to keep the visitors at bay. The poor performance of the Indians' spinners – T Natarajan and Chahal at No 3 brought a barrage in the 16th over. Followed by the Yuzvendra Chahal and Axar Patel – has been a cause of concern. The duo have picked up a total of 12 wickets in two matches and have conceded only 112 runs in 11 overs. They looked in a perfect rhythm all the way through the recently concluded 2022 season of the India A set up earlier, will now have to make any significant contribution in India's batting line-up in order to add value to the team's support staff, which is on the hunt for the senior team's support staff, which has been struggling in recent times.

The Indian team management will be hoping that the middle-order Evans and Pant have enough runs in the bank to set a target. It was a stunning start to the innings by the visitors, who included a 168-run partnership for the first wicket. The duo have received their maiden call-up on the back of a wonderful showing in the domestic circuit. After a brilliant partnership of 98 between Tuba Hassan and Heinrich Klaasen, the Proteas were 261/3 after 37 overs.

As for South Africa, they are on top of the ODI rankings and would like to continue the good show in the series in India and would be keen to add another 200 runs to the scoreboard before taking a break. With the damage the visitors have done so far, the hosts will have to find a solution against the short ball. As for India, they are yet to make any significant contribution in the batting line-up. Evans and Pant have been struggling in recent times.

The Indian bowling attack will have a tough task ahead of them in the fourth ODI against South Africa. The visitors are expected to make full use of the conditions on a two-paced wicket and will be keen to add another 200 runs to the scoreboard before taking a break. With the damage the visitors have done so far, the hosts will have to find a solution against the short ball. As for India, they are yet to make any significant contribution in the batting line-up. Evans and Pant have been struggling in recent times.

Axar Patel: 'I am keen to get a step closer to completing the quota of four overs. It may be a difficult task, but I am determined to try my best. The T20 World Cup is a major tournament and I want to make sure I am prepared for it.'

The 41-year-old cricketer has been in good form in the domestic circuit, having scored 1,693 runs in 19 matches at a strike rate of 150.47. He finished the season as the highest run-scorer in the Ranji Trophy, scoring 1,693 runs in 19 matches at a strike rate of 150.47. He is expected to play a key role in the game against South Africa, where his captaincy will be crucial.

Kokil, who has been a regular in the India A side, is expected to make his debut in the series. He has been in good form in the domestic circuit, having scored 1,693 runs in 19 matches at a strike rate of 150.47. He is expected to play a key role in the game against South Africa, where his captaincy will be crucial.

Kwesi Mahbharat: 'I am determined to try my best. The T20 World Cup is a major tournament and I want to make sure I am prepared for it.'
