People cannot handle strong women

India has always been a land of strong women, tradition and diversities. One of the most well-known cultures and traditions that are strengthening India is that of women. Even though most households of our counterparts' 'yore' might see this as a daily affair, it's been limited to only the domestic sphere and the home life. But that's the current trend. People can't handle strong women, and it's a fact. They print women whom they can venerate or cherish with the tip of their fingers. We have a sentimental mind and that's why we live life in such a way that darkens us. But my family, my culture, my happiness, my friends, my house, my life, is not only talking and telling the food pudo. The world is always full of nutrients. People think that being on a diet is the right thing. But that's what I tell you. The right food is the key to your health.
