A decade before Modi assumed power, Indian economy was ranked 11th among developing nations, with the UK ranked fifth. Those were the days when Manmohan Singh, described by Congress leaders as a ‘great economist’, was the country’s Prime Minister. The Indian economy was growing at a rate of 11-12 per cent in the first quarter of the financial year 2007-08, with the government forecasting growth of 9 per cent for the entire year.

Curiously, Congress leaders failed to point out that another leader of the party’s Bharat Yatra, Nizamuddin Hazarika, had said at the time that the Indian economy would probably suffer after the elections in 2007 and that of 2014.

So, it is ridiculous to suggest that Congress and other opposition parties critici- zing Modi for putting forward an alternative vision of development, ‘will continue all its scientific reasoning to predict its implica- tions of development’. These agencies had put the scope for economic growth in Asia, 53 per cent in Asia and 23 per cent in China.

Modi never applied that logic to political decisions. Projects that were rejected by previous governments, as well as projects with a high degree of crony capitalism and basic amenities deprived classes for a better tomorrow. “Our reforms are in the future. “Our reforms are in the past,” said Rahul Gandhi, in his letter to the Prime Minister.

—

Rajeev Chandrasekhar, a tenacious entrepreneur and politician, said it was time for Modi to resolve issues in the country. He had been fighting against the Indian government’s policies for the past few years, and his voice was not unusual among the political class.

Chidambaram, the Minister of Finance, had made it clear that the government is determined to push ahead with its programme of economic reform and development. The government is committed to ensure that the economy grows at a rate of 10 per cent in the current fiscal year, he said. The government has already approved a number of initiatives to promote growth, including the ease of doing business and the implementation of the Goods and Services Tax.

Under Modi’s leadership, India has seen a significant improvement in its economy, with growth rates exceeding 7 per cent in the past few years. The government has implemented several reforms, including the introduction of a national pension scheme, the promotion of microfinance, and the strengthening of financial inclusion.

However, there are still challenges to overcome. The unemployment rate remains high, and the country continues to face issues of poverty and inequality. The government needs to focus on creating jobs and improving living standards for the marginalized sections of society.

In conclusion, while India’s economy has shown signs of growth under Modi’s leadership, there is still much work to be done to achieve a truly inclusive and equitable development. The government must continue to prioritize social and economic welfare for all its citizens.

CBSE syllabus implemented in SC Gurukuls: Minister

Central MLA Mallu Vethala has announced that the CBSE syllabus will be imparted in all government and private high schools in the district. He said that the new syllabus will be implemented in all schools in the upcoming academic year and that the government will provide all necessary support to ensure its successful implementation.

The minister also said that the government will provide all the necessary resources and support to ensure the success of the new syllabus. He added that the government will also provide all the necessary support to ensure the success of the new syllabus.

He also added that the government will provide all the necessary support to ensure the success of the new syllabus. He added that the government will also provide all the necessary support to ensure the success of the new syllabus.
Four more electricity demand forecasting models being developed

Kapoor's Corporation of India in Guntur

Kapoor's Corporation of India in Guntur was recently involved in the development of four more electricity demand forecasting models under the supervision of the AP Power Department. These models are designed to predict electricity demand more accurately by considering various factors, including weather conditions, industrial activities, and seasonal trends. The models will help the AP Power Department in making timely decisions to ensure the smooth supply of electricity to consumers.

Soren survives

It is indubitable that there is a lot of muck in the political arena; it reeks of corruption and shenanigans. The stench, however, doesn't remain confined to the arena; it permeates all spheres of life. It has a lot of unexplained consequences. First, it has been politicised; since agencies and police are routinely seen as acting at the behest of political masters, of the Centre and state governments. The allegations of impartiality have lost the authenticity which was perceptible a few years ago. Now, it is not uncommon to see politically motivated charges being levelled against politicians and officials. Thirdly, the credibility of the constitutional offices like those of governor and even the Election Commission has begun to erode. Even the Congress has abused the office of the Governor by dismissing two chief ministers. And lastly, the lack of people's faith in the political system is vexing. This doesn't augur well for the world's largest democracy. Despite this, even medium and less than medium sized countries could seriously undermine their system.

Bail for Teesta

Activist Teesta Setalvad walks free after getting interim bail but many others still languish in jail awaiting bail

A her spending more than two months in jail, activist Teesta Setalvad got interim bail on August 22 from a bench of the Supreme Court. Even a day before the bail was granted, the CIL made some harsh observations which were likely to be translated into the accord of bail. The CIL, which observed that given the case against Ms. Setalvad, certain proceedings were pending after six weeks to the lady was not the norm and that her offence was not heinous the bail cannot be granted. Teesta after being denied bail by Ahmadabad local court moved to the Gujarat High Court, which gave her a hearing day six weeks later, which was scolded by the CIL, ironically, her FIR and subsequent arrest were direct result of Supreme Court observation which the state government acted in right away. Teesta had lied a plea along with Zaila Jhali challenging the probe that gave a clean chit to Naradha, the then chief minister of Gujarat in the killing of Bhajan Jrai, a former MP in the 1980s. The CIL had not only rejected the plea but observed that Teesta just wanted to give the 'big bullets' for ulcer and design and those involved must be in the dock. Teesta was arrested two days after court observation on June 24, 2022.

It is thus a curious case, the Supreme Court, on one hand, has given the wrong way for arrests and on the other sympathetic with her for being a lady being denied bail for a crime that is not heinous. The irony doesn’t end here, the CIL was so critical of the proceeding that many journalists were not able to get to the jail, 11 people convicted of gang rape were released after remission was granted by the Gujarat government. Teesta was instrumental in bringing them to the book. In fact, after their acquittal, the CIL was given a compensation of Rs. 50 lakh. If the Supreme Court was so convinced about the crime how could Teesta be guilty of forging the documents for which she was arrested? It is not surprising to hear that a crime is made so new and while the whole world knows they are not a threat to society or war- ing against the state they are being branded as enemies of the country. Snapping fringe cases for political expediency has now become an established norm. Transparency International released a list of people jolted for political reasons. Kappai, a Kenyan jour- nalist arrested on his way to Nairobi to report the murder of a child, is the latest. He has been slapped with UAPA, the insinuating section 12, and awaits a hearing of his bail plea for two years and counting.

Gorbachev, the man who oversaw the collapse of the erstwhile USSR. No more. His method might be questionable, his intentions are not.
MUKHIL MASURKAR

The general lack of awareness is a critical factor behind ignorance. To address the same, there is a need for a robust awareness campaign stressing the importance of eye donation. In addition, there is a dire need to alleviate the apprehension of parents by medical counselors and practitioners so that they appreciate the advantages. The situation is to be viewed beyond the issue of the Indian cornea surgeons and greed counselors. Tragically, several corneas go unused after they are collected since there is an insufficient number of cornea banks to process them. Similarly, hundreds got lost in the Hospital Cornea Retrieval Program (HCPR) washed up in 1999. The corneal counselors provide counseling to the deceased’s family and also encourage them to donate the corneas with the deceased with a more planned approach. There is a need for a robust system so that people feel easy at ease while donating the vital organ.

As a first step, we have to position these corneal counselors with excellent skills and knowledge required to counsel people. To come out with a proper method for eye donation, the training and capability for graft counselors needs to be enhanced. Also, steps must be taken by the health ministry to optimize the number of cornea banks and specialists in the country. Additionally, India requires an organized system of donation across the different states. For infrastructural gaps, over 3000 eye donation centers (EDCs) and eye banks are established. Apart from EDCs and Eye banks; various handpicks and surgical skill development is also needed to serve corneas from all regions.

While eye donation is indeed a noble cause, many people still feel hesitant to pledge their eyes due to a lack of proper information and transparency in the process. To meet the need, the government, or the unions, ensure proper integration between all the stakeholders (doctors, government, etc.) to improve awareness. Especially at grass roots level that will also benefit the poorest and inaccessible regions of the country.

Drones can play a critical role in small farm era

Drones can bring in quantifiable and qualitative changes in agriculture, though cost still remains a deterrent

In the current era, which is defined more by technology-led change rather than already at farm level (i.e., at a break-even level) than anywhere else. A wealth of data is needed to measure changes in practices and applications across the farm spectrum are fast becoming a norm.

Aided with technology, the application of drones to add to the efficiency of the current production process, through spraying, is increasingly gaining prominence. The historical data of farmers between 50 years old and 70 years old, who have now decided to go full-scale automation and are applying the technology. In the non-deficiency crops, they are more likely to lead the pack in terms of faster adoption of drone technology for better results, with potential to fully benefit the farmer in the ecosystem.

The credit for showing immense possibilities of drone usage in agriculture goes to the pioneers from the United States. The Pioneers farm across the world is using large-scale or even revolutionary technologies. However, India can deliver drones that farmers have used in the past due to becoming another major agrarian economy. In several countries, especially in Africa, we find drones being used in the near future, with a similar imaging system for drones. The main advantage of an imaging system is the ability to monitor the entire crop at once. The drones’ cameras can cover the entire area and show how the crops are progressing, providing valuable information on crop health, and help farmers identify areas that need more attention or intervention.

The usage of drones is critical in agriculture for various reasons. It not only helps in monitoring crop health but also in improving crop yields. Drones help farmers to identify pests and diseases early, which can lead to increased crop productivity. Drones also help in the management of crop fields by providing a bird’s-eye view of the entire field, which can help farmers to make better decisions about crop planning and management.

Drone technology is evolving rapidly, and the technology is becoming more accessible to farmers. As the technology becomes more affordable, more farmers are likely to adopt it. However, cost remains a significant barrier to widespread adoption. As the technology continues to evolve, the cost is expected to decrease, which will pave the way for wider adoption in the future.

FM defends windfall tax on crude, product exports

The Ministry of Finance has defended its decision to impose a windfall tax on crude oil and product exports, saying the levy has been introduced to address market distortions and support domestic industries.

"The tax is aimed at ensuring a fair sharing of benefits from the global oil price rally with domestic producers and consumers," Finance Minister Nirmala Sitharaman said in a statement.

"It will help to stabilise domestic energy prices and ensure that the gains from higher oil prices are passed on to consumers in the form of lower petrol and diesel prices," she added.

The levy, which took effect from July 1, is expected to generate about Rs 10,000 crore ($134.5 million) in revenue for the government in the current financial year.

Reliance’s 4th investment cycle of $50 bn to double earnings

Reliance Industries, the country’s largest company, is investing $50 billion over the next four years to double its earnings and become a $500 billion company.

The announcement was made by Reliance Industries’ chairman Mukesh Ambani during the company’s annual general meeting (AGM) on Monday.

"We are embarking on our fourth investment cycle which will take us to $500 billion in revenue," Ambani said.

"We will double our earnings in the next five years to $100 billion.

European Commission for Energy to visit India on Sept 7

The European Commission for Energy will visit India on September 7, 2022 to discuss bilateral energy cooperation and explore opportunities for increased energy cooperation.

"We are looking forward to the visit of the European Commission for Energy to India," Indian Foreign Minister S. Jaishankar said in a statement.

"This will be an opportunity to discuss issues such as climate change, nuclear energy, and the transition to renewable energy sources.

Reliance, Tata Motors to perform well this year

Commercial vehicle companies are expected to perform better this year, with both Reliance and Tata Motors reporting higher sales and profits.

Reliance Jio, the country’s largest telecom operator, reported a 35% increase in revenue and a 25% increase in net profit in the June quarter.

Tata Motors, the country’s largest car manufacturer, reported a 30% increase in sales and a 40% increase in profit in the June quarter.

Bank union opposes public sector banks’ ‘loan melas’

The Bank Unions’ Federation of India (BUFI) has announced that it will oppose public sector banks’ ‘loan melas’ (market days).

The BUFI said that these events are opportunistic sales pitches by banks to attract customers and are harmful to the public sector banks and their customers.

Moreover, the BUFI said that such events go against the guidance of the Reserve Bank of India ( RBI) and the banking code of ethics.

Tea exports during current first half rise

In the current first half, tea exports rose by 10% to 126.35 million kg from 114.56 million kg in the previous period.

The rise in exports is attributed to increased demand from major markets such as the European Union and the United States.

"The increase in tea exports is a positive sign of the recovery of the tea industry," said Tanmay Singh, chairman of the Indian Tea Association.

"The turn-around in tea exports is a reflection of the resilience and adaptability of the tea industry in the face of global challenges.

Indian services sector sees sharp upturn

India’s services sector witnessed a sharp upturn in the month of August, with services sector activity rising to its highest level since March 2021.

The rise in services sector activity is attributed to strong demand for services, particularly in the technology, IT, and financial services sectors.

"The services sector is recovering robustly from the pandemic-induced slowdown," said Amitabh Kant, CEO of the National Institution for Transforming India (NITI) Aayog.

"The rise in services sector activity is a positive sign of the economic recovery in the country.

EIX total trade volume dips 18 pc to 78,505 mn units

The EIX total trade volume of Indian equities and derivatives fell 18% to 78,505 million units in the month of August 2022 compared to 95,636 million units in the previous month.

The total trade volume for August 2022 was 73,583 million units, as per SEBI.

The trade volume for August 2022 was 95,636 million units, as per SEBI.

"The decrease in EIX total trade volume is attributed to the market’s reaction to the Russia-Ukraine conflict and the US interest rate hike," said Anil Singhvi, CEO of EIX.

"The decrease in EIX total trade volume is also attributed to the market’s reaction to the US interest rate hike and the Russia-Ukraine conflict.

Kartik Aaryan to star in Aashiqui 3 directed by Anurag Basu

Bollywood heartthrob Kartik Aaryan will be seen in the third installment of the Aashiqui franchise, directed by Anurag Basu. Kartik said, "The timeless character Aashiqui is something I’ve always aspired to play. It is a dream to bring it back at some of the defining moments of my life, both personally and professionally."

Aashiqui 2, which starred Bradhika Kapoor and Aditya Roy Kapur, was lauded by audiences and critics alike and was a huge success. The team, which included Aditya and Shraddha Kapoor, has a special bond with the franchise and was thrilled when given the opportunity to reprise their roles. Aditya and Shraddha have been attached to the project for some time, but the details of their involvement remain under wraps.

The musical is jointly produced by Siddharth Roy Kapur and Bhushan Kumar. It will have music by Pritam. The team-look started the collaboration on a positive and spiritual note by seeking blessings from Lord Ganesh during a puja ceremony. Producer Mahesh Bhatt said, "Aashiqui 3 is a story of love and sacrifice. It’s about breaking the shackles of societal expectations and living life on our own terms. I am very confident that we will touch the hearts of countless people with this film."

"Aashiqui 3 is a story that speaks about love and sacrifice. It’s about breaking the shackles of societal expectations and living life on our own terms. I am very confident that we will touch the hearts of countless people with this film," producer Mahesh Bhatt said. The film is directed by Anurag Basu, who has directed the first two installments of the franchise. The shoot is scheduled to start in 2023.

The healthcare sector has become one of the largest sec-
tors in terms of revenue and employment. The health-
care industry comprises hospital, medical devices, clinical laborato-
ries, medical tourism, healthcare IT, and many other types of medical equipment. These market sections are
related to the emerging aging population with a maturing middle class progressively inclined toward preventive healthcare.

Moreover, the surging proportion of lifestyle disease caused by high blood pressure, diabetes, obesity, and smok-
ing habits has increased regional and national government initiatives to support the development of medical equipment. These measures are associated with public awareness campaigns on health promotion and disease prevention. These efforts target to reduce the burden on the healthcare system by promoting healthy lifestyles and preventive care.

The city is home to the age-old Osmania Medical College along with various private super-specialty hospitals like Apollo Hospitals and Udayapha Hospitals, among others. There is also the Indian Heart Association, which is quartered at Jiddah Hills, dedicated to raising awareness about heart disease among the South Asian population. The government offers a substantial number of medical specialties, including cardiac surgery, neurosurgery, and organ transplantation.

The city also hosts several medical and research institutions that conduct research on emerging diseases and develop new treatments. These institutions collaborate with international partners to advance medical research and innovation.

The first and most important changes in the healthcare sector have been the introduction of the latest medical technologies and procedures. These advancements have improved patient outcomes and reduced recovery times. The expansion of telemedicine services has also allowed patients to receive medical care from the comfort of their homes.

The healthcare sector in Vijayawada has seen tremendous growth over the years.

The Pioneer

The Pioneer brings to the story of Mohan Kanan, who lent his soothing voice to some amazing tracks in Hindi film Sang, Chhatta, Pongs, Cocktail, and many more.

While conversing with the singer about his latest song in the upcoming film "Laal Singh Chaddha," Mohan shared that he had been associated with Prithviraj for a while now. He added that he had to make sure that the lyrics complemented the singer's voice perfectly, and that the song was just right for the listeners.

Through his work, Mohan has been able to make a mark in the music industry, and he continues to inspire young artists with his dedication and passion for music.

The Pioneer

The Pioneer brings to the story of Mohan Kanan, who lent his soothing voice to some amazing tracks in Hindi film Sang, Chhatta, Pongs, Cocktail, and many more.

While conversing with the singer about his latest song in the upcoming film "Laal Singh Chaddha," Mohan shared that he had been associated with Prithviraj for a while now. He added that he had to make sure that the lyrics complemented the singer's voice perfectly, and that the song was just right for the listeners.

Through his work, Mohan has been able to make a mark in the music industry, and he continues to inspire young artists with his dedication and passion for music.

Kantara seems to be another stunner in the making from Homble Films

Sharanand, Raashii Khanna’s next is a political action drama

Prominent hero Sharwanand for his next film will be venturing into a political action drama. Sharwanand, one of the most successful producers of Tollywood, is backing this project under People’s Media Factory, while Venkat Kothaichella is the co-producer. The yet-to-be-titled movie is being directed by Raghav Lawrence, and Sharwanand's next was launched on Monday as an announcement with a poster cover. The film producers, Chandu Mondeti, Tanu Raghupathi, Sudheer Sharma, and Sitara turned their faces towards the camera to wish the audience, and Vijay Prakash, the music director, also sent his wishes through a video.

Produced by Sharwanand, Venkata Chakrapani, and Vivek Sagar Pardeshi under People's Media Factory’s banner, the film promises an intense and dramatic storyline. The film is going to be shot across diverse locations and will be released in the Kannada language.

Prabhas enters into a three-film deal with PVP

Actor Prabhas, who recently concluded shooting for Salaar, has entered into a three-film deal with PVP Creations Vamshi and Hanu Raghavapudi, Sudheer Sharma. Prabhas, along with PVP Creations, is planning to enter into a deal with two more directors. Krishna Chaitanya himself will be directing the first film, while Krishna Chaitanya, along with PVP Creations, will be producing the third film.

Varma, UV Creations Vamshi and Hanu Raghavapudi will be working on producing engaging cinematic content. Kathir’s directorial debut, with Prabhas in the lead, is being called Salaar, and it is reportedly going to be a political action drama.

Mrunal Thakur bags a big-budget film

Mrunal Thakur, who made her debut opposite Akshay Kumar in the blockbuster Mission Mangal, has bagged a big-budget film titled Mini Katha. The film is directed by Rajamouli’s son, Nuninga, who has previously won National Awards for his direction.

Namrata, Sitara sign up an exclusive brand association

Namrata Shirodkar and Sitara, two of Tollywood’s best-known actresses, have signed up an exclusive brand association with the breakfast brand Goodness. With her own experience as a mom, Namrata Shirodkar said, “As a mom of two kids who are growing up, very often I would worry about getting my kids that wholesome and healthy breakfast. It’s a thing that they enjoy eating, while at the same time ensuring good nutrition. When our kid tried the Goodness breakfast range full of energy, they were happy about it, and the chocolates and the granola bar, as a snack, were really enjoying the taste of the product.”

For the audience, the Promise of the product is mentioned on the packaging, giving good nutrition to kids in the task format they enjoy the most.
