Spillway concrete, ‘End Cairns’ concrete in spill channel, Gap; 3 ECRF dam concrete, Gap 4 dam concrete, installation and testing of 48 units, 10 river sluice gate works completed

SANDRAHANI R ING & TRI MANS

Six out of the 17 major and sub-components of the Polavaram project, the backbone of the State, have been completed.

The Polavaram project works have immense significance following a discussion on the subject in the recently-concluded Assembly session. The discussions were over the completion of the project works. The Polavaram mega project is being started on the Guntur-yellow sand sea barrier. 5. The construction of spillway concrete has completed up to a height of 35.30 metres, which is one of the main components of the Polavaram project. 1.25 The total targeted work in this component was Rs. 4110.78 crores, which is 30.1 per cent of the total work in the project, which has already been completed.

The incident took place at Pallipalem village in Kajuluru mandal. Deputy Chief Minister and Minister for Endowment Kottu Satyanarayana, who is the in-charge minister, said that the man who carried out the heinous crime was staying with her elder son. She has been staying with the victim and uploading social media videos as and when she could. The man who carried out the heinous crime was staying with her and was singing and dancing when he saw the victim lying unconscious due to severe torture, and uploaded the video to social media.

**Corrupt leaders forming front to save their skin**

The text in the image appears to be a continuation from Page 1, discussing the role of women in politics and the challenges they face in the current political climate. The passage highlights how women are often overlooked and underrepresented in leadership roles, particularly in the context of political parties and movements. It touches on the need for equal opportunities in leadership and the importance of empowering women in decision-making processes. The text also mentions the need for political leaders to foster a culture of accountability and transparency, ensuring that women who have previously been marginalized are given a chance to lead and contribute to the betterment of society. The overall message is one of encouragement and support, urging readers to advocate for gender equality in politics and to elect leaders who prioritize women's rights and empowerment. 

**Women play key role as heads of families, minister tells**

The text in the image is a continuation from Page 1, focusing on the role of women as heads of families and their contributions to society. The passage highlights how women, despite facing various challenges, have stepped up to lead and make significant contributions. It emphasizes the importance of recognizing and valuing the efforts of women in leadership and the need for policies and initiatives that support women in their roles as heads of households. The text also mentions the need for political leaders to prioritize gender equality and to work towards creating a more inclusive and equitable society. The overall message is one of celebration and empowerment, urging readers to support and uplift women in leadership roles.

Apple now manufacturing iPhone 14 in India

A recent phone iPhone 14 will be made in India as the global tech titan has begun the manufacturing process of the world’s second-largest smartphone market in a move that could help create 50,000 jobs by 2023. The company announced Monday it will begin manufacturing the iPhone 14 at its $1 billion smartphone factory in Bengaluru.

The plant, which will produce the iPhone 14, 14 Pro, and 14 Pro Max, is part of Apple’s efforts to diversify its supply chain and reduce its reliance on Chinese suppliers. The company has been facing challenges in China, including labor shortages and supply chain disruptions, which have led it to look for alternative manufacturing locations.

The Bengaluru plant is Apple’s first in India and will be able to produce the three models of the iPhone 14 series. The company has been investing heavily in India, with plans to spend $4 billion on its operations there by 2025. The plant will also serve as a hub for other companies in the region, with the potential to create 50,000 jobs over the next five years.

The iPhone 14 devices will be manufactured at Apple’s Bengaluru plant, which is located in the city’s Electronic City industrial area. The plant is expected to produce over 1 million units per week, which will be exported to other countries.

The iPhone 14 series includes the iPhone 14, iPhone 14 Plus, iPhone 14 Pro, and iPhone 14 Pro Max. The iPhone 14 and iPhone 14 Plus are equipped with Apple’s new A16 Bionic chip, and the iPhone 14 Pro and iPhone 14 Pro Max feature the more powerful A17 Bionic chip.

The iPhone 14 series also includes a new front-facing TrueDepth camera system, which includes an ultrapixel camera and a 10-megapixel front-facing camera. The devices also feature an improved Night Mode for low-light photography.

The new iPhone 14 series is expected to be a popular choice among consumers, with its advanced features and improved design. The company has been investing heavily in India, with plans to spend $4 billion on its operations there by 2025. The plant will also serve as a hub for other companies in the region, with the potential to create 50,000 jobs over the next five years.

Amidst the China-Ukraine crisis, the US sanctions on Russia, and the US-China trade war, Apple has been looking to diversify its supply chain and reduce its reliance on China. Food Security Dwindles

Increasing food grain prices will be a big blow to country’s food security which is already strained

Food security has been a major challenge as we have a sizable population that is chronically undernourished. India has been continuously working on reducing various issues dealing with food security, self-reliance, and food processing. According to the UN, there are nearly 195 million undernourished people in India, which is a quarter of the world’s total. Also, roughly 45% of children in India are chronically undernourished. India has a population of 1.34 billion people. The current food security challenges include water scarcity, weather events, and declining agricultural productivity. India’s food security is critical for its population growth and economic development.

In this scenario, the government is said to be considering an increase in the price of rice, wheat, and pulses sold through the National Food Security Mission (NFMS) by 7% per kg for Priority Households. The government has been under pressure to increase the price for sale to the poorest of the poor from Antyodaya Anna Yojana households by an additional 1% per kg. The Ministry of Food is reportedly bringing it up for consideration at the Cabinet level. As per the NFMS, the subsidies for food grains to two-thirds of the population. It is time to strengthen the food security network through a central government, making it a priority for the new government.

POLUTING A RIVER IS A SIN AGAINST

Immersion of idols laced with harmful chemicals does an irreparable damage to a river, time to stop sinning against salvation

It is that time of the year again when procedure and ritualistic immersion of idols is practiced in religious fervor. Millions of devotees, votaries, for them, it is a time of spiritual cleansing. This festival brings joy to the waters of our rivers. The ritualistic immersion of idols has been a part of the festival for decades. The recently concluded ‘Navratri’ festival in Tamil Nadu, with the Durga Puja, immersion, has successfully culminated. The idol immersion season across the country has ended. Though these processes are perceived as divine, almost universal, some of the power of salvation and exaltation of the deities are merely symbolic. However, the idol immersion ritual signifies a sort of purification of the bodies, a sort of ‘transubstantiation’, universally, the river becomes the vehicle for the creation. This becomes the reason for pollution. Most of the pollution not only leads to surface pollution in the rivers but also damages their biodiversity and cause excessive and often irreversible contamination of the river system. The idols immersed in the rivers are made from Plaster of Paris, which takes countless years to decompose. The discharge of waste mercury like, coal ash, and ash dust, is also a problem.

Rivers pollution, in fact, is a major issue of the present day. According to the World Bank, the Ganges river water quality at selected stretches of the river in recent years. For analysing a detailed analysis of the pollution contribution in the rivers, the authors used a combination of conventional laboratory analysis, on-site sample collection, and advanced molecular platforms equipped with portable pollution sources to pinpoint the pollution sources causing the high water quality levels at high ambient pollution levels due to the significant deterioration in the river water quality due to pollution. The NCAER study points out that despite being among the top 10 in terms of surface drainage of the world and home to both perennial and non-perennial rivers, India has far from the lushest river basin.

A large proportion of the pollution in the rivers is because of the religious activities and the release of raw sewage, untreated industrial effluents, pesticides, and debris into the rivers. A significant proportion of the pollution of the Ganges is caused by religious activities. The pollution of the Ganges is not only harmful to biodiversity but also affects the river’s water quality. The pollution caused by religious activities is serious and requires immediate attention.

It is thus imperative for the authorities to follow a somewhat centralised approach for monitoring the pollution levels due to immersion. Both, the authorities in Dakka and the Narmada Ganga Clean Campaigns be undertaken to clean the Ganga river can also draw lessons from the Kerala, Karnataka, and Tamil Nadu administrations that has been following the no-pollution policy during the Durga Puja, Relius in the state, and a clear and simple regulation of the dried-up river banks for collection of decorative items removed from idols before their immersion. Therefore, any residual debris in the river is removed from the river bank, and the focus of the clean-up should be to clean up the river rather than remove debris from it.

The NCAER study also revealed that a huge section of the people living in the Ganga river basin depends on the river for their daily needs and livelihood. Similarly, the Yamuna river in the agrarian belt of the north and its surrounding areas, apart from being the Yamuna, Ganga, and all our rivers suffer constantly from industrial pollution.

The question is, what can we do to protect our rivers from further deterioration? The least we can do in return is keep them clean of physi- cal and human waste.

SOCIAL MEDIA SPURS SUICIDAL TENDENCIES

Excessive usage of social media could harm mental health of kids

Ajit Kapoor

With suicide cases being the second leading cause of death among children and youth aged 15-19 years, influence of social media (SM) interest is immense. Digital interventions among health and social service providers have emerged as a vital channel for communication. Social media has the power to influence people's behavior and mental health and well-being, making them more susceptible to self-harm, suicide, and people taking their own lives. A study published in 2015 highlighted teenagers who used social media more than two hours a day had higher risk of mortality compared to those who reported lower social media usage.

An editorial from the Lancet in 2019 concluded that over the last decade, the media and SM had increased the awareness about suicide, especially among teenagers and young adults. The editorial postulated that SM has the potential to be a positive force in promoting mental health awareness and prevention.

But the same SM can lead to a negative impact if not used appropriately. Social media can increase the risk of suicide and self-harm, particularly among teenagers who use it excessively. Social media can provide a platform for vulnerable individuals to seek support and reduce feelings of isolation, but it can also exacerbate feelings of loneliness, inadequacy, and depression.

Social media can also lead to cyberbullying, which is a form of bullying that occurs online. Cyberbullying can cause emotional distress, anxiety, and depression, and can have long-term effects on mental health. Children and young adults who are bullied online are more likely to experience negative outcomes, such as low self-esteem, anxiety, and depression.

Social media can also lead to the spread of misinformation, which can have serious consequences. False information can lead to fear, anxiety, and panic, and can cause harm to individuals and communities. Social media can also be a source of harassment and malicious behavior, which can lead to mental health issues.

Social media can also lead to addiction, which can be a significant problem for children and young adults. Addiction to social media can lead to decreased academic performance, decreased social interaction, and decreased physical activity. Social media addiction can also lead to financial problems, and can disrupt family relationships.

Parents and caregivers need to be aware of the potential risks associated with social media use, and should monitor their children's use of social media to ensure that it is safe and healthy. Parents should also provide their children with guidance on how to use social media safely, and should encourage them to engage in positive online activities.

Children and young adults need to be taught how to use social media safely and responsibly. They should be taught to be aware of the potential risks associated with social media use, and should be encouraged to engage in positive online activities. They should also be taught to be aware of the potential risks associated with cyberbullying.

The role of social media in mental health

Social media can be a powerful tool for mental health promotion and prevention. Social media can be used to raise awareness about mental health issues, and to provide support and resources to individuals who are struggling with mental health issues.

Social media can also be used to provide mental health education, and to promote healthy behaviors. Social media can be used to provide information about mental health, and to promote healthy behaviors, such as exercise, healthy eating, and stress management.

Indias FY23 GDP growth pegged at 7.3% of 1986

The Organisation for Economic Co-operation and Development (OECD) has forecast the Indian economy to grow at 7.3 per cent in fiscal year 2023, the highest among all major economies – including China and the US. The OECD expects China’s economy to grow by 4.4 per cent and the US’s by 1.6 per cent during the same period.

The forecast is based on a positive outlook for the recovery in consumer demand, driven by high-frequency indicators, and the easing of inflationary pressures, the agency said.

In its report titled ‘OECD Economic Outlook: Biannual Edition’, the OECD projected India’s growth rate to rise from 6.1 per cent in the fiscal year 2022-23 to 8.9 per cent in 2024, largely driven by strong private consumption and robust public spending.

The Indian economy grew at 7.8 per cent in the financial year 2022-23, the fastest pace in three years, the report said, attributing the growth to pent-up consumer demand and the rising confidence of businesses.

The OECD forecast for India is higher than the ones given by other international agencies. The International Monetary Fund (IMF) had in July forecast India’s growth rate at 7.3 per cent in fiscal year 2023-24, whereas the World Bank estimated it at 7.1 per cent.

Among the major economies, China is expected to grow at 4.4 per cent, while the US is projected to grow at 1.6 per cent.

The OECD said India’s strong economic performance over the past two years is likely to continue, with private consumption remaining robust and public investment contributing to growth.

However, there are risks to this outlook, the report added, noting that the recovery in the global economy is uneven, with some countries facing high inflation and supply chain disruptions.

The report also highlighted the need for India to continue reforms to boost investment and productivity, and to address the challenges posed by climate change and inequality.

The OECD said India’s attractiveness as a destination for foreign investment had grown, with the country attracting more foreign direct investment in recent years. It also noted that India’s large and diverse market offered opportunities for businesses.

However, the report cautioned that India’s progress on reforms could face challenges, including political sustainability and the need for stronger governance.

The OECD forecasted that India’s inflation rate would ease from 6.5 per cent in the fiscal year 2022-23 to 5.7 per cent in 2023-24, with the world average inflation rate expected to remain above 5 per cent.

The report recommended that India continue efforts to improve the business environment, enhance skills development, and strengthen financial sector stability.

The OECD also reiterated its call for India to reform its tax system to ensure it is efficient, equitable, and conducive to growth.

Overall, the OECD report underscored India’s potential as a major player in the global economy, though it cautioned that challenges remained.

Investors lose Rs 13.3 lakh cr in four days of market crash

Equity investors’ wealth has dwindled by over Rs 13.3 lakh crore in just four days of market turmoil amid a sharp sell off in global markets. On Monday, the Sensex briefly slipped below the 50,000 level for the first time since March 2020, losing over 1,500 points and the Nifty closed in the red for the first time since April 8, 2022.

The Sensex fell 1,568.23 points or 2.96 per cent to close at 50,866.07, while the wider Nifty 50 ended 491.70 points or 3.39 per cent lower at 13,837.43.

The acquisition of BSE and Bombay Stock Exchange (BSE) has led to the formation of the Bombay Stock Exchange Limited (BSE Limited), which is a public company. The BSE has a long and illustrious history, dating back to 1875, when it was established as the Calcutta Stock Exchange. The BSE is the largest stock exchange in India and is considered a leading indicator of the country’s economic health.

The BSE is known for its transparent trading system and stringent listing criteria. It provides a platform for issuers to raise capital through equity and debt instruments and for investors to participate in the equity market. The BSE has a diversified range of indices, including the Sensex, Nifty, and several sectoral indices.

The Sensex is a capitalization-weighted index comprised of 30 large-cap stocks. It is widely regarded as the benchmark index for the Indian stock market.

The Nifty, on the other hand, is a broad-based index consisting of 50 large-cap and mid-cap stocks. It is considered a more comprehensive representation of the Indian stock market.

The BSE has a strong track record of providing a stable and reliable platform for trading. It has also made significant efforts to enhance its infrastructure, technology, and regulatory framework to support the growth and development of India’s capital market.
Gerard Butler, and Judi Dench amongst the invitees for Richa, Ali’s wedding

A

Richa Chadha and Ali Fazal’s wedding is now only days away, and the guests are soon set to roll in to Delhi to begin their celebrations. The buzz is that amongst those invited to the Shaheen bagh actress’ big day are Ali Fazal’s Hollywood past, as well as the couple’s illustrious family connections. 

Amongst others, Ali has also invited his famous parents Ali and Poonam from their hit TV series Kandahar. It’s been almost 25 years since he made his debut in the film industry, and he’s still following his dreams. As an actor, I feel privileged, shared and I have been left wanting for good roles. I feel for actors and I am sure it will happen one day,” Ali said that in Hollywood, it’s a positive sign that you get stereotyped in a past role or if you are keeping the same roles. As an actor, we want our fans to not only see you in a role, but also see you in a different role. However, I feel that the same role for an actor is an opportunity to show what you can do. As an artiste, I am still following my dreams. People have seen me in a particular role, but I also have more to offer. I can do much more than just comedy roles. I am not only a comic actor, but I can cry and make people cry too. That side of me is yet to be explored, but I am sure it will happen one day."

Khloe K and 365 Days actor Michele Morrone spend time together in Milan

Khloe Kardashian and Italian actor Michele Morrone sparked romance rumors this weekend, after they were seen together at the summer 2022 Milan Fashion Week. 

The actress, 31, and her Italian co-star, 30, were spotted together on September 24, during and after Dolce & Gabbana’s spring or summer 2023 Milan Fashion Week show, where the designer and his sister Kim Kardashian debuted their new collection together. At the event, Khloe and Michele appeared to be getting along famously. Khloe was seen hugging Michele in front of her fashion show in Milan. The pair were also seen chatting closely at an after-party. Khloe has reached out to the star's right but has not headed back. As of Sept 25, neither Khloe, 38, nor Michele, 31, follows one another on Instagram.
Expanding your business digitally

The versatile actor Angad Bedi, who has recently won the Best International Feature Film Oscar for his short film, "The List" has said that the film should be India’s official entry to the Academy Awards.

"The List" is a short film directed by Shyam Sharma and Dhruv Shah, and produced by Angad Bedi's production company, "The Pioneer."

The film tells the story of a couple, Madhuri and Rajeev, who are trying to decide what to cook for their first anniversary dinner. Madhuri's family has a tradition of preparing the same dish every year, and they are stuck on what to make. They turn to their social media for help, and their followers suggest a variety of dishes. Madhuri and Rajeev choose a dish that is a combination of all the suggestions, and it turns out to be a hit.

During an exclusive interview with The Pioneer, the versatile actor Angad Bedi shares some insights about his recently released short film, "The List."

"I was approached by the director, Shyam Sharma, and Dhruv Shah, who are both very talented filmmakers. They had a concept for the film, which I thought was very unique and relatable. "The List" is a story of a couple trying to decide what to cook for their first anniversary dinner, and they turn to social media for help. It's a story of love, togetherness, and compromise."

"The film has been widely appreciated by the audience and has won several awards. It's a heartwarming story that has touched many people. I'm very happy with the response."

"I am very grateful to all the people who have supported the film. I hope it continues to do well at the box office and that many more people will watch it."

"I would also like to thank my co-stars, Shyam Sharma and Dhruv Shah, for their hard work and dedication. They have made "The List" an unforgettable experience."

The List should be India’s official entry to Oscars; says Angad Bedi

During an exclusive interview with The Pioneer, the versatile actor Angad Bedi shares some insights about his recently released short film, The List.

IN CANADA: ICRC agrees to re-name "The Arc"

Following a disappointing Asia Cup campaign, India's bowling attack became a point of concern in the last few matches. Rohit Sharma, who made a comeback from injury, has been standing his ground with an economy rate of 12.4.

"It is important that we give him the chance to keep backing his skillset," Rohit said. "Bhuvneshwar is not going to be as good as he was, but he'll be useful. When we have a match winning situation, he's had more good days than the bad days in the last so many times: Deepti Sharma." he said.

Rohit also praised the teamwork of the Indian team, "When it comes to Surya and Deepak, we all know his quality. He can handle that bowling lineup. I think he has the confidence to bat against him."

"Shahbaz is more of a batting all-rounder, who is more than a specialist is not being judged on how he is bowling, but we need game time before the World Cup. You need to see some of your mainstay players due to injuries but the bowlers are also learning."

"But if we want to be competitive in the World Cup, we need game time before the World Cup. We have options to bowl on both sides and also for his franchise. It's a different challenge compared to the middle of winter, and that is why we are giving him the chance and we can't be predictable. You need to have patience to bowl both on the batting and the bowling side."

"The bowling is the main focus. We have options to bowl on both sides, but the bowling side is also important. Where you can do that, you should. But you need to play with the mindset of it being a batting versus bowling game."

"It's probably opportunistic, we have a few of our World Cup-boud players out due to injuries but the head coach feels the defending champions have enough depth to overcome the situation."

"If you want to win the World Cup, you don't see so many of your mainstays options out of the team leading the way. So, we need some good options in place to deal with different situations."

"As a left-hander if we need a right-hander, it's important for me to just handle that bowling lineup. The best guys for us who can handle that bowling lineup."

"I want to give DK more game time ahead of T20 World Cup"

"It's probably opportunistic, we have a few of our World Cup-boud players out due to injuries but the head coach feels the defending champions have enough depth to overcome the situation."

Mani Ratnam: Tech advances alone have made Ponniyin Selvan today

M ani Ratnam, who is bringing historical epic Ponniyin Selvan to the big screen, said the technological advancements will have a huge impact on the film. "The advances we have had in technology today are a huge advantage for us," Ratnam said during an interview with IANS.

The film is based on Kalki Kartikeyan’s novel about the life of Ponniyin Selvan, a historical figure known for founding the Chola Dynasty.

In the upcoming period, the director said he is excited about the possibilities that technology offers. "The technology is the biggest advantage for us. We are making this film in a very different way. We are trying to bring in new ideas and concepts," Ratnam added.

Ratnam also expressed his admiration for the cast and crew who have put in a lot of effort into the making of the film. "I am very happy with the way the shooting has gone. The actors and the crew have worked very hard," he said.

The film is scheduled to release in October, and the期待 is high among the fans for its grand scale and historical accuracy.

Kajal is in a mood to raise an EcoBaby

The talk of the town is Varalaxmi Sarathkumar, who is all set to launch the first-ever EcoBaby store in Koalidana.

Varalaxmi Sarathkumar will be launching the EcoBaby store in Koalidana, which is an initiative to promote sustainable living and reduce waste. This is the first time a celebrity is launching such a store.

The store will carry a wide range of eco-friendly products like organic clothing, personal care items, and home decor. It will also provide information and workshops on living a sustainable lifestyle.

Varalaxmi Sarathkumar, who is known for her commitment to social causes, said, "I am thrilled to be a part of this initiative. It is important that we take care of our planet and promote sustainable living."

The store is expected to attract a lot of attention, and it is likely to become a trendsetter in the eco-friendly movement.

"THERE IS NOBODY BETTER THAN JANU MASTER", SAYS AYUSH SHARMA

A yush Sharma, who is known for his versatile acting, recently shared his thoughts on his upcoming projects and upcoming films.

Speaking to IANS, Ayush said, "I am really excited about my upcoming projects. We have a few action films in the pipeline, which are going to be very exciting to watch."

Ayush also expressed his gratitude towards his fans for their support and encouragement. "I want to thank all my fans for their support and love. It means a lot to me to know that you love me and my work."

Ayush’s upcoming projects include several action-packed films, and he is looking forward to bringing out the best in his performances.

Makers of Adipurush launch its teaser on Oct 02

A dash of Adipurush! Bollywood and first-rank historical period Adipurush. The film is slated for a special release on October 2.

The much-awaited period drama stars Prabhas, actors, and producers. The film is expected to release in theaters on October 2.

Prabhas will be seen playing the role of Rama in the film, and the teaser will give a glimpse of his look and performance.

The film is directed by SS Rajamouli, who is known for his blockbuster historical films like Baahubali and RRR.

The teaser will be released tomorrow, and fans are eagerly waiting to see the first look of Prabhas and the other actors in the film.
