SC gets 5 judges as Govt keeps pledge

PIONEER NEWS SERVICE ■
NEW DELHI

A day after promising the Supreme Court that the Collegium's pending recommendations for the elevation of five High Court judges to the apex court will be cleared soon, the Centre on Saturday notified the appointments. The five judges elevated to the apex court are Justices Pankaj Mithal, Sanjay Karol, PV Sanjay Kumar, Manoj Misra and Ahsanuddin Amanullah.

Law Minister Kiren Rijiju tweeted to announce the appointment of the judges.

Justices Pankaj Mithal, Sanjay Karol and PV Sanjay Kumar are Chief Justices of Rajasthan, Patna and Manipur High Courts respectively. Justice Ahsanuddin Amanullah is a judge of the Patna High Court and Justice Manoj Misra is a judge of Allahabad High Court.

On Friday, the Supreme Court had expressed displeasure and pulled up the Central Government for delaying the appointments of the five judges, who were recommended by Collegium on December 13, last year. A Bench of Justices Sanjay Kishan Kaul and Abhay S Oka had given the Centre an ultimatum to process the appointments within ten days, after Attorney General N Venkataaramani had submitted that they would be done "soon".

When the Bench insisted for a specific timeline, the AG said that appointment warrant

will be issued on Sunday.

Justice Pankaj Mithal, currently serving as the Chief Justice of Rajasthan High Court, was Chief Justice of Jammu & Kashmir and Ladakh High Court. His parent High Court is the Allahabad High Court. Justice Sanjay Karol is currently the Chief Justice of Patna High Court and was Chief Justice of Tripura High Court. His parent High Court is the Himachal Pradesh High Court.

Justice PV Sanjay Kumar is Chief Justice of Manipur High Court and served as a judge of Punjab & Haryana High Court. His parent High Court is Telangana. Justice Ahsanuddin Amanullah is presently a judge of the Patna High Court before being transferred back to Patna, his parent High Court. Justice Manoj Misra has been a judge of the Allahabad High Court for the past 12 years.

Currently, the Supreme Court has 34 judges and there

are seven vacancies. With these five new judges, its strength will go up to 32, with just 2 vacancies.

On January 31, the SC Collegium had recommended the names of Allahabad High Court Chief Justice Rajesh Bindal and Gujarat High Court Chief Justice Aravind Kumar for elevation to the Supreme Court.

Public is 'malik', nobody can give warning: Rijiju

Prayagraj: A day after the Supreme Court warned of action for any delay in clearing transfer and appointment of judges, Union Law Minister Kiren Rijiju on Saturday said, "Public is 'malik' (master) of this country and we are servants. We all are here for service and the Constitution is our guide.... The country will be governed under the guidance of the Constitution and wishes of the public. Nobody can give warning to anyone."

India's image unaffected by Adani's FPO pullout: FM

PNS ■ MUMBAI

India's economic image is not affected due to Adani Group's recent decision to pull out ₹20,000 crore FPO amid allegations of financial wrongdoings, Finance Minister Nirmala Sitharaman said on Saturday.

The Finance Minister said there has been an accretion of USD 8 billion to the forex reserves in the last two days alone. "...Our macroeconomic fundamentals or our economy's image, none of which has been affected. Yes, FPOs (follow-on public offers) come in, and FIIs (foreign institutional investors) get out," Sitharaman told reporters here.

The Minister said there are "fluctuations" in every market but the accretion over the last few days establishes the fact that the perception of both India and its inherent strengths is intact.

Answering a broader question on the allegations against Adani Group, she said the country's independent financial sector regulators will be looking into the aspect and added that capital markets watchdog Securities and Exchange Board of India has the wherewithal to ensure stability in markets.

"...For keeping the market and the markets regulated in prime condition, the Sebi is the authority. And it has the wherewithal to keep that prime condition," she said.

The FM also said that the RBI has already spoken out on the issue, referring to Friday's statement, which said the bank-

Union Finance Minister Nirmala Sitharaman with MoS for Finance Pankaj Chaudhary addresses a press conference in Mumbai on Saturday

Steps in place to address excess volatility: Sebi

PTI ■ NEW DELHI

Amid a raging controversy over a meltdown in Adani Group stocks, regulator Sebi on Saturday said it is committed to ensuring the stock market's integrity and all necessary surveillance measures are in place to address any excessive volatility in individual shares.

Without naming Adani Group specifically, the capital markets watchdog said in a statement that unusual price movement in the stocks of a business conglomerate has been observed in the past week. Officials confirmed that the statement has been issued in the wake of the Adani matter only.

"As part of its mandate, Sebi seeks to maintain orderly and efficient functioning of the market and has put in place a set of well-defined, publicly available surveillance measures (including the ASM framework) to address excessive volatility in specific stocks. This mechanism gets automatically triggered under certain conditions of price volatility in any stock," Sebi said.

BSE and NSE have put three Adani group companies under their short-term additional surveillance measure (ASM).

SATELLITE TO BE SHIPPED TO INDIA FOR LAUNCH

Washington: An satellite meant for earth observation jointly developed by NASA and ISRO that will help study Earth's land and ice surfaces in greater detail is all set to be shipped to India later this month for a possible launch in September.

ED seizes heroin, arms in 10 raids on Punjab border dist

PNS ■ NEW DELHI

Searches by the Enforcement Directorate (ED) in a money laundering case linked to a Narcotic Drugs and Psychotropic Substances (NDPS) Act case on 10 different premises in different villages of Tarn Taran district in Punjab led to the recovery and seizure of 2.2 kg of heroin and other contraband items weighing about 14 kg of narcotics.

In addition, the ED also recovered documents of properties besides two rifles, three pistols and live ammunition from the premises of the suspects.

The ED had launched the search operations on Friday at 10 premises in Sheron, Naushera Pannuan and Bugha villages of Tarn Taran district.

The agency searched the business and residential premises of Skattar Singh, alias Laddi, Gajjan Singh, Makhan Singh, other members of their family and some other associates under the

Prevention of Money Laundering Act, officials said.

"During the course of search, various incriminating evidence was recovered and seized relating to numerous immovable properties worth crores of rupees in the names of these accused persons, members of their family and their associates," the agency said in a statement.

A few packets of psychotropic substance appearing to be opium and its derivatives, including heroin, were also recovered from the residential premises of Skattar Singh and his family at Sheron village.

Sharjeel among 11 'scapegoats' freed in Okhla violence case

STAFF REPORTER ■ NEW DELHI

A court here on Saturday discharged 11 people, including student activists Sharjeel Imam and Asif Iqbal Tanha, in the Jamia Nagar violence case, saying as the Delhi Police was unable to apprehend the actual perpetrators, it booked the accused as "scapegoats".

The court, however, ordered framing of charges against one of the accused, Mohammad Ilyas.

Marshalling the facts as brought forth from a perusal of the chargesheet and three supplementary chargesheets, this court cannot but arrive at the conclusion that the police were unable to apprehend the actual perpetrators behind the commission of the offence, but surely managed to rope the persons herein as scapegoats," Additional Sessions Judge Arul Varma said.

"However, the moot question remains — whether the accused persons herein were even prima facie complicit in taking part in that mayhem? The answer is an unequivocal no," he added.

An FIR was lodged in connection with the violence

Modi to open India's largest copter making unit in K'taka tomorrow

PNS ■ NEW DELHI

With the objective of rapid indigenisation in defence manufacturing, Prime Minister Narendra Modi on Monday will dedicate a helicopter manufacturing factory in Karnataka. It will produce light utility helicopters designed within the country.

Giving details here on Saturday, Defence Ministry officials said Modi will dedicate the Hindustan Aeronautics Limited (HAL) factory at Tumakuru. Defence Minister Rajnath Singh and senior officials of the Ministry of Defence will be present on the occasion.

The Prime Minister had laid the foundation stone of the plant in 2019.

The Greenfield Helicopter Factory, spread across 615 acres, is planned with a vision to become a one-stop solution for all helicopter requirements of the country.

It is India's largest heli-

copter manufacturing facility and will initially produce Light Utility Helicopters (LUHs).

The LUH is an indigenously designed and developed 3-tonne class, single engine multipurpose utility helicopter with unique features of high maneuverability.

Initially, this factory will produce around 30 helicopters per year and can be enhanced to 60 and then 90 per year in a phased manner. The first LUH has been flight tested and is ready for unveiling.

to survive.

When normal cells become cancer cells, oncogenes, or genes with the potential to cause cancer, become activated and tumour suppressor genes become inactivated, causing a rewiring of the cell.

This causes the cell to become dependent on a new set of genes to survive, and this can then be exploited to kill the cancer cells. By using this new AI technology to target protein products of tumour-specific dependent genes, cancer cells can be killed, leaving the normal cells which are not dependent on these genes relatively unharmed, the study said.

Although dependencies can be determined using intensive laboratory techniques, it is costly and time consuming and would not be feasible to analyse all tumour samples in this way, the study said.

'AI could help deliver personalised cancer treatment'

PNS ■ NEW DELHI

In good news in the cancer care segment, a team of researchers have leveraged artificial intelligence (AI) technology to identify genes critical to a cancer cell's survival, and could help deliver personalised cancer patient treatments, the study said.

They analysed different types of cancer cells to understand different gene dependencies for identifying the genes, the study said.

Researchers at the University of Sussex, UK, have done this by developing a prediction algorithm that works out which genes are essential in the cell, by analysing the genetic changes in the tumour.

This can be used to identify actionable targets that in time could guide oncologists to personalise cancer patient

treatments, the study said. "Our vision is to take advantage of the decreasing cost of DNA sequencing and to harness the power of AI to understand cancer cell differences and what they mean for the individual patient's treatment. Through our research, we were able to identify cell-specific gene dependencies using only the DNA sequence and RNA levels in that cell, which are easily and cheaply obtainable from tumour biopsy samples," said Dr Frances Pearl, Senior Lecturer in Bioinformatics at the University of Sussex.

"This is an incredibly exciting step in our research which means that we can now work to improve the technology so that it can be offered to oncologists and help in the treatment pathways for their patients," said Pearl.

Using a personalised approach to guide treatment could improve life expectancy,

quality of life and reduce unnecessary side effects of cancer patients, the study said.

In each cell, there are around 20,000 genes that contain the information needed to make proteins. Around 1,000 of those genes are essential, meaning they are required for the cell

to survive. When normal cells become cancer cells, oncogenes, or genes with the potential to cause cancer, become activated and tumour suppressor genes become inactivated, causing a rewiring of the cell.

This causes the cell to become dependent on a new set of genes to survive, and this can then be exploited to kill the cancer cells. By using this new AI technology to target protein products of tumour-specific dependent genes, cancer cells can be killed, leaving the normal cells which are not dependent on these genes relatively unharmed, the study said.

Although dependencies can be determined using intensive laboratory techniques, it is costly and time consuming and would not be feasible to analyse all tumour samples in this way, the study said.

Veteran singer Vani found dead at Chennai home

KUMAR CHELLAPPAN ■ CHENNAI

Vani Jairam, the versatile playback singer who strode over the South Indian film industry for more than five decades, is no more. Jairam (77) was found dead in her residence in Chennai on Saturday morning by her maid servant Kalaiavani. Chennai Police, who rushed to her home on being informed about her death, held a preliminary inquiry and shifted the mortal remains to Government Hospital for autopsy.

A case under sections of unnatural death has been

registered by the police. Last week the Government of India had honoured Vani Jairam with Padma Bhushan, the third highest civilian award of the country.

Using a personalised approach to guide treatment could improve life expectancy,

quality of life and reduce unnecessary side effects of cancer patients, the study said.

In each cell, there are around 20,000 genes that contain the information needed to make proteins. Around 1,000 of those genes are essential, meaning they are required for the cell

RUSSIA-UKRAINE CONFLICT

Soldiers freed in Russia, Ukraine prisoner swap

AP ■ KYIV

Dozens of Russian and Ukrainian prisoners of war have returned home following a prisoner swap, officials on both sides said Saturday.

Top Ukrainian presidential aide Andriy Yermak said in a Telegram post that 116 Ukrainians were freed.

He said the released POWs include troops who held out in Mariupol during Moscow's monthslong siege that reduced the southern port city to ruins, as well as guerrilla fighters from the Kherson region and snipers captured during the ongoing fierce battles for the eastern city of Bakhmut.

Russian defence officials, meanwhile, announced that 63 Russian troops had returned from Ukraine following the swap, including some "special category" prisoners whose release was secured following mediation by the United Arab Emirates.

A statement issued Saturday by the Russian Defence Ministry did not provide details about these "special category" captives.

At least three civilians have been killed in Ukraine over the past 24 hours as Russian forces struck nine regions in the country's south, north and east, according to reports on Ukrainian TV by regional gov-

ernors on Saturday morning.

Two people were killed and 14 others wounded in Ukraine's eastern Donetsk region by Russian shelling and missile strikes, local Gov. Oleh Syniehubov said on Telegram.

He said they were all hospitalised but their lives were not in danger.

Elsewhere, regional Ukrainian officials reported a man who was killed and seven others who were wounded Friday after Russian missiles slammed into Toretsk, a town in the Donetsk region.

Krylenko said that 34 houses, two kindergartens, an outpatient clinic, a library, a cultural centre and other buildings were damaged in the strike.

Seven teenagers received shrapnel wounds after an anti-

China plays down Blinken's cancelled visit over balloon

AP ■ TAIPEI

China played down the cancellation of visit by US Secretary of State Antony Blinken after a large Chinese balloon suspected of conducting surveillance on US military sites roiled diplomatic relations, saying that neither side had formally announced any such plan.

"In actuality, the U.S. and China have never announced any visit, the US making any such announcement is their own business, and we respect that," China's Ministry of Foreign Affairs said in a statement Saturday morning.

Blinken was due to visit Beijing on Sunday for talks aimed at reducing US-China tensions, the first such high-profile trip after the countries' leaders met last November in Indonesia.

But the US abruptly cancelled the trip after the discovery of the huge balloon despite China's claim that it was mere-

ly a weather research "airship" that had blown off course.

The Pentagon rejected that out of hand as well as China's contention that the balloon was not being used for surveillance and had only limited navigational ability.

Uncensored reactions on the Chinese internet mirrored the official government stance that the US was hyping up the situation.

Many users made jokes about the balloon. Some said that since the U.S. Had put restrictions on the technology that China is able to buy to weaken the Chinese tech industry, they couldn't control the balloon.

Others called it the "wandering balloon" in pun that refers to the newly released Chinese sci-fi film called "The Wandering Earth 2."

50-car train derailment causes big fire, evacuations in Ohio

AP ■ EAST PALESTINE

A train derailment and resulting large fire prompted an evacuation order in an Ohio village near the Pennsylvania State line on Friday night, covering the area in billows of smoke lit orange by the flames below.

They said they hoped to use drones to assess the scene in daylight, and warned that residents might hear more explosions as the fire burns.

The village notified residents that an evacuation order remained in place Saturday morning for people within a mile of the scene.

A high school and community center were opened to shelter dozens of people, while residents beyond that radius were urged to stay inside.

The few dozen residents sheltering at the high school included Ann McAnlis, who said a neighbor had texted her about the crash.

Firefighters have been pulled from the immediate area and unmanned stream devices are being used protectively while crews try to determine which cars are still actively burning, village officials said in a separate statement Saturday.

They said they hoped to use drones to assess the scene in daylight, and warned that residents might hear more explosions as the fire burns.

The village notified residents that an evacuation order remained in place Saturday morning for people within a mile of the scene.

A high school and community center were opened to shelter dozens of people, while residents beyond that radius were urged to stay inside.

ASEAN vows to conclude pact with China on disputed territory

AP ■ JAKARTA

Southeast Asian foreign ministers vowed to finalise negotiations with China over a proposed pact aimed at preventing conflicts in the disputed South China Sea in their annual retreat on Saturday in Indonesia's capital.

In the final session of their two-day meeting, the ministers from the Association of Southeast Asian Nations also agreed to unite in their approach to implement a five-step agreement made in 2021 between ASEAN leaders and Myanmar's military leader, Senior Gen Min Aung Hlaing,

that seeks to end that country's worsening crisis.

China and the ASEAN member states, which include four rival claimants to territories in the South China Sea, have been holding sporadic talks over the proposed pact, the first of which will be held in March. She said ASEAN members are committed to concluding the

disussions "as soon as possible." Members are also committed to promote implementation of a declaration of conduct," Marsudi added.

Marsudi did not elaborate, but in the past, China has accused Washington of meddling in what it calls an Asian dispute.

Qatar boosts influence in Lebanon amid crises

AP ■ BEIRUT

Most wealthy Gulf Arab nations followed Saudi Arabia's lead in recent years and ostracised crisis-hit Lebanon because of the growing influence of the Iranian-backed militant group Hezbollah. The exception was Qatar.

Doha has been silently expanding its influence in Lebanon. It continued receiving Lebanese leaders and pumped tens of millions of dollars into helping the country's armed forces amid a historic economic meltdown.

The small, gas-rich nation in late January began seeing the fruits of its investment, when state-owned Qatar Energy replaced a Russian firm in an international consortium that will search for gas in the Mediterranean Sea off Lebanon's coast.

And on Monday, Qatar will for the first time join a meeting in Paris along with officials from France, Saudi Arabia and the US for discussions focusing on Lebanon's political and economic crises.

Qatar portrays itself as a more neutral force in a coun-

try where for decades outside powers have used Lebanon's sectarian divisions to fight their proxy battles. Saudi Arabia long backed Lebanon's Sunni Muslim factions and tried to push out Iran's influence through Shiite Hezbollah. The rivalry repeatedly pushed Lebanon to the brink of armed conflict.

Qatar, which has good ties with Iran, has been trying to advance negotiations between Tehran and Gulf nations. Its

inclusion in the upcoming talks "is a signal that Iran will not be completely left out of that meeting and a recognition of the influence that Tehran has over Lebanon," said Mohamad Bazzi, a professor and director of the Hageo Kevorkian Center for Near Eastern Studies at New York University.

"With Saudi Arabia and other Gulf states less heavily involved in Lebanon, Qatar is trying to revive its mediator role in the country," he said.

Pope encourages South Sudanese, will raise plight of women

AP ■ JUBA

Pope Francis sought Saturday to console the long-suffering people of South Sudan as he opened his first full day in a country beset by conflict, poverty and humanitarian crises, encouraging priests and nuns to serve their flocks by joining in their tears.

After arriving in the world's newest country on the first-ever papal visit Friday, Francis was spending Saturday ministering first to church personnel and then to South Sudanese who have been forced by fighting, flooding and other crises to leave their homes.

Francis was highlighting in particular the plight of South Sudanese women, half of whom are married before age 18, are subject to rampant sexual violence and then face the world's highest maternal mortality rate.

"Let us ask ourselves what it means for us to be ministers of God in a land scarred by war, hatred, violence, and poverty," Francis said in St. Theresa Cathedral in the capital, Juba.

"How can we exercise our

ministry in this land, along the banks of a river bathed in so much innocent blood, among the tear-stained faces of the people entrusted to us?"

Lush in oil and other natural resources but beset by years of civil war and conflict, South Sudan is one of the world's poorest countries and is responsible for Africa's worst refugee crisis: More than 2 million people have fled the country and another 2 million are displaced within its borders.

Joined by Archbishop of Canterbury Justin Welby and the Presbyterian head of the Church of Scotland, Francis is seeking to draw global attention to the country's plight.

Wikipedia blocked for not removing blasphemous content in Pak

PTI ■ ISLAMABAD

Pakistan has blocked Wikipedia, the online encyclopedia, for its failure to remove offensive or blasphemous material, the country's telecommunication authority said on Saturday.

The blacklisting of Wikipedia comes days after the Pakistan Telecom Authority (PTA) degraded Wikipedia services for 48 hours, threatening to block it if the content deemed 'blasphemous' was not deleted.

Wikipedia is a free online encyclopedia, created and edited by volunteers around the world and hosted by the Wikimedia Foundation.

PTA spokesperson Malahat Obaid said the ban had primarily been imposed for non-compliance with the orders.

"The decision can be reviewed once Wikipedia removes sacrilegious content that has been identified by the regulatory authority," the spokesperson added.

The PTA spokesperson earlier stated that Wikipedia was approached for blocking/removal of the said content by issuing a notice.

Israeli army besieges homes of fugitives in West Bank raid

AP ■ AQABAT JABR REFUGEE CAMP

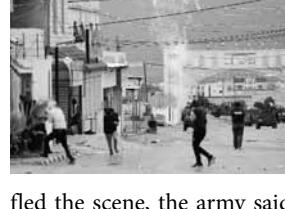

The Israeli army raided a refugee camp near the Palestinian city of Jericho on Saturday, besieging houses it said were being used as hideouts for Palestinian attackers and shooting at residents who opened fire.

The fighting wounded six Palestinians, two seriously, said the Palestinian Health Ministry, and jolted a generally quiet oasis town that has seen less violence than other West Bank cities.

To force the fugitives to surrender, military bulldozers clawed at the walls of one of the homes as an Israeli commander shouted threats over a loudspeaker.

Camp residents reported receiving text messages urging families to keep their children inside and avoid clashing with Israeli troops.

The suspects and family members trickled out of one of the homes and turned themselves in, the military said. Security forces had leveled much of the house, leaving a pile of rubble and twisted metal.

fled the scene, the army said. No one was wounded.

The army said several Palestinians had holed up in their homes after the shooting with the help of family and were planning future attacks.

To force the fugitives to surrender, military bulldozers clawed at the walls of one of the homes as an Israeli commander shouted threats over a loudspeaker.

Camp residents reported receiving text messages urging families to keep their children inside and avoid clashing with Israeli troops.

The suspects and family members trickled out of one of the homes and turned themselves in, the military said. Security forces had leveled much of the house, leaving a pile of rubble and twisted metal.

Iranian director freed on bail after going on hunger strike

AP ■ DUBAI

A claimed Iranian director was released on bail Friday, two days after going on hunger strike to protest his imprisonment last summer, his supporters said.

Panahi was arrested last July and later ordered to serve six years on charges of propagandising against the government, a sentence dating back to 2011 that had never been enforced.

He is among a number of Iranian artists, sports figures and other celebrities who have been detained after speaking out against the theocracy. Such arrests have become more frequent since nationwide protests broke out in September over the death of a young woman in police custody.

Panahi, 62, had continued making award-winning films for over a decade despite being legally barred from travel and filmmaking. His latest film, "No Bears," was released to widespread praise in September while he was behind bars, a week before the protests erupted.

Pak to seek Af Taliban leader's help to control TTP

PTI ■ PESHAWAR

A desperate Pakistan has sought Afghan Taliban chief Haibatullah Akhundzada's help to rein in the outlawed Pakistani Taliban outfit responsible for a wave of terror attacks in the country, including the recent Peshawar mosque carnage that killed over 100 people, according to a media report on Saturday.

Pakistan has been hit by a wave of terrorism, mostly in the country's Khyber Pakhtunkhwa province, but also in Balochistan and the Punjab town of Mianwali, which borders the restive Khyber Pakhtunkhwa province.

In the Peshawar mosque attack on Monday, a Taliban suicide bomber blew himself up during the afternoon prayers, killing 101 people and injuring more than 200 others.

During the Apex Committee meeting here on Friday, Pakistan's civil and military leadership decided to seek Afghan Taliban chief Haibatullah Akhundzada's intervention to control the

Tehreek-e-Taliban Pakistan (TTP), according to The Express Tribune newspaper.

Pakistan's Interior Minister Rana Sanaullah, who attended Friday meeting, said the masters of the Peshawar Mosque attack could be in Afghanistan, and added that the federal government would raise this issue with their Afghan counterparts, the report said.

Pakistan Prime Minister Shehbaz Sharif on Friday acknowledged the failure to avert the Peshawar carnage that killed over 100 people and called for "national unity" to tackle the menace.

"There is a need for unity across the political spectrum. This act of terrorism managed to breach the security check post and reach the mosque. We should not feel hesitant in admitting the facts," Sharif said at the meeting.

Sudan demands United Nations immediately lift arms embargo

AP ■ UNITED NATIONS

Sudan is demanding the UN Security Council immediately lift an arms embargo and other sanctions imposed during violence in the western Darfur region in 2005, saying the punishment did not include conditions or require the military government to meet UN benchmarks.

Sudan's UN ambassador, Al-Harith Idriss Mohamed, said in a letter to the council circulated Friday that the sanctions "are no longer relevant to the magnificent reality on the ground in Darfur today compared to the situation in 2005."

"Darfur has, for the most part, overcome the state of war as well as previous security and political challenges," he said.

Mohamed said Sudan's transitional government is committed to addressing the remaining social and security issues in Darfur, including sporadic tribal clashes. He added that efforts are being made to form and deploy a Joint

Security-Keeping Force to protect civilians.

The Sudanese government has repeatedly urged the Security Council to lift sanctions but this letter was much stronger. It said that "Sudan will accept nothing less than the immediate lifting of these sanctions without conditions or benchmarks".

The Darfur conflict began in 2003 when rebels took up arms against the authoritarian government in Khartoum then led by Omar al-Bashir, accusing it of discrimination and neglect. The UN previously estimated 60,000 people died in the conflict and 2.7 million fled their homes.

Al-Bashir is wanted by the International Criminal Court for alleged atrocities in Darfur.

13 dead in Chile amid struggle to contain raging wildfires

AP ■ SANTIAGO

At least 13 people were reported dead as of Friday night as a result of the more than 150 wildfires burning across Chile that have destroyed homes and thousands of acres of forest while the South American country is in the midst of a scorching heat wave.

The Democratic National Committee has worked for months to revamp the start of its voting calendar, and the full membership is set to vote on the plan on Saturday.

Although changes are still possible throughout the summer and beyond, the formal endorsement during the party's meeting in Philadelphia this week, "This is a regional thing, and it's making us all look good."

States voting early in the primary have major influence since White House hopefuls struggling to raise money or gain political traction often drop out before visiting areas outside the first five. The move marks a major shift from the current calendar, which had started with Iowa's caucuses for the last five decades, followed by New Hampshire's primary and subsequent contests in Nevada and South Carolina.

India will get into global bond indices on own terms: Official

PTI ■ MUMBAI

India will not bend over backwards to get included in the global bond indices, a top finance ministry official said on Saturday.

Deploying a sartorial analogy, Finance Secretary TV Somanathan said the indices are an exclusive club or gymkhana, which insists on entry only for those wearing ties.

"...If we get into this club, it will be with our dhoti and saree. We will not change our domestic policies to suit foreign investors," he said, addressing a post-budget interaction with industry players in the financial capital.

He said there are both positives and negatives of such an inclusion, which was spoken about in a previous budget announcement, and India will not "bend over backwards" to gain entry.

India's policies will be

based on domestic requirements, and there will not be any change to the stance to suit the fancy of global bond investors, he said.

The global indices should allow entry for India only if such a stance is acceptable to them, he said.

Positives of gaining entry include higher fund flows, but the same also exposes us to risks of volatility and pullbacks due to non-domestic factors, Somanathan said, pointing to the experience of "destabilisation" in some east-Asian

economies.

Ajay Seth, the economic affairs secretary, hinted that there is no immediate plan of joining the indices.

"At the moment, there is quite a bit of uncertainty at the global level both in terms of the exchange rate and interest rate etc. It is not the right time to press the pedal on that aspect."

"When the global markets are a little bit more uniform, then at that point of time this piece will have to be picked up again," he said.

Notices of gaining entry include higher fund flows, but the same also exposes us to risks of volatility and pullbacks due to non-domestic factors, Somanathan said, pointing to the experience of "destabilisation" in some east-Asian

Govt to push primary steel producers to use 50% of input from recycled steel by 2047: Scindia

PTI ■ KOCHI

Union Steel Minister Jyotiraditya Scindia on Saturday said his ministry will push primary steel producers to use 50 per cent of their input from scrapped/recycled steel by 2047 to help achieve the government target of moving into a circular economy.

Currently, the level of recycled steel usage in primary steel production is only around 10 per cent even though recycled steel contributes to 22.5 per cent of the domestic total steel production of 140 million tonnes, the minister said while addressing the last day of the three-day international conference of material recycling here.

The 10th conference is being organised by the Material Recycling Association of India and is attended by over 2,000 delegates from 38 countries. Noting that recycling is the key cog in the wheel of manufacturing as economies move

into a circular model of development, he said, "Going forward the industry should focus on the 6Rs philosophy of reduce (exploitation of natural resources), recycle, reuse, recover, re-design and reinforce".

He said the government is committed to reducing CO2 emissions in the steel sector by 5 per cent by 2030 from the current 2.85 to 1.4 CO2/tonne of crude steel, and to achieve this recycling scrap steel is an extremely important source.

"Today, scrap usage is only 15 per cent in primary steel production. We will push the steel industry to increase this to 25 per cent in the next five years, and by 2047, this should double to 50 per cent. This means that the primary steel producers consume only 50 per cent of iron ore by then," Scindia said.

This is needed as the natural resources are finite and the demand looks infinite, he said, adding the steel industry has the biggest role to play in the whole process.

He also urged the minister to extend the duty-free

JYOTIRADITYA M SCINDIA

The country currently produces 25 million tonne of scrap steel and annually imports 5 million tonne of scrap steel with zero import duty, he added.

The recycling industry is highly unorganised and is worth about USD 50 billion now. There are over 25,000 recycling units in the country.

Noting that recycling is the key cog in the wheel of manufacturing as economies move

into a circular model of development, he said, "Going forward the industry should focus on the 6Rs philosophy of reduce (exploitation of natural resources), recycle, reuse, recover, re-design and reinforce".

He said the government is committed to reducing CO2 emissions in the steel sector by 5 per cent by 2030 from the current 2.85 to 1.4 CO2/tonne of crude steel, and to achieve this recycling scrap steel is an extremely important source.

"Today, scrap usage is only 15 per cent in primary steel production. We will push the steel industry to increase this to 25 per cent in the next five years, and by 2047, this should double to 50 per cent. This means that the primary steel producers consume only 50 per cent of iron ore by then," Scindia said.

This is needed as the natural resources are finite and the demand looks infinite, he said, adding the steel industry has the biggest role to play in the whole process.

He also urged the minister to extend the duty-free

Godrej Properties sales bookings rise 77%: Pirojsha

PTI ■ NEW DELHI

Realty firm Godrej Properties sales bookings rose 77 per cent year-on-year to Rs 8,181 crore in the April-December period on strong housing demand, and will cross the target of Rs 10,000 crore for the full fiscal, its Executive Chairman Pirojsha Godrej said.

The company's sales bookings stood at Rs 4,613 crore in the first nine months of the last financial year.

In an interview with PTI, Pirojsha Godrej said: "We are very happy with the quarter gone by. Operationally, it has been a very strong quarter".

Sales booking during the October-December period jumped over two-fold to Rs 3,252 crore from Rs 1,541 crore in the year-ago period.

Not Enough: Tech industry seeks more from FM to bridge digital divide

IANS ■ NEW DELHI

"These could have provided a significant impact on competitiveness leading to better exports, arresting the grey market and boosting revenue," he said in a statement.

For example, capping of basic customs duty (BCD) on import of high-end mobile phones is required to arrest the burgeoning smuggled market which has crossed Rs 12,000 crore in 2023.

"This measure would have boosted government revenue, reduced smuggling, ensured fair trade and helped build legal businesses in India," said Mohindroo.

Also required is the removal of input duties on resin, mesh, sponge, film, gasket, logo, cover tape, adhesive tape from 8.25 per cent to 16.5 per cent to zero level.

This was essential to promote the manufacturing of a very critical vertical -- mechanics. The government should also remove input duties of 2.75 per cent duty imposed on the many

inputs of PCBA, inputs of connectors and inputs of camera modules.

"Removal of duty on certain parts of the chargers is also required. While we have built a huge charger manufacturing industry, these changes would have helped us to become more competitive," Mohindroo added.

The Indian industry met the 2021-22 manufacturing target of Rs 2,75,000 crore but we may fall short of the manufacturing target of FY 2022-23 because of domestic demand shrinking in 2022-23.

"The investment in core infrastructure will require significant thrust on digital infrastructure including digitization and automation. The budget has outlined measures to provide impetus for technology-driven accelerated change and technology will also work as a key deflationary measure," said Patel.

"India is all set for leading the change and usher in green growth which is aptly visible in the green credits to green energy to green mobility to green farming, which has found its place in the budget this year," he added.

According to the Internet

and Mobile Association of India (IAMAI), there have been two critical concerns for the digital industry.

First, the growth rate of digital penetration has slowed down and secondly, there is a clearly identifiable digital divide in India with some sections getting marginalised as they are not onboarded digitally," said the IAMAI.

"While the budget announcement marks the correct intention and fiscal incentives, other ministries need to complement the Finance Minister's grand vision to help realise her vision," said the industry body.

According to Sandip Patel, Managing Director, IBM India/South Asia, it is a progressive budget that underscores technology-driven growth.

"The investment in core infrastructure will require significant thrust on digital infrastructure including digitization and automation. The budget has outlined measures to provide impetus for technology-driven accelerated change and technology will also work as a key deflationary measure," said Patel.

"India is all set for leading the change and usher in green growth which is aptly visible in the green credits to green energy to green mobility to green farming, which has found its place in the budget this year," he added.

An attempt is made to make the new tax regime more

Revival of rural economy to take time in absence of specific triggers

IANS ■ NEW DELHI

Focus on the rural economy in the budget has been waning over the years and in such a scenario a revival of the rural economy would take time, JM Financial said in a report.

In the absence of a specific focus on the rural economy in the Union Budget for 2023-24, analysts don't see immediate triggers for revival in the rural economy. Moreover in the absence of specific or enhancement of allocation towards the rural economy, we believe that the rural environment would have to revive on its own. Hence we would view businesses dealing with price sensitive low ticket items as less likely to benefit, JM Financial said.

An attempt is made to make the new tax regime more

attractive after getting a low response in FY23, however we believe the benefits in the form of tax saving on enhanced tax limit (INR 0.2mn) is unlikely to spur demand in a meaningful manner, JM Financial said in a report.

Unlike the anticipation by a section of the market, rural focus was missing in the budget announcements. The expectations of a populist budget was linked to 9 state elections in 2023, moreover with FY24 being the last full year budget before the general elections in CY24. However, we believe that the schemes relating to empowerment of women Self Help Groups, artisans and setting up of digital infra for agriculture and farmer centric solutions would provide opportunities in the rural economy to improve their livelihood, JM Financial said.

Calling millets 'Shree Anna' or mother of all grains, Sitharaman quoted Prime Minister Narendra Modi to say that India is at the forefront of popularising millets, whose consumption improved food security and the well-being of farmers.

The declaration has allowed the Centre to take the lead in celebrating IYM 2023. As part of this, Central Ministries, state govern-

Educationists say more funds are required to meet NEP targets

IANS ■ NEW DELHI

In Budget 2023-24, the Education Ministry has been allocated Rs 12,899.47 crore - the highest ever. Due to this, the share of higher and school education has also gone up.

An amount of Rs 44,094.62 crore has been allocated for higher education, which was around 8 per cent higher than the previous year's allocation of Rs 40,828.35 crore.

Educationists were expecting a higher allocation to meet the NEP target of 6 per cent of GDP. In that sense, it is disappointing. However, the focus of budget proposals has been on IT education and skill development, which is a welcome move, he added.

Professor Mamidala Jagadesh Kumar, Chairman, UGC said, "It is to overcome the learning losses of the Covid-19 pandemic and inject more digital technology into higher education for more access and equity. Increased fund allocation will accelerate the implementation of NEP 2020, bringing further dividends to the students to make them employable and strengthen our efforts in

making India a knowledge-based economy, Kumar added.

Arvind Chaturvedi Pro Vice Chancellor, IILM University, Gurugram said that an 8 per cent increase in allocation to education sector is not sufficient. "A higher allocation was expected."

"Educationists were expecting a higher allocation to meet the NEP target of 6 per cent of GDP. In that sense, it is disappointing. However, the focus of budget proposals has been on IT education and skill development, which is a welcome move, he added.

Shishir Jaipuria, Chairman, Seth Anandram Jaipuria Group of Educational Institutions, and Chairman of FICCI Arise have a different opinion. He said, "The Union Budget 2023-24 spells out progressive initiatives and reforms for the Indian education sector in many areas, including skill development, teacher training, future-readiness of learners, and greater accessibility of learning content."

FM's bullishness on millets must translate into benefits for farmers

ARSENAL'S PREMIER LEAGUE TITLE CHARGE HALTED BY STRUGGLING EVERTON

AFP ■ LIVERPOOL

Mikel Arteta said Arsenal must now show the resolve of champions after a shock 1-0 defeat to Everton dented the Gunners' bid to land a first Premier League title in 19 years.

Arsenal still lead Manchester City by five points at the top of the table, but blew the chance to extend that advantage as they suffered just a second league defeat of the season.

James Tarkowski headed in the winning goal for the Tofties on the hour mark as Everton made a perfect start to life under new manager Sean Dyche to climb out of the relegation zone.

"This is not going to be a rose pathway," said Arteta of Arsenal's road to the title. "This is going to be tricky and we will have to dig in and play much better than we did today."

Everton came into the game on a run of four league defeats at Goodison for the first time since 1958.

That disastrous form cost Frank Lampard his job and Dyche's appointment got the desired bounce with a first win in 11 games.

"The minimum requirement is maximum effort and we saw that today," said Dyche.

Everton's board again stayed away due to rising tensions

between the club's hierarchy and supporters.

Protests were planned for before and after the game for fans to voice their anger at the running of the club.

The Tofties were the only Premier League club to not make any signings in the January transfer window despite their perilous position in the table.

But the home side showed there is still enough talent available to Dyche to dig themselves

out of trouble if they can harness the same level of energy and intensity on a more regular basis.

GOODISON 'ROCKING'

A first victory since October was no more than Everton deserved and it was two of Dyche's former Burnley players who combined for the only goal of the game on the hour mark as Tarkowski

headed in Dwight McNeil's corner.

"The fans are going to be massive for us. I have been here when it has been rocking. It was rocking today. But we have to give the fans something," added Dyche.

"Of course I'm going to drive home and think what a great start but I'm not naive. We have to keep working and improving."

Keeping Dominic Calvert-Lewin fit will be critical to Everton's survival hopes, but the

England international showed his rustiness in front of goal in a second consecutive injury-impacted season.

Amadou Onana's surging run and ball across the face of goal just needed a finishing touch that Calvert-Lewin could not stretch to make.

Moments later Abdoulaye Doucoure, who had been frozen out by Lampard, headed a glorious chance wide when unmarked inside the box.

It took Arsenal half an hour to even threaten Jordan Pickford's goal, but they should have led when Eddie Nketiah fired high and wide with just the goalkeeper to beat.

Conor Coady then had to react quickly to turn Bukayo Saka's volley off the line as the visitors began to find their rhythm.

Arsenal were brighter at the start of the second period and Martin Odegaard will feel he should have hit the target when teed up by Nketiah.

But just as the Gunners were beginning to turn the screw, their luck at the back ran out.

Tarkowski was fundamental to Dyche's overachievements in keeping Burnley in the Premier League for six consecutive seasons between 2016 and 2022 and the centre-back rose highest to power home.

Arsenal lacked composure in shock Everton defeat: Arteta

AFP ■ LIVERPOOL

Mikel Arteta admitted

Premier League leaders Arsenal lacked composure in

their shock 1-0 defeat at strug-

gling Everton on Saturday.

James Tarkowski's second

half-header condemned Arse-

nal to just their second league

loss this term. It was a frustrat-

ing blow for Gunners boss

Arteta, who had hoped to open

up an eight-point lead over sec-

ond placed Manchester City.

For the first time since los-

ing at Manchester United in

September, Arsenal tasted de-

feat and Arteta claimed his

players weren't composed enough

to cope with Everton's aggres-

sive game-plan under new boss Sean Dyche.

"We had loads of the ball but we lacked that purpose and quality in the final third, we generated many chances. But then we conceded and they slowed the game down and we struggled," Arteta said.

"Everton do this to every

team that is their strength with

the height, the physicality is

their strength, if you want to

control the game against them

you have to control this. We did

not do that today.

"We needed more compo-

sure and to control emotional-

ly the game better. We gave

away so many unnecessary free-kicks and that's what they

want." Manchester City could close the gap on Arsenal to two points if they win at Tottenham on Sunday.

But, despite his criticism of their tepid performance at Everton, Arteta backed his players to survive the tense title race.

"Today I love them much better than the week before or a month ago. It is easy to be next to someone when they are winning well. I am still so proud of all of these players, they deserve it," he said.

"This is not going to be a rose pathway. This is going to be next to someone when they are winning well. I am still so proud of all of these players, they deserve it," he said.

Bopanna-Bhambri lose in Davis Cup

PTI ■ HILLEROD (DENMARK)

Indian duo Rohan Bopanna and Yuki Bhambri lost to world number 9 Holger Rune and Johannes Ingildsen in straight sets to hand hosts Denmark a 2-1 lead after the doubles tie in the Davis Cup World Group Play-Off on Saturday. The Danish pair made short work of the Indians winning 6-2 6-4 in just 65 minutes as Rune's presence proved to be a decisive factor.

Earlier on Friday, India's number one Sumit Nagal had erased a one-set deficit to pip August Holmgren 4-6 6-3 6-4 in two hours and 27 minutes. Nagal restored the parity after Bhambri had a forgettable opening singles losing 2-6 2-6 to the rising teen sensation Rune.

Bhambri has quit singles and now plays only doubles on tour. The 25-year-old Nagal, ranked 506, dropped serve in the very first game of the match but once he got hold of his nerves, he was his usual fighting self.

He got the break back but squandered the chances when Holmgren offered them.

The Danish player, ranked 484, eventually sealed the set.

In the second set, it was Nagal who drew the first blood and went up 5-2. He served out the set in the ninth game to force a decider.

Nagal had a chance to get the first break when he made a deep return and Holmgren's forehand return sailed over the baseline at 30-all but the home player served well to save the chance. Nagal got another chance when Holmgren netted a forehand at deuce point in the third game but he himself made a forehand error on the break-point.

While Nagal preferred to hit from the baseline, Holmgren charged the net often to create chances for volley winners.

Holmgren handed Nagal another break chance when he tried to pick a low volley but could not keep the ball in the court and followed that up with

Zverev storms to Davis Cup win after being cleared of abuse

AFP ■ PARIS

Alexander Zverev defeated Stan Wawrinka in the Davis Cup on Friday as the German star returned to the courts for the first time since being cleared of domestic abuse.

The 25-year-old Zverev swept past Wawrinka 6-4, 6-1 in Trier to bring Germany level with Switzerland after the opening day of their qualifier.

On Tuesday, Zverev was told by the ATP that there was

"insufficient evidence" to substantiate allegations against him of abusing a former girlfriend. Former world number two Zverev always denied the claims, describing them as "baseless".

On Friday, Wawrinka, who helped his country win the 2014 Davis Cup, was returning to the team competition for the first time in eight years. Now ranked 135 in the world, he was comfortably beaten for the fifth time in five meetings by Zverev.

a double fault, allowing the Indian to take a mini 3-2 lead.

That lead stayed with Nagal and he came out serving for the match in the 10th game. Holmgren's forehand error gave the Indian three match points and converted the first one on

home team player's unforced error.

In the opening singles, Rune broke Bhambri twice in each set. The 19-year-old converted four of the seven break chances while the Indian did not get a single chance to break his opponent.

Dipa Karmakar handed 21-month ban after failing dope test

PTI ■ NEW DELHI

Star gymnast Dipa Karmakar has been handed a 21-month ban for failing a dope test conducted by the International Testing Agency, contrary to claims made by Indian officials that her "suspension" last year was not related to doping offence.

Karmakar's dope sample collected out-of-competition by the ITA, an independent organisation that manages the anti-doping programme of the International Gymnastics Federation (FIG), was found to contain Higenamine, which is a prohibited substance under World Anti-Doping Agency Code.

Her ban period will, however, end on July 10 this year as it was counted from the day (October 11, 2011) the sample was collected.

"The ITA confirms that Dipa Karmakar has been suspended for a 21-month period, effective until 10 July 2023 after testing positive for higenamine (S3. Beta-2 Agonists as per the World Anti-Doping Agency prohibited list)," the ITA said in a statement late on Friday.

The positive sample was

collected on behalf of the FIG in the scope of an out-of-competition control on 10 October 2021," it added.

programmes for various international federations. The ITA further said Karmakar's dope issue was resolved under a case resolution agreement pursuant to article 10.8.2 of the FIG Anti-Doping Rules and equivalent provision in the WADA.

"The athlete's results have been disqualified from October 11, 2021 onwards."

Karmakar, who shot to fame after finishing fourth in the 2016 Rio Olympics in the vault

event, has been struggling with injuries ever since she underwent a surgery to treat an anterior cruciate ligament (ACL) injury in 2017.

Her last FIG event was the 2019 World Cup in Baku.

The ban on Karmakar flies

on her face as well as on the Gymnastic Federation of India officials who have been claiming ignorance after she was put in the "suspended" category by the FIG in February last year.

GFI president Sudhir Mittal had then said that he had not received any communication from the FIG regarding her suspension.

Karmakar herself and her coach Bisheshwar Nandi kept quiet at that time.

Other GFI officials went to the extent of saying that the "suspended" status could be due to other issues, like ethical or disciplinary, not related to doping violation.

Chelsea can't buy a goal in Fulham stalemate

AFP ■ LONDON

Chelsea manager Graham Potter pleaded for time to gel his expensive collection of new stars after the Blues were held 0-0 at home by Fulham on Friday.

Enzo Fernandez made his Chelsea debut after becoming the most expensive player in British football history with a £107 million move (\$132 million) from Benfica on transfer deadline day.

Mykhailo Mudryk was also given his Stamford Bridge bow, while Noni Madueke and David Dato Fofana came off the bench for their Premier League debuts.

Chelsea's record investment of over £300 million in the January window took the total spend on players in their first season under new ownership to over half a billion.

Co-owners Todd Boehly and Behdad Eghbali were in attendance, but will not have been impressed as another chance to close on the top four slipped by.

Potter's men sit ninth in the table, still nine points adrift of the Champions League places.

New players are adapting to a new country and a new league. It's not straightforward. When the price tag is what it is questions will be asked, it's the nature of the business,"

said Potter.

"The decision we took in the window you can see the profile in terms of age. We feel we have a very strong group of players. We have to gel and become a really good team. That's where the work is."

Fulham had secured a first victory in the west London derby since 2006 when the teams met just three weeks ago.

Marco Silva's men sit two points and three places above their local rivals in the table in their first season back in the top flight.

HAVERTZ'S HAT-TRICK OF MISSES

Fulham were seeking a first ever league double over Chelsea and came close to achieving it as Andreas Pereira forced Kepa Arrizabalaga into a flying save low to his right.

For the enormous sums spent by Chelsea's new owners, their lack of a clinical goalscorer was exposed once more.

Kai Havertz had a hat-trick of big chances to break the deadlock before half-time.

The German international failed to get enough contact on Thiago Silva's brilliant pass to divert the ball beyond Bernd Leno.

Havertz then could not stretch to turn Mason Mount's dangerous

cross on target.

But his best opening came when he hit the post with a lob over Leno from Hakim Ziyech's defence-splitting pass.

Ziyech would have been a Paris Saint-Germain player this week had Chelsea not submitted the wrong paperwork in the minutes before Tuesday's transfer deadline.

The Moroccan is just one of a wealth of wide options now available to Potter and he wasted no time in hooking Mudryk despite his price tag after a disappointing first 45 minutes.

The Ukrainian joined from Shakhtar Donetsk last month for a fee that could rise to 100 million euros (\$110 million).

Mudryk was introduced in his place and Potter also threw on Raheem Sterling from the bench

WE'VE PLENTY OF OPTIONS IN SPIN DEPARTMENT: CUMMINS

PTI ■ BENGALURU

Australia captain Pat Cummins on Saturday said his team is not fretting over its spin combination as it has enough options to support veteran off-spinner Nathan Lyon in the high-profile four-match Test series against India beginning in Nagpur on Thursday.

The touring Australians have named Mitchell Swepson along with finger spinner Ashton Agar to team up with Lyon.

"We've got plenty of options here (with) finger spin, wrist spin, left arm (pace) when (Mitchell) Stacey comes back," Cummins told reporters in his first media interaction after arriving in India.

"We'll obviously pick the bowlers that we think are going to take 20 wickets. But how we split that up, we're not 100 per cent sure yet."

Asked if it would be a two-pronged spin attack, he said: "I wouldn't say it's a given. Obviously it's very conditions dependent. Particularly in the first test, once we get to Nagpur we will see that."

The Australians are here for a training camp before heading to

Nagpur on Monday.

"The good thing is someone like Agar was in our last team, Swepson played the last two overseas tour, so a bit of experience."

"Murphy played in the last tour. We feel that we got a lot of support in that department for Lyon."

The 29-year-old Cummins pointed out that middle-order batter Travis Head also offers off-spin option.

"Travis Head also bowls really good offspin. We have to balance things. We have got a plenty of variety there to choose from. We have not locked in any bowling line-up so far."

While there is so much talk about spin bowling, Cummins said his side should not forget about their intimidating pace bowling attack.

"I think sometimes, talking about a couple of spinners, you forget how good a lot of our fast bowlers have been in all conditions."

"Even some of the SCG wickets, there haven't been a lot in them for quick bowlers, but the quick bowlers have found a way," he added.

Cummins has come a long way since he made a Test comeback after six years in Ranchi during the last tour of India in 2017.

An injury-prone Cummins then dished out a hostile spell to dismiss the star Indian trio of KL Rahul, Virat Kohli and Ajinkya Rahane en route to figures of 4/106.

"It was my first test in six years. I just wanted to reaffirm that's where I wanted to be in Test cricket. I really enjoyed that spell, you can't be worried about your body or different things. You just got to go all out. I really enjoyed that."

"Test cricket can be really, really harsh. You have got to accept that it's going to be grinding times, and you got to be out for it and embrace that challenge. Coming here to India when a lot of the talks are around, big spinning wicket, it's not always the case."

"You need to get into the grind at times. That role of the fast bowler, bowling a lot of overs for not a heap of reward but doing your job for your team. I really enjoy that aspect of the last tour. Much to play for this time," he said.

OZ can win, India more vulnerable at home this time: Greg Chappell

PTI ■ MELBOURNE

Batting great Greg Chappell believes Australia can win the upcoming high-profile four-match Test series as India are "vulnerable" this time with injuries to key players like Rishabh Pant and Jasprit Bumrah.

While the swashbuckling keeper-batter Pant is ruled out for most part of the year as he continues to recover from injuries sustained during a horrific car crash, Indian pace ace Bumrah (back injury) will not figure in the Indian squad for the first two Tests.

"Australia can win this series. India are more vulnerable at home than they have been for some time due to injuries to key players like Rishabh Pant, Ravindra Jadeja and Jasprit Bumrah. They will rely heavily on Virat Kohli," Chappell wrote in an opinion piece for 'Sydney Morning Herald'.

Premier spin-bowling all-rounder Ravindra Jadeja, who recovered from a knee injury and made a comeback in the Ranji Trophy last month, is in the Indian squad for the Test series beginning in Nagpur on Thursday.

"Visiting teams are often fooled by a game that seems to be going nowhere but suddenly changes at a frenetic pace. The Indians are used to this, so Australia will need to adapt quickly with mind, bat and ball," said the former India coach.

Finger spinner Ashton Agar, who is Australia's only left-arm tweaker in the squad, should be preferred to partner Nathan Lyon on turning tracks, Chappell said.

"Should the pitches favour spin, which is more likely, I expect Ashton Agar to get the nod because finger spin is considered to be more accurate," said the 74-year-old Chappell who scored 7110 runs from 87 Tests with an impressive average of 53.86 between 1970 and 1984.

"Anil Kumble who took

619 wickets in Test cricket, rarely strayed off the straight and narrow. His stock in trade were fast, flat leg breaks which were always threatening the stumps. Batters knew if they missed, they were in trouble. Jadeja's stock in trade is similarly unnerving.

"Agar has got to emulate their roles. One bowler leaking runs will be the difference in a tight contest."

Recollecting his conversation with Erapalli Prasanna, he wrote the Indian legend would spin the ball hard, try to hit the batter on the pads often, get him thinking about the spinning ball, and then trap him on the crease with a straight one.

"Line, he (Prasanna) said, was optional, length was mandatory. He explained to me that he would lay the seam a bit flatter than for the traditional off spinner and then impart a higher number of rotations on the ball that would make the ball drift like an off spinner but, once it landed on the leather, it would skid on with the arm giving the impression that it had gone 'the other way'.

"As the leader of the spin attack, Nathan Lyon will need to take pages out of his book and show the way."

Green might have an 'outside chance' of playing Nagpur Test: McDonald

PTI ■ BENGALURU

Dashing all-rounder Cameron Green is making a quick recovery from his index finger injury and has an "outside chance" of making it to Australia's playing eleven for the opening Test against India starting on Nagpur on February 9.

The 23-year-old seam bowling all-rounder, who is recovering from a surgery on his index finger in his right hand, had a

bowl at the nets in Alur.

"We haven't put a clear line through him on the team sheet. So, I wouldn't say he was in discomfort when he was bowling," McDonald told reporters here on the sidelines of their four-day training camp.

However there are still some concerns when he is batting, admitted the head coach.

"I would say one of the deliveries jarred the bottom of the bat and that can create dis-

comfort for anyone, but there is a little bit of awareness around that finger. He has made some significant steps forward in the last couple of days, probably to my surprise. So, there is still an outside chance, everything going well, he might be on the team sheet," McDonald kept the options open.

Skipper Pat Cummins had earlier ruled out Green from bowling in the Test should he play, but McDonald said he has

made significant progress.

Green's inclusion would provide Australia with an opportunity to include an extra specialist spinner in their bid to win their first Border-Gavaskar Trophy in India since 2004.

McDonald further said their explosive opener David Warner is fully "recharged" and looking forward to make

amends for his poor runs in some of the previous tours in the upcoming Test series.

The 36-year-old, who has a poor record of averaging 24.25 in eight Tests in India, had complained of exhaustion and said he would have preferred the night off from the Cricket Australia awards to recover from a busy home summer.

MARKET COMMITTEE RANIA (SIRSA) PUBLIC NOTICE

It is informed to the General Public that the Shop bearing n. 35 size 20x85+40 feet New Grain Market, Rania which is presently entered in the name of Sh. Rahul Kamra son of Chander Bhan resident of Rania Tehsil Rania Distt. Sirsa. Sh. Rahul Kamra expired on 1-03-2021. Deceased Rahul Kamra has not made/done any will during his life time. Now the heirs/inheritors of late Rahul Kamra namely (1) Pushpa Rani Mother & (2) Bindiva Rani Widow & (3) Anandi minor daughter of Rahul Kamra son of Chander Bhan, every three in equal share, all residents of Rania Distt. Sirsa, has applied in the office to enter the name for shop no. 35 size 20x85+40 feet in the record of Market Committee, Rania. Hence, through this notice it is informed to the General Public/any relative/heirs etc. called by whatsoever name that if any body have any objection to enter their name in the record of Market Committee for the aforesaid property/any part then he/they may submit their objection in writing along with proof within 30 days of this publication/public notice. After the lapse of 30 days the shop no. 35 size 20x85+40 feet will be entered in the name of the heirs as mentioned above.

Secretary-cum-E.O. Market Committee, Rania

Central Bank of India celebrates "Samman Diwas" on 2nd Feb 2023

On call made by corporate office of the Bank, Central Bank of India, Jalandhar Region celebrated "Samman Diwas" in each branch of the region by presenting bouquet/flower/shawls/sweets/gifts to their retired employees and pensioners. Bank has requested all their ex-employees to work as Brand Ambassadors of the Bank and help in canvassing business of HNI, New Customers, New Pensioners and NRI.

BSNL PUNJAB CIRCLE WON STATE LEVEL ENERGY CONSERVATION AWARD

Bharat Sanchar Nigam Limited, Punjab Circle has won the First and Second prize in the state level Energy conservation award competition 2022 for Telephone Exchange building Jalandhar and Hoshiarpur under the category of commercial buildings, Government & Private buildings for taking extra efforts for efficient utilization, Management and conservation of energy during the last two years 2020- 21 & 2021-22.

H.P. STATE POLLUTION CONTROL BOARD
It has been brought to the attention of the H.P. State Pollution Control Board by media reports and Department of Environment, Science & Technology, GoHP that plastic waste has been dumped haphazardly across 70 dumpsites in the states. Taking prompt action in this regard, the H.P. State Pollution Control Board has directed the Urban Development Department and Rural Development and Panchayati Raj Department on 4th February 2023 to take necessary action for scientific disposal of the plastic waste dumped haphazardly. The State Board has stated that the Solid Waste Management Rules, 2016, Rule 15, clearly stipulate the roles and responsibilities of the local authorities and village panchayats regarding scientific disposal of the solid waste produced and remediation of legacy waste sites. The State Board, in its directions has raised the issue that at present total legacy waste to the tune of 1,90,796 tonnes is lying in ULBs namely Dharamshala, Mandi, Baddi, Solan, Kullu, Manali, Bilaspur, Una, Santokhgarh, Baijnath, Chowari, Dalhousie, Rewalsar, Sarkaghat and Hamirpur. It has observed that the progress of legacy waste remediation work in most of the above-said ULBs is sluggish and lags behind the timeline stipulated in the Solid Waste Management Rules, 2016.

UAE set to host Asia Cup, venue to be finalised in March

PTI ■ NEW DELHI

The Asian Cricket Council will decide on an alternate venue for the Asia Cup ODI tournament in March after BCCI secretary Jay Shah and PCB chairman Najam Sethi had their first formal meeting in Bahrain on Saturday.

The Asia Cup was initially allotted to Pakistan and was scheduled in September this year but Shah, who is also the ACC chairman, had announced last October that India will not travel to Pakistan.

It is understood that United Arab Emirates with three venues -- Dubai, Abu Dhabi and Sharjah -- are favourites to host the tournament but the decision has been withheld for the time being.

All heads of ACC member nations attended the emergent meeting which was called at the behest of PCB chairman Sethi after ACC under chairmanship of Shah released the continental body's itinerary where Pakistan wasn't named the hosts. "The ACC affiliates met today and there were a lot of constructive discussions. But the shift of venue has been

postponed till March. But be rest assured that with India not going to Pakistan, the tournament will have to be shifted. A tournament without Virat Kohlis, Rohit Sharma and Shubman Gill will have the sponsors back out," a senior BCCI official privy to the development told PTI.

One ACC insider said Sethi has just taken over PCB and if he would have ceded ground on the hosting rights in the first meeting itself, then it would have led to a bad impression at home.

Pakistan is currently going through an economic crisis and inflation has hit the country very hard with the country's currency (PKR) plummeting to Rs 277 against 1 US Dollar.

Organising a high profile tournament like Asia Cup, even if ACC pays a grant could burn a hole in PCB coffers. So strategically, if the tournament is held in the UAE, there is every possibility that all the member nations will also get to earn apart from the broadcast revenues.

In another decision, the ACC has decided to increase the annual budget allocated for Afghanistan Cricket Association to 15 percent from six.

BRANCH OFFICE : NEW SHIMLA

Gold Auction Cum Invitation Notice

The Pledges, in specific and the public, in general, are hereby notified that auction of the gold ornaments pledged in the below mentioned accounts is proposed to be conducted on 20.02.2023 from 12:00 P.M. at respective branches as mentioned below.

Name of the Borrower	Address	O/s Amount	Net Weight (in Grams)	Place	Branch Manager & Contact No.
Late Mr Vijay Kumar Rep. by Legal Heirs	Tarun Villa, Near Tibettan Monastery Shimla, HP.- 171009.	Rs. 61,665/- as on 30.01.2023 plus interest & other charges	28.810 grams	New Shimla Branch (UBI)	Saurabh Jain Ph. No. 70096-01040
Late Mr Vijay Kumar Rep. by Legal Heirs	Tarun Villa, Near Tibettan Monastery Shimla, HP.- 171009.	Rs. 80,147/- as on 30.01.2023 plus interest & other charges	20.530 grams	New Shimla Branch (UBI)	Saurabh Jain Ph. No. 70096-01040

Terms & Conditions of Auction:- Decision regarding acceptance of an offer for purchase of Jewellery through auction would be that of the Bank and the Bank is not bound to accept the highest offer. Bidders are hereby requested to take note of terms and conditions of auction stipulated hereunder in their own interest: 1. The Bank does not guarantee the weight or purity of the Jewellery/coins, either of its gold contents or otherwise. 2. If the successful bidder fails to pay the amount, the bidder shall forfeit the earnest money and the jewel may be resold within 30 days from that date and shortfall if any in excess of the earnest money shall be recoverable from the bidder who has successfully bid at the earlier auction but did not take delivery of the jewel against the payment. 3. The unsuccessful bidder shall be entitled for the refund of the earnest money immediately after the auction is over. 4. It shall be lawful for the bank to stop the auction at any stage without assigning any reason in which case earnest money shall be refunded to whoever makes the deposit.

FAITH AND PRAYER ARE THE VITAMINS
OF THE SOUL; MAN CANNOT LIVE IN
HEALTH WITHOUT THEM
— MAHALIA JACKSON

NIP CANCER IN THE BUD

Usually, the word cancer is equated with death. However, busting the common myth, health experts say that most cancers may be cured fully if diagnosed early. Late detection is one of the highest reasons behind poor survival rates. On the World Cancer Day on February 4, THE HEALTH PIONEER sheds light on some most common types of cancer in India and the causes behind them.

TYPES OF CANCERS

* Gall Bladder Cancer

Bladder cancer risk factors include smoking, genetic mutations, and exposure to certain chemicals. Speaking on the rise in gallbladder-related illness, Dr Sushma Bhatnagar, the head of National Cancer Institute of India said, "Cases of gallbladder cases in women have been on the rise especially in the north-eastern parts of the country and settlements beside rivers."

* Cervical Cancer

Screening tests and the HPV vaccine can help prevent cervical cancer.

* Colorectal Cancer

If you are 45 years old or older, get screened. Screening tests can help prevent colorectal cancer or find it early, when treatment works best.

* Gynecologic Cancers

Five main types of cancer affect a woman's reproductive organs: breast, cervical, ovarian, uterine, vaginal, and vulvar. As a group, they are called gynecologic cancers.

* Breast Cancer

Regular mammograms are the best tests doctors have to find breast cancer early. Talk to your doctor about when to start and how often to get a screening mammogram.

* Ovarian Cancer

Ovarian cancer causes more deaths than any other cancer of the female reproductive system. But when ovarian cancer is found early, treatment works best.

* Uterine Cancer

Uterine cancer is the most common cancer of the female reproductive system.

* Vaginal and Vulvar Cancers

Vaginal and vulvar cancers are rare, but all women are at risk for these cancers.

* Head and Neck Cancers

Cancers of the head and neck include cancers that start in several places in the head and throat, not including brain cancers or cancers of the eye.

* Kidney Cancer

To lower your risk of kidney and renal pelvis cancers, keep a healthy weight. Don't smoke, or quit if you do.

* Liver Cancer

To lower your risk for liver cancer, get vaccinated against hepatitis B, get tested for hepatitis C, and avoid drinking too much alcohol.

PREVENTABLE CANCERS

No cancer is 100% preventable. However, managing certain controllable risk factors — such as your diet, physical activity and other lifestyle choices — can lower your chances of developing cancer. This is especially true for 9 specific cancer types, which include:

- *Breast cancer
- *Cervical cancer
- *Colorectal cancer
- *Head and neck cancer
- *Lung cancer
- *Ovarian cancer
- *Prostate cancer
- *Skin cancer
- *Testicular cancer

* Lung Cancer

Lung cancer is the leading cause of cancer death in the United States. To lower your risk, quit smoking, avoid secondhand smoke, and get your home tested for radon.

* Lymphoma

Lymphoma is a general term for cancers that start in the lymph system. The two main kinds are Hodgkin lymphoma and non-Hodgkin lymphoma.

* Myeloma

Myeloma is a cancer of the plasma cells. In myeloma, the cells grow too much, forming a mass or tumor in the bone marrow.

* Prostate Cancer

Most prostate cancers grow slowly and don't cause any health problems. Learn more and talk to your doctor before you decide to get tested or treated for prostate cancer.

* Skin Cancer

To lower your skin cancer risk, protect your skin from the sun and avoid indoor tanning.

* Thyroid Cancer

The thyroid gland is located in front of the neck. It sends out hormones that help control many activities in the body.

MOST COMMON CAUSES FOR CANCER

TOBACCO

Tobacco use is a leading cause of cancer and of death from cancer. People who use tobacco products have an increased risk of cancer because tobacco products and secondhand smoke have many chemicals that damage DNA.

Tobacco use causes many types of cancer, including cancer of the lung, larynx (voice box), mouth, esophagus, throat, bladder, kidney, liver, stomach, pancreas, colon and rectum, and cervix, as well as acute myeloid leukemia. People who use smokeless tobacco (snuff or chewing tobacco) have increased risks of cancers of the mouth, esophagus, and pancreas.

Dr SVS Deo, Professor of Surgical Oncology at AIIMS Delhi says, "Smoking and consumption of alcohol account for 30 per cent of total cancer cases. If we can somehow curb the usage of these deadly items, cancer cases will go down."

ENVIRONMENTAL POLLUTION

Environmental pollutants like arsenic, chromium, nickel, asbestos, dioxins, besides tobacco are the major cause for lung cancer and gall bladder in India.

Dr Bhatnagar said, a major chunk of cancer cases are a result of air pollution, water pollution and an unhealthy lifestyle. Air pollution has also led an increase in the cases of cervical cancer. Delhi NCR witnessed 22000 cases of cancer last year of which 50 per cent of cases were treated at the National Cancer Institute, AIIMS."

Breast cancer Early detection key

Oncologists recommend breast self-examination every month around five days after the periods are over starting from the age of 20. According to them, for postmenopausal women, it can be done on a certain day/date of every month. Annual breast examination by a trained doctor after the age of 20 is also strongly recommended. Finally, regular mammograms after the age of 40-45 is also recommended for early detection of Breast Cancers and timely treatment.

With the emergence of advanced services including oncoplastic breast surgery, oncologists/surgeons are now able to offer breast conservation to most patients with a good cosmetic outcome that boosts confidence and creates a positive impact on the psychological state of the patient. According to the experts, newer techniques like Sentinel lymph node biopsy and Lymphovenous anastomosis help in reducing the lymphedema rates to less than 5 percent. Chemotherapy usually consists of 6-8 cycles administered in daycare at an interval of 15-21 days.

It's not just a woman who has cancer, suffers. It has a devastating impact for the next generation. According to a study by the International Agency for Research on Cancer, an estimated 4.4 million women died of cancer in 2020, leaving nearly 1 million children orphaned. At least 25% were due to breast cancer.

DOCTORSPEAK

Dr. Bhawana Awasthy, Chief Medical & Clinical Oncology, Indian Spinal Injuries Centre

"Cancer that develops in breast glands or ducts is called breast cancer.

A lump in the breast, bloody or straw-coloured nipple discharge, recent nipple inversion, ulceration or destruction of the nipple, dimpling of skin and thickening of skin to give an appearance of orange peel are some of the symptoms of breast cancer.

While identifying these signs is important, regular mammography picks up cancers even before these symptoms.

Meet your doctor for a breast examination and screening advice before the disease becomes apparent. Remember, breast cancer is curable if detected early."

Dr. Suman Mallik, Clinical Director - Senior Consultant & HOD Radiation Oncology, Narayana Superspeciality Hospital, Howrah

"Confirmation of diagnosis of breast cancer usually requires a needle biopsy, which can be performed at the

WHO Roadmap on breast cancer launched recently recommends:

- Countries to focus on breast cancer early-detection programmes so that at least 60% of the breast cancers are diagnosed and treated as early-stage disease.
- Diagnosing breast cancer within 60 days of initial presentation can improve breast cancer outcomes. Treatment should start within three months of the first presentation.
- Managing breast cancer so that at least 80% of patients complete their recommended treatment.

OPD 10-15 minutes after the mammogram is done. We initially go for ultrasound, mammogram and sometimes MRI in special situations to detect early disease. Patients with larger lumps, those having enlarged glands in the armpit or symptoms suggestive of distant organ involvement (bone pain, breathlessness, headache, enlarged liver etc.) need additional tests like PET-CT scan to rule out the spread of disease to other organs."

Dr. Ronak Vyas, Surgical Oncologist at Narayana Multi Speciality Hospital, Ahmedabad

"People need to be aware of advanced treatment and facilities available in the country now. For example, our hospital has best-in-class treatment and care for breast cancer patients. It is very disappointing for us that a large number of patients come to us at advanced stages. Early Cancer or Stages I & II are usually treated by surgeries first. Locally advanced stage III requires chemotherapy first followed by surgery and radiation.

Hormone and other targeted therapy are needed in the select group of patients who have certain markers present on their tumours. Stage IV (Distant organ spread) is treated either with chemotherapy or hormone therapy or both."

... Rural women caught unaware

ARCHANA JYOTI ■ NEW DELHI

Even as breast self-examination (BSE) remains a feasible screening method in resource-poor settings like India, yet diagnosis in advanced stages remains a cause of concern. This is mainly because the majority of women particularly from rural India have poor awareness regarding breast cancer and poor practice of BSE.

This was found by a group of researchers while assessing the awareness of breast cancer and the practice of BSE among women in a rural area of Karnataka in South India. This speaks volumes of the awareness status among rural women across the country.

Published in the Indian Journal of Cancer, the study revealed that less than one in ten women knew that a lump in the breast is a symptom of breast cancer.

Awareness of at least one symptom of breast cancer was associated with an 18-fold increase in the practice of BSE,

cer. Majority 338 (81.2%) were not able to state even a single symptom of breast cancer and 365 (87.7%) not able to state even one risk factor of breast cancer.

Majority 354 (85.1%) of the women in the study had never heard of BSE. None of the women in the study performed monthly BSE. Only 40 (9.6%) of the women actually performed BSE within the last 6 months. Women with higher education and those who reported a history of a lump in the breast in self or family were significantly more likely to state at least one symptom of breast cancer and were more likely to practice BSE, noted the authors of the study led by Avita R, Department of Community Health, St. John's Medical College, Bangalore.

This was found by a group of researchers while assessing the awareness of breast cancer and the practice of BSE among women in a rural area of Karnataka in South India. This speaks volumes of the awareness status among rural women across the country.

Published in the Indian Journal of Cancer, the study revealed that less than one in ten women knew that a lump in the breast is a symptom of breast cancer.

Awareness of at least one symptom of breast cancer was associated with an 18-fold increase in the practice of BSE,

study said, revealing an urgent need to focus on health awareness regarding breast cancer and BSE among rural women.

"Evidence points out that early detection and treatment can improve breast cancer survival rates. For rural Indian women, the lack of a mammogram and breast examination by an experienced clinician makes BSE the only feasible screening method available. The poor awareness and practice of BSE could lead to delayed diagnosis and adversely affect the outcome of breast cancer. However, there are several socio-cultural barriers that continue to exist in Indian society such as negative attitude to BSE, poor health-seeking behaviour and lack of priority to the health of women as they reach the end of their child-bearing years."

Though the study was conducted in 2016, its observation still holds true keeping in mind no let up in the breast cancer cases.

The authors have called for an urgent need to focus on health awareness regarding breast cancer and BSE among rural women by exploring various mechanisms of community engagement, including involving grassroots-level health workers.

The study tool used was the Breast Cancer Awareness Measure (Breast-CAM), developed by Cancer Research UK, King's College London and University College London in 2009, and it records awareness of symptoms and risk factors of breast cancer and awareness and practice regarding BSE. It was translated into the local language Kannada for use in rural areas for study purposes.

CANCER: Close the care gap

On World Cancer Day, WHO is calling for intensified action across the South-East Asia Region to strengthen health systems to prevent and detect cancers early, to provide prompt treatment referral, to enhance access to palliative care, and to close the gap in access to quality cancer services — the theme of this year's commemoration.

Cancer is the second leading cause of death globally, accounting for an estimated 9.9 million deaths in 2020. Between 2010 and 2019, global cancer incidence increased by 26%, alongside a 21% increase in cancer deaths. An estimated one third of cancer deaths globally are due to tobacco use, high body mass index, alcohol use, low fruit and vegetable intake, and lack of physical activity.

In the WHO South-East Asia Region, an estimated 2.3 million people developed cancer in 2020, and 1.4 million died of the disease. Cancer is estimated to account for more than 20% of premature mortality from noncommunicable diseases (NCDs) in the Region, which stand at around 4.7 million deaths every year. In 2020, cancer of the lungs, breast and cervix accounted for 400 000 of the total number of cancer-related deaths in the Region, and almost two-thirds of people

diagnosed with cancer succumbed to the disease, highlighting the urgent need for improved early diagnosis and treatment.

Since 2014, the Region has accelerated action to prevent, detect, treat and control cancer, with increased focus on eliminating cervical cancer as a public health problem. Eight countries of the Region now have in place population-based cancer registries (PCBRs), and three countries — Myanmar, Nepal and Sri Lanka — are focus countries for addressing childhood cancer. Ten of the Region's 11 Member States provide tertiary care services for cancer diagnosis and treatment — including surgical and chemotherapy services — and nine also offer radiotherapy services.

WHO continues to support countries of the Region to implement its new Regional Action Plan on Oral Health 2022–2030, including oral cancers, which in 2020 were among the top five most common cancers, accounting for 7.4% of new cancers. Five countries of the Region — Bhutan, India, Myanmar, Sri Lanka and Thailand — now have in place national cancer control plans, which Maldives and Nepal are in the process of finalizing. The Region is currently on track to achieve the WHO NCD Global Action Plan tar-

DR POONAM KHETRAPAL SINGH
WHO Regional Director for South-East Asia

get of a 30% relative reduction in tobacco use prevalence between 2010 and 2025.

On cervical cancer, the Region is achieving rapid, life-saving progress. Five Member States — Bhutan, Maldives, Myanmar, Sri Lanka and Thailand — have introduced nation-wide HPV vaccination, which Bangladesh, India and Timor-Leste are set to also introduce. Indonesia has introduced HPV vaccination in several provinces, covering tens of millions of girls. New evidence shows that a single dose of HPV vaccine delivers protection comparable to the 2-dose schedule, which alongside additional cost reductions, should enable countries to reach every woman and girl.

To accelerate progress and close the care gap, the Region has several priorities. First, introducing and/or expanding HPV vaccination in routine immunization to prevent cervical cancer, covering at least 90% of adolescent girls. At the same time, the Region must continue to facilitate healthy lifestyles, including by not just legislating but enforcing key tobacco control measures such as health warnings and bans on tobacco advertising, promotion and sponsorship, as well as by raising taxes on tobacco products.

Second, increasing capacity at the primary health care (PHC) level to detect cancers early, with a focus on intensified health workforce training, improved infrastructure and resources, and streamlined referral pathways for prompt initiation of treatment. In all countries, PHC physicians and nurses must be equipped to provide palliative and end-of-life care close to patients' homes and families, within the community.

Third, rapidly — and systematically — advancing the capacity of tertiary care facilities to provide comprehensive diagnostic and treatment services, which is critical to reduce cancer mortality. Interventions should be aimed at

high-burden cancers with high potential for cure. They must be accessible to all. Existing PBCRs should be improved, and where appropriate, new registries established, ensuring that policy makers can access good quality information to plan, monitor and evaluate interventions, and adjust accordingly.

Fourth, including cancer services in risk pooling or pre-payment schemes and health benefit packages. For this, national health budgets should enhance the quality and accessibility of public sector services and strengthen financial protection, with a focus on ending catastrophic health expenditure.

Action cannot and must not wait. In the last two decades, the world has made significant progress in the science of cancer control. However, much more work is needed to close the care gap, improve cancer survival, and accelerate towards the NCD 2025 and Sustainable Development Goal targets 2030. On World Cancer Day, WHO reiterates its commitment to support all countries of the Region to prevent, detect, treat and control cancer, ensuring equitable access to quality cancer services for everyone, everywhere.

—Marianne Williamson

THE CITY OF FLOWERS NOW AN EPICENTER OF VIOLENCE

Peshawar was a peaceful place until the early 1980s when Pakistan's then-dictator Ziaul Haq decided to become part of Washington's cold war with Moscow, joining the fight against the 1979 Soviet invasion of neighboring Afghanistan. Write RIAZ KHAN and MUNIR AHMED

Pakistan's Peshawar was once known as "the city of flowers," surrounded by orchards of pear, quince and pomegranate trees. It was a trading city, situated at the gates of a key mountain valley connecting South and Central Asia.

But for the past four decades, it has borne the brunt of rising militancy in the region, fueled by the conflicts in neighboring Afghanistan and the geopolitical games of great powers.

On Tuesday, the city with a population of about 2 million was reeling after one of Pakistan's most devastating militant attacks in years. A day earlier, a suicide bomber unleashed a blast in a mosque inside the city's main police compound, killing at least 101 people and wounding at least 225, mostly police.

Analysts say the carnage is the legacy of decades of flawed policies by Pakistan and the United States.

"What you sow, so shall you reap," said Abdullah Khan, a senior security analyst.

Peshawar was a peaceful place, he said, until the early 1980s when Pakistan's then-dictator Ziaul Haq decided to become part of Washington's cold war with Moscow, joining the fight against the 1979 Soviet invasion of neighboring Afghanistan.

Peshawar — less than 30 kilometers (20 miles) from the Afghan border — became the center where the American CIA and Pakistani military helped train, arm and fund the Afghan mujahideen fighting the Soviets. The city was flooded by weapons and fighters, many of them hard-line Islamic militants, as well as with hundreds of thousands of Afghan refugees.

Arab militants were also drawn there by the fight against the Soviets, including the scion of a wealthy Saudi family, Osama bin Laden. It was in Peshawar that bin Laden founded al-Qaida in the late 1980s, joining forces with veteran Egyptian militant Ayman al-Zawahri.

The Soviets finally withdrew in defeat from Afghanistan in 1989. But the legacy of militancy and armed resistance that the U.S. and Pakistan fueled against them remained.

"After the Russian withdrawal from Afghanistan in 1980s, Americans abandoned mujahideen, Americans even abandoned us, and since then we are paying a price for it," said Mahmood Shah, a former Pakistani army brigadier and a senior security analyst.

The mujahideen plunged Afghanistan into civil war in a bloody fight for power. Meanwhile, in Peshawar and another Pakistani city, Quetta, the Afghan Taliban began to organize, with backing from the Pakistani government. Eventually, the Taliban took power in Afghanistan in the late 1990s, ruling until they were ousted by the 2001 American-led invasion following al-Qaeda's 9/11 attacks in the U.S.

During the nearly 20-year U.S. war against the Taliban insurgency in Afghanistan, militant groups blossomed in the tribal regions of Pakistan along the border and around Peshawar. Like the Taliban, they found root among the ethnic Pashtuns who make up a majority in the region and in the city.

Some groups were encouraged by the Pakistani intelligence agencies. But others turned their guns against the government, angered by heavy security crackdowns and by frequent U.S. airstrikes in the border region targeting al-Qaeda and other militants.

Chief among the anti-government groups was the Pakistani Taliban, or Tahrik-e-Taliban-Pakistan, or TTP. In the late 2000s and early 2010s, it waged a brutal campaign of violence around the country. Peshawar was scene of one of the bloodiest TTP attacks in 2014, on an army-run public school that killed nearly 150 people, most of them schoolboys.

Peshawar's location has for centuries made it a key juncture between Central Asia and the Indian subcontinent. One of the oldest cities

DURING THE NEARLY 20-YEAR U.S. WAR AGAINST THE TALIBAN INSURGENCY IN AFGHANISTAN, MILITANT GROUPS BLOSSOMED IN THE TRIBAL REGIONS OF PAKISTAN ALONG THE BORDER AND AROUND PESHAWAR. LIKE THE TALIBAN, THEY FOUND ROOT AMONG THE ETHNIC PASHTUNS WHO MAKE UP A MAJORITY IN THE REGION AND IN THE CITY. SOME GROUPS WERE ENCOURAGED BY THE PAKISTANI INTELLIGENCE AGENCIES. BUT OTHERS TURNED THEIR GUNS AGAINST THE GOVERNMENT, ANGERED BY HEAVY SECURITY CRACKDOWNS AND BY FREQUENT U.S. AIRSTRIKES IN THE BORDER REGION TARGETING AL-QAIDA AND OTHER MILITANTS

“ ”

in Asia, it stands at the entrance to the Khyber Pass, the main route between the two regions. That was a source of its prosperity in trade and put it on the path of armies going both directions, from Moghul emperors to British imperialists.

A heavy military offensive largely put down the TTP for several years and the government and the militants eventually reached an uneasy truce. Peshawar came under heavy security control, with checkpoints dotting the main roads, and a heavy presence of police and paramilitary troops.

TTP attacks, however, have grown once more since the Afghan Taliban returned to power in Kabul in August 2021 amid the U.S. and NATO withdrawal from that country. The Pakistani Taliban are distinct from but allied to the Afghan group, and Pakistani officials regularly accuse the Afghan Taliban of giving the TTP free rein to operate from Afghan territory.

On Wednesday, several police officers joined a peace march organized by the members of civil society groups in Peshawar, denouncing militant attacks and demanding peace in the country. Police said they made some arrest in connection with Monday's mosque bombing but did not provide details.

Ahead of Monday's suicide bombing, Peshawar had seen increasing small-scale attacks targeting police. In another spillover from Afghanistan's conflict, the regional affiliate of the Islamic State group attacked Peshawar's main Shiite mosque in March 2022, killing more than 60 people.

Shah, the former officer, warned that more TTP attacks could follow and said that Pakistan needs to engage the Afghan Taliban and pressure them to either evict the TTP or ensure it doesn't launch attacks from Afghan territory.

"If we are to have peace in Pakistan, we should talk to TTP from the position of strength with help from the Afghan Taliban," he said. "This is the best and viable solution to avoid more violence."

Pakistan reaches out to Taliban supremo

Pakistan has decided to seek the intervention of Taliban supreme leader Mullah Haibatullah Akhundzada to control the Tehrik-e-Taliban Pakistan (TTP) terror group, according to official sources.

During an Apex Committee meeting in Peshawar, the civil and military leadership held the banned TTP responsible for the carnage in the city this week, and decided to take up the matter with the interim Afghan government at the highest level, with a clear message that Pakistan would no longer tolerate cross-border terrorism, The Express Tribune reported.

Although the TTP has denied its involvement in Monday's suicide blast at a mosque in the Peshawar Police Lines, a briefing given to the Apex Committee suggested that the banned outfit was indeed the mastermind of the attack.

The meeting at the Governor House in the Khyber Pakhtunkhwa (KP) capital was held in the wake of a deadly terrorist attack in the Police Lines in which more than 100 people, mostly policemen, were killed.

The meeting was presided over by Prime Minister Shehzad Sharif.

The participants of the meeting included Army chief Gen Syed Asim Munir, DG ISI Lt-Gen Nadeem Anjum, Peshawar Corps Commander, DGMO and other military officials as well as senior cabinet members, chief ministers of the four provinces, Gilgit-Baltistan and Azad Jammu and Kashmir.

The Pakistan Tehreek-e-Insaf (PTI) was invited to the all-import-

tant meeting but it did not attend.

The marathon meeting discussed how the suicide bomber managed to enter the high security zone, who the perpetrator was and how the government would respond to the renewed threat posed by the TTP.

The meeting was informed that the TTP, indeed, carried out the attack but because of fear of backlash from the Afghan Taliban, it did not own it, publicly.

Insiders told The Express Tribune that Pakistan would seek the intervention of Akhundzada to control the banned terror outfit.

The meeting noted that despite the resurgence of terrorism in the country, terrorists did not hold any specific area, therefore there was no need for a full-scale military operation.

Instead, according to Interior Minister Rana Sanaullah, the intelligence-based operations would continue. (IANS)

Yemenis' wait for war crimes justice lingers

The Yemen crisis continues. It has completed eight years. The country's internal political factions and Saudi-led military intervention have spawned the catastrophe. The intractable civil war initially has gradually transformed into a full-blown tragedy leading to the deaths of millions, especially children and women. And it has added more numbers to the international refugee crisis.

The real tragedy lies in blatant violation of all universal norms set by the UN and prescribed by the international humanitarian laws. The rules and principles of the global humanitarian framework provide full protection to all civilians and others who are not participating in the war. In fact, all sets of international humanitarian law demands and normally ensures from the conflicting groups the greatest possible measures to reduce human suffering during the conduct of fighting. Therefore, these laws clearly distinguish between military objectives and civilian objectives. The final objective is to minimise harm to civil society. What has been observed in Yemen is flouting all humanitarian restrictions while pursuing military objectives. It has led to disproportionate attacks over civilian targets. Thus, many civil society organisations and global human right agencies are claiming that indiscriminate and disproportionate attacks carried out by the warring parties in Yemen are akin to war crimes.

As long as there have been conflicts and wars, attempts have been made by international jurists and other experts to define "war crimes". However, only by the 20th century, the very concept of war crime was defined in the legal sense of the term. According to the UN, a war crime is a serious breach of international law committed against civilians or enemy combatants during an international or domestic armed conflict. So to have a war crime, there must be an armed conflict. An armed conflict, international or non-international or

Assault rifles and missiles seized by the French Navy lay on the deck of a ship at an undisclosed location on Wednesday. French naval forces in January seized thousands of assault rifles, machine guns and anti-tank missiles in the Gulf of Oman coming from Iran heading to Yemen's Houthi rebels, officials said on Thursday, the latest such interdiction amid West Asian nation's long-running war

in Yemen. However, the US has also offered technical assistance to Saudi Arabian forces while conducting massive bombing raids over enemy targets all across Yemen.

Yemen, a small nation located in the Arabian Peninsula has become a permanent war theatre today. The country has turned out to be a grievous site of human suffering particularly of children, women and ageing population. All global governance institutions, including the UN, except delivering peace sermons and urges, have simply become mute spectators, failing to stop the human carnage. And sadly, it is led indirectly by the world's most powerful nation, the US, on one side and the Islamic Republic of Iran by supporting Houthi Rebels on the other side. Who will be stopping them? Probably, no one until they withdraw on their own from the war field. And Saudi Arabia's Crown Prince Mohammed bin Salman, popularly known as MBS globally, simply wants to showcase his prowess by demolishing the Iran-backed rebels which are unstoppable for now. At home, MBS remains popular for his innovative strategies to recast the regimes economic and technovisions, but internationally he has been unable to shake off the veil of suspicion for his alleged role in the murder of Saudi journalist Jamal Khashoggi in Turkey in the year 2018. He is finding it too difficult either to withdraw or to outrightly declare his country as the winner of the Yemen War.

It is well known that the Saudis did not start the conflict. It is the Houthis who did it by marching to the historic capital city of Sanaa and overthrew the legitimate Yemeni Government in late 2014. Nevertheless, the conflict has its roots in the Arab Spring of 2011. Then an uprising of the public forced the country's long-time authoritarian President Ali Abdullah Saleh to hand over power to his Deputy Abdurrahman Mansour Hadi. The transition, as expected by interna-

tional political analysts, was supposed to bring peace and stability to Yemen, one of the poorest nations in the West Asian region.

However, unfortunately Hadi had to subsequently handle militancy, Islamic jihadists, military officers having continued loyalty to former President Saleh and most importantly an economic downturn propelled by massive corruption charges.

When the Houthi Shi rebels took over the capital city of Sanaa, President Hadi had to flee and the real existential crisis of the legitimate government of Iran began. Again, the conflict took a turn of a regional war in March 2015, when Saudi Arabia and eight other, mostly Sunni Arab nations, backed by the US, France, and the UK began strikes against the Houthis to restore the Hadi Government in Yemen. This has given the war an international angle too and the Islamic Republic of Iran openly supported the Houthi rebels. In fact, the Saudis are seriously concerned about the continued success and rampage of the Houthi militants as it would open a stronghold for its rival Iran in its southern backyard for future.

Truly, there has been disaster for everyone whosoever has been involved in the war. But for the most part, it is no other than Yemen's impoverished and malnourished population who have become the central target of the war. The Yemenis are killing the Yemenis by taking global support for arms and ammunition from warmongering nations. And at the same time, the regional warring parties like Saudi Arabia, the UAE and the rival Iran are bleeding their own coffers simply to re-establish their superiority in West Asia. And the final sufferers are no other than the ordinary Yemenis. It's time to stop this war crime. Enough is enough.

(The writer is the Head of the Department of Arts and Humanities at Geeta University, Panipat)

The Yemenis are killing the Yemenis by taking global support for arms and ammunition from warmongering nations. And at the same time, the regional warring parties like Saudi Arabia, the UAE and the rival Iran are bleeding their own coffers simply to re-establish their superiority in West Asia

MAKHAN SAIKIA

PERSPECTIVE

Budget ensures economy's fundamentals remain solid

Budget ignores 90% of India's population

The 2023-24 Budget has proved all pundits wrong as they had predicted it to be a political Budget before the 2024 Lok Sabha elections. The last full-fledged Budget before the general elections is not populist on any parameter. It takes confidence and commitment to stick to the fundamentals of prudent fiscal management, when it makes complete sense to go all-out political. This attribute which was also visible during the handling of the Covid-19 crisis will keep the economy resilient.

The highlight of the Budget has to be the increased allocation for capital expenditure, which was hiked by 33 per cent to Rs 10 lakh crore and the total capex is expected to be around 13 lakh crore. After two consecutive years of blistering growth in Government capex, there was an expectation that the Centre would step off the accelerator and make more direct cash transfers under various social sector schemes. The increase in capex under this context is indeed a pleasant surprise.

The Budget continues to focus on the smooth functioning of the economy. Capital allocation for collateral-free lending to the micro, small and medium enterprises (MSME) sector has been increased to Rs 9,000 crore. This will lead to an incremental lending of Rs 2 lakh crore to this sector. Customs duties have been reduced on a number of commodities to make manufacturing in India more competitive, with raw material availability at lower costs. These steps, together with the continued work on the ease-of-doing-business, will help the micro, small and medium enterprise sector in a major way.

Relief in personal income tax was widely demanded and the Budget has lived up to the expectation of the taxpayers. An individual can now earn up to Rs 7 lakh per annum and not pay any income tax. This is a 40 per cent increase over the current exemption limit of Rs 5 lakh per annum and has led to considerable rejoicing in the middle class. The relief has also been extended with people with very high levels of income. The surcharge on income above Rs 5 crore per annum has also been reduced and the highest marginal rate of taxation will come down from 42.75 per cent to 39 per cent. The Government has thus shown that it is not afraid to provide relief even to the rich if it believed that the rate was too high and political considerations did not come in the way.

This year's Budget is also a document for the future. The Government has listed seven priorities that will guide policy making on the road to 2047. These have elements of green growth and energy transition while not losing sight of inclusive development and reaching the last mile. The focus and commitment to sustainable growth can be seen from schemes like Mishti, for Mangrove plantation, along the coastline and Amrit Dharohar, for preserving biodiversity in wetlands. Scrapping of old vehicles also finds a detailed mention in the Budget. Establishing a centre of excellence for Artificial Intelligence (AI) shows that the Budget has ambition. The Skill India scheme will, henceforth, include AI, robotics, 3D printing and so on. The Government plans to set up 100 labs for the development of

5G services. The Government's support to the agricultural sector and its commitment to the rural economy are evident from the setting up of the Agriculture Accelerator Fund and the milllet development programme. Schemes such as GOBARdhan yojana and facilitating natural farming are a case in point. The target for credit to the agriculture sector has been fixed at Rs 20 lakh crore. It will ensure that the agriculture sector continues to grow at a healthy rate.

A major achievement has been the management of fiscal affairs. Several challenges on the macroeconomic front that stemmed from external factors, and were unseen at the time of the presentation of the Budget last year, unfolded as the year rolled by. The actual expenditure on food and fertiliser subsidy for the current year is much more than what was initially budgeted, while the excise tax collected dipped due to excise duty cut on petrol and diesel by the Central Government. Despite this, the Narendra Modi Government has managed to achieve the budgeted target of 6.4 per cent for fiscal deficit for the year 2022-23. The fiscal deficit target for the coming financial year has been put at 5.9 per cent of GDP. Thus, the march on the path of fiscal consolidation continues and while there is an absence of a glide path, the Government has committed to bringing it down to the range of 4.5 per cent by the year 2025-26.

A Budget that is not swayed by considerations of politics shows the maturity of the Government and the confidence it has in the ability of Indian voters' judgement to reward performance over

Point-counterpoint

rhetoric. This Budget is, therefore, a historic document and shows the nature of changing politics unleashed by the Modi Government. This Budget will ensure that the fundamentals of the economy remain solid and the next Government will be able to build upon it.

(The writer is a Supreme Court advocate)

SAMBHAVIT KRISHNA

The last full Budget before the 2024 general elections is not only an exercise in futility but is also tone-deaf to the realities of the society and India's neighbourhood. Like always, the Government cheerleaders claim that the Budget is historic, but if one looks beyond the surfet of terms like Amrit kaal, Shri Anna, Karmayogi, etc, one finds that it is neither for the masses nor for long-term growth potential of the economy.

The biggest failure is the refusal of the Government to increase defence expenditure in any meaningful manner. For the first time in decades India's defence allocations have dropped below two per cent of the nominal GDP. The growth in defence expenditure has even failed to keep pace with the rise in nominal GDP. The capital expenditure for defence has seen a very small increase from Rs 1,50,000 crore (RE) in 2022-23 to Rs 1,62,000 (BE) for 2023-24. For a Government

that loves to claim its nationalist credentials at the drop of a hat, it is not surprising at all that the subject of defence was not mentioned in the Budget speech of the Finance Minister at all. The UPA Government under the Congress devoted more than 2 per cent of the GDP to defence and the BJP at that time used to shout that the allocation was not adequate and it will increase defence allocation when it came to power.

It must also be reminded that the India-China border was largely peaceful during that period and now that the possibility of a border clash between the two countries is a real possibility, the defence sector has been given a short shrift. It is also very likely that the subject of defence was not mentioned in the Budget so that it does not antagonise China and if that's the case then it's indeed shameful.

A lot of noise is being made by the Government on its target to reduce the fiscal deficit to 5.9 per cent of GDP next year. If one looks beyond the headlines, one can easily see that the fertilizer subsidy in the coming year will come down drastically as the global prices, which had spiked after

the start of the Russia-Ukraine war, have cooled down. Moreover, the Government has also stopped the free food grain distribution that it had started in the wake of Covid-19 pandemic and therefore the food subsidy will also come down. The planned reduction on the fiscal deficit therefore is not a result of sound fiscal management by the Government but is a result of factors beyond its control.

Another aspect of the Budget is that the numbers pre-

sented are not honest. While the budgeted increase in capital expenditure is hogging the limelight, revenue expenditure has not been subjected to the scrutiny it deserves. The budget for 2023-24 has projected only a marginal increase in revenue expenditure over the revised estimate for the current year. In fact, if the interest payment is subtracted from the revenue expenditure, the amount is lower than revised estimates for the current year. This is clearly unrealistic and it is very likely that the actual revenue expenditure will exceed the Budget estimates.

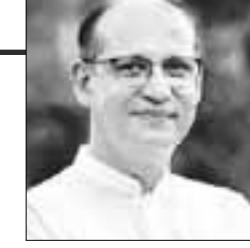

Moreover, it does not take much to puncture the claim of the Government on achieving very high Central Government capital expenditure as a percentage of GDP. The Government in its last 10 year period has raided the retained earnings of the public sector enterprises as a result of which the capital expenditure by PSUs has come down.

The Government's only objective seems to win praise from business newspapers and industry bodies. These people dominate any post-budget discussion and the concerns of rural and the poor masses are always relegated to the background. The allocation to Mahatma Gandhi National Rural Employment Guarantee scheme (MNREGA) has been reduced dramatically and the overall allocation to rural areas has come down. The Government likes to pretend that the country has fully recovered from the economic effects of Covid-19 but that is far from the truth. There is still widespread suffering in the rural areas and the Budget should have made increased allocation for the rural sector.

Unemployment is the biggest challenge facing our country but the Budget has nothing substantial for it. It seems that the youth will have no future to look forward to under the Modi Government. There was a lot of discussion on tourism in the Budget. It was projected as a magic pill to address the issue of unemployment in the country. However if one looks at the total allocation to the sector, it remains unchanged from what was allocated to it in the 2022-23 at Rs 2,300 crore.

The Budget is an all-round failure because it fails to prioritise its spending to areas that deserve urgent and continued attention of the Government. It criminally ignores 90 per cent of India's population and Indian voters will pay back in the coming State elections and the general election in the coming year.

DEEPAK BALUTIA

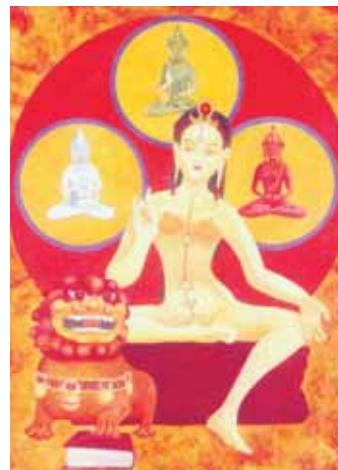

YOUR WEEK AHEAD

MADHU KOTIYA

**ARIES** March 21-April 19

Your anxiety is evident in all your efforts. When it comes to your health, trust your instincts. Get a second opinion if a diagnosis doesn't feel right. Individuals who consume alcohol or drugs should avoid or take a break from intoxication at this time. You need to be a more caring and generous person at work. People turn to you for assistance; your buddy or colleague may want financial assistance from you. This is the moment to make long-term investments. Your generosity and kindness will make you a good name. There is anguish and grief in the connection. For the relationship to survive, both sides must be willing to work on and discuss it. This is the time to reflect and contemplate.

Lucky number 12
Lucky colour Yellow
Lucky day Wednesday

**LEO** July 23-Aug 22

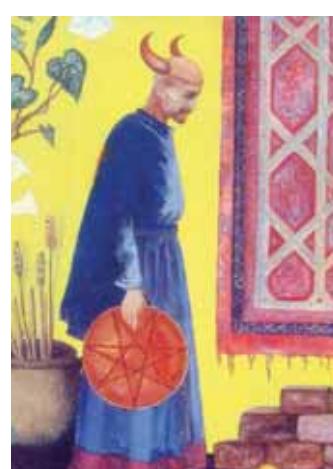

It will be beneficial if you pay attention to your health this week. The week begins with creative energy that makes you feel lively, nimble, and joyful. However, as the week develops, various health concerns may arise that require your quick treatment. There is a cure for everything. Be optimistic; everything will work out. Professionally, if you are not committed to your work, you may have to pay for it. People are observing you and providing up-to-the-minute information to higher authorities. You may be questioned about your irregularities in tasks and funds. This is a very emotional phase in your relationship. Things can rapidly turn sour and awkward. Take a rest if necessary. Pick your battles wisely, and always treat your partner as a friend.

Lucky number 17
Lucky colour Magenta
Lucky day Friday

**SAGITTARIUS** Nov 22-Dec 21

This week will be difficult for you in terms of your health. Panicking at this point will just make matters worse. Every crisis is followed by the promise of a good time. It all relies on what you do about it. Be upbeat about it and seek assistance from others. Meditation will be quite beneficial. Things may not be going so well in your job. You are nearing the end of a project or assignment when you are confronted with another problem or task at work. You must be resilient and not be frightened by those who want to bring you down. On the personal front, you will have disagreements with people. You must recognize that honest communication with your partner may help you settle all of your disagreements.

Lucky number 10
Lucky colour Brown
Lucky day Tuesday

**TAURUS** April 20-May 20

This week, your health and vitality should be excellent. If you need to change your behaviors to safeguard your health, now is an excellent moment to do so. Starting with minor objectives, such as a daily walk, might lead to a healthier and stronger you. Spend time balancing your body, mind, and soul. On the job front, there might be a monetary loss or a condition of unemployment. Your anxieties, addictions, and other unpleasant impulses may be causing a negative atmosphere around you. You are depressed and have a negative outlook on life. Be optimistic; now is the time to learn from your blunders. On the personal front, your situation is favorable, particularly in light of an ongoing romance. Your relationship will enter a lighter, more balanced phase in which you will respect each other as equals.

Lucky number 11
Lucky colour Pastel Blue
Lucky day Thursday

**VIRGO** Aug 23-Sep 22

This week, focus on health and follow-up workouts for people with serious illnesses. You could finally find it within yourself to give up certain unhealthy behaviors that you are aware are harmful. Take care of yourself first; only then will you be able to properly care for others. This week, you may receive some excellent news at work. You could get a call about a job with a better viewpoint, benefits, and facilities. Those who are waiting for posting may be able to travel to their selected location. This week brings monetary rewards for businesspeople. Relationships are not going as well as you imagined. You must work hard. Put your thoughts and opinions to your loved ones in a way that they will be easily accepted; else, they will be rejected.

Lucky number 20
Lucky colour Mauve
Lucky day Monday

**CAPRICORN** Dec 22-Jan 19

This week has some excellent news for you. Even if you are dealing with major health issues, a cheerful attitude may do miracles. If you believe something is amiss with your physical being, make sure you have access to medical care. Believe your intuition. On the job front, there is joy and celebration. You are going to see the fruits of your labor and efforts. If you are seeking for work, you'll find something greater than you could have imagined. Your contributions are recognized and respected. In terms of your relationship, your spouse's attitude may irritate you, and you may feel unhappy and lonely. You may have a sense of isolation. Try to broaden your horizons and think optimistically.

Lucky number 2
Lucky colour Grey
Lucky day Friday

**GEMINI** May 21-June 20

Despite the strain and stress this week, you stay calm and composed. Your support system is your boundless energy and stamina. You must channel your enthusiasm into something productive. Your health is still fine, and you have control over your sensory delights. On the professional front, your dedication and willpower will help you reach your goals; otherwise, you will face several obstacles and delays in your job. In times of crisis, your tough decisions will give you the strength to proceed and set out the plan. Follow the advice of a senior person who understands your boundaries and is close to you. This week, you may confront pushback from close friends and family members. Family rifts and disagreements are probable. Be a little softer and more kind.

Lucky number 10
Lucky colour Off-white
Lucky day Monday

**LIBRA** Sep 23-Oct 22

This week, you are constrained in terms of your health. Fear, worry, and negative thoughts are interfering with your ability to live a normal life. You must strike a balance between your body, mind, and soul. When one's thoughts are negative or filled with anxiety, one's health suffers. If you meditate and listen to your body's voice, 50% of your issues will solve themselves. On the job front, you may experience an unexpected setback or unfairness. The post you have been eyeing may be filled by another candidate of comparable caliber. The dilemma of whether to stay in the current one or join the new one will prevail. On the relationship front, make an effort to stay connected in order to keep the flame alive.

Lucky number 31
Lucky colour Red
Lucky day Wednesday

**AQUARIUS** Jan 20-Feb 18

This week, your health may make you feel good. You should be full of energy and optimism for the future. Consider your regular frame of thought, and keep in mind that your attitude impacts your health. Maintain an optimistic mindset. You are now able to mentor others and share your spiritual insights. On the professional front, you are approaching the point where professional achievement and recognition are firmly within your reach. Make every effort to be orderly and productive. This will compensate you. Now is not the time to gamble or take chances. On the personal front, good fortune will accompany you in matters of the heart. If you are already in a relationship, it could deepen and improve. You are emotionally satisfied.

Lucky number 1
Lucky colour Indigo
Lucky day Friday

**CANCER** June 21-July 22

You are feeling down and gloomy this week since things aren't going your way. There are several additional health conditions that have you concerned. Do not be too tense; this is only a passing phase. All tests will pass. The strain is the most serious sickness. You are likely to advance professionally. There will be money, status, and honor on the line. Business owners may make a lot of money. You schedule time for healing and massage therapy. This has been a decent emotional week. Romance is on the cards for the new love. Married partners must be concerned about and comprehend one other's sentiments. There is a communication gap that must be addressed since it is the primary cause of distance and isolation.

Lucky number 9
Lucky colour Orange
Lucky day Saturday

**SCORPIO** Oct 23-Nov 22

This week, your health is likely to be good. You will be full of energy and excitement. However, exercise should be done with caution because minor sprains or injuries can occur. If you've been slacking on your health, it's time to get back on track. On the job, you may come across a man of influence and leadership abilities who would like to mentor you. His presence is required to point you in the proper route. If you've been dealing with difficulties, now is the moment to take command of the issue. You will be incredibly goal-oriented and visionary. This week will be spectacular in terms of relationships. This is a moment to follow your intuition.

Lucky number 3
Lucky colour Peach
Lucky day Saturday

**PISCES** Feb 19-March 20

This week, your health difficulties will be resolved. You are probably aware that health is extremely essential and requires special care and attention. The phrase "prevention is better than cure" applies to you well. You attend healing therapy sessions and seminars and put them into practice in your life. On the professional front, you must break free from the self-imposed constraints that are impeding your career advancement. In some situations, you must be fluent and quick-witted, yet your mental confusion and dualism prevent you from doing so. Reduce your spending. Keep your eyes and ears open for chances that come your way. On the personal front, commitments are not made to be broken; if you do, you may suffer in terms of relationships.

ASTROTURF

BHARAT BHUSHAN PADMADEO

On Saraswati puja day last week, a visitor asked: "Vedanta, the founding stone of Indian philosophy hypothesises a singular formless and attribute-less Primordial-Source where from the creation chain took off. But at the same time we worship various form-gods, seeking boons for fulfilment of desires. Are the two concepts not in conflict?"

Well, there is none. Vedanta talks of eternal reality to which the whole manifest world is rooted. The form-God concept, on the other hand, has a purposeful contextual relevance. They carry valuable educative import, each identified with a particular attribute, vital to orderly human conduct. Goddess Saraswati in this sense offers lessons on how to pursue the learning process to acquire wisdom. These imageries were accorded the status of a deity to draw immediate attention of the seekers.

Complex dynamics of man and the universe calls for necessary awareness. That alone would help us relate well with the world around individually and collectively. But our egotistical mind, bound by its preconditioning and habit tendencies, restricts our scope of vision,

making it difficult to holistically understand the dynamics of life. That makes it incumbent upon us to expand our vision to explore existential truths with an open mind. Meditation on the imagery of Mother Goddess Saraswati is the way forward.

First the word: "Saraswati". It is made from the root-syllable, "Saras," which means spontaneous flow. Saraswati, thus, offers lessons in how ensure smooth run of life. She is visualised clad in spotless white apparel, also mounted on white Swan. Transparent white is the colour of purity, Buddhi (discriminate intelligence) and Space. It hints out at the pure, unsullied, truths, as laid down in nature. Only pure-minds, free from any preconditioning whatsoever, could explore such truths. Otherwise, with our minds driven by a sense of relative perception, it will be difficult to identify the thin dividing line between truth and untruth. It is something like milk diluted with water, which looks no different from its pure form. However, when served to a Swan, it consumes the pure milk, leaving aside the adulterated water, and hence the relevance of Her mount.

The Mother is armed with Veena (a traditional musical instrument). We are all aware that pleasing sound emanating from the musical instrument comes into effect through harmony and symphony of varied sound notes excited by different strings. In an implied sense, She remains the beholder of all Sabdhas—the

spoken as well as written words carrying meaning. And the word carries meaning only when the letters are placed in an orderly fashion. It also points to the fact that pleasing mannerism alone could help relate well and be in harmony with all and sundry, for a smooth run of life. Veena, the musical instrument of Mother thus metaphorically symbolises the beholder of words.

The mother is shown holding a book (the Veda) in one of her hands, meaning that scriptures provide us with the right lead. She is shown having a rosary in another hand. It implies that repeated reflection over knowledge acquired would be needed for realisation of the true import underlying the writeup. She is shown moving freely in a water body, having beautiful Lotus flower around, growing out of the mud lying in its womb. This is in acknowledgement of the fact that the earthly matter acquired its form-existence when aided by water element, and which acquired its dynamism out of the Sakti provided by the consciousness element, contextually symbolised by Mother. The Lotus flower here symbolises both creativity and lustre evident with knowl-

edge. Though born in muddy water, not even a drop of water or mud particle can stick to the lotus flower leaves, thus implying a sense of detachment. So, true wisdom can be acquired only when explored with a sense of detachment.

A peacock is also shown around the Mother, which she uses as a carrier while moving up above in the sky. We cannot afford to lose sight of the forces routed through the infinite, inaccessible and indestructible space either. And, obviously tracking down the information laid down there is no easy task. It needs to be noted that the prized feed of a peacock is poisonous snake. When the peacock digests the snake's poison, it leads to a change in its body chemistry, which results in the beautiful colour its plumage reflects. Similarly, knowledge acquisition cannot be an easy task. It implies that only those who take on the pains associated with learning process kindly, would be able to acquire the knowledge and wisdom.
