— Right to worship Gyanvapi-Shringar Gauri —

Hindu women plea maintainable: HC

Mosque panel's petition rejected

PNS/PTI ■ PRAYAGRAJ

The Allahabad High Court on Wednesday rejected a plea challenging the maintainability of a suit filed by five Hindu women seeking permission for regular worship of Shringar Gauri and other deities in Varanasi's Gyanvapi mosque compound.

Justice JJ Munir dismissed the mosque management committee's revision petition that contended that the suit is barred under the Places of Worship Act, 1991, which prohibits conversion of any place of worship and provides for the maintenance of its religious character as it existed on August 15, 1947. The Anjuman Intezamia Masjid (AIM) committee had filed the petition in the high court against the order of the district judge of Varanasi in September last year that turned down its objections on the maintainability of the suit filed by the five Hindu women.

The suit filed in August 2021 sought permission for daily worship at Maa Shringar Gauri Sthal in the Gyanvapi

complex.

The district judge had on September 12, 2022, dismissed the plea of AIM filed under Order 7 Rule 11 of the Civil Procedure Code (CPC). It had observed that the suit by the Hindu women was not barred by the Places of Worship (Special Provisions) Act, 1991, The Wakf Act 1995, and the UP Shri Kashi Vishwanath Temple Act, 1983, as was being claimed by the AIM.

The counsel for the petitioner, SFA Naqvi, contended the claim of the Hindu side that the devotees were restrained from worshipping Shringar Gauri and other deities on the outer wall of Gyanvapi in 1993 is an "artificial" claim and an example of clever drafting.

According to him, no order was passed by the then State Government in writing in 1993.

He said that the aforesaid claim has been made only to avoid the application of the Places of Worship Act, 1991.

He pointed out that even if the claim of the Hindu side is accepted, why did they not file suit in 1993 when they were so restrained or thereafter. Hence, the suit filed before the Varanasi court is illegal under the Limitation Act which bars the filing of any suit for declaration after three years of an incident. He claimed that Gyanvapi is on a Waqf property, hence in case of any grievance, the claim should be made before the Waqf Tribunal.

Cong guarantees betrayal of your trust: Modi

By boycotting new Parliament, Opp insulted 60,000 labourers, says PM

PNS ■ NEW DELHI

In poll-bound Rajasthan, Prime Minister Narendra Modi on Wednesday launched his party's month-long pan-India campaign, 'Maha Jansampark' from Ajmer and urged people not to be 'misled' by "the guarantee habit" of the Congress which he said "is not new but 50-years-old."

Addressing a public rally at Ajmer, Modi said people of Rajasthan have suffered on account of policies of the Congress which is in the habit of "tricking people".

"Fifty years ago, the Congress guaranteed that it will remove poverty. But it turned out to be their biggest betrayal to the poor. It has been a policy of the Congress to mislead the poor."

"The Opposition insulted the hard work of 60,000 labour-

Prime Minister Narendra Modi waves at supporters during a public meeting in Ajmer on Wednesday. Former Rajasthan CM Vasundhara Raje is also seen PTI

ers (Shramik) and the sentiment of the country," by boycotting the inauguration of the new parliament, said Modi.

The rally marked the start of a series of BJP public meetings over a month in a major outreach campaign as the party completes nine years in power at the Centre.

Modi compared the "slow speed" of vaccination coverage in the country under the Congress with its speed under the BJP Government at the Centre. "When there was a Congress Government, the

vaccination coverage could reach only around 60 per cent.

At that time, 40 out of 100 pregnant women, and children could not receive life-saving vaccines. Had there been a Congress Government (now), 100 per cent vaccination coverage in the country would have taken 40 more years. Several generations would have passed by then. Can you imagine the number of poor women and children who would have died in the absence of life-saving vaccines?" Modi said.

Court raps police for summons only through WhatsApp

PTI ■ NEW DELHI

A court here has criticised the Delhi Police for serving summonses on public witnesses only through WhatsApp and referred the matter to the deputy commissioner of police, West district, for "appropriate action".

Additional Sessions Judge Hem Raj was hearing a murder case registered at Punjabi Bagh police station which was at the stage of prosecution evidence.

Noting that one of the prosecution witnesses was absent and did not respond to repeated calls, the judge said the Delhi Police Commissioner had issued a standing order in February last year regarding the service of summonses upon the witnesses. The judge also noted in another case, a letter was received from the DCP (west) stating there is no circular from Delhi Police to serve the summonses on WhatsApp.

"Earlier also, this court has noted in several cases that the witnesses are being served by the police officials on WhatsApp...", the judge said.

Shah vows Manipur peace, return of displaced people

Govt working on 3-pronged plan

PNS/PTI ■ IMPHAL

Union Home Minister Amit Shah on Wednesday said here that the Government is committed to restore peace in Manipur and ensuring an early return of all internally displaced people back to their homes. Meeting victims from both Meitei and Kuki communities in relief camps in the State, he assured them of security and said the Government's focus is to ensure their safe return home.

The Centre is working on a three-pronged approach to bring the warring Meitei and Kuki communities into a narrow common ground for lasting peace in trouble-torn Manipur, sources said on Wednesday. These include dialogue with the affected people, rehabilitating those who had to leave their homes with

Union Home Minister Amit Shah in a meeting with a Kuki delegation, in Moreh, Manipur on Wednesday PTI

enhanced security and control over insurgents, the sources privy to the development said. The major task before the Government is to build confidence between the Meitei and Kuki communities.

On his third day of a trip to Manipur to broker peace between warring communities, Shah visited Moreh in

Tengnoupal district, followed by a tour to Kangpokpi district, and had wide ranging discussions with civil society organisations.

Amit Shah said, "We are committed to restoring peace in Manipur as early as possible and ensuring their (refugees) return to their homes."

Cops refute claim of 'no ample proof' against WFI chief

STAFF REPORTER ■ NEW DELHI

The Delhi Police on Wednesday refuted reports which claimed that there was no adequate evidence against BJP MP and the Wrestling Federation of India chief Brij Bhushan Sharan Singh, saying the sexual harassment case against him is under consideration and the status report of the investigation will be submitted to court. The Delhi Police also cordoned off India

Gate and barred public entry to the memorial's lawns on Wednesday.

In a related development,

Delhi Commission for Women chief Swati Maliwal on Wednesday issued a notice to police seeking to file a case against a man who allegedly revealed the identity of a minor wrestler who has filed a sexual harassment complaint against Singh.

Earlier, official sources said police had not found sufficient evidence to buttress the allegations levelled against Singh by female wrestlers and that it will submit the report within 15

days. As the news came out in the media, the Delhi Police took to Twitter saying: "It is clarified that this news is 'wrong' and the investigation into this sensitive case is under progress with all sensitivity."

A police spokesperson also shared the same message with reporters, but after nearly an hour, the Delhi Police deleted its tweet. The public relations officer (PRO) also removed the message she had shared in the

official WhatsApp group for reporters.

Later, the police spokesperson shared another message in Hindi that read: "The cases filed by women wrestlers are still under consideration. Status reports are being filed before the court regarding the investigation in the said cases. As the cases are under investigation, it would be against the procedure to say anything before the report is filed in the court."

CAPSULE

AHMEDNAGAR. COLLEGE TO BE NAMED AFTER HOLKAR

The Maharashtra CM and the Deputy CM pay tribute to Ahilyadevi Holkar on her birth anniversary, in Ahmednagar on Wednesday PTI

Mumbai: In two simultaneous announcements, Maharashtra Chief Minister Eknath Shinde said that the Ahmednagar district will be renamed as 'Ahilyadevi Holkar Nagar' in memory of the great queen of Malwa, who ruled from 1767-1795, while the State Health Ministry named a new government medical college at Baramati after Ahilyadevi Holkar.

KHALISTANI SUPPORTERS HECKLE RAHUL AT EVENT
Santa Clara: Congress leader Rahul Gandhi was heckled by a group of Khalistani supporters who raised slogans against him and briefly interrupted his speech during an event here in the US state of California.

CONMAN SUKESH ALLEGES HARASSMENT BY JAILORS
New Delhi: The Delhi Lieutenant Governor office has forwarded a complaint by Sukesh Chandrashekar alleging "mental harassment" by prison staff to the chief secretary for action.

AAP wants power over babus to halt probes: Maken

Kejriwal seeks Cong stand, to meet Stalin, Soren over Ordinance issue

RAJESH KUMAR ■ NEW DELHI

Congress leader and former Union Minister Ajay Maken on Wednesday fired a fresh salvo at Delhi Chief Minister Arvind Kejriwal claiming the AAP convener was seeking "enhanced powers" over administrative services to stall probes into corruption allegations against his administration.

The AAP said, "This is the statement of an individual. What is the stand of the Congress party on this?"

Maken's jibe came amid Kejriwal's bid to ramp up support from Opposition Chief Ministers on the issue of control of services in the national Capital. Kejriwal will be meeting his Tamil Nadu and Jharkhand counterparts MK Stalin and Hemant Soren on Thursday and Friday respectively. In a related development, AIMIM president Asaduddin

Owaisi announced that his party would not support Kejriwal as the AAP chief follows "real Hindutva".

Reacting to a query on his views on the issue, Owaisi said that his party would not support to Kejriwal in Rajya Sabha. Owaisi said: "Why did Kejriwal support Narendra Modi when Article 370 was abrogated. Didn't he realise that one State was made into three UTs. He (Kejriwal) tried to show he is the biggest Hindu. When Article 370 was scrapped, he supported the BJP. Why did Kejriwal support the BJP on Article 370?"

As Kejriwal continues to reach out to Opposition leaders seeking support against the Centre's Ordinance wresting control of 'services' from the Delhi Government, leaders from the BJP and the Congress' Delhi units are unanimous in their offensive against Kejriwal over the issue.

India first to regulate anti-tobacco warnings on OTT platforms

PIONEER NEWS SERVICE ■ NEW DELHI

India has become the first country in the world to regulate anti-tobacco warnings on OTT platforms with the Union Health Ministry on Wednesday issuing a notification in this regard on the occasion of "World No Tobacco Day" that would be applicable after three months.

It notified the amended rules under the Cigarettes and Other Tobacco Products Act, 2004, making it mandatory for OTT platforms to display anti-tobacco warnings as are seen in movies screened in

theatres and TV programmes.

Soon after the issuance of notification, Dr Poonam Khetrapal Singh, Regional Director, WHO South East Asia Region welcomed the move saying, India has become the first country in the world to regulate anti-tobacco warnings on OTT platforms.

India's feat in 10 yrs astonishing: Morgan Stanley

PTI ■ NEW DELHI

India, under Prime Minister Narendra Modi, has transformed, gaining a position in the world order and becoming a key driver for Asia and global growth, said Morgan Stanley. In a report, Morgan Stanley said significant scepticism about India, particularly with overseas investors, ignores the significant changes that have taken place in India, especially since 2014.

Rejecting criticism that India has not delivered its potential (despite it being the second-fastest-growing economy and among the top-performing stock markets over the past 25 years) and that equity valuations are too rich, saying such a view ignores the sys-

tematic reforms in the last nine years.

"This India is different from what it was in 2013. In a short span of 10 years, India has gained positions in the world order with significant positive consequences for the macro and market outlook," it said. "India has transformed in less than a decade."

Listing the 10 big changes that have happened since Prime Minister Narendra Modi took office in 2014, the brokerage said bringing corporate tax at par with peers and infrastructure investment picking pace are one of the biggest supply-side policy reforms.

Also, the rising collection of GST — the uniform tax that replaced more than a dozen different central and state taxes

— and the rising share of digital transactions as a percentage of GDP indicate the formalisation of the economy.

Transfer of subsidies to accounts of beneficiaries, insolvency and bankruptcy code, flexible inflation targeting, focus on FDI, government support for corporate profits, a new law for real

estate sector and MNC sentiment at multi-year high were other significant changes, it said.

Manufacturing and capital spending as a percentage of GDP has continuously risen, Morgan Stanley said, adding export market share is projected to more than double to 4.5 per cent by 2031.

GDP grows 6.1% in March quarter, 7.2% in 2022-23

PTI ■ NEW DELHI

India's economy grew 6.1 per cent in the fourth quarter of 2022-23, pushing up the annual growth rate to 7.2 per cent, official data showed on Wednesday.

Growth in the January-March period was higher than the 4.5 per cent expansion in the previous October-December quarter of 2022-23.

The Gross Domestic Product (GDP) had expanded by 4 per cent in the January-March period of 2021-22,

according to data released by the National Statistical Office (NSO).

As per the data, the economy expanded 7.2 per cent in 2022-23 against a 9.1 per cent growth in 2021-22.

The NSO in its second advance estimate of national accounts had pegged the country's growth at 7 per cent for 2022-23.

Dhami govt announce scholarship scheme for college students

PNS ■ DEHRADUN

After initiating a scholarship scheme for the students of the government schools of the State, the Pushkar Singh Dhami government has come up with a scholarship plan for the students of the government colleges of the State. The proposal for the Chief Minister higher education meritorious scholarship scheme was approved by the State cabinet in its meeting held in the State secretariat on Wednesday. Informing about the decision, the chief secretary SS Sandhu said that the scheme would start from the academic session 2023-24. Under the scheme, the students securing first, second and third ranks in their respective colleges and streams at undergraduate level would be given a scholarship of Rs 3000, Rs 2000 and Rs 1500 per month respectively. In the Post Graduate (PG) level the scholarship would be Rs 5000 per month for the student securing first rank, Rs 3000 per month for second rank holder and Rs 2000 per month for the student holding third rank. The students would have to secure at least 60 per cent marks and should have more than 75 per cent of attendance to be eligible for scholarship. Apart from the monthly scholarship, a provision of a lump sum amount is also made for the college toppers in different

disciplines. In another decision the State cabinet approved the amendment in the regulation of the State Election Commissioner (SEC). The appointment of SEC would now be made for a period of six years and 66 years of age. The cabinet gave its nod for the proposal to increase the workforce in the district development authorities. The CS said that four to five new appointments would be made in every district to expedite the work of approval of maps by the authorities.

In another important decision, the State cabinet approved the plan to develop a new Chakrata Township. Under the plan, the Mussoorie Dehradun Development Authority (MDDA) would take over 40 villages near the hill station. The township would cover the

area from Purodi, Nagthatal, Lakhwad to Yamuna river. The Sub Divisional Magistrate (SDM) of Chakrata would be the joint secretary of the development area. The CS said that

in view of increased tourist activities, the cabinet approved the plan to reorganise the departmental structure of the Uttarakhand Tourism Development Council (UTDC). The council would now have 37 new posts (25 in districts and 12 in headquarters). The cabinet also approved the plan to transfer 26.08 hectare land near the International cricket stadium Gaulapar area of Haldwani for the setting up of the High Court (HC) which would be shifted from Nainital. The cabinet also gave its nod for the Uttarakhand sub mineral regulation 2023.

Meditation points to come up on Kedarnath tract

PNS ■ DEHRADUN

Paving the way for construction of meditation points in the Kedarnath shrine, the Uttarakhand government has decided to waive off the development charges on these structures. A decision in this regard was taken in the meeting of the State cabinet held on Wednesday. The department of culture of government of India is planning

to construct these points at Rambada, Bhimbali, Badi Lincholi and Chotti Lincholi on the Kedarnath bridge path. On the request of the Union government the State government waived off the Rs 75 Lakh development charge levied by the Kedarnath development authority on these four meditation points.

BJP announces schedule of mega outreach campaign in U'khand

PNS ■ DEHRADUN

The president of Uttarakhand BJP Mahendra Bhatt has said that Prime Minister Narendra Modi has given a lot to Uttarakhand and now it is the turn of the people of the State to return the favour. Interacting with the media persons on Wednesday, Bhatt said that the party is going to the masses through its mega outreach programme

Bhatt said that the objective of the programme is to provide information about the achievements of the Modi government to the head of every family and get a miss call from him on mobile number 9090902024.

He further informed that a total of seven media interactions, social media influencer meet and discussions with

with a request to provide support to PM Modi. Releasing the itinerary of the month-long programme, the president of State BJP said that the State has been divided into two clusters for successful conduction of the programme. He said that senior leader Ashwini Tyagi and Rekha Verma would be the incharges of Kumaon region while former deputy chief minister of Gujarat Nitin Patel and party MP Vipin Thakur would be the incharges of Garhwal region. They would be assisted by Suresh Bhatt (Kumaon) and Anil Goyal (Garhwal).

senior workers of the party would be held from June 1 to 5. Bhatt said that PM Modi would address a mega public rally in the State during the campaign and apart from it rallies would be organised in all five Parliamentary constituencies which would be attended by central leaders of the party.

The media in-charge Manvir Singh Chauhan, state spokesperson Suresh Joshi, Vinod Suyal, Vipin Kaithola and others were present on the occasion.

TSR to oversee BJP's outreach campaign in UP's 5 LS seats

PNS ■ DEHRADUN

The Bharatiya Janata Party (BJP) high command has entrusted the responsibility of five Lok Sabha seats in Uttar Pradesh to the former Uttarakhand Chief Minister Trivendra Singh Rawat in view of the upcoming Lok Sabha elections in 2024. BJP has decided to undertake a mega outreach programme in the all Lok Sabha constituencies in the country from June 1 to 30 and the party has given him to oversee the campaign in five parliamentary constituencies in UP (Azamgarh, Ballia, Bansgaon, Salempur and Deoria).

He will leave for UP on June 2 to start the mega outreach programme in Azamgarh on June 3. Informing about his schedule, TSR said that he will reach Banaras on June 2 by air in the afternoon. He will start his first public connect programme from the Azamgarh Lok Sabha constituency. Rawat said that he will make the public aware of the work done for the development of the constituencies and the country in the past nine years under the leadership of Prime Minister Narendra Modi.

He said that he will work for the programme as per the

party's strategy along with party workers and office bearers. He said that he will also go door-to-door to connect with the public and will also interact with enlightened and intellectual sections of the region, businessmen, farmers, youth and women among others to raise awareness about the works done by PM.

The party high command

has prepared a list of 1,000 eminent persons in each Lok Sabha constituency and he will also meet these people in all five constituencies given to him. BJP is in a strong position here and all these constituencies have their party's MLA but they will put extra effort to ensure the party wins the Lok Sabha elections with the maximum number of votes in 2024.

Modi govt apathetic to U'khand's development: Karan Mahara

PNS ■ DEHRADUN

At a time when the BJP government in the State is busy highlighting the developmental achievements of the Narendra Modi government in its nine years' tenure in the Centre, the Pradesh Congress Committee (PCC) president Karan Mahara alleged that the Modi government has remained apathetic to the developmental interests of Uttarakhand.

Citing instances of the Centre's apathy towards the development of the State, the Congress leader said that the

Modi government has not cleared funds regarding some ambitious development projects of the State which, if implemented, could have provided new means of income for the people. "This reveals that the Modi government is the least interested in the development of the State," he said.

Slamming the Centre further, Mahara said that as Uttarakhand has limited sources of income, the externally aided projects can prove instrumental in the

development of the State. "But the BJP government at the Centre has been sitting on such projects, harming the long-term developmental interest of the state. Even those externally aided projects which were earlier approved are in jeopardy for lack of funds and the funds spent earlier on the projects may go down the drain," he said, adding that as many as 11 Centrally aided projects worth Rs 20,236 crore have remained in pipeline because of ceiling imposed by the Centre and

it is uncertain whether they will ever be executed or not.

He further said that the Dhami government's boast of making Uttarakhand a model State rings hollow. "The ground reality stands in contradiction to the saffron boast of development," he said.

The State Congress president urges the Union finance minister to immediately release the funds for the already approved projects of the State.

Edu minister launches Samarth portal for college admissions

PNS ■ DEHRADUN

The students aspiring to take admissions in all the government and aided colleges of Uttarakhand and State universities can now use an integrated admission platform to get admitted in the desired course and institution. The higher education minister

launching of the Samarth portal is a major step in the direction of fulfilling the objective of 'one state, one entrance, one examination and one result' of the State government.

The minister added that the one degree college in

Dhan Singh Rawat launched the integrated Samarth portal at the State secretariat on Wednesday. Speaking on the occasion, Rawat said that the students would now not have to move from place to place for submitting admission forms. He said that the students registering themselves in the portal can apply in ten colleges of his/her choice. The admission would be given in the college and course of the choice of the student on the basis of merit. Apart from being convenient the portal would also save the money of the students. The minister said that the

every block of the State would be opened. He claimed that in Uttarakhand about 46 per cent students clearing class XII examination take admission in higher education institutes which is highest in the country. He said that the students in State can avail the benefit of e-granthalaya (digital library) on click of a mouse and can have access to more than 20 lakh books.

The secretary higher education Shailesh Bagoli, additional secretary Prashant Arya and others were present on the occasion.

Haier India's Kinouchi 5- Star air conditioner adjudged Best Innovative Product of the Year

PNS ■ DEHRADUN

Haier Appliances India (Haier India) announced that the Haier Kinouchi 5- Star Heavy Duty Pro air conditioner was awarded as the 'Best Innovative Product of the Year'. It cools the room 20 times faster and provides optimum cooling even at extreme temperatures of up to 60 degrees Celsius.

Speaking about the achievement, Haier India president Satish NS said, "We are focused on bringing the best-in-segment products across categories driven by well researched methodology, latest tech-

nologies and efficient manufacturing capabilities. With our presence in the Indian market for over two decades, we are proud to celebrate the Kinouchi 5- Star Heavy Duty Pro air

conditioners being awarded as the 'Best Innovative Product of the Year'.

In line with the 'Make in India' and 'Make for India' strategy, Haier has been expanding its product range in India, focusing on innovations that offer energy efficiency, durability, and convenience to its customers. The brand has successfully manufactured over one million frost self-clean air conditioners this summer season, owing to the surge in consumer demand for air conditioners that provide

energy-saving benefits and the convenience with self-cleaning features.

Surging Uttarakhand

INVESTORS' PARADISE

Acting upon the vision of PM Narendra Modi, CM Pushkar Singh Dhami led government, is surging ahead on all development parameters. The state government is committed to usher in industrial growth, with special focus on MSMEs

Growth agenda powered by double-engine government

“With a focused approach for inclusive growth of the state, the mantra that is being followed is, 'Reform-Perform-Transform'. Uttarakhand has the potential in diverse fields, and the same is being tapped so that it benefits the hardworking youth of the state seeking employment. To promote and develop a conducive ecosystem, investors and stakeholders have our support in all the endeavours and we are working for the state's development.”

-Pushkar Singh Dhami, Chief Minister, Uttarakhand

“The construction of a developed India for the 21st century rests primarily on two pillars — pride in our heritage, and second, every possible effort that is being made towards development. Today, both these pillars are being strengthened by the state of Uttarakhand. This decade surely will be the decade of Uttarakhand.”

-Narendra Modi, Prime Minister

To make India self-reliant by promoting local manufacturing, Prime Minister Narendra Modi's idea of Atmanirbhar Bharat seems to be bearing fruit in Uttarakhand. CM Pushkar Singh Dhami, too, has reiterated upon creating local employment opportunities.

So, towards fostering investment and encouraging micro, small, and medium enterprises, the government of Uttarakhand has shaped the 'MSME Policy 2015' to fit in the scheme of things.

MSMEs are critical in providing inclusive employment generation and their facilitation is top priority for the government. The MSME Policy aims at utilising local resources, generating employment opportunities for people, especially in hill regions, and also promoting self-employment. The policy provides a comprehensive package of incentives as well as other supports for the benefit of the public.

The policy shall remain in effect till June 30, 2023. Enterprises established before January 31, 2015, undergoing expansion/modernisation/ diversification (by way of addition of more than 25% on fixed capital investment), shall also be eligible for Capital Investment Subsidy, Interest Subsidy and Stamp Duty exemption under the scheme. Categorisation of various regions of the state has been done to decide the quantum of fiscal incentive. The state has been divided into five categories for the purpose of quantum of incentives/ subsidies as stated.

FISCAL INCENTIVES & CONCESSIONS

Investment Promotion Assistance (capital subsidy): The assistance (capital subsidy) shall be admissible on the fixed capital investment on plant & machinery and factory building/ work. For Category- A, 40% (max up to Rs 40 lakh); for Category B & B+, 35% (max up to Rs 35 lakh); for Category C, 30% (max up to Rs 30 lakh); and for Category D, 15% (max up to Rs 15 lakh).

*Capital investment subsidy shall be available only from one source, either from central government or state government sponsored capital investment subsidy schemes.

CATEGORY	INCLUDED REGION
Category A	Entire districts of Pithoragrah, Uttarkashi, Chamoli, Champawat, Rudrapur and Bageshwar
Category B	• Entire district of Almora • All hilly development blocks of district Pauri Garhwal, Tehri Garhwal. (Excluding regions under category B+) • All hilly development blocks of district Nainital and Dehradun. (Excluding regions under category B+)
*Category B+	• Kotdwar, Sigaddi and adjoining plain regions of Dugadda development block of district Pauri Garhwal • Dhalwala, Muni Ki Reti, Tapovan and adjoining plain regions of Fakot development block of District Tehri Garhwal • Kotabagh development block of district Nainital • Plain regions of Kalsi development block of district Dehradun
Category C	• Regions located above 650 mts from sea level in Raipur, Sahaspur, Vikasnagar and Doiwala development blocks of district Dehradun • Ramnagar and Halidwani development blocks of district Nainital
Category D	• Entire districts of Haridwar and Udham Singh Nagar • Remaining area of district Dehradun and Nainital (which are not included in category B, B+ and C)

Reimbursement of SGST

Reimbursement of the SGST after adjustment of input tax credit on B2C sale of the finished product for category A is 100% for the first 5 years and 90% thereafter; and for category B & B+ 100% for the first 5 years and 75% thereafter

Concession of stamp duty on registration of sale deed/ lease deed of land for category A is 100%; for category B & B+ is 100%; category C is 100%; and for category D is 50%

To promote the establishment of private industrial estates in hilly areas, a Special Integrated Industrial Promotion Policy was announced. This policy was proposed to encourage the private participation of the industrial sector

Setting up of industrial areas

In the special integrated industrial promotion policy announced for hilly and remote areas, on a total expenditure incurred on primary infrastructure facilities, like internal roads, drains, lighting etc, a provision of 50 per cent subsidy, up to Rs 50 lakh, was made. This has been done to promote the establishment of private industrial estates in hilly areas.

In view of the expiry of the special industrial package approved by the Government of India, and the limited availability of land for industries in the integrated industrial estates developed by SIDCUL, private participation has been encouraged for the establishment of industrial estates/ areas. The main provisions of this policy are as follows:

- For the establishment of a private industrial estate, it is necessary to have at least 30 acres in the plain area, and at least 2 acres or more, in the hilly area.
- In the private sector, for the devel-

opment of IT Park/ Biotechnology Park, it is necessary to have a minimum built-up area of 18,000 sqm, as per the prevailing building bye-laws of SIDA.

- For private industrial estate/ area, the investor/ promoter will arrange the land from his own resources.
- For the development of industrial estates/ areas, the SIDA/ unified building byelaws will have to be followed, and SIDA will act as the regulatory authority.
- It will be the responsibility of the promoter of the industrial estate to provide infrastructure facilities such as internal roads, drains, lighting, and other common facilities in such industrial estates.
- For the establishment of private industrial estates/ areas, the process of in-principle approval/ regulation will be of two stages. In the first phase, in-principle approval will be given for the establishment of the industrial estate. For the

establishment in the second phase, as per the layout plan approved by SIDA on the acquired land, after submission of completion certificate, a formal notification will be issued.

- For the development of infrastructure facilities outside private industrial estates/ areas, an Infrastructure Development Fund will be created with a fund of Rs 100 crore. This fund will be operated by SIDCUL. In relation to the total capital investment made in the private industrial location, 2 per cent will be given for infrastructure facilities outside the location.
- Under this policy, capital subsidy at the rate of Rs 10 lakh per acre will be given in four phases against the capital investment made on the infrastructure facilities within the locality, and for the establishment of CETP in private industrial localities, fixed capital will be provided. Subsidy will be given up to 40 per cent of the investment, up to a maximum of Rs 1 crore.
- This policy will be applicable from the date of issue of notification and will be effective for the next five years.

The Uttarakhand Logistics Policy-2023

ELIGIBLE ACTIVITIES

- Logistics park, inland container depot, warehouse, truck terminal, logistics vehicle, cold storage etc.

- Development of eco logistics or green logistics/ technology logistics facilities.

FINANCIAL INCENTIVES

- Financial incentive ranging from 10 to 25 per cent on project cost.
- Maximum grant of Rs 8 cr for project cost up to Rs 50 cr, maximum grant of Rs 24 cr for project cost of Rs 50 cr to Rs 150 cr, and maximum grant of Rs 32 cr for project cost above Rs 150 cr.
- For warehousing facility, 5,000 sq ft area with minimum investment of Rs 2.50 cr in hilly area, and 10,000 sq ft area required in plain area with minimum investment of Rs 5 cr.
- 45,000 sq ft land required for truck terminal with minimum investment of Rs 5 cr.
- Minimum area for cold storage 5,000 sq ft.

TOWARDS ENDORSING ENVIRONMENTAL PROTECTION, PLASTIC HAS BEEN BANNED IN UTTARAKHAND. HERE ARE SOME KEY POINTS FOR ONE-TIME USE OF PLASTIC IN THE STATE

SINGLE-USE PLASTIC BAN: POLICY BOOST FOR SUSTAINABLE SOLUTIONS

Single-use plastic, be it of any shape - plastic carry bags (with or without handles) of thickness, size and colour and non-woven poly single use bags made of polypropylene, thermocool (polystyrene), polyurethane, styrofoam and the like; disposable cutlery or plastic, such as plate trays, bowls, cups, glasses, spoons, forks, straws, knives, stirrers, etc - the production, purchase, sale, import, storage, use and supply of these have been banned in the state of Uttarakhand. In addition, by notification of the government dated August 12, 2021, the Ministry of Environment, Forest and Climate Change, India, from July 1, 2022, the manufacture, import, storage, distribution, sale and use of expanded polystyrene articles are also prohibited.

By banning the use, storage, manufacturing, buying, and selling of single-use plastic products, production work has stopped in the units engaged in the manufacture of these products in the state. Employment has also been affected by this. With a view to combating plastic waste pollution and eradicating single-use plastic by promoting innovation and entrepreneurship, and to encourage manufacturing of alternative products in the form of substitutes to single-use plastic, financial incentives have been provided in the MSME Policy 2015 (as amended from time to time). Towards giving incentives, this policy has been approved by

the cabinet as well.

Following provisions have been made for additional financial incentives:

1. INVESTMENT PROMOTION ASSISTANCE: Fixed capital made in plant and machinery and workshop building of the enterprise. Top-up investment incentive subsidy of 10% (maximum Rs 10 lakh) on investment.

2. INTEREST SUBSIDY: Payable on term loan taken from financial institution/ bank for establishment of enterprises an additional interest reimbursement assistance up to Rs 1 lakh/ annum/ per unit for C category districts, up to Rs 2 lakh/ annum/ per unit for D category districts, (as classified by the MSME policy).

3. REIMBURSEMENT OF SGST: In diversification of existing enterprise or establishment of new enterprise for manufacture of alternative products, the total gross SGST to be received by the state government from the SGST chargeable on new plant and machinery reimbursement assistance of 20 per cent (after adjustment of ITC). The benefits of all the above facilities will be available only to those units which have been affected or closed due to the ban order of the Central/ state government.

ODTP: Boosting local products

Taking into account the needs of the people, PM Narendra Modi's idea for sustainable development of rural India aims at espousing local products. The 'One District Two Products' scheme of the Uttarakhand government launched in October 2021, strives to promote and generate self-employment opportunities

PHOTO: DIPR UTTARAKHAND

Under the leadership of Prime Minister Narendra Modi, officials believe that the increase in business and demand will create employment (in packaging, testing, logistics) in the hill state at the local level, while the export of products will also go up.

The PM has urged tourists to shell out at least 5% of the total spending to purchase local products. Under Uttarakhand's 'One District Two Products' the local products specific to each district will be identified and two of them will be developed.

The scheme aims to give a boost to traditional manufacturing and the craft industry of the state and help promote them on a

national and international scale. It will also create employment opportunities for local farmers, artisans, craftsmen etc.

Everything, from sweets, snacks, herbal products to brass craft, woollens, etc, is being identified and promoted. Millet biscuits of Bageshwar, handicrafts from Champawat, baked goods and mushrooms from Dehradun, candles from Nainital, honey products from Haridwar, kidney beans from Musiari, temple artifacts from Rudrapur are some of the products identified for promotion under the scheme. The products will be developed based on the market demand with the help of modern technology, skill, and design development.

Prime Minister Narendra Modi has always emphasised that startups are a crucial component of Atmanirbhar Bharat. The Uttarakhand Startup Policy encompasses measures to support and facilitate all the key stakeholders in the start-up ecosystem. The policy contains provision for various incentives and assistance to startups, incubators, mentors, educational institutes, investors etc.

Under the leadership of chief minister Pushkar Singh Dhami, the state government has also launched startup official portal as a one-stop interactive platform for innovator, entrepreneurs, incubators, mentors, investors, educational institutes, students, and service providers etc to connect them with each other and keep themselves updated about the startup ecosystem.

After the launch of the Uttarakhand Startup Policy, the growth of the startup ecosystem in Uttarakhand accelerated significantly. From adding the number of startups, to number of incubators, mentor, investors, partners etc, the growth of all key stakeholders has been encouraging.

Key Points of Uttarakhand Startup Policy

- Under the new policy to set up 1,000 startups in five years, the objective is to set up at least one incubation centre in each district

Empowering startups, aiding entrepreneurship

Uttarakhand, once regarded as a late beginner in the startup ecosystem of the country, has seen rapid progress in past three years. While, till the end of the year 2018, there were only 100 startups in the state, the figure had gone beyond 500 by the end of 2021

- To registered startups Rs 15,000 monthly allowance per month, up to one year. Startups based on scheduled caste/ tribe/ divyang/ transgender or grassroots innovations will get Rs 20,000 monthly allowance
- Registered startups will get up to Rs 10 lakh, one-time seed funding. Startups based on scheduled caste/ tribe/ divyang/ transgender or grassroots innovations will get up to Rs 12.50 lakh seed funding
- For national patents, per patent Rs 1 lakh

help and for international patents Rs 5 lakh reimbursement

- Application for trademark and industrial design will invite an assistance of Rs 10,000
- One-time free-of-cost pre-incubation support and incubation assistance
- For the establishment of new incubation centers Rs 1 crore, and for expansion of existing incubation center capital subsidy up to Rs 50 lakh
- For the establishment of enterprise Rs 200 crore fund provision

MEGA INDUSTRIAL POLICIES SPURRING GROWTH

TO CONTRIBUTE TO THE ECONOMY OF THE STATE, THE PUSHKAR SINGH DHAMI LED GOVT HAS EMPHASISED ON THE SETTING UP OF INDUSTRIES IN UTTARAKHAND BY OFFERING INCENTIVES TO ENTREPRENEURS AND INDUSTRIES IN VARIOUS SECTORS

Under the investment policy, there are four categories getting benefits i.e., 7% interest subsidy and SGST concessions of 50% for all projects, except the large project category which has 30% concession. The four categories are:

- Large projects having investments of Rs 50 cr to Rs 75 cr
- Mega projects having investment of Rs 75 cr to Rs 200 cr
- Ultra mega projects having investments of Rs 200 cr to 400 cr
- Super ultra mega projects with investments above Rs 400 cr

Besides this, under the guidance of PM Narendra Modi, the government is backing the industrial sector with power assistance. The industries are reimbursed with Rs 1 per unit on the electricity bill for extended period of five years from the start of production. Biotechnology policy is working towards smoothing the process of innovation, development, deployment or commercialisation of new products, processes or services driven by technology or intellectual property.

The focus is on the Mega Food Parks (MFP) and the established units within them.

- 6% Interest subsidy (maximum of Rs 4 lakh) for five years
- 100% stamp duty exemption and purchase land and leasing properties
- 1.55/unit for irrigation purpose for food processing units
- 100% exemption on mandi fee on raw materials for a period of five year

Govt OK’s ₹1L-cr for massive co-op grain storage capacity

PIONEER NEWS SERVICE ■ NEW DELHI

The Union Cabinet on Wednesday approved a ₹1 lakh crore programme to create a massive grain storage capacity in the cooperative sector to reduce crop damages and prevent distress sales by farmers, besides strengthening the country’s food security. The Government is planning to create 700 lakh tonne of grain storage capacity in the cooperative sector over the next five years and said the move will also help in creating job opportunities in rural India.

Briefing media, Information and Broadcasting Minister Anurag Singh Thakur said the Cabinet has approved the “world’s largest grain storage plan in the cooperative sector”. On investment, he said the programme will start “with an expenditure of around Rs 1 lakh crore”. As per the plan, a godown of 2,000 tonne capacity will be established in each block.

This will help in strengthening the cooperative sector, as

Primary Agricultural Credit Societies (PACS) can diversify into the storage of food grains. There are 1 lakh PACS in the country, out of which around 63,000 are functional. Thakur said the country’s foodgrains production is around 3,100 lakh tonne, while the storage capacity is only 47 per cent of the total output.

In developed economies, he said, the storage capacities are higher than output. Asked about the source of funding, Thakur said the funds available in Ministries of agriculture, food processing and food and consumer affairs would be

utilised. At present, the total grain storage capacity in the country is about 1,450 lakh tonne, he said, adding that 700 lakh tonne storage capacity will now be established in the cooperative sector. This will take the total capacity to 2,150 lakh tonne.

On benefits, the minister said the creation of decentralised storage capacity at the local level would reduce food grain wastage and strengthen the food security of the country. This would hugely reduce the cost incurred in the transportation of food grains to procurement centres and again

transporting the stocks back from warehouses to ration shops, he said.

According to an official statement, the Cabinet approved the Constitution and Empowerment of an Inter-Ministerial Committee (IMC) for the facilitation of the ‘world’s largest grain storage plan in Cooperative Sector’ by the convergence of various schemes of the Ministry of Agriculture, Ministry of Consumer Affairs, Food and Public Distribution and Ministry of Food Processing Industries. To ensure time-bound and uniform implementation of the plan, the Ministry of Cooperation will implement a pilot project in at least 10 selected districts of different states/ UTs in the country. The IMC will be constituted under the Chairmanship of the Minister of Cooperation, with the Minister of Agriculture, Minister of Consumer Affairs, Food and Public Distribution, Minister of Food Processing Industries and Secretaries concerned as members.

Fish moving to colder regions, deep waters due to global warming: Study

PIONEER NEWS SERVICE ■ NEW DELHI

In a bid to stay cool as global warming makes their current swimming zones hot, the majority of fish populations in the sea are either moving towards colder waters nearer the north and south poles or deeper waters, as per a study on the impact of climate change on oceans.

The researchers from the University of Glasgow in the UK found that, in response to ocean warming, many marine fish populations are shifting towards the Earth’s poles or are moving to deeper waters.

For marine life such as fish, the temperature of the surrounding water affects critical functions such as metabolism, growth and reproduction.

Marine species also often have a very narrow livable temperature range making even small differences in the water impossible to cope with. As a result, marine life changes caused by global warming have been up to seven-fold faster than animal responses on land, the researchers said.

The study, published in the journal Global Change Biology, examined data on 115 species spanning all major oceanic regions, totalling 595 marine fish population responses to rising sea temperatures.

“We observed a striking trend (where) species living in areas that are warming faster are also showing the most rapid shifts in their geographical distributions,” said Carolin Dahms, lead author of the study.

“It’s possible that the rate of warming in some regions may be too fast for fish to adapt, and so relocating may be their best coping strategy. At the same time we see that their ability to do so is also impacted by other factors such as fishing, with commercially exploited species moving more slowly,” Dahms said.

Chopper MH-60R made maiden landing on aircraft carrier INS Vikrant: Navy

PIONEER NEWS SERVICE ■ NEW DELHI

In an effort to commence flight operations from the indigenously-designed and built aircraft carrier INS Vikrant, the maiden landing of MH-60R helicopter was undertaken on Tuesday, Navy officials said here on Wednesday.

“In another milestone for the Indian Navy, MH60R helicopter undertakes maiden landing on the indigenously designed and constructed aircraft carrier, INS Vikrant. A major boost to the Indian Navy’s Anti-Submarine Warfare and Fleet Support capability,” a Navy statement said.

The helicopter landing took place days after the aircraft carrier witnessed night landing of MG-29 K fighter jets last week.

Giving details of the landing in pitch dark conditions considered to be demanding, officials had said this landing was indicative of Navy’s impetus towards ‘aatmanirbharta’.

This challenging night landing trial also demonstrates the resolve, skill and professionalism of the Vikrant crew and the naval pilots, they added.

Defence Minister Rajnath Singh congratulated the Navy for undertaking a successful night landing and said, “This remarkable achievement is a testimony to the skills, perseverance and professionalism of the Vikrant crew and Naval pilots. Kudos to them.”

Landing fighter jets on a normal runway is different compared to landing on a flight deck of an aircraft carrier due to the shorter length of the deck.

Delhi HC refuses to quash CBI case against RAW official for revealing secrets in book

PIONEER NEWS SERVICE ■ NEW DELHI

The Delhi High Court on Wednesday refused to quash a CBI case registered against a former RAW official for allegedly revealing secret information in his book ‘India’s External Intelligence- Secrets of Research and Analysis Wing’. Justice Mukta Gupta dismissed the petition by Major-General (retired) VK Singh seeking quashing of the case against him under the Official Secrets Act, and said whether the revelations in the book were likely to affect the sovereignty, integrity and security of the country was a matter of trial and what prejudices national security cannot be decided by courts.

“It would be a matter of trial after the witnesses are examined to see whether the revelations by the petitioner in his book is likely to affect the sovereignty and integrity of

India and/or the security of the State. In view of the discussion aforesaid, this Court finds no merit in the petition. Petition and application are dismissed,” said the court.

The petitioner, who is a former joint secretary of India’s external spy agency, contended his intention to write the book was to highlight issues of lack of accountability and corruption in Research and Analysis Wing (RAW) and the allegation of revealing secrets harmful to the country’s security and sovereignty were totally baseless and unfounded. Singh retired from service in June 2002 and his book was published in June 2007. The

FIR was registered against him in 2008.

The court observed that although the “entire tenor” of the book highlighted certain irregularities at RAW, the grievance of the CBI was with respect to the use of names of officers, location of the places and recommendations of the Group of Ministers (GOM) etc. It noted the petitioner reproduced the recommendations of the GOM verbatim and that he has, in another matter, himself said similar revelations made by two other authors and publishers amounted to an offence under the Official Secrets Act.

“This Court ...Has noted that what prejudices the national security cannot be decided by the courts. Even in the present case, the recommendations of the GOM, which were deleted from publication, have been reproduced verbatim by the petitioner,” it stated.

PFI radicalisation of youth in Bihar town: NIA raids 25 spots

PNS ■ NEW DELHI

The National Investigation Agency (NIA) on Wednesday raided 25 locations in three States in connection with the 2022 Popular Front of India (PFI) Phulwari Sharif conspiracy to radicalise and train its cadres and members for carrying out acts of terror and violence.

The NIA conducted searches at the premises of suspects in Katihar district of Bihar, Dakshina Kannada, and Shimoga districts of Karnataka; and Kasaragod, Malappuram, Kozhikode and Thiruvananthapuram districts of Kerala, the NIA said.

A slew of digital devices, including mobile phones, hard disk, SIM cards, pen-drives, data cards, incriminating documents and materials related to

the banned organisation were seized during the searches.

The agency also seized Indian currency of the face value of ₹17,50,100. So far, a total of 85 locations have been raided during investigations of the case. Acting on a tip-off, Bihar police had carried out a raid at the rented premises of one Athar Parvez on July 11, 2022, and had seized incriminating articles related to PFI including a document titled “India 2047 Towards Rule of Islamic India, Internal Document: Not for circulation”.

Athar Parvej was arrested, along with other accused, identified as Md. Jalaluddin Khan, Arman Malik alias Imteyaz Anwer and Nooruddin Zangi alias Advocate Nooruddin.

A chargesheet was filed by NIA against these four on January 7, 2023.

India equipped with modern tech for any robust response if needed: Army chief

PIONEER NEWS SERVICE ■ NEW DELHI

With rapid modernization of the armed forces thereby enhancing their operational readiness, Army Chief General Manoj Pande said here on Wednesday India stands enabled not just for deterrence but also to undertake robust response if required. It was in apparent reference to China and Pakistan.

Speaking at the Brahmos User Meet, Pande said “Today the nation is at the cusp of transformational changes, we are witness to the growing stature of our country in the international environment and higher expectations from the world community. Our current growth and development, and the rising aspirations of our people, all reflect the confident optimism of a rising nation”

“Due to our legacy issues of unsettled borders and related

security challenges, possession of strategic deterrence instruments in our case is essential. And the three services of the defence forces as users of the Brahmos missile system, now stand enabled to not just stand deterrence but also to respond robustly when required,” the Army chief said.

Addressing the meet, IAF chief V R Chaudhari highlighted the role of BrahMos supersonic missile and said it has galvanized India’s firepower.

“As one of our most lethal air-combat assets, the BrahMos

supersonic missile has really galvanized the way we will equip ourselves with precision firepower in the coming years. Seeing the conflicts that are happening across the globe the importance of precision, long-range firepower can’t be underscored,” he said.

Chaudhari said the BrahMos missile has added to the deterrence capabilities of the IAF. “The combination of BrahMos on the Sukhoi Su-30 has really given us a tremendous capability that has enhanced our firepower. It has made the deterrence value of the IAF go up by leaps and bounds,” he said.

The Air Force Chief also said “As the situation unfolded in Northern borders three years ago, we realised that the potent weapon can be used very effectively for land attacks.” He also said smaller versions of the next-generation BrahMos missiles are being developed for fitment to other combat aircraft.

EAM to take part in BRICS conclave in SA, make maiden visit to Namibia

PNS ■ NEW DELHI

External Affairs Minister S Jaishankar will visit South Africa and Namibia starting Thursday. During his three-day visit to Capetown, he will participate in the Brazil, Russia, India, China and South Africa (BRICS) conclave.

Thereafter, Jaishankar will travel to Namibia for a visit from June 4 to 6, according to the Ministry of External Affairs (MEA) here on Wednesday.

Incidentally, it will be the first visit by an Indian External Affairs Minister to Namibia.

The BRICS brings together five of the largest developing countries of the world, representing 41 per cent of the global population, 24 per cent of the global GDP and 16 per cent of the global trade.

Besides, Jaishankar will also hold a bilateral meeting with his South African counterpart Naledi Pandor.

IAF’s Rafales carry out six-hour mission in Indian Ocean Region

PIONEER NEWS SERVICE ■ NEW DELHI

In an effort to hone combat-readiness of its Rafale jet fleet, IAF’s four Rafales recently carried out a “strategic” mission lasting more than six hours in the Indian Ocean Region (IOR). The sortie was a significant demonstration of the long range combat capabilities. The mission took place at a time when China has significantly increased its presence in the strategically important Indian Ocean.

Giving details of the mission, sources said here on Wednesday the Rafale jets took off from the Hasimara Air Force station in the eastern sector, carried out the mission involving various manoeuvres and simulated operations and returned to the base after meeting the desired results.

The mission by the four Rafale jets demonstrated their operational capabilities and readiness in dealing with various challenging situations, sources said but refrained from divulging details. The IAF also tweeted about the mission.

“Four IAF Rafales flew a long range mission for over six hours into the IOR. The aircraft ‘fought’ their way through a large force engagement en route to their Weapon Release Point. Pickle on time, weapon on target-the IAF way!” it said. The IAF too did not divulge the day of

the operation.

The Rafale jets are India’s first major acquisition of fighter planes in 23 years after the Sukhoi jets were imported from Russia. The French manufactured Rafale jets are capable of carrying a range of potent weapons.

At present, the IAF has 36 Rafale jets with one squadron (a squadron has 18 jets) based at Ambala to look after the western sector including China and Pakistan and the other squadron in Hasimara, West Bengal to cover the entire eastern sector facing China.

Induction process of Rafale jets started in 2020 and ended last year. India and France inked a government to government deal in 2016 for acquiring 36 Rafale jets from its manufacturer Dassault. The deal is worth over 7 billion Euros.

Prachanda in Delhi on four-day visit to India

Nepal PM to discuss host of issues with PM Modi; visit Ujjain, Indore

PNS/AGENCIES ■ NEW DELHI/KATHMANDU

Nepal Prime Minister Pushpa Kamal Dahal ‘Prachanda’ arrived here on Wednesday on his first overseas visit after assuming office in December last year. He was welcomed by Minister of State for External Affairs Meenakshi Lekhi at the airport. He is here on a four-day visit to India.

“The visit will impart renewed momentum to the close and unique India-Nepal relationship,” Ministry of External Affairs (MEA) spokesperson Arindam Bagchi tweeted.

Prachanda will hold delegation-level talks with Modi on June, according to reports from Kathmandu. The talks will be followed by a joint press meet by the two Prime Ministers. Modi will host a luncheon in honour of his counterpart from Nepal and his delegation.

Reports from Kathmandu said Prachanda will hold talks with Prime Minister Narendra Modi and other leaders to further strengthen the age-old, multifaceted and cordial ties.

The visiting Prime Minister will address the Indian business community and meet the Indian President and Vice President in New Delhi. The Prime Minister is also scheduled to visit Ujjain and Indore, Madhya Pradesh after completing his engagements in New Delhi.

The two Prime Ministers will remotely inaugurate the railway yard in Biratnagar, the Jaynagar-Janakpur railway that has been expanded up to the Bijalpura, and the integrated check posts in Biratnagar and Nepalgunj, it said.

Prachanda would also raise long-term power trade issues with New Delhi, hoping that this “bottleneck” will be sorted out and ensure that the Himalayan nation will be a favourable market for its surplus energy.

Junk food affects deep sleep, immunity: Study

PIONEER NEWS SERVICE ■ NEW DELHI

Consuming an unhealthy diet is associated with a lower quality of deep sleep, the third stage of sleep, repairs and restores necessary functions such as memory, muscle growth, and immunity.

Researchers at Uppsala University in Sweden analysed how junk food affects sleep. Healthy participants consumed an unhealthier as well as a healthier diet in a randomised order.

The study, recently published in the journal Obesity, shows that after eating the junk food, the quality of the participants’ deep sleep deteriorated, compared with those who followed the healthier diet.

“Both poor diet and poor sleep increase the risk of several public health conditions,” said Jonathan Cedernaes, Associate Professor at Uppsala University.

A total of 15 healthy normal-weight young men participated in two sessions of the study. Participants were first screened for aspects such as their sleep habits, which had to be normal and within the recommended range of seven to nine hours per night.

The participants were randomly given both a healthier diet and an unhealthy diet. The two diets contained the same number of calories, adjusted to each individual’s daily requirements.

Among other things, the unhealthier diet contained a higher content of sugar and saturated fat and more processed food items. Each diet was consumed for a week, while the participants’ sleep, activity and meal schedules were monitored at an individual level.

“What we saw was that the participants slept for the same amount of time when they consumed the two diets. This was the case both while they were following the diets, as well as after they had switched to another, identical diet,” said Cedernaes.

The researchers looked at slow-wave activity, a measure that can reflect how restorative deep sleep is.

“Intriguingly, we saw that deep sleep exhibited less slow-wave activity when the participants had eaten junk food, compared with consumption of healthier food,” Cedernaes said.

‘Drugs used in age-defying Botox can cause paralysis’

PIONEER NEWS SERVICE ■ NEW DELHI

Used for smoothening wrinkles, correcting frown lines, and combating the signs of aging, now it has been found that drugs applied for the Botox procedure can cause paralysis, as per a recent study by the researchers from the University of Queensland.

Botox is a toxin produced by the bacterium Clostridium botulinum. The treatment was initially developed for eye conditions such as strabismus and as a quick remedy to relieve migraine and chronic pain. However, in recent years, Botox treatment found uses in plastic

surgeries and gained popularity in the cosmetic industry.

Although muscle paralysis was a known side effect of Botox treatment, earlier research could not identify how the neurotoxin worked to relax muscles.

In the latest study, the researchers evaluated how Clostridium botulinum damages the communication between the brain neurons, resulting in paralysis.

“We used super-resolution microscopy to show that a receptor called Synaptotagmin 1 binds to two other previously known clostridial neurotoxin receptors to form a tiny complex that sits on the plas-

ma membrane of neurons,” Frederic Meunier, a lead-author of the study, said.

“The toxin hijacks this complex and enters the synaptic vesicles, which store neurotransmitters critical to the communication between neurons. Botox then interrupts the com-

munication between nerves and muscle cells, causing paralysis,” Meunier explained.

The discovery also opens the potential to identify new therapeutic targets for effective treatments of botulism--a rare but potentially fatal bacterial infection caused by Clostridium botulinum.

“Clostridial neurotoxins are among the most potent protein toxins known to humans. We now have a full picture of how these toxins are internalized to intoxicate neurons at therapeutically relevant concentrations,” Dr. Merja Joensuu, another co-researcher of the study from UQ’s Queensland Brain Institute, said.

PNS ■ DEHRADUN

The State meteorological centre has issued an orange

The Met department further issued a yellow warning for Kumaon region, saying that thunderstorms accompanied by lightning/hail and gusty wind (40-50 kmph) is likely to lash isolated places in some districts of the region.

PNS ■ DEHRADUN

Speaking on the occasion, the managing director CSC, Rakesh said that the network of Patanjali is spread over more than 700 districts of the

PNS ■ DEHRADUN

Joshi, executive director (Tehri Complex and Arunachal Pradesh Projects) and other senior officials of THDCIL and M/s GEPIL were present.

Joshi said that with this, THDCIL has progressed one step closer towards the commissioning of India's first variable speed pumped storage plant (4X250 MW), adding that THDCIL is now one of the premier power generators in the country with installed capacity of 1587 MW with the commissioning of Tehri Dam HPP (1000MW) and Koteswar HEP (400MW) in Uttarakhand with others.

control of the bus and it fell about 20 meters below the main road breaking the side iron railing. They said that two people- the bus conductor identified as Vishwas Bahadur (35) and a 10-month-old girl died on the spot, four sustained serious injuries while the remaining sustained

PNS ■ DEHRADUN

The Municipal Corporation of Dehradun (MCD) has recovered property tax of Rs 20 crore in the past two months. This is the first time the corporation has collected such a huge amount in such a short period, said the municipal tax superintendent Dharmesh Painuly. The corporation collected a property tax of over Rs 52 crore in the last financial year which is the maximum revenue collection done by the tax section so far. The corporation this year is also making efforts to collect maximum revenue via the property tax, especially from non-residential properties of the city as they constitute a large part of the revenue. Painuly said that the corporation has sent nearly 3,500 bills to non-residential establishments since April and has collected revenue of more than Rs 20 crore. He said that the corporation made several changes last year like making the website user-friendly for tax submission and introduc-

minor injuries. The police said that the State Disaster Response Force (SDRF) and Fire Service personnel immediately reached the spot to rescue injured people after receiving information. The police said 37 patients were immediately admitted to the hospital and two were declared brought dead by doctors. They said that four critically injured passengers were admitted to AIIMS to get the required treatment. Though it appears that the bus driver allegedly lost control of the bus that led to the accident, the police are investigating the matter, said the officials.

ing a digital mode of payments in MCD premises to ensure easy and safe transactions that immensely helped in tax collection through online and offline modes. Tax has continued to help in tax collection this financial year too. He said that the Geographic Information System (GIS) based survey of all buildings has also been completed in 55 wards out of 100 and the remaining are expected to be finished this year too. He said that the tax section will also use this data from 55 wards to send notices to property tax defaulters. He said that with the completion of the GIS-based survey, the property tax collection process will be more transparent for taxpayers as well as the officials. All data will be made available to the online portal of the urban development directorate for a quick assessment and appropriate calculation of property tax after the completion of the survey, added Painuly.

PNS ■ DEHRADUN

The mayor Sunil Uniyal 'Gama' on Wednesday cancelled all recovery challans (RCs) worth over Rs 40 lakh imposed on 124 Bulk Waste Generators (BWGs) by the Municipal Corporation of Dehradun (MCD) in the past two months. He took this decision after some representatives of housing societies approached him and appealed to cancel these RCs. He directed the officials concerned to cancel all RCs of BWGs and also asked all establishments to segregate wet and dry garbage at the source and dispose of it as per the rules. He also directed the officials concerned to give training regarding appropriate segregation and disposal practices of garbage to housing societies. The corporation had imposed a fine on a total of 124 BWGs that mostly include apartment buildings and housing societies for not disposing of their bulk waste as per the rules and not presenting a waste disposal plan as per the Municipal Solid Waste (MSW) rules. The MCD imposed a penalty of Rs 10,000 each on 116 BWGs and Rs one lakh each on eight housing societies for violations under MSW rules. After these establishments continued to ignore multiple warnings from the corporation seriously, the officials decided to recover the penalty via RC. All offenders were expected to deposit RCs by Wednesday which was the

last day to submit them at the Collectorate as per the officials but the mayor cancelled it. However, the chief municipal health officer Dr Avinash Khanna clarified that the mayor has cancelled the RCs and not the initial penalties imposed by MCD. He said that if these establishments fail to present a garbage disposal plan for bulk waste generated in their respective premises in 15 days, they will have to submit the fine and face legal consequences.

Check hyperbole

Rahul mocks and slams PM Modi at a gathering of Indian diaspora in San Francisco, US

Congress leader Rahul Gandhi is at it again: he has lambasted and lampooned Prime Minister Narendra Modi on foreign soil. Addressing a gathering of Indian diaspora in San Francisco, US, he ridiculed Modi for having the pretensions of being omniscient. In fact, he mocked the top leaders of the Bharatiya Janata Party of being delusional about their knowledge: “some groups of India think that they know everything. Even if they have a conversation with God, they might explain to him.” He added, “Prime Minister is one of them.” Deriding BJP leaders, Rahul continued: “They can speak to scientists and explain science to them. They can explain history to historians, warfare to the army and flying to the air force. But at the heart of it, they don’t know anything.” Barbed sarcasm can be effective, but Rahul seems to be going too far. His claim that the “normal instruments for doing politics were not working anymore.” He also blamed the Modi Government for threatening people and deploying Central agencies against political opponents. The use of law enforcement bodies to harass the Opposition is old in India; the present dispensation is no exception. But should the underbelly of our country be put on showcase? There is much that is wrong with governance and other aspects of India, but a senior Opposition leader advertising that in the United States doesn’t make much sense. Rahul may succeed in scoring a few political points, but not without damage to India’s image in the world.

To that extent, the BJP’s sharp reaction to his remarks is justified. Information & Broadcasting Minister Anurag Thakur said, “During his foreign visits, Rahul Gandhi insults India, which is unacceptable. He wants to insult PM Modi but ends up insulting India, questioning India’s progress. He is trying to tarnish India at a time the world is acknowledging our growing stature.” Just as in Rahul’s comment, there is also an element of hyperbole in Thakur’s reaction too. Rahul’s remarks are bad for India’s image, but not an insult. Besides, Congress leaders are not the only ones who discuss domestic matters abroad; PM Modi has also criticised previous governments on foreign soil in the past. Indian politicians will do well by scaling down the ingredient of hyperbole in political debate. Gruesome murder of a minor girl in Delhi doesn’t mean that there is no fear of the police in the national capital; unjust arrest of a journalist doesn’t imply that the entire press has been gagged in the country; India leaving the UK behind in terms of GDP doesn’t mean that we have become a developed nation. Also, politicians should grow a thicker skin; every adverse comment their adversaries make against them shouldn’t become an excuse to indulge in rant and cant. And they should also ensure that domestic political disputes are not internationalised.

Costly higher education a problem

The escalating cost of education is denying higher education to students who wish to pursue it but cannot afford its prohibitive cost

Baban Bhagat, from Chand Kewari village in Muzaffarpur district in Bihar, works as a daily wage labourer in the nearby town. His meagre income barely covers the subsistence needs of his family, let alone the educational aspirations of his two sons. While his elder son’s academic journey abruptly ended after completing Class 12, his younger son, due to lack of money, just managed to get enrolled in Class 12. “I have tried my best to provide education to both my sons, but our financial circumstances render it impossible for me to bear the equivalent expenses for both of them, even for an undergraduate program at an ordinary institution,” lamented Baban. Presently, his elder son, a high school graduate, has also become a labourer, trapped in the same cycle of limited opportunities.

A recent official survey reveals how a significant increase in education expenditure in India, has placed a substantial financial burden on households. Particularly for those households from rural areas with minimal income, educating their chil-

dren becomes a burden than an investment, especially when it comes to girls. According to Pankaj Kumar, a resident of the same village, due to prevailing poverty, most children can only study up to the 10th or 12th standard. With the increase in enrollment and examination fees for graduation in government colleges, dropout rates have further aggravated. Awadhesh Kumar Das who works as a teacher in a private school in Muzaffarpur, emphasized that children from economically disadvantaged backgrounds face significant challenges when it comes to pursuing education in fields like engineering, medicine, or enrolling in coaching classes for exams like the Union Public Service Commission (UPSC) or Bihar Public Service Commission (BPSC). This difficulty stems from the increasing privatization of

educational institutions. In recent times, several reports have raised concerns about the potential impact of the New Education Policy on the privatization of higher education, leading to increased costs that could make education unaffordable for many students. According to a report, the National Education Policy is designed to support a neo-colonial economic order, favouring those from affluent backgrounds while potentially discriminating against the poor and oppressed. Addressing similar concerns, Devesh Chandra, the former District Councilor of Muzaffarpur, expressed his apprehension that the new education policy could make it increasingly difficult for underprivileged children to access higher education. He emphasized the need for a comprehensive policy that ensures equal educational opportunities for all individuals, regardless of their socio-economic background. On the other hand, Ajay Kumar Singh, the District Education Officer of Muzaffarpur, reassures that the new education policy is designed to provide equi-

table education to everyone. Whereas highlighting on dropping out of girls from higher education, Dr Shri Bhagwan Rai, an Assistant Professor at Babasaheb Bhimrao Ambedkar Bihar University, Muzaffarpur, believes the government and parents share equal responsibility for this situation. “The government can be held accountable for the expensive nature of education, as it has become a major obstacle for girls to pursue higher education. Additionally, parents cannot be absolved of their role in perpetuating gender disparities by treating the education of boys and girls differently,” the Professor expressed. The escalating cost of education has undoubtedly presented formidable challenges for individuals seeking higher education, particularly impacting girls. It is crucial to recognize that girls are disproportionately affected by these financial barriers and encounter significant limitations in the absence of accessible, free, and affordable education. SAPNA KUMARI

Modi’s charisma transcends borders

PM Modi’s recent tour of Japan, Papua New Guinea and Australia can be seen as a marker of his growing popularity and influence

In a world filled with diverse cultures, ideologies, and ambitions, PM Modi Ji’s engagements have gone beyond the realm of mere diplomacy, becoming more of a celebration of India’s global leadership and cultural heritage.

The immense respect and goodwill that the world leaders feel for India and its leader, PM Modi Ji is reflected in their various extraordinary gestures—be it President Biden seeking his autograph or Prime Minister James Marape of Papua New Guinea showing his respect by touching PM Modi’s feet at the airport or Australian PM Albanese referring to PM Modi as ‘The Boss’.

The New Zealand Prime Minister specially came all the way down to Papua New Guinea to meet our leader, demonstrating a deep appreciation for India’s leadership. All these countries may have varying opinions on several issues, but such heartfelt gestures highlight PM Modi Ji’s popularity and India’s growing stature.

Several unprecedented honours came India’s way too. The highest awards of Papua New Guinea (Companion of the Order of Logohu) and Fiji (Companion of the Order of Fiji) were conferred upon PM Modi Ji, symbolizing his tireless efforts in championing the unity of Pacific Island countries and spearheading the cause of the Global South. Papua New Guinea’s Prime Minister, James Marape, referred to PM Modiji as the ‘leader of the Global South’. These accolades firmly establish PM Modi Ji’s standing as an international leader and further enhance India’s reputation on the world stage.

At the community reception in Australia, leaders of all hues—the Australian PM – accompanied by the Leader of the Opposition, Foreign Minister, former Prime Minister, and several other ministers – walked hand in hand with PM Modi Ji. The illumination of the Sydney Opera House in the colours of the Indian flag, and the renaming of Harris Park to Little India further emphasize the influence of India and its diaspora in Australia.

Great Push for Indian Culture, Values, and Ethos.

PM Modi Ji also effectively utilized global platforms to showcase Indian culture, values, and ethos.

By wearing recycled materials at the G7 and the Forum for India–Pacific Islands Cooperation (FIPIC), and hosting a lunch for FIPIC leaders featuring Indian cuisine and millet-based items, PM Modi Ji showcased India’s commitment to sustainability. Hiroshima which was the first to face atomic bombing in the history of mankind, today serves as the most fitting setting for commemorating the legacy of Mahatma Gandhi and PM Modi Ji’s unveiling his bust in this historic city symbolises the message of non-violence that Gandhi ji stood for.

Also, the release of the timeless Tamil classic, “Thirukkural,” in the Tok Pisin language, was an effort to bring Indian thought and culture closer to the people of Papua New Guinea. In his engagements with industry leaders, scientists, academicians, and cultural icons, PM Modi Ji positioned India as the world’s preferred investment destination, fostering economic growth and job creation.

Nobel Laureate Brian Paul Schmidt, who met the PM, highlighted India’s scientific prowess and its ability to undertake world-class

“THE WORLD TODAY LOOKS AT INDIA WITH AWE AND RESPECT. UNDER PM MODI’S LEADERSHIP, INDIA’S ASCENT TO BECOMING THE 5TH LARGEST ECONOMY HAS BEEN SWIFT AND PROMISES PEACE, OPPORTUNITY, DEVELOPMENT, AND SUSTAINABILITY”

research. “PM Modi is one of the most visible leaders that India has had in my lifetime. He takes an interest in whoever he talks to, whether it’s the President of USA or someone he meets for first time from society. India’s ability to do world class science has become an order of magnitude higher,” he told reporters after the meeting.

In Professor Toby Walsh’s words, India is “absolutely world’s most extraordinary democracy. UPI is a wonderful example of how India can do things itself” During his diplomatic parleys in the Quad, FIPIC, and G7 summits, the Prime Minister underscored India’s active role in shaping the global agenda and fostering collaborations among nations. He interacted with over two dozen world leaders throughout his visits. The community event in Sydney was attended by around 20 thousand people.

In contrast to some leaders who blame others or badmouth the country, PM Modi Ji’s speech singularly focussed on the India Story, highlighting its progress, achievements, and aspirations. From Japan to Papua New Guinea and Australia, the newspaper headlines widely featured PM Modi Ji, capturing the collective attention and fascination of

readers everywhere. The world today looks at India with awe and respect. Under PM Modi Ji’s leadership, India’s ascent to becoming the 5th largest economy has been swift and promises peace, opportunity, development, and sustainability.

Opposition politicians, like Rahul Gandhi, have developed a regrettable habit of resorting to abuse and falsehoods. They regularly undermine India’s image, and our democracy and heap insults on our Prime Minister, our government and also our nation and leave no stones unturned to downplay India’s staggering achievements. By this, they are doing a huge disservice to the nation and people will never forgive them.

PM Modi Ji’s leadership, diplomacy, and vision have strengthened international relations, garnered admiration from world leaders, attracted investments, and fuelled economic expansion. Without indulging in such petty politicking, we all must work together for India’s progress, celebrate its growth and development, in line with the Prime Minister’s principle of Sabka Saath Sabka Vikas Sabka Vishwas and Sabka Prayas.

LETTERS TO THE EDITOR

They are super kings!

The IPL meant CSK aka Chennai Super Kings for many cricket lovers. There is a worthy reason why this team is titled Super Kings. Yes, they are the super kings of the Indian Premier League, as recently the team clinched the Fifth trophy marking one of a kind triumph for itself. MS Dhoni, Ravindra Jadeja and Kadamli like legendary stars proofed that old is gold for IPL.

Despite fans missing the Helicopter shots of MS Dhoni in T-20, ODI and World Cup-like events, fans are lucky to never miss his magic on IPL pitches. It’s a great victory of the Chennai Super Kings over the Gujrat Titans of Hardik Pandya. It’s time for celebration for entire cricket lovers, Dhoni lovers and CSK lovers.

Ganapathi Bhat | Akola

Nerves said many, temperament said some, but Prannoy overcame all to finally come up with trumps.

The Indian champion has, however, continuously ranked within the top ten in the world. From number nine, now he is ranked seven. En route to the Malaysia Masters title, the hero of India’s 2022 Thomas Cup win had the better of All England Champion Chinese Li Shifeng in round 16 and almost pipped Indonesian Christian Adinata who retired hurt in the semis. Again big names were scalped by Prannoy; the only difference this time was that he went all the way to finish at the top. After Prakash Padukone and Pullela Gopichand, no Indian has been able to lift the All-England title. Lakshya Sen came within striking distance of the crown but fell at the final hurdle in 2022.

Ganapathi Bhat |Akola

PROOF OF POPULARITY

Sir — If any foreign leader touches the feet of any Indian leader or issues any

statement in praise of him, religiously it needs to be portrayed as the “ultimate proof” of his “worldwide popularity and the “impeccable stature” being enjoyed by him in the international sphere! However, when internationally reputed newspapers and journalists speak of the deluge of intolerance as being practised during the “regime” of “Good Days” the “saffron mainstream” immediately brands it as “colonial mindset” and “conspiracy” of the West! As far as the mindset of “Head I win, Tail You Lose” is concerned, the sycophants simply have nopeers!

It is high time these set of hypocrites be sternly told that mere popularity does not necessarily bear proof of one’s “greatness” “efficiency” or “success”. Also, utterances repeated long shrill and continuous enough do not render utter falsehood into “truth”!

FIRST COLUMN

EFFICACY OF SATSANG MUST BE UNDERSTOOD

Satsang is association with good people; It is also about the inner quality of ‘sattva’ or purity

RAVI VALLURI

It was a desolate sight to see my nonagenarian grandmother. A deeply religious person whose life was dedicated to the Almighty, she lay afflicted by Alzheimer’s, in an incapacitated condition in a small nursing home in Bangalore. There was just a nurse to attend to her needs. Misty-eyed, I entered the room along with two gentlemen. Grandma was quite unexpectedly injected with vital prana as she stared at us. “Moorty garu!” she exclaimed, much to the astonishment of the nurse who was involved in an animated conversation with Moorty garu. As we left, my grandmother looked forlorn and her benefactor blessed her. A somnolent 94-year-old woman abruptly awakening upon seeing Shri VSR Moorty, obviously meant that the satsangs he rendered were exemplary. There was one rendition of the Narada Bhakti sutras at our house in Hyderabad which is etched in my memory bank. The year was 2014 and it was a crisp and cool morning in early November. I was posted in Secunderabad on South Central Railway. As I was poring over files, I walked Shri VSR Moorty. Moorty Garu focused his attention on my computer screen. Pictures of Gurudev Sri Sri Ravi Shankar were flipping across the monitor. He looked at Gurudev’s photograph quite intently and uttered, “Ravi, I would like to have an interaction with Gururji.” This interaction or satsang would be recorded by Sri Venkateswara Bhakti Channel (SVBC). My jaws fell in astonishment. Millions of devotees of Gurudev wait to have a glimpse of the Master and I had this onerous task of organising an interaction with the Master himself. But that is a challenge for any seeker and I promptly sent a mail to the Master and his secretariat seeking an appointment.

He then shared, “Ravi, the Sankalpa needs to be pure, rest Almighty God will take ensure that things fall in place, Sai Ram.” I was stunned that evening when the Secretariat agreed to fix the appointment at such short notice. We made the peregrination to the Bangalore Ashram of the Art of Living along with the staff from SVBC. For three days and three nights, we were witness to something transcendental. The interaction ranged on a variety of subjects from ancient Hindu practices, and various schools of Hindu philosophy to the present day. It is well-nigh impossible to decode the divine and pen the interaction. A senior teacher of the Art of Living, Shri Vinod Menon was to tell Moorty Garu, “This is the closest one could unravel divinity, you are indeed blessed, coming so close to the Divine.” In the amphitheatre on my mind the graphic scene of BR Chopra’s Mahabharata, the television serial played out, where Lord Krishna tells Bhishma, “Arjun woh nar hai jo Narayan ke darshan karwayega.” (That is, Arjuna is the person who will be the medium to reveal the resplendence of Narayana himself). So, this was satsang. . . . What does one mean by Satsang? (I quote Yogapedia to describe Satsang) Satsang is a Sanskrit term derived from two roots: sat meaning true and sangha meaning community, company, or association. It can be translated as “associating with good people” or simply “being in the company of truth.” It refers to the act of gathering like-minded, uplifting people, especially those on a spiritual path. Satsang is associated with the inner quality of sattva (goodness or purity), which is one of the three gunas (natural attributes) alongside rajas (passion) and tamas (inactivity). A sattvic person makes a natural Satsangi, or “seeker of truth.” So let us all be satsangis in quest of the quintessential truth. (The writer is an author and a spiritual teacher)

Rs 2k note exchange: Demonetisation 2.0

Rs 2000 note exchange will not have any impact on black money. It will only help hoarders by exchanging Rs 2000 notes without disclosing their identity

UTTAM GUPTA

In its decision to withdraw Rs 2000 currency notes from circulation announced on May 19, 2023, the Reserve Bank of India (RBI) has stated that they will continue to be legal tender. The notification issued in this regard states:- “...in pursuance of the “Clean Note Policy” of the RBI it has been decided to withdraw the Rs 2000 denomination banknotes from circulation. The banknotes in Rs 2000 denomination will continue to be legal tender.” From the above, prima facie one gets a sense that it is not a demonetization exercise as it happened over six years ago when, Prime Minister Narendra Modi declared on November 8, 2016, that Rs 500 and Rs 1000 denomination currency notes won’t be legal tender with immediate effect. If not demonetization then, what is? It is merely a “Clean Note Policy” - as the RBI puts it? The central banks’ argument runs something like this: high denomination notes such as Rs 2000 is normally avoided for cash transactions. Yet, these had to be brought in following the note ban of 2016 to address the logistics of swapping the mammoth old Rs 500/1000 notes for new currency within a short time frame and thus minimize economic disruption. Nearly 90 per cent of the Rs 2000 notes valued at Rs 673,000 crore at their peak as on March 31, 2018, were issued from November 8, 2016, to March 31, 2017. The intent was to phase them out after the RBI had pumped in a sufficient stock of lower denomination Rs 500 (albeit new) notes to meet the transactional requirements of the economy. Already, the stock of Rs 2000 notes has declined from Rs 673,000 crore representing 37.3 per cent of notes in circulation on March 31, 2018, to Rs 362,000 crore constituting only 10.8 per cent of notes in circulation on March 31, 2023. Further, these being at the end of their estimated

“

THE CIRCULAR ALSO ALLOWS A PERSON TO DEPOSIT RS 2000 NOTES INTO HIS BANK ACCOUNT WITHOUT ANY LIMIT. FOR DEPOSITS ABOVE A SPECIFIED LIMIT, THE BANK IS REQUIRED TO REPORT TO THE INCOME TAX DEPARTMENT

(The writer is a policy analyst)

lifespan of 4 - 5 years and the stock of Rs 500 denominations adequate to meet the currency requirement of the public, it was logical to completely phase out the Rs 2000 note. The RBI circular says that beginning May 23, 2023, the public may deposit Rs 2,000 banknotes into their bank accounts and or exchange them with banknotes of other denominations up to a limit of ten notes of Rs 20,000 value ‘at a time’ in banks until September 30, 2023. The facility for the exchange will also be provided at the 19 Regional Offices (ROs) of RBI having Issue Departments. First, holders of Rs 2000 notes get 131 days to get rid of them which is two-and-a-half times the time given to the holders of Rs 500/1000 notes in 2016 i.e. 52 days to exchange them with the new currency. Second, Rs 2000 notes are only 10.8 per cent of the currency in circulation value-wise (as of March 31, 2023) against old Rs 500/1000 notes being a whopping 86 per cent of the corresponding figure in 2016, this time the load on the system is much less. Can we simply treat this as a routine exercise? At a fundamental level, the ‘withdrawal’ of the Rs 2000 banknotes - an exercise that the RBI hopes will get consummated on September 30, 2023 - doesn’t gel with its reiteration that these notes will remain legal tender even after September 30. Imagine a scenario whereby all of the Rs 2000 notes come back to the banks by this deadline then, any talk of whether it will remain legal tender is irrelevant. Look at it from another angle.

If, the intention is to maintain the legal status of the Rs 2000 note even after September 30, 2023, implying that it will continue to be accepted for settlement of payments, then why would holders come forward for exchange or deposit in the bank account? To understand the real intent behind the RBI move, we need to know to what use Rs 2000 notes worth Rs 362,000 crore (as on March 31, 2023) are being put. Do these support legitimate economic activity or people are simply using them to ‘hoard their unaccounted income? It can’t be the former; had it been the case then, given the RBI issuing predominantly Rs 500 notes after March 31, 2017, Rs 2000 notes would have disappeared by now. The bulk of these notes are likely held as black money. Daily reports of enforcement agencies raids yielding a mountain of cash from the premises of dubious bureaucrats, politicians, businesspersons and so on confirm this. Unfortunately, the measures outlined in the RBI circular and subsequent clarifications given by the governor and public sector banks (PSBs) such as the State Bank of India (SBI) fail to address this menace. The RBI allows a person to exchange Rs 2,000 banknotes with other denominations up to a limit of ten notes of Rs 20,000 value ‘at a time’ in banks. While exchanging he is not required to share his identity. This means he can visit a branch any number of times in a day and increase the value of exchange. By doing say ten trips, he can get rid of Rs 2 lakhs worth of black money in a day. If this is repeated for 131 days, he can dis-

pose of Rs 262 lakh. Under such an arrangement which doesn’t insist on the identity at the time of exchange, a person holding say Rs 100 crore in Rs 2000 notes as ‘unaccounted cash’ can get this exchanged with smaller denominations of Rs 500/100 notes by hiring a number of persons to visit branches of any number of banks and repeat for over 4 months. With anonymity preserved, he could go for a less tedious process. He could simply conspire with the bank manager - under a quid pro quo - to have those Rs 100 crore exchanged. All that the latter needs to do is to show in records multiple entries of Rs 20,000 each. The circular also allows a person to deposit Rs 2000 notes into his bank account without any limit. For deposits above a specified limit (Rs 10 lakh in a savings account), the bank is required to report to the income tax department. But, the hoarder of black cash won’t take this route when the other option (read: exchange) where he can remain anonymous, is available. To conclude, far from combating black money, the RBI operation will only help hoarders keep it in a safer zone by exchanging Rs 2000 notes with smaller denomination Rs 500 notes without having to disclose their identity. The RBI/government should go for a course correction. First, it should say upfront that ‘from October 1, 2023, Rs 2000 note won’t be legal tender. Second, for every exchange, the bank should insist on a person’s identity either PAN or Aadhaar. Third, for depositing money in the account, the banks should strictly enforce KYC norms.

Manual scavenging is a curse, must end now

To end this menace Govt must provide alternative employment opportunities and encourage mechanised cleaning technologies

“Death does not discriminate, but the system does” cried out Rukmani Devi, a grief-stricken relative who lost her cousin, Nand Kushwaha, and his son Nitesh, in a horrifying incident that unfolded in Bahora Ramnagar village. The tight-knit community mourns the loss of four lives, all victims of the archaic and inhumane practice of manual scavenging. On a sombre Sunday morning, tragedy struck as these brave souls descended into a septic tank, unaware of the deadly consequences that awaited them. The incident occurred under the jurisdiction of the Nebua Naurangia police station in the Kushinagar district of Uttar Pradesh, a region plagued by the persisting men-

BISWAJEET BANERJEE

(Writer is Political Editor, The Pioneer, Lucknow)

ace of manual scavenging. Despite numerous promises and legislative measures to eradicate this degrading practice, it continues to thrive, claiming innocent lives and shattering families. Manual scavenging, a practice that involves the manual cleaning of septic tanks, drains, and dry latrines, has been banned in India since 1993 under the Employment of Manual Scavengers and Construction of Dry Latrines (Prohibition) Act. However, the law remains largely ineffective, with thousands of individuals still forced into this hazardous occupation due to poverty, social discrimination, and a lack of alternative livelihood options. Incidentally, the government, which has introduced

several measures to prohibit manual scavenging and rehabilitate those involved, does not consider septic cleaning as manual scavenging, despite the National Human Rights Commission’s (NHRC) recommendation to expand the definition of manual scavengers. The incident serves as a stark reminder of the hazardous conditions faced by manual scavengers. “Nand was our sole breadwinner,” sobbed Rukmani Devi, her voice heavy with grief. “We had hoped for a brighter future for Nitesh, but now he is gone too. Why does no one care about our lives?” The tragedy that befell the Kushwaha family is not an isolated incident. According to a report by Safai Karamchari Andolan, an organization

fighting for the rights of sanitation workers, there have been over 1,800 deaths related to manual scavenging in the past decade alone. In four years, between 2017-2021, 330 people lost their lives due to “hazardous cleaning of sewer and septic tanks” in India, as per the data presented in Lok Sabha in August 2022. “Each death represents a life cut short, dreams left unfulfilled, and families left devastated,” Dinesh Kanojia, an office-bearer of Safai Karamchari Aandolan said and added: “We clean society’s waste, but society refuses to acknowledge us as humans.” Despite the Prohibition of Employment as Manual Scavengers and the Rehabilitation Act of 2013, which outlawed the employ-

ment of manual scavengers and aimed to provide rehabilitation measures, the implementation has been woefully inadequate. The lack of political will, insufficient enforcement, and social apathy have perpetuated this grave injustice. The dangers of manual scavenging extend beyond the risk of asphyxiation and drowning. The workers are often exposed to toxic gases, disease-causing pathogens, and unsanitary conditions that pose serious health risks. The absence of social safety nets and adequate welfare measures further deepens their economic struggles, leaving them with limited choices. “The persistence of manual scavenging in India is a grave violation of human rights, as it subjects individu-

als to dehumanizing conditions, health hazards, and social exclusion,” Raghuvanshi, a Dalit activist, said. The tragedy in Bahora Ramnagar village should serve as a wake-up call for the authorities and society at large. Immediate action is needed to ensure justice for the victims and their families and to put an end to this brutal practice. To address this grave issue, a multi-pronged approach is necessary. Strengthening the implementation of existing laws, providing alternative employment opportunities, investing in mechanized cleaning technologies, and raising public awareness are crucial steps toward eradicating manual scavenging. Collaboration between government bodies, civil society organizations, and

affected communities is essential to ensure sustainable change. “No more lives should be lost in the depths of septic tanks,” declared Smita Yadav, a social worker. “It is time to break the chains of this exploitative practice and work towards a future where dignity and equality prevail.” She said: “As the Kushwaha family and the entire community grieve the loss of Nand and Nitesh, their deaths must not be forgotten. Their tragedy should ignite a collective resolve to eliminate manual scavenging and create a society where every life is valued and respected. Let us unite in our demand for justice and in our commitment to building a future free from this dark chapter of human suffering.”

Ahead of House debt ceiling vote, Biden shores up Democrats

McCarthy scrambles for GOP support

AP ■ WASHINGTON

Hard-fought to the end, the debt ceiling and budget cuts package is heading toward a crucial US House vote as President Joe Biden and Speaker Kevin McCarthy assemble a coalition of centrist Democrats and Republicans to push it to passage over fierce blowback from conservatives and some progressive dissent. Biden is sending top White House officials to meet early Wednesday at the Capitol to shore up support ahead of voting. McCarthy is working furiously to sell sceptical fellow Republicans, even fending

off challenges to his leadership, in the rush to avert a potentially disastrous U.S. default. Despite deep disappointment from right-flank Republicans that the compromise falls short of the spending cuts they demanded, McCarthy insisted he would have the votes needed to ensure approval. “We’re going to pass the bill,” McCarthy said as he exited a lengthy Tuesday night meeting at the Capitol. Quick approval by the House and later in the week the Senate would ensure government checks will continue to go out to Social Security recipients, veterans and others and would prevent financial upheaval at home and abroad. Next Monday is when the Treasury has said the U.S. would run short of money to pay its debts, risking an eco-

nomically dangerous default. The package leaves few lawmakers fully satisfied, but Biden and McCarthy are counting on pulling majority support from the political centre, a rarity in divided Washington, testing the leadership of the Democratic president and the Republican speaker. Overall, the 99-page bill restricts spending for the next two years, suspends the debt ceiling into January 2025 and changes policies, including new work requirements for older Americans receiving food aid and greenlighting an Appalachian natural gas line that many Democrats oppose. For more than two hours late Tuesday as aides wheeled in pizza at the Capitol, McCarthy walked Republicans through the details, fielded questions and encouraged

Scott Perry, left, and Chip Roy, R-Texas, speak with reporters as member of the conservative House Freedom Caucus talk about the debt limit deal during a news conference Tuesday on Capitol Hill in Washington. Agencies

them not to lose sight of the bill’s budget savings. The speaker faced a sometimes tough crowd. Leaders of the hard-right House Freedom

Caucus spent the day lambasting the compromise as falling well short of the spending cuts they demand, and they vowed to try to halt passage by

Congress. “This deal fails, fails completely,” Rep. Scott Perry, R-Pa., the chairman of the Freedom Caucus, said earlier in the day, flanked by others outside the Capitol. “We will do everything in our power to stop it.” A much larger conservative faction, the Republican Study Committee, declined to take a position. Even rank-and-file centrist conservatives were unsure, leaving McCarthy desperately hunting for votes. Rep. Nancy Mace, R-S.C., said after the “healthy debate” late into the night she was still a no. Ominously, the conservatives warned of potentially trying to oust McCarthy over the compromise. “There’s going to be a reckoning,” said Rep. Chip Roy of Texas. Biden was speak-

ing directly to lawmakers, making more than 100 one-on-one calls, the White House said. The nonpartisan Congressional Budget Office said the spending restrictions in the package would reduce deficits by \$1.5 trillion over the decade, a top goal for the Republicans trying to curb the debt load. McCarthy told lawmakers that number was higher if the two-year spending caps were extended, which is no guarantee. But in a surprise that could further erode Republican support, the GOP’s drive to impose work requirements on older Americans receiving food stamps ends up boosting spending by \$2.1 billion over the time period. That’s because the final deal exempted veterans and homeless people, expanding the food stamp rolls by 78,000

people monthly, the CBO said. House Democratic leader Hakeem Jeffries said it was up to McCarthy to turn out votes from some two-thirds of the Republican majority, a high bar the speaker may not be able to reach. In the 435-member House, 218 votes are needed for passage. Still, Jeffries said the Democrats would do their part to avoid failure. “It is my expectation that House Republicans would keep their promise and deliver at least 150 votes as it relates to an agreement that they themselves negotiated,” Jeffries said. “Democrats will make sure that the country does not default.” Liberal Democrats decried the new work requirements for older Americans, those age 50-54, in the food aid programme.

Imran Khan gets bail till June 19

PTI ■ ISLAMABAD

A Pakistan anti-corruption court on Wednesday granted bail to former premier Imran Khan until June 19 in the Al-Qadir Trust case involving an alleged corruption of over Rs 50 billion. Khan appeared before the Islamabad-based accountability court after the high court here earlier in the day extended the Pakistan Tehreek-e-Insaf (PTI) chief’s protective bail for three days and directed him to seek bail from the anti-corruption court within this period. Accountability court Judge Muhammad Bashir, presiding over the hearing, granted Khan bail till June 19 against surety bonds worth Rs 500,000. Earlier, Khan travelled from Lahore to the capital and first

Security personnel with bulletproof shields escort Pakistan’s former Prime Minister Imran Khan, center, as he leaves after appearing in court, in Islamabad, Pakistan on Wednesday. AP/PTI

appeared before the Islamabad High Court (IHC) where Justice Miangul Hasan Aurangzeb and Justice Saman Rifat Imtiaz granted him three-day protective bail with direction to go to the anti-corruption court for

bail. The court had earlier on May 17 given him bail till May 31. Khawaja Haris counsel for Khan was present in the court while the National Accountability Bureau (NAB) was represented by prosecutor

Muazaffar Abbasi in the alleged corruption case that led to Khan’s arrest on May 9 in the Islamabad High Court premises.

The cricketer-turned-politician’s arrest led to massive protests across Pakistan that left more than 10 persons dead and thousands of PTI supporters behind bars. The PTI chief was two days later released by the Supreme Court with the direction to seek bail from the Islamabad High Court. In an informal chat with the media persons on the occasion, Khan said the powerful establishment was running the country. “The government and establishment are the same thing, the latter is running the former,” he said, adding that there is no choice except to hold elections.

9 more to be tried under stringent Army Act

PTI ■ LAHORE

Nine more members of Imran Khan’s Pakistan Tehreek-e-Insaf party were arrested and handed over to the Pakistan Army on Wednesday to be tried under the stringent Pakistan Army Act over their alleged role in the May 9 attacks on sensitive military installations and government buildings. With these arrests, the number of PTI activists to be tried under the Army Act and the Official Secrets Act has exceeded 50. “On the orders of the anti-terrorism courts, nine suspects belonging to PTI and involved in the attack on the ISI buildings (in Faisalabad)

and military installations in Multan Cantonment were handed to the Pakistan Army on Wednesday for their trial under the Army Act and Official Secrets Act,” a court official said. On May 9, violent protests erupted after paramilitary Rangers arrested 70-year-old Khan, the chairman of the Pakistan Tehreek-e-Insaf (PTI) party from the Islamabad High Court premises in connection with a corruption case. His party workers vandalised a dozen military installations, including the Lahore Corps Commander House, the Mianwali airbase and the ISI building in Faisalabad in response to Khan’s arrest.

US complains of unsafe move by Chinese jet

AP ■ WASHINGTON

The US military said Tuesday that a Chinese fighter jet flew aggressively close to a US reconnaissance aircraft over the South China Sea, forcing the American pilot to fly through the turbulent wake. The Chinese J-16 fighter pilot “flew directly in front of the nose of the RC-135,” which was conducting routine operations in international airspace last Friday, US Indo-Pacific Command said in a statement. It called the Chinese move an “unnecessarily aggressive maneuver.”

US defense leaders have complained that China’s military has become significantly more aggressive over the past five years, intercepting US aircraft and ships in the region. And tensions with China have only grown in recent months over Washington’s military support and sales of defensive weapons to self-governing Taiwan, China’s assertions of sovereignty to the contested South China Sea and its flying of a suspected spy balloon over the US.

In a further sign of the tensions, China said its defense chief will not meet with US Defense Secretary Lloyd Austin when the two men attend a security conference in Singapore this coming weekend. Austin is scheduled to address the Shangri-La Dialogue on Saturday, while Chinese Defense Minister Gen. Li Shangfu will speak at the gathering on Sunday.

China responds to US complaint over plane intercept

Beijing (AP): Beijing responded on Wednesday to complaints from the United States about a Chinese fighter jet’s dangerous interception of an American Air Force reconnaissance aircraft in international airspace over the South China Sea by demanding an end to such flights. The incident adds to military, diplomatic and economic tensions between the countries over US support for self-governing Taiwan, China’s refusal to engage in dialogue between their armed forces and Beijing’s flying of a suspected spy balloon over the US.

Foreign Ministry spokesperson Mao Ning told reporters at a daily briefing that China would keep taking measures it deems necessary to safeguard its sovereignty.

“The US should immediately stop these dangerous provocations,” Mao said. The US Indo-Pacific Command called the Chinese plane’s actions an “unnecessarily aggressive maneuver,” adding to complaints that China’s military has become significantly more aggressive over the past five years, intercepting US aircraft and ships in the region. China says it owns the South China Sea virtually in its entirety, a claim not recognised internationally and directly challenged by nations along its coast including the Philippines, Vietnam and Malaysia.

China facing more complex security challenges, Xi warns

Beijing (PTI): China is facing more complex and difficult security concerns, President Xi Jinping has said, as he warned citizens to prepare for “worst-case and extreme scenarios” amid deepening tensions with the United States and the European Union. Xi, who presided over a meeting of the National Security Commission on Tuesday, said the complexity and severity of national security problems faced by the country increased dramatically, the state-run Xinhua news agency reported. “The national security front must build up strategic self-confidence, have enough confidence to secure victory, and be keenly aware of its own strengths and

advantages,” he said. The report said that it was stressed at the meeting that “we must be prepared for worst-case and extreme scenarios, and be ready to withstand the major test of high winds, choppy waters, and even dangerous storms.” More efforts must be made to modernise our national security system and capacity, and be prepared for actual combat and in dealing with practical problems,” it said. Documents including “guidelines on speeding up the building of risk monitoring and early warning system for national security” and “guidelines on strengthening extensive public education about national security” were deliberated and adopted at the meeting.

N Korea spy satellite launch fails

AP ■ SEOUL

North Korea's attempt to put the country's first spy satellite into space failed Wednesday in a setback to leader Kim Jong Un's push to boost his military capabilities as tensions with the United States and South Korea rise. After an unusually quick admission of failure, North Korea vowed to conduct a second launch after learning what went wrong with its rocket-liftoff. It suggests Kim remains determined to expand his weapons arsenal and apply more pressure on Washington and Seoul while diplomacy is stalled.

South Korea and Japan briefly urged residents to take shelter during the launch.

The South Korean military said it was salvaging an object presumed to be part of the crashed North Korean rocket in waters 200 kilometers (124 miles) west of the southwestern island of Eocheongdo. Later, the Defense Ministry released photos of a white, metal cylinder it described as a suspected rocket part.

A satellite launch by North Korea is a violation of UN Security Council resolutions that ban the country from conducting any launch based on ballistic technology. Observers say North Korea's previous satellite launches helped improve its long-range missile technology.

North Korea long-range missile tests in recent years demonstrated a potential range that could reach all of the continental US, but outside experts say the North Korea still has some work to do to obtain functioning nuclear missiles.

The newly developed Chollima-1 rocket was launched at 6:37 a.m. at the North's Sohae Satellite Launching Ground in the

A TV screen shows a file image of North Korea's rocket launch during a news program at the Seoul Railway Station in Seoul, South Korea on Wednesday. *AP/PTI*

northwest, carrying the Malligvong-1 satellite. The rocket crashed off the Korean Peninsula's western coast after it lost thrust following the separation of its first and second stages, the North's official Korean Central News Agency said. South Korea's military said the North Korean rocket had "an abnormal flight" before it fell in the water. Japan's Chief Cabinet Secretary Hirokazu Matsuno told reporters that no object was believed to have reached space.

North Korea media said the country's space agency will investigate what it calls "the serious defects revealed" by the launch and conduct a second launch as soon as possible. "It is impressive when the North Korean regime actually admits failure, but it would be difficult to hide the fact of a satellite launch failure internationally, and the regime will likely offer a different narrative domestically," Leif-Eric Easley, a professor at Ewha University in Seoul, said.

"This outcome also suggests that Pyongyang may stage another provocation soon, in part to make up for today's setback," Adam Hodge, a

spokesperson at the US National Security Council, said in a statement that Washington strongly condemns the North Korean launch because it used banned ballistic missile technology, raised tensions, and risked destabilizing security in the region and beyond.

The UN imposed economic sanctions on North Korea over its previous satellite and ballistic missile launches, but has not responded to recent tests because China and Russia, permanent council members now locked in confrontations with the US, have blocked attempts to toughen sanctions. Seoul's military said it boosted military readiness in coordination with the United States, and Japan said it prepared to respond to any emergency.

The US said it will take all necessary measures to ensure the security of the American homeland and the defense of South Korea and Japan.

South Korea's capital, Seoul, issued alerts over public loudspeakers and cellphone text messages telling residents to prepare for evacuation after the launch was detected, and Japan activated a missile warn-

ing system for Okinawa prefecture in southwestern Japan, in the rocket's suspected path.

"Please evacuate into buildings or underground," the Japanese alert said.

Japanese Defense Minister Yasukazu Hamada said Japan plans to keep missile defense systems deployed to its southern islands and in southwestern waters until June 11, which is the end of North Korea's announced launch window.

KCNA didn't provide details of the rocket and the satellite beyond their names. But experts earlier said North Korea would likely use a liquid-fuelled rocket as most of its previously tested long-range rockets and missiles have done.

Though it plans a fuller investigation, the North's National Aerospace Development Administration attributed the failure to "the low reliability and stability of the new-type engine system applied to (the) carrier rocket" and "the unstable character of the fuel," according to KCNA.

On Tuesday, Ri Pyong Chol, a top North Korean official, said the North needed a space-based reconnaissance system to counter escalating security threats from South Korea and the United States. However, the spy satellite disclosed in the country's state-run media earlier didn't appear to be sophisticated enough to produce high-resolution imagery. Some outside experts said it may still be able to detect troop movements and large targets such as warships and warplanes. Recent commercial satellite imagery of the North's Sohae launch center showed active construction indicating North Korea plans to launch more than one satellite. In his Tuesday statement, Ri also said North Korea would test "various reconnaissance means" to monitor moves by

the United States and its allies in real time. With three to five spy satellites, North Korea could build a space-based surveillance system that allows it to monitor the Korean Peninsula in near real-time, according to Lee Choon Geun, an honorary research fellow at South Korea's Science and Technology Policy Institute.

The satellite is one of several high-tech weapons systems that Kim has publicly vowed to introduce. Other weapons on his wish list include a multi-warhead missile, a nuclear submarine, a solid-propellant intercontinental ballistic missile and a hypersonic missile.

In his visit to the space agency in mid-May, Kim emphasized the strategic significance of a spy satellite in North Korea's standoff with the United States and South Korea.

Easley, the professor, said Kim has likely increased pressure on his scientists and engineers to launch the spy satellite as rival South Korea successfully launched its first commercial-grade satellite aboard the domestically-built Nuri rocket earlier this month.

South Korea is expected to launch its first spy satellite later this year, and analysts say Kim likely wants his country to launch its spy satellite before the South to reinforce his military credentials at home. After repeated failures, North Korea successfully put its first satellite into orbit in 2012, and the second one in 2016.

The government said both are Earth-observation satellites launched under its peaceful space development program, but many foreign experts believed both were developed to spy on rivals. Observers say there has been no evidence that the satellites have ever transmitted imagery back to North Korea.

New US aid package for Ukraine may be up to \$300 million

AP ■ WASHINGTON

A US military aid package for Ukraine that is expected to be announced this week will total up to USD 300 million and will include additional munitions for drones, US officials said on Tuesday. The drone ammunition comes after new attacks by unmanned aircraft targeted Moscow.

There has been no suggestion that US-made drones or munitions were used in the recent attacks on Moscow, and US officials have repeatedly said that Ukraine has agreed not to use any American-provided weapons for attacks on Russian soil. The Kremlin blamed Kyiv for Tuesday's attack, but Ukrainian officials had no direct comment.

But the new aid package comes at a tense moment in the war. The latest drone attack on Moscow follows Russia's seizure of the eastern Ukrainian city Bakhmut after a nine-month battle that killed tens of thousands of people. Ukraine is also showing signs that its long-awaited spring counteroffensive may already be underway.

The Russian Defence Ministry said five drones were shot down in Moscow and the systems of three others were jammed, causing them to veer off course. President Vladimir Putin called it a "terrorist" act by Kyiv. A US defence official said the drone strikes would not affect the weapons aid

packages the US is providing Ukraine, to include drone ammunition. The official said the US has committed to supporting Ukraine in its effort to defend the country and Ukraine had committed to not using the systems inside Russia, so the aid would likely continue unchanged.

All of the US officials spoke on the condition of anonymity because the latest aid package has not yet been publicly announced.

US officials did not provide details on the drone munitions in the new aid package or specify which unmanned aircraft would use them. The Defense Department has given Ukraine a variety of unmanned aircraft over the last year, for both surveillance and attacks, including at least two versions of the Switchblade, a so-called kamikaze drone that can loiter in the air and then explode into a target. Other more sophisticated drones can drop munitions, but the US has been reluctant to publicly share details about those. Also included in the newest package will be munitions for Patriot missile batteries and the High Mobility Artillery Rocket System (HIMARS), Stinger missiles for the Avenger system, mine-clearing equipment, anti-armour rounds, unguided Zuni aircraft rockets, night vision goggles, and about 30 million rounds of small arms ammunition, said the US officials.

Grossi urges Russia, Ukraine to ban attacks at Europe's largest nuclear plant

United Nations (AP): The UN nuclear chief stressed Tuesday that the world is fortunate a nuclear accident hasn't happened in Ukraine and asked Moscow and Kyiv to commit to preventing any attack on Europe's largest nuclear power plant and make other pledges "to avoid the danger of a catastrophic incident."

Rafael Grossi reiterated to the UN Security Council what he told the International Atomic Energy Agency's board of governors in March: "We are rolling a dice and if this continues then one day our luck will run out."

The IAEA director general said avoiding a nuclear accident is possible if five principles are observed at the Zaporizhzhia nuclear power plant, where fighting on seven occasions, most recently last week, disrupted critical power supplies, "the last line of defense against a nuclear accident."

Grossi "respectfully and solemnly" asked Ukraine and Russia to observe the principles, saying IAEA experts at Zaporizhzhia will start monitoring and he will publicly report on any violations.

Ban attacks on or against the plant, especially targeting reactors and spent fuel storage areas. Ban the storage of heavy weapons or presence of military personnel that could be used for an attack.

UK govt hails first post-Brexit trade deals with Aus, NZ

AP ■ LONDON

The UK government hailed an era of cheaper Australian wine and New Zealand kiwi fruit as free-trade agreements with the two Southern Hemisphere nations took effect on Wednesday.

UK Business and Trade Secretary Kemi Badenoch said that the start of the first all-new trade deals that Britain has struck since it left the European Union marked "a historic moment".

Economists, however, said the economic effect would be limited. Trade expert David Henig called the new deals "a bit of a nothing-burger".

The agreements remove tariffs on most goods, streamline some regulations and make it easier for Britons to work Down Under, and for Aussies and Kiwis to work in the UK.

Britain marked the occasion by sending the Australian and New Zealand governments care packages of products it hopes will get an export boost, including Welsh whiskey, English gin, leather bags from the Cambridge Satchel Co. and Beano, a kids' comic book. The UK says the deals will boost bilat-

eral trade by 53 per cent with Australia and 59 per cent with New Zealand, though the overall volumes are relatively modest: Australia accounts for 0.9 per cent of UK trade, and New Zealand for 0.2 per cent.

Henig, director of the UK Trade Policy Project at the European Centre for International Political Economy, said that the deals "could make bits and pieces of difference. For individual companies it can make a difference".

But, he said, "the likeliest outcome is very little changes". Many economists say no amount of new trade deals will make up for the economic hit of leaving the EU, which before Brexit accounted for about half of all UK trade. Britain's independent Office for Budget Responsibility estimates Brexit knocked 4 per cent off UK gross domestic product.

The new deals together are expected to bring an estimated boost to GDP of about 0.1 per cent by 2035. Some former UK government officials also say the deals are skewed towards Australia and New Zealand.

Latvia's Parl elects Rinkevics as Prez

Helsinki (AP): Latvian lawmakers on Wednesday picked the country's long-serving and popular foreign minister, a strong backer of Ukraine, as its new head of state in a tight vote. The 100-seat Saeima legislature elected Edgars Rinkevics, the country's top diplomat since 2011, as president to serve for a four-year term.

He received 52 votes, one vote more than required to win the race. Incumbent Egils Levits, Latvia's head of state since 2019, didn't seek reelection. Rinkevics, who announced in 2014 that he is "proudly" homosexual, will be the first openly gay president in the Baltic nations — all former Soviet republics where attitudes to sexual minorities have

been less tolerant than in western Europe.

His closest rival, businessman Uldis Pilems, got 25 votes in the third round of voting between the two remaining contenders after the third candidate, Elina Pinto, had dropped out of the contest.

Rinkevics, 49, served — among other posts — as a state secretary with the defense ministry and worked as a journalist with Latvian Radio in the 1990s.

As foreign minister, he has enjoyed high popularity among Latvians due to his hard stance toward neighbouring Russia and his unwavering support for Ukraine that is under assault from Moscow.

PUBLIC NOTICE

This is to inform general public that Sh. Pawan Kumar Gupta has acquired the Upper Ground Floor Only Without Roof Rights "said Floor" Built on Plot No. 4227, old Plot No. 3462 area measuring 90 Sq. Centre's fiscal deficit narrows to 6.4% of GDP in FY23

PTI ■ NEW DELHI

The Centre's fiscal deficit narrowed to 6.4 per cent of the GDP in 2022-23 from 6.71 per cent in FY22, as anticipated by Finance Minister Nirmala Sitharaman in her Budget in February this year.

In the Union Budget, the government aimed to further bring down the fiscal deficit - a key indicator of borrowing -- during the current financial year 2023-24 to 5.9 per cent of the gross domestic product (GDP).

Unveiling the revenue-expenditure data of the Union government for 2022-23, the Controller General of Accounts (CGA) said the fiscal deficit in absolute terms was Rs 17,33,131 crore (provisional), marginally down from the amount projected in the Revised Estimates (RE) in the Budget.

CGA said the government received Rs 24.56 lakh crore (101 per cent of corresponding RE 2022-23 of total receipts) during 2022-23.

It comprised Rs 20.97 lakh

crore tax revenue (Net to Centre), Rs 2.86 lakh crore of non-tax revenue and Rs 72,187 crore of non-debt capital receipts.

Non-debt capital receipts consist of the recovery of loans

and miscellaneous capital receipts.

About Rs 9.48 lakh crore has been transferred to state governments as devolution of taxes by the central government, which is Rs 50,015 crore higher than the previous year (2021-22).

The CGA data further revealed that the Centre's total expenditure was Rs 41.89 crore (100 per cent of corresponding RE 2022-23), out of which Rs 34.52 lakh crore was on the revenue account and Rs 7.36 lakh crore on the capital

account.

Out of the total revenue expenditure, Rs 9.28 lakh crore was on account of interest payments and Rs 5.31 lakh crore towards major subsidies.

As per CGA, the revenue deficit for the fiscal ending March 2023 was 3.9 per cent of GDP while the effective revenue deficit worked out to be 2.8 per cent of GDP.

Aditi Nayar, Chief Economist and Head - Research and Outreach, Icra, said the government was able to restrict its FY2023 fiscal

deficit at Rs 17.3 lakh crore, a shade below the FY2023 RE, with higher than estimated revenue receipts and a small undershooting in revenue expenditure, offsetting the dis-investment miss and a healthier than expected capex.

"In FY2023, the government's net tax revenues reported a healthy growth of 15.2 per cent, amidst a 17.8 per cent contraction in non-tax revenues, 7.8 per cent increase in revenue expenditure, and a robust 24.2 per cent expansion in capex," she said.

IT sector growth to slow down further in FY24: Icra

PTI ■ MUMBAI

Indian IT companies revenue growth will slow down further to mid-single digits amid intensifying headwinds for the nearly USD 250 billion dollar sector, domestic rating agency Icra said on Wednesday.

The continuing uncertainties are set to take their toll on hiring, and companies are expected to keep employee addition at "low levels" in the near term, the rating agency said, adding that the net addition is negative in the last two-quarters of FY23.

As per industry lobby grouping Nasscom's report published in March, the sector's growth slowed down to 8.4 per cent in FY23 from over 15 per cent in the previous fiscal.

"Despite a strong order book and deal pipelines of Indian IT services companies, Icra expects the revenue growth to remain subdued in mid-single digits in USD terms in FY2024," the agency said.

It has maintained its stable outlook for companies in the sector, which is generally known to have the best quality on leverage positions.

The agency said the growth momentum witnessed a slowdown in the last two quarters due to macroeconomic headwinds in the US and Europe, which together account for up to 90 per cent of the industry's

revenues.

On a sectoral basis, growth from the banking, financial services and insurance segment, which contributes nearly a third of the overall revenues, tapered more than other segments because of the crisis in American banks, it said.

There are delays in decision-making by customers, as visible from the slowdown in the conversion of deals to revenues to some extent, it added.

On the profitability front, Icra said companies in its sample set witnessed a 1.90 per cent narrowing in the operating profit margins to 22.9 per cent in FY23 and added that it expects the number to remain steady despite the slowdown in revenue growth.

From an employee addition perspective, the top five companies in the sector added 83,906 people in FY23 compared to 2.73 lakh in FY22.

Hiring will "remain at low levels in the near term till the macroeconomic uncertainty continues", the agency added.

40-50 FDI proposals from countries sharing land border with India pending

PTI ■ NEW DELHI

About 40-50 foreign direct investment (FDI) proposals from countries sharing land border with India under the provisions of Press Note 3 are pending for approval with the government, official sources said.

Under Press Note 3, the government has made its prior approval mandatory for foreign investments from countries that share land border with India. These countries are China, Bangladesh, Pakistan, Bhutan, Nepal, Myanmar and Afghanistan.

As per that decision, FDI proposals from these countries need government approval for investments in India in any sector.

"About 40-50 proposals are pending with the commerce and industry ministry as they require security and political clearances," one of the sources said.

Sources added that there is no consideration at present to ease norms under this press note.

"FDI is not totally banned from these countries. It is just that they (investors from these countries) have to follow the government approval route and of course that takes times," a source said.

The government has a commitment to clear these proposals in three months time, but it takes about seven months.

As per industry sources, MG Motor, a British brand owned by China's largest automaker SAIC Motor Corp, has been awaiting government approval for around two years now to raise funds from its parent.

Sensex, Nifty trip over profit taking in banking, energy shares

PTI ■ MUMBAI

Benchmark stock indices Sensex and Nifty cut short their four-day gaining streak and closed lower by half a per cent on Wednesday due to profit-taking in banking, energy and metal stocks amid weak trends in global markets.

Snapping its four-day rally, the 30-share BSE Sensex fell 346.89 points or 0.55 per cent to settle at 62,622.24. During the day, it tumbled 568.11 points or 0.90 per cent to 62,401.02.

The NSE Nifty declined 99.45 points or 0.53 per cent to end at 18,534.40.

In the four-day rally to Tuesday, Sensex advanced by 1,195 points or 2 per cent while Nifty rose by 348 points or 2.26 per cent. "Markets witnessed profit-taking and shed over half a per cent, tracking mixed cues. After the initial downtick, the Nifty index traded with a negative bias for most of the session however a marginal rebound in the final hours trimmed some losses," said Ajit Mishra, SVP - Technical Research, Religare Broking Ltd.

Global headwinds, especially from the US markets, are causing intermediate volatility however the positional up trend is still intact, Mishra

said.

From the Sensex pack, Axis Bank, State Bank of India, Reliance Industries, HDFC, HDFC Bank, NTPC, Tata Steel and UltraTech Cement were the major laggards on Wednesday.

Bharti Airtel, Tech Mahindra, Asian Paints, Sun Pharma, Tata Motors and Kotak Mahindra Bank were among the gainers.

"As indicated by multiple economic data points, the Indian economy is presently experiencing a robust recovery, leading to an upward trend in domestic equity markets. However, the rally is being hindered at times due to negative signals from global peers, as observed today.

"Concerns about a recession and potential interest rate hikes in western markets are impacting the domestic market but it is nevertheless maintaining the outperformance," said Vinod Nair, Head of Research at Geojit Financial Services.

Key infra sector growth slows down to 6-month low of 3.5% in April

PTI ■ NEW DELHI

The production growth of eight key infrastructure sectors slowed down to a six-month low of 3.5 per cent in April 2023 due to a decline in the output of crude oil, natural gas, refinery products and electricity.

The core sector growth was 9.5 per cent in April 2022 while in March 2023 the key infra sectors recorded a growth rate of 3.6 per cent. The growth rate in April 2023 is the lowest since October 2022 when the sectors expanded by 0.7 per cent.

Coal production growth declined to 9 per cent in April this year, according to the official data released on Wednesday.

Fertiliser production soared by 23.5 per cent, steel by 12.1 per cent and cement output by 11.6 per cent in April, the data showed.

Olympic sports bodies meet amid uncertainty over Russians competing at Paris Games

AP ■ LAUSANNE

Olympic sports bodies were meeting Wednesday amid ongoing uncertainty about if and how Russian athletes could return to their competitions ahead of the 2024 Paris Games.

The annual meeting of the Association of Summer Olympic International Federations (ASOIF) comes more than two months after the IOC detailed advice on how individual athletes from Russia and its military ally Belarus could be reintegrated as neutral athletes, despite those countries' ongoing war on Ukraine.

Exactly how that neutrality is being defined is not very much clearer now as key qualification events start for the Olympics that open in July next year.

The International Olympic Committee in March advised that some Russians and Belarusians could return in individual events but not team sports, if they had not actively supported the war in Ukraine,

and are not contracted to "military or national security agencies."

The IOC also suggested ASOIF and the winter sports umbrella group, AIOWF, could oversee "creating a single independent panel" to run and "harmonize" the neutral status evaluations of hundreds of athletes, coaches and support staff.

That has not happened and there was no move Wednesday on the ASOIF agenda in the IOC's home city of Lausanne toward taking on that complex responsibility.

IOC president Thomas Bach told leaders of governing bodies on the 32-sport Paris program, who have ultimate control over their own events,

some had proven how Russian and Belarusians could continue to compete.

"You are doing so against the backdrop of the many traditional, I may say, naysayers who want to make people believe that it would never work," Bach said. He did not speak with reporters when leaving after his speech.

Bach and the IOC led calls within days of the invasion of Ukraine in February of last year to banish Russia from international sport, including to protect the security of athletes.

As the war continued and the 2024 Olympics approached, the IOC and Bach started to suggest it was discrimination to exclude all Russians and Belarusians. If approved to compete, the IOC said Russian and Belarusians would not be allowed to use their flag, anthem or uniforms in national colors.

ASOIF officials previously cautioned "each sport has different realities," including where Olympic qualification events are being hosted and the influence of Ukraine's allies in sports and governments, especially in Europe.

In gymnastics, a top-tier Summer Games sport where Russians excel, a decision on reintegrating them was pushed back to at least July. World championships that are a key qualifier for Paris start Sept. 30 in Antwerp, Belgium.

Djokovic draws flak for political messages at French Open

AP ■ PARIS

French Sports minister Amelie Oudea-Castera said Wednesday that Novak Djokovic's political message about Kosovo was "not appropriate" and warned the former top-ranked Serb player that he should not do it again.

Speaking on TV station France 2, Oudea-Castera said French Open director Amelie Mauresmo spoke with Djokovic and his entourage to insist on the principle of "neutrality" on the field of play.

"When it comes to defending human rights and bringing people together around universal values, a sportsperson is free to do so," she said. But Oudea-Castera added that Djokovic's message was "militant, very political" and "must not be repeated."

Djokovic has drawn criticism from Kosovo's tennis federation after offering his thoughts on clashes in northern Kosovo between ethnic Serbs and police and NATO peacekeepers.

After a first-round victory in Paris on Monday, Djokovic wrote in Serbian on the lens of a courtside TV camera: "Kosovo is the heart of Serbia. Stop the violence."

Kosovo's tennis federation said Tuesday that Djokovic's comments were "deplorable" because he was stoking tensions between Serbia and Kosovo.

A former province of Serbia, Kosovo's 2008 declaration of independence is not recognized by Belgrade. Ethnic Albanians make up most of the population, but Kosovo has a restive Serb minority in the north of the country bordering Serbia.

Djokovic, who has won 22 Grand Slam titles, is scheduled to play in the second round at Roland Garros on Wednesday.

Speaking to reporters in Serbian, Djokovic said Monday that he thought what he wrote on the TV camera was "the least I could do. I feel responsibility as a public figure ... as well as a son of a man who was born in Kosovo."

Without mentioning Djokovic by name, French

Debutant Stearns beats former champ Ostapenko to reach French Open 3rd round

AP ■ PARIS

French Open debutant Peyton Stearns produced the biggest win of her career by defeating former champion Jelena Ostapenko to reach the third round at Roland Garros on Wednesday.

Stearns, a former player at the University of Texas, only turned professional in June last year.

Ostapenko won the 2017 French Open but has since failed to advance past the 3rd round. The 17th-seeded Latvian dropped her serve five times against Stearns and hit 28 unforced errors in her 6-3, 1-6, 6-2 loss.

The 21-year-old Stearns has been climbing the WTA rankings and entered the French Open at No. 69 on the back of an encouraging clay-court campaign.

Third-seeded Jessica Pegula also advanced after Camila Giorgi retired due to injury. The American led 6-2 when her Italian rival threw in the towel.

Only hours after husband Gael Monfils won a five-set thriller in Tuesday night's session, Elina Svitolina rallied past qualifier Storm Hunter 2-6, 6-3, 6-1.

In the men's bracket, former runner-up Stefanos Tsitsipas ousted Roberto Carballes Baena 6-3, 7-6 (4), 6-2. The fifth-seeded Greek was a bit slow to find his range and was made to work hard for two sets but rolled on after he won the tiebreaker.

Open organizers indicated in a statement issued Tuesday that no rules had been broken, saying: "Occasionally, discussions about international news events enter the realm of the tournament, which is understandable."

Only matter of time before India becomes leading chess nation in world, says Carlsen

PTI ■ NEW DELHI

Five-time world champion Magnus Carlsen feels it is only a matter of time before India becomes a leading chess nation, saying the country is "doing a lot of right things".

Carlsen who is the current world rapid chess champion, is widely regarded as the best player of the current generation.

While Indian chess players have done extremely well in global circuit in recent years, the country also successfully hosted the Chess Olympiad last year.

"I think India is doing a lot of right things so far, and it is a matter of time before it is clearly the leading chess nation in the world," Carlsen was quoted as saying in a press release.

The Norwegian Grandmaster is one of the icon players for the inaugural Global Chess League, which is the world's first and largest official franchise league of its kind, with chess players from all over the world competing in a unique joint team format.

The GCL is a joint venture between Tech Mahindra and the international chess federation (FIDE), which will witness six teams competing in a minimum of 10 matches each in a double round-robin, rapid format from June 21 to July 2 in Dubai.

"It is an exciting prospect for me to be a part of. This will be something new. Something that has not been done this way in over-the-board chess. I am looking forward to exploring this format for future."

The league will see each of the six franchises play a total of 10 matches in a double round-robin format, with the winner of each match being decided in a best-of-six board scoring system played simultaneously.

Nkunku, Dembélé recalled by France

AP ■ PARIS

Christopher Nkunku and Ousmane Dembélé were recalled Wednesday to France's national team.

The two strikers were included in coach Didier Deschamps' squad for upcoming European Championship qualifiers against Gibraltar and Greece after missing Les Bleus' previous games due to injury.

France tops the Group B standings in qualifying after back-to-back wins against the Netherlands and Ireland. The two-time world champions take on Gibraltar in Portugal on June 16, then host Greece three days later at the Stade de France.

Nkunku, who plays for RB Leipzig in the Bundesliga, has been sidelined for months due to a knee injury while Barcelona's Dembele missed a series of games due to a hamstring problem.

Deschamps will be without the injured Paul Pogba and N'Golo Kanté, with William Saliba also missing because of a back injury.

FRANCE SQUAD:

Goalkeepers: Alphonse Areola (West Ham), Mike Maignan (AC Milan), Brice Samba (Lens)

Defenders: Axel Disasi (Monaco), Wesley Fofana (Chelsea), Theo Hernandez (AC Milan), Ibrahim Konaté (Liverpool), Jules Koundé (Barcelona), Ferland Mendy (Real Madrid), Benjamin Pavard (Bayern Munich), Dayot Upamecano (Bayern Munich)

Midfielders: Eduardo Camavinga (Real Madrid), Youssouf Fofana (Monaco), Antoine Griezmann (Atlético Madrid), Adrien Rabiot (Juventus), Aurélien Tchouaméni (Real Madrid),

Forwards: Kingsley Coman (Bayern Munich), Ousmane Dembélé (Barcelona), Olivier Giroud (AC Milan), Randal Kolo Muani (Eintracht Frankfurt), Kylian Mbappé (Paris Saint-Germain), Christopher Nkunku (RB Leipzig), Marcus Thuram (Borussia Mönchengladbach).

Bonmatí aims for 2nd Women's Champions League title with Barcelona

AP | BARCELONA

When Barcelona midfielder Aitana Bonmatí was the only girl playing on her village's soccer team, she quickly learned that she would have to fight for the game she loved.

That character-forging experience has helped the 25-year-old Bonmatí lead her team to a fourth Women's Champions League final in five years. On Saturday, the Spanish club will face German team Wolfsburg in Eindhoven for the title.

Back in her younger days, her opponents weren't the source of trouble. It was her own teammates.

"I was the only girl and I remember having lots of fights. The boys had a hard time accepting that a girl could play soccer," Bonmatí told The Associated Press recently in an interview at the stadium where Barcelona's women play most of their games. "It was like I can't step on a girl," or 'How can a girl play ahead of me?'"

"But I don't blame those boys, it was an issue of education and society as a whole," she

said about her childhood in Sant Pere de Ribes, a village just south of Barcelona where Bonmatí grew up watching Lionel Messi and his teammates dominate men's European soccer on TV.

"I think those years helped me grow as a person, forging my character, and as a player. I believe they made me a more physical player, and the intensity I play with I got from that time."

Bonmatí is hoping Barcelona will win its second European Cup, and, if all goes well and a group conflict with

Spain's coach can be resolved, play at her second Women's World Cup this year.

Bonmatí has been a key part of Barcelona becoming the dominant team in Spain, where it has won four league titles in a row, and is now a regular finalist in Europe's elite club tournament.

Slick with the ball, possessing great vision and quick with her feet, her dribbling and passes for teammates are critical to Barcelona's possession-based attack. Bonmatí is proud that her style of play is pure "Made in Barcelona."

Alonso gives Spaniards hope of ending F1 drought

AP ■ BARCELONA

It's been nearly a decade since there was this much hype surrounding the Spanish Grand Prix.

The last time the Formula One crowd in Spain had such high hopes of celebrating a victory by Fernando Alonso — the country's biggest racing idol — was back in 2013, when the two-time champion was driving for Ferrari.

Alonso went on to win that race in Barcelona, but since then has never been in a realistic position to make it to the top step of the podium again at home. That was his last win in F1 anywhere, and the last by any Spaniard in the local race.

The 41-year-old Alonso arrives revitalized with an Aston Martin team that is one

of the surprises of the season and has been running near the top from the start. Alonso has five podium finishes in six races so far, and is coming off a season-best second-place finish in Monaco last weekend.

"One step higher than any other podium this year, but we're still aiming for one step (higher) hopefully in the future races," Alonso said. "Barcelona is going to be a celebration. We have so many Aston Martin fans in Spain now."

A record crowd is expected this weekend to support Alonso and fellow Spaniard Carlos Sainz Jr. at the Circuit de Barcelona-Catalunya. More than 40,000 tickets were sold in the first few hours after being put on sale last year, and more tickets were made available again earlier this year. More

than 100,000 people are expected for Sunday's race.

Alonso, who won his F1 titles with Renault in 2005-06, is seeking his 33rd victory in the series. After coming up short of the title in 2013, he had a lackluster 2014 season with Ferrari and then struggled with McLaren from 2015-18. He spent a few seasons away from

F1 before returning with Alpine in 2021, when he made his only podium appearance since leaving Ferrari in the race in Qatar.

Alonso, who also won in Barcelona in 2006, downplayed expectations ahead of this year's Spanish GP despite his good start to the season, noting that defending champion Max Verstappen and Red Bull will remain the big favorites.

"And we have to see in a normal circuit, what is the package of Mercedes and the upgrades that Ferrari will bring apparently to Barcelona as well. So we have to have the feet on the ground," Alonso said.

The Spaniard said he doesn't want to "disappoint anyone" by coming into his home race with too many expectations, and will not put "any pressure on my team or myself."

Chotrani, Anahat win National Circuit squash

PTI ■ MUMBAI

Maharashtra's Veer Chotrani and teen sensation Anahat Singh of Delhi bagged the men's and women's singles titles respectively in the sixth NSCI Open National Circuit squash tournament, here on Wednesday.

Chotrani defeated second seed Suraj Chand 11-9, 11-8, 11-6 in a one-sided final, while Anahat downed top seed Urwashi 11-7, 11-8, 11-3 without breaking a sweat to emerge senior champions.

At 14, Anahat had become India's youngest Commonwealth Games 2022 participant in Birmingham.

Chotrani applied a lot of pressure on the defensive game of Suraj, who in return attempted to engage his opponent in long rallies.

However, Chotrani managed to come out on top on every time and maintained his lead to seal the issue.

Chotrani does not participate in national level competitions and is thus ranked No 16 in the country.

Man City's Grealish emerging as the face of English soccer

AP ■ LONDON

Armed with the boyish charm and marketability of David Beckham and the skills and playfulness of Paul Gascoigne, Jack Grealish has a potent mix that has seen him quickly emerge as the face of English soccer.

Now that he is starting to add trophies to his growing list of endorsement deals that already include Gucci and Puma, the possibilities appear endless for the Manchester City winger who is the most expensive English soccer player of all time.

Grealish — he of the bulging calf muscles and swept-back hair — was already hot property in the English game

before a 2021 move from Aston Villa to City for 100 million pounds (then \$139 million) that took his appeal to a new level.

Nearing the end of his second season at City, the 27-year-old Grealish has finally established himself as a key part of a Premier League-winning team that is seeking to clinch the second leg of a treble of major titles this season by beating Manchester United in the FA Cup final on Saturday.

He is far more than a soccer player these days, though. "People like Jack Grealish are the new sports lifestyle icons," Alan Seymour, a sports academic and author in business and marketing, told The Associated Press. "As he's

matured and got more attuned to what is required of him as a footballer, on the field and off the field, it's why he is right up there with the very best sports personalities for marketability, not only in football but away from football."

Elements of the wild-child

image that shadowed him in the early years of his career remain.

At the height of the lockdown amid the pandemic, Grealish was found slurring his words after crashing his car in a residential estate and was later banned from driving for nine

months. Then there were those images of him playing a prominent role in City's Premier League title celebrations last year, when he was seen swigging a beer and — bleary-eyed and with a croaky voice — aiming a dig at Newcastle midfielder Miguel Almiron that gained plenty of air time.

Grealish unashamedly accepts that's who he is. He recently said he might have been a nightclub promoter if he wasn't a soccer player and that he'd always be prone to the kind of excesses that mean he embodies the spirit of a regular soccer fan.

But the loveable, charming part of Grealish's personality is inescapable. It shines through in every interview he does —

he pinches himself that he is a soccer professional, playing against the likes of Real Madrid in the Champions League — and in his public friendship with a young City fan named Finley, who has cerebral palsy. He's a popular member of the City squad, striking up a particularly close relationship with superstar striker Erling Haaland off the field.

"I feel so much more confident in this team," said Grealish, who was left out of many of City's big games last season while he adapted to the demands of manager Pep Guardiola. "I feel fitter and back to what I know, what I can do. This is why City bought me and I have so much to offer."

ICC seeks PCB assurances on team to India for ODI World Cup

PTI ■ KARACHI

The International Cricket Council (ICC) chairman and CEO are in Lahore to seek guarantees from the PCB that it will not push for implementing a hybrid model for its matches in the ODI World Cup in India later this year.

Insiders confirmed to PTI that ICC chairman Greg Barclay and CEO Geoff Allardice have specifically come to Lahore to get some assurances from the Pakistan Cricket Board on the national team's participation in the World Cup in October-November.

The development comes after PCB chief Najam Sethi made it clear that the team will not travel for the World Cup in India if the Rohit Sharma led side doesn't visit Pakistan for the preceding Asia Cup.

"The ICC and World Cup hosts, the Board of Control for Cricket in India (BCCI) are concerned with the hybrid

model being pushed by Najam Sethi who heads the cricket management committee of the PCB.

"Although the hybrid model has been suggested by Sethi for the Asia Cup which precedes the ICC event, the concern remains

that once accepted for the regional event the PCB might also then ask the ICC to implement it for the World Cup when it comes to Pakistan playing in India," he explained.

Sethi has already indicated that if the Pakistan government

doesn't give clearance or has security concerns about sending the team to India, PCB could ask the ICC to hold Pakistan's matches at a neutral venue.

"Naturally neither the ICC nor the BCCI want such a situation since Pakistan's unequiv-

ocal participation in matches in India would guarantee the success of Indo-Pakistan matches and also the tournament itself."

Another source said this was the primary reason why BCCI secretary Jay Shah was still reluctant to accept the hybrid model for the Asia Cup and support having three or four matches of the tournament in Pakistan and the remaining games in UAE or Sri Lanka.

Pakistan are the hosts of the Asia Cup and Sethi has said repeatedly that if the tournament is moved to one neutral country from Pakistan, it will not take part in the competition.

He has also hinted that if Pakistan didn't get to host some Asia Cup matches it could have an adverse bearing on the World Cup as well.

"The ICC officials are trying to work as a bridge between the PCB and BCCI and resolve the outstanding issues pertaining to the Asia Cup and World Cup."

Indian bowlers focus on building workload ahead of WTC final

PTI ■ PORTSMOUTH

The Indian cricket team is focussing on building workload for the bowlers, who had an extensive run in the IPL, ahead of the World Test Championship final against Australia starting on June 7 at The Oval.

In the bowling department, while the likes of Mohammed Siraj, Shardul Thakur, Axar Patel, Jaydev Unadkat and Umesh Yadav were part of the first batch to travel to England, pace spearhead Mohammed Shami's departure was delayed as the IPL final in Ahmedabad last Sunday was moved to the reserve day after incessant rain.

The middle-order mainstay Virat Kohli was also among the players who left in the first batch along with the Rahul Dravid-led coaching staff. Kohli joined the camp on Monday along with Cheteshwar Pujara, who linked up with the squad in England as he was busy playing County Championship for Sussex.

The Indian team is expected to have a few practice sessions at the Arundel Castle Cricket Club in Sussex ahead of the big final.

"The preparation has been good so far. The initial bit was to ease into the practice session but the last two sessions have been pretty happy — I think we pushed them a little bit. Just adding a little bit of workload for the bowlers, just kind of preparing them for the Test match," said India's bowling coach Paras Mhambrey in a video released by the BCCI.

"(We are) happy with the conditions, I think it is a lovely ground, (it is) kind of what you can

expect. The weather is holding up, it has been sunny, a little windy, a little chill but something that we have to get used to (when) playing in England," he said.

India's fielding coach T Dilip said the focus will be on close-in catching since the running part of the fitness drill was covered in the IPL.

"The players have been coming from an IPL so a key thing for us to take care of was the workload, how much they have run, how much they have taken care.

"What we understood and got out of that is things (like) ground fielding have been covered in the IPL, so the focus here was more on the volume of catching, especially when you are talking about close-in catching, the slip catching and the flat catches. These are the catches that we tend to increase the volume (of)," he said.

Mhambrey said while the bowlers will get some rest in days leading up to the WTC final, the group is determined to extract the maximum benefits from the training sessions.

Dhoni will take medical advice for knee injury and decide: CSK CEO Viswanathan

PTI ■ NEW DELHI

Chennai Super Kings captain Mahendra Singh Dhoni will be seeking expert opinion from sports orthopedics in Mumbai on the state of his dodgy left knee before taking a call on his treatment, CEO Kasi Viswanathan said on Wednesday.

Dhoni had played the entire IPL season with a heavily strapped left knee and although he looked absolutely okay while keeping, more often than not batted as late as No.8 and didn't look swift while running between the wickets.

"Yes, it is true that Dhoni will be taking medical advice for his left knee injury and accordingly decide. If surgery is advised, it can only be ascertained after reports come out, it will be completely his call," Viswanathan told PTI.

Is there a possibility that Dhoni will decide against playing next season and thus free up a purse of Rs 15 crore for the mini auction, the CEO replied: "Frankly, we are not even thinking on those lines as we haven't reached that stage.

"It will be completely Dhoni's call. But I can tell you in CSK, we haven't entertained those thoughts," Viswanathan said.

Asked if CSK supremo N Srinivasan addressed the players after the fifth IPL Trophy and if celebrations were in the offing. "He is very happy but there were no celebrations. The players dispersed for their respective destinations from Ahmedabad only. Also if you have seen CSK, we are never big on celebrations," the veteran official said.

Asked if the fifth IPL title feels the sweetest, considering the spate of injuries to its top players, Viswanathan said: "It's all about team spirit and every player knowing his role which is very well defined in our set up.

"Even a player of Ben Stokes' stature despite his nature was brilliant around the group and the youngsters looked upto to him. This has been possible because of our captain."

What has been CSK's hallmark over the years which enabled them to reach final in 11 of the 14 editions that they have been a part of?

"I have been associated with CSK from season 1 and we have never deviated from our process. The key has been to keep things simple and explain every player what is expected of them. In our franchise, the skipper keeps everything uncomplicated," Viswanathan said.

CSK were barred from the league for two editions.

Hazlewood praises Kohli's work ethics

PTI ■ LONDON

Australia pacer Josh Hazlewood has spoken highly of Royal Challengers Bangalore teammates Virat Kohli and Mohammed Siraj ahead of the World Test Championship final against India at The Oval starting June 7.

Hazlewood, who has been battling with multiple injuries over the last six months, had to cut short his IPL stint with a side issue. However, he feels he is not far from bowling full tilt as Australia gear up for the big final.

Talking about Kohli, whose wicket he will be targeting at The Oval, Hazlewood said the Indian superstar's work ethic makes him the player that he is.

"I think it's probably how hard he works (that stands out). His fitness first of all - and then his skill work and batting and fielding in particular.

"He is always out there (training) first and leaves last ... and the intensity he trains at all the time is at such a high level it drags everyone else along for the ride. That can leak on to the other players and improve them as well," Hazlewood told the ICC.

On RCB's leading wicket taker Siraj, who is expected to play a big part in the WTC final, Hazlewood said: "I was a bit late getting there (to RCB this year),

but before then he was on fire.

"He is up there at the top of the wickets every time, and the economy rate was probably the thing as bowling at Chinnaswamy (RCB's home ground) is impossible sometimes and he was going at six or six-and-a-half an over. His control was great and he is bowling well."

'CLOSE TO BOWLING FULL PACE: The Australian cricket team has been training in Formby in England ahead of the WTC final. Hazlewood trained with the team on Monday and said he is feeling good going into

the big game.

"My fitness is pretty good and it is just a matter of ticking off every session from here until that date (June 7) basically. "We will probably have anywhere from three to four more sessions - bat versus ball and then a couple of longer days in the nets as well or centre wicket down in London — so it is just ticking off those last few boxes and pulling up well from every session," he said.

"It was pretty close (to full pace today). I came down for a little bowl yesterday just to

loosen up and to get a bit more out of today's session, so it is feeling good. It is always good to get the first one out of the way and when we get to London we will steam in," he added.

Hazlewood could feature in only three games in the IPL before his injury flared up.

"In T20 you are bowling a lot of various different balls every over. A wide yorker, to a bounce, to a slower ball and it probably got jammed up a little bit and a bit of scar tissue from previous injuries flared up.

"It calmed down pretty quickly, I had a week off but I didn't quite get back to going 100 percent at IPL. But the last few bowls have been good and I have been building up nicely," he said.

Having played as many as 15 Tests against India, Hazlewood is looking forward to the challenge of playing the Asian giants at a neutral venue.

"It is a strange stat that as I think I have just played a lot of cricket against them. What is going to be interesting is playing them here in England.

"It is going to be interesting for both teams how they go about it and how different it is to playing them in Australia or in India as typically you only play them there," he said.

"That is the exciting thing about it and everyone is looking forward to next week," he added.

Bharat over Kishan, Umesh over Shardul for WTC XI: Sarandeep

PTI ■ NEW DELHI

Former India selector Sarandeep Singh says picking KS Bharat over Ishan Kishan as the wicketkeeper for the World Test Championship final against Australia is a no brainer and he would also choose Umesh Yadav over Shardul Thakur in the playing eleven.

In the absence of the injured Rishabh Pant, Kishan, who is yet to play Test cricket, can provide the x-factor but Sarandeep feels Bharat walks into the eleven as the frontline wicketkeeper.

"KS Bharat for sure. He is a proper Test match wicketkeeper and we saw that against Australia at home, he kept superbly. He has been around for a while and he should get the

opportunity," Sarandeep told PTI on Wednesday. The WTC final will be played at the Oval in London from June 7. The former India spinner said Kishan's time will come.

"Ishan is an opener. I am not saying he is not capable of playing Tests. He is one for the future but he opens in limited overs cricket. Things will be different at number six. "Yes he goes hard from ball one, which can be counter productive in England, but Bharat can also bat well and play shots also," he reasoned.

'Umesh's extra pace and old ball skills will come handy': Mohammed Shami and Mohammed Siraj, who were breathing fire in the recently-concluded IPL, will share the workload in the pace depart-

ment and the Indian team will need to choose between Umesh Yadav and Shardul Thakur as the third fast bowling option.

"I am picking Umesh ahead of Shardul because he has that extra pace and he can reverse the old ball, he can be very helpful on that Oval track," said Sarandeep.

"All of India's batters are in good form going into the one off game and that bodes well for the team," he said.

Stokes plans to play as allrounder in Ashes

AP ■ LONDON

England captain Ben Stokes eased concerns about his ability to bowl in the upcoming Ashes series because of long-standing knee issues and said Wednesday he is planning to play every test this summer.

"Unless I can't walk, I'll be on the field," Stokes said with a smile the day before England begins its one-off test against Ireland, which serves as a warmup for the five-match Ashes series against Australia.

After having knee issues during the tour of New Zealand in February, Stokes played only twice for Chennai Super Kings in the recently-finished Indian Premier League, sending down just one over for 18 runs.

However, the 31-year-old Stokes said his knee is much better than it was in New Zealand and he will take his place in the England team as an allrounder against Ireland at Lord's and then Australia.

"What I have done is I have got myself in a position where I'm not able to look back and regret or say I've not given myself the best opportunity to play a full role with the ball this summer," Stokes said.

"I've worked incredibly hard with the medical team in Chennai, liaising with the ECB

guys. I have got myself into a place where I feel like back at 2019, 2020 space in terms of my own body and fitness and everything like that."

Pushed about the exact nature of his knee problem, Stokes said: "We know what it is and it's about managing it."

"It's managing it with workload," he added, "and working it with the med team just to get through it."

England has already named its team for the Ireland test, with seamer Josh Tongue making his debut while fast bowlers James Anderson and Ollie Robinson are rested. Ireland has lost all six of its matches since gaining test status in 2017. That includes a defeat against England at Lord's in 2019.

Captain Andrew Balbirnie has said beating England would be "the biggest moment in Irish cricket history"

Thai Open: Kiran stuns Shi Yuqi

Lakshya, Satwik-Chirag too win, Sindhu makes early exit

PTI ■ BANGKOK

India's Kiran George scripted a stunning straight-game win over world number 9 Shi Yuqi of China but double Olympic medallist PV Sindhu made an opening round exit from the Thailand Open Super 500 tournament here on Wednesday.

Ashmita Chaliha and Saina Nehwal also made winning starts to their campaign in women's singles, while Lakshya Sen and world number 4 pair of Satwiksairaj Rankireddy and Chirag Shetty also progressed to the pre-quarterfinals.

On a day when Kidambi Srikanth and B Sai Praneeth also failed to cross the opening hurdle, 2022 Odisha Open winner Kiran, a product of the Prakash Padukone academy, notched up a 21-18 22-20 win over third seed Shi Yu Qi, who is a 2018 world championships silver medallist. Kiran will take on China's Weng Hong Yang next.

His academy mate Lakshya also dug deep to eke out a hard-fought 21-23 21-15 21-15 win over Chinese Taipei's Wang Tzu Wei. He is likely to square off against All England champion Li Shi Feng of China.

Commonwealth Games champion and top seeds Satwik and Chirag too had to work hard to outwit the Danish combination of Rasmus Kjaer and Frederik Sogaard 21-13 18-21 21-17 in a thrilling match.

A former world champion, Sindhu, however, faltered in the opening round, going down fighting 8-21 21-18 18-21 to Canada's Michelle Li in 62-minute match. In other matches, Ashmita, who came through the qualifiers, beat compatriot Malvika Bansod 17-21 14-21, while London Olympics bronze medallist Saina defeated Canada's Wen Yu Zhang 21-13 21-7.

Pujara's inputs invaluable for Indian batters: Gavaskar

PTI ■ PORTSMOUTH

Former captain Sunil Gavaskar on Wednesday reckoned Cheteshwar Pujara could provide valuable insights to his Indian teammates ahead of the World Test Championship final against Australia, having played extensively in the English County Championship.

With Pujara's knowledge and captaincy experience (at Sussex), his inputs could prove invaluable, especially against Australian batter Steve Smith, who is also a part of his county side.

The WTC final is scheduled to be held at the Oval in London from June 7-11.

"The fact that he is been around will mean that he will have also seen how the pitch has been behaving at The Oval.

"He might not have played at The Oval, he might be in Sussex not too far away from London but he will have kept an eye on what is happening and his inputs will be invaluable as far as the bat-

ting unit is concerned or even as far as the captaincy is concerned," Gavaskar told Star Sports.

"He will have the captains here as far as the Oval pitch is concerned and don't forget he has also been captaining the team, so he definitely will have worked out quite a few strategies seeing that Steve Smith, the Australian is his teammate at the moment."

Gavaskar also said the Indian batters, coming off the IPL, will have to adjust their bat speed ahead of the WTC final, and advised them to play as late as possible.

"I think they are going to look at their bat speed. Coming from T20 where the bat speed is very fast to Test cricket where the bat speeds got to be a lot more control, that is something they'll need to do," Gavaskar told Star Sports.

He also emphasized the need for batters to play as late as possible in English conditions, allowing for swing and avoiding the mistake of reaching out for the

ball.

"They'll need to play in England as late as possible to allow for the swing to do it's bit, not to reach out for the ball which often a lot of people make the mistake having played on good pitches.

"Wherever you play on good pitches, you tend to play through the line, not necessarily half volleys, but in England those deliveries can move just that little bit. So, I think those are the things that as a batter you need to watch out for."

He asked the bowlers to bowl fuller length deliveries to allow the Dukes ball to swing.

"As a bowling unit also you'll need to bowl a much fuller length for your new ball, for the bowlers to be able to get the movement in the air as well as after pitching."

Gavaskar highlighted the challenges India would face playing in English conditions.

"I think the English conditions are challenging because firstly we are used to play with the sun on our backs. When you are playing in England, often you are playing in conditions where there is no sun, it's a little overcast, the weather is a little bit cooler, so you sometimes wear a jumper.

"That's something that you know, the Indian player, West Indian players and Sri Lankan players are not really used to so that can be just a little bit of a dampener, little sort of light but you just feel little bit encumbered by that.
