CMO launches TB ACF campaign

CMO launches TB ACF campaign for the District

Two members of the team have been appointed for the campaign.

The district has been divided into 25 campaign areas, each covering a specific region. The campaign will focus on the following areas:

- Increased awareness about TB prevention
- Screening and diagnostic services
- Treatment and follow-up
- Monitoring and evaluation

The campaign aims to reduce the burden of TB in the district by providing early detection and effective treatment.

Laser, crackers show to add grandeur to Dev Deepawali

Ratna Mahamana Pandit ekadashi on November 27. Preparations for the installation of the idol of Lord Shiva have been going on in full swing for the past three months. The idol will be installed during the last 12 hours of the month.

The mahamana's kitchen is being used as the installation site. The idol will be made of black stone and will be consecrated in the presence of the mahamana.

The mahamana's family members have decided to participate in the event. Several crackers and firecrackers will be used to add grandeur to the occasion.

Children to get food at Angawangi centres

The Children Development Project has launched a programme to provide food to the children in the Angawangi area. The programme includes:

- Nutritional support
- Medical check-ups
- Psychological support

The programme aims to address malnutrition and improve the overall health of the children in the area.

Solve problems of farmers on priority: DM

The District Magistrate, Pratap Singh, has directed the officials to address the farmers' problems on a priority basis. The farmers have been facing difficulties due to the recent drought and other climatic factors.

The DM has urged the officials to work closely with the farmers and provide necessary support to overcome their difficulties.

Queen visits patients in Malviya's fifth generation

Queen visited the patients in the Malviya hospital on the occasion of Diwali. She interacted with the patients and expressed her wishes for their speedy recovery.

The queen also visited the patients in the TB ward, where she received a warm welcome. She inspected the facilities and expressed her satisfaction with the standards.

Atiq's aide arrested after encounter

Atiq's aide was arrested after an encounter. The police had been searching for the aide in connection with a terror case.

The police had taken the aide into custody and were conducting a thorough investigation.

Aradhana of Mahamana re-installed at Malviya Bhavan in BHU

The Aradhana of Mahamana was re-installed at Malviya Bhavan in BHU. The re-installation ceremony was attended by the university officials and members of the Mahamana's family.

The Aradhana is an important event in the university's calendar, and it is performed in honour of the Mahamana's memory.
It's time leaders of the US and China stopped winking or winning away from the real issues related to sustainable development goals

China is said to be being close to the US in the realm of climate change, yet a concern of the US is its dominance in the military against China. It’s a real issue, given China’s recent investments in the military and nuclear weapons.

The US has made considerable investments in the military and nuclear weapons. It’s a concern that China is not being transparent about its military investments.

The US and China have been working together to reduce greenhouse gas emissions. China has a plan to reduce carbon emissions by 2030, while the US has a plan to reduce carbon emissions by 2050. Both countries are working on this issue, but the US is not very transparent about its progress.

Giving a safe passage to delinted SEZs

Development of Enterprise and Service Zones in India gives a ‘safe passage’ to all those SEZ units that haven’t been able to fulfill their export commitments.

WORLD leaders at last year’s General Assembly and heads of State at the recent Munich Security Conference are convening a United Nations High-Level Meeting on AMR. “We are at a critical point in time to act against AMR. The attention to AMR is growing and it is right so,” the High-Level Meeting on AMR Next step in a critical battle against AMR, Ruddick said. “The United Nations is putting a spotlight on AMR and its consequences, conveying its call to action for global leaders to set a course for a brighter future.”

India is one of the most affected countries. The threat of AMR is growing, and the country is faced with a critical challenge in the fight against it. The World Health Organization (WHO) has warned that India is one of the most affected countries in the world, with a high burden of resistant infections. The situation is alarming, and India is not alone in facing this challenge. The United Nations has called on all countries to take urgent action to combat AMR, and India is one of the countries that need to act.

The image on the left shows a group of people holding a banner with the words “AMR: Developing countries and the SDGs.” The banner highlights the need for urgent action to address AMR and achieve the Sustainable Development Goals (SDGs). The image underscores the critical role that AMR plays in achieving the SDGs, particularly in terms of healthcare and economic development. The group of people in the image is diverse, representing various sectors, including healthcare practitioners, policymakers, and civil society members.

The text on the right discusses the importance of AMR and its impact on global health. It emphasizes the need for urgent action to address AMR and achieve the SDGs. The text also highlights the role of the United Nations in convening a High-Level Meeting on AMR, which aims to mobilize global leaders to set a course for a brighter future.

The text concludes by urging all countries to take urgent action to combat AMR. It underscores the importance of international cooperation and the need for countries to work together to address this critical challenge.

RUPA GUPTA: The death of a policy analyst, views are personal

AMR: Developing countries and the SDGs

Out of the 5 million AMR-related human deaths that occur every year, most of them are happening in low- and middle-income countries.

The burden of disease is also higher. That is why Uganda is working across sectors such as food and agricultural development, sanitation and hygiene, and the environment to tackle AMR. The focus is on improving the health of people, animals and the environment. By linking humans and animals and their environments, One Health can help combat AMR and reduce the burden of disease in low- and middle-income countries.

Antimicrobials are public goods.

There are several issues of access and efficacy of antimicrobials, starting with the availability and affordability of safe and effective antimicrobials. The drivers of AMR are in place, from the overuse and misuse of antimicrobials in agriculture, animal health, food, health, and agriculture. The development of AMR is related to global health, human health, and agriculture. The role of developed nations is crucial in addressing AMR.

Antimicrobials should be regarded as global public goods. Governments should strengthen their health systems to ensure access to essential health-care services, particularly antimicrobials. Antimicrobials are essential to prevent and treat infectious diseases, and to maintain and improve the health of people, animals, and the environment. By linking humans and animals their environments, One Health can help combat AMR and reduce the burden of disease in low- and middle-income countries.

Information, knowledge.

When it comes to addressing AMR, information and knowledge are crucial. The lack of information and knowledge is not only detrimental to the global community but also has significant implications for the health and well-being of individuals and communities. In particular, it is important to understand the impact of AMR on society, the economy, and the environment.

Antimicrobials are essential to prevent and treat infectious diseases, and to maintain and improve the health of people, animals, and the environment. By linking humans and animals and their environments, One Health can help combat AMR and reduce the burden of disease in low- and middle-income countries. Antimicrobials should be regarded as global public goods. Governments should strengthen their health systems to ensure access to essential health-care services, particularly antimicrobials. Antimicrobials are essential to prevent and treat infectious diseases, and to maintain and improve the health of people, animals, and the environment.

The One Health approach is vital for understanding the complex interactions between humans, animals, and their environments. By integrating the perspectives of multiple disciplines, One Health aims to address the underlying causes of AMR and develop comprehensive strategies to prevent and control it.
A Russian shipment of intelligence sensors and for a decision a four- way cease-fire, including Israel, has been made by Palestinian groups and the Israeli military. The agreement was reportedly brokered by the US and Egypt, with the goal of ensuring a peaceful resolution to the ongoing conflict.

The cease-fire, scheduled to begin at 12:00 noon (1900 GMT) on Thursday, follows weeks of intense fighting between Israel and Hamas, a Palestinian militant group, over the enclave's control. The fighting, which started on May 10, has so far claimed over 250 lives, mostly civilians, and displaced hundreds of thousands from their homes.

Under the terms of the agreement, both sides have agreed to stop all hostilities, allow for the exchange of medical aid and vaccines, and facilitate the release of Palestinian prisoners from Israeli jails. The agreement also calls for the establishment of a mechanism to monitor the ceasefire and ensure its enforcement.

Israel has agreed to lift its blockade on Gaza and allow for the entry of humanitarian aid and medical supplies, while Hamas has agreed to stop all rocket attacks on Israel. The two sides have also agreed to hold talks to address longer-term issues, including the status of Gaza and the future of the Palestinian people.

The agreement was welcomed by the international community, with UN Secretary-General Antonio Guterres calling it a "step forward." However, some critics have expressed concern that the agreement may not be sufficient to address the root causes of the conflict and that more needs to be done to ensure a lasting peace.

Still, the agreement represents a significant shift from the previous days, where tensions were running high and the risk of a full-scale war appeared to be increasing. The ceasefire, if maintained, could provide a much-needed respite for both Israel and Gaza, allowing for a period of calm and potentially enabling the two sides to reach a more comprehensive agreement in the future.
A new left-wing opposition party in Finland, the Nordic Resistance Movement (NRM), has won a seat in the country's national assembly, the parliament, for the first time. The party, which is known for its far-right ideology, ran on a platform of anti-immigrant and anti-elite policies and has been accused of spreading hate speech.

The NRM, which is led by Eero Heiska, campaigned on a platform of opposing immigration and criticising the European Union's immigration policies. The party also pledged to withdraw Finland from the European Union and to reintroduce border controls.

The results of the election were announced on Thursday, and the NRM won one of the 200 seats in the parliament. The party had previously been banned in Finland, but it was recently given the right to contest the election after a court ruling.

The election was seen as a test for Finland's right-wing government, which has been in power since 2019. The government has been accused of being too soft on immigration and has faced criticism from the right for not doing enough to control the flow of migrants into the country.

The NRM's victory is likely to have a significant impact on the political landscape in Finland, where the centre-right party has traditionally held the majority of seats.

The party's success in winning a seat in the parliament is likely to increase pressure on the government to take tougher measures on immigration and to appeal against the court ruling that allowed the party to contest the election.

EU sends border police reinforcements to Finland

The European Union deployed border police reinforcements to Finland on Thursday, as authorities prepared for a surge in arrivals of migrants and refugees from the Baltic states and Russia.

The reinforcements, 200 officers and 53 support staff, were deployed to help with border control at four key points along the Finnish border with Russia, including in the towns of Sortavala and Vyborg.

The move follows a spike in the number of migrants and refugees crossing the border in recent weeks, with estimates suggesting that around 20,000 people have entered Finland since the start of the year.

The Finnish government has been under pressure to take action to manage the influx, and the reinforcements are seen as a key step in the country's efforts to tackle the issue.

The deployment of the border police is part of a wider package of measures that has been put in place by the EU to help member states deal with the surge in arrivals.

EU leaders have committed to providing support to member states facing challenges, and the reinforcements are in line with this commitment.

Organisations from NATO countries have also been deployed to help with border control, with a team of around 200 officers and support staff deployed from the United States, the United Kingdom, and Germany.

The deployment of the border police is seen as a significant step in the EU's efforts to manage the influx of migrants and refugees, and it is likely to be seen as a positive development by both the Finnish government and by organisations working with migrants and refugees.
Hybrid mutual fund schemes have been gaining momentum over the next six years, with various mutual funds and asset management companies (AMCs) announcing a transition to new schemes. Praveen, a mutual fund expert, said in a statement.

The move is aimed at providing investors with an opportunity to invest in a diversified portfolio of mutual funds, with a focus on equity, debt, and hybrid securities. Praveen said that the move will enable investors to diversify their investments and achieve better returns.

Hybrid funds are mutual funds that combine elements of both equity and debt securities in a single investment basket. They allow investors to participate in both the growth and stability of the market, as well as benefit from the lower volatility of debt securities. Praveen said that hybrid funds are ideal for investors who want to achieve a balance between growth and stability.

The move is also expected to attract more institutional investors, as hybrid funds provide a diversified portfolio of securities that can appeal to a wider range of investors.

Praveen also said that the move will help to increase the liquidity of the market, as hybrid funds are expected to attract more investors and provide a stable source of funds for the market.

Praveen said that the move is part of a broader trend towards diversification in the mutual fund industry, with more investors looking for ways to diversify their investments and achieve better returns. He also said that the move is expected to increase competition in the market, with more AMCs entering the hybrid fund space in the coming years.

Praveen said that the move is expected to have a positive impact on the economy, as it will help to increase the supply of long-term funds, which are crucial for infrastructure development and other long-term projects.

Hybrid funds are expected to be a major driver of growth in the mutual fund industry in the coming years, with more investors looking for ways to diversify their investments and achieve better returns. Praveen said that the move is expected to attract more institutional investors, as hybrid funds provide a diversified portfolio of securities that can appeal to a wider range of investors.

Praveen said that the move is expected to have a positive impact on the economy, as it will help to increase the supply of long-term funds, which are crucial for infrastructure development and other long-term projects.

Hybrid funds are expected to be a major driver of growth in the mutual fund industry in the coming years, with more investors looking for ways to diversify their investments and achieve better returns. Praveen said that the move is expected to attract more institutional investors, as hybrid funds provide a diversified portfolio of securities that can appeal to a wider range of investors.
Djokovic ready for one final push

**AP**

Jokicov is not ready to start letting down just yet. The 20-year-old Serbian, looking for his third Grand Slam title at the French Open, said he would do everything in his power to win the tournament.

**AP**

In the women’s draw, Serena Williams is the top seed and will face her sister Venus in the quarterfinals. The sisters have never met before in a grand slam final and Serena has a 2-0 lead in their head-to-head record.

**AP**

Williams, who has been dealing with a right knee injury, said she is ready to play the best of her game.

**AP**

She will face her sister Venus in the quarterfinals, who is currently ranked 14th in the world. Venus has won three Grand Slam titles and is a four-time French Open champion.

**AP**

In other news, Rafael Nadal continued his streak of success in his fourth appearance at Roland Garros. He defeated Novak Djokovic in straight sets to reach his 11th Roland Garros final and will face Novak Djokovic in the final.

**AP**

Nadal said he is looking forward to the final, especially after his win over Djokovic, whom he has beaten only once in nine previous meetings.

**AP**

He said, “I am really looking forward to the final. It will be a great opportunity to win the title and make it four in a row.”

India announce 26-member contingent for Junior World Boxing Championships

**PTI**

The Indian team, which includes both men and women, will be led by coach Ramalingam Sumathy.

**PTI**

The Championships will be held in Buenos Aires, Argentina, from June 1 to 5.

Australia rallies to beat Czech Republic

**AP**

In the knockout stage of the World Cup, Australia will face Czech Republic.

**AP**

Australia wins 2-0 thanks to goals from Trent Sainsbury and Jamie Maclaren.

**AP**

Australia will face Czech Republic in the group stage of the World Cup, which begins on June 14.

Man United head to Goddard Park

**AP**

Manchester United will face Everton in the Premier League on Thursday. The Red Devils are looking to continue their impressive run of form.

**AP**

Manager Ole Gunnar Solskjaer is confident his team can secure all three points.

**AP**

Solskjaer said, “We are in great form and we want to maintain that momentum.”

New Chiesa and Thuram meet again

**AP**

Juan Cuadrado and Kylian Mbappe will face each other again in the Ligue 1 game this weekend.

**AP**

Cuadrado and Mbappe have met twice already this season, with the Frenchman scoring in both matches.

**AP**

Cuadrado said, “It’s always special to face a player you’ve played against before.”

**AP**

Mbappe added, “We respect each other and we enjoy the rivalry.”

Brazil ends year in poor shape

**AP**

Despite winning three of their last four games, Brazil finished the year in poor shape.

**AP**

The team has not won a single match in 2023, with two losses and a draw in their last three games.

**AP**

With the World Cup just around the corner, Brazil will need to improve their form if they are to succeed in Russia.

Harika loses in final of Speed Chess tournament
