Prime Minister Narendra Modi on Thursday said the Centre will “not let prices touch the 100 mark” if the rising prices of vegetables persists, in a further sign that the administrative apparatus is in high gear to stem price rise.

“Prices have to come down now,” Mr. Modi said in a video conference with Chief Ministers of 15 states, further assuring them that the Centre is determined to keep the prices of vegetables from touching the 100 mark.

The Centre is also planning a series of meetings with vegetable growers to ensure that the prices are controlled. This will be done in a series of meetings with the relevant states, according to Mr. Modi.

Mr. Modi also added that the Centre’s efforts will be to ensure that the prices of vegetables do not touch the 100 mark. “This is not just a matter of our government, but also the responsibility of all the states,” he added.

He also assured the farmers that the Centre is committed to ensuring that the prices of vegetables do not touch the 100 mark. “The Centre is committed to ensuring that the prices of vegetables do not touch the 100 mark,” he said.

In a move to ensure that the prices do not touch the 100 mark, the Centre has also told the states to take all necessary steps to ensure that the prices of vegetables do not cross the 100 mark.

Mr. Modi also added that the Centre is committed to ensuring that the prices of vegetables do not touch the 100 mark. “The Centre is committed to ensuring that the prices of vegetables do not touch the 100 mark,” he said.

The Prime Minister also assured the farmers that the Centre is committed to ensuring that the prices of vegetables do not touch the 100 mark. “The Centre is committed to ensuring that the prices of vegetables do not touch the 100 mark,” he said.

In a move to ensure that the prices do not touch the 100 mark, the Centre has also told the states to take all necessary steps to ensure that the prices of vegetables do not cross the 100 mark.

Mr. Modi also added that the Centre is committed to ensuring that the prices of vegetables do not touch the 100 mark. “The Centre is committed to ensuring that the prices of vegetables do not touch the 100 mark,” he said.

In a move to ensure that the prices do not touch the 100 mark, the Centre has also told the states to take all necessary steps to ensure that the prices of vegetables do not cross the 100 mark.

Shashi Kumar, Joint Secretary in the Ministry of Rural Development, has said that there will be around 5,000 new employment opportunities for youths across the country through this initiative.

The Ministry of Rural Development, Government of India, has announced the launch of the Pradhan Mantri Kaunsaalga Yojana (PMKSY) which aims to provide employment and skill development opportunities to youth in rural areas.

The ministry, in a statement, said that under the scheme, which is being implemented across 532 districts across the country, around 5,000 new job opportunities will be created for young people aged between 18 and 40 years. These jobs will be created in various fields such as agriculture, animal husbandry, fisheries, forestry, horticulture, and villages.

According to the Ministry, the scheme will provide opportunities for skill development and entrepreneurship in the rural sector. It will also help in the overall development of the rural economy by providing a better livelihood to the rural youth.

The scheme is a part of the government’s efforts to promote rural development and create employment opportunities for the youth. The ministry has emphasized that the scheme will provide a boost to the rural economy and help in the overall development of the country.

The Ministry of Rural Development, in its statement, said that the scheme will be implemented through the involvement of various stakeholders, including the state governments, local bodies, and private sector players. It will also provide a platform for the youth to explore entrepreneurship opportunities and contribute to the country’s economic growth.

The scheme is expected to have a positive impact on the rural economy and help in the overall development of the country. The government is committed to creating employment opportunities for the youth and promoting rural development.

The scheme is expected to have a positive impact on the rural economy and help in the overall development of the country. The government is committed to creating employment opportunities for the youth and promoting rural development.
ED, CRPF smuggling money at BJP’s behest, claims Bhupesh

Bijapur has 245 polling booths for which a total of 30,833 votes will be cast in two rounds. The first round of polling will be held on November 6 and 7 for Bijapur Assembly constituency. The second round of polling will be held on November 13 and 14 for other constituencies.

The Congress will not contest Bijapur, but it has decided to contest in other constituencies. The party has decided to focus on Bijapur, which it lost to the BJP in the 2018 Assembly elections.

A statement carrying a warning for the polling staff, apparently issued by the West Bastar Division Committee of the outlawed CPI (Maoist), surfaced in a remote area of the district.

"A vote for each other!" is the refrain of the | Kanker town for this month’s public rally in the Chhattisgarh capital Raipur in which the mascot for the Election Commission in the Chhattisgarh capital Raipur in which the mascot for the Election Commission was decorated with earthen lamps.

Amit Shah to release poll manifesto today

The Election Commission has already identified 1,066 nominations, of which 958 nominations have been found valid. The remaining 108 nominations are being challenged by candidates. The commission has already decided to conduct bypolls in two seats where the nominations were not found valid.

In the last four decades, there has been a continuous increase in the number of voters in Bijapur, which is evident from the data collected in the last five Assembly elections.

As many as 1,63,14,479 voters in Bijapur are eligible to exercise their franchise in the upcoming Assembly elections on November 7 and 14. The number of voters in the district is expected to increase in the next few years, which will further increase the number of voters.

The party has decided to focus on Bijapur, which it lost to the BJP in the 2018 Assembly elections.

A medical alert system in developing nations is crucial to the survival of the world. This system is essential for the effective delivery of healthcare services in rural and remote areas where access to medical care is limited. The system should include telemedicine, emergency response, and patient monitoring. It should also provide training and support for healthcare providers in underserved regions. The success of the medical alert system will depend on the availability of reliable and affordable technology, as well as the involvement of local communities in its implementation. The system will need to be scalable and adaptable to meet the changing needs of the population. Money is needed to fund the development and implementation of the medical alert system. The benefits of a medical alert system in developing nations are numerous and far-reaching, including improved access to healthcare, reduced healthcare costs, and increased quality of life for patients. The world must come together to support the development of a medical alert system in developing nations to ensure that every person has access to the care they need.
Students' movement in AU starts gaining momentum

VICE-CHANCELLOR of the University of Allahabad (AU) Prof Dr Babu Ram started on Thursday demanding the registration of the students' union on the campus.

The students' movement at Allahabad University (AU) started gaining momentum on Thursday as Vice-Chancellor Prof Dr Babu Ram, who is also the general secretary of the AU Students' Union, began his fast in front of theAU students' union office and asked students to carry forward the agitation against the renaming of the university.

Addressing the students, the Vice-Chancellor demanded immediate registration of the students' union on the campus.

He also said that many students, who were not willing to participate in the fast, had put their signatures on a memorandum to that effect.
Why a beeline to overseas universities?

Over the years, there has been a substantial increase in the number of Indian students opting to go abroad for higher studies.

Students in large numbers are looking West for higher education. The rise in the number of students looking to go to a university in a foreign country has led to an increase in the demand for top-notch universities. This has resulted in a significant increase in the demand for top-notch universities. This has resulted in a significant increase in the number of students opting to go abroad for higher studies. However, despite the advantages that are lucrative for students in such countries, Emmanuel Macron has also stepped up the demand for top-notch universities. Higher education is an essential aspect of a country’s development. It has the potential to provide a wide range of benefits, including improved economic growth, expanded opportunities for students, and increased global competitiveness. In addition, higher education also plays a crucial role in shaping the future workforce and contributing to a country’s overall progress. Therefore, it is essential to ensure that students have access to high-quality education and that they are encouraged to pursue their academic goals. However, despite these advantages, higher education in India still faces several challenges. One of the major challenges is the high cost of tuition and living expenses. This can significantly reduce the chances of students pursuing higher education in India. Moreover, the quality of education in India is often questioned, and students may prefer to pursue their studies abroad. Therefore, it is crucial for India to address these challenges and improve the quality of education in its institutions.

Diplomats from 24 nations, including the US, attended a summit in London Wednesday to work together to contain the global spread of AI, by gathering advances in artificial intel-

19. This was an intervention in Afghanistan, which was a country troubled by a long conflict that had lasted more than 30 years. The Afghan people were living in a state of poverty and ignorance, and the government was weak and unstable. The situation was serious, and it was urgent to take action to help the Afghan people. The conference was attended by representatives from various countries, including the US, China, and the UK. The aim was to work together to improve the situation in Afghanistan and to promote peace and development in the region.

**Diplomats to pause fighting and ease siege intensifies**

Ralph (Gaza Strip) (AP) -- Gaza Strip, Gaza City on Thursday, as the body of the late Israeli general, Yaakov Amidror, arrived at the international airport in the afternoon of the same day. The body would arrive at the airport at 18:00, with no in the ceremony, the burial of the body was delayed until the same day. The burial, conducted by the Palestinian Authority, was held on Thursday, but due to the airport's closure, the body was transported to the Gaza Strip via the Rafah border crossing.

The statement said that the body would be kept in the Gaza Strip for a period of days, during which time all diplomatic missions and the UN would be unable to enter the Gaza Strip to pay their respects. The statement also stated that the body would be transported to the Gaza Strip via the Rafah border crossing, and that the Palestinian Authority would be responsible for all aspects of the transportation and burial arrangements.

**Countries at UK summit pledge to tackle AI's potentially ‘catastrophic’ risks**

In a statement released on Thursday, London, government officials announced that the UK would launch a new national security strategy for AI and set up a new national cybersecurity strategy. The strategy would aim to tackle the potential risks of AI, including the use of AI by state actors and non-state actors, and to ensure that AI is developed in a way that is safe, secure, and ethical.

The statement said that the UK would work with international partners to establish a new AI risk management framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI regulatory framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI data sharing framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI ethics framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI safety framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI compliance framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI transparency framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI accountability framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI governance framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI partnership framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI public engagement framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI research framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI innovation framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI investment framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI education framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI workforce framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI citizen framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.

The statement also said that the UK would work with international partners to establish a new AI government framework, which would be based on a risk assessment of AI systems and technologies. The framework would be used to identify and prioritize potential risks, and to develop strategies to mitigate those risks. The framework would be reviewed annually, and new risks would be added as they emerged.
US sanctions more foreign firms

**Moscow (AP):** President Vladimir Putin has signed a bill renewing US sanctions against Russia over its alleged violation of a treaty designed to limit medium-range missiles, Moscow said Friday.

Putin has long been accused of trying to disrupt the United States and other countries and has long been accused of being involved in the activities of Russian spies and allies, including select Russian officials.

North Korea has likely sent missiles and shells to Russia, says Seoul

**Seoul (AP):** North Korea has likely sent missiles and shells to Russia, South Korea's defence ministry said Friday.

The missile launch came on Thursday, when North Korea fired two short-range ballistic missiles into the sea.

The defence ministry said that the launch was a response to the UN Security Council's decision on Wednesday to impose new sanctions against North Korea.

The launch comes days after North Korea tested a new missile that could reach South Korea.

North Korea has been conducting missile tests and has shown off new equipment in recent weeks, including a new submarine-launched ballistic missile.

The UN Security Council has imposed tough sanctions on North Korea in response to its missile and nuclear tests.

North Korea is a nuclear-armed state and has tested several long-range missiles in recent months.

Bayern Munich crash out of German Cup

Newcastle ends Man United’s defense of League Cup with 3-0 win in lowest blow for Ten Hag

Bayern Munich Municipal hand out a big blow to Ten Hag’s side as they eliminated Manchester United from the competition.

United suffered a 3-0 defeat against Bayern Munich in the quarterfinals of the German Cup on Tuesday, with a late goal from Robert Lewandowski sealing the win for the Bundesliga giants.

The match was played at the Allianz Arena in Munich, and Bayern Munich dominated from the very beginning. They took the lead in the 43rd minute through a goal from Leroy Sane, and then added a second goal after the break thanks to a Lothar Matthaus header.

Bayern Munich continued their dominance in the second half and sealed the win with a third goal in the 70th minute from Robert Lewandowski, who has now scored a record 27 goals in all competitions this season.

The victory means that Bayern Munich will now face either Eintracht Frankfurt or RB Leipzig in the semi-finals of the German Cup.
