**Jakkampudi Colony likely to be merged with VMC**

Vasnapanta Vasanth

The YSR gram panchayat, also known as Vasnapanta Vasantha Colony, located close to Vijayawada, is likely to be merged with the Vijayawada Municipal Corporation (VMC). Two and a half years ago, the Central government constituted the VMC, with the Union government providing 75% of the capital funds, for maintaining water supply and sanitation.

Sources indicate that VMC officials have taken up proposals to merge the gram panchayat with the VMC. The gram panchayat has not agreed to be merged under the VMC, but instead has sought an increase in revenue from water supply and sanitation.

According to the proposal, the VMC will be responsible for the management of water supply and sanitation within their respective gram panchayats. However, the VMC has not yet agreed to this proposal, and the government is yet to make a decision on the matter.

The Vasnapanta Vasantha Colony (VMC) has been established 15 years ago as part of the Jakkampudi area, which falls within the Vijayawada Municipal Corporation (VMC). The area is located close to Vijayawada, with its premises of the temple on premises of the temple on the premises of the temple.

Further, the government has suggested implementing the same. However, the VMC has not yet agreed to this proposal, and the government is yet to make a decision on the matter.

**LIFE TIME AWARD FOR ONCOLOGY**

Dr Raghunath Rao was presented with the Lifetime Achievement Award in Oncology - LIFETIME AWARD, at the third Indian Cancer Congress that took place in Visakhapatnam. At the congress, he was honored for his outstanding contributions to the field of oncology and for his commitment to the advancement of oncology in India.

The event was attended by Dr Raghunath Rao, along with several other prominent oncologists and medical professionals from across the country.

Dr Raghunath Rao has over 30 years of experience in the field of oncology. He has made significant contributions to the field of oncology and has been a pioneer in the development of cancer treatment approaches in India. He is well-known for his holistic approach to cancer treatment, emphasizing the need for a multidisciplinary approach to treatment.

Dr Raghunath Rao’s contributions to the field of oncology have been widely recognized, and he has been a pivotal figure in the advancement of oncology in India. His work has been instrumental in improving the quality of care provided to cancer patients and in raising awareness about cancer prevention and treatment.

**PRAYING FOR SOULS**

The All Souls Day in Vijayawada

Two and a half years ago, an Italian scholar was buried in the Vasnapanta Vasantha Colony. However, the Italian government did not provide the funds for the colony, as per his request. The government is yet to make a decision on the matter.

**APSPCCR inspection unearths multiple concerns in Vijay school**

APSPCCR Director, Venkataramana Reddy

The APSPCCR (Andhra Pradesh State Pollution Control Board) has conducted an inspection of the Vijay school, which is located in the city of Vijayawada. The inspection revealed multiple concerns, including lack of proper drainage facilities and improper plumbing arrangements.

The inspection team observed that the school did not have proper drainage facilities and improper plumbing arrangements. The observations were made after the school had been closed for the academic year.

**Four part of my marriage hurt as bus rams tankers**

Officiating I&PR Minister, B. V. Muralidhara

A four-year-old boy was injured when a private bus rams into a tanker parked near the Vijayawada Municipal Corporation (VMC). The incident occurred on the premises of the temple on the premises of the temple.

The boy was injured when the bus rams into a tanker parked near the VMC. The tanker was carrying fuel for the temple.

The boy was rushed to the hospital and is currently under treatment.

**ACA to host U-19 ODI Quadrangular Series from November 13 to 27**

ACA (All India Cricket Association) is to host an exciting international cricket tournament from November 13 till the 27th. The tournament will be held at the ACA stadium of Vijayawada, the Board first-class stadium in Visakhapatnam, and the Chikkaballapur stadium in Chikkaballapur.

**Two teams to check money flow to TS**

Director, Department of Employment and Training, Amzath Basha

The Director, Department of Employment and Training, Amzath Basha, has said that the Telangana government has formulated a special team to check money flow to Telangana.

The team will be responsible for examining the money flow to Telangana and ensuring that it is being used in the best way possible. The team will consist of experts from various fields, including law, finance, and economics.

**Digital classroom inaugurated at Guntur TVS**

I&PR Minister, B. V. Muralidhara

The I&PR Minister, B. V. Muralidhara, has inaugurated a digital classroom at the Guntur TVS (Technical Vocational School) in Guntur. The digital classroom will be equipped with the latest technology and will provide students with access to a wide range of digital resources.

The inauguration ceremony was attended by the Guntur TVS principal and faculty members. The digital classroom will help students to learn more effectively and will provide them with a better learning experience.
West Godavari District Collector Prasanth Reddy has visited that strict actions will be taken against the illegal liquor sellers and officers to ensure law and order in the district. The Collector had a meet- ing with the officials centred around the PC-PMPT ACT implementation in the district. During the meeting, the Collector said that the government decided to implement the PC-PMPT ACT and the strict action would be taken against the lawless people. Everyone should know that the action will be taken against anyone who tries to disrupt the law. Police Commissioner Ravi Ganeswar Rao was among those who were present.

The Collector ordered the officials to take strict measures to ensure that there is no illegal liquor sales and brewing in the district.

The Collectorate funded a Micro Filter Unit sanctioned for Nunna village in Bhimavaram and the new filter unit was stopped due to lack of maintenance.

In order to solve the drinking water problem of around 5 lakh litres to 6 lakh litres of water per day, the Collectorate had reviewed the steps being taken in this regard, and it was decided to supply 24 hours drinking water to the people of the District. The Collectorate would like to increase the supply to 10 lakhs litres during the rainy season.

The Collectorate has decided to carry out the micro-filter unit in Nunna village in order to supply water to the people of the village. The Collector had visited Nunna village and informed the villagers about the supply of water from the micro-filter unit.

The Collectorate also reviewed the steps being taken to supply drinking water to the people of the district. The Collectorate has decided to supply drinking water to the people of the district from the Micro Filter Unit sanctioned by the Collectorate.

The Collectorate is working towards the supply of drinking water to the people of the district, and it is decided to supply drinking water to the people of the district from the Micro Filter Unit sanctioned by the Collectorate.

17-year-old boy claims custodial violence by police in Kottayam district

A 17-year-old boy, believed to be from Kottayam district, has claimed that he was beaten by police personnel while in police custody.

The boy, who is said to have been arrested for a theft-related offense, alleged that he was beaten up by police personnel while in police custody. The family of the boy has filed a complaint with the police, and the case is under investigation.

Meanwhile, the NIA has launched an investigation into the matter, and the police have arrested several suspects in connection with the case.

INDIA CORNER

The government has reserved 75% of the national capital acquisition budget, which amounts to Rs. 4,607.90 crores, for projects from companies belonging to families from different states, according to a notification issued on Thursday.

The notification was issued in response to a question in the Lok Sabha by Congress member Shyamkumar Mishra, who had asked the government to reserve a certain percentage of the national capital acquisition budget for projects from companies belonging to families from different states.

The notification said that the government had approved the reservation of 75% of the national capital acquisition budget for projects from companies belonging to families from different states, to ensure that the benefits of the national capital acquisition budget are spread across different states.

The notification also said that the government had already issued a notification in 2021, reserving 75% of the national capital acquisition budget for projects from companies belonging to families from different states, and that the government was now issuing another notification to clarify the matter.

The notification was signed by the Finance Minister, Nirmala Sitharaman.

BOND OF SECRECY

The SC ruling on the ‘opacity’ of electoral bonds can be a game-changer for political donations.

S

I

m any democracy, electoral transparency and accountability are paramount. From a task of political funding, electoral bonds have turned into a smoking gun. The Supreme Court’s (SC) recent ruling on the ‘opac

ity’ of electoral bonds is a step towards making political campaigns more transparent. The SC has made it clear that electoral bonds, which are essentially gift certificates, will be considered political donations if they are not disclosed by the political parties. This ruling is significant because it would bring political donations under the scrutiny of the Income Tax Department and the Central Board of Direct Taxes (CBDT).

The SC ruling is a major victory for transparency in political funding. It has long been pointed out that political parties in India are not required to disclose the sources of their funding. This has led to widespread allegations of corruption and malpractice. The SC ruling on electoral bonds will help to bring this practice under control. The court has also ordered the government to set up a committee to study the issue of political funding and to come up with recommendations.

INDIA MAY HAVE A BIGGER ROLE IN W ASIA

West Asia is in turmoil and may need Indian intervention to stabilise

KUMAR DEEPAK

The on-going pounding of the Gaza strip by Israel, as a retaliation to the heroic uprisings against the Israeli occupation, is setting off geopolitical alarms across the globe. The current conflict seems to be a matter of survival for the Palestinians, who are facing a war of attrition, while Israel is using its superior military might to suppress the Palestinian resistance. The conflict is not just about power and resources, but also about ideology and identity. The root causes of this conflict are deeply rooted in the history of the region, and any solution must address these issues.

The current conflict is a result of the rise of Islamic extremism, which has led to the radicalization of some Muslim groups in the region. This has led to a rise in terrorism and violence, which has destabilized the region. The conflict has also been exacerbated by external factors, such as the presence of Israel and the US in the region, which have been accused of supporting the conflict.

The conflict has also led to a humanitarian disaster, with thousands of Palestinians being killed and injured. The international community has been slow to react, and the response has been inadequate.

India has a role to play in this conflict, and it should not be an outsider. India has a long history of engagement with the region, and it has a strong relationship with both Israel and the Palestinians. India should use its influence to promote peace and stability in the region.

**India UK negotiations on for proposed FTA**

Negotiations between senior officials of India and the UK on an FTA are on. Both sides agree on a bilateral approach to concluding an agreement, with talks held on specific issues related to goods and services. The talks are expected to continue until the end of this year, and conclude in 2024. The two sides have identified 15 issues on which they are willing to negotiate.

Alok Bansidhar Shriram, Chairman of the Organisation of Employers (India) and Chairman of the Grievance Appellate Committee, said that the negotiations represent a significant step forward in the development of a free trade agreement between the two countries. He added that the agreement would provide benefits to both countries, particularly in the areas of trade and investment.

India is also looking for a more balanced agreement with the EU in markets in such sectors as technology and services, as well as financial services and communication services. On the other hand, the UK is looking to make payments more efficient and reduce the amount of time that money takes to be transferred.

**India bans digital currency; digital rupee launch**

The Reserve Bank of India (RBI) has banned digital currency and does not recognize it as legal tender. The move comes amid concerns over the escalating use of cryptocurrencies, which have been linked to money laundering, terrorist financing, and fraud.

**Water pollution in India**

India has one of the highest rates of water pollution in the world. The country has a total of 170,000 km of rivers and 2,100,000 km of canals, but only 20% of the country’s freshwater is considered safe for drinking. The problem is exacerbated by industrial and agricultural pollution, as well as the disposal of untreated sewage into rivers and lakes.

**India’s share of global economy**

India’s share of the world’s GDP is currently estimated at 3.02%.

**India’s trade deficit**

India’s trade deficit with the US increased by 48% to $72.1 billion in the first quarter of FY24. The deficit with China increased by 14.2% to $74.2 billion, and with the EU increased by 33.3% to $10.8 billion.

**India’s inflation rate**

India’s inflation rate has been increasing in recent months, with the consumer price index (CPI) rising to 7.5% in June 2023. The Reserve Bank of India (RBI) has increased interest rates four times in the last year, to 5.00%.

**India’s population growth**

India’s population is estimated to be around 1.3 billion people, making it the second most populous country in the world after China. The population is expected to reach 1.6 billion by 2050.

**India’s technology sector**

India’s technology sector is one of the fastest-growing sectors in the country, with the industry contributing significantly to the country’s GDP. The sector employs around 9 million people and is home to some of the world’s largest IT companies.

**India’s renewable energy sector**

India’s renewable energy sector is also growing rapidly, with the country aiming to reach 450 GW of renewable capacity by 2030. The sector is expected to contribute 45% of the country’s total power generation by 2030.

The introduction of advanced cryoablation therapy

Cardiovascular diseases and heart-related conditions commonly attributed to lifestyle dysregulation, cosmic chronic health risk worldwide. As growing global concerns over the increasing prevalence of atrial fibrillation (AF) in women, a major cardiac condition characterized by irregular heart rhythms, has resulted in sophisticated advanced, minimally invasive cryoablation therapies as a safer alternative.

Atrial fibrillation (AF) is a medical condition that affects the heart's electrical system, causing it to beat in an irregular and often rapid manner. This condition has been hypothesized to happen when the upper chambers of the heart, the atria, become irritable and start firing electrical signals in an abnormal manner. These impulses form the basis for abnormal rhythms in the heart and can lead to complications such as heart failure, stroke, and in some cases, even sudden death.

Cryoablation therapy is a minimally invasive procedure that uses cryotherapy to freeze and destroy tissue, thereby interrupting the electrical impulses that cause AF. The procedure is typically performed under general anesthesia and involves the use of a catheter introduced into a blood vessel in the groin. The catheter is guided to the heart, and a small freezing probe is inserted into the chamber to create a cold spot that destroys the cardiac tissue.

The procedure is performed in a single session and can be performed on an outpatient basis. Patients are usually discharged the same day or the next day after the procedure.

NURTURING THE mind-body connection

In India, mental health conditions are a significant concern. According to the World Health Organization (WHO), 36% of Indian adults suffer from depression and 18% from anxiety disorders. It has also been predicted that India will be the U.S. with the highest number of mental health cases by 2020. Therefore, it is crucial to address mental health issues as a priority.

Cryofibrosis therapy has been used for the treatment of lung conditions such as chronic obstructive pulmonary disease and emphysema. It involves the use of a cryoprobe to freeze the affected tissue, causing it to contract and eventually fall off.

Ayurveda utilizes a holistic approach to mental health management. Various Ayurvedic therapies, including Panchakarma (five physical cleansing procedures), Vata, Pitta, and Kapha theory, and dietary guidelines, are used to address mental health issues. Ayurvedic practitioners work with patients to create personalized treatment plans based on their unique body type, mind, and spirit.

DOSHA BALANCE: Ayurveda categorizes individuals into three primary doshas (Vata, Pitta, and Kapha) based on their physical and mental characteristics. An imbalance in one’s dosha can lead to mental health issues. Ayurvedic practitioners work to restore balance through dietary adjustments, lifestyle changes, and herbal remedies.

Diet and Nutrition: Ayurveda recommends a personalized diet based on an individual's dosha and mental constitution.

To summarize, cryoablation therapy is an advanced treatment for AF that is minimally invasive and has a high success rate. However, it is important to note that the procedure should only be performed by experienced cardiologists.

HERBAL REMEDIES: Ayurveda utilizes essential oils to influence and balance doshas. Lavender and sandalwood oils, for example, are used to promote calmness and relaxation.

LIFESTYLE PRACTICES: Ayurveda promotes a balanced lifestyle that includes proper diet, exercise, and meditation. These practices help to manage stress and improve overall health.

MINDFULNESS AND SELF-AWARENESS: The Modern Ayurveda must focus on the interplay of our thoughts, emotions, and behaviors to promote mental well-being. This includes regular meditation, yoga, and mindfulness practices to foster a sense of peace and contentment.

Eating foods that play with your doshas can help maintain balance for mental and physical health. For example, a balanced diet that includes both carbohydrates and fats can provide the necessary nutrients for a healthy mind.
