GOLD RUSH FOR INDIA AT ASIAN GAMES

TEAM INDIA HOISTS THE TIRANGA IN CHINA

PTI ■ HANGZHOU
In a stunning display of skill, the Indian women's cricket team secured victory over Sri Lanka, claiming the gold medal in Asian Games 2023 in Hangzhou in China on Monday. In another remarkable feat, India not only set a new world record but also secured the gold in the men's 10 air rifle team event on Day 2 of the Asian Games.
Rookie pacer Titas Sadhu singlehandedly earned a gold medal for the Indian women's cricket team in its maiden appearance as it defeated Sri Lanka by 19 runs in a low-scoring final of the Asian Games here on Monday.
On a pitch difficult for batting, the Indian women's team struggled to 116 for seven but it was just about par score.
However Titas, who is just four days shy of her 19th birthday, bowled a devastating first spell and finished with superb figures of 4-1-6-3 to play a big role in restricting Sri Lanka to 97 for eight in 20 overs.
She had an able ally in leg-spinner Devika Vaidya (4-0-15-1), who kept a tight leash on the islanders.
Left-arm spinner Rajeshwari Gayakwad (3-0-20-2) and off-spinner Deepti Sharma (4-0-25-1) started off

badly but were on target during the back-end as Indian women always looked in complete control.
This was one gold medal that India were expected to win, but the standard of cricket was pretty poor, and the nature of wicket didn't help matters.
Teenage pace sensation Sadhu on Monday said "staying calm" and "playing according to the plan" devised during mid-innings was key to winning the gold medal in their maiden Asian Games appearance, despite posting a below-par total on the board in the final here on Sunday.
"We all had a clear plan of what we had to do. Obviously, we got a good momentum in the first over itself. We had discussed during the innings break that we will keep calm and stick to what we had decided," said Sadhu, who returned with impressive figures of 3 for 6 from her four overs.
"The way we came back into the match showed exactly that," she added.
The 18-year-old right-arm medium pacer from Bengal was delighted to win the gold for the country in the continental showpiece.
"It was a great opportunity we got this time, and the fact that we were able to grab that

Indian players pose for photos after winning the gold medal in the women's cricket event at the 19th Asian Games in Hangzhou in China on Monday

opportunity, I'm very glad and grateful," Sadhu said.
In shooting, Indian shooters made a telling statement at the Asian Games, winning three medals, including a team gold, as the country's marksmen asserted their class by

grabbing five podium finishes in just two days of competition here.
A confident Indian 10m air rifle team led by teenage world champion Rudranksh Patil gave the country its first gold medal at the continental

Games, securing the top place on the podium with a world record score on Monday.
Aishwary Pratap Singh Tomar then earned the country an individual bronze — India's fourth in shooting so far — in the event after a keen duel with compatriot Rudranksh, who finished fourth.
The 25m rapid-fire team, comprising Adarsh Singh, Anish Bhanwala and Vijayveer Sidhu, took the third spot with an aggregate score of 1718 after a tie with Indonesia.
China took the gold with a score of 1765, while South Korea bagged silver, aggregating 1734.
The trio of Rudranksh, Olympian Divyansh Singh Panwar and Aishwary aggregated 1893.7 in the qualification round to beat back the challenge of the shooting powerhouse China and South Korea on way to the 10m air rifle team gold.
In one of the most dominating displays seen by Indian air rifle shooters in multi-discipline events, the 19-year-old Rudranksh shot a superb 632.5, Tomar 631.6 and Panwar 629.6 to aggregate the world record score as South Korea was pushed to second spot (1890.1), while the Chinese team was a distant third with an aggregate score of 1888.2.
Meanwhile, Naorem Roshibina Devi qualified for the semi-finals in the Women's 60 kg Wushu (Sanda) to assure India of another medal in the Asian Games, here on Monday.
She outplayed her opening opponent in the quarterfinal, Aiman Karshyga of Kazakhstan, convincingly through points difference.
Roshibina Devi had won the bronze medal at the last Asian Games in the same category. Notably, she was a gold medalist in the same category at the 2019 South Asian Games.
In the men's section, Surya Bhanu Partap Singh reached quarterfinals after winning his pre-quarters bout against Islobek Khaydarov of Uzbekistan in the 60kg category in Sanda.
His bout lasted three rounds as the Indian prevailed 2-1. Partap, also a bronze medalist from the previous edition of the Asian Games, has won a couple of medals of the same colour in the World Wushu Championships.
He also won the gold medal in the 2016 South Asian Games. In the final men's bout of the day in the 65 kg category, Vikrant Baliyan was knocked out in the pre-quarters by Samuel Marbun of Indonesia by a 1-2 margin.

AIADMK breaks up with NDA

KUMAR CHELLAPPAN ■ CHENNAI
The AIADMK on Monday called off its alliance with the BJP irked over the reported allegations made by the Hindutva party's State chief K Annamalai against former Chief Ministers CN Annadurai and J Jayalalitha.
"There is no more alliance between the AIADMK and the BJP. We have also come out of the National Democratic Alliance," said party strongman KP Munusamy, who briefed the media after the day-long conclave of the party's State and district leaders held at Chennai.
Munusamy also declared that there would be no more alliance between the AIADMK and the BJP in future.
The entire AIADMK cadre and leadership are upset and shocked over the comments made by Annamalai that Annadurai, former Chief Minister and party icon, had humiliated Hinduism at an event in 1956.
A prelude to this decision was made by former AIADMK minister D Jayakumar that there was no alliance between his party and the BJP as on date.
"Alliances are made at the time of election. All I can say is that there is no NDA or alliance with the BJP. I don't know what is in store for the party in future," Jayakumar had told reporters last week.
Over the last few months, the ties between the BJP and the AIADMK were getting vitiated over many issues. While leaders of the BJP remained incommunicado about the latest developments, political pundits in Tamil Nadu are of the view that the AIADMK had committed a political harakiri by snapping the ties with the Hindutva party.
"What the AIADMK has done today is the repetition of what the DMK did during the 2014 Lok Sabha polls. The DMK had snapped its ties with

the Congress and the result was a disaster for the former. It failed to win even a single seat from the State.
"Jayalalitha, who led the AIADMK from the front, had projected herself as a Prime Ministerial candidate and bagged 37 of the 39 Lok Sabha seats. Do you think Edappadi Palanisamy, the general secretary of the AIADMK has the charisma of Jayalalitha? The AIADMK is in for major trouble if it goes solo," said GC Shekhar, veteran commentator.
He also pointed out that if the AIADMK had wanted to come out of the NDA, it should have done in August itself when Annamalai is reported to have made the statement condemning Annadurai.
"If the AIADMK leadership is upset over Annamalai's statement, why did Palanisamy go and meet the Union Home Minister afterwards?", asked Shekhar.
Rangaraj Pande, former editor-in-chief of Thanthi TV,

is of the view that the AIADMK's resentment is only towards the State leadership of the BJP.
"Edappadi Palanisamy has close links with Home Minister Amit Shah and the party's all India chief JP Nadda. Annamalai seems to be the eyesore of the AIADMK.
"Moreover the DMK leadership is ridiculing the AIADMK leaders as slaves and stooges of the BJP. Though it is the end of the road for the BJP-AIADMK alliance, anything can happen after the 2024 polls," said Pande.
The past ties between the AIADMK and the BJP were not at all comfortable. In 1998, the AIADMK brought down the Vajpayee-led NDA Government after a year long political honeymoon.
Though the two parties patched up by 2004, the DMK-led front swept the AIADMK-BJP combination by winning all the 39 seats from the State.

PM Modi's Desert Storm in Rajasthan

PTI ■ JAIPUR
The Ashok Gehlot Government in Rajasthan has wasted five important years of the State's youth, Prime Minister Narendra Modi said on Monday as he called upon the people to oust the Congress from power.
Addressing a BJP rally here, the prime minister said the Congress deserved zero marks for the government it ran in Rajasthan for the last five years.
He accused the Congress dispensation of patronising the mafia leasing recruitment exam question papers and said when the BJP forms government, strictest action will be taken against the mafia.
The "Parivartan Sankalp Mahasabha" marked the culmination of four 'Parivartan Yatras' that the Bharatiya Janata Party (BJP) took out in the poll-bound state. Assembly elections in Rajasthan are due later this year.
Addressing the well-attended rally, Prime Minister

Prime Minister Narendra Modi during the 'Parivartan Sankalp Mahasabha' at Dadiya village in Jaipur on Monday

Modi said the Ashok Gehlot government has wasted five important years of Rajasthan's youth. The people of Rajasthan have sounded the bugle for getting rid of the Congress government for its misuse, he said.
He also targeted the Congress over the women's reservation bill.
It was never the Congress' intention to empower women, else it could have passed a

Earlier, Modi was welcomed by the BJP Mahila Morcha cadre at the venue.
Modi reached the meeting venue in Dadiya village in Vatika on the outskirts of Jaipur from a nearby helipad in an open-top vehicle escorted by activists of the BJP's women wing who raised slogans in his support.
Earlier, kickstarting Madhya Pradesh poll campaign, Prime Minister Narendra Modi on Monday said the Congress and its allies in the new 'ghamandiya' alliance "reluctantly" supported the Women's Reservation Bill in Parliament and warned people that if given an opportunity, they will backtrack on the historic legislation.
Addressing a massive gathering of BJP workers, 'Karyakarta Mahakumbh', here, the PM tore into the Congress, equating the national party with "rusted iron" and alleging its functioning has been outsourced to "urban Naxals" and that the organisation is not run by leaders.

Devotees carry an idol of Lord Ganesha 'Bhopal Ke Raja' during a procession for immersion on the occasion of Dol Gyaras festival in Bhopal on Monday

Home Minister chairs meet on JK ahead of LS elections

MOHIT KANDHARI ■ JAMMU
Before sounding the poll bugle ahead of the urban local bodies and panchayat polls in the Union Territory of Jammu and Kashmir, Union Home Minister Amit Shah Monday chaired the Core group meeting of J&K BJP leaders to take stock of the party's overall poll preparedness.
"We are ready for elections," the J&K BJP leaders informed the Home Minister during the first round of over 90-minute-long meeting convened at his residence.
However, a section of BJP leaders who attended the meeting also suggested that the ULB/panchayat polls can be deferred and conducted only after the Lok Sabha polls.
The meeting was also attended by BJP president JP Nadda, BJP general secretary in charge of Jammu and Kashmir Tarun Chugh and

co-incharge Ashish Sood. Members of the BJP's J&K Core group headed by J&K unit chief Ravinder Raina, organisational secretary Ashok Koul, both the Members of Parliament from Jammu region Dr Jitendra Singh (MoS PMO) and Jugal Kishore attended the brainstorming session and reviewed the party's poll preparedness.
A senior BJP leader from Jammu who attended the meeting told *The Pioneer* that the Union Home Minister holds quarterly review meetings along with the party's Core group to take stock of the progress of ongoing organisational activities.
Referring to the urban local bodies elections/panchayat polls, the BJP leader said that the first round of the meeting took place in the afternoon while the second round is scheduled to take place in the evening.
The decision to hold the ULB/panchayat polls will be taken later by the concerned election authorities.
"We have apprised the Union Home Minister about the political scenario in Jammu and Kashmir that we are ready for elections."
The Union Home Ministry is expected to review the prevailing security situation separately before taking a final call on holding the polls before the forthcoming Lok Sabha elections. The ULB/panchayat polls are due in Jammu and Kashmir between October and December.
The municipal elections were last held in J&K in September 2018, in four phases and on a party basis. J&K has two municipal corporations, 17 municipal councils, and 59 municipal committees.
The term of Srinagar Municipal Corporation (SMC) will be complete on November

5 and that of Jammu Municipal Corporation (JMC) on November 14.
The terms of all other municipal bodies, including councils and committees in the UT will end between October and November.
The BJP had won the majority of seats in the Jammu Municipal Corporation while Junaid Mattu, candidate of the Peoples Conference was elected as the Mayor with support from the BJP in the Srinagar Municipal Corporation.
On the other hand, the last panchayat polls were held on a non-party basis during November-December 2018.
Emerging out of the first round of meeting some of the local BJP leaders informed the media persons that the discussion revolved around the party's poll preparedness ahead of the Urban Local Bodies/Panchayat polls.

Congress run by a group of Urban Naxals: Modi in MP

PNS ■ NEW DELHI

Making a strong pitch for the return of the BJP to power in the poll-bound Madhya Pradesh and maintaining that his party had removed the 'BIMARU' tag from the state, Prime Minister Narendra Modi on Monday alleged that the opposition Congress was no longer run by its leaders but by a group of "Urban Naxals" who had been given the contract for running party affairs.

Launching a scathing attack on the Congress, while addressing a huge gathering of BJP workers in Bhopal, the Prime Minister likened it to a rusted piece of iron that has lost its ability to understand national ambitions and fathom the future and claimed that the Congress could take MP back

to the 'BIMARU' state that it was before the BJP was in the saddle in the state.

Modi asserted that the Congress and its allies in the new "ghamandia" alliance supported the Women's Reservation Bill in Parliament "reluctantly" as there was no way out and warned people that if given an opportunity, they will backtrack on it.

Modi said he wanted to caution women of Madhya Pradesh as the "ghamandia" (INDIA) alliance has reluctantly supported the women's quota bill.

After Modi reached the stage at the venue, a group of BJP's women wing members honoured the Prime Minister with a huge garland for the passage of the Women Reservation Bill.

Appealing people to vote

the BJP back to power again, Modi said that the path of progress that the BJP had laid cannot be sustained unless it returns in government.

He also cited instances of neighbouring Rajasthan and Maharashtra, claiming that the Congress had taken the state into depths of corruption and misgovernance.

The Prime Minister further said that the Congress is no longer run by its leaders but by a group of Urban Naxals who have been given the contract for running party affairs.

"Congress has lost all its willpower. The grassroots leaders of Congress have been sitting quietly with their mouths shut. First, Congress was ruined, then they became bankrupt and now they have given their contract to someone else. The party is no longer

being run by its leaders. It has outsourced everything, from slogans to policies, and this contract is with some urban Naxals," Modi said.

Taking a dig at the Congress leadership, he further said that the grand old party was ignorant towards the plight

of the poor. The lives of the poor, Modi said, mean nothing more to the Congress than "adventure tourism" and "opportunity to shoot videos".

"A poor man's life doesn't matter for Congress leaders born with silver spoons. For them, it is adventure tourism..."

For Congress leaders, poor persons' colonies have become locations to shoot videos. They have done this in the past too... BJP government is showing the developed and grand face of the country to the world," said the Prime Minister.

Highlighting the difference between the BJP and the Congress, the Prime Minister said that the while his party made a historic decision by getting the Women's Reservation Bill passed in Parliament, the Opposition tried to block the appointment of the first woman President of India.

He said that the youth of MP have been lucky to never have witnessed the darkness of the Congress era.

"The BJP government in Madhya Pradesh has completed almost 20 years. This means

the youths who will be voting for the first time in the upcoming elections, have only seen the BJP government. The present youth of Madhya Pradesh are lucky that they have not witnessed the bad governance of the Congress government... Congress turned the state into 'Bimaru Rajya'... BJP has tried to take the state to a new level with new energy... Youths here have only seen the development work and good governance of the BJP government," he said.

The mega meet of BJP workers was organised on the birth anniversary of Jana Sangh co-founder Deendayal Upadhyaya to mark the formal culmination of the BJP's 'Jan Ashirwad Yatras' that crisscrossed the length and breadth of the state.

Modi also targeted Rahul Gandhi without taking his

name, saying for Congress leaders born with a silver spoon, "the life of poor people is like an adventure tourism and picnic and the poor person's agri field is a place for video shooting and photo session".

He also slammed Congress for criticising the BJP over the construction of the new Parliament building, quality roads and modern stations.

"Congress spreads negativity. They don't like the achievements of the nation. They want to take the country back to the 20th Century," Modi said, adding the Congress destroyed the states ruled by it with crores of corruption.

The Prime Minister said the Congress had opposed the digital payment system but the world is now impressed by the UPI mode.

Rahul promises caste census if elected to power in 2024 polls

PIONEER NEWS SERVICE ■ NEW DELHI/RAIPUR

Former Congress president Rahul Gandhi on Monday announced that if elected to power in the forthcoming Lok Sabha polls, his party would conduct a "caste census" as only such an exercise would ensure "participation of OBCs, Dalits, tribals and women".

He also sought to know from the Narendra Modi Government as to why the Centre has not released the details of a "caste census" conducted by the Congress (when it was in power) and sought to know if the Prime Minister is afraid of such an exercise.

Advocating fervently for the caste census, a measure the party has adopted in anticipation of the Lok Sabha and Assembly polls, Rahul emphasised that such a census serves as a metaphorical X-ray of the genuine strength of OBCs, SCs, Dalits, STs, women, and the general category within the nation.

He asserted that with this data at hand, the country can progress inclusively, ensuring that all segments are considered and receive their due share to contribute to the nation's growth.

"The Congress had conducted a caste census that has the record of the population of every caste in the country. The Union Government has this report but Modi doesn't want to reveal it. Caste census has to be conducted if we want to

give participation to OBC, Dalits, tribals and women.

"If the PM does not conduct a caste census, then when we are elected to power our first step will be to conduct a caste census to ensure OBC participation," Rahul said in his address at a Chhattisgarh Government event in Bilaspur.

Rahul also raked up the issue of bureaucracy and said the NDA Government is run by Secretaries and Cabinet Secretaries and not MPs and MLAs, and yet only three of the 90 Secretaries in various Union Government Ministries are OBCs.

"These three persons control only 5 per cent of the country's budget," Rahul said and questioned if India only had 5 per cent OBC population.

He had raised the same issue in a debate on Women's Reservation Bill in the Lok Sabha.

The Lok Sabha MP also waved a remote control at the crowd and said the poor and needy were benefited when the Congress presses it, while "Adani gets ports, airports and railway contracts" when the ruling BJP does the same.

At the event, during which he launched the Bhupesh Baghel Government's "Gramin Awas Nyay Yojna" aimed at providing financial assistance to the homeless and families having kutcha houses in rural areas, the Gandhi scion brandished a remote control to target the Modi Government.

NIA to chair multi-agency meet to contain Khalistani propoganda

RAKESH K SINGH ■ NEW DELHI

The National Investigation Agency (NIA) will chair a multi-agency review meeting on October 5-6 to contain the Khalistani propaganda and choke their finances as also dismantle their nexus with gangsters.

Besides NIA, the chiefs of the Intelligence Bureau, Research and Analysis Wing and Anti-Terrorist Squads of the northern States will participate in the meeting. Senior Union Home Ministry officials will also participate in the meeting.

In its continuing crackdown against the Khalistani-gangsters network in India, the meeting is aiming to evolve a strategy to effectively dismantle the Khalistani-gangsters syndicate.

In the meeting, top intelligence and security brass will brainstorm a coordinated strategy to effectively defang the Khalistani-gangster network mostly active in Punjab, Haryana and Delhi.

The recent operations conducted against this nexus has revealed that the narco-terror gangsters have been involved in the smuggling of the drugs and weapons and the funds gen-

erated are being used in anti-India activities by their cadres.

On Saturday, the NIA had confiscated the house and land of the Canada-based 'designated individual terrorist' and head of the banned outfit 'Sikhs for Justice' and its self-styled General Counsel Gurpatwant Singh Pannu in Amritsar and Chandigarh.

The anti-terror probe agency's action was a part of a crackdown on the terror and secessionist network being operated from various countries, including Canada and this is for the first time that properties of an absconding accused of NIA, have been confiscated under section the stringent Unlawful Activities (Prevention) Act.

The NIA has prepared a list of 19 Khalistanis who are carrying out anti-national activities against India while

UP RERA directs real estate promoters to provide details for correspondence

STAFF REPORTER ■ NOIDA

The Uttar Pradesh RERA on Monday directed promoters of real estate projects to provide name, designation, mobile number, e-mail ID, residential address, office address, etc, of their person authorised for correspondence.

This has been done to ensure uninterrupted correspondence with promoters, the UP Real Estate Regulatory Authority (RERA) said, noting that contact numbers of some promoters given at the time of project registration are found inaccessible.

"We have come to know through various means that the mobile numbers provided by some promoters at the time of project registration are non-functional/not in use and are switched off.

"Some cases were also received in which either one picks up the mobile number provided or a suitable response is not received during the conversation," UP RERA said.

To address this issue, UP RERA has issued new guidelines to promoters to ensure uninterrupted communication with their stakeholders, especially buyers.

her trip saying, "like on previous occasions when she would boast of massive investment proposals after yearly Bengal business summits, this time too things would end up in a whimper.

"This was no less than a luxury trip ... when you (Banerjee) went holidaying abroad ... How much did you spend on this trip? Which industrialist have you brought here? Don't fool the people here," Chowdhury said adding if even 10 percent of her previous investment claims had materialized then Bengal would not have been a cash and industry starved state and lakhs of people would have received jobs in the State.

Salim also a CPI(M) polit-

Apart from this, UP RERA has directed to provide name, designation, mobile number, e-mail ID, residential address, office address etc. Of the person authorized by the promoter for correspondence with the Regulatory Authority.

Also, in every correspondence with the Regulatory Authority, the name, designation and mobile number of the sender should be clearly mentioned.

"For this, the details of the authorized person/officer who has been authorized by the promoter or the organization should be made available at the headquarters and regional offices of UP RERA," according to the statement.

UP RERA Secretary Pramod Kumar Upadhyay said promoters are important stakeholders in the real estate sector and their accountability and availability as developers is important in Uttar Pradesh. "It is mandatory and very important for RERA and consumers/buyers. Correspondence via authorized person or officer of promoters is a matter of credibility and gives assurance of official communication," Upadhyay said.

Cong, LF slam Didi for 'luxury tour' abroad

The cracks within the Indian National Developmental Inclusive Alliance (INDIA) widened further with both the Congress and the CPI(M) attacking Chief Minister Mamata Banerjee for running an "insensitive and anti-people Government" and asserting that there would be no alliance with the Trinamool Congress in Bengal.

While Bengal Pradesh Congress president, Adhir Chowdhury attacked Banerjee for embarking on luxury tours to foreign lands when dengue cases were on the rise, CPI(M) State secretary Md Salim iterated, there was "no question of any alliance with TMC."

Insisting that Banerjee was insensitive to people's woes Chowdhury said, "we have a Chief Minister who has time to go abroad on luxury trips but has no time to tackle dengue ... We had already warned the state government about the rampant spread of dengue during August-September. This is due to the ignorance of the government towards the common people... This Government does not understand the pain of the common people."

Wondering as to how a person who did not accept government salary and lived off the royalty from her paintings and books could spend lakhs of rupees for staying in costliest hotels, Chowdhury said, "we have heard that the

SAUGAR SENGUPTA ■ KOLKATA

Chief Minister does not take her salary. She sustains herself from the sale of her books and from her paintings. How could you afford to stay at a hotel in Madrid that costs Rs 3 lakhs per day?"

Banerjee who last week returned from a 12-day official trip of Spain and Dubai had

earlier claimed that this was her most successful trip as the Chief Minister of the State. "This is perhaps the most successful trip ever in my life," Banerjee said adding her Spain and Dubai trip would result in huge investment in the State.

Chowdhury however questioned the outcome of

her trip saying, "like on previous occasions when she would boast of massive investment proposals after yearly Bengal business summits, this time too things would end up in a whimper.

"This was no less than a luxury trip ... when you (Banerjee) went holidaying abroad ... How much did you spend on this trip? Which industrialist have you brought here? Don't fool the people here," Chowdhury said adding if even 10 percent of her previous investment claims had materialized then Bengal would not have been a cash and industry starved state and lakhs of people would have received jobs in the State.

Salim also a CPI(M) polit-

buro member on the other hand said that despite vested interests were weaving wild stories of alliances in Bengal "there is no question of any alliance with either the BJP or the TMC ... we are fighting against both the parties ... nationally we are fighting to oust BJP and in Bengal we are fighting to oust TMC as they are the two sides of the same coin and no descent, civilized country can have such political parties ruling them." Earlier Bengal Opposition Leader Suwendu Adhikari had suspected hawala links to such foreign trips taken by the TMC leaders saying there confirmed reports of money being laundered by way of foreign travels undertaken by many top TMC leaders.

BJP releases 2nd list of candidates for upcoming MP polls

PNS ■ NEW DELHI

BJP on Monday released the second list of party candidates for the Assembly polls in Madhya Pradesh, which includes the names of Union Minister for Agriculture Narendra Singh Tomar, who will be contesting from Dimani; Pralhad Patel, minister of state for food processing from Narsinghpur; and minister of state for rural development Faggan Singh Kulaste has been given the party ticket from Niwas, a seat reserved for STs.

Senior MPs from the State — Ganesh Singh, Rakesh Singh, Riti Pathak, and national general secy Kailash Vijayvargiya — have been given tickets to contest.

The second list includes 39 candidates of whom six are women. The party has already announced the first list with 39 names in August.

Elections are due in MP by the year-end along with Rajasthan, Chhattisgarh, Telangana and Mizoram.

SC seven-judge bench to reconsider 1998 verdict granting immunity from prosecution to MPs/MLAs

PTI ■ NEW DELHI

A seven-judge bench of the Supreme Court, headed by Chief Justice D Y Chandrachud, will reconsider the apex court's 1998 verdict granting MPs and MLAs immunity from prosecution for taking bribe to make a speech or vote in Parliament and state legislatures.

A notice, uploaded on the apex court website, said the bench will hear the matter on October 4.

"Constitution Bench comprising the Chief Justice of India, Justice A S Bopanna, Justice M M Sundresh, Justice Pamidighantam Sri Narasimha, Justice J B Pardiwala, Justice Sanjay Kumar and Justice Manoj Misra is constituted to hear criminal appeal no. 451/2019 titled Sita Soren vs Union of India on October 4 (Wednesday)," the notice said.

Nearly 25 years after the

JMM bribery scandal rocked the country, the apex court had on September 20 agreed to reconsider its 1998 judgment, saying it was an important issue having a significant bearing on "morality of polity".

A five-judge bench of the apex court had decided to refer the issue to a larger seven-judge bench.

Article 105(2) of the Constitution stipulates that no member of Parliament shall be liable to any proceedings in court in respect of anything said or any vote cast in Parliament or any committee thereof. A similar provision exists for MLAs under Article 194(2).

In 2019, a bench headed by then chief justice Ranjan Gogoi, which was hearing an appeal filed by Sita Soren, JMM MLA from Jharkhand, had referred to a five-judge bench the crucial question, noting it had "wide ramifications" and was of "substantial public importance".

Sita Soren was accused of taking bribe to vote for a particular candidate in the Rajya Sabha election in 2012. She had contended that the constitutional provision granting lawmakers immunity from

prosecution, which saw her father-in-law being let off the hook in the JMM bribery scandal, be applied to her.

The three-judge bench had then said it will revisit its verdict in the sensational JMM bribery case involving Shibhu Soren, a former Jharkhand chief minister and ex-union minister, and four other party MPs who had allegedly accepted bribes to vote against the no-confidence motion challenging the survival of the P V Narasimha Rao government in 1993.

The Narasimha Rao government, which was in a minority, survived the no-confidence vote with their support.

The CBI registered a case against Soren and four other JMM Lok Sabha MPs but the Supreme Court quashed it citing the immunity from prosecution they enjoyed under Article 105(2) of the Constitution.

AIADMK breaks up with...

From Page 1

From that day onwards, the AIADMK had kept off the BJP alliance and this was revived only in 2019 which didn't cut ice with the electorate.

Shekhar is of the view that the AIADMK is likely to face a rout if it sticks to the decision of calling off the alliance.

"The BJP under Annamalai is getting stringer by the day while the AIADMK is a divided house. With O Panneerselvam, VK Sasikala and TTV Dhinakaran being sent out of the party, the AIADMK has lost a major vote share. Palaniswamy is no match for the BJP's central leadership as he is waging a losing battle as on date," said Shekhar.

2 students found hanging from tree in Faridabad

STAFF REPORTER ■ FARIDABAD

In a heart-wrenching incident, bodies of two Class XI students were found hanging from a tree behind Faridabad's Siddhadata Ashram in Aravalli in the early hours of Monday. Police have not confirmed if it is a case of suicide or murder. Families of the boys, both aged 16, have not suspected anyone of murder and police are investigating the cause of death, they said. The bodies have been sent to Badshah Khan hospital for post-mortem examination. The deceased have been identified as Yash (16), a resident of Sector 84, and Yuvraj (16), hailing from Sector 31. Yash lived with his family in 84 BPTP Elite Premium Society. These two young students had previously attended the same school, Emerald School in Sector 31, from Class 7 to Class 10. However, due to Yash's family relocating, he had shifted

to Delhi Public School in Faridabad, while Yuvraj continued his studies at the same school. The local police have taken both students' bodies into their custody and transported them to Badshah Khan Hospital for a post-mortem examination. While the authorities are actively investigating the cause of their tragic deaths, the families of the deceased have not raised any suspicions of foul play at this time. As per the accounts of their family members, both

students had departed for an afternoon walk at 3:00 p.m. on Sunday. By 6:00 p.m., Yuvraj had conversed with his elder brother Daksh, indicating his intention to return home shortly. However, after that conversation, he ceased answering his phone despite continuous attempts. As the hours passed and neither of them returned home till late in the night, the families decided to contact the local police for assistance. The police initiated efforts to trace their phone locations.

"Around 2:00 a.m. on Monday, the bodies of both students were discovered hanging from a tree in the wooded area behind Siddhadata Ashram. The police promptly took possession of the bodies, which were then transported to Badshah Khan Hospital for post-mortem," said a police official. A senior police official has said that the cause of their tragic deaths has not yet been determined, and a comprehensive investigation is currently in progress.

Vikas Gautam, father of deceased student Yash, said that his son had left home after 3 o'clock on Sunday. When he did not reach home after several hours, they got worried about untoward incident and informed the police about his disappearance. Vikas said that he was with the Crime Branch police at the spot of the incident, but after seeing the bodies of both of them hanging from the tree, the police declared it a suicide.

Release grants for 12 city Govt affiliated colleges, urges Atishi

Matter being heard by Delhi HC, notice issued to Finance Department

STAFF REPORTER ■ NEW DELHI

Delhi Education Minister Arvind Kejriwal has written to the Director of Higher Education (DHE) directing immediate release of the third quarterly grant of 12 colleges which are fully funded by the Delhi Government. The matter is currently being heard by the Delhi High Court wherein a notice was issued to the Finance Department to expedite the disbursement of funds. Expressing her concern over laxity in the matter as it creates substantial obstacles in fulfilling vital financial obligations of the colleges, Atishi directed the DHE to propose a mechanism under which the

salaries, arrears, pension, medical bills and other dues of the staff and faculties of these 12 colleges can be paid in time. The Leader of Opposition in Delhi Assembly, Ramvir Singh Bidhuri slammed the AAP Government for not disbursing the salaries to the 12 Delhi Government-run colleges. "In the last 8 years, such a situation has come many times when the teachers of these 12 colleges and the entire staff

issues in processing essential payments including salaries, pensions, arrears, medical bills. These issues are primarily attributed to the delay in fund disbursement by the DHE," Atishi wrote in the letter. The letter further said that this delay in fund disbursement is creating substantial obstacles in fulfilling vital financial obligations of the colleges, particularly the disbursement of salaries which have been pending for months. It is causing undue hardship to the staff and faculties of these colleges. The allocated fund of these colleges, which was ₹132 crore in 2014-15 was increased three-folds to ₹400 crore in 2023-24. On August 25, Atishi questioned the finance department over the nearly "one-and-a-half-month delay". In a note, she said the fund was approved in June, but it has not reached the colleges. The Minister asked the finance department about the delay between the announcement and the implementation of her order. The minister said that she has written to the Finance Department to expedite the disbursement of funds. She expressed her concern over laxity in the matter as it creates substantial obstacles in fulfilling vital financial obligations of the colleges, Atishi directed the DHE to propose a mechanism under which the salaries, arrears, pension, medical bills and other dues of the staff and faculties of these 12 colleges can be paid in time. The Leader of Opposition in Delhi Assembly, Ramvir Singh Bidhuri slammed the AAP Government for not disbursing the salaries to the 12 Delhi Government-run colleges. "In the last 8 years, such a situation has come many times when the teachers of these 12 colleges and the entire staff

MCD inspects houses to curb vector-borne diseases

STAFF REPORTER ■ NEW DELHI

The Municipal Corporation of Delhi (MCD) staff inspected houses as part of a campaign to combat vector-borne diseases in the national Capital and the authorities issued penalties amounting to a cumulative ₹73 lakh for violations. The MCD's public health department, under its campaign to control mosquito-borne diseases, carried out an intensive campaign in 197 police station areas in all its 12 zones, the civic body said. During the campaign, 83 were found to be mosquito-breeding sites. The MCD slapped 60 legal notices, filed one prosecution, issued three court challans and levied administrative charges in one case, the statement said. The civic body is carrying out a campaign against dengue, malaria and other mosquito-borne diseases on a war-footing. Dengue is caused by the Aedes aegypti mosquito, which breeds in stagnant water, it said. The department also carried

out intensive checking drives at Punjabi Bagh, Vasant Kunj, Jagatpuri, Usmanpur, Nizamuddin, Amar Colony, Lahori Gate, Burari, Swaroop Nagar, Paschim Vihar, Aman Vihar, Bawana, Rithala, Mayapuri, Sultanpuri, Ghazipur, Geeta Colony and Ambedkar Nagar police stations and malkhanas, it added. "The MCD has conducted 2,95,69,150 (2.95 crore) house visits. A total of 14,84,050 (14.84 lakh) houses have been sprayed with insecticides and 1,35,462 (1.35 lakh) legal notices issued. Fines have been levied upon 22,195 defaulters and a sum of ₹73,36,640 (₹73.36 lakh) has been received for destroying mosquito-breeding (sites) and

larva-eating fishes has survived at 203 locations," the statement said. The MCD, after analysing the data related to mosquito breeding, has found that drums and jerry cans accounted for 40 per cent of the mosquito-breeding sites, followed by desert coolers at 35 per cent and construction zones and flower pots at 15 per cent. The MCD has not released its weekly weed report in the last few weeks, even as the vector-borne disease is on the rise in the national Capital. Delhi has seen a rise in dengue cases in the last two months, with a few deaths reported at both Government and private hospitals.

'Follow guidelines to control dust pollution during winter'

STAFF REPORTER ■ NEW DELHI

Delhi Environment Minister Gopal Rai on Monday instructed Government and private construction agencies to follow the guidelines to control dust pollution in the city during the winter season. Rai has held a meeting with more than 200 representatives of government and private construction agencies and directed them to follow 14-point guidelines to prevent dust pollution. "All agencies engaged in construction work were instructed to follow 14-point guidelines to control dust pollution," he said in a post on X. "The Government is preparing a winter action plan to control pollution, with 28 departments assigned specific tasks and expected to submit their reports soon. Following this, the environment department will curate a report and present it to the chief minister for approval. It will then be implemented,"

the Minister said. In a press statement issued by the AAP Government, Rai has stated that strict action will be taken against government and private agencies not following the norms. He further said it is mandatory for all government and private construction agencies to provide on-site training to construction workers regarding the guidelines. In the meeting, 14-point guidelines to prevent pollution were explained in detail to all government and private construction agencies and instructions were given to implement them. During this meeting, suggestions were also taken from the representatives of the construction agencies. The Government is preparing a winter action plan on 15 focus points to tackle pollution in winter, including curbing dust pollution. It will be mandatory for the construction agency to install anti-smog guns on sites having construction area equal to or more than 5,000 square meters. The other measures include dust/wind breaking walls of appropriate height around the periphery of the construction site; Installation of Anti Smog Gun(s) (for? 5000 sqmt built construction area); Tarpaulin or green net on scaffolding around the area under construction and the building; All vehicles, including carrying construction material and construction debris of any kind, should be cleaned and wheels washed; All vehicles carrying construction material and construction debris should be fully covered and protected and all construction debris and construction material of any kind should be stored on the site and not dumped on public roads or pavements.

BJP backing Bidhuri who abused Danish, alleges Bhardwaj

STAFF REPORTER ■ NEW DELHI

AP leader and Delhi Minister Saurabh Bhardwaj on Monday alleged the entire BJP is "standing with" its Member of Parliament Ramesh Bidhuri who made derogatory remarks against BSP lawmaker Danish Ali in the Lok Sabha and "such words are a part of the fixed strategy" of the ruling party at the Centre. In a related development, Bidhuri, met the BJP national president JP Nadda at the party headquarters, days after he was issued a show-cause notice by the party for his remarks. There was no official word on what transpired in the meeting. The Opposition parties, which have demanded the strictest action including suspension of Bidhuri for his "vile and communal" remarks during a discussion on the success of Chandrayaan-3 in Lok Sabha on Thursday, have been hitting out at the BJP, alleging that it was trying to defend its MP instead of punishing him. "While Ramesh Bidhuri was using those cheap words,

two senior BJP MPs sitting behind him were laughing. The way different BJP MPs have come out to defend him and are trying to save him makes one thing clear. The entire BJP is standing with him and such words are a part of the BJP's fixed strategy," Bhardwaj, who is also a Cabinet Minister in the Delhi government said. BJP MP Nishikant Dubey has written to Lok Sabha Speaker Nishikant Dubey, urging him to form an inquiry committee to look into statements made by Danish Ali, alleging that the BSP MP made "highly objectionable" remarks against Prime Minister Narendra Modi that provoked Bidhuri. Dubey was, however, categorical in condemning Bidhuri's comments, saying no decent society can justify them and they cannot be condemned enough. BJP MPs Ravi Kishan Shukla and Harnath Singh Yadav also wrote to the Speaker on Sunday, questioning Ali's conduct in the House and demanding a probe into it.

Prepare plan to improve stretch between Vidhan Sabha, Secretariat: Atishi to officials

STAFF REPORTER ■ NEW DELHI

PWD Minister Atishi on Monday directed officials to prepare within one week a plan to improve the stretch between the Delhi Vidhan Sabha and the Secretariat. Atishi on Monday visited various sections of the Ring Road between the Vidhan Sabha and the Secretariat, including the Kashmir Gate ISBT and emphasised the urgent need for improved maintenance of roads, footpaths, and drainage systems on the stretch. During the inspections, Atishi stressed on the urgent need to improve the maintenance of roads, footpaths and the drainage systems on the stretch. She also expressed her concern about the poor condition of the Rajghat subway and cautioned engineers about the consequences of laxity in the maintenance of it. "Atishi issued a stern directive to officials to prepare an action plan for the improvement of the road stretch in a phased manner within one week," the statement said. She also expressed concern about the poor condition of the Rajghat subway and cautioned engineers about the conse-

quences of laxity in its maintenance, it added. The Minister stressed that the stretch between the Vidhan Sabha and the Secretariat is extremely important as it connects key locations such as the Raj Niwas, Chief Minister's House and the Delhi University, serving as a transit route for lakhs of commuters daily. Atishi directed the officials to ensure the maintenance of drainage systems, horticulture and footpath redevelopment tailored to pedestrian needs and safety. She also issued instructions to trim trees obstructing movement on footpaths, level pavements, re-carpet roads, replace broken kerbstones and apply fresh black-topping on a high priority. Atishi admonished the officials and directed them to conduct a comprehensive inspection of the entire stretch and submit a report on priority, the statement added. "It is the responsibility of PWD engineers to focus on diligently improving roads within their areas. Any negligence will lead to stringent action as the (Arvind) Kejriwal government would not tolerate any lapses in this regard," she said.

NDMC forms committee to protect G20 assets

STAFF REPORTER ■ NEW DELHI

The New Delhi Municipal Council (NDMC) has formed a dedicated committee to protect the assets created during the G20 Summit from theft and vandalism. According to NDMC vice-chairman Satish Upadhyay, 70 fountains are now under the vigilant care of two executive engineers, each in charge of 35 fountains. "These engineers have been entrusted with the responsibility of ensuring the proper maintenance and functionality of these iconic fountains. NDMC has also renewed the annual maintenance contract for these fountains within its jurisdiction," he added. The NDMC has placed more than one lakh potted plants at various locations in its jurisdiction as part of the G20 beautification efforts. Upadhyay said that the plants will not be taken from their place at present and 30-35 security guards have also been deployed to take care of them. A total of 441 CCTV cameras have been installed within the area under NDMC and are integrated through the Command and Control Centre. These CCTV cameras are instrumental in various aspects of NDMC services' smooth functioning, he added. To oversee and monitor all G20-related projects and initiatives, NDMC has established a high-level committee, which will be tasked with maintaining and managing the works undertaken during the G20 Summit.

Kejriwal meets five para-athletes who won medals at IDBF

STAFF REPORTER ■ NEW DELHI

Delhi Chief Minister Arvind Kejriwal met five para-athletes of the national Capital who won medals for India at the 16th International Dragon Boat Championship (IDBF), 2023 held in Pattaya, Thailand, at his residence on Monday. The CM congratulated these athletes for winning medals for the country and encouraged them to bring more laurels in future. During this interaction, the athletes drew the CM's attention to the lack of adequate facilities in Delhi for boat competitions. On their request, the CM instructed Sports Minister Atishi to ensure necessary facilities are provided earnestly. Kejriwal affirmed his commitment to the athletes and the development of water sports and training facilities for both the Olympics and Paralympics in the quest for winning gold medals. Kejriwal stated using X (formerly Twitter), "Met all the para-athletes of India who won gold medals in the World Dragon water sports championship and live in Delhi. These players practice at Sonia Vihar Water Sports Club. I have given

'Effigies of those insulting Sanatan Dharma to be burnt alongside Ravana'

STAFF REPORTER ■ NEW DELHI

The effigies of those who criticised the 'Sanatan Dharma' will be burnt alongside those of Ravana, Kumbhkarana and Meghnad on Vijaydashami in the major Ramlilas of the national Capital, several Ramlila committees have decided. The decision came after Delhi BJP leaders urged them to torch the effigies of such politicians, but committees' office-bearers said there was no politics involved as they have in the past torched effigies depicting inflation, corruption and drug-addiction. Every year on Dussehra, three effigies of Ravana, Meghnath and Kumbhkarana are set on fire by Ramlila committees as a symbol of the victory of truth over untruth. Many Ramlila organisers have described Udayanidhi Stalin as today's Ravana and some have suggested burning his effigy in place of Ravana, while others have suggested installing a fourth effigy of Stalin. Some opposition leaders including Udayanidhi Stalin recently made statements targeting the 'Sanatan Dharma', inviting the BJP ire. Ravi Jain, the manager of Shri Dharmik Leela Committee, said, "it is our tradition to burn effigies of social evils during Dussehra. Ramlila is a part of the Sanatan Dharma, so this year we will burn the effigies of those who oppose it." Adarsh Ramlila Committee advisor Satish Garg said burning the effigies

of those who are "disparaging and misrepresenting" the Sanatan Dharma is not trying to target an individual. "The Sanatan Dharma belongs to people. Speaking against the Sanatan Dharma is like insulting everything that emanates from it including Ramlila and lord Sri Ram himself," Garg said. The decision of the Ramlila Committees came after Delhi BJP leaders urged them to torch the effigies of politicians who are against the Sanatan Dharma. Delhi BJP media cell head Praveen Shankar Kapoor as appeal was made to the Ramlila Committees after a direction from state president Virendra Sachdeva. Delhi Dharmik Mahasangh general secretary Ashok Goel Devraha said Ramlilas symbolise the Sanatan Dharma and those who compare it with diseases like dengue need to be opposed. "It is not a political issue but political parties should act against their leaders who speak ill about any religion. Ramlila is all about destruction of evils," said Ravi Kaptaan from the Navshree Dharmik Leela committee. But he added, "We have not decided anything yet about torching the effigies of anti-Sanatan Dharma leaders."Anything said against the Sanatan Dharma is like insulting lord Ram whose victory is celebrated on Dussehra, said Dheeraj Dhar Gupta, an advisor of Bauji Ramlila Committee. He said the effigies of those who insulted the 'Sanatan Dharma' will be burnt on Dussehra.

C-295 transport aircraft inducted

PIONEER NEWS SERVICE ■ NEW DELHI/GHAZIABAD

The IAF on Monday formally inducted the first C-295 medium tactical transport aircraft in the presence of Defence Minister Rajnath Singh at the Hindan airbase in Ghaziabad.

He exuded confidence that the latest induction will bolster medium lift tactical capability of the IAF. He termed the defence and aerospace sectors as the two important pillars for making India self-reliant in the coming years.

Rajnath also inaugurated Bharat Drone Shakti 2023, a first-of-its-kind two-day drone exhibition cum display was inaugurated at the airbase. The expo has been jointly organised by IAF and Drone Federation of India (DFI). The event features over 75 drone start-ups from across the country. As regards the C-295 plane, the induction ceremony saw Rajnath taking part in a 'Sarva Dharma Pooja' that was performed in the hangar to mark the occasion. IAF chief IAF Chief Marshal V R Chaudhari along with senior officials of the IAF as well as of Airbus attended the induction ceremony.

The aircraft was unveiled at the hangar after two sliding screens, bearing '11 SQN: Pioneers of C-295 MW', 'Rhinos: The Trailblazers of C-295 MW', and image of the newly-inducted aircraft, moved sideways. One-horned rhino is the emblem of Sqn. No. 11.

The IAF chief had on September 13 received the first of the 56 C-295 transport aircraft two years after India sealed a ₹21,935-crore deal with Airbus Defence and Space to procure the jets to replace its ageing Avro-748 fleet. The aircraft had landed in Vadodara on September 20, days after it was handed over to the IAF in the southern Spanish city of Seville. Airbus will deliver the first 16 aircraft in fly-away condition from its final assembly line in Seville by 2025 and the subsequent 40 air-

craft will be manufactured and assembled by Tata Advanced Systems (TASL) in India as part of an industrial partnership between the two companies. The production of components of these aircraft has already started in the Main Constituent Assembly facility in Hyderabad.

These parts will be shipped to the Final Assembly Line in Vadodara which is expected to be operational by November 2024. Prime Minister Narendra Modi had laid the foundation stone of the manufacturing facility for C-295 planes in Vadodara in October last year. It will be the first military aircraft to be manufactured in India by a private consortium. The IAF is procuring the C-295 aircraft to replace its fleet of ageing Avro-748 planes that entered the service over six

decades ago. The C-295 is known to be a superior aircraft used for tactical transport of up to 71 troops or 50 paratroopers and for logistic operations to locations that are not accessible to current heavier aircraft. The aircraft can airdrop paratroops and loads, and also be used for casualty or medical evacuation. The aircraft is capable of performing special missions as well as disaster response and maritime patrol duties. Meanwhile, the drones featured during the exhibition can be employed for a variety of military and civil applications. By showcasing their capabilities through a series of aerial and static demonstrations, the IAF and DFI seek to bolster the Government's initiative to make India a major drone hub by 2030.

Institutions likely to face problems in NEP implementation: Panel

PIONEER NEWS SERVICE ■ NEW DELHI

Taking note of the multiple entry and exit system in the academic career as cited in the National Education Policy, a Parliamentary panel has noted that Indian institutions are likely to face issues in implementation. While the panel observed that the system is carried effectively in western educational institutions, it noted that uneven geographical distribution of higher education institutions would create hurdles in managing MEME in several areas, mostly countryside in India.

The Parliamentary Standing Committee on Education, Women, Children, Youth and Sports, headed by Rajya Sabha MP Vivek Thakur, said in its report tabled in the Rajya Sabha that the institutions have not thought very clearly about this problem and how they will resolve it when it is at their doorstep.

“NEP proposes multi-entry and multi-exit options for the students. While it looks like a flexible system, which is being operated by western education institutions quite effectively,

Indian institutions are likely to face several issues in implementing this system. Due to high population, the estimated intake of students in higher education every year is quite high. “If institutions allow MEME (multiple entry and multiple exit), it would be very difficult for the institutions to predict how many students would exit and how many would join midway. Since institutions would not know the in-and-out-traffic, it will certainly disturb the Pupil-Teacher Ratio,” the report said. According to the “Guidelines for Multiple Entry and Exit in Academic Programmes offered in Higher Education Institutions” issued by the University Grants Commission (UGC), flexible learning is important to choose one's academic pathway leading to the award of certificate, diploma, and degree.

Attached land worth ₹125.06 crore in money laundering probe: ED

PNS ■ NEW DELHI

The Enforcement Directorate (ED) on Monday said it has provisionally attached land worth ₹125.06 crore belonging to Unitech Infopark Limited in connection with a money laundering probe linked to allegations of complaints from home buyers of the Unitech group.

The ED has provisionally attached 39.83 per cent share of 4.79 acres of land that forms part of the Uniworld City township at Nallambakkam in Chennai. “The value of the land attached is ₹125.06 crore. The said land is owned by Unitech Infopark Limited in which 39.83 per cent shares are held by Narnil Infosolutions Private Limited (a benami company of the Chandras, the promoters of Unitech Group),” the ED said in a statement. The action is part of an investigation undertaken by the ED based on cases registered by the Delhi Police and CBI on the complaints from home buyers against Unitech Group, its promoters and others, it said. In its investigation, ED detected that the Chandras of Unitech had allegedly invested the ‘proceeds of crime’ to the tune of USD 1.50 crore (present

value ₹125.06 crore) through Narnil Infosolutions Private Limited into Unitech Infopark Limited in 2009-10 by acquiring 39.83 per cent shares of the said company, the agency said. The agency probe revealed that Narnil Infosolutions Private Limited is beneficially owned by the Chandras and was being controlled through their associates. “During the course of investigation, ED had arrested five individuals namely Sanjay Chandra, Ajay Chandra, Ramesh Chandra, Preeti Chandra and Rajesh Malik. Till now, two prosecution complaints have been filed by the ED and cognisance of the same have been taken by the PMLA Court,” it said. So far, the ED has provisionally attached domestic and overseas assets worth ₹1,257.61 crore.

‘Southwest monsoon withdrawing from India’

RAJESH KUMAR ■ NEW DELHI

The India Meteorological Department (IMD) announced on Monday the southwest monsoon has started withdrawing from India, eight days after the normal date of September 17.

The late retreat of the monsoon this year is the 13th consecutive delayed withdrawal. India is divided into 717 meteorological districts, of them 221

have received deficit rainfall while 492 received normal or excess rainfall so far. India received 796.3 mm rainfall as against the normal of 843.2 mm, deficit of 46.8 mm amounting to 6 per cent. Nearly 2 per cent of rainfall needs to be offset in the remaining 6 days of the month, for the monsoon season to turn ‘normal’. Rainfall between 94 per cent and 106 per cent of the long-period average (LPA) is considered normal. Bihar, Gangetic West Bengal, Jharkhand, Arunachal Pradesh, Sikkim, Kerala, East Uttar Pradesh, Mahe, South Karnataka and Lakshadweep among the states which

received less monsoon rain this year. Typically, the southwest monsoon makes its onset over Kerala by June 1 and covers the entire country by July 8. It starts retreating from northwest India around September 17, withdrawing entirely by October 15. “(The) southwest monsoon has withdrawn from parts of southwest Rajasthan today, September 25, 2023, against its normal date of withdrawal from southwest Rajasthan of September 17,” IMD said in a statement. For withdrawal of monsoon, the IMD considers certain conditions to be fulfilled, including dry weather over an area for five consecutive days,

a considerable reduction in moisture content as inferred from satellite water vapour imageries and tephigrams and an anticyclone in the lower levels of the atmosphere. Normally, the country receives an average of 870 mm of precipitation during the four-month monsoon season (June to September).

Withdrawal of the monsoon from northwest India marks the beginning of its retreat from the Indian subcontinent. Any delay in the monsoon's retreat means a longer rainy season, which can significantly impact agricultural production, particularly for northwest India where monsoon rainfall plays a crucial role in the Rabi crop production. The onset month of June remained 10% below the normal. This shortfall was made up in July when the month accumulated a surplus of 13% rainfall. The monsoon rainfall was 105 per cent of LPA at the halfway mark of the season. And then, there was a collapse. With prolonged break-monsoon conditions, the core monsoon month of August slumped miserably to be the lowest on record since the time record-keeping began.

Ensure Aadhaar to Manipuris displaced due to conflict, SC directs UIDAI, Govt

PIONEER NEWS SERVICE ■ NEW DELHI

The Supreme Court on Monday directed the Unique Identification Authority of India and the Manipur Government to take steps to ensure that Aadhaar cards are provided to people displaced due to the ethnic conflict in the State whose records are already available with the UIDAI.

Observing that it does not propose to run the administration in Manipur, the apex court said necessary verifications shall be carried out before issuing the Aadhaar cards expeditiously. A bench headed by Chief Justice DY Chandrachud clarified that UIDAI, which would have the biometric details of people to whom Aadhaar cards were already issued, will match the claims of those displaced about the loss of their cards. The bench, also comprising Justices JB Pardiwala and Manoj Misra, directed the secretary of Manipur's finance department to issue appropriate instructions to all banks in the affected parts of the state to make available the details of bank accounts to those who have lost the documents.

The apex court directed that Secretary of Manipur's Health Department shall take all expeditious steps for issuing disability certificates/duplicates of disability certificates to specially-abled persons in relief camps. The bench issued the directions while it was considering the reports filed by the apex court-appointed all-woman committee of former high court judges headed by Justice (ret'd) Gita Mittal. The panel also includes Justices (ret'd) Shalini P Joshi and Asha Menon.

In the reports filed in the apex court, the committee had sought certain directions on issues including lost personal documents of those displaced.

During the hearing on a batch of pleas, including those seeking court-monitored probe into cases of violence, besides measures for relief and rehabilitation, the bench observed that for issuing Aadhaar cards, the authority will have to verify whether these are genuine residents or citizens. “What if somebody is an illegal entrant?” it asked and added “We will say the authorities will verify whether the person is genuine.” Solicitor General Tushar Mehta, appearing for the Centre and the Manipur government, said several of these issues can be sorted out if the committee discusses them with the authorities. “Let the committee be aware of its remit” he said. The bench said the committee has not pressed for several of the directions mentioned in its reports.

PUBLIC NOTICE
To be known to all that L. Dr. Mrs. Neelam Lamba W/o Dr. Multani Ram Lamba R/o B-1/4 53, Janak Puri, New Delhi who is the owner and in physical possession of Plot No. 453, area 270 Sq. Mtrs. Uplifting marginalised should be article of faith for IAS officers: Murmu

PIONEER NEWS SERVICE ■ NEW DELHI

President Droupadi Murmu on Monday said a compassionate civil servant whose heartbeats for the poor and the underprivileged is a true civil servant as distinct from merely a career bureaucrat. Addressing a group of Indian Administrative Service (IAS) officers, she said uplifting the marginalised sections of society should be an article of faith for them. “You should make efforts to understand the link between ‘file to field’ and also between ‘field to file’.” This people-centric alertness and sensitivity will make you engage with the files in a far more meaningful manner”, Murmu said.

Ministry mulling to provide tablets to divyangjan

ARCHANA JYOTI ■ NEW DELHI

In a move aimed to help deaf students get access to good education, the Union Ministry of Social Justice and Empowerment is mulling to provide the tablets — loaded with digital video to such students. “Our department is planning to provide tablets to deaf students to enable them to access educational videos in sign languages,” Rajesh Aggarwal, Secretary, DEPWD said recently at an event here recently.

Sources in the Ministry said that nitty-gritties are being worked out in this direction to identify the beneficiaries and details on financial provisions. The move follows concern that only 5 per cent hearing impaired children get basic schooling and 1 per cent of the total deaf population has access to quality education in the country. Of these just 2-5 per cent of students with impaired hearing in the country have access to university education. The cohort is too small given that India is home to the highest number of children with hearing impairment in the world. At least 1.57 million children are hearing disabled in the educational age group 0-19 years. The experts in the sector say that more need to be done as most of the children face difficulties in understanding concepts on a daily basis in schools because education and infor-

mation are not accessible in Indian languages. In fact, Director at the Gurugram centre of Haryana Welfare Society for Persons with Speech and Hearing Impairment, Dr Seema had recently pointed out that there is little or no emphasis on sign language and 98 per cent of the special educators in the country have limited or no sign language skill. “As a result, despite years of schooling, students with hearing impairment remain language and education deprived. More than 90% of such children are born to parents who don't have the required information and resources to provide early communication skills” she said, according to reports. The experts also rued that most policies for hearing impaired students are framed by people who can hear and only few deaf researchers are involved in decision-making, resulting in substandard teacher training courses for such students. Doing its bit, Solunus Inc., a leading provider of Salesforce

Need to pull out all stops to tackle anaemia, suggests NITI Aayog

PIONEER NEWS SERVICES ■ NEW DELHI

With a vast majority of children and women still anemic despite concerted efforts of the Government, there is a need to pull out all stops for tackling the menace as has been done by Singapore to transform itself from a water-starved country to a water-resilient leader, a senior official from NITI Aayog, the country's top think tank, has suggested.

“India should also use a similar strategy (as adopted by Singapore) to tackle Anaemia to improve the public health system,” Yugal Kishore Joshi, Director Mission Life, NITI Aayog said as he noted that the National Family Health Survey (NFHS)-5 indicate 67.1 per cent children below the age of 5 continue to grapple with anaemia and 57 per cent of women between the age of 15 and 49 are anaemic. Today, Singapore is leading the way in innovative and resilient water infrastructure, harnessing the power of digital technologies to deliver this vital resource to the population, said Joshi while speaking at a 2-day conference on anaemia menace held here recently. It was attended by senior officials from the Union Health Ministry such as Roli Singh, Additional Secretary, Dr Zoya Ali Rizvi, Deputy Commissioner, Nutrition

Division and Basant Kar, also known as Nutrition Man of India along with key public health experts and researchers. Responding to the reason for lack of funds for longer duration health and nutrition interventions, Meera Satpathy, Founder and Chairperson, Sukarya, a non-profit said that “The government, corporates and non-profits NGOs should urgently come together and engage with communities to strengthen distribution of maternal and child healthcare to the last-mile.” Talking about the role of data, technologies and implementation research in maternal and child nutrition interventions, the panelists deliberated threadbare on lack of clear regulations and guidelines for the use of AI in healthcare, using diverse training data to mitigate bias and combine technology with human intervention at adequate touch-points. Dr Kirk Tickell (Faculty at the University of Washington's Department of Global Health) dwelled on maternal and child health services in Kenya, sharing that how it's important to include men in families and sensitize them about the importance of maternal and child healthcare because when it comes to patriarchal settings, they still play a key role in deciding crucial things pertaining to women's reproductive health.

World-class cruise terminal to be constructed in Varanasi: Sonowal

PIONEER NEWS SERVICE ■ VARANASI

In a concerted effort to drive cooperative and sustainable growth in the maritime sector, the Ministry of Ports, Shipping, and Waterways (MoPSW) organised a roadshow for the upcoming Global Maritime India Summit (GMIS)-2023 at the Trade Facilitation Centre (TFC) here on Monday. Led by Union Minister of Ports, Shipping and Waterways and AYUSH Sarbananda Sonowal, the event also saw the presence of key figures, including representatives from governments of UP and Nepal.

Speaking on occasion, Sonowal announced plans to construct a world-class cruise terminal in Varanasi for expansion of river cruise tourism via waterways in the city. He further alluded to facilitation of the movement of goods to and from Nepal via waterways. "In the heart of Varanasi, the cradle of our civilisation, we embarked on a transformative journey to shape India's destiny. Under the dynamic and visionary leadership of Prime Minister Narendra Modi, India is poised to become the third largest economy in the world. Waterways and logistics are the bedrock of our economic growth, and the GMIS-2023 is the catalyst for partnership and realising the shared vision of generating investment of ₹10 lakh crore and creating more than 15 lakh employment avenues for the youth of this nation," said the Union Minister. He elaborated on the government's commitment to create a sustainable and modern ecosystem by stating, "the Jal Marg Vikas Project and Arth Ganga initiative are tangible testaments to our dedication. Our multi-modal terminals, innovative Ganga river transport and modernisation of 60 community jetties are bolstering industries and preserving our cultural heritage. We're fostering regional cooperation

Union Minister of Ports, Shipping and Waterways and AYUSH Sarbananda Sonowal inaugurating an event at TFC in Varanasi on Monday.

with neighbouring countries and offering exciting cruises on the Ganga. This transformation is green and sustainable and aligns with our environmental stewardship commitment. The Inland Waterways Authority of India (Iwai) is constructing an Inter Modal Terminal at Kalughat, Bihar. The terminal is slated for completion by December 2023 and is set to revolutionise freight movement by connecting Nepal to Kalughat through road and Kalughat to Haldia via waterways." He further added, "India is also pioneering in the tourism sector with MV Ganga Vilas completing world's longest river cruise. We are creating a viable ecosystem and modernising all ports across the country be it for cargo movement, transportation of goods or reduction of costs. Under the visionary guidance of the PM, we have made significant progress in the inland waterways, coastal shipping and seaways through multiple projects across the country.

With the PM Gati Shakti initiative, we have achieved a groundbreaking milestone in waterways-centric transport, doubling the multimodal freight share to 12 per cent and reducing logistics costs. We are confident of attaining the 'Atmanirbhar Bharat' mission and 'Net-zero' goals by 2047 and leading India towards a resilient and self-reliant future." Anchored by the Iwai, the roadshow served as a precursor to the highly anticipated 3rd GMIS-2023 slated to occur between October 17 and 19 at MMRDA Ground, BKC, Mumbai. The summit, organised in partnership with FICCI, strives to foster connections, advance collaborative endeavours and spark innovation, all encapsulated under the overarching theme of 'Connect, Collaborate & Create.'

During his welcome address, Iwai Chairman Sanjay Bandopadhyay said, "We celebrate Iwai's remarkable achievements: ₹1,517 crore to ₹ 5,210.81 crore in nine years, 16 per cent (pc) growth in cargo movement (315 pc increase since 2014-15), river cruise tourism flourishes, international cooperation with Bangladesh, Myanmar, Bhutan." The Iwai has facilitated development of two private terminals at Maia, West Bengal for transport of cargo using river Ganga/Padma up to Sultanganj and Godagari (in Bangladesh). Maia has been declared as Customs Port under Section-7 of Indian Customs Act which has divertible potential of cargo of about 2.6 million metric tonnes, mainly stone chips. The transportation on this route shall be commenced shortly in consultation with Bangladesh. On the occasion an agreement was signed between Iwai and Government of Uttar Pradesh for operation of electric catamarans at Varanasi, Ayodhya and Mathura. Also, recently, the Iwai initiated operationalisation of NWs through PPP mode in the state of

Maharashtra since 13 rivers have been declared as NWs vide the National Waterways Act, 2016. Iwai is working towards executing coal transportation projects using inland water transport across the Brahmani and Mahanadi rivers to facilitate the efficient movement of coal, minerals and commodities from Talcher mines to Paradip and Dhamra ports in collaboration with Inland Waterways Consortium of Odisha Limited (IWCOL) with Coal India Ltd, Govt of Odisha and Paradip Port Authority. Speaking at the roadshow, Bipin Rajbhandari, Registrar, Nepal Panijahaj Karyalaya (Nepal Shipping Office), Ministry of Physical Infrastructure and Transport, Nepal said, "Nepal is the centre of all maritime activities, especially with India. Our aim is to propel the sector towards excellence in the future and have already announced multiple initiatives for navigation purposes in the travel, tourism and trade segment." He also expressed his gratitude towards the Government of India for signing a special trade agreement with Nepal, aimed at faster and easier movement of goods via waterways. He added, "This agreement will not only create greater collaboration opportunities for both the nations in the trade and tourism sectors but also help in capacity building and training of the existing workforce for further expansion of the maritime sectors across geographies. The Kalughat Terminal, situated at the North banks of the river Ganga (NW-1), has a budget of ₹82.48 crore and can handle 77,000 TEUs." The roadshow was also graced by dignitaries including UP Minister of State (Independent Charge) Dayashankar Mishra 'Dayalu' and Joint Secretary (IWT), MoPSW, R Lakshmanan, JS (IWT), MoPSW, amongst others.

Elderly man found murdered

PIONEER NEWS SERVICE ■ PRAYAGRAJ

Panic gripped Danpur Chakia, Karma and adjoining villages under Ghurpur police station for hours after an elderly man was found murdered in a field.

According to a report received here, the deceased was identified as Ram Vishnu Bharatiya (76), a resident of Karma village. A team of senior police officials, forensic experts rushed to the spot for investigations. The police recovered a blood stained rod a few metres from the site. The family members have lodged a named first information report (FIR) on the basis of which the police arrested a man identified as Arvind (32), a resident of Karma village. The Ghurpur police said Arvind was released on bail four months back from the Naini Central Jail.

"Arvind had been behind bars on charges of murder," said Ghurpur SS. "Police are interrogating the accused to know the motive behind the murder," he added.

DENGUE CASES: City's urban and semi-urban areas have turned into hotspots for dengue cases. With fresh six cases of dengue, the total number of cases has gone up to 107 as per the UDSP (Unified Disease Surveillance Portal).

Out of six new cases, four of them are from urban pockets including Transport Nagar, Mundera Chungi, Preetam Nagar and Jhunsi. While rest of the two cases were from Kaurihar and Chaka. District Malaria Officer (Prayagraj) AK Singh told reporters that 83 out of total 91 patients have already recovered and there are only eight active cases in the city. He, however, said, "Out of eight active cases, six patients are being treated at different hospitals while two patients are being treated at home". Moreover, out of total 91 verified dengue cases reported in the district so far, 74 cases were reported in urban pockets, while 34 in

trans-Ganga and trans-Yamuna areas. Officials of the health department, however, claimed, there is no need to panic as fogging and anti-larvae spray exercise has been extensively carried out across the district. Officials also added, urban pockets are witnessing an increasing trend in dengue cases since past 15 days, but effective measures are being initiated to check the vector-borne disease.

Officials also claimed that city pockets have undoubtedly more dengue cases, particularly in semi urban pockets, and all the hotspots are under scanner. An anti-larvae spraying drive has been intensified in these areas, including Ashok Nagar, Rajapur, Teliyanganj, Govindpur, and old city localities. City residents have, however, been urged to take preventive measures to check the spread of dengue, said a senior health official, adding, health teams are appealing people to use mosquito nets and repellents.

Spl lecture organised to mark Deendayal Upadhyaya Jayanti

PIONEER NEWS SERVICE ■ VARANASI

A special lecture was conducted by Pandit Deendayal Upadhyay Chair, Faculty of Social Sciences, Banaras Hindu University (BHU) on the occasion of Pandit Deendayal Upadhyaya Jayanti on Monday at the Sambodhi Sabhagar on varsity campus here. Prof Tej Pratap Singh, coordinator of Pandit Deendayal Upadhyay Chair inaugurated the programme by welcoming the dignitaries. In his welcoming address, Prof Singh explained the rising significance of 'soft power' in influencing external relations. Key speaker Dr Vinay Sahasrabudhe, President of the Indian Council for Cultural

Relations (ICCR), former Member of the Parliament of India and a researcher delivered his special lecture on the topic 'Pt. Deendayal Upadhyay: Cultural Nationalism and India's Soft Power'. The chair for the session, Prof Binda Paranjape, Dean, Faculty of Social Sciences, talked about

the significance as well as challenges of maintaining cultural solidarity in a multicultural nation like India.

Prof Singh proposed the vote of thanks. Prof Amarnath Mohanti, Prof Abhinav Sharma and students from various departments were present on the occasion.

IRRI Philippines team visits BHU

PIONEER NEWS SERVICE ■ VARANASI

A team of scientists from International Rice Research Institute (IRRI), Philippines led by Dr Amelia Henry and members Mignon Natividad and Caesar Arloo Centeno visited the IRRI-funded Rice Breeding Project running at Banaras Hindu University (BHU) under leadership of Prof Shrawan Kumar Singh. The objectives of the project are to develop high-yielding rice varieties coupled with different specific genes to address the biotic and abiotic stresses and nutritional qualities like high zinc, iron, protein and low glycemic index rice. The team expressed happiness over the progress made by the BHU centre. Many advanced breeding lines are in the pipeline to meet the global food

demand. Prof Singh said rice is important food crop of the world population and India is the top rice exporter country. Hence, enhancing India's rice production is very important for world food and nutritional security and in balancing global inflation. The BHU is continuously joining hands with IRRI in the development of high-yielding rice varieties to meet global challenges and food security, Prof Singh added.

APPOINTED: Venugopal Badaravada, an activist of Varanasi working for preserving and promoting of Zebu Cattle Breeds, has been appointed by the Union Minister of Agriculture & Farmers' Welfare and the President of ICAR Society Narendra Singh Tomar as a member of the general body and governing body of the

ICAR Society, for the key role in Indian Council of Agricultural Research (ICAR). Venugopal who attended the prestigious international events like PM Natendra Modi's programmes at Madison Square Garden in New York, Howdy Modi in Houston, USA, and Namaste Trump in Ahmedabad, has been appointed as a member of the general body and governing body of the ICAR Society, for three-year term. Venugopal has so far travelled to 21 countries across five continents and his main focus is on Zebu cattle, livestock and agricultural research. He also enjoys privilege of honorary citizenship in Canada and Brazilian city Uberaba, world capital for Zebu cattle, underscoring his global recognition for outstanding contributions to agriculture. Venugopal serves as the Central Advisory Member for the Rashtriya Gokul Mission and is an ex-member of the National Livestock Mission under the Ministry of Fisheries, Animal Husbandry and Dairying.

Swamishri to arrive in Kashi on October 6

PIONEER NEWS SERVICE ■ VARANASI

After completing his P'aramhansi Ganga Ashram in Madhya Pradesh, the Shankaracharya of Jyotishpeeth Swami Avimuktshwarananda Saraswati, popularly known as Swamishri, will arrive in this holy city via Seoni on October 6. Giving this information here on Monday, his media in-charge Sanjay Pandey said during his stay in the city where Swamishri was born and brought up till his appointment as the Shankaracharya, religious rituals will be held for the people who died during the corona pandemic period. Besides, Swamishri will also deliver his religious discourses on Shrimad Bhagwat Katha.

He said that the Chaturmas stay of Swamishri will be completed in Barheta district (MP) on Bhadrapada Purnima. Later, after participating in various religious events in the Seoni area for three days, he will reach Kashi on October 6. Sometime ago, Swamishri had announced that religious rituals will be organised in Kashi during Pitru Paksha for the peace of the souls and salvation of those who died in the country and abroad during the corona pandemic period and those whose last rites could not be performed as per the rituals. The path of Shrimad Bhagwat Mahapurana will be organised apart from religious rituals like tarpan etc by the Vedic scholars in this direction, Pandey added.

NSS DAY: The motto of National Service Scheme (NSS) "Not Me But You" reflects the essence of democratic living. Its ideological concept is inspired by the ideals of Mahatma Gandhi in which welfare of the people and the society lies and these underline that the welfare of the individual ultimately depends on the welfare of the society. These words were expressed by the Head of Comparative Theology Department, Sampurnanand Sanskrit University (SSU) Prof Hari Prasad Adhikari while speaking in a programme organised by NSS Unit of the university on NSS Day on Sunday.

Passengers to get sleeping pod facility at Chheoki railway stn

PIONEER NEWS SERVICE ■ PRAYAGRAJ

Now passengers will get the facility of sleeping pods at Chheoki railway station here. A few days ago the tender process for making sleeping pods at the Prayagraj Junction had started. A Pune-based company will manufacture sleeping pods here. The company has also started the construction process on the building containing the old booking counter and reservation counter located on the Civil Lines side of the junction. Passengers will be able to get this facility at Prayagraj Junction possibly in October or November. Railway passengers will be able to rest here. Passengers will be able to book couple and single sleeping pods. Along with Chheoki, sleeping pods will be prepared at Kanpur Central, Aligarh Junction, Etawah and Mirzapur railway stations. It may be pointed out here that for the first time in North India a

sleeping pod is being prepared at Prayagraj Junction. Senior DCM of Prayagraj Division Himanshu Shukla said that such pods are to be made at Prayagraj Junction as well as other railway stations. In view of Mahakumbh 2025, there will be a large number of passenger traffic here. Keeping this in mind sleeping pods are to be made at Prayagraj Junction, Chheoki Junction etc.

MAHAKUMBH: With around 40 crore devotees and tourists expected to converge at Prayagraj during Mahakumbh-2025, the state government has laid special emphasis on widening and constructing new roads leading to the mela area. To expedite this work, the state government has approved the budget of ₹23.48 crore for the widening of 12 roads leading to the fair area. Of this, first tranche of ₹17.43 crore has been released. The work of road widening will be done by the Cantonment Board and

funds released by public works department (PWD). Apart from widening roads, new ones will also be constructed to decongest the mammoth gathering of devotees. Among this, a link road will be constructed, connecting old GT Road to Kali Marg near Patel Sansthan. For this, ₹1.52 crore has been released. Likewise, a new road will be constructed from Alopibagh flyover to Kali Marg via PWD store for which ₹1.91 crore has been given. Apart from this, an amount of ₹1.75 crore for widening of road from Harshvardhan intersection to Jawahar Lal Nehru Road, ₹60.51 lakh for interlocking at VIP Ghat, ₹69.51 lakh for construction of Yamuna Patti interlocking route (from Akshayvat Marg), ₹1.58 crore for interlocking on Lal sadak (road) and interlocking and widening on Sangam return route have also been released. Also, ₹1.82 crore has been released for inter-

locking and widening of Jagdish ramp. Along with this, funds have been released for construction of three ghats. The government has approved ₹34.55 crore for acquiring 11,754 sqm of land for pucca ghats. These will come up at Dashashwamedh Ghat in Daraganj, Nehru Ghat near Saraswati Ghat and a 30m long ghat behind ECC for which ₹1.48 crore has been released for acquiring 504 sqm land.

Funds have also been released for several other works related, including interlocking of road near Talab Naval Rai, new road near Triveni Marg stretching from Jagannath temple to Bangar Dharamshala.

"Now that funds are being approved and released, work for construction of new roads and widening of existing ones will be expedited," said Mahakumbh Mela Adhikari, Vijay Kiran Anand.

Commerce Faculty wins volleyball championship

PIONEER NEWS SERVICE ■ VARANASI

The Commerce Faculty won the Inter-Faculty Volleyball Championship (Men) 2023-24 defeating Arts Faculty in the final match played on Monday. The championship was organised by the University Sports Board (USB), Banaras Hindu University BHU) on varsity sports ground here.

The final match of the Inter-Faculty Volleyball Championship (Men) 2023-24 was played between Arts Faculty and Commerce Faculty and the latter won the final match and championship as well by defeating the former by 25-18, 25-10, 25-14. Earlier the semi-final matches were also played. In the first semi-final, the Arts Faculty became the winner by defeating the Institute of Science in four sets 25-21, 25-23, 22-25, 25-18. In the second semi-final match, the Commerce Faculty became

The team of Commerce Faculty which won the Inter-Faculty Volleyball Championship (Men) 2023-24 organised by the USB, BHU.

the winner by defeating Institute of Agricultural Science in three straight sets by 25-17, 25-17 and 25-10. In the match played for third place, the Institute of Science emerged victorious by defeating Institute of Agricultural Science in two straight sets by 25-12 and 25-4. The chief guest of the final match was chief proctor of the university Professor Abhimanyu Singh and the special guest was vice-

president of USB Professor SBS Raju. The guests distributed trophies and medals among the winning players. The organising secretary Robin Kumar Singh, secretaries of USB Dr Rajeev Singh and Professor Archana Singh, teachers from various institutes, faculties and colleges of the university and all the assistant directors of the USB were present besides all officers and employees of the USB.

'Clean Food Day' observed

PIONEER NEWS SERVICE ■ VARANASI

Along with the entire Indian Railways, the eighth 'Swachhata Pakhwada' (Cleanliness Fortnight) is being run on the theme of 'Swachhata Hi Seva' from September 16 to October 2 in different stations of Varanasi Division of North Eastern Railway (NER). In the same sequence, 'Clean Food Day' was observed on Sunday and during the day, a thorough inspection of the cleanliness of the catering facilities available at the food stalls of the stations and in the pantry cars of the trains was carried out. On the instructions of Divisional Railway Manager (DRM) Vineet Kumar Srivastava, the nominated officers checked food stalls, mobile vendors and pantry cars of trains at different stations of Varanasi Division of NER. Under the leadership of Senior Divisional Mechanical Engineer (EnHM) Apoorva Swarnkar, food stalls were inspected at Prayagraj Rambagh station along with Shramdaan, tree plantation

and public awareness. A cleanliness rally was also taken out. The quality of food and beverages available at Jan Aahar units, canteens, food stalls, food plazas and local vendors was also checked at Banaras, Varanasi City, Ballia, Ghazipur City, Azamgarh, Mau, Bhatni, Siwan and Chhapra stations. During the day, pamphlets were distributed among the passengers on the harm caused by filth in stations and railway premises. With a view to promote self-motivation and

awareness nearby the general public was made aware through audio/video messages at the stations.

Earlier, 'Clean Premises (Railway Accommodation and Colonies) Day' was observed in which all the wards and premises of Railway hospitals and health units were cleaned under the guidance of designated officers. High level cleanliness was ensured and plaster and electrical fittings of Railway colonies, rest houses, retiring rooms, waiting rooms

and dormitories were also checked. During the day the cleanliness campaign was launched in Varanasi Divisional Officers' Residential Colony, Vasundhara Railway Colony, Divisional Hospital premises apart from Varanasi City, Ghazipur City, Banaras, Prayagraj Rambagh, Ballia, Azamgarh, Mau, Belthara Road, Deoria Sadar, Kaptanganj, Aunrihar, Bhatni, Chhapra Junction railway stations. The railway colonies of Chhapra Kacheri and Siwan stations were thoroughly made clean, trees planted for beautification and garbage disposed of from different places. The cleanliness campaign was also launched by the railway officers and employees in the coaching depots, diesel lobbies, divisional hospital, primary schools, goods depots, diesel lobbies, Ghazipur and Banaras training centres and circulating areas of small and big stations of all categories. With a view to spreading awareness about the responsibility of cleanliness, the general public was also

PAPER WITH PASSION

India's El Dorado

UP emerges as investors' hot favourite as CM Yogi lays out red carpet, opportunities

Ever since first-time Chief Minister Yogi Adityanath took over the reins of Uttar Pradesh, he has turned its earlier sobriquet 'Uttar Pradesh' on its head and into 'Uttam Pradesh'. The wheels of infrastructure, development, economy, pro-business policies, investment, safety, security, law and order, sound administrative decisions and overall satisfying governance for all sections of society are clucking at the right pace, in the right direction. The State's journey under Yogi's leadership is a living testament to its potential as an investment destination. As Uttar Pradesh continues its march towards progress and prosperity, it continues to beckon investors to participate in its transformation and be part of the heartland's success story. India's most populous State has witnessed remarkable transformation under Yogi's dynamic leadership. He has steered the State towards unprecedented development and economic growth. His visionary leadership has not only improved the law and order situation but also created a conducive environment for business and investment growth. As Uttar Pradesh strides confidently into the future, there are abundant investment opportunities that await both domestic and foreign investors. Yogi Adityanath has been vocal about his vision to transform Uttar Pradesh into a global investment hub. His proactive approach towards development has been guided by the mantra "Sabka Saath, Sabka Vikas, Sabka Vishwas," which translates to "Development for all, with everyone's support and trust". Yogi Adityanath's Government has undertaken massive infrastructure projects to improve connectivity across the State viz., the 'Ganga Expressway' and 'Purvanchal Expressway'. These projects not only enhance transportation convenience but also open up opportunities in real estate and logistics. Uttar Pradesh has a thriving industrial sector with established industrial zones like the Noida-Greater Noida region and the upcoming defence corridor in Bundelkhand.

The State offers various incentives to attract industries, such as tax exemptions and subsidies. With fertile land and a large agricultural base, Uttar Pradesh offers excellent prospects for investment in agriculture and food processing industries. Initiatives like "One District, One Product" (ODOP) promote unique regional products and boost agri-based businesses. Investments in the tourism sector, including hospitality, travel and infrastructure, are poised for growth as the State promotes religious and cultural tourism with gusto. The Chief Minister has actively engaged with potential investors and made a compelling pitch to invite them to Uttar Pradesh. The State has introduced single-window clearances, industry-specific incentives and land acquisition reforms. Existing and upcoming airports, highways and state-of-the-art amenities for visitors add to the charm of Uttar Pradesh. Last but not the least, improved law and order has created a secure environment for businesses.

Canada must rein in extremists

Ottawa must be made to understand the sentiments of New Delhi; it should stop pampering pro-Khalistan elements

KALYANI SHANKAR

The ongoing massive diplomatic row has brought a sudden spotlight on the Canada-India relationship.

Differences emerged between the two countries after Canadian Prime Minister Justin Trudeau alleged Indian involvement in killing a separatist Sikh activist, Nijjar. Outraged, New Delhi vehemently denied the claim and dismissed it as "absurd and motivated."

On June 18 this year, a pro-Khalistani leader Najjar was shot dead outside a Gurudwara in Surrey, British Columbia. India had declared him a wanted terrorist. If the relationship between India and Canada had been trending smoothly, it was because of the Geopolitical developments, economic relations, and demographic trends. It worsened after the Nijjar killing. The two countries resorted to tit-for-tat reactions against each other. The ties between the visiting Canadian Prime Minister Justin Trudeau for the G20 summit last week were visibly frosty.

New Delhi has been protesting the presence of the pro-Khalistani elements in Canada. New Delhi also frowned on the referendum for Khalistan by them. When Trudeau was on a bilateral visit in 218, there were embarrassing moments about the presence of a Khalistani activist in his delegation. The pro-Khalistani elements sent death threats to Indian diplomats in Ottawa. The request for their extradition also has yet to be addressed so far.

Why is Canada important to India? The former British colony has the highest population of Sikhs outside their home state of Punjab. About 1.4 million Indian immigrants live in Canada out of 40 million. About 770,000 people follow Sikhism. New Delhi has often complained about their activities.

After the controversy, Canada and India acted swiftly to expel senior diplomats in reciprocal moves earlier this week. On Thursday, India's foreign ministry suspended visa services temporarily for Canadian citizens. Ottawa claims that Canadian security agencies had uncovered

evidence linking the Indian government to the assassination.

As for domestic politics, the Congress and other parties supported the Indian government and criticised Trudeau's statement. They are shocked at the allegation that the Indian government had orchestrated the killing of an Indian-origin Canadian citizen on Canadian soil and supported the South Bloc. Only Sukhbir Badal, the leader of Akali Dal, suggested that political parties should work together to stop anti-Sikh propaganda in the media.

As for the international scenario, the reaction towards India from its Western allies has been cautious. Top U.S. diplomat David Cohen claimed the shared intelligence among the Five Eyes made Justin's allegation. Five Eyes Network is an intelligence alliance comprised of the United States, the United Kingdom, Australia, Canada, and New Zealand. The New York Times said on Sunday, "In the aftermath of the killing in June of the Sikh separatist leader Hardeep Singh Nijjar, U.S. intelligence agencies offered their Canadian counterparts context that helped Canada conclude that India had been involved."

Trudeau called on India to cooperate with Canadian

THE UNITED STATES WANTS TO PARTNER WITH INDIA TO BALANCE CHINA'S INFLUENCE AND WOULD PREFER TO AVOID STRAINS DEVELOPING AMONG ITS ALLIES

authorities to "uncover the truth" about the killing but stated that he was not looking to escalate tensions between the two countries. The stand-off will have repercussions for both India and Canada. India is Canada's tenth most significant trading partner.

Secondly, India has a vital role in Canada's 2022 Indo-Pacific Strategy. Thirdly, India is Canada's tenth most significant trading partner. The two countries have been in discussions about a trade agreement for more than a decade. In 2022, the total trade value between them only reached C\$13.7 billion, a small portion of Canada's overall trade volume amounting to C\$1.52 trillion.

A favourable climate for high-level negotiations for an Early Progress Trade Agreement (EPTA) existed. The October meeting for EPTA talks has now been postponed indefinitely.

Fourthly, the Canadian merchandise trade had grown from approximately \$3.87 billion in 2012 to \$10.18 billion in 2022. Trade will be hit for both sides. Fifthly, there could be a reduction in immigration from India to Canada. Canada has been home to many immigrants in recent years. It has tripled since 2013, overtaking Philipponmes and China. The

students' traffic would also be affected adversely. Over 30 per cent of the students come from India to study in Canada. Further, tourist traffic will also be affected. On September 21, India declared that it would temporarily stop issuing visas to Canadian citizens because of security concerns affecting their missions in Canada. New Delhi is also considering cancelling overseas citizenship to pro-Khalistanis.

India has come a long way since the 1980s and 1990s, rapidly gaining political and economic power. The United States wants to partner with India to balance China's influence and would prefer to avoid strains developing among its allies. A former Pentagon official said that if the U.S. chose the two countries, it might favour India as Washington has been wooing India to balance China in the region.

However, any negative impact on India-Canada relations could prevent Canada from joining the Indo-Pacific network of institutions. Ottawa recognises India's regional power and influence. Ottawa must be made to understand the sentiments of New Delhi and should not pamper pro-Khalistani elements.

LETTERS TO THE EDITOR

A TICKING TIME BOMB

Sir — Hypertension is a ticking time bomb. It is imperative that people take note of the fatalities and disabilities caused by this "silent killer" known as hypertension. The first report from the World Health Organization (WHO) on the perils of hypertension revealed that nearly 80 per cent of individuals worldwide with high blood pressure suffer due to inadequate treatment. Shockingly, only 37 per cent of Indians with hypertension are diagnosed, and merely 30 per cent receive treatment, despite the abundance of anti-hypertensive medications, the expertise of skilled physicians, and a wealth of literature outlining its dangers. The danger of hypertension is encapsulated in the "rule of halves" - half of the global population is diagnosed, half of those diagnosed receive treatment, and only half of them attain sustainable normal blood pressure levels.

Neglected hypertension can lead to an enlarged heart and inefficient blood vessel function, resulting in casualties. This is particularly unfortunate given the simple and effective ways to prevent and manage this debilitating condition. Lifestyle adjustments, such as regular physical activity, a balanced diet with limited salt and sugar intake, minimal alcohol consumption, smoking cessation, stress reduction, and consistent medication under supervision, can make a significant difference. Measuring blood pressure is a straightforward process, made even easier with the availability of compact devices.

Ganapathi Bhat | Akola

TAGORE'S VISION

Sir — Rabindranath Tagore envisioned that Indians should embrace the best that the international community has to offer by embracing the spirit of the "Global Village" and emphasising the exchange of thoughts and culture in harmony with nature. This vision was embodied in his brainchild, Visva-Bharati or Santiniketan, where the rich cultural tapestry of Bengal, India, and the entire world would inter-mingle freely. From Manipuri dance in

5-Star victory for India

India secured a resounding 5-star victory. Three batsmen — Gill, Shreyas, and SKY (Surya Kumar Yadav) — along with two bowlers — Ashwin and Jadeja — crushed Australia by a convincing 99-run margin.

Earlier, centuries for Gill (his 6th in ODIs, 9th in international matches) and Shreyas Iyer (his 3rd in ODIs, 4th in international matches) provided a solid foundation for India. Bowlers Jadeja (3 for 42), Ashwin (3 for 41), and P. Krishna (2 for 56) spun their magic, clinching the 2nd ODI match and securing the series for India. SKY (Surya Kumar Yadav) played a pivotal role with four sixes in an over and a whirlwind 72* (37 balls), propelling India to an imposing total of 399 runs (for 5 in 50 overs) and securing a substantial victory.

SKY's staggering strike rate of 200% begs the question: should he be considered as an opener in shorter formats, perhaps in T20s?

PV Madhu Nirriti | Secunderabad

Tagore's dramas to the works of great artists like Ananda Samarakoon (composer of Sri Lanka's national anthem 'Sri Lanka Matha...'), all exemplify this cultural and intellectual exchange aimed at enlightening both the individual and society. Tagore remains a living example of an ideal human being who takes pride in his roots while embracing the global community.

It is disheartening to witness certain forces working tirelessly to narrow India's perspective and isolate it from the rest of the world in the name of "national pride." We earnestly request the relevant authorities to follow Tagore's ideals. Would the all-embracing, secular, and humanitarian Tagore, who despised the concept of "nationalism" from the depths of his heart, have supported the actions of political leaders on campus who propagate hatred against minority groups?

As far as continuing Tagore's legacy is concerned, it is being carried forward by the paragon of ethical values, Amartya Sen. The constant attempts to tarnish his noble image as a "land-grabber" are a direct assault on Tagore's legacy itself. Sen and Tagore's legacies are synonymous terms. Unlike the current political custodians of

the university, Sen's worldview encompasses the world, transcending the confines of narrow "nationalism," and places the utmost importance on secularism, religious tolerance, humanity, and the economic upliftment of all. It is high time that the narrow-minded mindset opposing dissent, freedom of speech, secularism, and humanity be consigned to oblivion within the campus, and justice be done to Santiniketan's UNESCO-awarded status as a "World Heritage site."

GOD OF LOGIC

Sir — The God of logic, Lord Ganesha, also known as 'Pratham Pujya,' which means the first one to be worshipped, teaches us the importance of beginning with logic. In essence, He encourages us to approach our goals with prudence and rationality. This wisdom from Lord Ganesha also guides us to foresee potential challenges and address them proactively. Rather than regretting our actions later, we should think logically before we act.

New science awards to unearth fresh talent

The rationalisation of awards providing equal opportunities to people working in every sphere of science will help identify the best scientific talent

BIJU DHARMAPALAN

The government of India has decided to rebrand the science awards delivered by various ministries into a single new avatar. As per the new decision, there is a rationalisation of awards. Previously, the Department of Science and Technology presented a total of 207 awards, including four with national significance. Additionally, there were 97 private endowments and 56 internal awards. The Department of Biotechnology granted six fellowships as part of its awards program.

The Department of Atomic Energy distributed 25 performance-based honours and 13 awards in non-core domains. Except for the one internal award given by the Department of Atomic Energy in the name of Homi Jehangir Bhabha, all other internal awards have been stopped. The new avatar 'Rashtriya Vigyan Puraskar' shall be limited to 56 prizes under 4 categories, viz., Vigyan Ratna, Vigyan Shri, Vigyan Yuva-Shanti Swarup Bhatnagar, and Vigyan Team. The Vigyan Ratna Award will honour the lifetime accomplishments of scien-

tists, while the Vigyan Shri Award will acknowledge notable contributions to a specific field. The Vigyan Yuva Shanti Swarup Bhatnagar Award aims to inspire young scientists who have demonstrated outstanding contributions in their respective fields.

The Rashtriya Vigyan Puraskar will be conferred across 13 disciplines, encompassing Physics, Chemistry, Biological Sciences, Mathematics and Computer Science, Earth Science, Medicine, Engineering Sciences, Agricultural Science, Environmental Science, Technology and Innovation, Atomic Energy, Space Science and Technology, among others. The Rashtriya Vigyan Puraskar is open to every Indian citizen and also to people of Indian origin working in

other countries. However, there is a limit to the number of people of Indian origin to be considered for these awards. Out of the total number of 3 awards in the Vigyan Ratna, a maximum of only 1 can be considered from people of Indian origin, while in Vigyan Sri and Vigyan Yuva-Shanti Swarup Bhatnagar it is 3 out of 25, while the Vigyan Team award is exclusively for people working in India. Similarly except for

Vigyan Yuva-Shanti Swarup Bhatnagar (VY-SSB) there is no upper age limit for applying. In VY-SSB the upper age limit is fixed at 45.

In the earlier version of the award that has been followed for many years only people working in government sectors were considered. The Rashtriya Vigyan Puraskar is open to all researchers, irrespective of the organization. Even people working outside the gamut of any organization can also apply for these awards. This will help thousands of outstanding researchers working under various NGOs in the country to showcase their scientific talents and come to

the limelight.

A panel headed by the Principal Scientific Adviser will be responsible for choosing the recipients. The Rashtriya Vigyan Puraskar Committee will comprise secretaries from all six science departments, four presidents chosen from science and engineering academies, and six eminent scientists and technologists representing various realms of science. Each year, nominations for these awards will be open from January 14 to February 28, coinciding with National Science Day. One landmark decision in the new award is the clause for self-nominations, which was not possible in the earlier version. Often the malpractice and unethical practices happening in science are because of this nomination culture. The rationalisation of awards providing equal opportunities to people working in every sphere of science will help identify the best scientific talent from the country.

FIRST COLUMN

EMBRACING LIFE...
THE UTMOST NEED

This autumn, let go of the things that trouble you; let them fall like dried leaves

SAKSHI SETHI

Our heart is wide enough to embrace the world and hands are long enough to encompass the world." Life can be a beautifully complex tapestry, where on the surface, everything seems picture perfect—the marriage, the career, the health and the loving family all paint a pretty picture. But in quiet moments, when the thoughts drift and one finds yearning for something more or something different, then it's time to listen to that inner voice. It's not about dissatisfaction, rather it's about growth.

In a world that often tells everyone to stick with the status quo, this is the permission slip to break free from those chains and chase dreams. In a world often defined by expectations and conformity, embracing the authentic self is a superpower that can propel an individual to move forward.

As a younger self, everyone had a sense of naivety that allowed them to approach the world with curiosity and fearlessness. With time and growth, the brains get wired to keep themselves safe which in turn leads to making to resist change. But if tapped into that childlike sense of wonder, one can embrace change with excitement and enthusiasm. One needs to trust the process and keep moving forward. One shouldn't be afraid to take risks and try new things. With a bit of naivety, an individual can approach change with a fresh perspective and an open mind.

To make a change, one needs to determine the value of the change. As a human being, one doesn't do things simply for the sake of doing them, rather one needs to have a purpose, value or benefit.

Stepping out of your comfort zone can be scary but it's where the opportunities and growth lie. Moving to a new frequency may crumble some aspects of life, but at the same time will also make room for new opportunities and experiences. There is no denying the fact that change can be scary but everyone must face it. It's the words and perceptions of an individual that matter and make an impact on the behaviour and actions. Reframing the way an individual thinks about change is very valuable in whether one worries about it or embraces it. One needs to stop thinking about embracing change as the big bad wolf—"scary," "uncertain" and "negative" and start thinking about it as an adventure and a fun experience where they learn, grow and have fun in the process.

Remember, there is no better time than autumn to begin forgetting the things that trouble us, allowing them to fall away like dried leaves.

Digital medium and
new economic paradigm

Attaining the balance between business and social values in the digital realm is the need of the hour

UTTAM CHAKRABORTY

SANTOSH KUMAR
BISWAL

Jeff Bezos, the founder of Amazon has rightly argued, "There is no alternative to digital transformation. Visionary companies will carve out new strategic options for themselves those that don't adapt, will fail."

Attention economy is the latest lexicon in the landscape of business and digital communication. There is hardly any space that digital media has not reached and influenced, whether it is for good or bad. Technology and digital connectivity have evolved a new paradigm in the sphere of economy, the attention economy, which is doing around all across. This new model has redefined the very rudiments of the economic paradigm and there have been shifts in Ferments, foundations and the future of the economy on a global scale. The confluence of economy and interactive digital communication emanating from the economy has wider implications on the genesis and praxis of economy and digital communication. It has caused concerns about privacy, manipulation, and the toll it takes on mental health which need to be amicably addressed.

No wonder, the attention economy has transformed the way we live, work, and interact, and it's time we take a closer look at its impact and the challenges it presents. Such a form of new economic model has emerged in the digital age. It's a framework that recognizes that attention has become a finite resource in an information-rich world. In the traditional economic model, goods and services are exchanged for money. In the attention economy, however, the currency is not dollars or euros; it's our precious time and cognitive resources.

The attention economy revolves around capturing and holding the attention of individuals to monetize it. This is principally achieved through advertising, content consumption, and social media. Social media platforms have played a pivotal role in the rise of the attention economy. They have created a digital landscape where individuals willingly share their personal information, preferences, and behaviours, providing an invaluable resource for advertisers and content creators. Platforms like Facebook, Instagram, Twitter, and TikTok have mastered the art of keeping users engaged and scrolling for hours on end.

One of the key features of social media is the algorithm-driven feed, designed to show users content that will keep them on the platform as long as possible. These algorithms analyze user behaviour, preferences, and interactions to curate a personalized feed that maximizes the chances of holding the user's attention. Whether it's endless scrolling on Instagram or watching recommended videos on YouTube, these algorithms are designed to capture and retain our attention.

Companies and platforms vie for our attention because they know that the more of it they can capture, the more advertising revenue they can generate. In this light, social media has not spared any space whether it is personal or professional. Numerous social media platforms have played a pivotal role in the rise of the attention economy. They have inevitably created a niche digital landscape where individuals willingly share their personal information, preferences, and behaviours, providing an invaluable resource for advertisers and content creators. It is startling but true. Platforms like Facebook, Instagram, Twitter, and TikTok have mastered the art of keeping users engaged and scrolling for hours

THE THE
ATTENTION
ECONOMY IS
NOT ALL FREE
FROM FLAWS.
SOCIAL MEDIA
PLATFORMS AND
ADVERTISERS
ARE
CONSTANTLY
REFINING THEIR
TECHNIQUES TO
KEEP US
HOOKED

(Chakraborty is HoD,
Digital Marketing &
Associate Professor,
Presidency University,
Bengaluru and Biswal
is Associate Professor &
Head, Journalism and
Mass Communication,
Rama Devi Women's
University,
Bhubaneswar; views
are personal)

Moreover, artificial intelligence and machine learning are the new entrants that have started positioning curated and personalized content which have larger implications for the economy by capturing the users' attention. Whether it's never-ending scrolling on Instagram or watching recommended videos on YouTube, these algorithms are designed to capture and retain attention.

The attention economy is not all free from flaws. Social media platforms and advertisers are constantly refining their techniques to keep us hooked. These models of business activities can foster the spread of misinformation and echo chambers. Algorithms often prioritize content that aligns with a user's existing beliefs and preferences. This can lead to the reinforcement of biases and a lack of exposure to diverse perspectives, ultimately contributing to polarization and the spread of fake news. The attention economy's impact on mental health is a growing concern. Every notification, every "like," every comment is a small reward that keeps us coming back for more. Take control of your social media feed by unfollowing accounts that don't add value or contribute to negativity. Curate a feed that inspires and educates rather than drains your energy. This can lead to addictive behaviour and compulsive checking of social media, negatively impacting our mental health and productivity.

The constant barrage of content also makes it challenging for individuals to focus and engage in deep, meaningful activities. Continuous

partial attention (CPA) is an automatic process that allows people to pay attention to multiple sources of information at the same time while searching for relevant information. This allows people to move from a superficial focus on a lot of information to focus on highly relevant information within a short attention span. CPA has been used to describe our tendency to be constantly distracted by notifications and the fear of missing out (FOMO).

Fear of missing out (FOMO) is a feeling of anxiety about not being aware of or missing out on information, events, experiences, or life decisions that could improve one's life. It is characterized by the desire to constantly stay in touch with what others are doing. FOMO has increased recently due to technological advancements. Social networking sites create many opportunities for FOMO. While it provides opportunities for social engagement, it provides a view of the myriad of activities in which one does not participate. Psychological dependence on social networks can lead to FOMO or even pathological use of the Internet. This hampers our ability to concentrate, which is essential for tasks that require sustained attention and critical thinking.

Research has shown that excessive use of social media and digital devices can lead to feelings of loneliness, depression, and anxiety. The constant comparison with others, the pressure to curate a perfect online persona, and the fear of missing out on social events can take a toll on our well-being. The relentless stream of information and sen-

sationalized news can contribute to information overload and heightened stress levels.

There is little doubt that the attention economy enjoys a coveted space in digital marketing and business strategy. However, in a view to mitigate the ill effects of excessive digital media consumption, sanity in terms of focused work, leisure, resetting your mental state, algorithmic accountability and minimizing mindless scrolling is highly warranted. Periodically disconnect from digital devices and social media. A digital detox can help reset your mental state and reduce dependency on technology. Allocate time for focused work, leisure, and social media, and try to minimize mindless scrolling.

The attention economy is a double-edged sword. On one hand, it has revolutionized the way we access information, connect with others, and do business. On the other hand, it has raised significant concerns about privacy, manipulation, and the toll it takes on our mental health.

Finding a balance between benefiting from the opportunities of the attention economy while safeguarding our well-being is a complex challenge. It requires a combination of individual responsibility, societal awareness, and ethical practices from tech companies.

Finding a balance between benefiting from the opportunities of the attention economy while safeguarding our well-being is a complex challenge. It requires a combination of individual responsibility, societal awareness, and ethical practices from tech companies.

Women's reservation Bill: A pathbreaking achievement

It is a historical step and culmination of a series of progressive reforms that the Modi Government has undertaken for the welfare of women

Empowerment began with the much-acclaimed Beti Bachao Beti Padhao (BBBP) campaign, launched by the Prime Minister in 2015 at Panipat, Haryana. BBBP addresses the declining Child Sex Ratio (CSR) and related issues of women's empowerment over a life-cycle continuum. Speaking on the success of this programme, the Prime Minister while addressing citizens of his adopted village Jayapur said, "Our Mantra should be: 'Beta Beti, Ek Samaan.' Let us celebrate the birth of the girl child. We should be equally proud of our daughters. I urge you to sow five plants when your daughter is born to celebrate the occasion."

VINEETA HARIHARAN

((The author is a public policy expert and spokesperson, BJP and State Vice President, BJP Women's Wing; views are personal))

of the Swachh Bharat Mission which provided izzat ghars to more than 120 million women thus ensuring access to safe sanitation for women and girl children across rural and urban Bharat. Saving millions of women from chronic respiratory disorders by providing smoke-free kitchens through the widespread Ujjwala Yojana which provided gas cylinders to more than 96 million women was another significant life-changing provision for the women of our country. Apart from these, several important programmes were delivered for the betterment of the health and hygiene of our women.

Distribution of over 270 million sanitary pads priced at Re. 1 through Jan Aushadhi Kendras, providing 39 million

free antenatal check-ups under PM Surakshit Matritva Abhiyan; benefitting more than 30 million women through the PM Matru Vandana Yojana; increase in paid maternity leave period from 12 weeks to 26 weeks; were some of the significant health initiatives. As an outcome of these, we could achieve a decline in Maternal Mortality Rate from 130 in 2014 to 97 per lakh live births in 2018-20. Modi Government also facilitated holistic well-being development schemes such as Mission Poshan.

This was an integrated nutrition support programme to overcome the challenges of malnutrition in children, adolescent girls, pregnant women, and lactating mothers. Poshan Abhiyan has reported benefi-

ciaries of more than 100 million which includes more than 5 million lactating and pregnant mothers and more than 4 million children below 6 months.

Apart from social welfare, this Government has also ensured economic empowerment through various interventions beginning with opening more than 270 million Jan Dhan accounts and providing more than INR 200 million to women entrepreneurs through the MUDRA Yojana. There has been a 28% increase in registration of women-owned MSMEs in just 3 years.

More than 45,000 DPIIT-recognised startups have at least one woman director. Mahila Samman Savings Certificate (MSSC) for girls and women which was anno-

unced by Finance Minister Nirmala Sitharaman ji in the Union Budget 23-24, celebrates Nari Shakti by providing financial freedom and dignity for women and girl children. Apart from social and economic empowerment, this Government has also taken bold steps in bringing much-needed reforms for Muslim women. The Muslim Women (Protection of Rights on Marriage) Act, 2019 declared the pronouncement of instantaneous and irrevocable triple talaq by a Muslim husband as illegal. The Women's Reservation Bill is now the culminating transformation being introduced to ensure adequate women's participation in the electoral canvas of Bharat. The chequered legislative history of the Women's Reservation Bill

began 27 years ago when the H D Deve Gowda-led government introduced it in Parliament in September 1996.

Almost every government has since tried to push it through — the UPA government managed to get it passed in the Rajya Sabha in 2010 but later could not get it through in the Lok Sabha. The move has not come to fruition so far due to a lack of political will and consensus.

The bill will help to represent those who remain underrepresented. The proportion of women MPs was just five per cent in the first Lok Sabha in 1952 reaching a figure of less than 15 per cent today. In Rajya Sabha too, women's representation is about 14 per cent and below 10 per cent in many state assemblies. Bring-

ing in the 1/3 representation will enable many more women's voices to be heard in the wells of the parliament houses. This will also ensure that women's issues and challenges in the most backward areas are represented before the policy and lawmakers which will go a long way in not just keeping our women and girl children safe in the country but also empowering them to play a critical role in nation-building.

The Women's Reservation Bill will be etched in the history of Modern Bharat and the Modi Government will always be known as the most progressive Government that provided 360-degree empowerment for the women of our country—social, economic and now electoral. A proud and jubilant moment in history for all of us.

Philippine removes barrier placed by China in disputed shoal

AP ■ MANILA

The Philippine coast guard said Monday it has complied with a presidential order to remove a floating barrier placed by China's coast guard to prevent Filipino fishing boats from entering a lagoon in a disputed shoal in the South China Sea. Philippine officials condemned the installation of the 300-metre (980-foot)-long barrier at the entrance to the lagoon at Scarborough Shoal as a violation of international law and their Southeast Asian nation's sovereignty.

The Philippine coast guard's report that it has removed the barrier underscores intensifying Philippine efforts to fight China's increasingly aggressive actions, against many odds, in one of the world's most hotly contested waters.

Chinese coast guard vessels laid the rope and net barrier, held up by buoys, last week as a Philippine government fisheries vessel approached and more than 50 Philippine fishing boats swarmed outside the shoal, the Philippine coast guard said.

The Philippine coast guard said in a statement Monday night that it has success-

fully removed the floating barrier in a "special operation" in compliance with the order of President Ferdinand Marcos Jr. It did not provide other details like if the entire barrier was removed and when, and how Chinese coast guard ships, which have closely guarded the shoal for years, reacted.

The decisive action of the Philippine coast guard to remove the barrier aligns with international law and the Philippines' sovereignty over the shoal, the coast guard said. "The PCG remains committed to upholding international law, safeguarding the welfare of Filipino fisherfolk and protecting the rights of the Philippines in its territorial waters."

Video issued by the Philippine coast guard to journalists in Manila showed a diver cutting a part of what appears to be the barrier rope. A man onboard a motor boat tries to lift what appears to be a part of the barrier rope in another video released by the coast guard to the media.

Earlier Monday, Philippine National Security Adviser Eduardo Ano said that "the placement by the People's Republic of China of a barrier violates the traditional

fishing rights of our fishermen".

Ano said in a statement that the Philippines "will take all appropriate actions to cause the removal of the barriers and to protect the rights of our fishermen in the area". He did not elaborate.

In Beijing, Chinese Foreign Ministry spokesman Wang Wenbin said the shoal and its adjacent waters are "China's inherent territory," where Beijing "has indisputable sovereignty".

A Philippine government fisheries vessel "trespassed into the waters" without China's permission on Sept 22, Wang said, and "attempted to intrude into the lagoon" of the shoal. "China's coast guard took the necessary measures to stop and warn off the ship in accordance with the law, which was professional and with restraint," he added.

It's the latest flare-up in long-simmering territorial disputes in the busy and resource-rich waterway, most of which is claimed by China. The Philippines, Vietnam, Malaysia, Brunei and Taiwan are involved with China in the conflicts, which have long been regarded as a potential Asian flashpoint and a delicate fault line in the US-China rivalry in the region.

Nepal, China sign 12 agreements

Nepal PM on China visit

PTI ■ BEIJING/KATHMANDU

China and Nepal on Monday signed 12 agreements, including seven MoUs, to enhance bilateral cooperation in sectors including trade, road connectivity, and information technology after Premier Li Qiang and Prime Minister Pushpa Kamal Dahal "Prachanda" held wide-ranging talks in Beijing. During the meeting, the two leaders comprehensively reviewed the bilateral relations and expressed satisfaction over the close and cordial ties subsisting between the two countries, according to a press release issued by the Nepal embassy in Beijing.

The two sides exchanged views on the ways to further strengthen and consolidate the mutual understanding and cooperation and give a new impetus in the front of econo-

my, trade and people-to-people contacts, it said, two days after Chinese President Xi Jinping held talks with Prachanda in Hangzhou on the sidelines of the Asian Games being held in the eastern Chinese city.

Prachanda, who politically distanced from the pro-China Communist Party of Nepal (Unified Marxist-Leninist) headed by KP Oli after becoming Prime Minister in December last year, made his

economy co-operation; an MoU related to cooperation on green and low-carbon development; and an MoU on cooperation in the field of agriculture, livestock and fisheries, the release said.

The two sides also signed a Memorandum of Understanding (MoU) on the establishment of a Joint Technical Working Group for the review and modification of the Nepal-China trade and payment agreement.

They also signed a protocol of phytosanitary requirements for the export of plant-derived medicinal materials for Chinese medicine from Nepal to China.

China and Nepal also signed MoUs on the Hilsa-Simkot Road Project and the Nepal-China Power Grid Interconnection Project (Chilime-Kerung). The other agreements include cooperation in the fields of science, technology and innovation; and in the field of Human Resources Development, the release said.

EU commissioner calls for more balanced trade with China

PTI ■ BEIJING

The European Union's trade commissioner called for a more balanced economic relationship with China on Monday, noting an EU trade deficit of nearly 400 billion euros (\$425 billion), while also warning that China's position on the war in Ukraine could endanger its relationship with Europe. Valdis Dombrovskis, in a speech at China's prestigious Tsinghua University, said that the EU and China face significant political and economic headwinds that could cause them to drift apart.

"The strongest, yet not the only, headwind is Russia's war of aggression against Ukraine, and how China positions itself on this issue," he said.

Dombrovskis spoke before high-level economic and trade talks with Chinese Vice Premier He Lifeng.

EU leaders have expressed concern about the bloc's growing trade deficit with China, which reached 396 billion euros last year. European Commission President Ursula von der Leyen recently announced an investigation into Chinese subsidies to electric vehicle makers, saying a flood of cheaper Chinese cars is distorting the European market.

The Chinese government has called the investigation a protectionist act aimed at distorting the supply chain. Dombrovskis, in his Tsinghua address, said the probe would follow well-established rules and be done in consultation with Chinese authorities and stakeholders.

The EU trade commissioner urged China to address the lack of reciprocity in the economic relationship, saying "the figures speak for themselves".

He said that China has created a more politicised business environment to protect its national security and development interests, resulting in less transparency, unequal access to procurement, and discrimina-

tory standards and security requirements.

Dombrovskis cited examples a new foreign relations law and an updated anti-spoilage law that has European companies struggling to understand their compliance obligations.

"Their ambiguity allows too much room for interpretation," he said about the laws, adding they deter new investment in China.

Chinese Foreign Ministry spokesperson Wang Wenbin said that China provides a market-oriented, law-based business environment for foreign companies.

"As long as the companies are operating in accordance with the law, they don't have to worry," he said.

Chinese officials have been trying to lure back foreign investment to help the economy emerge from a sluggishness that has persisted despite the lifting of pandemic restrictions last December.

The Chinese government has tried to remain neutral in the war in Ukraine rather than joining the United States and much of Europe in condemning the Russian invasion. Dombrovskis, who is Latvian, noted that territorial integrity has always been a key principle for China in international diplomacy.

"Russia's war is a blatant breach of this principle," he said. "So it's very difficult for us to understand China's stance on Russia's war against Ukraine, as it breaches China's own fundamental principles."

Poland accuses Germany of meddling in its affairs

Warsaw (AP): Poland's foreign minister accused Germany of trying to interfere in his country's internal affairs after German Chancellor Olaf Scholz said Warsaw needs to clarify allegations that Polish consulates in Africa and Asia sold temporary work visas to migrants for thousands of dollars each.

Poland's right-wing ruling party, Law and Justice, is facing questions about the alleged scheme ahead of an Oct 15 national election in which it is seeking a third term in power.

Scholz, whose government is under pressure to do more to limit migration to Germany, called on neighbouring Poland on Saturday to provide clarification of what was happening.

"I don't want people to just be waved through from Poland and only for us to have a discussion about asylum policy afterward," Scholz said in comments reported by the German news agency dpa.

Polish Foreign Minister Zbigniew Rau retorted late Sunday on X, formerly Twitter, that Scholz's statement "violates the principles of the sovereign equality of states".

Rau said he appealed to Scholz "to respect Poland's sovereignty and refrain from statements that damage our mutual relations".

Rau himself is under political pressure at home because the alleged visa scheme operated out of the Foreign Ministry.

German Interior Minister Nancy Faeser said last week that Berlin was considering establishing short-term border checks with Poland and the Czech Republic to help curb the smuggling of people into Germany.

She added that the increased border checks would need to be combined with random police checks that are already being carried out. The government said Monday that she is in discussions with her Polish and Czech counterparts.

Germany, Poland and the Czech Republic belong to Europe's visa-free zone, commonly known as the Schengen Area.

Kosovo mourns slain police officer

AP ■ PRISTINA

Kosovo on Monday was observing a day of mourning for the Kosovar Albanian police officer killed by Serb gunmen who then barricaded themselves in an Orthodox monastery in an attack that left three assailants dead and further raised tensions between the two former wartime foes as they seek to normalise ties.

Flags were at half mast on all public buildings in the capital Pristina to mourn Afrim Bunjaku. In the north, where most of Kosovo's ethnic Serb minority lives in four municipalities around Mitrovica, police were patrolling in search of the armed assailants after they left the monastery.

About 30 gunmen dressed in combat uniforms were involved in the attack, but it is not clear who they are or who is supporting them. Pristina accuses Belgrade of backing the "terrorists," an accusation Serbia denies, saying they are Serbs from Kosovo protesting the government there. On

Sunday the masked gunmen opened fire on a police patrol at about 3 a.m. (01:00 GMT) in Banjska, a village located 55 kilometres north of Pristina, killing Bunjaku and injuring another officer.

They then used an armoured vehicle to break down the gates to the monastery in the village, where they remained in a stand-off with Kosovo police until evening.

The two sides exchanged gunfire sporadically until darkness fell, when the assailants escaped from the monastery on foot. Three of the attackers were killed and two injured. Another Kosovar police officer was injured in the confrontation near the monastery.

Two of the gunmen and four Serbs discovered nearby with communication equipment were arrested and are being investigated for terrorist acts.

Police seized vehicles used by the gunmen which contained an arsenal of firearms of different calibres, explosives,

ammunition and logistics capable of equipping hundreds of persons, according to Kosovo Interior Minister Xhelal Svecla.

"It's a terrorist, criminal, professional unit that had planned and prepared what they did and who are not a smuggling band but a mercenary structure which is politically, financially and logistically supported by official Belgrade," said Prime Minister Albin Kurti.

Serbian President Aleksandar Vucic said the gunmen were local Kosovo Serbs "who no longer want to stand Kurti's terror." Vucic condemned the killing of the Kosovo policeman, but still said the clash was the result of "brutal" pressure on Kosovo Serbs by the Kosovo government.

He denied that Belgrade had anything to do with the attack.

Vucic also blasted the West and its "hypocrisy" over Kosovo. "You can kill us all. Serbia will never recognize the independence of Kosovo, that

monster creation that you made by bombing Serbia," Vucic said, referring to the 1999 NATO intervention which led to Kosovo separating from Serbia.

Serbia and its former province, Kosovo, have been at odds for decades. Their 1998-99 war left more than 10,000 people dead, mostly Kosovo Albanians. Kosovo unilaterally declared independence in 2008 but Belgrade has refused to recognise the move.

The international community condemned the "hideous attack."

The European Union and the NATO-led international peacekeeping force in Kosovo are in close contact with Kosovar authorities.

Earlier this month, an EU-facilitated meeting in Brussels between Kurti and Vucic to normalise ties ended in acrimony.

The United States has supported the negotiations and the EU's position in trying to resolve the ongoing source of tension in the Balkans.

Taiwan factory fire: Death toll lowered to 9

Taipei (AP): Authorities said late on Sunday that one person remained missing following a fire at a golf ball factory in Taiwan, after forensic analysis revealed that some bones found earlier in the day were not human. The blaze on Friday night killed nine other people, including four firefighters. Launch Technologies Co., the operator of the plant, is a major global supplier of golf balls. Authorities had reported earlier that the remains of two people were found Sunday morning and of a third person in the afternoon, putting the death toll at 10. But one set of bones from the morning turned out to be non-human, officials said.

Taiwan's Central News Agency, quoting a Pingtung County fire official, said an explosion caused part of the building to collapse about 6:10 pm Friday, trapping firefighters and workers under rubble.

8 officials jailed as part of investigation into dams' collapse

AP ■ CAIRO

Libya's chief prosecutor said Monday he ordered the detention of eight current and former officials pending his investigation into the collapse of two dams earlier this month, a disaster that sent a wall of water several metres high through the centre of a coastal city and left thousands of people dead.

The two dams outside the city of Derna broke up on Sep. 11 after they were overwhelmed by Storm Daniel, which caused heavy rain across eastern Libya. The failure of the structures inundated as much as a quarter of the city, officials have said, destroying entire neighbourhoods and sweeping people out to sea.

Government officials and aid agencies have given estimated death tolls ranging from more than 4,000 to over 11,000. The bodies of many of the people killed still are under rubble or in the Mediterranean,

according to search teams.

A statement by the office of General Prosecutor al-Sidiq al-Sour said prosecutors on Sunday questioned seven former and current officials with the Water Resources Authority and the Dams Management Authority over allegations that mismanagement, negligence and mistakes contributed to the disaster.

Derna Mayor Abdel-Moneim al-Ghathli, who was sacked after the disaster, was also questioned, the statement said.

Prosecutors ordered the eight to be jailed pending the investigation, the statement added.

The dams were built by a Yugoslav construction company in the 1970s above Wadi

Derna, a river valley which divides the city. They were meant to protect the city from flash floods, which are not uncommon in the area. The dams were not maintained for decades, despite warnings by scientists that they may burst.

A report by a state-run audit agency in 2021 said the two dams hadn't been maintained despite the allocation of more than USD 2 million for that purpose in 2012 and 2013.

A Turkish firm was contracted in 2007 to carry out maintenance on the two dams and to build a third one in between them. The firm, Arsel Construction Company Ltd., said on its website that it completed its work in November 2012. It didn't respond to an email seeking further comment.

Two weeks on, local and international teams were still digging through mud and hollowed-out buildings, looking for bodies. They also combed the Mediterranean off Derna,

searching for bodies swept away in the floods.

The floods have left as many as a third of Derna's housing and infrastructure damaged, according to the UN's Office for Coordination of Humanitarian Affairs, or OCHA. Authorities have evacuated the most impacted part of the city, leaving only search and ambulance teams, OCHA said. The World Health Organization says more than 4,000 deaths have been registered dead, including foreigners, but a previous death toll given by the head of Libya's Red Crescent was at 11,300. The UN Office for the Coordination of Humanitarian Affairs says at least 9,000 people are still missing.

The storm hit other areas in eastern Libya, including the towns of Bayda, Susa, Marj and Shahhat. Tens of thousands of people have been displaced in the region and took shelter in schools and other government buildings.

'New poll shows Biden trailing behind Trump by 10 points'

PTI ■ WASHINGTON

A new poll by the Washington Post and ABC News has shown President Joe Biden trailing behind his predecessor Donald Trump in a hypothetical November 2024 match. "Trump edges out Biden 51-42 in head-to-head matchup," the poll said. Trump is way ahead of his other Republican rivals in the party's presidential race. The GOP's formal nomination process will begin with the Iowa Caucus and the New Hampshire Primary in January.

While two of the Indian-American Republican presidential aspirants — former South Carolina governor Nikki Haley and entrepreneur Vivek Ramaswamy — have gained

momentum in recent weeks, Trump is far ahead of his GOP rivals and political pundits believe that he is on his way to becoming the party's nominee.

The Washington Post-ABC News poll released on Sunday said that a record number of Americans say they have become worse off under his presidency. Three-quarters say he's too old for another term

and Donald Trump is looking better in retrospect — all severe challenges for Biden in his reelection campaign ahead, according to the poll results.

However, the Washington Post disagrees with the results of the poll. The prominent American daily reported that the poll showing Trump beating Biden by 10 points is likely an "outlier" as the two rivals are in a dead heat according to other polls.

"The Post-ABC poll shows Biden trailing Trump by 10 percentage points at this early stage in the election cycle, although the sizable margin of Trump's lead in this survey is significantly at odds with other public polls that show the general election contest a virtual dead heat.

London (PTI): An inquest opened on Monday into the death of two Indian-origin teenagers who died when they got into difficulty while swimming in Northern Ireland. Reuven Simon and Joseph Sebastian, both 16 and belonging to the local Kerala community in County Derry, drowned while out swimming in the Enagh Lough, or Enagh Lake, in August last year.

According to local news reports, one of the boys was taken from the water and transferred to Altnagelvin Hospital, where he was later pronounced dead. The second boy was pronounced dead at the scene after being recovered from the water after searches by police divers. "We know both families and can only imagine the incalculable

pain they are feeling today," the North West Migrants Forum said in a statement at the time.

"Thanks must also go to emergency services who were on the scene. Our thoughts and prayers are with the entire Kerala community as they try to make sense of this awful tragedy. Remembered fondly," it said.

Both boys were pupils at St Columba's College in Derry, Northern Ireland. The school principal, Finbar Madden, expressed "shock and sadness" of the local community.

"No words can express the devastation that we feel as a school community, but first and foremost our thoughts and prayers are with both boys' families, community and friends," he said.

In Europe linked to the Islamic State group, but it was among the most disturbing: One evening in 2016, an assailant killed two police officers in their family home, in front of their 3-year-old son.

On Monday, a trial opens in a French counterterrorism court over the attack in the Paris suburb of Magnanville.

The attacker, Larossi Abballa, was shot to death by police. According to court documents, he told police negotiators that he was responding to an IS leader's call to "kill miscreants at home with their families."

A childhood friend of Abballa's, Mohamed Aberouz, is going on trial for complicity to terrorism-related murder,

complicity to kidnapping and terrorist conspiracy. He faces up to life in prison if convicted.

The killings came amid a wave of attacks in France linked to the Islamic State group and had a lasting effect on police officers around France.

Some moved, changed services or resigned to protect their loved ones after the Magnanville killings.

According to court documents, Abballa broke into the home of police officers Jessica Schneider and Jean-Baptiste Salvaing before they returned from work. When Schneider came home, Abballa slit her throat in the living room, with the child present. The father texted her from the office to say "I'm leaving," the documents say. There was no response.

He was stabbed upon arriving home.

Neighbours called police, and the attacker said he was holding the couple's 3-year-old hostage, according to the documents.

He told a negotiator from a special police unit that he acted because the French government was preventing the faithful from joining the caliphate, and stressed that he had not targeted civilians but representatives of the French state.

Police stormed the home and killed Abballa, and rescued the child. The boy has been raised by family members since.

After more than five years of investigation and multiple arrests, only Aberouz is facing trial. Charges were initially brought against two others but later dropped.

Imran Khan shifted to Adiala prison?

Jail administration denies

PTI ■ ISLAMABAD

Imran Khan's lawyer on Monday said he was shifted from the Attock jail to high-security Adiala prison in the garrison city of Rawalpindi following a high court order, but Adiala jail officials dismissed claims that the former prime minister has been relocated. In August, the Pakistan Tehreek-e-Insaf party petitioned the Islamabad High Court (IHC) to transfer the deposed party chief to Adiala prison where A-class facilities are available, keeping in view 70-year-old Khan's affluent family background, social and political status.

During the hearing on Monday, IHC Chief Justice Aamer Farooq directed authorities to shift the deposed prime minister to Adiala jail. Chief Justice Farooq said that Khan is an under-trial prisoner in the

cipher case, which was registered in Islamabad. He objected to keeping "an under-trial prisoner" in Attock jail instead of Adiala jail.

"Shift the PTI chairman to Adiala jail," the judge said. He said Khan had been imprisoned at the Attock jail as per the sentence awarded in the Toshakhana case, which was suspended.

"IHC Chief Justice has ordered moving PTI chairman Imran Khan from Attock Prison to Adiala Prison in Rawalpindi," Khan's party said.

Talking to the media outside the IHC, Khan's lawyer Sher Afzal Marwat said they had "finally been granted justice from the IHC" on the matter of shifting Khan from Attock jail to Adiala jail. The lawyer said it was a "little bit of justice" but he was glad about it. Naeem Panjota, who is the spokesperson of Khan on legal affairs, claimed that the ousted premier has been shifted to the prison in Adiala.

However, the Adiala jail administration refuted the claim, saying that Khan has not

yet been shifted there.

Later, in a post on platform X, Panjhota said that he had been informed that Khan had been shifted to Adiala jail but "it is beyond understanding that Attock jail [authorities] are also saying that they have PTI chairman."

Khan has been kept in the Attock Jail since August 5 after his conviction in the Toshakhana corruption case. His sentence was suspended by the IHC on August 29, but he continues to remain in prison in the cipher (secret diplomatic cable) leakage case.

A special court, established under the Official Secrets Act, on September 13 extended the judicial remand of Khan till September 26 in the cipher case. Special court hearings in the cipher case against Khan have been taking place at the Attock jail, citing security reasons. The Islamabad trial court which had sentenced Khan to three years in jail had directed the authorities to lodge him at Adiala prison. However, after his arrest, he was shifted to Attock jail.

Thousands of Armenians flee Nagorno-Karabakh as Turkish president set to visit Azerbaijan

AP ■ YEREVAN

Thousands of Armenians streamed out of Nagorno-Karabakh after the Azerbaijani military reclaimed full control of the breakaway region while Turkish President Recep Tayyip Erdogan was set to visit Azerbaijan Monday in a show of support to its ally.

The Azerbaijani military routed Armenian forces in a 24-hour blitz last week, forcing the separatist authorities to agree to lay down weapons and start talks on Nagorno-Karabakh's "reintegration" into Azerbaijan after three decades of separatist rule. A second round of talks between Azerbaijani officials and separatist representatives began in Khojaly Tuesday following the opening meeting last week. While Azerbaijan pledged to respect the rights of ethnic Armenians in the region and restore supplies after a 10-month blockade, many local residents feared reprisals and said they were planning to leave for Armenia.

The Armenian government said that 4,850 Nagorno-Karabakh residents had fled to Armenia as of midday Monday. "It was a nightmare. There are no words to describe. The village was heavily shelled. Almost no one is left in the village," said one of the evacuees who spoke to The Associated Press in the Armenian city of Kornidzor and refused to give her name for security reasons.

Moscow said that Russian peacekeepers in Nagorno-Karabakh were assisting the evacuation. Azerbaijan's Defence Ministry said Monday that two of its soldiers were killed a day earlier when a military truck hit a landmine. It didn't name the area where the explosion occurred.

In an address to the nation Sunday, Armenian Prime Minister Nikol Pashinyan said his government was working with international partners to protect the rights and security of Armenians in Nagorno-Karabakh. "If these efforts do not produce concrete results, the government will welcome our sisters and brothers from Nagorno-Karabakh in the

Republic of Armenia with every care," he said.

Demonstrators demanding Pashinyan's resignation continued blocking the Armenian capital's main avenues Monday, engaging in occasional clashes with police that sought to disperse the protests. Nagorno-Karabakh came under the control of ethnic Armenian forces, backed by the Armenian military, in separatist fighting that ended in 1994. During a six-week war in 2020, Azerbaijan took back parts of Nagorno-Karabakh along with surrounding territory that Armenian forces had claimed during the earlier conflict. After a Russia-brokered armistice, a contingent of about 2,000 Russian peacekeepers was sent to the region to monitor it.

In December, Azerbaijan imposed a blockade of the only road connecting Nagorno-Karabakh with Armenia, alleging that the Armenian government was using the road for mineral extraction and illicit weapons shipments to the region's separatist forces. Armenia charged that the closure denied basic food and fuel supplies to Nagorno-Karabakh's approximately 120,000 people. Azerbaijan rejected the accusation, arguing the region could receive supplies through the Azerbaijani city of Aghdam — a solution long resisted by Nagorno-Karabakh authorities, who called it a strategy for Azerbaijan to gain control of the region. On Sunday, French President Emmanuel Macron pledged support for Armenia and Armenians, saying that France will mobilise food and medical aid for the population of Nagorno-Karabakh, and keep working toward a 'sustainable peace' in the region.

France, which has a big Armenian diaspora, has for decades played a mediating role in Nagorno-Karabakh. A few hundred people rallied outside the French Foreign Ministry over the weekend, demanding sanctions against Azerbaijan and accusing Paris of not doing enough to protect Armenian interests in the region.

Home Secy orders review of UK police firearms regulations

PTI ■ LONDON

British Home Secretary Suella Braverman has launched a review into the legal protections for officers on firearms duties after a revolt within Scotland Yard ranks following a murder charge against a Metropolitan Police officer who had discharged his gun while on duty.

The UK's Ministry of Defence (MoD) is said to have offered soldiers as back up support for armed police in London after several officers turned in their weapon carrying permits since their colleague was charged last week.

The UK's Crown Prosecution Service (CPS) had authorised charges against the officer, granted legal anonymity, in connection with a shooting in September last year.

"We depend on our brave firearms officers to protect us from the most dangerous and violent in society. In the interest of public safety, they have to make split-second decisions under extraordinary pressures," Braverman said in a post on X on Sunday.

"They mustn't fear ending up in the dock for carrying out their duties. Officers risking their lives to keep us safe have my full backing and I will do everything in my power to support them. That's why I have launched a review to ensure they have the confidence to do their jobs while

protecting us all," she said.

The Met Police chief, Sir Mark Rowley, welcomed Braverman's review into the issue in an open letter on Monday and stressed that it was important to "let the police police".

"It is essential that we have a system which commands the confidence of officers and the communities they serve," writes Rowley.

"The system that judges officers' actions should be rooted in integrity and decisions should be reached swiftly, competently and without fear or favour. A review is needed to address accountability mechanisms, including the policies and practices of the Independent Office for Police Conduct and the Crown Prosecution Service (CPS), ideally with a focus on the threshold for investigating police use of force and involvement in pursuits," he said.

More than 100 officers are believed to have handed in permits allowing them to carry weapons after their colleague was charged over the shooting of Chris Kaba, 24, in south London.

"The CPS reminds all concerned that criminal proceedings against the officer are active and that he has the right to a fair trial. It is extremely important there should be no reporting, commentary or sharing of information online which could in any way prej-

udice these proceedings," said Rosemary Ainslie, head of the CPS Special Crime Division, last week.

The CPS Special Crime Division deals with the most complex and sensitive cases in England and Wales, including serious criminal allegations against police officers.

An estimated 2,595 officers are licensed as firearms officers in the Met Police, governed by a set of rules, procedures and accountability processes for being authorised to carry weapons.

"Many are worried about how the decision impacts on them, on their colleagues and on their families. They are concerned that it signals a shift in the way the decisions they take in the most challenging circumstances will be judged," the Met Police said in a statement.

"The Met has a significant firearms capability and we continue to have armed officers deployed in communities across London as well as at other sites including Parliament, diplomatic premises, airports etc... The Ministry of Defence has agreed to a request to provide the Met with counterterrorism support should it be needed. This is a contingency option that would only be used in specific circumstances and where an appropriate policing response was not available," it added.

North Korea calls South's leader a 'guy with a trash-like brain'

AP ■ SEOUL

North Korea on Monday called South Korean President Yoon Suk Yeol "a guy with a trash-like brain" and "a diplomatic idiot" as it blasted him for using a UN speech to issue a warning over the North's deepening military ties with Russia.

In a speech at the UN General Assembly last week, Yoon said South Korea "will not sit idly by" if North Korea and Russia agree to weapons deals that would pose a threat to the South. North Korean leader Kim Jong Un's trip to Russia earlier this month to meet President Vladimir Putin and visit key military sites raised international concern about a possible push by North Korea to receive sophisticated nuclear and weapons

technologies in return for replenishing Russia's conventional arms inventory depleted by its war with Ukraine.

"Puppet traitor Yoon Suk Yeol, even at the 78th UN General Assembly, maliciously slandered the relations between (North Korea) and Russia," the North's official Korean Central News Agency said in a commentary.

Without addressing the worries about a possible weapons deal with Russia, KCNA said it's "quite natural" and a "legitimate right" for neighbouring countries to keep close ties with each other.

"It's self-evident that such a guy with a trash-like brain cannot understand the profound and enormous meaning of the development of (North Korea)-Russia friendly relations," KCNA

said. "No one in the world would lend an ear to the hysterical fit of puppet traitor Yoon Suk Yeol, who is only wearing disgraceful ill fames of political immature, diplomatic idiot and incompetent chief executive."

Koo Byungsam, a spokesperson for South Korea's Unification Ministry, said the KCNA insults demonstrated North Korea's "substandard system that lacks basic etiquette and common sense."

Since taking office last year, Yoon, a conservative former prosecutor, has sought to strengthen South Korea's military and security alliance with the United States. Yoon's moves have infuriated North Korea. Monday's KCNA dispatch accused Yoon of "voluntarily acting as a servile trumpeter and loudspeaker for the US."

Chairman of Hong Kong's leading journalist group found guilty of obstructing cop

Hong Kong (AP):

The chairman of Hong Kong's leading journalist group was found guilty of obstructing a police officer on Monday in a court case that sparked concerns about the city's declining press freedom.

Ronson Chan, chairman of the Hong Kong Journalists Association and a journalist of online news outlet Channel C, was arrested last September while he was on his way to a reporting assignment. He was accused of refusing to show the plainclothes officer his identity card upon request.

Chan's arrest fuelled concerns about the erosion of media freedom in Hong Kong after Beijing imposed a national security law to crush dissent following the city's massive pro-democracy protests in 2019. The former British colony was promised to keep its Western-style civil liberties for 50 years when it returned to Chinese rule in 1997.

Magistrate Leung Ka-ke on Monday ruled that Chan had deliberately obstructed the officer from carrying out her duty and failed to take out

Chairman of Hong Kong's leading journalist group found guilty of obstructing cop

his identity card in a timely manner. He kept asking the officer questions "recklessly," she said. He will be sentenced later Monday and could face a maximum penalty of two years in prison. In the crackdown following the 2019 protests, two vocal media outlets — Apple Daily and Stand News — have been forced to shut down and some of their top managers have been prosecuted. Two former top editors at Stand News, where Chan used to work, were tried for sedition. A verdict is scheduled for November.

Russian strikes in Odesa damage port, grain silo, hotel

AP ■ KYIV

A Russian drone and missile strike near Odesa damaged infrastructure, a grain silo and an abandoned hotel and injured one person in the Black Sea port city as attacks elsewhere in Ukraine killed five civilians and wounded 13 in the past day, Ukrainian officials said Monday.

Ukraine's air force reported downing all Russian drones launched overnight, but one of 12 Kalibr missiles and two P-800 Oniks cruise missiles apparently made it past air defences the day after the war in Ukraine entered its 20th month. Russia has continuously targeted port and grain storage facilities in Odesa since pulling out of a wartime deal that allowed Ukrainian grain exports to countries facing the threat of hunger. The attacks have destroyed silos, warehouses, oil terminals and other infrastructure critical for storage and shipping.

The Russian Defence Ministry said long-range missiles and drones were used to strike facilities that it alleged had housed foreign mercenaries and trained saboteurs. The ministry didn't name locations or provide other specifics to support its claim. It also said it downed several Ukrainian drones. The attacks came as independent UN-backed human rights experts said they found new evidence of war crimes committed by Russian forces and as President Volodymyr Zelenskyy welcomed the arrival of the first Abrams tanks sent by the US.

The UN Independent Commission of Inquiry on Ukraine said it found evidence of crimes committed by both sides in the war, but far more by Russians, including instances of torture, some of it fatal, and rape of women as old as 83. It said it was also looking into allegations that Russian

forces committed genocide. Zelenskyy thanked allies on Telegram for their support in announcing the anticipated arrival of the tanks. He didn't say how many tanks had arrived, but the US has said it was sending 31 tanks.

In other fighting, Russian forces also dropped bombs and launched six heavy artillery strikes on southern Ukraine's Kherson region, destroying a school and factory and damaging residential buildings. Three of the deaths reported by the Ukrainian president's office were in the region: two people were killed and two others were injured by bombs that hit the city of Beryslav. A man was killed in the neighbouring village of Lvove.

In eastern Ukraine, Russians attacked residential areas of 10 cities and villages in the Donetsk region, killing two people in the village of Zarichne, according to the presidential office. During fighting in southeast Ukraine's Zaporizhzhia region, the Russian army carried out five airstrikes on Orikhiv, a small city, and its surrounding area.

The Russian Defence Ministry said its air defences downed three Ukrainian drones over the Kursk region of Russia and three others over the Bryansk region early Monday. It also reported that three drones were shot down over the Belgorod region. Kursk Gov Roman Starovoi said a downed drone over the centre of the city of Kursk damaged the roof of an administrative building and several private houses and shattered windows in an apartment building. Starovoi said there were no injuries. A day earlier, a Ukrainian drone damaged the roof of an administrative building in Kursk that some Ukrainian and Russian media reported housed the offices of the Federal Security Service, Russia's main domestic security agency.

A recovery team member examines a capsule containing NASA's first asteroid samples before it is taken to a temporary clean room at Dugway Proving Ground in Utah on Sunday, September 24. The Osiris-Rex spacecraft released the capsule following a seven-year journey to asteroid Bennu and back

Pak anchor missing since May 9 returns home

Lahore/Islamabad (PTI):

A controversial Pakistani anchor and YouTuber, who went missing four months ago following the May 9 anti-government protest after former prime minister Imran Khan's arrest, has returned home safely, police said on Monday. Imran Riaz Khan, 47, with more than three million followers on YouTube, was known for his highly critical views of the powerful military. He was reportedly arrested two days after violent protests broke out across the country following Pakistan Tehreek-e-Insaf (PTI) chairman Imran Khan's arrest on May 9 in an alleged corruption case. The anchor was believed to be in the custody of intelligence agencies for the last four months.

Khan was an ardent supporter of the former prime minister and highly critical of the establishment after the former premier was ousted from office in April last year. He was

last known to be taken to the Lahore Cantonment police station after his arrest and later to the Sialkot prison in Punjab province. On May 15, a law officer told the Lahore High Court (LHC) that the anchor was released from jail after taking an undertaking in writing.

However, on Monday Punjab province's Sialkot police said that Khan has returned home safely without divulging any further information.

Punjab Inspector General Police (IGP) Dr Usman Anwar said in a statement on Monday that TV anchor and YouTuber Khan "is safe and back to his family in Lahore".

"Journalist/Anchor Imran Riaz Khan has been safely recovered. He is now with his family," Sialkot Police said in a statement on X. Khan's lawyer Mian Ali Ashfaq also confirmed the development and said: "By God's special blessing, grace, and mercy, I have brought back my prince."

Egypt sets prez poll for December likely to stay in power until 2030

Cairo (AP):

Egypt will hold a presidential election over three days in December, officials announced Monday, with President Abdel Fattah el-Sissi highly likely to remain in power until 2030. Waleed Hamza, the chairman of the National Election Authority, said the vote will take place on Dec 10-12, with a runoff on Jan 8-10 if no candidate secures more than 50% of the vote. Egyptian expatriates will vote on Dec 1-3, and in the runoff on Jan 5-7, he added.

A handful of politicians have already announced their bids to run for the country's highest post, but none poses a serious challenge to el-Sissi, who has been in power since 2014 and has faced criticism from the West over his country's human rights record.

El-Sissi, a former defence minister, led the military overthrow of an elected but divisive Islamist president in 2013 amid street protests against his one-year rule. Since then, authorities have launched a major crackdown on dissent. Thousands of government critics have been silenced or jailed, mainly Islamists but also many prominent secular activists, including many of those behind the 2011 uprising that toppled longtime autocrat Hosni Mubarak. El-Sissi has not announced his candidacy yet. He was first elected in 2014 and reelected in 2018 for a second four-year term. Constitutional amendments, passed in a referendum in 2019, added two years to his second term, and allowed him to run for a third, six-year term. In the 2018 vote, el-Sissi faced only a little-known politician who joined the race at the last minute to spare the government the embarrassment of a one-candidate election after several hopefuls were forced out or arrested.

Tentative deal reached to end Hollywood writers' strike

AP ■ LOS ANGELES

Hollywood studios and writers reached a tentative agreement Sunday to end a historic screenwriters strike after nearly five months, though no deal is yet in the works for striking actors. The Writers Guild of America announced the deal with the Alliance of Motion Picture and Television Producers, the group that represents studios, streaming services and producers in negotiations.

"WGA has reached a tentative agreement with the AMPTP," said in an email to members. "This was made possible by the enduring solidarity of WGA members and extraordinary support of our union siblings who joined us on the picket lines for over 146 days." The three-year contract agreement — settled on after five marathon days of renewed

talks by negotiators WGA and the AMPTP — must be approved by the guild's board and members before the strike officially ends.

The terms of the deal were not immediately announced. The tentative deal to end the last writers strike, in 2008, was approved by more than 90 per cent of members.

The agreement comes just five days before the strike would've become the longest in the guild's history, and the longest Hollywood strike in decades. As a result of the agreement, nightly network shows including NBC's "The Tonight Show Starring Jimmy Fallon" and ABC's "Jimmy Kimmel Live!" could return to the air within days. But as writers prepare to potentially crack open their laptops again, it's far from back to business as usual in Hollywood, as talks have not yet resumed between studios and striking actors. Crew

members left with no work by the stoppage will remain unemployed for now.

The proposed solution to the writers strike comes after talks resumed on Wednesday or the first time in a month. Chief executives including Bob Iger of Disney, Ted Sarandos of Netflix, David Zaslav of Warner Bros. Discovery and Donna Langley of NBCUniversal reportedly took part in the negotiations directly. About 11,500 members of the Writers Guild of America walked off the job May 2 over issues of pay, the size of writing staffs on shows and the use of artificial intelligence in the creation of scripts. Actors, who joined the writers on strike in July, have their own issues but there have been no discussions about resuming negotiations with their union yet. The writers strike immediately sent late-night talk shows and "Saturday Night

Live" into hiatus, and has since sent dozens of scripted shows and other productions into limbo, including forthcoming seasons of Netflix's "Stranger Things," HBO's "The Last of Us," and ABC's "Abbott Elementary," and films including "Deadpool 3" and "Superman: Legacy." The Emmy Awards were also pushed from September to January.

More recently, writers had been targeting talk shows that were working around strike rules to return to air, including "The Drew Barrymore Show," "Real Time With Bill Maher" and "The Talk." All reversed course in the face of picketing and pressure, and are likely to quickly return now.

The combined strikes made for a pivotal moment in Hollywood as creative labour faced off against executives in a business transformed and torn by technology, from the

seismic shift to streaming in recent years to the potentially paradigm-shifting emergence of AI in the years to come.

Screenwriters had traditionally gone on strike more than any other segment of the industry, but had enjoyed a relatively long stretch of labour peace until spring negotiations for a new contract fell apart. The walkout was their first since 2007 and their longest since 1988.

On July 14, more than two months into the strike, the writers got a dose of solidarity and star power — along with a whole lot of new picketing partners — when they were joined by 65,000 striking film and television actors.

It was the first time the two groups had been on strike together since 1960. In that walkout, the writers strike started first and ended second. This time, studios opted to deal with the writers first.

Sensex, Nifty end 4-day losing streak

PTI ■ MUMBAI

Benchmark indices Sensex and Nifty closed marginally up in highly volatile trade on Monday, snapping their four-day losing streak even as weak global trends and foreign fund outflows dented the investor sentiment.

After gyrating 461.6 points during the day, the 30-share BSE Sensex eked out a marginal gain of 14.54 points or 0.02 per cent to settle at 66,023.69. During the day, it hit a high of 66,225.63 and a low of 65,764.03.

Snapping its four-day losing streak, the broader Nifty settled marginally up 0.30 points at 19,674.55 as 24 of its components advanced while 26 declined. Gains in financials, consumer durables, realty and banking shares were offset by losses in IT, oil & gas and pharma shares.

In the four sessions to Friday, the 50-issue barometer declined 3.37 per cent or 518 points while Sensex plunged

1,829 points or 3 per cent following a record 11-day rally.

Analysts said a fresh uptick in US treasury yields is making investors jittery amid rising concerns over inflation and high interest rates while FIIs continue to offload shares in local equities.

Among the Sensex firms, Bajaj Finance jumped the most by 4.64 per cent. Bajaj Finserv, Kotak Mahindra Bank, Asian Paints, UltraTech Cement, ICICI Bank, NTPC, JSW Steel and Tata Steel were among the

major gainers. Infosys, Mahindra & Mahindra, Wipro, Tata Consultancy Services, IndusInd Bank and HCL Technologies were the major losers.

Vinod Nair, Head of Research at Geojit Financial Services, said, "The day presented a mixed picture in the market, with sectors such as realty, banking, and consumer durables performing well while IT and pharma struggling. Investors were actively repositioning, shifting away from

stocks tied to the global economy and focusing on the domestic economy."

Concerns loomed over a potential global economic slowdown due to the prolonged period of high-interest rates, Nair added.

Analysts also said that India's entry into JP Morgan's Emerging Markets Government Bond Index is benefiting the financial sector in anticipation of a reduction in funding cost.

In the broader market, the BSE midcap gauge climbed 0.46

per cent and smallcap index advanced 0.12 per cent.

Among the indices, realty jumped 1.56 per cent, financial services climbed 0.46 per cent, consumer durables (0.43 per cent), bankex (0.29 per cent) and commodities (0.23 per cent).

Industrials, IT, telecommunication, auto, capital goods and tech were among the laggards.

In Asian markets, Seoul, Shanghai and Hong Kong ended in the negative territory while Tokyo settled in the green. European markets were trading lower. The US markets ended in negative territory on Friday.

Global oil benchmark Brent crude climbed 0.39 per cent to USD 93.63 a barrel.

Foreign Institutional Investors (FIIs) offloaded equities worth Rs 1,326.74 crore on Friday, according to exchange data. FIIs have pulled out over Rs 10,000 crore from Indian equities in the first three weeks of September.

India's first green hydrogen-run bus that emits just water unveiled

PTI ■ NEW DELHI

India's top oil firm IOC on Monday unveiled the nation's first green hydrogen-powered bus that emits just water as it takes the lead in bringing out unrivaled tools to replace fossil fuels.

Indian Oil Corporation (IOC) will produce close to 75 kg of hydrogen by splitting water using electricity from renewable sources. This hydrogen will be used to power two buses which will ply across the national capital region for trial runs.

Oil Minister Hardeep Singh Puri, flagging off the buses, said hydrogen will be India's transition fuel for moving away from fossil fuels.

IOC's R&D Centre at Faridabad is producing green hydrogen for the pilot run. Four cylinders with a capacity of 30 kg can run the buses for 350 km.

It takes 10-12 minutes for the four tanks to fill.

Hydrogen when burnt emits only water vapour as a by-product. With three times the energy density and the absence of harmful emissions, hydrogen shines as a cleaner, more efficient choice to meet the energy requirement.

As much as 50 units of deionized electricity and 9 kg of deionized water are needed for the production of one kilo of green hydrogen. Hydrogen can be used as a fuel for fuel cells.

Puri said by the end of 2023, IOC will scale up the number of buses to 15.

IOC will undertake opera-

Union Minister for Petroleum & Natural Gas, Hardeep Singh Puri flags off 1st Green Hydrogen Fuel Cell Bus at India Gate in New Delhi on Monday

tional trials of 15 fuel cell buses powered by green hydrogen on the identified routes in Delhi, Haryana, and UP. Under this programme, the first set of 2 fuel cell buses was launched on Monday.

"Our government has ambitious plans on clean and green energy. India has taken many steps towards low carbon development—through emerging fuels like hydrogen and bio-fuels and shall account for 25 per cent of global incremental energy demand growth over the next two decades," Puri said.

Upon the launch of the two buses, a cumulative mileage of more than 3 lakh kilometers will be covered for long-term assessment of performance and durability of the new technology.

India has one of the largest synchronous grids in the world, capable of handling intermittent renewable energy and it has achieved 'One Nation-One Grid-One Frequency'.

"With the low cost solar,

synchronous grid, large demand and engineering, India will be a global champion in production and exports of hydrogen and is set to emerge as the hub for green hydrogen," he said. Puri said recently the world's first BS 6 (Stage II) Electrified Flex Fuel vehicle prototype was launched that encompasses both the flex fuel engine as well as an electric powertrain that offers higher use of ethanol combined with better fuel efficiencies.

Hydrogen is deemed as the fuel for the future with immense potential to help India meet its decarbonization targets. The global demand for hydrogen is expected to increase by four to seven times to 500-800 tonne by 2050.

Domestic demand is expected to increase by four times, from the current 6 tonne at present to 25-28 tonne by 2050.

Oil and gas PSUs shall produce around 1 million tonne per annum of green hydrogen by 2030.

RBI 'not comfortable' with NPAs in urban co-op banks

Asks lenders to focus on governance

PTI ■ MUMBAI

RBI Governor Shaktikanta Das on Monday said the central bank is "not comfortable" with the gross non-performing assets ratio of 8.7 per cent in urban cooperative banks (UCBs) and asked them to work towards improving the same.

Addressing directors of UCBs in the financial capital at an RBI-organised conference, Das urged that such lenders should improve the governance standards, avoid related-party transactions and focus on credit risks, among others.

It can be noted that the UCB sector has been fraught with multiple challenges and also witnessed difficult times in the recent past, like the implosion of the city-headquartered Punjab and Maharashtra Bank.

Das reminded the directors of the UCBs that banks run on depositors and added that protection of the hard-earned

money pooled in from the middle class, poor and retirees is far more sacred than going to a temple or a gurdwara.

While the overall picture at an aggregate level looks nice, the situation on GNPA and capital adequacy is "not at all satisfactory", Das said.

He said the overall GNPA have improved to 8.7 per cent, which is "not a good number. It is not a comfortable number even at an aggregate level".

Scheduled commercial banks' GNPA stood at a decadal best level of 3.9 per cent in March 2023 and are widely estimated to improve further.

To manage the scourge of NPAs better, Das suggested that

there should be a focus on credit risk management with better underwriting.

He said the RBI has come across instances of conflicts of interest or related party transactions, which need to be avoided.

Similarly, there have been instances of many of the top defaulters being individuals or businesses having the ability to pay, Das said.

The top 20 defaulters account for over 60 per cent of the loan overdue, and focusing on this segment can help improve the overall NPAs, he added.

On the capital adequacy front, he noted that there has been an improvement in the ratios to 16.6 per cent at the end of FY23 from 15.5 per cent a year ago.

Making it clear that he wants to share the RBI's concerns with the lenders, Das exhorted the UCBs to focus on the quality of governance by paying attention to compliance, risk management and internal audit.

Ban lentil import from Canada, traders' body urges Centre

PTI ■ NEW DELHI

Delhi traders' body CTI on Monday urged the Central Government to ban import of lentil (masur) from Canada, over Ottawa's allegations relating to the killing of a Khalistani separatist on Canadian soil.

In a letter to Union Commerce Minister Piyush Goyal, the Chamber of Trade and Industry (CTI) said that there was a need to exert economic pressure on Canada. A growing dispute between India and Canada has erupted following allegations made by Canadian Prime Minister Justin Trudeau over the killing of Khalistani separatist Hardeep Singh Nijjar.

Chairman of CTI, Brijesh Goyal, said that the development has sent ripples through the business world. Indian traders

have demanded that India should ban import of lentils from Canada, which is a major supplier.

"Canada is becoming a stronghold of Khalistanis and their anti-India sentiment was displayed by protests at the Indian embassy. However, Trudeau is making politically motivated statements in view of upcoming elections in Canada," he said. India's annual pulse consumption is estimated at around 23 lakh tonnes of which 15-16 lakh tonnes is produced domestically and rest is imported from other countries. In the last financial year, India imported 4.85 lakh tonnes of lentil from Canada, Goyal said.

The Central government may contact other countries for pulses like Russia, Singapore, and Turkey, he added.

Demat accounts grow 26 per cent to 12.7 crore in August

PTI ■ NEW DELHI

The number of demat accounts rose to 12.7 crore in August 2023, a surge of 26 per cent on a yearly basis, primarily due to attractive returns from equity markets, and ease of account opening process.

Also, the incremental additions of such accounts were higher in August in comparison to the preceding month. Further, this was way higher than the average 21 lakh monthly additions in fiscal year FY23, according to an analysis by Motilal Oswal Financial Services.

The new account additions rose 4.1 per cent month-on-month to 31 lakh in August compared to 30 lakh additions in July. Going by the data, a total of 12.7 crore demat accounts were registered with the two depositories — NSDL and CDSL — at the end of August 2023 as compared to 10.1 crore a year earlier. The number of demat accounts was 12.3 crore at July-end.

Of the 12.7 crore total, 3.3

crore, and 9.35 crore demat accounts were registered with NSDL and CDSL, respectively at the end of August, data from the Securities and Exchange Board of India (Sebi) showed.

Market experts said additions in dematerialized (demat) accounts are driven by attractive returns from equity markets and the ease of account opening process offered by brokers to their clients.

Also, the increased financial literacy and the growing popularity of trading among youth have been some other major factors contributing to the rise, they added. The count of NSE active clients has been increasing for two consecutive months. The active user clients in the industry as a whole rose 2.5 per cent month-on-month to 3.27 crore in August.

The top five discount brokers — Zerodha, Angel One, Groww, ICICI Securities, and IIFL Securities — accounted for 60.8 per cent of overall NSE active clients last month, down from 61.2 per cent in July.

Rupee falls 20 paise to close at 83.14 against \$

PTI ■ NEW DELHI

The rupee declined by 20 paise to settle at 83.14 (provisional) against the US dollar on Monday due to rising crude oil prices and a strong American currency against major rivals overseas.

Subdued equity markets and withdrawal of foreign funds also weighed on the domestic currency, forex traders said.

At the interbank foreign exchange market, the local unit opened weak at 83.04 and traded between a high of 83.04 and a low of 83.15 against the greenback. It finally settled at 83.14 (provisional) against the dollar, registering a fall of 20 paise from the previous close.

On Friday, the rupee climbed 19 paise to close at 82.94 against the US dollar.

Member of Parliament NK Premachandran with CMD King's Infra Saji Bady John and other delegates during the launch of 'SISTA 360' at the India Habitat Centre in New Delhi on Monday

Dabur promoters makes ₹2,116 crore open offer for 26 per cent stake in Religare

PTI ■ NEW DELHI

Entities belonging to the Burman family, the promoter of Dabur India, on Monday announced Rs 2,116 crore open offer to the shareholders of Religare Enterprises Limited (REL) to acquire up to 26 per cent stake in the company.

The open offer is made with the intention to increase the family's stake and take control of REL. Post offer the family's stake in the financial services firm is expected to increase from about 21 per cent at present to 51 per cent.

MB Finmart Private Ltd (Acquirer 1), Puran Associates Private Ltd (Acquirer 2), VIC

Enterprises Private Ltd (Acquirer 3), and Milky Investment & Trading Company (Acquirer 4) have announced an open offer for acquisition of up to 90,042,541 fully paid-up equity shares of face value of Rs 10 each from the public shareholders of the company representing 26 per cent of the expanded voting share capital of the firm, at a price of Rs 235 per unit, REL said in a regulatory filing.

The total consideration for the open offer is Rs 21,159,997,135 payable in cash, it said.

Shares of REL was trading at Rs 256.40, down 5.89 per cent, in the afternoon trade on the BSE.

The completion of the open offer is subject to receipt of statutory approvals required, to be set out in the detailed public statement and the letter of offer that are proposed to be issued in accordance with the SEBI (SAST) Regulations, Dabur said in a statement.

Speaking on the development, Anand C Burman, Chairman Emeritus, Dabur India Limited, said: "The proposed transaction is in line with our vision to create a leading financial services platform that encompasses lending, broking and health insurance services. We are convinced that REL is the right platform and positioned for sustained success."

IN BRIEF

90,000 STUDENTS FROM ACROSS INDIA PARTICIPATE IN FEST

New Delhi: Aarush 23, the four-day annual tech festival organised by the students of SRMIST at Kattankulathur near Chennai, turned out to be an impressive affair with the participation of over 90,000 students from educational institutions located across India. The fest was themed around Envisioning Futuristic Breakthroughs-Shifting Paradigm, Enriching WellBeing. The inaugural was held on 21 September in the presence of eminent scientist Dr Vipparthi Adimurthy, dean at IIST Thiruvananthapuram.

DMRC WINS MULTIPLE AWARDS

New Delhi: The Corporate Communication Department of the Delhi Metro Rail Corporation headed by Anuj Dayal (Principal Executive Director) has been awarded three prestigious awards at the 17th Global Communication Conclave organized by the Public Relations Council of India in New Delhi on 21 and 22 September 2023. The DMRC won the Crystal award in the Crisis Management Communication category and two bronze awards in the Digital Newsletter and Best Use of Media Relations Categories

REPORT TO HELP ASIAN ECONOMIES PUBLISHED

New Delhi: The Asia Transition Finance (ATF) Study Group, where Power Finance Corporation (PFC) has been a core member since July, 2023, has published a report to help Asian economies achieve a just and orderly transition toward a more sustainable future. It is a private-led initiative whose core participants are financial institutions with operations in Asia.

The offer is valid on the flight tickets booked on IRCTC website and mobile apps for air ticketing. It is valid on flight tickets booked from 25th to 27th September 2023.

CHILDHOOD CANCER AWARENESS MONTH

New Delhi: A bunch of youngsters who bravely fought cancer visited the Delhi Metro Museum. As part of the Childhood Cancer Awareness month in September, these enterprising boys and girls enacted a play at the Metro Museum to raise awareness about the disease.

LIFE INSURANCE PLAN

New Delhi: With the twin offering financial security and wealth creation, Bharti AXA Life Insurance has partnered with PolicyBazaar to launch Bharti AXA Life Wealth Maximizer, a Unit-linked, non-participating individual life insurance plan.

Investments in Indian agri-tech startups fell 45 per cent during 2022, '23: FSG

PTI ■ NEW DELHI

Investments in Indian agri-tech startups fell by 45 per cent during 2021-22 and 2022-23 fiscal years, primarily due to a hike in global interest rates and heightened investor caution amid rising uncertainty, reveals consulting firm FSG's new report. Meanwhile, global agri-tech investments declined by 10 per cent during calendar years 2022 and 2023, it said.

Going forward, FSG expects the funding slump to continue into FY24 before springing back in FY25. It expects that startups will continue focusing on profitability to tide over the next financial year.

"Investors are likely to continue being cautious and direct their limited funding towards established business models, such as follow-on funding for companies in the mid-stream agri-tech category," it said.

Godrej Properties sells flats worth ₹2,000 crore in Noida

PTI ■ NEW DELHI

Realty firm Godrej Properties Ltd on Monday said it has sold about 670 flats worth more than Rs 2000 crore in its new housing project at Noida on strong demands.

Godrej Properties purchased the land through an e-auction conducted by the Noida Authority in November last year.

In a regulatory filing, Godrej Properties informed that it has "sold 670 homes worth over Rs 2,000 crore in its project, Godrej Tropical Isle, located in Sector 146, Noida."

This is Godrej Properties' most successful ever launch in terms of the value and volume of sales achieved, the company said. The project was launched in August. Gaurav Pandey, the MD and CEO of Godrej Properties said, "Noida is an extremely important market for Godrej Properties and we will look to further strengthen our presence in the years ahead."

Godrej Properties, an arm

of business conglomerate Godrej Industries, is one of the leading real estate developers in the country. It mainly focuses on the Delhi-NCR, Mumbai Metropolitan Region, Bengaluru and Pune markets for the development of residential projects.

The company expects 14 per cent growth in sale bookings this fiscal year to a record Rs 14,000 crore.

During the April-June quarter of the 2023-24 fiscal, Godrej Properties' sales book-

Amazon investing up to \$4 billion in AI startup

AP ■ WASHINGTON

Amazon is investing up to USD 4 billion in Anthropic and taking a minority stake in the artificial intelligence startup, the two companies said on Monday.

The investment underscores how Big Tech companies are pouring money into AI as they race to capitalise on the opportunities that the latest generation of the technology is set to fuel.

Amazon and Anthropic said the deal is part of a broader collaboration to develop so-called foundation models, which underpin the generative AI systems that have captured global attention.

Foundation models, also known as large language models, are trained on vast pools of online information, like blog posts, digital books, scientific articles and pop songs to generate text, images and video that resemble human work.

Under the agreement,

Anthropic is making Amazon its primary cloud computing service and using the online retail giant's custom chips as part of work to train and deploy its generative AI systems.

San Francisco-based Anthropic was founded by former staffers from OpenAI, the maker of the ChatGPT AI chatbot that made a global splash with its ability to come up with answers mimicking human responses.

Anthropic has released its own ChatGPT rival, dubbed Claude.

The latest version, which is available in the US and UK, is capable of "sophisticated dialogue and creative content generation to complex reasoning and detailed instruction," the company said.

Amazon is scrambling to catch up with rivals like Microsoft, which invested USD 1 billion in OpenAI in 2019, followed by another multibillion-dollar investment at the start of year.

REAL'S STREAK IS OVER

MORATA BRACE HELPS ATLETICO END REAL MADRID WINNING STREAK

AP ■ MADRID

Alvaro Morata struck twice for Atletico Madrid as they inflicted rivals Real Madrid's first defeat of the season, with a 3-1 derby triumph on Sunday in La Liga.

Champions Barcelona sit top of the league as Los Blancos lost their 100 percent record, with Antoine Griezmann also on target for Atletico, fifth, at their raucous Metropolitan stadium.

Real Madrid are third, a point behind Barcelona and high-flying Girona in second place, after they failed to match Atletico's level of intensity in an enthralling clash.

Morata netted an early header and Griezmann doubled Atletico's lead, before Toni Kroos pulled Madrid into the game with a stinging drive before half-time.

However, Morata headed home again at the start of the second half and Madrid could not find a way back against an Atletico side bouncing back from what coach Diego Simeone labelled their "weakest" performance of his long reign last weekend.

"It was a problem of defensive fragility, which we haven't had in the first few games," Real Madrid coach Carlo Ancelotti told reporters. "In just over 45 minutes they put three past us, it was not a good night ... the team was not compact, above all in the first half, Atletico took advantage of that."

Morata led the line well for Atletico and was rewarded with two goals, which he celebrated wildly.

"What I need is to feel important and this year, maybe I feel more important than in other years — I hope we keep winning because I really want to win a title with Atletico," Morata told DAZN.

"I'm very happy for all the fans, I said it the other day ... that the fans are going to have the

most important role, and that's how it was. (We're) all together, us on the pitch and them in the stands."

Ancelotti has given veteran midfielders Luka Modric and Kroos limited minutes this season but chose to start them both in the team's biggest game of the campaign to date, dropping Aurelien Tchouameni and striker Joselu.

The Italian pushed new

arrival Jude Bellingham even further into attack, alongside Rodrygo, instead of in the number 10 role he has starred in since his move from Borussia Dortmund in the summer, scoring six goals in his first six games before the derby.

Real Madrid were without star forward Vinicius Junior, who has recovered from his hamstring injury but suffered a stomach problem on Sunday morning, according to Spanish

reports. "The three goals were a photocopy," complained Ancelotti.

"Space opening between the centre-backs, we were not well positioned in the area — we were not compact on the three goals."

"The important thing is that the team got their spirit back, because if that has been recovered, it doesn't matter who the opponent is," the Atletico's coach Diego Simeone told DAZN.

PSG demolish Marseille

AP ■ PARIS

Paris Saint-Germain demolished Marseille in Ligue 1 on Sunday with summer signing Goncalo Ramos scoring twice in a 4-0 victory for the reigning champions, but Kylian Mbappe came off injured in the first half.

Mbappe appeared to hurt his ankle in winning the free-kick which saw Achraf Hakimi put PSG ahead in the eighth minute at the Parc des Princes.

The France superstar was eventually replaced just after the half-hour mark, but the home side went on to double their lead before the break through Randal Kolo Muani. Ramos then headed in the

home side's third goal just after half-time and completed the rout late on as PSG followed up their 2-0 victory over Borussia Dortmund in the Champions League in mid-week.

The win leaves Luis Enrique's team in fourth place after six games, two points behind surprise leaders Brest, who beat Lyon 1-0 on Saturday.

Luis Enrique suggested after the game the injury suffered by his top scorer Mbappe was nothing serious.

"I think it was a knock. He tried to change the strapping on it and continue but the pain wouldn't go away," the coach said.

"I don't think it is anything

serious and I suppose he will be back soon, but it is better not to take risks when a player is not 100 percent."

The former Barcelona and Spain boss added: "I think this was without doubt the most complete performance in my time here and luckily for us it came against our biggest rivals."

Marseille had started the day unbeaten and were above PSG in the table, but they were outclassed here at the end of a turbulent week.

Their coach Marcelino Garcia Toral resigned on Wednesday after only seven games at the helm and following an angry meeting between club officials and fan representatives.

Chelsea need to 'grow up': Pochettino

AP ■ LONDON

Mauricio Pochettino admitted struggling Chelsea need to "grow up" after their troubled season hit a new low with a 1-0 defeat against Aston Villa on Sunday. Pochettino's side have won just once in six league games under Pochettino after Ollie Watkins' second-half goal sealed the points for Villa at Stamford Bridge.

The Blues are languishing in 14th place, just four points above the relegation zone, after failing to score in their last three games. Chelsea's latest flop was sparked by young defender Malo Gusto's dismissal after 58 minutes for a challenge on Lucas Digne.

After a pitchside VAR review, referee Jarrod Gillett upgraded the initial yellow card to a red for dangerous play. Adding to Pochettino's woes, Chelsea striker Nicolas Jackson, who has scored just once since his move from Villarreal, picked

up his fifth booking for attempting to block a Villa free-kick, earning a one-game ban.

Pochettino refused to criticise the officials and instead said he and his players must take the blame for Chelsea's woes.

"It's our responsibility and the players' responsibility. We can't blame the VAR or the referee," Pochettino said.

"The situation, we need to act different, in a different way. I'm not going to blame or say anything against Malo Gusto."

"Situations happen in football and they affect the game and the team in a negative way."

"We need to grow up like a team, not only in an individual way. A player like Nico (Jackson) that is so young, feeling the Premier League and he's learning, he needs time."

Despite spending over £350 million (\$428 million) on new signings since his arrival in July, Pochettino has been unable to improve a Chelsea side that struggled badly last term.

Messi-less Miami play 1-1 draw with Orlando

AP ■ MIAMI

Inter Miami, without Lionel Messi, Sergio Busquets and Jordi Alba, battled to a 1-1 draw at Orlando City in Major League Soccer on Sunday.

The result leaves Miami five points adrift of the last play-off spot with five games of their regular season campaign remaining.

Miami can win their second trophy of the Messi era on Wednesday when they look to add the U.S. Open Cup to the League Cup they won last month and with that goal in mind head coach Gerardo Martino took no risks with his line-up.

As well as Messi and Alba, both ruled out for fitness reasons, Martino opted to rest Spanish midfielder Busquets who had been ever-present since joining the club in July.

With homegrown youngsters Noah Allen and David Ruiz brought into the side, Miami fielded a line-up similar to the ones that had seen the team fall to the bottom of the Eastern Conference before Messi's arrival.

Orlando, second in the East and already assured of a playoff place, began the brighter and could have grabbed the lead in the 29th minute when striker Duncan McGuire found himself in space on the edge of the box but his shot was well saved by Drake Callender.

At the other end, in-form Ecuadorean striker Leonard Campana went close for Miami with a header from a corner which Orlando keeper Pedro Gallese got down well to.

Miami broke through in the 52nd minute when Campana fed Josef Martinez whose low shot was parried out but David

Ruiz slid in the loose ball.

Callender did well again to keep out a curling left-footed effort from Martin Ojeda and then Orlando wasted another chance when Ivan Angulo found himself clear on goal but poked his shot wide.

But the home side finally got their reward in the 66th minute when a deflected pass fell into the path of McGuire who drilled a first-time shot through the legs of Callender.

Miami tired badly in the final stages as they hung on for a point.

"They are a very competitive team just like us and we just try to fight through and get the get the win," said Ruiz.

"Sadly we didn't get the result, but it's just another point to give us a hope to go to playoffs," he added.

"Obviously we didn't have

players key players like Busi, Jordi and Messi, but we've been working every day hard to get a spot on the team and I mean you can see that in the game," he added. After Wednesday's U.S. Open Cup final against the Houston Dynamo, Miami face one of their direct rivals for the playoffs — New York City FC.

NYCFC moved above D.C. United into ninth place with a 3-0 win over Toronto FC on Sunday in a game re-arranged after Saturday's fixture was called off due to a broken water main at Red Bull Arena.

The win was crowned by a fine solo goal from Argentine forward Julian Fernandez.

Rapinoe makes triumphant US farewell

AP ■ CHICAGO

Megan Rapinoe was a winner in her farewell game for the United States on Sunday, setting up a goal with a corner kick in a 2-0 triumph over South Africa.

The iconic 38-year-old striker, celebrated for off-field activism as well as glories on the pitch, ended her epic US career with 63 goals in 203 caps over more than 17 years with a 54th-minute exit at Chicago's

Soldier Field. "It makes me really proud to know we've been as successful on the field as we have, but also that we've helped make the world a little bit better of a place," Rapinoe said after the victory.

Rapinoe sparked the Americans to crowns at the 2015 and 2019 Women's World Cups and gold at the 2012 London Olympics, but was a champion for social causes as well.

Lukaku on scoresheet again

AP ■ ROME

Romelu Lukaku struck again but Roma was held to a 1-1 draw at Torino and only has one win in five league matches.

Lukaku's goal - following a good team move in the 68th minute - was his third in four matches since his move from Chelsea. The Belgium forward was on loan at Inter last season.

Duvan Zapata leveled for Torino with five minutes remaining when he headed in a free kick. Zapata almost joined Roma in the off-season from Atalanta.

Elsewhere, Rudi Garcia's job could be at risk only a few months into his tenure as Napoli coach.

Garcia took over in June after the resignation of Luciano Spalletti, who had just ended Napoli's 33-year wait for the Serie A title.

But Napoli is now winless in its past three league matches. Victor Osimhen should have given Napoli the lead with

18 minutes remaining but he fired a penalty wide of the right post. The spot kick had been awarded after Bologna midfielder Riccardo Calafiori knocked the ball away with his wrist as he stumbled.

Osimhen had also hit the post early on.

Garcia was jeered by Napoli fans when he substituted

Khvicha Kvaratskhelia and later Osimhen. There were also loud jeers at the end of the match.

Claudio Ranieri's Cagliari is still looking for its first win back in Serie A after it lost 2-0 at Atalanta.

Goals from Ademola Lookman and Mario Pasalic secured Atalanta its third win of the season.

Team World seal Laver Cup title

AP ■ VANCOUVER

Team World won a second straight Laver Cup title on Sunday as Ben Shelton and Frances Tiafoe sealed a 13-2 victory over Team Europe with a 7-6 (7/4), 7-6 (7/5) doubles win over Hubert Hurkacz and Andrey Rublev.

Team World captain John McEnroe, who had endured four straight defeats in the event that began in 2017 before seeing his side rally for victory in London last year, was thrilled to celebrate a dominant triumph that began with a four-match sweep on Friday.

"It felt unbelievable to kick their ass, baby!" McEnroe crowed. "They kicked ours many times, OK. It was a battle to the end when we won last year."

This time around, with a blend of youth and experience, McEnroe said he "felt it from the world go" against a Team Europe side that was without fourth-ranked Holger Rune of Den-

mark and world number five Stefano Tsitsipas of Greece, who both withdrew from captain Bjorn Borg's side with injuries.

That left sixth-ranked Rublev and Norway's ninth-ranked Casper Ruud as Europe's top players. Ruud nabbed the visitors' only points of the three-day event with his victory over Tommy Paul on Saturday.

Europe was unable to build on that win, with Tiafoe dominating Hurkacz in singles on Saturday night before Felix Auger-Aliassime and Shelton teamed up to beat Hurkacz and Gael Monfils in doubles and put

Team World one win away from victory heading into the final day.

"We stepped up, and I thought all the guys played great," said McEnroe, who also had singles wins from Americans Shelton and Taylor Fritz, Canada's Auger-Aliassime and Argentina's Francisco Cerundolo. Every World Team player contributed at least a point, with Paul gaining a win alongside Tiafoe in doubles on Friday.

"This was like a special year for us," McEnroe said. "I know they're going to come back strong, but I'll take two in a row any day. And I'm starting to think it is possible three in a row, Team World?"

Auger-Aliassime, who had two key wins on the final day as Team World rallied for victory last year, was thrilled to lift the trophy in front of his home fans in Canada.

BUMRAH BACK FOR THIRD ODI

PTI ■ NEW DELHI
Pace spearhead Jasprit Bumrah will be available for the third ODI against Australia after being given a one-match break but all-rounder Axar Patel will be given a few more days to recover from his quadriceps tear ahead of the

World Cup, BCCI sources said on Monday. While Ravichandran Ashwin has done decently in his two outings, the team management is still bullish about the fitness of Axar, the left-arm spin bowling all-rounder. "The team management wants to give Axar full chance of recovery. His forearm

and finger bruises have healed but may be in another few days, he would get fit for World Cup. India's first match is on September 8 and hence there is time. "As far as Ashwin is concerned, we now know that he is match fit and in rhythm. If Axar can't make it, Ashwin walks in,"

a BCCI source privy to the development told PTI on conditions of anonymity. The final squad announcement is on September 27 and it is understood that Axar still remains the team management's top choice for the reserve spinner's slot ahead of the Tamil Nadu veteran.

It is understood that young batting star Shubhman Gill and bowling all-rounder Shardul Thakur have been given a few days rest ahead of the third ODI in Rajkot on Wednesday. "As per rotation policy of the team, Bumrah, who was given a couple of days off to freshen up is back along with skipper Rohit Sharma, Virat Kohli, Hardik Pandya and Kuldeep Yadav. Gill, who has been playing continuously gets to cool his heels for 3-4 days along with Shardul Thakur," the source added.

Ruturaj, Mukesh released for Asian Games

India's Asian Games cricket team captain Ruturaj Gaikwad, who played the first two ODIs, has been released from the squad as he will link up with the Hangzhou-bound outfit. Also released is pacer Mukesh Kumar, who came as cover for Bumrah, who was given a break. It is understood that Washington Sundar is also supposed to leave on the evening of the game or day after. While the Indian World Cup-bound team won't have any travelling net bowlers, Prasidh Krishna, Akash Deep, Arshdeep Singh and Mukesh Kumar will be summoned as and when required.

Jemimah urges Indian men's team to aim for gold in Asian Games cricket

PTI ■ HANGZHOU (CHINA)

India's Jemima Rodrigues on Monday urged the men's team to aim for the gold after the women's team created history in the final of the Asian Games. India Women's side beat Sri Lanka by 19 runs in the final to clinch the gold medal here on their maiden appearance. Batting first, India posted 116 for seven on a difficult batting track before the Titas Sadhu-led bowling attack restricted Sri Lanka to 97 for eight in 20 overs.

"We have spoken to the men's team. We have told them that we are bringing the gold; you guys also bring it," an elated Rodrigues told reporters here. "(It) feels great. Just to win the gold is special, and being the first Indian cricket side to win the gold will make people go back in history and see that this was the team that actually won the first-ever gold in cricket in the Asian Games. It's an amazing feeling," she added. Rodrigues said it was a proud feeling to add to India's medals tally at the Games. "It is a very different experience, wearing this India jersey is a (matter of) different pride. Also, we can add a medal to India as a sporting nation," she said.

Talking about the gold medal contest on a challenging surface, Rodrigues said the contest had its own challenges. "It wasn't easy as Sri Lanka gave us a good fight. Their bowlers bowled spot-on, and we really had to apply ourselves. Very proud of the girls, and the way we played today displays our character," she said.

"It was an important partnership between me and Smriti (Mandhana) because the Sri Lankan bowlers were at the top of their game. "We are glad the way we played and built the partnership, along with the other girls coming in and chipping in," said Rodrigues (42), who added 73

runs with Mandhana (46) for the second wicket in a low-scoring contest. Rodrigues said the team had to adapt to different surfaces for every match. "We honestly did not know what to expect when we came over here," she said. "We knew that we had to be ready for any condition, and in all three matches we had different kinds of wickets that we had to adapt to, which is the best part of our team's performance," Rodrigues added. "It's been a great experience in general, the way everyone has welcomed us in China." "It's not been easy since the communication has been a problem. But, they (the organisers) went out of their way to make us feel comfortable and make our stay easy," she added. India coach and former international Hrishikesh Kanitkar too was delighted to have added to the country's tally. "We rank this gold right up there because it adds to the country's tally of gold medals. So, I think it's very, very important that we directly contribute to the country," he said.

Gold medal favourite Bopanna-Bhambri pair suffers shock exit

PTI ■ HANGZHOU

In a huge upset, gold medal favourites and top seeds Rohan Bopanna and Yuki Bhambri were knocked out of the Asian Games after being stunned by lower-ranked Sergey Fomin and Khumoyun Sultanov from Uzbekistan, here on Monday.

Bhambri struggled with his serve and strokes in the latter part of the match while the Uzbek players raised their game against their superior opponents to walk away with a 2-6 6-3 10-6 win in the second round. The defeat will rankle the Indian pair all the more as Bopanna is a top-10 player in the doubles and Bhambri too is ranked among the top-100. The Uzbeks are not even in the top-300.

Serving at 3-4, 30-all in the second set, Bhambri served a double fault to go down by a break point. A wide backhand from Bhambri's racquet handed the Uzbeks the crucial break. Sultanov made no mistake in serving out the set by consistently putting in his first serves. In the super-tie breaker, the Uzbeks raced to a 3-0 lead and soon the Indians were down 5-1. The Uzbeks pulled off a stunning service return winner to make

it 6-1 on Bopanna's serve. Fomin earned four match points with a backhand winner. The Indians saved the first but Sultanov found an inside-out forehand winner on the second to close the contest in their favour.

Bhambri could not support Bopanna enough

India coach Zeeshan Ali said that Bopanna did not get the required support from Bhambri in the match. "At this level and being an experienced player, one cannot afford to make many errors at crucial moments of the match. You have to be able to grab any opportunity that presents itself," Zeeshan told PTI. "Not taking anything away from the Uzbekistan players, they probably played

the best match of their lives, with nothing to lose. We had chances in the second set with a couple of break points at 3-all and, had we won that game, the outcome of the match would have been different." The Indians could not convert 12 out of the 16 break-points they got in the match. "Rohan played a good match but unfortunately did not get the required support needed to win today from his partner who otherwise has been having a very good doubles season," added Zeeshan. Bopanna had ended his Davis Cup career last week, playing against Morocco in Lucknow. At 43, he is also playing his last Asian Games. He had won gold in the 2018 edition with Divij Sharan.

Dalmiya, Dhumal re-elected in IPL GC

PTI ■ NEW DELHI

Former CAB president Avishek Dalmiya and current IPL chairman Arun Singh Dhumal have been re-elected in the IPL governing council as per decisions taken at the Annual General Meeting of the BCCI held in Goa on Monday. The general body was apprised about BCCI earning more than 38 per cent from annual revenue generated by the ICC and also Rs 67 crore (approx) per match earning from media rights during the next cycle of bilateral series. "All routine decisions happened. The list of names for the cricket committees and the sub-committees will be prepared by the office bearers as entrusted by the House. As far as IPL GC is concerned, IPL chairman Arun Dhumal and Avishek Dalmiya were supposed to be elected and it happened on expected lines," a state unit representative told PTI. It has also been learnt that Ombudsman-cum-Ethics Officer will continue as per his contract which is due to expire next year. "The Ombudsman-cum-Ethics Officer will continue till June, 2024. He will serve his full contract," the state unit source said. The board members were also apprised about the new budget and the profit that BCCI made in the last financial year. Former India left-arm spinner Pragyan Ojha will no longer be Indian Cricketers' Association's

representative in the Apex Council. "The ICA will have its election and then choose their new representative." There were talks about removal of Salil Ankola from the national selection panel as chairman of selectors Ajit Agarkar, who is also from Mumbai, is already a part of the panel. The BCCI has a convention that five selectors represent five zones and this time, there are two from West Zone. "There has been no such discussion about this during the AGM. If there is anything, it can only happen after the World Cup. As of now, no selector is being changed," the source said.

Pakistani players issued Indian visa for World Cup travel

PTI ■ INDORE

Members of the Pakistan cricket team were on Monday issued Indian visas for the ODI World Cup, the International Cricket Council (ICC) confirmed, hours after the PCB raised serious concerns with the global body over the delay in the national team's travel to Hyderabad. The visa clearance came less than 48 hours before Pakistan's scheduled travel to India in the wee hours of September 27. They play their first warm-up game against New Zealand in Hyderabad on September 29. "Visas have been issued to Pakistan," an ICC spokesperson told PTI. However, confusion remained in the Pakistan camp over the grant of visa. "We have not got the call from Indian High Commission yet over visa clearance. Member of our team is stationed there," PCB spokesperson Umar Farooq

told PTI. The confirmation from the ICC came after the PCB wrote to ICC CEO Geoff Allardice on Monday over the visa delay besides claiming the anxious wait has adversely impacted the team's preparation for the 50-over showpiece. Pakistan were supposed to have a two-day team bonding session in Dubai before their scheduled arrival in Hyderabad on September 27 but was cancelled due to the uncertainty over Indian visa. The Babar Azam-led side plays two warm-up games and as many World Cup matches in

Hyderabad starting with the practice fixture against New Zealand. In the letter addressed to Allardice, the PCB also claimed that its concerns over visa being granted to players, team officials, fans and journalists for the World Cup in India have not been addressed for more than three years. It also added that such inequitable treatment to Pakistan will not be acceptable. Reiterating those concerns, Farooq added: "There has been an extraordinary delays in getting clearance and securing Indian visas for the Pakistan team for ICC World Cup.

Zverev advances to Chengdu Open final

AP ■ CHENGDU (CHINA)

Top-seeded Alexander Zverev will play for a 21st career title after beating third-seeded Grigor Dimitrov 6-3, 7-6 (2) in the semifinals of the Chengdu Open on Monday. The 26-year-old German will meet Roman Safiullin in Tuesday's final. The 55th-ranked Russian defeated second-seeded Lorenzo Musetti 6-3, 6-4. Zverev hit 10 winners and four aces in the first set and his serve continued to be effective in the second set. The 26-year-old Safiullin will be playing in his first career final in his eighth year on tour. At the Zhuhai Championships, top-seeded Karen Khachanov defeated fourth-seeded Sebastian Korda 7-5, 6-4 to move into the final in his second tournament since returning from injury. Khachanov will face Yoshihito Nishioka in Tuesday's final. The eighth-seeded Japanese player beat Aslan Karatsev 6-4, 6-4. In a tight first set, Khachanov gained the crucial break in the 11th game when Korda

Asian Games 2023: Titas helps India to win gold

PTI ■ HANGZHOU

Titas Sadhu must be believing in pleasant coincidences. Else, how could she logically explain that two of the most defining spells in her short but eventful career read almost eerily similar. It was 4-0-6-2 in the ICC U-19 World Cup final against England and on Monday, playing only her second senior international match, her figures were 4-0-6-3 against Sri Lanka. A three-over first spell that literally ensured the gold medal for Indian women's cricket team. "We all had a clear plan of what we had to do. Obviously, we got a good momentum in the first over itself. We had discussed during the innings break that we will keep calm and stick to what we had decided," said Titas, who hails from Hooghly district's suburban Chinsurah, where she had a sporty father Ranadeep, who encouraged her to take up every sport possible.

Father being a decent state-level athlete, Titas had taken the sport like fish to water and also at the same time making a splash at the pool. She got 93 percent marks in her state class Xth board exams but cricketing commitments prevented her from appearing for the plus two during the next two years. Cricket rather happened accidentally as she would keep scores for her ancestral club Rajendra Smriti Sangha, near Hooghly Mohsin College in Chinsurah. One fine morning, when her club side fell short of a net bowler, they called up Titas. Since then, she has never looked back, even dropping out of school to pursue the sport. The 18-year-old right-arm medium pacer from Bengal was delighted to win the gold for the country in the continental showpiece. "It was a great opportunity we got this time, and the fact that

we were able to grab that opportunity, I'm very glad and grateful," Titas said. On the day, the bounce that Titas extracted off the surface was there for everyone to see and it was something that his

Bengal women's team coach Shib Shankar Paul realised. "I remember one of my former Bengal teammates Priyanka Mukherjee called me few years back. He said, 'Macco (his nickname), there is girl I
