INDIA CALLS TRUDEAU'S BLUFF

PTI ■ UNITED NATIONS

India on Tuesday asked the UN member states not to allow "political convenience" to determine responses to terrorism, extremism and violence, in a veiled attack on Canada amid the diplomatic standoff over the killing of a Khalistani separatist.

Addressing the 78th UN General Assembly session here, External Affairs Minister S Jaishankar also said respect for territorial integrity and non-interference in internal affairs cannot be "exercises in cherry picking" as he asserted that the days when a few nations set the agenda and expected others to fall in line are over.

"We must never again allow an injustice like vaccine apartheid to recur. Climate action too cannot continue to witness an evasion of historical responsibilities. The power of markets should not be utilised to steer food and energy from the needy to the wealthy.

"Nor must we countenance that political convenience determines responses to terrorism, extremism and violence. Similarly, respect for territorial integrity and non-interference in internal affairs cannot be exercises in cherry picking," the Minister said, in an apparent reference to the US, which reportedly provided Canada with intelligence after the killing of Sikh separatist Hardeep Singh Nijjar.

Jaishankar's remarks on the "political convenience" appears to be directed at

External Affairs Minister Subrahmanya Jaishankar addresses the 78th session of the United Nations General Assembly on Tuesday

Canada whose Prime Minister Justin Trudeau recently alleged "potential" involvement of Indian agents in the killing of a Khalistani extremist on his country's soil on June 18 in British Columbia, a charge angrily rejected by New Delhi as "absurd" and "motivated".

"They (Canadians) have made the allegations, they have taken action on them. To us, it seems or it appears that these allegations by the government of Canada are primarily politically driven," External Affairs Ministry spokesperson Arindam Bagchi said last week.

Canada has a Sikh population of more than 7,70,000 (about 2 per cent of its total

population) and are considered a crucial voting bloc.

"In our deliberations, we often advocate the promotion of a rules-based order. From time to time, respect for the UN Charter is also invoked. But for all the talk, it is still a few nations who shape the agenda and seek to define the norms. This cannot go on indefinitely. Nor will it go unchallenged," Jaishankar said in his address.

He asserted that a "fair, equitable and democratic order" will surely emerge, "once we all put our minds to it. And for a start, that means ensuring that rule makers do not subjugate rule takers. After all, rules

will work only when they apply equally to all."

"Even as we encourage collective endeavours, India seeks to promote cooperation with diverse partners. From the era of non-alignment, we have now evolved to that of Vishwa Mitra (a friend to the world). This is reflected in our ability and willingness to engage with a broad range of nations," he said, referring to the rapid growth of the Quad, and expansion of the BRICS grouping.

"All countries pursue their national interests. We, in India, have never seen that as being in contradiction with global good. When we aspire to be a

leading power, this is not for self-aggrandisement but to take on greater responsibility and make more contributions," he added.

Underlining that the world is witnessing an exceptional period of turmoil, Jaishankar said it was with a sense of exceptional responsibility that India took up the Presidency of the G20. "Our vision of 'One Earth, One Family, One Future' sought to focus on the key concerns of the many, not just the narrow interests of a few," he said.

"In the words of Prime Minister Narendra Modi, it was to bridge divides, dismantle barriers and sow seeds of collaboration that nourish a world, where unity prevails over discord and where shared destiny eclipses isolation. The New Delhi G20 Leaders' Declaration articulates our collective ability to do so," he said.

He said the international order is diverse and we must cater for divergences, if not differences. "The days when a few nations set the agenda and expected others to fall in line are over," he added.

Jaishankar said that the African Union's inclusion in the G20 was a "significant step."

"This significant step in reform should inspire the United Nations, a much older organization, to also make the Security Council contemporary. Broad representation is a pre-requisite for both effectiveness and credibility," Jaishankar told the United Nations General Assembly.

India canters to Gold

PTI ■ HANGZHOU

India's dressage team cantered to its first ever Asian Games gold and only second medal in this discipline in the history of the sport with the quartet of Sudipti Hajela, Divyakriti Singh, Vipul Hriday Chheda and Anush Agarwalla living up to expectations, here on Tuesday.

The Indian quartet was performing well in the selection trials as their scores either matched or were better than the Asian Games medal winners from the previous editions. It was more about the colour of medal they would win and they grabbed the top place on the podium by aggregating 209.205 percentage points, leaving behind China (204.882 per cent) and Hong Kong (204.852 per cent).

The last time the sport of equestrian contributed to India's Asian Games tally was in 1986 when the country won a dressage bronze.

In the 1982 edition in New Delhi, the Indian team had grabbed three gold medals in Eventing and Tent Pegging competitions.

Raghubir Singh had won a gold in individual Eventing in 1982 and then added another yellow metal in Team Eventing alongside Ghulam Mohammed Khan, Bishal Singh and Milkha Singh.

Rupinder Singh Brar won the third gold medal in individual Tent Pegging.

In dressage, the horse and rider are judged on how they perform a series of movements. Each movement is

marked out of 10 (from 0 to 10).

Each rider gets an overall score and from there, a percentage is worked out. The rider with the highest percentage is the winner of his class.

Top three scorers in a team are counted to determine the winner.

It was a long and difficult journey for the Indian team which has an interesting mixture of riders. All of them left home at a young age and have been training in Europe separately for the last few years away from their family.

They took part in the Asian Games selection trials organised in Europe by the Equestrian Federation of India. Their horses were quarantined in Aachen in Germany for seven days under strict rules before they were brought to China on September 21.

"It is unbelievable to win a gold here. It is not an easy journey for any of us. All of us have gone to Europe at a young age," said the 21-year-old Sudipti, the youngest of the quartet.

"We have worked hard for many years away from our families. We have made a lot of sacrifices," said Sudipti, who

hails from Indore.

"All of us stuck together, shouting and supporting each other. I was the last to go in the competition and after a few riders after me, finally we realised that Team India has won a gold. That was a very emotional moment," said the 23-year-old Anush, who left his home in Kolkata in 2017 to train in Europe.

"The national anthem was playing and the national flag was flying, there was no better feeling than that. It was all we had worked for and we realised our dream. The first gold medal for India in dressage," said Anush. For Divyakriti, who is hailing from Jaipur, the achievement was also due to their horses.

"A big shout out to our horses also. We are nothing without them," she said.

"It has been a long journey and not an easy one. None of us thought it (to win gold) but we gave our hundred per cent and we did it," she added.

Sudipti currently trains at Pamfou in France. She began horse riding at the age of six as a hobby but later took it seriously as a sport on the insistence of her father. The name of her horse is Chinski.

Divyakriti took to horse riding when she was in the seventh grade at the famous Mayo College Girls School in Ajmer.

She was the equestrian captain of her school. She did her graduation in Delhi's Jesus and Mary College. In 2020, she moved to Europe for training as equestrian infrastructure is not the best in India.

Nijjar killed in terror crossfire

RAKESH K SINGH ■ NEW DELHI

The killing of Khalistani terrorist Hardeep Singh Nijjar in Canada in June, which triggered a diplomatic row between India and Ottawa, was an outcome of internal turf war between Khalistani groups patronised by former Pakistan Prime Minister Imran Khan and those backed by Pakistan Army-ISI syndicate.

Canadian Foreign Minister Melanie Joly has held dialogues several times with Pakistani Army-ISI combine as also with political leaders during the last over four years.

Canadian Prime Minister Justin Trudeau shares a close relationship with Joly who has been instrumental in shaping his pro-Khalistan outlook and anti-India stance.

After his divorce with his wife in April this year, Trudeau's reliance on Joly has further surged leading to his hard-hitting outbursts against India over the killing of Nijjar,

counter-terrorism experts tracking the Khalistani movement said. In 2018, the Canadian intelligence agency in a report warned the Government over increasing Khalistani extremism there.

However, the Government stopped the monitoring of the Khalistani terror activities from 2019 onwards. The development came in the backdrop of increasing bonhomie between Joly and the Pakistani politico-military-ISI complex, they said.

"During the period, Pakistan's notorious spy agency Inter-Services Intelligence (ISI) strengthened its Khalistani agenda in Canada to the extent that its operatives were openly invited to the Gurudwara committee meetings by the Sikh extremists.

"Simultaneously, the approach of the Canadian Government towards the Khalistanis softened 2019 onwards," counter-terrorism and geopolitical analyst Dr Rituraj Mate told *The Pioneer*.

The terror groups propped up by Pakistan in India and elsewhere receive funding from the Army-ISI syndicate during dictatorial regimes in Islamabad based on loyalty to the Pakistani military establishment. When a political party is in power, the terror groups, including of Khalistani hue, get funding support from the party in power, Dr Mate said.

During his stint as Prime Minister of Pakistan, Imran Khan supported the Khalistan Tiger Force headed by Nijjar.

However, the competition between the terrorist groups for funding support took an ugly turn when the Khalistani groups affiliated with the Pakistan Army-ISI liquidated Nijjar at a Gurudwara in British Columbia on June 18 this year, he said, adding, turf war between the terror groups backed by Pakistan is common during the threshold of transition of power between the army and democratic forces in Islamabad.

The relation between India and Canada took a hit after Trudeau stated in Parliament there on September 18 that Canadian intelligence agencies were "pursuing credible allegations of a potential link" between Indian Government agents and the killing of Nijjar.

"The red flags of increasing Khalistani extremism were apparently ignored by the Indian agencies and papered over by the Canadian counterparts. Indian decision makers apparently ignored the meetings between Khalistani terrorists and ISI operatives in Gurudwaras in Canada and 80 per cent of online Khalistani propaganda was being peddled by Pakistani Muslims.

"Indian decision makers in Delhi also did not take cognisance of the love-jihad style of ISI campaign for luring Sikh youth for radicalising them for the so-called Khalistani cause by honey-trapping them," another analyst said.

WAHEEDA HONoured WITH DADASAHEB

Aaj phir jeene ki tamanna hai

PTI ■ NEW DELHI

Waheeda Rehman, who made her debut 68 years ago and went on to act in cult classics such as "Pyaasa" and "Guide", was on Tuesday named recipient of the Dadasaheb Phalke Award, the government's highest recognition in the field of cinema.

"I am doubly happy because it is Dev Anand's birthday. I think 'taufa unko milna tha, mujhe mil gaya', Rehman told PTI on the birth centenary of her frequent collaborator.

Union Minister for Information and Broadcasting Anurag Thakur made the announcement on X.

"I feel an immense sense of happiness and honour in announcing that Waheeda Rehman ji is being bestowed with the prestigious Dadasaheb Phalke Lifetime Achievement Award this year for her stellar contribution to Indian Cinema," Thakur wrote on the microblogging site.

The award for the year 2021 will be presented during the 69th National Film awards ceremony.

Prime Minister Narendra Modi congratulated the veteran actor on being named for the honour.

"Delighted that Waheeda Rehman ji has been honored with the Dadasaheb Phalke Lifetime Achievement Award. Her journey in Indian cinema has left an indelible mark. A beacon of talent, dedication and grace, she embodies the best of our cinematic heritage. Congratulations to her," the prime minister said on X.

The five-member jury comprised Rehman's close friend and last year's Dadasaheb award winner Asha Parekh, actors Chiranjeevi, Paresh Rawal and Prosenjit Chatterjee as well as filmmaker Shekhar Kapur.

Regarded as one of the finest actors of the country, Rehman, also an accomplished Bharatanatyam dancer, made her debut in Hindi cinema with Guru Dutt's "CID" opposite Dev Anand.

After that dazzling beginning came a string of arthouse and mainstream films, the actor comfortably straddling the twin worlds of "Kaagaz ke Phool" and "Ram aur Shyam".

The remarkable career spanning more than six decades and 90 films in different languages saw her segue from black and white to colour, and from lead roles to character cameos.

Some of her most memorable performances were with Guru Dutt — "Pyaasa", "Kaagaz Ke Phool", "Sahib Bibi aur Ghulam" and "Chaudhvin Ka Chand". With Dev Anand came the much loved "Guide" and "Prem Pujari". The filmography includes "Khamoshi", "Kabhi Kabhie", "Reshma Aur Shera", which got her the National Award, and "Trishul".

Remembering Dev Anand, Rehman, who has earlier won the Padma Shri and the Padma Bhushan, said it is a double celebration.

"It is very wonderful that his celebration is going on and I get this honour. I am really happy and grateful to the government that they chose me for this honour. So, it is a combination and celebration of this and Dev sahab's 100th birth anniversary," she added.

Born in Chennai, Rehman made her acting debut with the 1955 Telugu films "Rojulu

Maraayi" and "Jayasimha".

"At a time when the historic Nari Shakti Vandan Adhiniyam has been passed by Parliament, her being awarded with this lifetime achievement award is a fitting tribute to one of the leading ladies of Indian Cinema and one who has dedicated her life after films to philanthropy and the greater good of society. I congratulate her and humbly pay my regards to her rich body of work that is an intrinsic part of our film history," Thakur said in his post on X.

Rehman, who now lives in Bengaluru, has become selective in her film choices. In the 1990s and 2000s, she starred in character roles in "Lamhe", "Chandni", "Rang De Basanti" and "Delhi-6".

Rehman is also associated with bringing to life some of Hindi films most popular songs — "Kahin pe nigahen, kahin pe nishana" ("CID"), "Aaj phir jeena ki tamanna hai" and "Piya tose naina lage re" ("Guide"), "Luka chhuppi" ("Rang De Basanti") and "Genda phool" ("Delhi-6").

Her most recent film appearance was in 2021's "Skater Girl", a coming-of-age sports drama.

Born in Chennai to a Deccani Muslim family, Waheeda never aspired to be an actor but knew she wanted to make people "laugh and cry".

She wanted to be a doctor but ended up on the silver screen instead, an actor who began with Telugu cinema and went on to rule the Hindi film industry, slipping in and out of arthouse and mainstream cinema and staying relevant as movies evolved from black-and-white to colour.

"I wanted to become a doctor, because in those days for Muslim families medicine was the only respectable profession," the actor recalled in a *Tweak India* interview two years ago.

Art, culture and dance interested her since she was a child. And with the support of her father, an IAS officer, she was able to pursue her dream of learning Bharatanatyam and then making a career in the movies.

"I used to make faces looking in the mirror. When my father asked why do I do this, I said 'I want to make people laugh and cry'," she said in the interview.

UP ATS arrests man on charge of spying for Pakistan’s ISI

PTI ■ LUCKNOW

Uttar Pradesh’s Anti Terrorist Squad (ATS) on Tuesday arrested a man for allegedly being involved in spying for Pakistani intelligence agency ISI. Shailesh Kumar Singh alias Shaileendra Singh Chauhan, a resident of Patiylai in Kasganj, had worked as a temporary labourer in the Indian Army in Arunachal Pradesh for about nine months, according to an official statement issued here.

It is alleged that he passed on information about the army related to the location and movement of vehicles and sent photographs to his ISI handlers. Singh was called to the ATS headquarters in Lucknow for interrogation, where he was formally arrested and will be produced before the court, Special DG (Law and Order) Prashant Kumar said in the statement. It claimed the ATS team, with physical and electronic surveillance, confirmed that Singh shared information related to the Army through WhatsApp and Facebook.

“Singh had worked as a temporary labourer in the army in Arunachal Pradesh for about nine months, due to

which he has important information related to the army,” the statement said.

He is not working in any role in the army at present, but his social media profile stated that he was working in the army. He had also posted his picture in the army uniform in his profile under the name Shaileendra Singh Chauhan, it said. Singh came in contact with a woman named Harleen Kaur, who was working for the ISI with a fake identity, through Facebook and she started talking to him on messenger, according to the statement.

Meanwhile, Singh also started talking to another ISI handler Preeti through audio calls on WhatsApp. He introduced himself to Preeti as an army soldier, the statement added. Singh used to pass on army information related to location and the movement of vehicles and sent photographs to Preeti in exchange for money, it further said.

According to the statement, Preeti and Kaur are ISI handlers with fake identities. They used to obtain information related to the army from across the border and provide it to the ISI. The ATS will seek his remand to interrogate him further.

Contractual employee of LDA ends life

PNS ■ LUCKNOW

A contractual employee of the Lucknow Development Authority (LDA) ended his life at his house in Cantonment police station area on the intervening night of Monday and Tuesday allegedly after being reprimanded by his seniors.

The deceased’s family alleged that Santosh Kumar (45) of Hata Ramdas in the area hanged himself after being rebuked by LDA Vice-Chairman Indramani Tripathi at the office on Monday.

Santosh’s son Aditya gave a complaint in writing to the Cantonment police on Tuesday evening. His widow said that Santosh had not been keeping mentally well for the past 10 days. “When I asked him, he told me that the LDA VC had reprimanded him and threatened to sack him. My husband had been working for a long time and there was not a single allegation against him. He was appreciated for his work in the past but with the change of guard in the LDA, he was being bullied by seniors. He did not have lunch on Monday,” she stated. She alleged that Santosh had told her on Monday evening that he was abused and insulted by the LDA VC.

Santosh’s colleague Hem Chandra Tiwari alleged, “We are outsourced employees and get

paid only Rs 10-15 thousand every month. The LDA VC wanted to remove us and was exploiting us.”

The family of the deceased staged a protest, demanding justice. They said Santosh was the sole breadwinner.

“My children are still minors. The government should take strict action against the culprits,” the deceased’s wife said. Santosh is survived by his wife, daughter, son and mother.

However, the LDA administration refuted the allegation, claiming that Santosh was accused of accepting bribe. The LDA administration also extended condolence to the family of the deceased.

“Santosh was a computer operator working on outsourcing at counter number 9 on the ground floor of the LDA building. His work was to make challans,” LDA officials said. The body of a man was recovered from a concrete drain cover slab in Bijnor police station area on Tuesday. The family of the deceased suspected the role of a friend and other unidentified accused even as police sent the body for autopsy and started further investigation. Preliminary investigation revealed that Ram Prasad (35) of Chaudhary Mohalla in the area left the house to visit a fare in the locality on Monday evening but did not return. His

wife Gayatri, along with other villagers, went out to search for him after waiting overnight, but in vain. On Tuesday morning, some of the villagers spotted Ram Prasad lying dead and informed her. She reached the scene and identified the deceased as her husband.

She alleged that Ram Prasad was killed by Mukesh of Rahimabad and latter’s aides. “We have no enmity with anyone except Mukesh. It appears that Mukesh met him at the fare and befriended him. Later, he and his aides killed my husband and dumped his body,” she alleged.

Meanwhile, an elderly couple were thrashed allegedly by their daughter-in-law and her brothers-in-law at the latter’s house in Kakori on Monday afternoon. Reports said Shrawan Sharma of Auras in Unnao, along with his wife, had gone to meet their 2-year-old grandson, who had suffered injuries after falling at the staircase at his maternal uncle’s house in Kakori. It was alleged that the couple’s daughter-in-law and her brothers (Ravi, Rahul and Bauwa) abused them and thrashed them on being confronted. “They beat us with sticks and kicked us too. We somehow fled the scene and saved our lives,” the couple alleged. An FIR was registered in this connection.

Aspirants coming out of Lok Seva Aayog in Aliganj after appearing for UP PCS (Main) examination on Tuesday

Ex-student stalking girl enters school

PNS ■ LUCKNOW

A former student intruded into a tizzy on Monday while stalking a Dalit girl, sending the school administration into a tizzy on Monday.

On the complaint of the girl’s brother, police registered a case under relevant sections of the IPC and also booked the accused under the SC/ST Act.

The accused entered the school while wearing the uniform and misbehaved with the said girl student on September 25. It was alleged that the

accused had abused the girl on September 23 when she was getting out of the school after it gave over. The girl ignored his act and reached her home where she narrated the incident to her parents. The family also decided to ignore the incident fearing social disgrace.

However, it emboldened the accused, who made up his mind to meet the girl inside the school and speak to her. He donned the school’s uniform, carried a bag and entered the school while riding a scooter. As he was in uniform, he was not

stopped by the staff.

As he reached her classroom, the girl and other students informed the class teacher, who immediately alerted the principal. The school administration later asked the peon to lock the gate and search the accused.

As students started assembling there, the accused panicked and fled the school by scaling the boundary wall, abandoning the scooter and bag. The police impounded the scooter and the bag and started further investigation.

Woman, kin held for murder

PNS ■ LUCKNOW

A woman, her parents and brother were arrested on Tuesday for allegedly murdering their neighbour in the name of saving ‘family honour’ in Maharajganj.

A heavy police force was deployed in the village after local residents protested against the murder. While the woman’s family belongs to an upper caste, the victim was from a backward caste. The police identified the deceased as Sunil Sharma (35), a businessman and son of a former village pradhan.

An FIR has been lodged against seven people, including the Manorama Giri (28), her parents Virendra Giri and Shaktuntala Giri, brother Yashwant Giri alias Munna, elder sister Kanchanlata and her husband and a local resident Akash Patel, accusing them of murder and criminal conspiracy. Police said Sharma was in a relationship with

Manorama for the last eight years but she wanted to snap ties with him since her marriage was fixed. However, Sharma was unwilling, following which the accused killed him. According to the police, the victim’s father, Rajendra Prasad Sharma, informed them on Monday that his son did not return home at night and he suspected that Manorama’s family had detained him at their residence.

When the police reached Manorama’s house, her family members staged a protest and did not allow police to enter the house. Additional force was summoned after which the police officers searched the house and found a body. The victim’s hands were tied with a rope. The body was sent for autopsy. The local residents soon staged a protest and gheraoed the house of the accused. The situation was controlled after police officials assured the villagers of strict action against the accused.

Sharma’s father alleged that Manorama called his son to her house and when he reached there, she and her family members killed him. “We have arrested the woman, her parents and brother. Raids are on to trace the other accused,” a police officer said.

Meanwhile, an eight-year-old Dalit girl was allegedly raped by an unidentified man in a village in Mathura when she was returning home from a relative’s place, police said on Tuesday. The incident took place at 8:30 pm on Sunday in the Mahavan police station area, they said.

According to a police complaint lodged by the girl’s father, she had gone to the relative’s place in their village on Sunday. When she was returning home, an unidentified man lured her to a secluded place on the pretext of giving her a toffee and raped her before fleeing. Additional Superintendent of Police, (Rural) Trigun Bisen said.

Tourism: Ayodhya hype is Lko’s gain

PNS ■ LUCKNOW

The state capital is all set to witness an increase in the flow of tourists with the formal inauguration of sanctum sanctorum of Ram Mandir at Ayodhya scheduled for January next year. Tour operators of the city say that the influx of tourists has already increased and is set to go further up from January onwards.

Chairman of Indian Association of Tour Operators Prateek Hira says Lucknow happens to be the gateway city for Ayodhya and will remain so for quite some time.

“This is because even if the airport is there at Ayodhya, it will not start having flights from everywhere. In addition, the Lucknow airport is in for an expansion where Terminal-3 is coming up, and so the main airport will always be Lucknow’s. Besides, it is only one-and-a-half hours drive from Ayodhya, which is a fair-

ly good opportunity for both the destinations to come up together. Tourists will arrive in Lucknow and also try to see the contrasting things which they have heard about in Lucknow,” he said.

The other good point is that there is another religious destination called ‘Naimisharanaya Mishra’ close to Lucknow which is popular with south Indians.

“If tourists are going to both the places, Lucknow is very strategically located in between, with one-and-a-half hours to Ayodhya and one-and-a-half hours to Naimisharanaya. It is all set to gain,” he explained.

In terms of accommodation, he said: Naimisharanaya has nothing while Ayodhya has very limited accommodation as of now, and the new accommodations will take time to come up. As of now, whatever events take place in Ayodhya, the accommodations

get full. Apart from this, people with affordability plan to stay in Lucknow. Also, Ayodhya is lacking in terms of a day activity because visitors just go and see the temple and there is not much to do. Things will come up but it will take time, which is advantage Lucknow,” he added.

Hira said that the domestic tourists in Lucknow have increased manifold because of the Ayodhya hype.

“Everyone wants to go to Ayodhya. Something similar happened when the Kashi Vishwanath Corridor came up and Varanasi experienced foot-fall, which was beyond anyone’s imagination,” he pointed out.

He said that the development of one place in tourism gives a boost to the entire region. “If it is Ayodhya, it is not only Ayodhya but the places that surround it. For example, there is a place called Chhapriya just 40 minutes ahead of Ayodhya. It is the

birthplace of Swami Narayan, who is revered in Gujarat. It will also attract tourists,” he said.

He added that every tourist arriving in Lucknow is asking for Ayodhya. “Any conference of corporates witnesses an excursion to Ayodhya, which remains in focus. The curiosity which has been created has aroused interest in both young and old alike,” he added.

Hira said that Lucknow hotels are already expanding for the great demand in the market. He said that the World Cup cricket matches in October are also attracting tourists and that the hotels are heavily booked.

“The cricket stadium has brought in tourists and the film policy of the state has led to increased film shootings,” he pointed out. He said that the connectivity has increased at the Lucknow airport as international destinations add on and tourists flow in.

NISHAD party’s Fb page hacked

Lucknow (PTI): The Facebook page of the NISHAD party has been hacked and its name changed to ‘Nishad Party (The Show Travel)’ by the hackers. An FIR has been registered in the matter, according to police. The hackers also changed the display picture of the page and according to a post shared on September 19, it has been rebranded with a “new look and name”.

NISHAD party president Sanjay Nishad registered a complaint at Gutampalli police station here on September 25 alleging that his party’s Facebook page had been hacked. Based on his complaint, an FIR was registered under relevant sections of the IT Act, police said on Tuesday. In his complaint, Nishad said attempts to recover the Facebook page, @nishad-party4u, have failed and the link to the party’s website has also been replaced. Police said an investigation has been launched into the matter.

CITYBRIEFS

INSPECTION

President of North Eastern Railway Women Welfare Organisation, Lucknow, Ruby Rai on Tuesday inspected Shishu Vihar (crèche) located in the DRM office in Lucknow. She inquired about the facilities available in the crèche. She was all praise for the female workers in the crèche and rewarded them.

WORLD PHARMACY DAY

World Pharmacy Day was organised by HIPR, a constituent institute of the Himalayan Group of Institutions, Bakshi-Ka-Talab, on September 25 and 26. Students of the institution participated in various competitions like debate, poster-making, rangoli, and pharmacy quiz. On Tuesday, all the students participated in ‘Organ Donation - Maha Daan’. An awareness rally was organised from the college premises to Bakshi pond.

CLEAN WATER DAY

The Lucknow division of North-Eastern Railway on Tuesday celebrated ‘Clean Water Day’ at Lucknow Junction, Gorakhpur Junction,

Gonda Junction, Khalilabad, Basti, Lucknow City, Mankapur, Aishbagh, Badshahnagar and Sitapur under Swachhta Pakhwada-2023. The programme was organised under the guidance of Divisional Railway Manager Aditya Kumar. Officials reviewed the availability of drinking water, hydrants, water coolers, water supply in passenger waiting rooms, rest rooms and toilets on all the platforms of the stations and the water tanks installed in station offices and railway colonies. A Hindi note and draft-writing competition was organised on Tuesday and a huge number of employees of all the departments participated in it. The programme was held under ‘Hindi Fortnight’ being celebrated from September 14 to 28.

we test them and confirm the presence of the sleeping pills,” she said.

She added that there are very limited labs for such testing in the country, with one being at Cochlin.

She further said that this is a new lab but they would like to extend the number of drugs they are testing.

“There are a lot of queries for the testing of heavy metal poisoning. This heavy metal poisoning can occur because of traditional medicines. Also, lead poisoning happens through water contamination. These are chronic poisoning cases and we are planning to cover them too in future,” she said.

She added that she got the idea of setting of the lab after she did a course in Chennai on a similar kind of lab and was encouraged by the head of the department. She said they get the maximum samples from the medicine department.

Dr Rathore said they are also planning to start a Poison Information Centre in a couple of months. “It will be a call centre open to the general public. There will be a toll-free number using which people can make a query regarding any kind of poisoning,” she said.

Dr Rathore said they are also planning to start a Poison Information Centre in a couple of months. “It will be a call centre open to the general public. There will be a toll-free number using which people can make a query regarding any kind of poisoning,” she said.

Analytical Toxicology Lab in KGMU first of its kind

PNS ■ LUCKNOW

The forensic department of King George’s Medical University has started an Analytical Toxicology Lab, which is the first of its kind in the northern region of the country, according to Dr Shiuli Rathore.

“This lab carries out the clinical management of patients while the other labs on toxicology set up in the state are for research purpose. Patients with poisoning were being managed on the basis of symptoms alone previously, but now we are carrying out the tests for some kinds of poisons whose samples are sent to us. We test them and help them find out what toxins the patients have taken,” she said. She added that in this way they can confirm what the doctors may be suspecting the patients have taken, and then they go ahead with the treatment.”

She said they are testing for pesticide poisoning and overdose of some drugs.

“For example, a person has had an overdose of sleeping pills and is unconscious and one is suspecting this on the basis of the symptoms, but one does not know. The blood samples, urine samples, etc are sent to us and

UP Tourism stall gets Gold Award

Lucknow (PNS): The recently-concluded UP International Trade Show at Greater Noida bore witness to an exceptional turnout of visitors at the Uttar Pradesh Tourism stall, which clinched the Gold Award for being the most visited stall. The stall captivated the imagination of attendees at the trade show. Visitors were welcomed with an array of travel guides and intriguing literature showcasing the rich expanse of Uttar Pradesh’s cultural heritage and picturesque destinations. The ‘pièce de résistance’ of the UP Tourism stall was the virtual reality (VR) zone. Within a specially designed dome, attendees were transported into the vibrant world of Uttar Pradesh, immersing themselves in breathtaking 3D visuals that depicted the state’s culture, traditions, and stunning landscapes.

CCSIA to add direct flight to Muscat from Oct 1

Lucknow (PNS): The Chaudhary Charan Singh International Airport (CCSIA) will soon be adding a direct flight to Muscat from October 1. The flight will be operated by Oman Air.

“Oman Air will be operating the Lucknow-Muscat flight with Boeing 737 aircraft having a capacity of around 162 passengers. With this new non-stop flight, the number of international flights from CCSIA will go up to 20 per day from 18 earlier. At present, Muscat is connected to Lucknow by Salam Air. Oman Air will be the second airline connecting Muscat to the capital city. The airport has added six international arrivals and departures recently. All of them are operated by Indigo Airlines to Abu Dhabi, Dammam and

Dubai,” CCSIA spokesperson said.

The daily non-stop flight from Lucknow to Muscat will depart at 21:00 hours and Muscat-Abu Dhabi to Lucknow flight will arrive at 19:50 hours.

At present, CCSIA manages an average of 17,700 passengers per day and operates around 125 flights per day. In the first quarter of 2023-24, CCSIA recorded nearly 1.55 million passenger movements.

Dubai, Muscat and Riyadh held the spot as the top three international destinations from Lucknow, whereas Delhi, Mumbai and Bengaluru were the top three domestic destinations. CCSIA currently acts as a gateway to 25 domestic and eight international destinations for passengers from Lucknow and its surrounding areas.

CDRI CELEBRATES CSIR FOUNDATION DAY

Lucknow (PNS): The Central Drug Research Institute (CDRI) celebrated the 82nd Foundation Day of Council of Scientific and Industrial Research (CSIR) with an ‘Open Day’ event, welcoming school and college students from across the region, including Sultanpur, Hardoi, Rae Bareilly, Unnao, Kanpur and Lucknow. This commemorative event, held on Tuesday, was a testament to CSIR’s pivotal role in advancing scientific research and innovation across the country. The ‘Open Day’ provided an opportunity for students to delve into the world of science and innovation. The event featured a wide array of activities and attractions designed to spark curiosity and inspire young minds.

CM to tech institutes: Shun old courses, embrace modern ones

PNS ■ LUCKNOW

Chief Minister Yogi Adityanath, on Tuesday, emphasised the need for technical institutes to leave the old programmes and embrace modern ones, saying, “Today is the time of technology; it can be used for nation-building and public welfare.”

Inaugurating a new administrative building equipped with state-of-the-art facilities and built at a cost of Rs 12 crore at Madan Mohan Malviya Technological University in Gorakhpur, the chief minister said, “Till 2017, there were only two cyber police stations in Uttar Pradesh. However, there is now a cyber police station and a cyber help desk in each district of the state. Due to this, cybercrime has been significantly reduced.”

The chief minister said that it was the responsibility of universities and technical institutes to enter into memorandum of understanding (MoUs) with cyber stations for technical cooperation. In this regard, the Gorakhpur Zone police have taken a proactive step by signing an MoU with Madan Mohan Malviya University, he added.

Highlighting that the country’s largest data centre was in Uttar Pradesh, the chief minister said that the state’s technical institutes should establish connections with it.

“Prior to 2017, Uttar Pradesh was at number 14 in ease of doing business, but significant improvements were made through the introduction of the Nivesh Mitra single-window portal. In addition, the

Chief Minister Yogi Adityanath going around an exhibition at Madan Mohan Malviya Technological University in Gorakhpur on Tuesday

administrative system was compelled to put the reforms into effect by utilising technology more effectively. As a result, UP now ranks second in the country in ease of doing business,” he pointed out.

Yogi Adityanath asserted that digital payment has revolutionised the life of every citizen by bringing a corruption-free system. Uttar Pradesh, with the largest youth population in the country, has seen its young citizens benefit immensely from Prime Minister Narendra Modi’s visionary Digital India initiative, he remarked.

He highlighted that

schemes such as PM Startup, PM Mudra, One District, One Product, and Mukhyamatri Swarozgar have brought about substantial changes in the lives of state’s youth.

Moreover, he noted, these government schemes are now efficiently reaching the people of Uttar Pradesh through technology.

The chief minister said that an International Trade Show was held in Greater Noida from September 21 to 25, drawing the participation of buyers and over 2,000 exhibitors from Uttar Pradesh. This event showcased the state’s innovation and potential to

the world. Additionally, the trade show’s success was evident as approximately four lakh individuals visited and shopped at the event.

Chief Minister Yogi also stressed the importance of aligning research efforts with the needs of society, emphasising the positive outcomes that such an approach can yield.

Member of Parliament Ravi Kishan Shukla, district panchayat chairperson Sadhna Singh, Mayor Dr Manglesh Srivastava, Vice-Chancellor Jai Prakash Pandey, MLA Fateh Bahadur Singh, Bipin Singh and other dignitaries were present in the programme.

BJP plans to woo OBCs

Lucknow (PNS): The Bharatiya Janata Party has unveiled an ambitious plan to integrate 2,00,000 individuals from the Other Backward Classes (OBC) into its fold.

The initiative kicked off on Tuesday with a training programme inaugurated at the BJP state headquarters.

Utilising the power of social media, the BJP aims to reach 2,00,000 OBC individuals who will undergo training to become active members of the party. This initiative is spearheaded by the BJP OBC Morcha, the party’s OBC wing.

Through social media platforms, the BJP intends to engage with individuals from the previous generation and communicate its message effectively. The OBC Morcha will conduct training workshops on social media strategies in every district with dedicated teams formed for this purpose. These teams, operating at the block level, will ensure the dissemination of the government’s initiatives and work targeting the backward classes at both the central and state levels. Each assembly constituency will also see the formation of teams comprising equal numbers of previous-generation and current-generation party workers.

A significant focus will be placed on the 79 major OBC sub-castes during the team formation process. These teams will actively engage with the public in preparation for upcoming elections, becoming the driving force behind election campaigns and promotions. This initiative by the BJP seeks to empower and train active workers and leaders from the backward classes, ensuring their participation in handling in entirety the Lok Sabha election campaigns.

Muslims not strangers to RSS, says Bhagwat

PNS ■ LUCKNOW

During his four-day visit to Lucknow, Rashtriya Swayamsevak Sangh chief Mohan Bhagwat delivered a pivotal message centered on unity and inclusivity, transcending the traditional boundaries of the organisation. Addressing a gathering of RSS members and supporters, Bhagwat made a striking statement, “Muslims are not strangers to our RSS organisation. Those who oppose us are also part of us. The RSS should not be concerned about damage from the opposition.”

This statement carries profound implications, emphasising the willingness of RSS to engage with individuals of varying beliefs and perspectives.

In an effort to actualise this vision of inclusivity, Bhagwat stressed the importance of reaching out to those who oppose the RSS ideology and fostering open dialogues.

He envisioned a society where all segments come together, transcending differences, including professionals such as doctors, teachers, military officers, lawyers and freedom fighters, all working in harmony to advance the RSS mission. Furthermore, Bhagwat underscored the RSS initiative to bridge gaps with individuals holding opposing political ideologies. He extended the organisation’s hand even to those affiliated with parties like the Samajwadi Party, Bahujan Samaj Party or the Indian National Congress, suggesting a commitment to national

unity that transcends party lines. This statement by the RSS chief signifies a momentous step toward fostering unity and cooperation among diverse segments of society, even amidst differing viewpoints. It reflects a broader societal shift towards inclusivity and dialogue, which is critical in a diverse and democratic nation like India.

“Bhagwat’s message in Lucknow underscores the RSS willingness to evolve and engage with a changing India, fostering a sense of unity that transcends ideological and political divides. As the nation watches and assesses this new direction, it offers a glimmer of hope for a more harmonious future,” said Nomita P Kumar from the Giri Institute of Development Studies.

UP govt to launch seaplane service

Lucknow (PNS): The Uttar Pradesh government is planning to launch a seaplane service with the aim of boosting tourism while simultaneously executing the plan to establish an ‘Inland Waterways Authority’ in the state to facilitate the seaplane service. A seaplane is an aircraft designed to take off and land on water. Prime Minister Narendra Modi launched the country’s first seaplane service in Gujarat in 2020.

According to a state government spokesman, a presentation on the proposed seaplane service was given in a meeting chaired by Chief Secretary Durga Shanker Mishra. Officials from departments

such as Tourism and Irrigation were also present in the meeting.

“We are planning to launch a seaplane service with an initial estimated investment of Rs 2,000 crore in a public-private partnership mode. A presentation on this matter was made to the chief secretary by officials from the Tourism department,” said Tourism and Culture Minister Jaiver Singh.

The proposal aims to connect important religious and cultural cities in Uttar Pradesh such as Varanasi, Prayagraj, Ayodhya and Mathura, as well as all the Char Dhams – Yamunotri, Gangotri, Kedarnath and Badrinath – in Uttarakhand through 20-seater

and 10-seater seaplane services. Initially, the service may be launched with six seaplanes.

According to the minister, the seaplanes will use existing helipads for take-off and landing, and they will also take off from land and water where available, in the form of rivers, canals and lakes. “A helipad will also be built in Haridwar in Uttarakhand on land owned by the Uttar Pradesh’s Irrigation department,” he said.

The minister said that once launched, the service would provide a significant boost to domestic and foreign tourism in the state and help tourists save a lot of time as they would be able to cover more tourist destinations in less time.

Rahul likely to visit Ayodhya for darshan of Ram Lalla

PNS ■ LUCKNOW

With Uttar Pradesh Congress president Ajay Rai taking up ‘soft Hindutva’ agenda to check polarisation in favour of Bharatiya Janata Party, now former Congress president Rahul Gandhi is likely to visit Ram Lalla’s temple in Ayodhya soon.

This possibility came to light by the secret visit of Rahul Gandhi’s chief advisor and Rajiv Gandhi Foundation chief executive officer Vijay Mahajan to Ayodhya on Monday. During the visit, Mahajan, along with some selected saints, met Acharya Satyendradas, the chief archaka of Ram Janmabhoomi, at his Satyadham ashram at Ramghat. Along with Mahajan, two-three more important members of Rahul Gandhi’s team were also present during the meeting.

Sources said that during the meeting with Acharya Satyendradas, Mahajan sought guidance from him for the Congress leadership. The sources confirmed that Acharya Satyendradas advised

Mahajan to develop collective leadership at the top level in Congress and avoid negative attitude towards Ram temple and Sanatan culture.

Meanwhile, both sides seemed to agree on the fact that Congress has been representing the soul of the country under the patronage of leaders like Mahatma Gandhi and Vinoba Bhave.

After a successful and cordial meeting of half an hour with Acharya Satyendradas, Mahajan, while returning, also touched the mind of the chief priest of Ram Janmabhoomi by saying that Rahul Gandhi would come to Ayodhya very

soon and have darshan of Ram Lalla and seek his blessings.

Among the other selected saints whom Mahajan met during his visit to Ayodhya included Mahant Janmejay Sharan of Janki Ghat Bada Sthan. Regarding his meeting, Mahajan said that this visit was purely religious and should not be linked with politics. As far as the possibility of Rahul Gandhi coming to Ayodhya and having darshan of Ram Lalla, there was no hesitation in it, he said.

“Not only Rahul, anyone has the right to come to Ayodhya, have darshan of Ram Lalla and Bajrangbali and worship the sacred Saryu,” he added. Mahajan also met Mahant Maniramdas associated with Hanuman Garhi during the Ayodhya visit. He said, “Irrespective of whether Rahul Gandhi’s possible visit to Ayodhya should be linked to politics or not, it cannot be denied that if Rahul Gandhi visits Ram Lalla, it will be a strong answer to those people who run their shops by terming Rahul Gandhi as anti-Hindu.”

SP joins protest against suspension of licence

Irani lashes out at Cong

PTI ■ AMETHI

The row over the suspension of licence of Sanjay Gandhi Hospital, run by a trust headed by Sonia Gandhi, intensified on Tuesday with SP joining the Congress’ protest here and Union minister and local MP Smriti Irani lashing out at them. Over 400 employees have also started an indefinite dharna at the hospital gate against the state government’s decision.

The licence was suspended on September 17 following the death of a woman patient who was admitted there for a minor operation on September 14. Her husband has alleged that she was given an overdose of anaesthesia, which worsened her condition and ultimately led to her death. Samajwadi Party district chief Ram Udit Yadav joined the dharna by the Congress members at the office of the Chief Medical Officer, around 12 km from the hospital. Congress’ former MLC Deepak Singh said he will con-

tinue his “Satyagraha” till services are resumed in the hospital and facilities at other government hospitals in the district are improved.

As the issue took a political turn, Union minister and Amethi MP Smriti Irani attacked the Congress, saying instead of supporting the family of the deceased, the opposition party was “crying over the loss of their profits.”

“A woman dies because of hospital arrangements. Instead of supporting the family of the deceased woman and taking any action against those who killed a patient, Congress is crying over the loss of their profits. “Is the life of an ordinary citizen of Amethi worth nothing?” Irani, who is MP from Amethi, said in Lucknow while replying to queries from reporters on the issue.

Amid protest by hospital workers, President of Sanjay Gandhi Hospital Employees Union Sanjay Singh alleged that the hospital has been closed due to “political jealousy.”

“More than 400 employees and doctors work in the hospital. Due to the closure of the hospital, all of them became unemployed and everyone was

Union minister Smriti Irani giving appointment letters to candidates at a job fair at Indira Gandhi Pratishthan in Lucknow on Tuesday

facing a crisis of livelihood,” he said. Singh said that about 800 patients used to come to this hospital for treatment every day.

“Not only from Amethi, patients from Sultanpur, Pratapgarh, Rae Bareilly and Barabanki used to come here and now everyone is worried,” he said, adding that the protest will continue until the hospital services are restored. The hospital is run by the Sanjay Gandhi Memorial Trust, Delhi. Its chairperson is former Congress president Sonia Gandhi while her son and

party leader Rahul Gandhi is a member.

BJP MP Varun Gandhi and Congress state president Ajay Rai had written separate letters to Uttar Pradesh Deputy Chief Minister Brajesh Pathak and Chief Minister Yogi Adityanath respectively, requesting them to reconsider the decision. Irani had defeated former Congress president Rahul Gandhi in Amethi, considered the pocket borough of his family, in the 2019 Lok Sabha polls.

Meanwhile, the license of the private Janata hospital here

was also suspended on Monday evening and its OPD services stopped for alleged negligence that led to the death of a pregnant woman.

Chief Medical Officer Anshuman Singh said Ram Kumar Pandey, the father-in-law of the deceased woman, had filed a complaint with the police and the health department demanding action against the doctors and staff of the hospital for alleged negligence.

A team of three doctors led by Additional CMO Ram Prasad had conducted a probe in which negligence of the hospital was found and its licence was suspended.

Pandey, in his complaint, alleged that his daughter-in-law Suman was due to deliver on September 15 for which she was taken to Janta Hospital.

A doctor, who was present during the checkup, advised a cesarean operation and the woman was operated on the same day. However, after about one-and-a-half hours, when her condition deteriorated, she was referred to a private hospital in Lucknow. On reaching there, the doctors told them that Suman had already died, Pandey alleged in his complaint.

2 booked for threatening to kill religious preacher

Bareilly (PTI): Two men, one of them husband of the head of Bhandars village, were booked for posting indecent remarks about Hindu groups on a WhatsApp group and threatening to kill Pandit Dharendra Shastri, police said on Tuesday.

According to police, Nanhe, the husband of Nargis, village pradhan of Bhandars village, had on Monday posted some remarks on a WhatsApp group and also threatened to kill Dharendra Shastri, a preacher more popularly known as Bageshwar Baba.

After the post went into circulation, some Hindu organisations approached the police and filed a complaint.

Superintendent of Police (Rural) Mukesh Kumar Mishra said that a case was registered against Nanhe and Pankaj Rathore at Hafizganj Police Station for making the remarks. Pankaj Rathore has been detained, while Nanhe is absconding, he said.

Police have sent the mobile phone and laptop of Pankaj to the cyber cell for examination.

Parties associated with BJP have no place in INDIA bloc: Akhilesh

PNS ■ LUCKNOW

Samajwadi Party president Akhilesh Yadav said that there was no place in the opposition INDIA bloc for any political party which in the past had close association with the Bharatiya Janata Party.

Akhilesh Yadav said this in response to speculations over Bahujan Samaj Party being included in the INDIA bloc.

In an apparent jibe at the UP Congress leadership for claiming that they were preparing to contest all 80 Lok Sabha seats in Uttar Pradesh, Akhilesh said, “Why only 80? They may contest many more seats across the country. The Congress deserves to decide how many seats they want to contest, but when it comes to the INDIA bloc, the decision will be taken by the Congress national leadership. When discussions are being held at the national level, then such questions should not come up. Such questions not only spread confusion but also create a rift in the alliance.”

The SP president was hopeful that the INDIA coalition would win the 2024 Lok Sabha elections. “The public will come

in support of INDIA and it will win. Also, the BJP will suffer its worst defeat in Uttar Pradesh,” he said.

Akhilesh Yadav also attacked the BJP government in the state over the murder of a doctor in Sultanpur, allegedly by a cousin of the district president of the Bharatiya Janata Yuva Morcha, over a property related dispute. The SP chief said: “Bulldozer’s steering is in the BJP hands. Whenever any BJP person is at fault, then the bulldozer’s keys get misplaced. Wherever there are murders over land disputes, the BJP’s people are involved.”

Akhilesh Yadav added that he attempted to visit the slain doctor Ghanshyam Tiwari’s family but the police did not allow him citing law and order issue. Akhilesh was in Sultanpur on Monday to express condolences to the family of former SP MLA Abrar Ahmed, who died of ill-health in August.

Meanwhile, the Samajwadi Party has criticised the removal of the statue of its founder Mulayam Singh Yadav from near the office of Hardoi Nagar Palika Parishad.

The six-foot statue of

Mulayam Singh Yadav was installed at the party’s district office, allegedly without prior permission, and it was removed after a notice from the Nagar Palika Parishad.

The statue was installed on a platform at the SP office near the Nagar Palika Parishad office by party’s Hardoi district president Virendra Yadav.

Taking note, the civic body issued a notice to Yadav on September 23 and also pasted it at the entrance of the SP office.

According to the notice, the party was given 24 hours to take down the statue as it could not be installed without permission of the competent authority.

Terming the action as “arbitrary” and “condemnable”, Virendra Yadav said the party members had collected Rs 10 lakh for the statue.

“The administration got it removed after pressuring us. After the notice was issued, we took down the statue on our own on September 23,” he said.

The Nagar Palika Parishad official said that the statue was installed without permission and unauthorised construction – a hall and a room – was also done.

Siblings attacked with acid at home

Lucknow (PTI): A 22-year old woman and her minor brother were attacked with acid in their sleep in Bareilly on Tuesday, police said. The condition of the woman and her 17-year-old brother, a Class 11 student, is critical and they have been admitted to a private hospital in the city, they said.

Police said two persons have been detained in connection with the attack and are being interrogated. The incident happened here in an area under the Izzatnagar Police Station. SP (City) Rahul Bhati said that at around 3 am, when the siblings were sleeping in their room, some person stole into the house and poured acid on them. He said the preliminary inquiry has revealed the attackers knew the woman, who is preparing for medical entrance exam.

Meanwhile, three people were killed in a head-on collision between two trucks on Ayodhya road in Amethi, police said on Tuesday. The accident took place on Monday night in which Manoj Kumar Mishra (35), driver of one of the trucks, Pradeep Kumar Chaubey (47) and Sunil Kumar (22) were killed, SHO, Jagdishpur police station, Rakesh Kumar said.

MotoGP makes record business of ₹93.3 bn

PNS ■ LUCKNOW

More than one lakh people from India and around the world attended the MotoGP at the Greater Noida-based Buddh International Circuit as this much-anticipated event made a record business of Euro 106 million (Rs 93,376,460,000).

“As per available information, intense economic activities took place during the three-day event, leading to the business of a whopping Rs 93.3 billion,” a government spokesman said here on Tuesday.

During the MotoGP, in the Moto 2 and Moto 3 races held at the Buddh International Circuit from September 22 to 24, 82 riders from 41 teams took part. More than one lakh visitors experienced the thrill of the high-profile race. “The one lakh visitors included around 10,000 to 15,000 foreign visitors,” the official said.

There was a huge crowd on all days between September 22 and 24. Most visitors were present on the day of the final race in which Marco Bezzecchi won. Around 50,000 visitors witnessed the exciting race and

Coming to India again in 2024: Carmelo

Lucknow (PNS): After the successful hosting of MotoGP Bharat at Buddha International Circuit in Greater Noida, the Yogi Adityanath government has actively started preparations to organise it in 2024, MotoGP promoter-company Dorna Sports has confirmed. During his meeting with Chief Minister Yogi Adityanath, Carmelo Ezpeleta, the CEO of Dorna Sports, expressed his gratitude to the chief minister for the administrative support provided for hosting the MotoGP race.

He emphasised that the riders participating in the event had given positive feedback regarding the track and its technical specifications at the Buddh International Circuit. Carmelo also said that BIC was looking forward to coming to India again for MotoGP 2024, adding “we are excited about it”. The company representatives also discussed the economic impact of MotoGP Bharat in Uttar Pradesh. He presented a helmet to Chief Minister Yogi Adityanath as a token of appreciation. It was signed by all 22 riders, and was later signed by both Carmelo and the CM.

Chief Minister Yogi Adityanath present the trophy to Marco Bezzecchi. On the second day, nearly 30,000 visitors watched the race, while on the first day around 15,000 attended the race.

According to available information, during this global event, economic activities worth Rs 93.3 billion were carried out through various means. This includes a significant investment of Rs 50 crore in track development and basic infra-

structure.

Notably, the benefits of these economic activities have been seen in various sectors in Greater Noida, including the hotel industry, restaurants, transportation, and hospitality, among others.

“The far-reaching consequences of this event are yet to be seen, as many major brands are considering expanding their investments in Uttar Pradesh following Chief Minister Yogi’s appeal,” the official said.

Youth killed by brother

PIONEER NEWS SERVICE ■ KANPUR

A youth shot his younger brother dead when the latter was sleeping on the rooftop in Parampurwa locality in the Juhi police station area on Tuesday morning. After taking the body into possession the police started a probe in the matter. A team was deputed to nail the absconding assailant. The cause of the incident will be ascertained after the arrest of the accused and the firearm used in committing the crime. The kin alleged that Arzoo shot his younger brother Adnan dead when the latter was fast asleep on the rooftop on Tuesday morning. DCP (South) Ravindra Kumar, ADCP (East) Ankita Sharma and ACP Santosh Singh along with forensic team rushed to the spot and carried out investigation. According to reports, Azmat Khan of Parampurwa, Juhi, runs a grocery shop near his house. His family consists of wife Kismtun Nisha and four sons Arzoo, Irfan, Faisal, Adnan (20) and a daughter Ramsa. Youngest son Adnan was employed in a medical store near Juhi canal and preparing for BPharma course. On Tuesday morning when his mother came down to offer namaz, Arzoo reached the

rooftop and shot Adnan dead. DCP (South) said the elder brother had criminal antecedents and jobless. Younger brother used to often ask him to do something and contribute in meeting expenses of the family. On Monday night also both had a debate on this issue. Thereafter Arzoo shot Adnan dead when the latter was sleeping on the rooftop. The body was sent for autopsy. A probe was on in the matter, he said.

SUICIDE: Following love affair with a girl, a medicine company employee committed suicide by hanging himself in the Barra police station area. The police along with forensic team rushed to the spot and carried out a probe in the matter. At the time of incident, as earphone was found plugged in the ears it was suspected that he committed suicide after being upset during talk with his girlfriend. Mohit Pal (24) of Nai Basti, Barra, was employed in a medicine company and lived with mother Vidya Devi and father Sripal. Kin informed that after dinner on Monday night all went to sleep and Mohit kept talking on his mobile phone till late at night. On Tuesday morning when he failed to come out of his room his mother rushed there to call

him. On failing to get any response Vidya Devi suspected some wrong, peeped through the window and found him hanging. Kin denied of having any information about the incident. SHO Suryabali Pandey said as the deceased had the earphone plugged in his ears, it was suspected that he committed suicide following love affair with a girl. After examining details of his mobile phone, exact cause of the incident would be ascertained, he said. In another incident, a man was found hanging from a tree near Dadhapur village, Nainpur turn, under Rajpur police station area of Kanpur Dehat on Monday night. The police carried out investigations and sent the body for autopsy. Uday Narain alias Chhunnun (40) of Dadhapur village had gone towards the fields on Monday evening where he hanged himself from a tree which led to his killing. On failing to return home till late at night family members traced him and found him hanging from the tree. On information on Dial 112, sub-inspector Ram Shanker Pal from Rajpur police station rushed to spot and after investigation, sent the body for autopsy. He said the cause of incident could not be ascertained.

NSI signs MoU with Pagnism Innovations

PIONEER NEWS SERVICE ■ KANPUR

The National Sugar Institute (NSI) signed an MoU with Pagnism Innovations Pvt. Ltd, Sangli, Maharashtra, a start-up company with an aim to create awareness and providing necessary technical assistance for production of green hydrogen in sugar factories. The onus of this project has been placed on NSI and the initial pilot plant scale trials for producing green hydrogen from compressed bio-gas have yielded satisfactory results. Director of the institute Prof Narendra Mohan said the process is having methane content of 92 per cent or more in a fluidised bed reactor to obtain green hydrogen. He said the process also involved steps for cooling and scrubbing of gas. He said during the initial trials on compressed biogas as obtained from sugar factories, NSI could achieve a yield of 25 per cent green hydrogen and 75 per cent carbon black. While green hydrogen about which everyone was talking about as a fuel for future, the carbon black was also a value-added product which has high demand in tyre, paint, rubber, cosmetic and toner industry.

Dr Mahesh Pagnis, Director, Pagnis Innovations Pvt Ltd said the NSI was working on economics but looking to revenues from carbon black, the cost of production of hydrogen was going to reduce and NSI was going to help in developing a model suiting sugar industry environment. Mohan said the two organisations will conduct live demonstration of the technology at the institute in

December this year before the sugar industry personnel.

Prof Mohan said sugarcane had been cultivated for human and animal consumption for centuries and in recent years, its potential was being increasingly exploited for its immense agro-industrial value. He said the world sugarcane production had more than 500 years of history and integrated the agricultural activities of growing, harvesting and transportation of sugarcane with industrial production in sugar mills and integrated industries viz. ethanol, power, feed, paper, board and bio-based products. Sugar industry and sugar crops are a potential source of renewable energy, bio-fuels, bio-electricity and bio-materials, as well as a food crop and widely recognised as a source of rural livelihoods and socio-ecogreen hydrogen was a clean energy source produced through the electrolysis of water using renewable energy sources such as wind, solar, and hydro power. He said it had the potential to become a key player in the transition to a carbon-free economy and can help mitigate climate change. He said the primary reason for developing green hydrogen was to reduce greenhouse gas emissions and mitigate climate change.

He said the use of fossil fuels for transportation and electricity generation was a major contributor to global emissions. He said green hydrogen, produced from renewable sources, making it a sustainable and environmentally friendly energy source.

KDA Board meeting held

PIONEER NEWS SERVICE ■ KANPUR

The 138th Board meeting of Kanpur Development Authority (KDA) was held here on Tuesday. It was chaired by Divisional Commissioner Amit Gupta.

Vice-Chairman of KDA Vishakh G Iyer along with other senior officers was also present. Later, talking to media persons, Iyer said during the meeting members discussed about the massive publicity of the Transit Oriented Development (TOD) scheme after the launch of Metro Rail in the city. It aimed at extending maximum benefits to the house and plot owners.

He said the KDA would soon start seeking suggestions/objections from people likely to be covered under the scheme. With the launch of the scheme, houses con-

Divisional Commissioner Amit Gupta chairing the KDA Board meeting on Tuesday

structed within 500 metres dimension on both sides of the metro route could be used for commercial activities. Besides, heights (floor area ratio) of these houses falling under the TOD zone could also be increased. The board has approved the move of seeking suggestions/objections from people in this

respect at its meeting on Tuesday. He said in order to fix the mixed land use, the scheme would be divided into two parts. In class I there would be plots of up to one hectare allowing the mixed land use while in class II, plots of above one hectare would be allowed for the mixed land use according to FAR norms, he added.

Cultural evening organised at NTPC Rihand

PIONEER NEWS SERVICE ■ VARANASI

On the occasion of Ganesh Utsav, a cultural evening was recently organised at Tarang auditorium, NTPC Rihand in Sonbhadra district. The programme was inaugurated by Vartika Mahila Mandal Samiti President Maya Singh, General Manager (Area) Alok Kumar, General Manager (E&M) Randhir Singh and Project Officer MK Lal along with Chief General Manager (Rihand) Sanjeev Kumar as the chief guest by lighting a lamp. Addressing the people present Sanjeev Kumar said a cultural evening has been organised for the people of Rihand on the holy festival of Ganesh Utsav. He said that

NTPC Rihand organises such cultural programmes several times a year to maintain work life balance of the employees. The cultural evening started with the Ganesh Vandana. After that Saregamapa fame artiste Aishwarya Pandit captivated everyone with her mesmerising voice and made everyone dance

with her melodious voice. The comedian who came to the programme made everyone laugh a lot with his jokes. Singer Aishwarya Pandit was welcomed and felicitated by project head (Rihand) Sanjeev Kumar and chairperson of Vartika committee Maya Singh by presenting a bouquet.

CSJMU convocation tomorrow

PIONEER NEWS SERVICE ■ KANPUR

Vice-Chancellor of the Chhatrapati Shahu Ji Maharaj University (CSJMU) Prof Vinay Pathak while addressing presspersons on Tuesday informed that the 38th convocation of the varsity will be held on September 28 in the Rani Laxmibai auditorium. He said the convocation will be presided over by Governor Anandi Ban Patel and the chief guest will be founding Honey Bee Padmashree Prof Anil Kumar Gupta and guest of honour will be UP Minister of Higher Education, Science and Technology, Electronics and Information Technology, Yogendra Upadhyay along with UP Minister of State for Higher Education Rajini Tiwari. Ten buildings will also be dedicated during the convocation. He said all the degrees which will be given to the students will be uploaded on the DigiLocker immediately. He said the varsity had decided to sign an MoU with Nepal Sanskrit University. He said the university had signed another MoU with IIT-K for internship. He said the varsity has won award for adopting 100 TB paediatric patients and

thus it had also decided to select another 100 such children soon. Informing about the convocation, he said a total of 98 medals will be given to the outstanding students of the varsity. He said this year the Chancellor's Gold Medal was being shared by two students. He said similarly two silver and two bronze medals will be given to the outstanding students. He said there were 29 Chancellor's bronze medals. Besides 12 Vice-Chancellor's Gold medal will be given to as many students. He said the sponsored Gold Medals totalled 53 this year. Prof Pathak said that this year a total of 23 PhD degrees will be conferred.

WORKSHOP: Napier grass is mainly used as a fodder crop. It is used as feed to the cattle directly or it can also be made as hay or even silage. Napier plant plays a major role in the production of biomass which referred to the increase in the amount of organic matter and was the addition of organic matter in a given area or population. Biomass was considered renewable energy because it replenished as plants and animals grew. Noted scientist of the Chandra Shekhar Azad University of

Agriculture and Technology, Dr Vinay Kumar while addressing the closing function of the seven-day workshop on "Fodder availability round the year" on Tuesday informed that green fodder was an economic source of nutrients for dairy animals. He said it was highly palatable and digestible and the microorganisms present in green fodder helped in improving digestibility of crop residues under mixed feeding system. He said it also helped in maintaining good health and improving breeding efficiency of animals. He said increased use of green fodder in the ration of animals may reduce cost of milk production. He emphasised on the need to reduce the gap between demand and availability of green fodder and said there was a need to improve green fodder yield through enhanced use of improved fodder seeds. He said green fodder is an economic source of nutrients for the dairy animals. Dr Kumar said the farmers need to follow recommended package of practices for fodder cultivation such as land preparation, timely sowing, fertiliser application, irrigation, weed and pest control.

World Pharmacists Day held in BLW

PIONEER NEWS SERVICE ■ VARANASI

The World Pharmacists Day was organised at Central Hospital in Banaras Locomotive Works (BLW) on Monday. The chief guest of the programme was Principal Chief Medical Officer (PCMO) Dr Devesh Kumar. Speaking on the occasion, Additional Chief Medical Superintendent Dr Sunil Kumar said that the contribution of pharmacists in the field of medical services is invaluable. Along with medicines, pharmacists take care of the patients with their love and pleasant behaviour, he added. Progress in works reviewed

CORRESPONDENT ■ MIRZAPUR

Divisional Commissioner Dr Muthukumarasamy B while reviewing the progress in construction works related to the medical college on Monday warned the working agency to remove the shortcomings in a proper way otherwise remain prepared to face the music. Principal Medical College Dr RB Kamal said most of the shortcomings which had come to notice during the last visit of the DC had been removed however for some more time of two-three months was needed. He said for the new construction at women hospital the old building was yet to be demolished and the work was to be started shortly. About further requirement the principal apprised that the correspondence was being done for more hostel rooms for students in view of the increasing strength of students and for nursing school the land was being searched. The DC directed the principal to ensure availability of facility like ICCU in the medical college and facilities should be enhanced as per the norms of the medical college. The working agencies were

directed to maintain quality. The meeting was conducted by Joint Development Commissioner Suresh Chandra Mishra and attended by working agencies along with the other officials concerned.

DIRECTIVE: District Magistrate Priyanka Niranjan while presiding over a meeting at the Collectorate on Monday appealed to the people to observe the birth anniversary of the Father of the Nation, Mahatma Gandhi and former Prime Minister, Lal Bahadur Shastri with enthusiasm. She said all the programmes scheduled for October 2 should be completed in a proper manner. The officials concerned were directed to make all arrangements in advance and ensure success at any cost. Additional District Magistrate (ADM/Finance and Revenue) Shiv Pratap Shukla said the 'prabhat pheri' of school students was to be taken out at 6 am singing Gandhi's favourite 'bhajan'. He said a marathon race was to be conducted by the sports officer for which the chief medical officer was directed to arrange an ambulance equipped with medical facilities. The DIOS was directed

to hold speech competition in a college and make arrangements to give prizes to the participants. As per the finalised programme the garlanding of Gandhi's statue at Gandhighat, Shaheed Udyan and BLJ Inter College was to be done at 8 am. On the day the responsibility for fruit distribution at the hospitals was given to the social organisations and businessmen. The Information department was asked to arrange an exhibition based on the life of Gandhi and Shastri. All EOs of nagar palika were directed to conduct a special sanitation drive in slums on October 1. The programme will conclude with the cultural programme near the statue of Shastri at Ghanatghar on October 2 evening. The ADM said the flag hoisting of national flag was to be done at 8 am at all government offices on Monday. In it farmers demanded the release of irrigation water from the Ahraura and

Dongia dams. She appealed to farmers to sow crops like sesame and pulse which need less water. On other issues of farmers the DM assured to solve them on priority. The meeting was also attended by the ADM(F&R) Shiv Pratap Shukla, Joint Magistrate and sub-divisional magistrate (SDM) Chunar Navneet Sehra and other officials concerned, including deputy director, agriculture.

FUNCTION: Drug inspector Kumar Saumitra while addressing a function organised by the All India Pharmacist Association on World Pharmacists Day on Monday as the chief guest in opined that the role of a pharmacist was very significant. Addressing the gathering as guest of honour state secretary of the organisation Akhilesh Mishra exhorted the medical fraternity to follow ethics in the profession and abide by laws. The welcome speech was delivered by district president Chandresh Shukla while the vote of thanks was proposed by city president Deen Dayal Gupta. Among those present were Deen Dayal Vishwakarma, Umesh Bind, Balendra Pal and Ravi Gupta.

Fair a reflection of PM’s commitment to give priority to job generation: Anupriya

PIONEER NEWS SERVICE ■ VARANASI

A Union Minister of State for Commerce and Industry Anupriya Patel said the job fair is a reflection of the commitment of the Prime Minister Narendra Modi to give top priority to employment generation and act as a catalyst for further employment generation for the unemployed youth. She was speaking at a function held at Shatabdi Krishi Prekshagriha in Banaras Hindu University (BHU) organised under the auspices of the Postal Department here on Tuesday in which the PM gave more than 51,000 appointment letters to the newly-appointed youths in government departments in the employment fair organised at 46 places in the country, including Varanasi through video conferencing.

Anupriya handed over appointment letters to the newly-appointed candidates and wished them a happy future. During the ceremony in Varanasi, appointment letters were given to 213 candidates, out of which a total of 49 are women candidates who were selected for various posts like

Union Minister Anupriya Patel giving away an appointment letter to a candidate in Varanasi on Tuesday.

principals in Kendriya Vidyalayas, postal assistants in Postal department, branch postmasters, assistant branch postmasters, bank clerks, assistants in Food Corporation of India and others. She expressed her gratitude to the PM. She said that it was a step in the direction of the PM's resolve to provide government jobs to 10 lakh youth by December 2023 which will be fulfilled. Under the leadership of the illustrious

PM, she said that the country is reaching new heights every day and the youth are getting various employment opportunities with quick speed and transparency, who are being given the opportunity to serve the nation through various government departments and participate in the national development. Referring to women empowerment, she said that today women are hoisting their flag in every field. Many

women have also got new opportunities through the employment fair, she added.

Postmaster General (PMG) of Varanasi Region Krishna Kumar Yadav said in his address that due to the visionary thinking and inspiration of the PM in the Azadi Ka Amrit Mahotsav, the appointment letter received on the occasion of this employment fair is not just a paper or document, but this is a golden opportunity to take a pledge to serve the country throughout one's life. People have great expectations from the youth as the future of the country, he added. On the occasion the PM, through video conferencing, called upon the newly-appointed people to play a direct role in the ongoing Mahayagya of development and major changes in the country and to fulfil their responsibilities in the next 25 years along with the resolutions of a developed India. "The biggest responsibility of implementing the schemes of the Central government lies on all the newly-appointed government employees. When millions of youth like you join government services, the speed

and scale of implementing policies also increases. This creates employment opportunities outside the government also," the PM added. The local function was inaugurated by Anupriya Patel, along with Rohania MLA Dr Sunil Patel, PMG KK Yadav and Registrar of IIT (BHU) Rajan Srivastava, by lighting the lamp. Along with the Postal department, newly-appointed young candidates from Food Corporation of India, Central Public Works Department, Education department, IIT, Kendriya Vidyalaya, Union Bank, Bank of India etc participated to whom the PM addressed through video conferencing. The programme was also attended by Senior Postal Superintendent Rajan, Postal Superintendent Vinay Kumar, Hemant Kumar, Parmanand, PK Pathak, Assistant Director Brijesh Sharma, RK Chauhan, Marutnandan, Plaban Naskar, Dilip Singh, Shrikant Pal, Dilip Pandey, Santoshi Rai and others from various central departments were present. Officers, employees and public representatives also participated in the event.

NTPC Vindhyachal honoured with awards

PIONEER NEWS SERVICE ■ VARANASI

Under the 13th Public Relations Council of India (PRCI) Award, 2023, NTPC Vindhyachal, the nation's largest power plant, has been awarded excellence in the field of public relations on the occasion of the two-day 17th Global Communication Conclave organised by the PRCI in Delhi recently. NTPC Vindhyachal was awarded with three gold awards, one silver and four bronze. These awards were received by it for excellence in various fields like Health Care Communication, Story Telling, Art Culture and Support Campaign, Music Video, Motivational Film, Radio, Corporate Video and Table Calendar for the Year Award etc. These awards were received by Shiksha Gupta, Executive (Corporate Communication), NTPC-Vindhyachal. The representatives of more than 200 establishments related to communication, advertising, corporate social responsibility and various forms of mass communication from India and abroad participated in this event. Apart from NTPC-Vindhyachal, many projects of NTPC Limited also received

NTPC Vindhyachal representative receiving award at Global Conclave in New Delhi recently.

awards in various categories. For this NTPC Limited was also awarded the Corporate Champion Trophy for winning the maximum number of awards in every field during this awards ceremony.

In the presence of general managers, heads of departments and other senior officers of the project, Executive (Corporate Communication) Shiksha Gupta handed over this award to Project Head (Vindhyachal) E Satya Phani Kumar under the leadership of General Manager (Human Resources) Prabir Kumar Biswas. Project Head

(Vindhyachal) E Satya Phani Kumar, while congratulating the team of Corporate Social Responsibility (CSR) on these awards received by the project at the national level, said that with the dedication and unity of Team Vindhyachal, the project is achieving new heights every day and this award is our golden electricity will serve as another jewel in the journey.

He also said that he not only hopes but has full confidence that Team Vindhyachal would continue this practice in future also and would take the brand image of NTPC to greater heights.

Govt gears up for third campaign against communicable diseases

PIONEER NEWS SERVICE ■ VARANASI

The Yogi government has geared up for the third campaign to control communicable diseases. The Health department is taking effective steps to prevent communicable diseases in Varanasi by coordinating with 10 departments. Anti-larva spraying and fogging campaigns are being conducted in rural and urban areas. Beds have been reserved in hospitals along with a massive testing campaign. Public awareness drives are also being run for prevention and treatment of communicable diseases. The first and second campaigns for mass communicable diseases were conducted in April and July last and now the third phase is going to start from October. The Health department has been made the nodal department for coordination with other 10 departments for prevention and control of meningitis and other vector-borne and water-borne diseases. Chief Medical Officer (CMO) Dr Sandeep Chaudhary said there are 6,600 cleaning workers in the Municipal Corporation area apart from 175 workers for anti-larva spray, 41 spraying and 77 fogging machines. There are 371 personnel for drainage cleaning and 175 larvicide pumps. In gram panchayats too, 1,247 sanitation workers, 712 larvicide pumps and fogging machines are being used in 694 gram panchayats for prevention of communicable diseases. The CMO said for patients of communicable diseases, five beds at each Community Health Centre (CHC), two beds at Primary

224 dengue patients detected in Varanasi

PIONEER NEWS SERVICE ■ VARANASI

Chief Medical Officer Dr Sandeep Chaudhary said that 224 dengue patients have been confirmed in the last few days in which preventive actions like anti-larva spray, fogging, larva source destruction have been taken against all the patients. He said anti-larva spraying and fogging work is being done continuously by the Municipal Corporation and Health department in 70 hot spots (urban) and 62 rural hot spots of the district. So far 97,417 houses have been surveyed. A total of 2,52,937 breeding sites were examined in which 20,282 sources were destroyed. A total of 331 houses were found to be larva positive and notices were given to 546 persons when mosquito-borne conditions were found. Anti-larva spraying has been done at a total of 11,425 sites, he

said. According to the CMO, an action plan is ready for fogging and spraying in all schools of the district. "Spraying work is being done in schools every Sunday.

For publicity, information and audio visuals about 'what to do, what not to do' are being broadcast through 55 public address (PA) systems of the city. Besides, 20 message display boards are operated by the Municipal Corporation at various places in the city. Adequate beds and testing facilities are available in government hospitals. Five beds at each community health centre and two at each primary health centre have been reserved. A total of 39 breeding checkers visited door to door in hot spot localities. Lava checking work is also being done. The facility of blood and platelets is available in a total of seven government and 12 private blood banks," he said.

Health Centre (PHC), 100 beds at Pt Deendayal Upadhyay (DDU) Hospital, 50 beds at Sir Sundar Hospital (SSH) in Banaras Hindu University (BHU) and 50 beds at Lal Bahadur Shastri (LBS) Hospital Ramnagar have been reserved.

District Malaria Officer (DMO) Sharat Chandra Pandey said that ASHA and Anganwadi workers, skilled in rapid diagnostic tests, are monitoring and testing fever from door to door, and rapid

response teams (RRTs) are deployed at all CHCs and PHCs.

Besides Fever desk has been created. Thirty-nine larva detection squads are also active on behalf of DUDA, which are going door to door and checking their coolers, water tanks and places where water is collected, on the information of which immediate action is being taken. Special attention is being paid to fogging on 70 hot spots in urban areas and 62

hot spots in rural areas.

A special campaign is being run by the Municipal Corporation for cleanliness, garbage disposal and preventing water logging. Panchayati Raj Rural Development department has to do all the work for prevention of communicable diseases, including cleanliness and fogging along with public relations and public awareness. Animal Husbandry department is responsible for many works like cleanliness of animal enclosures, garbage disposal, arranging vector control and serosurveillance at pig rearing sites, spraying pesticides etc.

For the prevention of communicable diseases, apart from the Health department, all the departments like Urban Development, Panchayati Raj, Rural Development, Animal Husbandry department, Education department, Disabled Empowerment, Agriculture and Irrigation will have to do their department related work. Along with ASHA and Anganwadi workers, the role of ANMs will also be important. The Education department has also been given important responsibility in which the aim is to create awareness among the parents, create posters, debate competitions and spread publicity related to prevention of meningitis and other vector borne and water borne diseases. The Agriculture and Irrigation department has been given the responsibility of giving its advice on alternative measures to stop the breeding of mosquitoes in frozen water and the Irrigation department, growing anti-mosquito plants, suggest-

ing effective and safe measures for rodent control in the fields, etc.

BID TO STRENGTHEN HEALTH FACILITIES: To strengthen the health facilities of the district, the first delivery through operation took place at the Urban Community Health Centre in Sarnath. After cesarean delivery of a high-risk pregnant woman, both mother and child are healthy. CMO Dr Sandeep Chaudhary said special efforts are being made to strengthen health facilities in the district and in this sequence the work of OPD services and admission and treatment of patients was started at the health centre in Sarnath.

The Sarnath health centre will be very useful for the citizens of the area. Now they will not have to go far for maternal and child health check-up and delivery, he said and informed that with normal delivery the facility of cesarean delivery has also been made available here.

The operation was conducted under the supervision of anaesthesia specialist Dr Nikunj Kumar Verma, gynaecologist Dr Archana Verma and Dr Abhimanyu Singh and staff nurses Amrita Dwivedi and Aman Rai. Medical Superintendent of CHC Sarnath Dr Abhimanyu Singh informed that a pregnant woman from the area was admitted here due to labour pain. She was in a high-risk pregnancy.

Therefore, the operation was conducted late on Sunday night and the delivery was done safely. The mother and child are healthy after the operation, he added.

BJP to focus on booth management

PIONEER NEWS SERVICE ■ PRAYAGRAJ

Ahead of Lok Sabha polls, the BJP will focus on booth management particularly on those booths that have not been the party's strongholds. Hoping to retain both the parliamentary seats – Allahabad and Phulpur – senior leaders have asked workers to strengthen all booths at grassroots level. "We will focus on micro-management at all booths. Besides, emphasis will also be on mobilisation of voters of all communities that have not been party's traditional supporters," a senior party leader said. They claimed that in the next LS polls Congress will be wiped out and Prime Minister Narendra Modi will bag a third term. Moreover, the half population of the country – matra shakti – are also set to give blessings to the Prime Minister after the Nari Shakti Vandan Adhiniyam was passed in Parliament.

INSPECTED: In a bid to increase tourism in Sangam city, Mela Officer (Kumbh Mela) Vijay Kiran Anand inspected proposed sites for digital museum and tent city. There are plans to develop tourist circuit in city. Mela authorities are making efforts to set up digital museum and tent city to exhibit the glamour of Kumbh. The tent city will have permanent 50 tents. Devotees and pilgrims apart from Sangam, Akshay Vat, Hanuman temple, Patalpur, will also visit digital museum while staying in tent city. Mela authorities are making efforts to develop recreation activities (water sports), food walk, and one circuit to connect all prominent temples of the city and Triveni Pushp.

Campaign to check food supply at stations, trains

PIONEER NEWS SERVICE ■ VARANASI

For the second continuous day drive for checking clean food supply at different stations and trains continued on Monday by Varanasi Division of North Eastern Railway (NER) under the ongoing eighth 'Swachhata Pakhwada' (Cleanliness Fortnight) being run on the theme of 'Swachhta Hi Seva' from September 16 to October 2. A thorough inspection of the cleanliness of the catering facilities available at different stations and in the pantry cars of the trains was done under the guidance of designated officers. These officers, nominated by Divisional Railway Manager (DRM) Vineet Kumar Srivastava, inspected mobile vendors in many trains including Pawan Express at Banaras station, Dadar Express at Varanasi City station, Up and Down Vaishali Superfast

Express at Chhapra Junction, pantry cars of Tapti-Ganga Express at Azamgarh station, Lichchavi Express at Mau station, Lokmanya Tilak-Gorakhpur Superfast Express and Down Sabdhavna Express at Ballia station etc. The catering stalls at the stations of NER were also inspected by senior railway officials. During this period the quality of food and beverages available at Jan Aahar, canteens, food stalls, food plazas and local vendors at Banaras, Varanasi City, Ballia, Ghazipur City, Azamgarh, Mau, Bhatni, Siwan and Chhapra stations of the division was monitored by leaders on the instructions of Senior Divisional Mechanical Engineer (EnHM) Apoorva Swarnkar. By taking out cleanliness rallies at the said stations, the scouts and guides made the people and passengers aware of the cleanliness by staging street plays on cleanliness.

FLY programme concludes

PIONEER NEWS SERVICE ■ VARANASI

The last day of FLY (Finding the Leader in You) programme was successfully organised at the Institute of Management Studies, Banaras Hindu University (IM-BHU) on Monday. The concluding session was taken by Usha Oja of Competitiveness Mindset Institute, New Delhi. The session continued with a talk on perseverance and the speaker addressed the audience with a very motivational quote saying 'the best way to motivate you is to reward yourself'. Taking the session forward, a group activity was conducted where one had to think of a top level goal and reward each other after achieving any achievement. The

speaker informed the audience about ways to overcome failures while achieving the goal, which can happen through analysis. Getting more and more learning opportunities, taking advice from others and thus solving the problems that come your way is the right way to continue moving forward. This four-day programme was organised under the 'Student Leadership and Life Skills Initiative'. The programme has been organised under the initiative taken by the Vice Chancellor Prof Sudhir Kumar Jain. Under this initiative, leadership abilities and life skills will be developed in the students. Dr Anindita Chakraborty, Assistant Professor, IM-BHU was the coordinator of the programme.

Workshop on IP protection, promotion of innovations

PIONEER NEWS SERVICE ■ VARANASI

Professor Unnat P Pandit, Controller General of Patents, Design and Trademarks (CGPDTM), Department of Industrial Policy and Promotion (DIPP), Ministry of Commerce and Industry, Government of India, has emphasised on the need of doing invention which is relevant to the needs of the society and exhorted the faculty members and research scholars of the Banaras Hindu University (BHU) to keep in mind the purpose for which they are acquiring knowledge. He was delivering inaugural speech in a day-long workshop organised by the Intellectual Property Rights and Technology Transfer (IPRTT) Cell of BHU on Monday. It is learnt that with an aim to promote a vibrant ecosystem on campus facilitating IP filing and promotion of IP awareness, an Intellectual Property Rights (IPR) and Technology Transfer (TT) cell was established in BHU under the Coordinatorship of Professor BK Sarma. The objective of

A speaker expressing his views in a session of day-long workshop organised by the Intellectual Property Rights and Technology Transfer (IPRTT) Cell of BHU.

organising the workshop was to create awareness and offer hand-holding support to inventors of the university in every aspect of intellectual property (IP) protection and promotion of innovations. The workshop was divided into five sessions including three technical sessions. The workshop was attended by 222 participants. The officers of the university and various deans and directors also attended the sessions.

Professor VK Shukla, Rector, BHU, presided over the inaugural session. The first technical session was addressed by Dr Yashwant Dev Panwar, head, Patent Facilitation Centre, TIFAC. He spoke on IPR protection and its necessity and explained all forms of IP and the criteria for the protection. He emphasised that industry and academia have conflicting values but there is a common interest to bridge

the gap which is the commercialisation of technologies. Sudarshan Singh Shekhawat, Patent Attorney, addressed the second technical session on facilitating and maintenance and emphasised the culture of confidentiality while doing research. The third session was addressed by Dr Suresh, Manager, Gujarat State Fertilisers and Chemicals who spoke on the technology transfer of IP-protected technologies. Prof RN Kharwar, Prof RK Murali and Prof Gopal Nath moderated the different technical sessions. Dr RK Singh, Dr Alok Kumar and Dr Priya Ranjan Kumar were the rapporteurs of different sessions.

According to the coordinator of IPRTT Cell of BHU Prof Birinchi Kumar Sarma, the workshop has created a mass enthusiasm among the faculty members and researchers regarding the need of protection of Intellectual Property and promoting innovations in the university. He said it is very much likely that much more filing of patents will take place from the uni-

versity in near future. According to him, patent filing is not only important for protection of intellectual property of the inventions but also helps in global ranking of the academic institutions. Dr Rajnish Kumar Singh, co-convenor of the workshop presented the report of the workshop and said that more than 222 participants both faculty members and research scholars of the university participated in the workshop and interacted with the experts. The participants were from almost all disciplines of science, agriculture, arts, commerce, law, medicine, ayurveda, performing and visual arts, education, etc. of the university.

In the final session Prof Arun Kumar Singh, Registrar, BHU was the chief guest and he gave the genesis of the IPR Cell and talked about the support university is providing to the cell. In his address he also talked about the feedback given by the participants and promised that the university will provide necessary support to the cell as per the need.

Training imparted to farmers

PIONEER NEWS SERVICE ■ PRAYAGRAJ

The College of Forestry, Sam Higginbottom University of Agriculture, Technology and Sciences (SHUATS), organised one-day farmers' training programme on chironji tree cultivation on Tuesday to create mass awareness about the characteristics and benefits of the wonder tree called 'chironji' which will ensure high income to farmers. The training programme was organised under the auspices of project sponsored by Uttar Pradesh Council of Agricultural Research (UPCAR), Lucknow, entitled "Buchanania lanzan Spreng.) through selection from existing germplasm resources". Prof Antony Joseph Raj, Pro Vice-Chancellor, SHUATS and Dean of College of Forestry said that commercially the chironji tree is known for edible kernels which fetches about Rs 600-2,000 per kilogram in the local market. He informed the farmers that the chironji seed kernel contains about 52 per cent oil and used as a substitute

for olive and almond oils in both confectionery and indigenous medicine. Prof Antony reported that almost all parts of this plant have medicinal value for the treatment of various disorders. Beside preparation of sweet dish 'chironji ki barfi', bark and juice extracts of stem is used for treatment of diarrhoea and dysentery. Prof Antony informed that chironji nuts has very good demand in local as well as international markets and thus, making chironji tree an important economic crop. He encouraged farmers of Uttar Pradesh to integrate this chironji tree in farmlands in the form of agro-forestry. Dr Harsh Bodh Palwal, Assistant Professor of College of Forestry welcomed the dignitaries, farmers, students and participants of the training programme. Associate Professor and head Dr Neelam Khare proposed the vote of thanks. Dr Hemant Kumar, Assistant Professor of College of Forestry imparted training to farmers on the topic 'Multiple Utility of Chironji Tree and Plantation Management'. Anup Kujur, Young Professional

working in UPCAR's Chironji project gave training to farmers on the topic "Introduction of chironji tree and its cultivation". On the occasion chironji tree seedlings were presented to all the farmers by the chief guest and other dignitaries. Field visit to chironji nursery was conducted for farmers for practical training on chironji seedling production, planting techniques, plantation management etc. The organising committee members present were Dr Abhishek James (Associate Dean, College of Forestry), Dr Neelam Khare (Head of Forest Products), Dr Hemant Kumar, Dr Harsh Bodh Palwal, Anup Kujur, Satish Kumar, Sanjeet Kumar, Clint Sones and Sanjay Kumar.

PROTEST: Panic gripped Soraon and adjoining areas under the limits of Soraon police station when scores of locals blocked vehicular movement on busy Prayagraj-Pratapgarh highway, to mark their protest against allegedly thrashing of a youth who was detained by police in connection with a girl eloping incident.

Women cricket team's maiden gold in the Asian Games final is a fine achievement

India has won its first gold medal at the ongoing Asian Games in Hangzhou, China, thanks to India's women cricket team. In a display of unwavering determination, unrelenting spirit and unmatched skill, the women's cricket team secured a historic victory in the Asian Games cricket final. The nation watched in awe as our talented cricketers etched their names in the annals of sports history with an exemplary performance. Indian women's cricket team won their maiden gold medal in the Asian Games 2023 by defeating Sri Lanka by 19 runs after successfully defending their 116 runs on the board. It was a low-scoring match. On a difficult pitch, Titas Sadhu was undoubtedly the star as she bowled a devastating first spell, taking three wickets for six runs, and played a major role in restricting Sri Lanka to 97 for eight in 20 overs. It is not all. There was more good news for India from Hangzhou as India's 10m air rifle team shattered world record to win gold medal.

Aishwary Pratap Singh Tomar won an individual bronze after teaming up with Rudranksh Patil and Divyansh Singh Panwar for the gold medal. India's 25m rapid fire pistol team also won bronze. This is nothing short of a dream run for Indian squad. But it was the women's cricket team that stole hearts. It has been overshadowed by men's cricket for decades now, getting a fraction of the allowances and perks that their male counterparts get. But that should soon change and sponsors are likely to make a beeline to sponsor their events after their emphatic and historic win. The Asian Games victory marks a significant milestone for women's

cricket in India. It not only highlights the incredible talent of our sportspersons but also serves as an inspiration for the generations to come.

The Indian women's cricket team has been steadily rising in stature, captivating the hearts of cricket fans across the country. Their victory in the Asian Games final is a testament to the hard work and dedication that these remarkable athletes put into their craft. From fierce batting to exceptional bowling, every aspect of their game has shone brightly on the international stage. The emergence of women's cricket leagues, greater media coverage and increased investment in infrastructure are all signs of a brighter future for the sport in India. The Indian women's team's triumph in the Asian Games cricket final is a cause for nationwide celebration. These incredible sportspersons have not only showcased their cricketing prowess but have also laid the foundation for a brighter future for women's cricket in India. As we celebrate this historic win, let us remember that it is not just a victory on the cricket field but a triumph of 'nari shakti.' The Indian squad has shown what can be achieved with talent and unwavering determination. Let these wins be a harbinger of more success for sportspersons—a true Amritkal for sports.

Hypertension is a global health challenge

Hypertension affects individuals from all backgrounds and its consequences can be dire

In a significant revelation during the 78th Session of the United Nations General Assembly, the World Health Organization (WHO) presented its inaugural report on the worldwide impact of high blood pressure, delivering a poignant message – nearly 80% of individuals suffering from hypertension are not receiving adequate treatment. This revelation, however, comes with a ray of hope. If countries can expand their healthcare coverage, an estimated 76 million lives could be saved between 2023 and 2050. In India alone, taking proactive measures to control blood pressure among half of its hypertensive population could prevent at least 4.6 million deaths by 2040. It is bewildering that preventable deaths persist due to untreated hypertension despite advancements in healthcare and infrastructure. The number of people living with hypertension has doubled from 650 million in 1990 to 1.3 billion in 2019 globally.

In India, a staggering 188.3 million people, constituting 31% of the population, grapple with this condition.

Hypertension, also known as high blood pressure, is marked by elevated blood pressure in the arteries, typically diagnosed when readings consistently reach or exceed 140/90 mm Hg. A misconception persists, particularly in socioeconomically disadvantaged societies, that hypertension is an ailment reserved for the affluent. However, WHO's report dispels this myth, revealing that over three-quarters of adults with hypertension live in low and middle-income countries.

Paradoxically, diagnosis and treatment rates are abysmally low in these regions, leading to a high mortality rate. While age is an uncontrollable risk factor, various modifiable factors, such as a high-salt diet, physical inactivity, tobacco use and

excessive alcohol consumption contribute to hypertension. Tobacco usage triggers 28% of cases in India, while physical inactivity accounts for 34%. Efforts to combat this pressing issue have been made, but much more needs to be done. The India Hypertension Control Initiative (IHCI) launched by the Ministry of Health and Family Welfare aims to tackle this growing problem. WHO acknowledges that IHCI made significant strides in ensuring healthcare facilities had adequate protocol medicines and minimal stock-outs by 2020. WHO underscores the importance of prevention, early detection and effective management of hypertension as the most cost-effective healthcare interventions.

Lifestyle adjustments like physical activity, proper sleep and reduced exposure to pollution can aid in prevention. Regular check-ups are crucial for early detection and the report emphasizes five components for effective hypertension care: protocols, medication and equipment supply, patient-centered services, team-based care and informa-

tion systems. WHO Director-General, Tedros Adhanom Ghebreyesus, points out that "Hypertension can be controlled effectively with simple, low-cost medication regimens and yet only about one in five people with hypertension have controlled it."

This state of affairs must change for a safer and healthier future. The revelation that hypertension, a highly manageable condition, continues to claim millions of lives worldwide in an era of medical advancements and improved healthcare access is astonishing and disheartening.

WHO's report serves as a clarion call to governments, healthcare providers and individuals alike. One of the key takeaways from the report is the need for greater awareness. Public health campaigns and educational programs must be intensified to reach every stratum of society. People must understand that hypertension affects individuals from all backgrounds and its consequences can be dire.

Indian space industry at the inflection point

Indian space industry must be given a fillip to make the country future-ready for space. It will be good, both for India's standing and its economy

India's space programme has come a long way and has catapulted India to the world stage. Space technology ushers in possibilities for the future which are huge and varied, and some of these possibilities are yet to be explored. Few would understand that India's success in space technology enhances possibilities of trade and the earning of foreign exchange by providing services that are intrinsic to excellence in this domain. The private players have started playing an important role in bringing it to a level where it can be the leverage India requires for setting a benchmark for the world.

Certain joint endeavours by private and public players have given rise to exceptional dividends in the last year. The successful launch of 72 satellites by OneWeb through ISRO has boosted the broadband internet services in the country. The Indian National Space Promotion and Authorisation Centre (IN-SPACe) has worked to enable and facilitate the participation of private players in the space domain. The Indian Space Association, set up for the collaborative development of the private space industry in India facilitated the launch of India's first private rocket by Skyroot Aerospace and the establishment of the Mission Control Centre by Agnikul Cosmos. The launch of the world's first commercial Space Weather Monitoring System by Digantra, the launch by ISRO of Anand hyperspectral satellite of Pixal, and the collaborative effort of L&T and HAL to improve the efficiency of Polar Satellite Launch Vehicle are some of the giant leaps in space technology that will help India to bring in a lot of foreign exchange in the days to come. ISRO, through its commercial arms, has already earned

\$279 million in foreign exchange by launching satellites for global clients, but this is just the tip of the iceberg. According to the Director General of the Indian Space Association, the launch of the Shakti constellation by Pixal has bolstered India's Earth observation capabilities and will help in agriculture, disaster management, and envi-

ronmental monitoring. The launch of commercial satellites by India of friendly foreign countries is sure to boost India's clout, not only as a regional player in Asia but also globally. This collaborative effort of the private and public sectors is bound to give dividends economically and also usher in prosperity amongst humanity in general.

Can the space program help humanity? Is it the bird's eye view we have been talking about for almost all the humanitarian challenges that exist? Let's face it, humanity faces challenges of resources, and among them, energy is one of the most critical. So can space exploration in the long run help humanity to solve the crisis of a resource crunch, including that of energy? The possibility for the same is huge, and so is the possibility of Indian Industry making it big in the decades to come. It is estimated that thousands of satellites would be required to be sent into space if the requirement of humanity is to be met. Over 100 satellites have been launched solely for monitoring the Earth's atmosphere.

Helium-3 is one moon resource that could potentially be cheaper to mine from the moon. Helium-3 is a very attractive fuel for future

“
HELIUM-3 IS ONE MOON RESOURCE THAT COULD POTENTIALLY BE CHEAPER TO MINE FROM THE MOON. HELIUM-3 IS A VERY ATTRACTIVE FUEL FOR FUTURE NUCLEAR FUSION REACTORS

nuclear fusion reactors. If this becomes possible in the future it could solve a lot of clean energy-related issues that humanity faces today. It could also unlock a lot of economic value for the Indian Space Industry in the future. Lunar resources could also be used to help build up an industrial infrastructure in near-Earth space in the future. Satellites provide accurate weather reports which also help to track increasing rates of climate change and its effects, such as rising seas, moisture levels, and incidents of floods, wildfires, and atmospheric changes; helping us stop deforestation. Satellites cover the entire globe enabling high-capacity connectivity over wide & hard-to-reach areas including deserts, mountain ranges, islands, rainforests, or wetlands. Around fifty per cent of illegal mining activities can be monitored from space only. Ninety-nine per cent of weather forecasts can be from space alone. Space technology provides information regarding water and food production, precision irrigation and farming techniques. The direct economic impact of the sector is important, but it is the indirect impact that highlights how critical space is going to be for our life on

Earth. The UN has been urging for use of space technology to attain sustainable development goals.

The private sector and public sector milieu in the Indian context are best suited to exploit these opportunities in the future. Private players that are into satellite communication, GPS technology, surveillance, and disaster management are likely to benefit most from advancements in space technology. The Indian Space Industry would also be required to collaborate and work towards the transfer of technology with players in countries like the United States and France to enhance the scope of their achievements in space. The calmness and maturity of the public sector, along with the dynamism and initiative of the private sector, when invested in the development of space technology can for sure help in solving some of the challenges confronting humanity today. We are at an inflection point from where the Indian Space Industry is only destined to go up, and this is going to increase India's clout in the international community many fold.

LETTERS TO THE EDITOR

WINNING IS A HABIT

Sir — The game of cricket is a team sport where performance is the key. The Indian women's cricket team secured a victory over Sri Lanka women by a margin of 19 runs, clinching the gold medal at the 2023 Asian Games. This marks India's second gold in Hangzhou. Rajeshwari Gayakwad bowled the final over, conceding only five runs while taking a crucial wicket. The Asian Games 2023 has proven to be a successful platform for the Indian cricket team. This victory represents India's second gold medal at the 2023 Asian Games. Harmanpreet Kaur, as the toss-winning captain, chose to bat first in the final. Opener Shefali Verma was the first to depart, with Sougandika Kumari claiming her wicket. Subsequently, Smriti Mandhana and Jemimah Rodrigues built a vital 73-run partnership to steer India back into contention. Winning is indeed a habit, and the women's team executed it splendidly. Congratulations to Team India.

WORLD TOURISM DAY

Sir — Tourism is known to provide a massive boost to a nation's economy. Responsibility on the part of travellers is key to sustaining tourism because travellers aware of their obligations towards maintaining the purity of a destination are godsenders for tourism. Sustainable tourism, movie tourism, medical and religious, and ecotourism—form the crux of tourism. In India, nearly six per cent of the GDP is accrued from tourism. It is also a large avenue for employment with as much as 25 million workers earning their livelihood from this sector.

In a country as diverse as India, it is a laborious task for the government to keep tourist places spic-and-span which is why the role of citizens in overseeing the orderliness of key places is so vital.

There are plenty of attractions in the country that can set the visitors' pulse racing. Good connectivity, adequate cleanliness and the so-called certainty factor

Vande Bharat: A game changer

With nine additional Vande Bharat trains put into service, the stations they traverse are set to undergo renovations, creating more job opportunities in catering, cleaning, and operational services, which will contribute to the cause. Vande Bharat is an innovation that has rev-

olutionized train travel. Many of us cherish the prospect of securing window seats to relish the scenic views. This project, a testament to our domestic capabilities, is an accomplishment for Indian Railways, which boasts a legacy spanning 170 years. It is indeed an engineering marvel.

The acceleration is exceptional, living up to its acclaim, with a nearly silent ride, except for the coaches with traction motors, which produce some noise. The team of officers at ICF, Chennai, has made the most of this opportunity, creating history. It stands as the largest coach manufacturing facility. Art plays a role in cleansing the soul, and this is exemplified by the presence of an art gallery within the factory. The leadership and passion of all involved have transformed our dreams into reality.

Akhilesh Krishnan | Mumbai

make a tourist place much sought after one. Needless to say, the role of local population has a far reaching impact in making this a reality. Some exquisite tourist centres centres are a far cry from what they were earlier.

Since it takes two to tango, the travellers have a huge task of keeping the attractions noise free and hygienic. Preventing the centres from deteriorating to mere structures, maintaining the liveliness of the places and ensuring no tourist is harassed are critical to preserve the name and fame of a place.

Ganapathi Bhat | Akola

ESCALATING COURT CASES

Sir — Delivering justice to the common people is a fundamental pillar of a democratic system. It is a right that citizens must have access to. However, we currently face a concerning situation in our country. The number of pending court cases has doubled in the last five years, with more than five crore cases awaiting resolution. This means that, on average, one case is pending for every three and a half people. Uttar Pradesh alone has over one crore pend-

ing cases.

The backlog is exacerbated by the fact that one-third of the judge positions in the country remain vacant. This shortage of judges, along with inadequate staff and resources, contributes to delays, especially in criminal cases. Uttar Pradesh, for instance, has nearly 98 lakh pending criminal cases. Maharashtra follows with 51 lakh pending cases.

Interestingly, the central government allocated over 54 crore rupees in the fiscal year 2022-2023 to handle these cases. Paradoxically, there are 61 lakh 57 thousand cases in court due to a lack of lawyers. Moreover, in many cases, plaintiffs and defendants fail to appear, accounting for 8 lakh 82 thousand such instances. Reducing the backlog of cases demands serious attention and action from the government. It is essential to ensure that the people receive timely justice.

CALLING GEN-NEXT: BE A CHANGE CATALYST

India has a sizable youth population and if they do not affect social change, who will?

RAJYOGI BRAHMAKUMAR NIKUNJ JI

Most of us are very much aware of the phenomenon known as the 'Generation Gap', which in simple language can be described as a 'wide difference in cultural norms between members of a younger generation and their elders.' It can also be described as a situation which occurs when older and younger people don't understand each other's point of view because of their different life experiences, opinions, habits and behaviour.' Though it is a very common issue, sometimes it becomes a very serious one. One thing that is universally recognised regarding the youth is that the youth, in general, have energy, stamina, strong will and zest for life. But certain other valuable characteristics of youth, which can be great tools for social transformation are not fully realised or utilised by society, and as a result of this, they get confused and disturbed. One such important personality trait of the youth is that they strongly aspire to do something new. They want change, not status quo. They are not tied down to the past and, instead, have an openness to accept new things. Hence it is easier for them to adapt to any kind of change in comparison to the older generation because they have the wish to learn new things.

Compared to this, the old generation has, no doubt, experience but most of their ideas have already been applied to situations in life and they may not now have any new concepts and adequate energy to work in real life. So, the old order has to change, giving place to new, as the saying goes, and, in this work of social transformation, youth- the new blood- have to play a vigorous role to usher in a new era. It has, therefore, rightly been said that if the youth are awakened, the whole world will get awakened because not only will the awakened youth themselves be a great achievement of their country but they will work, as leading lights, for the tender-aged children who, following their example, will prepare themselves mentally and physically for the dawn of new era.

But, have the potentialities of the youth been utilised for the work of national reconstruction so far? Have they been given the opportunities and guidance to fulfil their dreams of taking the world into a new era of peace and prosperity? Well! If we take into view the Indian situation, we can say, in general terms, that the youth are restless and disappointed because their abilities have not been provided with enough channels for self-expression and fulfilment. Today most of them have a complaint against society in general and against those who are in the seats of authority in particular.

They say that their energies- both mental and physical - are not being used in wider spheres of national development because the older generation denies them adequate participation, thinking that the youth are inexperienced and immature. Against this thinking, the youth argue that what the elders call "experience" and "maturity" is, in fact, a hindrance in breaking new grounds and what is required at present is new initiatives, new ideas adventures and innovativeness which is a characteristic that's mainly present in youth.

All would agree that to bridge the ever-widening gap of emotional estrangement between the older and the younger generations and to stop further erosion in values, whosoever may have been responsible for it until now, is to have such formal and informal educational centres and institutions which can inspire the youth to some higher principles and ideals and can fire their imagination with a new paradigm of society where there will be no violence and where all would live peacefully as loving members of the family of mankind. These institutions should have persons of ennobling character, pleasing manners, and loving demeanour who can awaken the potentialities of the youth for social reconstruction and can also bring change in the older generation and enable them to play a useful role in the work of nation-building.

A simplified tax regime can prevent tax evasion

An archaic and complicated tax system, with too many amendments, not only confuses the taxpayers but also leads to leakages and corruption

SUBHASH CHANDRA AGRAWAL

A complicated tax system in India with a six-decades-old Income Tax Act 1961 with too many amendments in the form of a lot of confusing patchwork is in force. Likewise, ever since the reformative step of introducing the Goods & Service Tax (GST) Act was introduced on 1st July 2017, there has been a regular practice of changing tax structure in an ever-confusing GST regime with too many confusing and complicated provisions incorporated in the system.

An altogether new tax regime should be introduced without patches of useless and largely misused exemptions. Implementation of Raja Chelliah Committee recommendations to fix the highest tax slab at 30 per cent to be in tune with most countries in the world, had largely abolished the practice of converting black money into white money. Gradually increasing this highest slab also through imposing cess and surcharges has undone the good achieved.

The highest tax slab of 30 per cent should be restored so that people may find it advantageous to bring complete income to books. Rather a permanent Voluntary Disclosure Scheme should be introduced whereby provision may be there in tax-return to declare at the highest suggested tax rate of 30 per cent, any income without disclosing the source of income. This will make cash transactions, especially in property deals accounted for if registration fees on the property are also reduced to say just three per cent. Names of all those disclosing incomes under the suggested highest 30-percent slab should be on the website according to income disclosed so that status-conscious persons may race to disclose more incomes.

Basic tax exemption should be fixed at rupees five lakhs abolishing most tax-exemptions including on charity, donation, contribution to political parties and even agricultural income which are largely misused. An ordinary farmer does not earn more than rupees five lakhs per annum, and the provision is grossly misused by ultra-rich persons including known celebrities to declare their unaccounted income as agricultural income through some village-land purchased only for the purpose without practically having any agricultural produce.

Income Tax slabs can then be 10 and 20 per cent for incomes between 5-10 lakhs and 10-15 lakhs respectively and thereafter 30 per cent for the rest. LK Jha committee recommendations to make the calendar year a financial year should be implemented to be in line with most countries of the world, thus abolishing another British legacy of following April-March presently as a Fiscal Year. It is ridiculous to have different depreciation rules for Tax and Corporate audits. There should be a single and unified Tax and Corporate Audit.

Rather than concentrating more on small cash transactions, all sale-purchases above rupees 10000 must be compulsorily through bank transactions. For this, transaction charges on credit cards should be slashed down to just half per cent (GST-exempted) which too to be borne by the central government with all incentives on purchases made through credit cards abolished. Present high two-percent transaction charges on credit cards make traders charge it separately from customers especially where trade margins are low. Such a system will fetch much higher tax revenue for the government, than through half-per

THE HIGHEST TAX SLAB OF 30 PER CENT SHOULD BE RESTORED SO THAT PEOPLE MAY FIND IT ADVANTAGEOUS TO BRING COMPLETE INCOME TO BOOKS

(The writer is an RTI consultant; views expressed are personal)

cent transaction-charges to be borne by the government.

Banks issuing credit cards will get much more earnings even with a half-per-cent transaction charge because of the manifold use of credit cards. Two sets of credit card machines should be compulsory for every GST-registered dealer dealing in cash to avoid payment receipt through credit cards with the usual excuse that the swapping machine is out of order. Strict action must be there against those refusing payment through credit/debit cards.

The input-tax-credit system in the GST-regime in manufacturing is the biggest corrupt practice of tax evasion where left-out GST invoices by ordinary customers are sold by traders to consuming manufacturers or producers to avail false Input-Tax-Credit where cash is paid back by traders to those purchasing left-out GST-invoices of actual consumers bringing more currency in circulation, this being the reason of basic motive of currency-demonetisation being failed where currency in circulation rapidly increased rather than projected decrease. An annual forensic audit may be made compulsory on claims made for Input-Tax-Credit by manufacturers/producers to avoid false claims of excessive input tax credit in these sectors. Rather study should be made if, with the abolition of an excessively high 18-percent GST slab, Input-Tax-Credit can be altogether abolished from manufacturing/producing sectors, retaining it only on tradable commodities.

But such reform in the Input-Tax-Credit system can be practically possible with drastic reform in the GST tax structure wherein initially only three tax slabs of 6, 12 and

30 per cent may be there abolishing all presently existing GST rates. India is the only country that has so many GST rates. Gradually even slabs of 6 and 12 percent may also be replaced by a new 10-percent tax structure. Zero-percent GST may only be retained on totally unbranded raw materials that cannot be consumed without giving a finishing touch like agricultural products, fish, meat, cotton yarn etc.

All items of long-term use like cars, air-conditioners, TV sets, refrigerators etc. may attract 30 per cent GST while their parts may uniformly attract 12 per cent GST. Unmindful policy framers brought clutch-plate and clutch-bearing under different GST slabs of 18 and 28 per cent. Likewise, similar items sold by confectioners like sweets, biscuits, napkins etc. attract different GST slabs with luxury sweets causing diabetes attracting just 5 per cent GST.

Invoices for items like gold jewellery can be drawn in two parts, one for metal and embodied items and the other for making charges so that the suggested 12-cent GST may be payable only on making charges. Cess on extra-luxurious items should be replaced by additional GST slabs in multiples of 60 per cent, also bringing petroleum products under the GST regime to ensure uniform pricing of petrol and diesel in all states. Abolishing an 18-percent GST slab will be more than compensated by clubbing lower slabs of 3 and 5 percent into a single 6-percent GST slab. The input-tax-credit (ITC) system should not apply to non-tradable commodities and services like has been done, and rightly too, in the case of car expenses for non-commercial use.

With the GST slab of 18 per cent abolished and the service sector attracting just 12 per cent GST, those with income of rupees ten lakhs or more (instead of the present rupees 20 lakhs) can be brought under the GST regime like was the system before the GST-regime. It is illogical to keep lawyers out of the purview of the GST regime. The useless system of Tax-Deducted-At-Source for GST, which is hardly used in practice, should be altogether abolished. Otherwise, any such deducted tax should be auto-reflected in the GST accounts of affected ones, abolishing the cumbersome practice of filing a new monthly return to get credit for deducted GST.

All government payments can be considered to be exempted from GST to avoid unnecessary government accounting by putting tax from one government pocket to another. It is illogical that some premium postal services like Speed Post may attract GST while other postal services do not attract GST. Even illogical postal rates (both inland and foreign) need simplification for the equal rise of postal tariff for the equal rise in slab-weight in multiples of 50 gms. of inland postal-article with all postal tariffs being in multiples of rupees ten except for registered newspapers and post-cards which may cost rupee one with the abolition of outdated Inland-Letter-Cards. Presently a postal-article weighing 200 gms sent locally by reliable and fast Speed Post costs just rupees 30 but if sent by unreliable ordinary post, it will cost rupees 50. Likewise, foreign-mail tariffs can be fixed for 20 gms or part slab-weight independently for air and sea-surface-mail.

Medical treatment facilities must be available in the campus

The provision of medical facilities within the university premises is an urgent requirement to address the health concerns faced by students from different states

It is indeed a pressing concern that students from different states face difficulties in accessing medical treatment facilities at the university. The lack of proper healthcare services can hurt their health, leading to various diseases. Students often have to rely on private hospitals, which may not be affordable for everyone. Additionally, the language barrier further exacerbates the problem, as students can be taken advantage of due to their lack of knowledge.

In light of these challenges, the university must prioritise the provision of adequate medical facilities within the campus itself. By establishing medical services on-site, students would have easier access to healthcare, promot-

SHIVANI SHARMA

NIMRAT KAUR

(The writers worked as Assistant Professors at SSD Girls' College, Bathinda; views expressed are personal)

ing their overall well-being. Having healthcare facilities within the university premises would not only benefit the students' physical health but also contribute to their peace of mind and academic performance.

Moreover, by addressing this issue, the university demonstrates its commitment to the students' welfare and creates an inclusive and supportive environment. It is essential to ensure that students' health needs are met, enabling them to focus on their studies and personal growth without the added burden of seeking medical care outside the campus.

By investing in proper medical facilities within the university, students will have convenient and affordable

access to healthcare. This step acknowledges the diverse needs of the student population and emphasises the value of their well-being. It is a significant initiative that promotes a healthy, thriving university community.

Students on university campuses, often encounter a slew of health-related chal-

lenges. One pressing issue is the accessibility of medical facilities on campus. It's no secret that university campuses can be vast and bustling, making it essential for students to have easy access to healthcare services.

One common challenge students face is the lack of convenient healthcare options.

Many campuses have limited medical facilities, or they may be located far away from student residences or academic buildings. This can pose difficulties, especially in emergencies or when students require immediate attention for illness or injuries.

Additionally, the availability of specialised healthcare services can be a concern. University students, come from diverse backgrounds with unique healthcare needs. Campuses need to offer a range of medical services to meet these diverse needs, including mental health support, reproductive health services, and specialised care for chronic conditions.

Another aspect to consider is the cost of healthcare. University students often face

financial strains, and the burden of medical expenses can further add to their challenges. Accessible medical facilities should take this into account by providing affordable or subsidised healthcare options, such as low-cost consultations, medication, and tests.

To bridge the healthcare gap, universities can take proactive steps. They can establish on-campus medical clinics or health centres with extended hours of operation to accommodate students' busy schedules. Moreover, partnerships with local hospitals or healthcare providers can enhance accessibility by providing specialised services or urgent care facilities.

Prioritising accessible medical facilities on university campuses is crucial to

ensure the well-being of students. By addressing the challenges and offering comprehensive, affordable, and conveniently located healthcare services, universities can support students in maintaining good health and thriving academically.

In conclusion, the provision of medical facilities within the university premises is an urgent requirement to address the health concerns faced by students from different states. This step will not only enhance their physical well-being but also contribute to their overall success and happiness during their time at university. Let us strive for a healthier and more inclusive academic environment where students' health is given the attention it rightfully deserves.

India-Canada row will not impact military ties: Peter

PIONEER NEWS SERVICE ■
NEW DELHI

The current diplomatic standoff between India and Canada is not going to impact the ongoing bilateral military engagement and the matter has to be resolved at the political level, Canada's Deputy Army Chief Major General Peter Scott said here on Tuesday.

Scott is leading a Canadian delegation at the Indo-Pacific Army Chiefs' Conference (IPACC) here that is being attended by military delegations from over 30 countries.

"To the best of my knowledge at this time, that is not going to have an impact on us. We leave the matter at hand to the political level to try and resolve," he told news agency PTL.

We are happy to be here and we do not see the issue clouding matters at this point

at all," Major General Scott said.

The ties between India and Canada came under severe strain following Canadian Prime Minister Justin Trudeau's allegations of a "potential" involvement of Indian agents in the killing of Khalistani separatist Hardeep Singh Nijjar in June.

India has rejected the allegations as "absurd" and "motivated" and expelled a senior Canadian diplomat in a tit-for-tat move to Ottawa's expulsion of an Indian official over the case.

"This is an issue between both our countries at a political level. And certainly our Prime Minister..."

"He rose at the House of Commons and made a statement requesting India's cooperation on the independent investigation that is currently ongoing at this time," the Canadian Army official said.

"Between both of our armies, this is not affecting us. I spoke to your commander of the Army (Army Chief Gen Manoj Pande) last night. We both agreed that this is a polit-

ical issue and has no interference on our relationship," he said.

"As two armies we look for opportunities among other 30 nations that are currently participating in this conference to find areas where we can cooperate, train together, conduct exercises and operations so that we all can contribute to ensuring peace, stability within the region," Major General Scott said.

"The way we see right now is that we will continue to cooperate, discuss, and enjoy great forums like this where we can exchange ideas and find solutions to the difficulties facing a lot of the Indo-Pacific nations," he said.

The Indian Army is hosting the two-day conclave of Indo-Pacific army chiefs to evolve a common strategy to ensure peace and stability in the Indo-Pacific region.

Passing of Women's Reservation Bill heralded new future for country: Modi

PNS ■ NEW DELHI

Prime Minister Narendra Modi said on Tuesday said that the passing of the Women's Reservation Bill in Parliament's new building during the Special Session has heralded a new future for the country and will give a big boost to 50 per cent population in the country..

Addressing a Rozgar Mela after distribution of appointment letters to over 51,000 new employees in different government departments through a virtual event, Modi also emphasised on growing use of technology in governance.

The use of technology in government schemes has stopped corruption and reduced complexities, and boosted credibility and comfort, he told the new employees.

He asked them to work with the motto of "citizens-first" and deploying technology to improve governance, citing its use in direct benefit transfers to beneficiaries of various schemes, booking of

train tickets and digital locker among other fields.

The prime minister said his government works with a new mindset based on constant monitoring, mission mode implementation and mass participation in government schemes with an aim of 100 per cent saturation and paving the way to accomplish monumental goals.

This is a time of historic decisions and achievements for the country, he said, while stressing that the women's reservation bill, passed by Parliament recently, will give a big boost to the country's 50 per cent population.

The issue, which was pending for 30 years, has been passed by record votes in both Lok Sabha and Rajya Sabha, he

said, noting that many of these new employees were not even born when the idea was first mooted.

The dreams of new India are big, he said, noting that girls are present in sectors ranging from space to sports and are being commissioned into the armed forces as well. He added the presence of women in any sector has always led to positive changes in every sector.

Asserting that the country will become the third-largest economy in the world in the next few years, Modi said government employees will have a lot to contribute in the process.

Projects across the country are being constantly monitored, Modi said, giving the example of Pragati meetings chaired by him.

Speaking about the GDP growth and the jump in production and exports, he said unprecedented investment in modern infrastructure is being made and fields like renewable energy, organic farming, defence and tourism are showing a new vibrancy, he said.

India's diplomacy scaled new heights in past 30 days: PM

PNS ■ NEW DELHI

Prime Minister Narendra Modi on Tuesday said India's diplomacy scaled "new heights" in the past 30 days asserting that some decisions taken during the G20 Summit have potential to change the direction the 21st century world takes.

Addressing students, faculty members and heads of educational institutions at the finale of the G20 University Connect here, the prime minister also touched upon the BRICS Summit that took place in South Africa before the G20 where six new nations were included as its members with India's efforts.

After South Africa, the Prime Minister mentioned traveling to Greece which was

the first visit by an Indian Prime Minister in four decades.

He also mentioned meeting several world leaders in Indonesia before the G20 Summit. Highlighting that numerous key decisions were taken for the betterment of the world at the same 'Bharat Mandapam', Modi underlined that finding a common ground

for all member nations on the same stage in a globally polarized atmosphere was a special achievement for the government.

"In today's polarised international atmosphere, it is not a small thing to get so many countries together on one platform," the Prime Minister said, referring to the G20 Summit in Delhi earlier this month.

Maintaining that India's diplomacy reached new heights in the past 30 days, the prime minister said the G20 Summit could have been limited to a diplomatic and Delhi-centric programme but India made it

a people-driven national movement. Six more countries have joined BRICS community due to India's efforts, the prime minister said.

"A 100 per cent consensus on the Delhi declaration made global headlines...Some decisions taken during the G20 Summit have potential to change the 21st century's direction..In today's polarised international atmosphere, it is not a small thing to get so many countries together on one platform," he said.

"I want to give you a report card of the last 30 days. That will give you an idea of the speed and scale of New India. You must remember August 23! Everyone was praying and then suddenly there was a smile on everyone's face. The entire world heard India's voice:

'India is on the Moon'.

"August 23 has become immortal in the country as the National Space Day. Soon after the success of its lunar mission, India launched its solar mission," he added.

Listing out the achievements of his government in the past 30 days, the prime minister said several initiatives were taken to empower the poor, SCs, STs, OBCs and the middle class.

"The government launched the PM Vishwakarma Yojana for artisans. In last 30 days, over one lakh youths have been given central government jobs through 'Rozgar Mela'. The women's reservation bill became the first bill passed in the new Parliament building and it filled the country with a sense of pride," he said.

FCRA rules amended, NGOs have to declare movable, immovable assets

PIONEER NEWS SERVICE ■
NEW DELHI

The Union Home Ministry has amended the Foreign Contribution (Regulation) Rules, 2011, asking NGOs receiving funds from abroad to submit details of their movable and immovable assets created out of those contributions.

According to the Ministry's notification issued Monday, a copy of which is with ThePrint, the NGOs will have to include the description and value of all movable assets, as on the beginning of the financial year, acquired during the financial year and disposed of during the financial year.

Details of their value according to the balance sheet

at the end of the financial year will also have to be given.

The new Rules also sought details of immovable assets, details including the land or building size, location and value will have to be included in Form FC-4 (annual return). "The new Rules are meant for transparency in the working of

NGOs and make them more accountable," said an official.

The FCRA licence of around 6,000 organisations, including Oxfam India Trust, ceased to exist from January 1, 2022, over "violations observed" in their functioning. Renewal request of Oxfam is rejected.

Apex court expresses dismay over delay in judges appointment

PIONEER NEWS SERVICE ■
NEW DELHI

With 70 Collegium recommendations still stuck with the Government, the Supreme Court on Tuesday expressed its dismay over the "delay" in the appointment of judges and asked the Attorney General to use his office to resolve the issue.

After a bench of justices Sanjay Kishan Kaul and Sudhanshu Dhulia raised the matter, AG R Venkataramani sought a week's time to come back with instructions on the pending recommendations for judges' appointment to the High Court.

"Today, I am quiet because the Attorney General has sought a very short time, next time I will not be quiet. Use your good office to see these issues are resolved," Justice Kaul told Venkataramani during the hearing.

The bench said, "There were 80 recommendations pending until last week when 10 names were cleared. Now, the figure is 70, of which 26 recommendations are of transfer of judges, seven are reiterations, nine are pending without being returned to the collegium and one case is of appointment of the Chief Justice to a sensitive High Court."

All these recommendations are pending since November last year, it said. Government has not cleared the appoint of Chief Justice of Manipur, where ethnic violence is not yet settled.

Justice Kaul said there is a seven-month hiatus since something substantial was done on the recommendations which are pending and these needed basic processing only.

"We have endeavoured to push things and monitor closely. I have told the attorney general that every 10-12 days this matter will be taken up, so that before I demit office (December 25), substantial work is done," said Justice Kaul, who is part of the apex court collegium which

looks after the appointment of judges in the top court and the High Courts.

The appointment of judges through the Collegium system has in the past become a major flashpoint between the Supreme Court and the Centre with the mechanism drawing criticism from different quarters.

The top court was hearing a petition filed by Advocates Association of Bengaluru seeking contempt action against the Union Ministry of Law and Justice for not allegedly adhering to the timeline set by the court in a 2021 judgment.

During the hearing, advocate Prashant Bhushan, appearing for another petitioner NGO Common Cause, submitted a chart related to pending recommendations with the Government.

He said what is more worrisome is that even after a batch of names is recommended by the collegium at one time, the government segregates it and makes selective appointments.

"This affects the morale of lawyers and as per my information, several of them have withdrawn their consents," he said. Justice Kaul, while agreeing with the views of Bhushan, said there are nine such names, where the government has kept the names pending without reverting them back.

"I agree that the way good candidates withdraw their consent to be a judge is really worrisome. We try to get the best talents but due to pendency, lawyers whose names have been recommended for judgeship have withdrawn their names," Justice Kaul said as he posted the matter for further hearing on October 9.

Rajnath calls for wisdom, concerted efforts to deal with complexities of Indo-Pacific

PIONEER NEWS SERVICE ■
NEW DELHI

As China is flexing its muscle in the strategically important Indo-Pacific, Defence Minister Rajnath Singh on Tuesday called for collective wisdom and concerted efforts to deal with the complexities of the region while tapping its full potential, to ensure a future marked by prosperity, security and inclusivity.

Making this assertion here while inaugurating the 13th Indo-Pacific Armies Chiefs' Conference (IPACC), he also said it is in consonance with the ancient Indian ethos of Vasudhaiva Kutumbakam (the world is one family) and the G-20 motto 'One Earth, One Family, One Future'.

Chief of Armies and delegates of 35 countries are participating in the three-day meet jointly organised by India and the US.

In his address, Army Chief Manoj Pande said India's outlook for Indo-Pacific emphasises respect for sovereignty and territorial integrity of all nations. He also said India's commitment towards positively engaging all stakeholders in the region has been unwavering and enduring.

Highlighting the geo-political significance and geo-economic weight of the Indo-Pacific nations, Pande said it is evident from the fact that the region accounts for 65 per cent of the world's population, 63 per cent of the global GDP and 50 per cent of the world's maritime trade. The Army chief said the region's share in the global GDP, its share in merchandise market and maritime trade lend this region a pivotal stature in charting the world's course in the 21st century.

Rajnath emphasised that the Indo-Pacific is no more a maritime construct, but a full-fledged geo-strategic construct, and the region is facing a complex web of security challenges, including boundary disputes and piracy.

He explained his vision for the region through a theoretical model by American author Stephen R Covey, which is based on two circles -- 'Circle of

Concern' and 'Circle of Influence'.

"There may be instances when the 'Circle of Concern' of different nations overlap with each other. International maritime trade routes passing through high seas, beyond the exclusive economic zones of any country, are relevant examples," he said.

"This can either result in conflict between nations or they can decide to coexist by mutually deciding the rules of engagement. The concept of these circles underscores the importance of strategic thinking and prioritisation," he added.

Rajnath pointed out that states must recognise that global issues involve multiple stakeholders and no one country can address these challenges in isolation. He stressed the need to engage with the broader international community and work collaboratively through diplomacy, international organisations and treaties to tackle common concerns within the overlapping 'Circles of Concern'.

Rajnath termed the United Nations Convention on the Law of the Sea (UNCLOS), 1982 as a good example of such an international agreement that establishes the legal framework for maritime activities and addresses the issues arising from overlapping circles of concern of different nations.

The Defence Minister termed the IPACC, Indo-Pacific Armies Management Seminar (IPAMS) and Senior Enlisted Leaders Forum (SELF) as one of the largest brainstorming events of land forces in the region. These events provide a unique opportunity to build common perspectives towards a shared vision and build and strengthen

partnerships in the spirit of collaborative security for all, he said.

He reiterated India's stand for a free, open, inclusive and rules-based Indo-Pacific Region in the pursuit of shared security and prosperity.

Rajnath added that India's efforts towards building robust military partnerships with friendly countries underscore its commitment to not only safeguard national interests, but also address global challenges faced by all.

The Indian Army and the United States Army are co-hosting 13th IPACC, 47th IPAMS and 9th SELF, a three-day conference of Chiefs of Armies and delegates of 35 countries in New Delhi from September 25 to 27.

The conference will provide an opportunity for Army Chiefs and senior-level leaders from land forces, primarily of the Indo-Pacific region, to exchange ideas and views on security and contemporary issues. The core effort of the forum will be to promote peace and stability in the Indo-Pacific region through mutual understanding, dialogue and friendship amongst the littoral partners. Army Chief Pande said India's vision for Indo-Pacific emphasises peaceful resolution of disputes, avoidance of use of force, and adherence to international laws, he said.

"While efforts by countries are converging towards a free Indo-Pacific, yet we are witnessing manifestations of interstate contestations and competitions," the Army chief added. He further noted that "challenges we face transcend across borders and our response to them must factor in this".

American delegation visited J&K as well for G20 meet: Garcetti

PIONEER NEWS SERVICE ■
NEW DELHI

In the backdrop of the US Envoy to Islamabad visiting Pakistan-occupied Kashmir (POK), US Ambassador to India Eric Garcetti on Tuesday said the American delegation has visited Jammu and Kashmir as well for G20 meetings.

Garcetti was reacting to questions on US Ambassador to Pakistan Donald Blome's six-day visit to POK last week. "It's not my place to react to the US Ambassador in Pakistan but he's been before and we obviously had part of our delegation in Jammu and Kashmir during G20 as well," the American envoy told reporters on the sidelines of the 20th Indo-US Economic Summit.

At the same time, Garcetti made it clear that the Jammu and Kashmir issue has to be resolved bilaterally by India and Pakistan and not by any third party, including the US.

"We'll stay engaged but this is an issue we very religiously know that has to be resolved between India and Pakistan not by any third party including the US," he said.

US Ambassador to Pakistan Blome visited the Gilgit-Baltistan region of PoK and interacted with the locals there, according to a Pakistani media report. Asked about the standing ovation given to a Nazi war veteran in the Canadian Parliament, Garcetti said: "I think everybody recognises the mistake."

He refused to comment on the US sharing intelligence on the killing of Khalistani extremist Hardeep Singh Nijjar. "It's not my place to speak on another country, Canada. As a matter of business not just this, we don't talk about intelligence or criminal justice matters," Garcetti said.

Desi components behind ISRO feat, says Somanath

PTI ■ NEW DELHI

About 95 per cent of components used in rockets in the country have been sourced from India, ISRO Chairperson S Somanath said on Tuesday.

Speaking at the 82nd Foundation Day of CSIR, Somanath highlighted that ISRO's expertise spans the entire space domain, with all technical work, including rocket and satellite development and space applications, being carried out in-house.

He said approximately 95 per cent of the materials, devices and systems used in Indian Space Research Organisation's rockets are domestically sourced, with only 5 per cent coming from abroad, primarily high-end electronic components.

"This achievement is a result of collaborations with various Indian laboratories, including national labs, defence labs, and CSIR labs, focusing on material indigenisation, technology capabilities, and research," he said.

Somanath also highlighted significant achievements in electronics indigenisation, including the design and manufacture of critical components such as processors for rockets and main computer chips, both made in India.

"Additionally, ISRO has developed essential components, such as electro-mechanical actuators, DC power supply systems, battery systems, and solar cells within the country," he said.

At the Foundation Day of Council of Scientific and Industrial Research (CSIR), Shanti Swarup Bhatnagar awards were also distributed to 12 young scientists.

Immunologist Dipyaman Ganguli of CSIR-Indian Institute of Chemical Biology, Kolkata; microbiologist Ashwani Kumar of CSIR-Institute of Microbial Technology, Chandigarh; biologist Maddika Subba Reddy of the Hyderabad-based Centre for DNA Fingerprinting, Diagnostics; Akkattu T Biju of Indian Institute of Science Bengaluru; and Debabrata Maiti of the Indian Institute of Technology (IIT) Bombay are among the awardees.

While Ganguli has been awarded in the field of medical sciences, Kumar and Reddy have received the award for their contribution to biological sciences.

At the event, Principal Scientific Advisor Ajay Sood said there is a rationalisation of the awards to truly make it national and to make the selection process transparent.

"From the next year, there will be Vigyan Yuva Shanti Swarup Bhatnagar awards and these awards will not be seven as it is now but will number 25 and these again are meant for yuva scientists, technologists and of course the innovators in almost 12 fields and there is another one which we call others to see any other field that has not been listed," he said.

Sensex falls 78 points

PTI ■ MUMBAI

Benchmark BSE Sensex declined by 78 points in a listless trade on Tuesday due to select profit taking in IT and banking shares in line with weak Asian markets and continuous foreign fund outflows.

The 30-share BSE Sensex fell 78.22 points or 0.12 per cent to settle at 65,945.47 with 14 of its components closing lower and 16 advancing. During the day, it declined 158.06 points or 0.23 per cent to a low of 65,865.63.

The broader Nifty dipped 9.85 points or 0.05 per cent to end at 19,664.70. As many as 23 Nifty shares declined while 27 closed in the green.

Among Sensex shares, IndusInd Bank fell the most by 1.29 per cent, followed by Tech Mahindra (1.28 per cent), Kotak Bank (1.24 per cent) and Infosys (1 per cent).

Asian Paints, ICICI Bank, Titan, and Bajaj Finserv were among the losers.

On the other hand, Nestle India rose the most by 1.58 per cent. Tata Steel, Mahindra &

Mahindra, Bajaj Finance, HDFC Bank and Tata Consultancy Services were among the gainers.

"Markets witnessed a listless trading session and lingered in negative territory for most part of the trading session due to weak Asian and European cues. Traders resorted to selective profit-taking ahead of the next week's RBI policy outcome, while external factors like strength in dollar

index and rising treasury yields continue to dampen sentiment," Shrikant Chouhan, Head of Research (Retail), Kotak Securities Ltd, said.

In the broader market, the BSE midcap gauge dipped 0.09 per cent and the smallcap index climbed 0.33 per cent.

Among the indices, IT fell 0.46 per cent, bankex declined 0.45 per cent, tech (0.36 per cent), consumer durables (0.23 per cent) and financial services

(0.21 per cent).

Commodities, consumer discretionary, FMCG, industrials and telecommunication were among the gainers.

Vinod Nair, Head of Research at Geojit Financial Services said, "Trading remained flat as headwinds from the global market and continued selling by FIIs kept domestic investors under vigil.

"While bargain hunting was visible in small-cap stocks due to the recent correction and favourable valuation compared to large and mid-caps, IT indices slid due to the fear of one more rate hike by the FED and a consequent reduction in spending." In Asian markets, Seoul, Tokyo, Shanghai and Hong Kong ended lower.

European markets were trading on a mixed note. The US markets ended in positive territory on Monday.

Global oil benchmark Brent crude declined 0.79 per cent to USD 92.55 a barrel.

Foreign Institutional Investors (FIIs) offloaded equities worth ₹2,333.03 crore on Monday, according to exchange data.

India's export of polished diamond to dip by 22 per cent this fiscal: Report

PTI ■ MUMBAI

India's exports of cut and polished diamonds (CPDs) is likely to decline by 22 per cent to USD 17.2 billion in 2023-24, amid weak underlying demand conditions in key destinations including the US and Europe, a report said on Tuesday.

CPD exports have been on a declining trend since the second half of FY23 and during the first five months of this financial year shipments witnessed a sharp year-on-year decline of 31 per cent, Icara said in a report.

The decline in CPD exports was led by a fall in both export volumes and polished diamond prices, it added.

While some sequential improvement in volume is expected in the coming months, driven by the onset of the festive season, overall exports are still expected to contract by 22 per cent this fiscal, it stated.

The rating agency has thus revised the sector outlook to 'Negative' from 'Stable'. "The export contraction is

primarily being driven by weak underlying demand conditions in key consuming nations like the US and Europe due to the inflationary pressures, leading to a shift in spending away from diamonds.

"Demand from China, which accounts for 10-15 per cent of the global demand, has also not picked up meaningfully so far," Icara Vice President and Sector Head Sakshi Suneja said.

In addition, competition from lab-grown diamonds, which are priced at a significant discount to natural diamonds, also accentuated the dip in volumes, particularly for the large-sized diamonds in the range of one to three carats, she added.

The report further said that the prices of rough diamonds remain elevated in FY24, with current prices hovering around the 15-year median level, despite some softening seen in the recent months.

These prices had soared in the last two years, following limited supply from mining companies and robust revival in

demand, post the pandemic, it noted.

However, despite subsequent softening in demand, rough prices remained high due to limited availability from Russia in the market, following the US sanctions on Alrosa PJSC - the Russia-owned diamond mining entity, which supplies 30 per cent of the rough diamonds globally.

With intensified sanctions on Russia and no major ramp-up in output of other mining entities, rough prices are expected to remain elevated, the Icara report said.

On the other hand, the prices of polished diamonds continue to be under pressure, with current prices being 15-20 per cent below the 15-year median level.

Coupled with demand pressures and limited ability to pass on the prices, this will shave off 40 bps of the operating profit margins.

"Profitability pressures will result in moderation in the credit metrics of CPD players in FY24. Faced with lower demand, the inventory levels are also expected to increase to an extent, while remaining lower than the pre-pandemic levels," Suneja said.

The CPD players have been conscious in managing their working capital cycle to control their dependence on bank debt. Additionally, recovery from customers has been timely so far. These factors would keep working capital borrowings of the industry under check, Suneja added.

Rupee falls 14 paise to settle at 83.27 against \$

PTI ■ NEW DELHI

The rupee stayed on the downward track for the second straight day to settle 14 paise lower at 83.27 (provisional) against the US dollar on Tuesday due to a firm greenback against major currencies overseas and persistent foreign capital outflows. Besides, weak equity market sentiment and elevated levels of crude oil prices — hovering above USD 92 a barrel — weighed on the domestic currency, forex traders said.

At the interbank foreign exchange, the domestic unit opened at 83.19 and traded between a high of 83.17 and a low of 83.27 against the greenback during the day. It finally settled at 83.27 (provisional), registering a fall of 14 paise from its previous close.

On Monday, the rupee declined by 19 paise to close at 83.13 against the dollar.

Analysts attributed the downward movement of the rupee to a strengthening dollar amid weak Asian markets and rising US Treasury yields. The US dollar surged to a ten-month high level after a Federal Reserve policymaker hinted at a longer interest rate hike due to resilience in the US economy. The 10-year US treasury yields also rose to a 16-year high.

'IndiGo seeks to become bigger, more global'

PTI ■ NEW DELHI

India is an incredible and one of the most competitive aviation markets in the world, IndiGo CEO Pieter Elbers said on Tuesday and asserted that the airline is seeking to become bigger and more global.

The chief of the country's largest airline said it is building its own international network, adding new overseas routes from existing cities and enhancing partnerships with other carriers.

Besides, the carrier is taking various mitigating measures to deal with issues related to Pratt & Whitney (P&W) engines that power its A320 fleet. It has grounded many aircraft due to the engine woes.

IndiGo, which started flying more than 17 years ago, operates nearly 1,900 flights daily with more than 320 planes and has a domestic market share of over 63 per cent. In recent months, the carrier has commenced flights to various overseas destinations, including Nairobi and Almaty.

Against this backdrop, Elbers, on Tuesday, also said that India is an incredible and one of the most competitive aviation markets in the world and there

is also a lot of competition in the market.

"There should be a correlation between price of a ticket and cost of operations... Otherwise, airlines will be out of business," he said and added that IndiGo focuses on affordable fares that goes up and down depending on the season.

The airline connects 32 international and 81 domestic destinations. While highlighting the growth potential of the country's aviation sector, Elbers said IndiGo is going through a "maturing phase" and also stressed the need for having aviation hubs in India, which is under served.

"IndiGo has the ambition to become bigger, better and even more global..." he said.

According to him, the airline has developed a strategy for internationalisation which has three very important elements.

Apart from building its own network, the carrier is connecting existing cities with new routes like Bhubaneswar and Singapore. Besides, it is enhancing partnerships.

Earlier this month, IndiGo announced a codeshare partnership with British Airways. It also has codeshare partnerships with various other airlines.

Cipla introduces drone delivery of critical medicine to Himachal hospitals

PTI ■ NEW DELHI

Drug major Cipla on Tuesday said it has introduced drone-powered deliveries of critical medicines for hospitals and pharmacies in Himachal Pradesh in partnership with Skye Air Mobility.

The Mumbai-based firm aims to deliver medicines for cardiac, respiratory and other essential chronic therapies as part of the initiative.

The use of drones will support on-time deliveries of the company's medicines to chemists and clinics in remote areas while minimising risks such as delays, temperature excursions affecting cold chain products, and roadside accidents, Cipla said in a statement.

"As we accelerate our digital agenda across all functions, implementing drone-powered distribution enhances our sup-

ply chain resilience, strengthens connects with channel partners, helps us stay future ready and maintain reliable, prompt delivery of our trusted high-quality drugs to stockists and patients in the region," Cipla Global Supply Chain Head Swapn Malpani said.

The drug firm said it also aims to scale the service in the future through distribution to hospitals and expand market coverage to inaccessible and hilly terrains such as Uttarakhand and the Northeast region in India.

Focus on innovative products, pharmas told

PTI ■ NEW DELHI

Union Health Minister Mansukh Mandaviya on Tuesday asked domestic pharmaceutical industry to focus on the research and development of innovative products to move up the value chain and achieve global leadership.

Mandaviya, who also holds the Chemical and Fertilisers portfolio, asked medical technology companies to produce critical equipment in India for the global markets.

While formally unveiling the National Policy on Research & Development and Innovation

in the Pharma-Med Tech Sector here, Mandaviya said the domestic pharmaceutical companies invest less on research and development when compared to multinational companies.

"International MNCs spend 20-25 per cent of their profits in research and innovation while for Indian companies the average is around 10 per cent...Till the time we do not come out with research-led innovative products, we cannot lead the segment globally," he noted.

He said the government wants to make the pharma industry self-reliant by 2047.

"Today is a historic day, an

inflection point in the journey of "Atmanirbharta" in the pharma & medical devices sector. We need to transform Indian Pharma & MedTech sectors from a cost-based to a value-based & innovation-based industry," the minister said.

Mandaviya asked the pharma industry to focus on developing quality products and not just focus on the quantity.

"India can only achieve self-reliance in pharmaceuticals and medical devices by strengthening its research and development infrastructure that would drive the expansion of access to life-saving medicines and drugs

and help India become a global pharmaceuticals and medical exports hub," he added.

He said the government has been working closely with the industry and academia to bring about the changes.

The Department of Pharmaceuticals (DoP) notified the National Policy on Research & Development and Innovation in the Pharma-Med Tech Sector in India in August this year.

The policy aims to encourage R&D in pharmaceuticals, including traditional medicines, phytopharmaceuticals and medicinal herbs.

Deadline for demat nominees extended

PTI ■ NEW DELHI

Capital markets regulator Sebi on Tuesday extended the deadline by three months to December-end for existing demat account holders to provide choice of nomination or formally opt out of nomination through a declaration form.

Additionally, submission of 'choice of nomination' for trading accounts has been made voluntary by the regulator as a move towards ease of doing business.

Earlier, the deadline for existing eligible trading and demat account holders to provide a choice of nomination was on or before September 30.

The move is aimed at helping investors to secure their assets and pass them on to their legal heirs. "Based on the representa-

tions received from the exchanges, depositories, brokers' associations and various other stakeholders, submission of 'choice of nomination' for trading accounts has been made voluntary as a step towards ease of

doing business.

"With respect to demat accounts, it has been decided to extend the last date for submission of 'choice of nomination' to December 31, 2023," Sebi said in a circular.

Further, Sebi has given time till December 31, for physical security holders for submission of PAN, nomination, contact details, bank account details and specimen signature for their corresponding folio numbers.

In July 2021, the Securities and Exchange Board of India (Sebi) asked all existing eligible trading and demat account holders to provide a choice of nomination on or before March 31, 2022.

Later, this was extended by one more year till March 31, 2023 and again till September 30, 2023.

Tax department notifies 'Angel Tax' rules for valuing investments in startups

PTI ■ NEW DELHI

The Income Tax Department has notified new Angel Tax rules that comprise a mechanism to evaluate the shares issued by unlisted startups to investors.

While previously the angel tax — a tax levied on capital received on the sale of shares of a startup above the fair market value — applied only to local investors, the Budget for 2023-24 fiscal (April 2023 to March 2024) widened its ambit to include foreign investments.

As per the Budget, the excess premium will be considered as 'income from sources' and taxed at the rate of up to over 30 per cent. However, startups registered by the DPIIT are exempt from the new norms.

The Central Board of Direct Taxes (CBDT) in a September 25 notification spelled out the valuation methodology.

As per the changes in Rule 11UA of I-T rules, the Central Board of Direct Taxes (CBDT) provides that the valuation of compulsorily convertible preference shares (CCPS) and equity shares issued by unlisted startups can be based on the fair market value.

The amended rules also retain the five new valuation methods proposed in the draft rules for consideration received from the non-residents — (i)

Comparable Company Multiple Method, (ii) Probability Weighted Expected Return Method, (iii) Option Pricing Method, (iv) Milestone Analysis Method, and (v) Replacement Cost Method.

Deloitte India Partner Sumit Singhania said from an investors' standpoint, revised rules offer a wider range of valuation methodologies to work with, and that ought to make compliance less onerous henceforth.

"Also, safe harbour permitting 10 per cent deviation from fair value makes room for valuation adjustments when needed. Overall, the trajectory is to align tax valuation methodologies with permissible exchange control norms," Singhania said.

Nangia & Co LLP Partner Amit Agarwal said the amendments to Rule 11UA of the Indian Income Tax Act bring positive changes by offering taxpayers flexibility through multiple valuation methods, simplifying the valuation due consideration, incentivising venture capital investments, facilitating investments from notified entities, providing clarity on CCPS and encouraging foreign investments.

"The inclusion of a tolerance threshold for minor valuation discrepancies further enhances efficiency and fairness in tax assessments, ultimately benefiting both taxpayers and the government.

INDIA CANTERS TO GOLD

She was training at Hagen ATW in Germany before the Asian Games. She rides Adrenalin Firdof.

Anush, who hails from Kolkata, is currently based in Borcheln in Germany. He developed his passion for horse riding after his parents took him to a club in Kolkata. He soon began having horse riding lessons at the age of eight. After having difficulties in finding a coach, he left India in 2017 and moved to Germany. Anush became the first male dressage rider from India to compete at the world championships at the 2022 edition in Herning, Denmark. His horse's name is Etro. Hailing from Mumbai, the 25-year-old Vipul, a business management degree holder from University of London, also began horse riding at a young age.

Since 2013, he began training with top foreign players in Europe.

Interestingly, he build a top-class riding facility and first breeding programme for dressage horses in the country. He rides Chemxpro Emerald.

NIJJAR KILLED IN TERROR CROSSFIRE

Likewise, the Canadian Government not only ignored the intelligence reports of growing Khalistan extremism but also stopped monitoring activities of such groups.

Inter-gang rivalries among gangsters from Punjab are common in Canada now, but the agencies there

ignored it.

The timing of the diplomatic spat between New Delhi and Ottawa suggests that the controversy is not going to die down soon as elections are round the corner in India, Canada and Pakistan a few months away.

Pro-Khalistani elements have been "operating freely" from Canadian soil for nearly five decades in the garb of notions like 'freedom of expression' and 'political advocacy' but the country maintains "complete silence" on intimidation, violence, drug trafficking by these extremists, top sources said.

The bombing of Air India plane Kanishka was perpetrated by Khalistani extremists way back in 1985 and it was the biggest aviation terror attack in the world in the pre-9/11 era.

However, due to the apparent soft-pedaling by Canadian agencies, key accused Talwinder Singh Parmar and his Khalistani extremist cohorts got away scot-free, they said.

If that was not enough, Parmar is now a hero of pro-Khalistan extremists in Canada with banned group Sikhs For Justice (SFJ) naming its campaign centre after him.

During the last four to five years, Khalistani extremists were further "emboldened" and started "operating with impunity" from Canada and issuing blatant threats against Indian diplomats and Hindus.

During the period, links of Canada-based Khalistani extremists have emerged in more than half of the terror cases reported from Punjab, the sources elaborated.

The multiple targeted killings of

Sikhs, Hindus and Christians in Punjab after 2016 were the handiwork of Khalistani separatist Nijjar, whose killing has led to a row between India and Canada. During the period, Research and Analysis Wing, country's external intelligence agency, was helmed by Punjab cadre IPS officer Samant Kumar Goel.

In 2019, when Goel took charge as chief of RAW, the Union Home Ministry then helmed by Rajnath Singh slashed the blacklist of Sikhs barred from travelling to India from 314 to just two. The list officially called the Central Adverse List was pruned in the run up to the opening of the Kartarpur corridor.

Despite India furnishing dossiers on the extremist activities of Khalistani groups, the Canadian agencies never launched any enquiry or investigation against Nijjar and his associates Bhagat Singh Brar, Parry Dulai, Arsh Dalia, Lakbir Landa and many others and they remain "political activists" in Canada.

The lack of cooperation by the Canadian authorities in acting against Khalistani terrorists has led to an increase in the body count in Punjab due to the terror-gangster network operated from Canada, the sources further said. Pro-India Sikh leader, Ripudaman Singh Malik, was killed in 2022 in Surrey in Canada, a murder ostensibly orchestrated by Nijjar.

But Canadian agencies allegedly did not show any urgency in finding the culprits and unravelling the real conspiracy, they said.

Two local criminals who were not of Indian origin were only charged in

the case.

"Soft pedalling" of Khalistanis ensured that moderate and pro-India Sikhs were thrown out of many big Gurdwaras in Canada using the muscle and money power of the pro-Khalistan extremists backed by ISI, they added.

Emboldened by their "rising clout" in the face of official backing in Canada, pro-Khalistan extremists have started openly intimidating the minority Hindus in the Indian diaspora in Canada and defacing their temples.

The recent open threats by Khalistanis to the physical security of Indian missions and diplomats in Canada are a very serious development and challenge the obligation of Canada under the Vienna Convention.

Canada has been vocal in protesting even trivial issues in Punjab but has maintained a "complete silence" on intimidation, violence, drug trafficking and extortion by pro-Khalistan extremists sitting there and affecting both countries, they said.

India has strongly rejected Trudeau's charge of Indian hand in Nijjar's killing subbing the same as "absurd" and "motivated" and expelled a senior Canadian diplomat in a tit-for-tat move to Ottawa's expulsion of an Indian official over the case.

Hardening its stance on the issue, India on September 20 advised all its nationals living in Canada and those contemplating travelling there to exercise "utmost caution" in view of growing anti-India activities and "politically-condoned" hate crimes as well as "criminal violence" in that country.

China refuses cooperation with Pakistan under CPEC

PTI ■ ISLAMABAD

China has refused to further expand cooperation in the areas of energy, water management, and climate change under the multi-billion dollar China-Pakistan Economic Corridor (CPEC), it emerged on Tuesday, signalling a strain in the 'iron-clad' friendship between the two all-weather allies. Cash-strapped Pakistan also gave up its opposition to setting up a new imported coal-fired power plant in Gwadar in Balochistan province and agreed to a number of Chinese demands to address Beijing's concerns, The Express Tribune newspaper reported, citing the signed minutes of the 11th Joint Cooperation Committee (JCC) of the CPEC.

The JCC is a strategic decision-making body of the CPEC and its 11th meeting was held virtually on October 27 last year on the insistence of the Pakistan Muslim League-Nawaz (PML-N)-led government that wanted to showcase some progress. However, the minutes of the meeting were signed almost a year later on July 31 during the visit of Chinese vice premier He Lifeng, highlighting the difference of opinions on both sides that led to such a huge delay in reaching a consensus, the report said. When contacted, the Ministry of Planning stated that it was a global practice for the minutes of meetings between two countries to be signed by both sides only after

due consultation and evolving consensus. Interestingly, the final draft shared with Beijing by Pakistan and the final minutes signed by both sides were different in many ways, the report said.

China's disagreement to further expand cooperation in areas of energy, water management, and climate change under the CPEC underscores "the challenges that both the sides are facing in deepening the economic ties", it said.

The USD 60 billion CPEC, which connects Gwadar Port in Pakistan's Balochistan with China's Xinjiang province, is the flagship project of China's ambitious multi-billion-dollar Belt and Road Initiative (BRI). The BRI is seen as an attempt by China to further its influence abroad with infrastructure projects funded by Chinese investments all over the world.

The CPEC is a collection of infrastructure and other projects under construction throughout Pakistan since 2013. India has protested to China

over the CPEC as it is being laid through Pakistan-occupied Kashmir (PoK).

The details of the final minutes of the 11th JCC showed that China did not agree to a host of measures that Pakistan had proposed in the areas of energy, water management, climate change and tourism in Gilgit-Baltistan, Khyber-Pakhtunkhwa, PoK and the coastal areas.

China excluded cooperation in the areas of cross-border tourism in Gilgit-Baltistan, Khyber-Pakhtunkhwa, PoK and cooperation for the promotion of coastal tourism from the final minutes, the details showed. China also did not agree to Pakistan's proposal for the inclusion of Water Resources Management and Climate Change and Urban Infrastructure Development in the CPEC framework. The proposal for setting up a new joint working group on water resources management and climate change was also rejected by China.

Judicial remand of Imran, Qureshi extended

PTI ■ ISLAMABAD

Pakistan's former prime minister Imran Khan and his close aide Shah Mahmood Qureshi will continue to remain in jail till October 10 as a special court on Tuesday extended for the third time their judicial remand in a case related to the alleged disclosure of state secrets.

Khan, also the chief of the Pakistan Tehreek-e-Insaf (PTI) party, was arrested last month after a case was filed against him for allegedly violating the Official Secrets Act by disclosing a secret diplomatic cable (cipher) sent by the country's embassy in Washington last year in March.

Judge Abul Hasnat Zulqarnain conducted the proceedings inside the high security Attock Jail where the former prime minister has been detained since August 5 after his arrest following conviction in the Toshakhana case. Khan's sentence was suspended by the Islamabad High Court on August 29 in the Toshakhana case, but he continues to

remain in Attock prison in the cipher case.

After the hearing, the judge ordered to keep Khan in judicial custody until October 10 to complete the probe.

It is the third time that Khan, 70, has been sent to jail on remand. His judicial remand was initially extended till September 13 and then again till September 26, along with Qureshi's. The previous 14-day remand ended today.

Qureshi was presented before the special court at the Federal Judicial Complex in Islamabad. The two-time former foreign minister was brought to the court handcuffed. The court authorities informed that his judicial remand in the case was also extended till October 10.

Qureshi, 67-year-old former foreign minister, was arrested under the Official Secrets Act for violating the secrecy of the official cable sent by the Pakistani embassy in the US to the foreign office when he was the foreign minister.

As per the law ministry, Khan's special court proceed-

CIPHER CASE

ings are being held in the Attock jail "due to security reasons".

Security was beefed up outside the jail ahead of the hearing. Talking to the media outside the court, Qureshi lamented that the PTI leadership was being punished for the crimes they haven't committed.

"(Our) conscience is content, intentions are clean... (we) are innocent... God can change hearts and overturn decisions," he said. When asked what would happen if his party is not allowed to contest polls, the vice chairman of the PTI said

the polls would then be "meaningless" and "worthless".

"The importance of the polls would end without PTI participating in it," Qureshi said, adding that the country will suffer an irreparable loss if transparent elections are not held. A day earlier, the Islamabad High Court ordered authorities to shift Khan to the Adiala jail in Rawalpindi. However, the directive was not implemented.

Earlier, the authorities were allowed to conduct hearings of the case in the jail due to security concerns. The cricketer-

turned-politician is charged with the violation of the Official Secrets Act in connection with the leakage of a confidential diplomatic cable from Pakistan's embassy in Washington.

The cipher case was filed last month against Khan on the allegations of violating secret laws of the country in the matter of a cable sent by the Pakistan embassy in Washington in March last year.

In March last year, ahead of the vote of no-confidence that resulted in his ouster, Khan pulled out a piece of paper - allegedly the cipher - from his pocket and waved it at a public rally in Islamabad, claiming it was the evidence of an "international conspiracy" being hatched to topple his government.

However, during the interrogation with the joint investigation team (JIT) in the jail on August 26, Khan denied that the paper he waved at a public gathering last year was the cipher. He also admitted to losing the cipher, saying he couldn't recall where he kept it.

SL prez to meet IMF officials for talks on eco reform plan

PTI ■ COLOMBO

Sri Lankan President Ranil Wickremesinghe will meet the officials of the International Monetary Fund on Tuesday to hold crucial talks on the hard economic reforms undertaken by the government to stabilise the fiscal system of the cash-strapped island nation.

The officials of the International Monetary Fund (IMF) are visiting the country to conduct the first review of its USD 2.9 billion bailout package approved for crisis-hit Sri Lanka in mid-March. The second tranche of USD 300 million is to be released after the ongoing review. During the review, the government will have to convince the global lender that it has fulfilled the conditions set by the IMF to revive the island nation's econ-

omy. "These two weeks would be crucial for our economic reform programme. At this IMF review, we will be assessing the extent to which we have complied in setting up reforms and how far we need to go," State Minister of Finance Shehan Semasinghe told reporters here. Sri Lanka has executed some of the tough reforms to stabilise the nation's economy. Semasinghe said some of the reforms had hit the people hard.

"These were reforms that should have been implemented a long time ago... We only started doing so when the crisis hit," he said.

Sri Lanka was hit by its worst economic crisis in history when the country's foreign exchange reserves fell to a critical low and the public came out on the streets to protest the

shortage of fuel, fertilisers and essential commodities.

The country began seeking the IMF bailout only after it declared its first-ever sovereign debt default in April 2022.

The resultant political crisis forced the then president Gotabaya Rajapaksa to resign in July 2022. His successor Wickremesinghe has steered the economy out of the mess by lowering inflation.

Having entered the IMF programme, the government set in a series of tax and utility services reforms which meant higher taxes and tariff hikes. Still, analysts say the island's economy has only partially recovered. An Indian credit line of nearly USD 4 billion provided a lifeline to the country until the bailout agreement with the IMF was reached.

AP ■ NEW YORK/COLOMBO

The US has expressed concern to Sri Lanka about the likely visit of a Chinese research ship next month that could also cause worries in India which in the past has raised security concerns over docking by China's spy vessels, according to a media report.

US Under Secretary Victoria Nuland, who met Sri Lankan Foreign Minister Ali Sabry in New York on the sidelines of the UN General Assembly session, raised concerns about the upcoming visit of the Chinese research vessel 'SHI YAN 6'. Daily Mirror newspaper reported on Monday. Minister Sabry briefed her that Sri Lanka, as a neutral country, had worked out the Standard Operating Procedure (SPO) to be followed by foreign ships and aircraft in carrying out any activity in Sri Lankan territory.

The minister reportedly told her that Sri Lanka had been even-handed in this approach for all the countries and could not exclude China from the process as a result. Earlier, President Ranil Wickremesinghe also said that the SPO had been worked out for foreign vessels. The Chinese research vessel is expected in Sri Lanka in October to carry out research along with the National Aquatic Resources Research and Development Agency (NARA). Described as a Research/Survey Vessel with a carrying capacity of 1115 DWT, the current draught is reported to be 5.3 metres in length overall 90.6 metres and width 17 metres.

Sri Lanka's Foreign Ministry last

month said it is currently processing a request by China to allow its research ship to dock in the country.

"The Chinese embassy here has made an application and the ministry is currently looking at it," Priyanga Wickramasingha, the foreign ministry spokesperson, had said. No dates have been fixed yet for the visit, she said.

China despatches its research/surveillance vessels to Sri Lanka on a regular basis. In August this year, the Chinese People's Liberation Army Navy warship HAI YANG 24 HAO arrived in the country on a two-day visit.

It was reported that the arrival of the 129-metre-long ship was delayed due to concerns raised by India.

In August last year, a similar visit by the Chinese ballistic missile and satellite tracking ship, 'Yuan Wang 5', which arrived in the southern Sri Lankan port of Hambantota elicited strong reactions from India.

There were apprehensions in New Delhi about the possibility of the vessel's tracking systems attempting to snoop on Indian defence installations while being on its way to the Sri Lankan port. However, after a considerable delay, Sri Lanka allowed the ship to dock at the strategic southern port of Hambantota, being built by a Chinese company.

Cash-strapped Sri Lanka considers both India and China equally important partners in its task to restructure its external debt. China is one of the top lenders to Sri Lanka. Sri Lanka owes USD 7.1 billion to bilateral creditors, including USD 3 billion to China.

Russian drone strikes hit port area, cut ferry service to Romania

AP ■ KYIV

Russia struck the Black Sea region of Odesa in a drone barrage that damaged a warehouse, charred dozens of trucks and injured two drivers in fiery explosions that led to the suspension of the ferry service between Romania and Ukraine, officials said Tuesday.

Meanwhile, a senior Russian naval officer that Ukraine on Monday claimed to have killed in a missile strike was seen attending an online conference.

Video shot from the Romanian side of the Danube River showed rapid bursts of Ukrainian anti-aircraft fire streaking through the night sky followed by two orange fireballs exploding near the port area. Photos showed burned-out frames of trucks.

Romanian Border Police said ferries were anchored on the Romanian shores of the Danube in Isaccea due to the attacks on Ukraine. Traffic was being redirected through Galati, a Romanian town upstream on the Danube.

Ukraine's air force said it downed 26 of 38 drones launched by Russia overnight.

Russian forces targeted the area of Izmail in the Odesa region, in what has become a sustained campaign to target Ukraine's ability to export grain. Attacks on Monday killed two people in a grain warehouse in Odesa and badly damaged an abandoned high-rise hotel, officials said. After Moscow pulled out of a UN-brokered grain deal this summer, the strikes on Izmail and cities located in the southern part of the Odesa region became routine. Attacks on the cities on the Danube have been especially damaging because the route has emerged as the most promising for continued Ukrainian exports. At least nine civilians were killed in Ukraine and 15 people were injured over the past

In this photo provided by the Odesa Region Administration, firefighters work to extinguish a fire in port infrastructure after a Russian rocket attack in Izmail, Ukraine, on Tuesday

24 hours, the presidential office reported, though some of those deaths were also reported Monday. Russian artillery damaged homes, a school, a market and a food processing plant in the southern city of Kherson that is near the front lines of the war, officials said. In fighting in the Zaporizhzhia region in the southeast, the Russian army dropped five aerial bombs on Robotyne, a town Ukraine took in August in its slow-moving counteroffensive.

On Monday, Ukraine claimed without evidence that its missile strike on the Crimean headquarters of Russia's navy last week killed 34 officers, including fleet commander Adm. Viktor Sokolov. Russia did not comment on that report, but on Tuesday Sokolov was seen among other senior officers attending a video conference with Defense Minister Sergei Shoigu.

Although neither side has released casualty figures, the counteroffensive is believed to have taken a heavy toll on both sides and it has been devastating to the towns and villages where fighting has raged.

New aerial video footage of Klishchiivka, on the outskirts of

Bakhmut, shot with a drone for The Associated Press shows how the battle has turned the village in eastern Ukraine into a pile of rubble after months of fierce fighting.

The footage shot two days ago shows the village in ruins with destroyed Russian tanks and military vehicles littering the main road. Barely a building remains intact in the village that was once home to almost 400 people.

A rare structure that still had four walls standing was missing its roof. Single walls stood like tombstones to mark where someone once lived. Ukraine recaptured the village Sept 17 after months of fighting, two days after it won back neighboring Andriivka, the Ukrainian military said. Both are tiny towns but were considered tactically important for Ukrainian forces as they extend gains around Bakhmut, 6 miles (10 km) to the north. The commanding heights of the village offer a view into the Russian-occupied town of Bakhmut and open up new opportunities for Ukrainian forces to encircle the town. It also potentially allows Ukrainians a better view of Russian logistic lines.

20 die, 300 hurt in gas station explosion

Nagorno-Karabakh residents flee

AP ■ YEREVAN (ARMENIA)

At least 20 people were killed and nearly 300 others injured by an explosion at a crowded gas station in Nagorno-Karabakh as thousands of people rushed to flee into Armenia, separatist authorities in the region said Tuesday. More than 13,500 people — about 12% of the region's population — have fled across the border since Azerbaijan's swift military operation to fully reclaim the breakaway region after three decades of separatist rule, Armenia's government said Tuesday morning.

The explosion took place as people lined up to fill their cars at a gas station outside the regional capital of Stepanakert late Monday. The separatist government's health department said that 13 bodies have been found and seven people have died of injuries from the blast, the

cause of which remains unclear. It added that 290 people have been hospitalised and scores of them remain in grave condition.

Armenia's health ministry said a helicopter brought some blast victims to Armenia on Tuesday morning, and more flights were expected.

Azerbaijani presidential aide Hikmet Hajiyev said on X, formerly Twitter, that hospitals in Azerbaijan were ready to treat vic-

tims, but not if any had been taken to them. Azerbaijan has sent in burn-treatment medicine and other humanitarian aid, he said. Gasoline has been in short supply in Nagorno-Karabakh for months, and the explosion further adds to local residents' anxiety about whether they will be able to drive out. The Armenian border is about 35 km (22 miles) from Stepanakert.

Cars bearing large loads on their roofs crowded the streets of

Stepanakert, and residents stood or lay along sidewalks next to heaps of luggage.

The Azerbaijani military routed Armenian forces in a 24-hour blitz last week, forcing the separatist authorities to agree to lay down weapons and start talks on Nagorno-Karabakh's "reintegration" into Azerbaijan. While Azerbaijan has pledged to respect the rights of ethnic Armenians in the region and restore supplies after a 10-month blockade, many local residents feared reprisals and decided to leave. Azerbaijan's blockade of the only road connecting Nagorno-Karabakh to Armenia caused severe shortages of food, medicine and fuel in the region.

Moscow said that Russian peacekeepers in Nagorno-Karabakh were assisting the evacuation. Some 700 people remained in the peacekeepers' camp there by Monday night. Nagorno-Karabakh was an autonomous region within Azerbaijan under the Soviet Union, but separatist sentiment grew in the USSR's dying years and then flared into war.

South Korea parades troops, weapons

AP ■ SEOUL

ARMED FORCES DAY CEREMONY

South Korea paraded thousands of troops and an array of weapons capable of striking North Korea through its capital as part of its biggest Armed Forces Day ceremony in 10 years on Tuesday, as its president vowed to build a stronger military to thwart any provocation by the North. Concerns are growing that North Korea is seeking Russian help in expanding its nuclear arsenal in return for supplying Moscow with conventional arms exhausted by its war with Ukraine. "After looking at your imposing march today, I believe our people would trust you and have faith in our national security," President Yoon Suk Yeol told cheering soldiers at the end of the ceremony in a central Seoul plaza. "I'll always support you together with our people." Earlier, South Korea rolled tanks, artillery sys-

tems, drones and powerful ballistic missiles capable of hitting all of North Korea through the streets of Seoul, amid steady autumn rains.

About 4,000 South Korean troops carrying rifles or flags followed them, accompanied by about 300 US soldiers, in the first such military parade since 2013.

As the soldiers and their weapons went past, Yoon waved, clapped and flashed a thumbs-up.

Since taking office last year, he has been pushing hard to beef up South Korea's defense capability while expanding military drills with the United States in response to North Korea's advancing nuclear arsenal. But a complication in Seoul and Washington's efforts to curb the North's nuclear ambitions is the latest North

Korean push to deepen military cooperation with Russia. Earlier this month, North Korean leader Kim Jong Un travelled to Russia's far eastern region to meet with President Vladimir Putin and visit key military sites.

North Korea reportedly wants to receive Russian technologies to help its development of spy satellites, nuclear-propelled submarines and powerful long-range missiles. Such weapons would pose a major security threat to South Korea and the US.

In a formal Armed Forces Day ceremony at a military airport near Seoul earlier Tuesday, Yoon said he'll strive to build "a strong military that instills fear in the enemy".

"Based on battle-ready combat capabilities and a solid readiness posture, our military will immediately retaliate against any North Korean provocation," he said.

GOAL-FEST CONTINUES FOR INDIA IN MEN'S HOCKEY

PTI ■ HANGZHOU

Skipper Harmanpreet Singh and Mandeep Singh slammed a hat-trick each as favourites India mauled lowly Singapore 16-1 to register their second consecutive win in the men's hockey competition at the Asian Games here on Tuesday.

The Indians continued their goal-scoring spree after the 16-0 rout of Uzbekistan in their tournament opener as they found the net at will against world No.49 Singapore.

Harmanpreet (24th, 39th, 40th, 42nd minutes) and Mandeep (12th, 30th, 51st), Abhishek (51st, 52nd), Varun Kumar (55th, 55th), Lalit Kumar Upadhyay (16th), Gurjant Singh (22nd), Vivek Sagar Prasad (23rd), Manpreet Singh (37th), Shamsher Singh (38th) were the goal scorers for India.

India will next face defending champions Japan on Thursday.

Unexpectedly, the Indians started on a rather sedate note but completely enjoyed the ball possession.

The play was totally in Singapore's half as India dominated the proceedings from the start.

India's first chance came in the sixth minute but Sukhjeet Singh's shot was saved by Singapore goalkeeper Sandran Gagan.

India secured their first penalty corner in the next minute but skipper Harmanpreet Singh's flick was defended stoutly by the Singaporeans.

Two minutes later, Mandeep Singh earned India's second penalty corner but again Singapore goalkeeper Gagan made a terrific save with his stretched right leg to deny Harmanpreet.

India continued to attack and finally broke the deadlock in the 12th minute when Mandeep directed into the goal an inch-perfect pass from Gurjant Singh.

In the last two minutes of the first quarter, India secured as many as three more penalty corners but wasted all.

In all, India secured five penalty corners in the first quarter but failed to convert a single one.

After a not-so-impressive first quarter, India upped their game in the next 15 minutes and pumped in five goals.

India doubled their lead just at the start of the second quarter through Lalit, who found the top right corner of the net after being fed by Sukhjeet, who tricked a couple of defenders and turned 180 degree to find his teammate.

India enjoyed the lion's share of the possession but were unable to find openings in the final third.

India extended their lead in the 21st minute through Gurjant. Mandeep, this time, turned provider as he came up with a cross from the left to find Gurjant who stretched his stick to perfection to find the back of the net.

A minute later, it was 4-0 in India's favour when Vivek Sagar Prasad deflected in a Sumit shot from inside the circle. Harmanpreet finally converted a penalty corner for India in the very next minute to make the scoreline 5-0.

Another set piece followed soon and India went for variation but Sanjay failed to execute the effort.

Just at the stroke of half-time, India secured another penalty corner and this time Amit Rohidas' flick was deflected in by a well-positioned Mandeep.

India thrash Pak & Singapore

PTI ■ HANGZHOU

The Indian squash contingent began its Asian Games campaign with comfortable victories over Singapore and Pakistan, in the men's and women's team competitions respectively here on Tuesday.

The women's team comprising 15-year-old Anahat Singh, veteran Joshna Chinappa and Tanvi Khanna blanked Pakistan 3-0 in its opening Pool B match.

The first singles saw Asian Games debutant Anahat getting past Sadia Gul 11-6, 11-6, 11-3 in 16 minutes.

Joshna, playing the first match of her sixth Asian Games, took 13 minutes to beat Noor Ul Huda Sadiq 11-2, 11-5, 11-7.

India, silver medallists in the previous edition, completed their dominance when Tanvi thrashed Noor Ul Ain Ijaz 11-3, 11-6, 11-2.

Top two teams in Pool A and Pool B progress to the semifinals.

Third seeds India are paired in Pool B alongside Malaysia, Macau, China, Pakistan and Nepal.

In the men's event, top seeds India outplayed Singapore 3-0.

Harinder Pal Sandhu, back to playing singles after a long injury lay-off, had to fight hard for a 11-4, 13-11, 8-11, 7-11 win over Jerome Clement in the opening singles.

India's highest ranked player Saurav Ghosal, who like Joshna is competing in his sixth Asian Games, was tested in the first game by Samuel Kang before prevailing 11-9, 11-1, 11-4 in 37 minutes.

Abhay Singh took care of Marcus Phua in straight games 11-7, 11-7, 11-7 to ensure a comfortable win for India, who face Qatar later on Tuesday.

The others in India's group include Pakistan, Kuwait and Nepal.

Ghosal led team had finished with a bronze in the previous edition.

Having won the gold back in 2014, the team is targeting the top of the podium here.

On Wednesday, the men will face Pakistan in a Pool A game. The clash should be more competitive than the one-side contest in the women's competition.

Divyansh-Ramita miss 10m mixed air rifle bronze

PTI ■ HANGZHOU

India's Divyansh Panwar and Ramita Jindal buckled under pressure as they squandered a big lead to lose to Korea in an engrossing bronze medal match of the 10m air rifle mixed team event at the Asian Games here on Tuesday.

Divyansh and Ramita were leading 8-0 initially but the Korean pair of Park Hajun and Lee Eunseo made a remarkable comeback to win the match 20-18.

Ramita, who on Monday won the 10m air rifle team silver and individual bronze, was the more consistent of the two and had four shots of 10.8 while

Divyansh had one. Divyansh also had two bad shots of 9.9 and 9.8.

The 20-year-old Panwar, who was part of the 10m air rifle gold-winning team on Monday, shot 314.3, while the

19-year-old Ramita shot 313.9 to aggregate 628.2.

Earlier, the Indian duo finished sixth in the qualification round and thus faced third placed team Korea in the bronze medal match.

Unlike the individual 10m air rifle event, where eight shooters qualify for the finals, in mixed team six pairs make the medal round. Here too, the top two placed teams compete for the gold, while the remaining four pairs are divided into two groups and compete for two bronze medals.

The other bronze was won by Kazakhstan who beat Iran 17-11.

Hosts China, who had topped the qualification round, beat Uzbekistan 16-2 in the gold medal match.

It was a medal-less day for the Indian shooters after winning five medals, including a gold, in the first two days of the competition.

Tulika loses in bronze medal match

PTI ■ HANGZHOU

Indian judoka Tulika Maan missed out of a chance to win a medal after going down to Mongolia's Amaraikhan Adiyasuren in the bronze-medal play-off of the women's +78kg event at Asian Games here on Tuesday.

The 25-year-old from Delhi, a silver medallist at the 2022 Commonwealth Games, lost to Adiyasuren 0-10 by ippon at Xiaoshan Linpu Gymnasium here.

Earlier, Tulika knocked out Macao's Qing Lam Lai 10-0 in just 15 seconds with an ippon.

But in the quarterfinal, she lost to Japanese Wakaba Tomita who thrashed her 10-0 with an ippon.

However, she stayed alive to fight for the bronze after beating Chinese Taipei's Jia Wen Tsai with an ippon by 10-

0 in the repechage round.

The losers in the quarter-final rounds enter the repechage round.

Earlier, Indubala Devi Maibam lost to Thai Ikumi Oeda by 0-10 in women's under 78 kg category where the winner made an ippon in round of 16.

India were unfortunate to miss a medal in men's 100kg where Avtar Singh sustained an injury and conceded his quarter-final and repechage matches.

In the round of 16, Avtar defeated Thai's Kittipong Hantratin with a Waza-Ari by 1-0.

But he sustained an injury in the pre-quarters that forced him out of the last-eight, giving Dzhabar Kostoev of UAE a walkover.

In the repechage, Avtar conceded his battle against South Korean Jonghoon.

Boxer Sachin sails into men's 57kg pre-quarters

PTI ■ HANGZHOU

Indian boxer Sachin Siwach put up a dominant display in his opening 57kg bout to sail into the pre-quarters of the Asian Games here on Tuesday.

The 23-year-old managed to dominate the match from the beginning wading off flurry of attacks from the Indonesian with ease using his flashy footwork.

Sachin successfully used his long reach to connect accurate jabs and hooks. As the clock ticked, the 2021 World

Youth Championship grew in confidence to earn a facile win.

He will face Turki Abuquthailah of Kuwait in the Round of 16.

Later in the day, Narender Berwal will play his pre-quarterfinal bout against Kyrgyzstan's Elchoro Uulu Oomatbek in the +92kg weight class.

Indian golf team eyes Asian Games medals

PTI ■ HANGZHOU

The seven-member Indian golf team, comprising the likes of Anirban Lahiri and Aditi Ashok, will be hoping to carry forward its recent superb form when the event commences at the Asian Games here on Thursday.

Lahiri will be leading an experienced set of Indian golfers including Shubhankar Sharma, Khalin Joshi and SSP Chawrasia, while the women's team has the likes of Olympian Aditi, Pranavi Urs and Avani Prashanth.

While Lahiri and Sharma

have been given automatic berths in the men's section, Aditi has been given the same honour among women.

Joshi and Chawrasia among

men and Pranavi and Avani in women came through the qualifiers conducted for amateurs and pros by the Indian Golf Union (IGU).

Indian women's hockey team eyes continental supremacy

PTI ■ HANGZHOU

Top-ranked India will look to assert their continental supremacy with a second women's hockey gold in the Asian Games when they open their campaign against lowly Singapore here on Wednesday.

Placed seventh in the world, India are the top-ranked team in the competition ahead of defending champions and world No.10 Japan.

The Savita Punia-led side would look for redemption when it opens its campaign against Singapore in the Pool A match.

Going by form and rankings, the Indians are considered title favourites but in Japan, world No.11 China, and

world No.12 Korea, some tough opponents await them on their way to ultimate glory.

But since their historic fourth-place finish at the Tokyo Olympics, the Indian women are on a high under chief coach Janneke Schopman and would be gunning for gold, which will give them a direct ticket to Paris in the ongoing Games.

Under Schopman and Savita's leadership, India have only upped their game in the recent past but it won't be easy and they will have to take the pressure aspect in their stride to emerge triumphant here.

"The team is in great shape heading into our first match against Singapore, we had identified areas of

improvement and worked on it in the build-up to the Asian Games. The plan is to start strong and take charge of our games from the start whistle and finish as table toppers," coach Schopman said.

The road to semifinals would be a bit easier for the Indian women as they are grouped with relatively weaker opponents in Pool A consisting of Singapore, Malaysia, Hong Kong and Korea.

Going by world stature, India and Korea are expected to qualify for the semifinal from Pool A, but it won't be smooth sailing beyond that.

Pool B consists of China, Japan, Indonesia, Kazakhstan and Thailand.

The team selection was on expected lines with chief coach Schopman relying on her tried and tested players.

While the Indian goal will be under the watchful eyes of skipper Savita and Bichu Devi Kharibam, the

defence will be manned by vice-captain Deep Grace Ekka, Sushila Channu and Nikki Pradhan among others.

India boast of a strong forward-line in Lalremisiami, Navneet Kaur, Vandana Katariya, Udita and Sangita Kumari while the midfield will be controlled by Neha, Nisha, Salima Tete and Ishika Chaudhary among others.

While India's recent results against strong teams like Australia, England and Germany were not up to the mark, the Savita-led side would look to apply the lessons learnt from those outings in the Asian Games.

After Singapore, the Indian women will take on Malaysia on September 29, Korea (October 1) and Hong Kong (October 3).

Nagal, Raina progress to quarterfinals

PTI ■ HANGZHOU

Counter-puncher Sumit Nagal blunted the challenge of big-serving Beibit Zhukayev with his perseverance while Ankita Raina out-gunned Adithya P Karunaratne without fuss as the two Indians inched closer to singles medals by reaching the quarterfinals at the Asian Games here on Tuesday.

Kazakhstan's Zhukayev served big but Nagal controlled the points better for a 7-6 (9) 6-4 in a riveting men's singles third round while Raina cruised to a 6-1 6-2 win over

her Hong Kong's opponent in the third round of the women's singles event.

The semifinalists are assured of bronze medals in the tennis event at the Games.

However, the singles challenge of Ramkumar Ramanathan and Rutuja Bhosale came to a halt at the Asian Games.

Nagal's movement on the court and the immense retrieving ability was a delight to watch as several times Zhukayev went for drop shots but Nagal reached the ball to fire winners.

Zhukayev was sending down powerful serves and his ground strokes too packed a lot of power but Nagal is not someone who would feel threatened rather he kept the ball in play since he always had an advantage if the points were long.

After saving two set points, Nagal pocketed the opening set by sending down a wishy backhand which Zhukayev failed to return, making a volley error while going for a winner.

A break in the fourth game of the second set handed Nagal an early advantage as he led 4-1. In the long-

drawn seventh game, Nagal saved two breakpoints but the Kazakh finally got the break with a forehand winner down the line.

The 26-year-old shut the door on the Kazakh with another break in game 10 when Zhukayev buried a backhand on net on the second match point.

Raina, the top Indian woman singles player at 198, converted all three breakpoints she got in the one hour 34-minute contest and saved two of the three breakpoints she faced against her 354th-ranked rival.

She will now fight it out with

Japan's Haruka Kaji (ranked 213) for a place in the semifinals.

Ranked 336, Bhosale was up against higher-ranked Alexandra Eala (190) from Philippines and went down fighting 6-7 (5) 2-6 in one hour and 51 minutes.

In the men's singles, Ramkumar took the court against world number 78 Yosuke Watanuki and it was always going to be a tough contest for the Indian, who has been terribly out of form this season.

To his credit, Ramkumar stretched his superior Japanese rival, who had to battle hard for his 7-5 6-

7 (3) 7-5 win in two hours and 40 minute match.

Both Ramkumar and Bhosale are still alive in the doubles competitions.

In the mixed doubles, the top-seeded Indian pair of Yuki Bhambhani and Ankita Raina reached the pre-quarterfinals with a 6-0 6-0 thrashing of Pakistan's Aqeel Khan and Sarah Khan.

However, Bhosale and her partner Karman Kaur Thandi bowed out of the women's doubles after a 5-7, 2-6 defeat against Thailand's Anchisa Chanta and Punnin Kovatitukted in 1 hour and 59 minutes.

INDIA AIM TO WHITEWASH OZ

PTI ■ RAJKOT

Skipper Rohit Sharma would fancy a perfect culmination to Indian team's World Cup preparations as hosts eye a rare clean sweep of Australia in the third and final ODI here on Wednesday.

Never before in the history have India whitewashed Australia in the ODI format. In fact, neither of them have achieved such a result, home or away, irrespective of the number of matches played in a series. Given how perfectly everything has planned out for the World Cup hosts in the lead up to the mega tournament, it would only be fitting that India finish with a deserving 3-0 score-line.

Dominant Indian team, despite the absence of its front-line players and still tinkering with playing combinations to make sure every member has had game-time under their belt, are in pole position to record a fourth consecutive ODI win before the quadrennial event begins.

Gill, Axar, Shami, Shardul & Hardik to miss 3rd ODI

PNS ■ NEW DELHI

Axar Patel, Shubman Gill and Shardul Thakur have not travelled to Rajkot for the third and final ODI against Australia on Wednesday.

Axar, who has been out with a left quadriceps strain since the Asia Cup and was in the squad only for the final ODI subject to fitness, is understood to be recovering well, and the team management expects him to be fit in time for the World Cup. He is currently recovering at the BCCI's National Cricket Academy in Bengaluru. Rohit Sharma, the captain, and Virat Kohli, who both sat out the first two games of the series, are back in the line-up, but Mohammed Shami, who played the first two games, and Hardik Pandya, who skipped the initial games as well, are not with the squad.

ESPNcricinfo understands that with just 13 players around - Mukesh Kumar was called up ahead of the second ODI which Jasprit Bumrah missed - India might be forced to use local first-class players, who are part of the Saurashtra team, to chip in in the field if needed.

If they manage to clinch a 3-0 win, India would also have taken a massive upper-hand over the five-time world champions Australia before the two teams meet again in Chennai on October 8 for their World Cup opener.

It will be no exaggeration in saying India have battered Australia in the first two ODIs despite both the rivals making plenty of changes to keep their top guns fresh, while also putting

miles in the legs of those who would not usually feature in first-choice XIs. There could, however, be some respite for the Australian bowlers as India have rested their young gun Shubman Gill for the final ODI after his 74 and 104 in the first two games, alongwith Shardul Thakur.

In the 50-overs World Cup year, Gill is the only batter in the format with a thousand runs and counting - 1,230 runs to be precise at a staggering average of

72.35 - and his absence from the final game would certainly be felt. But India's batting mainstays Rohit Sharma and Virat Kohli are expected to return and so are the in-form Kuldeep Yadav and Hardik Pandya from a brief resting period during which KL Rahul has led admirably.

Facing some tough questions over squad composition, players' form, fitness and availability, India have turned the tide and how.

That India would end up with a problem of plenty was something not envisaged when the team embarked on the Asia Cup campaign just a few weeks ago. But the likes of Ishan Kishan, Suryakumar Yadav, Mohammed Shami and even Mohammed Siraj have transformed this Indian outfit into as formidable a unit can get.

He took some time to get going and again struggled with his back-related troubles, but

Shreyas Iyer utilised perfect batting conditions in Indore to record a century, which will also consolidate his position in the middle-order.

Much to the delight of the Indian camp, Rahul has delivered the goods with the bat and behind the stumps at the most appropriate time. Like Rahul, Jasprit Bumrah too has proven his fitness and form in a few matches after a long injury lay-off. After resting from the second ODI, India's premier bowler is available for selection.

Even though the team management appears tilted in favour of injured Axar Patel, oldest member of the Indian squad Ravichandran Ashwin would like to make this opportunity count before the contingent is finalised for the World Cup.

For Australia, it is not often that they flop both with the bat and the ball in India with the white ball as miserably as they have in the first two ODIs. The visitors need to gather themselves as the wheels seem to be coming off rapidly following five consecutive defeats in ODIs.

A few months ago, the same side beat India 2-1 with Mitchell Starc haunting the Indian right-handers with his perfect inswingers.

With one last game left before the World Cup begins, Australia would be tempted to play their preferred bowling attack with Pat Cummins and Mitchell Starc coming in, even though the batting lacks the firepower of Travis Head at the top and Steve Smith and Marnus Labuschagne not enjoying a successful year of cricket in India across formats.

Smith's form not a concern: Starc

PTI ■ RAJKOT

Steve Smith might be taking a wee bit more time to adjust to sub-continental tracks but his poor returns in the first two ODIs against India is least of concern for the Australian team management, senior speedster Mitchell Starc said on Tuesday.

Usually a prolific scorer against India, Smith has scores of 0 and 41 in the first two ODIs on batting-friendly tracks, having flopped earlier in the Test series in February-March when he could only manage 145 runs across four Tests.

Starc, who himself is coming back from groin niggle, was speaking ahead of the third and final ODI scheduled on Wednesday.

"No. His (Smith) numbers speak for himself," Starc replied to a query on Smith's current form.

"He (Smith) has been a high class player and has been a massive part of all formats for Australia, so no concern there. It is the adjustment factor, coming back to India after a series in South Africa, some guys are coming off a break," Starc told reporters here ahead of Australia's training session at the Saurashtra Cricket Stadium.

Starc, who might make a comeback in the third game then underlined the reasons for Australia's back-to-back defeats in Mohali and Indore.

"I think we have seen the wickets change throughout both the games, depending on who batted first and in different places. Spin was a massive factor in the second innings the other night (in Indore). We played pretty well under lights in Mohali," Starc said.

The left-arm pacer said conditions are still proving challenging for Australian touring party, which comprises of a few fresh faces such as left-arm bowler Spencer

Johnson.

"We have got a lot of guys with IPL experience, we know that the wickets are going to be very different through the night and day, depending on which part of India we play as well — not too many grounds we have played back to back games so, conditions are going to play a part," he said.

Starc conceded that Rohit Sharma's India are favourites to win the World Cup while adding that adaptability will be key for Australia to find their form.

"We have used quite a wide squad of players, whether that be managing players or players coming back from injury, trying different combinations and what not," he said. The pacer admitted that Australia's current form isn't ideal in the run-up to a marquee event.

"Obviously, leading into the World Cup, it is not a position we want to be in but plenty to play for tomorrow - what the make-up of our team looks like, what we want to take into our World Cup campaign."

Starc said like him, Glenn Maxwell too has his sights set on the World Cup.

"He (Maxwell) is on track as well. I am not sure about his particular timeline but no doubt he will be looking to make an impact as soon as he gets his chance," Starc said.

"He has got a wealth of experience over here through IPL, through multiple tours. He is certainly an x-factor no matter whichever team he plays for. This is his third one-day World Cup, he is an x-factor for us who can take the game on."

"His ability with the ball, particularly in these conditions adds to another option in the bowling department as well. He seems in good spirits, (but) his return I am not sure what that looks like for this week but certainly on track for the World Cup," Starc added.

PTI ■ LAHORE

Most of the Pakistan squad members have not played in India before but skipper Babar Azam on Tuesday exuded confidence, saying his team has done its homework for the ODI World Cup beginning on October 5.

Pakistan team's visas were finally cleared on Monday night and the side will be reaching Hyderabad via Dubai on Wednesday.

Only Mohammad Nawaz and Agha Salman have played in India before. Babar could not travel to India for the T20 World Cup in 2016 due to an injury.

"Although we have not played in India before, we are not taking too much pressure. We have done our research and we have heard the conditions are similar to how they play out in other Asian countries," said Babar in the pre-departure media

We have done our research: Babar

conference here.

"It is quite an honour for me to travel as the captain this time around, I hope we come back with a trophy this time," he added.

Azam, one of the leading batters in the game, will be expected to score a bagful for runs for his team in the ICC showpiece. He is especially looking forward to the big game against India in Ahmedabad on October 14.

"I am excited to play in Ahmedabad as it will be jam-packed. I will try my best to perform up to my potential. I am not worried about my individual accolades, I want to make sure whatever I do helps the result for the team ...

"Whenever there is a tour coming up, I spend some time planning for it. I prepare accordingly to [the teams I have to face

and make goals for myself. I try to set targets for myself and then I give my 100% in the ground.

"It is a chance to become a hero as every World Cup performance gives you a different kind of confidence. Everyone is at their best during the World Cup,

so whenever you perform there, it is an altogether different feeling," he said.

Babar said the team will be missing the services of injured pacer Naseem Shah. He also asserted that there is no bad blood in the dressing room fol-

lowing the Asia Cup disappointment.

"There is no ill will in the dressing room. There are discussions after every loss but they get twisted into something else entirely. The entire team is like a family and there is love and respect there."

Hasan Ali has been named Shah's replacement and Babar said he was picked because of his rich experience.

"Of course we will miss Naseem Shah as Shaheen [Afridi] and Naseem bowling together gave us a different edge. It was not easy to pick his replacement, but we all sat together and got input from [chief selector] Inzamam ul Haq."

"We went with Hasan Ali because he has experience. He has played the World Cup before. I cannot comment who will bowl the new ball or the old ball, as we cannot reveal our strategies right now."

Williamson targets World Cup return

AP ■ WELLINGTON

Less than six months after knee surgery threatened to rule him out of next month's ODI World Cup, the goal of captaining New Zealand in India has been the key driver in getting Kane Williamson through his recovery.

The 33-year-old tore the cruciate ligament in his right knee playing for Indian Premier League side Gujarat Titans in April, which looked to have scuppered his chances of making the showpiece tournament.

However, intense rehab work has meant a speedy recovery.

Williamson hopes to be ready for the Black Caps opening game against defending champions England on October 5, a repeat of the 2019 final his side narrowly lost.

"It would be great. Naturally, you want to be back playing when you are fit and ready, sooner rather than later," he said.

"You hope that ends up being around that World Cup time, but I'm still being very focused on the rehab day-to-day and not wanting those targets to stretch it to a point where you take a backward step."

Williamson is already batting in the nets again, which the injured knee can handle.

"For running, it's not quite 100 percent, but making good progress," he added.

Black Caps coach Gary Stead said there was no fixed date for when Williamson will play again.

But his return will be a big boost. He was player of the 2019 tournament with centuries

against South Africa and the West Indies in leading New Zealand to the cusp of lifting the trophy.

Williamson, who has chalked up over 6,500 runs in

ODI cricket, is desperate to appear in a fourth World Cup, admitting the prospect "keeps you in the gym every day and working hard".

"It's been really pleasing to

see the progress and keep taking those little steps forward," he added.

While New Zealand have warmed-up for the World Cup with tours of England and

Bangladesh, Williamson's injury has limited his preparations.

But he is not overly concerned.

"Naturally, it isn't ideal, but I didn't get too much of a say in it. It's the only option I have in front of me and the prospect of playing another World Cup is really, really exciting," he said.

"It's something you always want to be a part of but I didn't want that to dictate my rehab. At the same time, having a carrot at the back of your mind is helpful."

Despite a burning desire to play, the New Zealand skipper said he would have no problem withdrawing from the squad if the injury flared up.

"I only want to be there if I can add some value and I'm fit and ready to go," he said.

Williamson already knows about spending time on the sidelines after returning last year from a lengthy spell out with an elbow injury.

"Working through injuries are part of the job, so being ready for whatever's next is the goal," he said.

Boult looking for 'one more run' at WC title

AP ■ WELLINGTON

After 12 months out of one-day international cricket, New Zealand seamer Trent Boult is relishing a third crack at the 50-overs World Cup after bitter defeats in the last two finals.

Boult is back in the frame for October's ODI World Cup after signing a casual-playing agreement with New Zealand cricket chiefs.

"I fully appreciated the fact that in giving my contract back, you open the door for other players," he said. "The decision was solely made around just being away from home a lot."

"Selection for the World Cup was never guaranteed. I had to work for it, so I am very happy to be here."

"I've been very fortunate to play in a couple of World Cup finals and been on the wrong side of all of them," he said with a

wry smile.

"It's a cliché, but you learn more when you fail than when you succeed. I feel like I'm a better cricketer for that experience."

There is no changing past finals, of course, so Boult has his eyes fixed on the future in the hope it will be third time lucky.

"I'm looking forward to hopefully get one more run and lifting the trophy in a couple of weeks time," he said. "That's the big focus for a lot of us."

Miller holds record he would prefer not to have

AP ■ CENTURION

David Miller holds an international cricket record he would prefer not to have.

No one has played more international cricket without playing in a Test match than Miller.

The hard-hitting left-hander has played in 274 white-ball internationals. The nearest contender for the non-Test record is retired West Indian Keiron Pollard on 224.

"I would have loved to play a Test, but it is what it is," says Miller, 34.

"I've achieved quite a lot in my white-ball stuff and I'm grateful to have played so many games."

Miller has built a solid first-class record, averaging 36.32 in 63 matches, with six centuries, which he backed up with electrifying fielding.

But it was a time of plenty in a South African Test batting line-up which included Jacques Kallis, Hashim Amla, AB de Villiers and Faf du Plessis, while white-ball cricket was becoming ever more prevalent — and lucrative.

In 2018, nearing his 30th birthday, he retired from first-class cricket.

"I wasn't being picked, even for the South Africa A side. There were guys ahead of me so I decided to concentrate on the white-ball stuff."

He is in demand from franchises around the world — playing for 22 different represen-

tative teams — and a crowd favourite in South Africa where supporters wave banners proclaiming 'Killer Miller' and 'It's Miller Time'.

He is one of only four players who has scored more than 3,000 runs in ODIs with an average above 40 and a strike rate above 100. The others are De Villiers and England's Jos Buttler and Jonny Bairstow.

Batting at number six in a side without established all-rounders, Miller will likely be in situations at the World Cup where he will have to take responsibility for rebuilding an innings.

"It's about summing up the situation. Sometimes you are batting with the lower order and you have to decide with your partner at the time how you are going to go about it."

"It's like a chess game at times. You are thinking about moves and what's important

and what's not. It's about making clear decisions. It helps your execution when you are fully committed."

Both sides of Miller were on display when South Africa had to win the last three matches of a recent home series against Australia after losing the first two.

In the fourth match he thrashed an unbeaten 82 off 45 balls as he and an inspired Heinrich Klaasen added a scarcely believable 222 off 94 balls for the fifth wicket.

In the deciding match, in trickier conditions, he made a more measured 63 off 65 balls to enable South Africa to get to a defensible total after a difficult start.

"The World Cup is very open," he says. "We're a pretty experienced team. We're capable of doing it, so it's a matter of getting the basics right for longer periods of time."
